leadership of Emir Mubarak al Sabah (1896–1915). The discovery of oil in 1938 led to a more direct British involvement in Kuwaiti affairs, until Kuwait gained full independence in 1961. A constitution and national assembly were established in 1962, but the assembly was dissolved in 1976 and again in 1986. The current emir, Shaikh Jabir al Ahmad al Jabir al Sabah, rules by decree. A founding member of the ORGANIZATION OF PETROLEUM EXPORTING COUNTRIES (OPEC) in 1960, Kuwait joined the UNITED NATIONS in 1963. In the 1980s Kuwait was affected by the IRAN-IRAQ WAR, enduring Iranian bombing and several terrorist attacks. Territorial claims by neighboring Iraq led to clashes with Kuwait in 1961 and 1973–74 and Iraq's invasion of Kuwait in August 1990. (See PERSIAN GULF WAR.) Attempts to negotiate an Iraqi withdrawal failed, leading to war. On January 16, 1991, American-led UN forces initiated an air attack against Iraq to forcibly remove it from Kuwait. A UN ground offensive launched on Feb. 21, drove the Iraqis out of Kuwait

in less than a week. Kuwait suffered greatly during the Iraqi occupation; 600 Kuwaiti oil wells burned out of control, creating an ecological and economic disaster. Fulfilling a promise he had made during the Iraqi occupation, the emir permitted new elections for the National Assembly, which had been dissolved in 1981. In 1999 the emir granted women the right to vote, but this was rejected by the parliament.

In 2006 Sheikh Jaber, who had led the country since 1977, died after suffering a minor stroke in 2001. Soon after he was succeeded by Crown Prince Sheikh Saad al-Abdullah al Sabah, the Kuwaiti parliament removed Sheikh Saad al-Abdullah on grounds of ill health and replaced him with Sheikh Sabah al-Ahmad al Sabah, who had been prime minister since 2003.

Kuzmin, Michael Alekseyevich (1875–1936) Russian poet. A member of the Symbolist group, although his work is not considered part of the Symbolist school because his poetry is less solemn. Kuzmin's poems are often

a blend of religious themes with a refined sensuality and are very carefully crafted. *Songs of Alexandria* (1906) is usually considered his best collection of verse. This was followed by *The Seasons of Love* (1907). Kuzmin also wrote scenarios for plays, ballets and operettas. In 1910 Kuzmin wrote *Concerning Beautiful Clarity*, a manifesto on poetry that marked the transition from Symbolism to ACMEISM.

Kuznets, Simon (1901–1985) Ukrainian-born economist. Kuznets immigrated to the U.S. in 1922 and did his most important work during a lengthy affiliation with the National Bureau of Economic Research. In 1971 while professor emeritus of economics at Harvard University, he was awarded the NOBEL PRIZE in economic science for his development of the concept of the gross national product (GNP).

Kuznetsov, Vasily V. (1901–1991) Soviet diplomat. He played a role in the negotiations surrounding several major international events of the 1960s, including the CUBAN MISSILE CRI-

SIS of 1962, the SOVIET INVASION OF CZECHOSLOVAKIA in 1968 and the Sino-Soviet dispute. He served as first vice president under Leonid I. BREZHNEV and was also a nonvoting member of the Politburo from 1977 to 1986.

Kwangtung (Guangdong, Kuang-Tong) Southernmost province of CHINA, on Liaoning Peninsula. The KUOMINTANG was formed here in 1912 by SUN YATSEN. was also the center of CHIANG KAI-SHEK's Nationalist forces in the 1920s.

Ky, Nguyen Cao (1930–) South Vietnamese military officer and political leader. Ky was drafted into the Vietnamese National Army (raised by the French to combat the VIET MINH insurrection) in 1950. After serving as an infantry lieutenant, he volunteered for pilot training and, after advanced training in France and Algeria, graduated as a fully qualified pilot in 1954. Rising to the rank of lieutenant general in the newly formed South Vietnamese Air Force, he was one of the Young Turks who seized power in 1965 to end the near anarchy that had followed

the assassination of President Ngo Dinh DIEM two years earlier. Ky was elected by the Armed Forces Council to serve as prime minister. In 1966 Buddhists and other political factions demanded Ky's ouster; and protests, including immolations, took place in various cities, as they had under the Diem regime. The disturbances ended partly as a result of a government crackdown and partly because of a loss of support for the Buddhists among dissident elements of the military. Ky continued in the post of prime minister until the elections of 1967, when he became vice president of South Vietnam. He served in that position until 1971, when he chose not to run as an opposition candidate against President Nguyen Van THIEU. He reverted to the rank of air marshal in the air force. On April 29, 1975, during operation Frequent Wind, he flew from Saigon to join the U.S. evacuation fleet. (See also VIETNAM WAR.)

Kyrgyzstan Territory of the Russian Empire (1876–1921), the RUSSIAN SOVIET FEDERATED SOCIALIST REPUBLIC (RSFSR), the UNION OF SOVIET SOCIALIST

REPUBLICS (USSR, 1922–91), and independent nation-state (1991–). Kyrgyzstan was one of several territories acquired by the Russian Empire in its expansion in Central Asia during the latter half of the 19th century. Under Russian rule the inhabitants of the area were incorporated into the territory of Turkistan, and had to cope with an influx of Russian settlers. After the Bolshevik Revolution of November 1917, the predominantly Muslim Kyrgyz attempted to gain their independence, but they were suppressed first by the remaining czarist forces in the region, and later their territory came under the control of the Bolsheviks following their victory in the RUSSIAN CIVIL WAR OF 1918–20. The new Communist government established modern-day Kyrgyzstan within the RSFSR as the Turkistan Autonomous Soviet Socialist Republic. Turkistan's area also included the current independent states of Tajikistan, Turkmenistan, Uzbekistan and a portion of Kazakhstan. Two years after the RSFSR reconstituted itself as the USSR, in 1922, the Soviet government redrew the borders of its Central Asian provinces and au-

KYRGYZSTAN

1917–1924	Kyrgyzstan is part of the independent Turkestan republic.
1924	Kyrgyzstan becomes an autonomous republic within the USSR.
1930s	An agricultural collectivization program provokes <i>basmachi</i> resistance, and local “nationalist communists” are purged from the Kyrgyz Communist Party (KCP).
1936	Kyrgyz ASSR is granted full republic status.
1990	The conflict over land between Uzbeks and Kyrgyz in Osh region explodes into rioting, killing at least 320 on both sides.
1991	Kyrgyzstan asserts its independence on August 31 in the wake of Soviet Union's disintegration. Askar Akayev is confirmed in October as president of the new republic, which joins Commonwealth of Independent States.
1995	The Supreme Assembly vetoes Akayev's proposal to extend his term to 2001, forcing a presidential election in December, which Akayev wins.
1996	A second constitutional referendum further heightens the president's powers.
1997	Human rights groups report increasing instances of government repression and jailing of journalists and opposition figures.
2005	The “Tulip Revolution” forces Akayev to resign. The presidential election held soon after is won by Kurmanbek Bakiyev.

onomous regions to reflect their ethnic composition. The Kara-Kyrgyz Autonomous Region was formed, comprising modern-day Kyrgyzstan. The following year, the region became an autonomous republic within the USSR and in 1936 it achieved the status of a constituent Soviet Socialist Republic (SSR). Under the rule of Joseph Stalin, the area was subjected to the forced collectivization of all arable land into state agricultural farms and grazing areas and the forced relocation of the largely nomadic Kyrgyz to work on these farms. During the COLD WAR (1947–91) Kyrgyz's sizable uranium reserves led to a large influx of Russian miners and engineers to extract the uranium for use in the Soviet nuclear weapons program. Russian workers were accompanied by an expansion of primary and secondary institutions in which Russian was the exclusive language of instruction.

The Russian cultural presence in Kyrgyz began to diminish in 1985 due to Soviet premier MIKHAIL GORBACHEV's political policy of glasnost, or "openness," which permitted autonomy to the 15 SSRs of the Soviet Union. As a result of this increasing autonomy, the Kyrgyz began to form associations with political agendas.

The republic suffered from increased ethnic conflicts between the Kyrgyz and the Uzbeks (an ethnic group comprising about 14 percent of the province's population) in the city of Osh, located near the border between Kyrgyz and the Uzbek SSR, which led to an outbreak of urban violence between Uzbeks and Kyrgyz in June 1990. In October the province's Supreme Soviet designated the liberal and reform-oriented Askar Akayev as president. Akayev won widespread respect as an innovator and as one of two SSR presidents (the other being Boris Yeltsin) who immediately openly denounced the August 1991

coup attempt by reactionary members of the Communist Party of the Soviet Union. After the failure of the coup, the Kyrgyz Republic voted to secede from the Soviet Union and change its name to Kyrgyzstan.

Since declaring independence, Kyrgyzstan has attempted to balance the interests of Kyrgyz nationalism with efforts to remain linked economically with neighboring republics in Central Asia. The relationship between the state and its Russian minority has been particularly strained since 1991. Following the failed effort to make Russian the second official language of the republic (after Kyrgyz), Russian emigration from the republic continued at a high rate. In an effort to jump-start free-market reforms Akayev halted the circulation of the Russian ruble as the country's currency, and instead instituted its own currency, the som. In response, Russian president Yeltsin terminated continued Russian subsidies to formerly state-owned heavy industries in Kyrgyzstan. After Akayev won reelection as president in 2000 amid allegations of electoral fraud, his status as a symbol of Central Asian democracy was diminished. In 2001 Kyrgyzstan allowed the U.S. to use the country's territory during the military campaign against the Taliban regime in nearby Afghanistan. The following year construction began on a large U.S. airbase near the city of Bishkek as part of U.S. president George W. Bush's war on terror. In 2005 parliamentary elections criticized by international observers as fraudulent incited nationwide protests, dubbed the "Tulip Revolution," that forced Akayev to resign and flee into exile. Kurmanbek Bakiyev won the presidency in the 2005 election held soon after Akayev's ouster.

L

Labouisse, Henry R(ichardson) (1904–1987) U.S. diplomat. In the late 1940s, Labouisse was one of the principal organizers of the MARSHALL PLAN, the U.S.-backed program for the economic recovery of postwar Europe. From 1954 to 1958 he was director of the United Nations Relief and Works Agency for Palestinian Refugees. He was U.S. ambassador to Greece from 1962 to 1965. He returned to the United Nations in 1965 to head the United Nations International Children's Emergency Fund (UNICEF), a post he held until 1979.

Labor Party (Israel) Israeli political party formed in 1930. The Labor Party was originally called Maipai, from Mifleget Poalei Yisrael (Israel Workers Party). One of its organizers was David BEN-GURION, who became the first prime minister when ISRAEL became independent in 1948. He remained in power almost continuously until 1963, and Maipai repeatedly dominated the elections. In 1965 Ben-Gurion and his protégés, Moshe DAYAN and Shimon PERES, left Maipai to form Rafi, which advocated more technocratic efficiency in government. Rafi rejoined Maipai in 1968 along with Achdut Haavodah, another political party previously associated with Maipai, to formally create the Israel Labor Party under Prime Minister Levi Eshkol. Upon his death in 1969, he was succeeded as partly leader and coalition prime minister by Golda MEIR, who remained in office until 1974. The subsequent administration of Yitzhak RABIN was beset by

corruption scandals and internal conflict. The Labor Party lost the 1977 elections and remained in opposition throughout the 1980s, except for a short-lived coalition with Yitzhak SHAMIR. The Labor Party returned to power from 1992 to 1996 under Yitzhak Rabin and Shimon Peres, and from 1999 to 2000 under EHUD BARAK. After its electoral defeat in 2000 by the Likud Party, headed by Ariel Sharon, the Labor Party struggled to redefine its political program and languished in opposition. In 2005 Shimon Peres announced he was leaving the party and planned to join Ariel Sharon's new Forward (Kadima) Party.

Labour Party (New Zealand) NEW ZEALAND political party formed in 1916. The Labour Party entered its first general election in 1919. While it maintained policies favorable to farmers, the party gained prominence in the 1920s when New Zealand became increasingly urbanized. Labour won a majority in 1935 and remained in power until 1949 under the leadership of Prime Ministers Michael SAVAGE and Peter FRASER. During that time many relief and social welfare programs were instituted, including a state health care program in 1941. Labour came to power again in 1957 by a slim majority led by Prime Minister Sir Walter Nash, but he was unable to cope with a severe economic crisis, and the National Party was elected in 1960. From 1972 to 1975 Prime Ministers Norman Kirk and Wallace Rowling led Labour governments. After nine years of Na-

tional administration, the Labour Party, led by David LANGE, was voted back into power in 1984. Led by Prime Minister Helen Clark, the Labour Party returned to power in 1999, and retained a governing majority in the elections of 2002.

Labour Party (United Kingdom) British political party formed in 1906. Labour Party membership can be either individual or collective, and the party is comprised of a network of constituency associations overseen by 11 branch offices. At the national level are the national Executive Committee and the Parliamentary Labour Party (PLP) whose members act as shadow cabinet to the party.

Labour Party philosophy reflects its socialist origins. It is strongly supportive of trade unions, government health and social welfare programs, and generally shares the political stance of the liberal faction of the American DEMOCRATIC PARTY. At various times the Labour Party has advocated British withdrawal from the EEC, unilateral nuclear disarmament and abolition of the House of Lords and of private schools.

The Labour Party arose from the Labour Representation Committee that had been formed in 1900 by the FABIAN SOCIETY, the Independent Labour Party, and trade unions. Two Labour MPs were elected in 1900, and 30 in 1906. By 1922 it had become the second largest British political party. In 1924 and from 1929 to 1931, minority Labour governments held office

with the support of the LIBERAL PARTY. In the 1945 elections Labour won a sweeping victory and Clement ATTLEE became prime minister. He instituted a broad range of social reforms, including the creation of the NATIONAL HEALTH SERVICE. By the 1950 elections, however, the Labour majority had dwindled, and the Conservatives returned to power in 1951. Subsequent Labour governments were from 1964 to 1970 under Harold WILSON and from 1974 to 1979, first under Wilson and then under James CALLAGHAN. The Labour Party has a history of factionalized squabbling between its left-wing and moderate elements. Beginning in the 1970s the party's left gained prominence, taking control in 1980 when Michael FOOT became leader. In 1981 several moderate members left to form the SOCIAL DEMOCRATIC PARTY. Following Labour's stunning defeat in the 1983 general elections, Neil KINNOCK became party leader. Initially a member of the left of the party, Kinnock became somewhat more moderate since 1983. Although the Labour Party failed to unseat the Conservatives in the 1992 national election, it defeated the Conservatives in May 1997 and retained a majority in 2001 under Prime Minister TONY BLAIR.

Lacan, Jacques (1901–1981) French psychologist, philosopher and literary critic. Lacan was a brilliant polymath who was jointly influenced by STRUCTURALISM, especially the works of linguistics theorists Roman Jakobson and Ferdinand de Saussure, and by the psychoanalytic theories of Sigmund FREUD. Lacan posed the theory that the structure of the unconscious resembled that of a language. He also argued that Freudian theory, while it discussed the nature of repression, had fallen victim to it by repressing its extreme significance. Lacan, who founded the Ecole Freudienne de Paris in 1963, was an unorthodox psychoanalytic practitioner who sometimes substituted 10-minute therapy sessions for the standard one-hour encounter. His major essays are collected in *Ecrits* (1966). Other works by Lacan include *The Four Fundamental Concepts of Psychoanalysis* (1978) and *Speech and Language in Psychoanalysis* (1983).

Lacey, James Harry "Ginger" (1917–1989) British World War II fighter pilot. During the BATTLE OF BRITAIN (1940) Lacey shot down 18 enemy aircraft, more than any other pilot. Throughout the war, he shot down a total of 28 German Luftwaffe aircraft, including one that was returning from a bombing raid on Buckingham Palace.

Lachaise, Gaston (1882–1935) French-American sculptor. Born in Paris, Lachaise learned classical sculptural technique at the Ecole des Beaux-Arts, Paris. Emigrating to the United States in 1906, he executed sculptural details for the artists H. H. Kitson and Paul MANSHIP, working on such commissions as New York's Telephone and Telegraph Building and RCA Building. Lachaise is best known for his monumental figures of women. Powerful and voluptuous, these nudes seem to float pneumatically on tiny feet. They include the famous *Standing Woman* in the collection of the MUSEUM OF MODERN ART, New York City.

Lacoste, Robert (1898–1989) French socialist politician. Lacoste was best known for his opposition to the concept of Algerian independence in the late 1950s. His strong nationalist support of a French-controlled ALGERIA put him at odds with his own socialist party and eventually contributed to the downfall of France's Fourth Republic.

Lady Chatterley's Lover Novel by D. H. LAWRENCE first published in Italy in 1928. An edited version was published in England in 1932; the full text was not published there until 1960. The book tells the story of Constance Chatterley who is married to Sir Clifford, an enfeebled intellectual wounded in WORLD WAR I and confined to a wheelchair. Lady Chatterley develops a satisfying and passionate relationship with the gamekeeper, Oliver Mellors. She becomes pregnant, and the novel ends with she and Mellors both seeking divorces and hoping for a life together. Lawrence contrasts the effete upper classes with the potency and earthiness of the lower. The novel's frank treatment of sexuality caused it to be banned as obscene in England. Its publication in 1960 caused the publishers, Penguin, to be embroiled in a

prosecution under the Obscene Publications Act of 1959, and many authors, including E. M. FORSTER, spoke on behalf of the defense. Penguin was acquitted.

Laemmle, Carl (1867–1939) German-born motion picture producer and president of UNIVERSAL PICTURES. The diminutive Laemmle came to America in 1887 at age 13 and rose from errand boy at a New York drugstore to owner of his own company in 1907, a film distribution exchange called the Laemmle Film Service. Two years later, in defiance of the newly formed Motion Pictures Patents Company—a trust organized by Edison and others to put independent distributors and producers out of business—Laemmle founded the Independent Motion Picture Company of America (IMP), a forerunner of Universal Pictures. From his New York office he became one of the most powerful men in the film industry, not only defeating the trust in a court action in 1912, but also launching the "star system" and the feature-length film, among the most important innovations in film history. "Laemmle wasn't a brilliant aesthetic innovator," writes historian Neal Gabler, "but he had become a brilliant exploiter." After the opening in 1915 of the vast Universal City complex, a 230-acre municipality and studio facility in California's San Fernando Valley that cranked films out like a factory assembly line, he presided over operations until 1929, when he transferred power to his son, Carl Jr. The young Laemmle was one of 15 relatives eventually placed on the company payroll.

Laetrile (also called vitamin B-17, amygdalin) Controversial chemical substance, claimed by some people to be a cure for cancer and by others to be a quack remedy. Laetrile occurs naturally in apricot pits, peaches, bitter almonds and other plants. It contains small amounts of the poison cyanide. In the 1970s laetrile was legally available in many countries but was banned in the United States by the Food and Drug Administration. Laetrile's promoters claimed that since there was no evidence that it was harmful, it should be legally available in the United States to patients who wanted it. The FDA said that numerous tests had indicated that

laetrile was therapeutically worthless. The agency warned that cancer patients who put their faith in laetrile might be risking their lives by failing to receive orthodox medical treatment. Some authorities felt that laetrile's promoters were taking advantage of desperately ill people. Many cancer patients went to Mexico to receive laetrile treatment, and others obtained laetrile illegally in the United States. In 1977 federal judges ruled that terminally ill patients should have the right to receive laetrile even if there was no proof that it could cure cancer. Most of the American medical establishment continued to question laetrile's effectiveness.

La Farge, Oliver (1901–1963) American author. La Farge won the PULITZER PRIZE in 1929 for his novel *Laughing Boy: A Navaho Romance*, which dramatized the painful effort of American Indians to adjust their age-old ways to the modern age. La Farge went on to serve as director for the Eastern Association on Indian Affairs (1930–32), and as president of the National Association on Indian Affairs (1933–37) and the American Association on Indian Affairs (1937–42).

Lafayette Escadrille Renowned unit of volunteer American flyers in the French air service before the U.S. entered WORLD WAR I. It was reorganized in 1918 as the U.S.'s 103rd Pursuit Squadron. The escadrille (squadron) consisted of 38 flyers, only six of whom survived the war.

La Follette, Robert Marion (1855–1925) U.S. politician. A law graduate, he was elected district attorney and, later, to the Wisconsin House of Representatives as a Republican. In 1901 he was elected as the governor of Wisconsin; over a period from 1903 to 1905 many of his liberal reform policies were adopted. These included pensions for the blind, old age assistance, unemployment compensation and laws governing working conditions of children. He was one of the first to call on economic and other experts as government consultants. As a member of the U.S. Senate from 1906 to 1924, he became one of its most influential men. In 1909 he organized the National Progressive Republican League, from which Theodore ROOSEVELT adopted many of La Follette's liberal ideas.

Later, he opposed American entry into WORLD WAR I, but supported most of Woodrow WILSON's policies. He also opposed the LEAGUE OF NATIONS and the World Court. In 1924 he ran unsuccessfully for president on the Progressive Party ticket (but gathered almost five million votes).

La Follette, Suzanne (1893–1983) American author and editor. A prominent conservative, La Follette founded several magazines, most notably the NATIONAL REVIEW. Among her books was *Concerning Women*, which argued for civil rights for women. She was an early anti-Soviet activist and served as secretary to the commission that investigated the Soviet-ordered assassination of Leon TROTSKY. She was a cousin of Senator Robert M. LA FOLLETTE.

Lagerkvist, Pär (1891–1951) Swedish author and playwright. Lagerkvist first began publishing poetry in 1912, the same year his first novella, *Manniskor* (People) was published. His early works were strongly influenced by modern painting, and rejected naturalism. The expressionist poetry collection, *Angest* (Anxiety, 1916) reflects his pessimism and despair wrought by the events of WORLD WAR I. His early plays, which include *Den sista manniskan* (The Last Man, 1917) and *Himlens hemlighet* (Secret of heaven, 1919) also evidenced an existential desperation. His later works were less stylized, humanistic outcries against FASCISM and evil. These include the poems, *Sång och strid* (Song and struggle, 1940), the drama *Lat Manniskan leva* (Let man live, 1949) and the novel *Barabbas* (1950, filmed 1952), Lagerkvist's acclaimed and best-known work. He was awarded the NOBEL PRIZE for literature in 1951. Later works include the novels, *Det heliga landet* (The holy land, 1964) and *Mariamne* (Herod and Meriamne, 1967).

Lagerlöf, Selma (1858–1940) Swedish novelist. Lagerlöf's first novel, *Gösta Berlings saga* (*Gösta Berling's Saga*, 1891), was published after it won a literary contest in a Swedish magazine. Its romantic style was unusual in a period of literary naturalism. Her many popular works, which include *Nils Holgerssons underbara resa genom Sverige* (The wonderful adventures of Nils, 1906), and *Tösen från Stormyrörpet*

(The girl from the marsh croft, 1907), are rich in Swedish folklore and myth. Lagerlöf received the NOBEL PRIZE for literature in 1909. During World War II, she donated the gold medal to a fund to benefit Finland, and was also instrumental in helping German intellectuals, such as Nelly SACHS, escape from Nazi GERMANY.

LaGuardia, Fiorello Henry (1882–1947) American politician known for his three terms as reform mayor of NEW YORK CITY. Popularly known as the "little flower," LaGuardia spent much of his childhood in the western United States and in Europe but returned to New York City, his birthplace, and graduated from New York University Law School. A reform Republican in a city dominated by Tammany Hall Democrats, LaGuardia was elected to Congress in 1916 and served (with the exception of the years 1919–23) until 1933. He cosponsored the NORRIS-LA GUARDIA ACT (1932), a major labor law that protected the rights of striking workers. LaGuardia ran as a reformer for mayor of New York in 1929 but was defeated by Jimmy WALKER. In 1933, a year after he lost his congressional seat in the Democratic landslide, he was elected mayor of New York City on a "fusion" ticket after Walker resigned after investigations had exposed gross corruption in city government. Short, stout and often unkempt, LaGuardia was an energetic reform mayor who enjoyed broad support. He is popularly remembered for reading the comics on the radio during a prolonged newspaper strike.

New York mayor Fiorello LaGuardia (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Laika Dog that became the first Earth creature to travel into outer space; the name Laika means “barker.” On November 3, 1959, Laika was launched into orbit aboard Sputnik 2, the second artificial satellite launched by the Soviet Union (see SPUTNIK I). Laika lived in space for 10 days before dying when her oxygen ran out. Laika’s vital signs were monitored from the ground, Sputnik 2 thus providing the first information about the effects of space travel on living creatures. The flight of Laika showed that the Soviets were serious about sending people into space—and that the Soviets were ahead of the United States in the space race. In August 1960 Sputnik 5 carried two dogs, Belka and Strelka, into space; they returned to Earth safely, the first creatures to do so.

Laing, R(onald) D(avid) (1927–1989) Scottish psychiatrist. Laing’s unorthodox theories about mental illness, particularly schizophrenia, made him a COUNTERCULTURE hero in the 1960s. His theories first gained recognition in 1960 with the publication of his first book, *The Divided Self: An Existential Study in Sanity and Madness*. Laing argued that schizophrenia was not a genetic or biochemical aberration but rather an avenue of escape from a family situation fraught with conflicting emotional demands. An outspoken critic of standard psychiatric treatments, which he claimed did more harm than good, he experimented with various alternative approaches, including the use of psychedelic drugs. He put his theories into practice at Kingsley Hall, a therapeutic community he set up in London in the 1960s. Eventually he became disenchanted with much of his early thinking about mental illness and admitted that many of his treatment methods had failed.

Laker, Edwin Francis (1910–1980) American inventor. While serving as a major in the 82nd Airborne Division in WORLD WAR II, Laker developed the **Pathfinder** long-range bombing system. Bomber crews used this to find and mark targets with smoke or flares, which other aircraft then used as indicators to drop their bombs.

L.A. Law Television drama series produced for the NATIONAL BROADCAST-

ING CORPORATION (NBC) about a fictional law firm named McKenzie, Brackman, Chaney & Kuzak. Premiering at the start of the 1986–87 season, it focused on the civil and criminal cases taken by the law firm and the relationships of the firm’s staff and its competitors, while the junior members of the firm competed against each other to become full-fledged senior partners. The show ran for eight seasons on NBC before filming its final episode in 1994. *L.A. Law* won four Emmys for Best Drama Series (1987, 1989–91). In May 2002 NBC released a made-for-TV *L.A. Law* movie.

Lalique, René (1860–1945) French glass and jewelry designer. Born in the Marne, Lalique studied drawing and goldsmithing in Paris. Traveling to London (1878–80), he returned to Paris as a jewelry designer, cofounding a business to market his designs in 1884 and purchasing a jewelry workshop the following year. In 1891 Lalique began to work in glass. Starting to show his work at exhibitions in 1894, he was the recipient of many important awards, his success capped by his own pavilion at the Paris exhibition of 1925. Early in the 20th century he diversified into textiles, mirrors and other products, beginning to use engraved glass in jewelry in 1905 and adding pressed-glass perfume bottles to his roster in 1906. He opened his first glass factory in 1909, founding another in 1918. Lalique’s innovative designs included various tablewares and light fixtures, and he was particularly famed for the elegant salon he designed for the luxury ocean liner *NORMANDIE*. Working at first in the ART NOUVEAU style, he developed a sleek, geometric design mode (employing plant, animal and abstract forms) that was the epitome of ART DECO.

Lamar, Joseph R. (1857–1916) Associate justice, U.S. Supreme Court (1910–16). Lamar, a native of Georgia, and a graduate of Bethany College, studied law at Washington and Lee University before his admission to the bar. In private law practice, he was also involved in politics and was elected to the Georgia legislature before being appointed to the state Supreme Court. In 1910 Lamar was appointed to the U.S. Supreme Court by President William Howard TAFT. A

hard worker, Lamar died while serving on the Court in 1916.

L’Amour, Louis Dearborn (1908–1988) American author best known for his westerns. L’Amour wrote 101 books—86 novels, 14 story collections and one work of nonfiction, with sales nearing 200 million. *Hondo*, published in 1953, was his first and perhaps best known novel; it was made into a film starring John WAYNE. Many of L’Amour’s other works were also adapted as feature films, including *Shalako*, *Stranger on Horseback* and *How the West Was Won*; *The Sacketts* was adapted for television. He was the only novelist honored with both a congressional gold medal (1983) and a presidential Medal of Freedom (1984).

Lampedusa, Giuseppe Tomasi Di (1896–1957) Italian novelist. An upper-class Sicilian, Lampedusa is best remembered for the novel *Il gattopardo* (*The Leopard*, 1955–56; filmed 1963), which describes the reactions of a noble family to the social and political landscape following Sicily’s appropriation by Garibaldi in 1860.

Lancaster, Burt (Burton Stephen Lancaster) (1913–1994) American film actor. Born in New York City, Lancaster attended New York University but left to become a traveling acrobat. He served in World War II before making his acting debut on Broadway (1945). Moving to HOLLYWOOD, he won a role in *The Killers* (1946, adapted from an Ernest HEMINGWAY short story) and soon became a genuine star. Handsome and muscular, he was at first identified with swashbucklers, westerns and other action pictures, such as *The Flame and the Arrow* (1950), *Jim Thorpe—All American* (1951), *Apache* (1954), *Trapeze* (1956) and *Gunfight at O.K. Corral* (1957); in all of these he performed his own stunts. He also scored a hit as a romantic leading man in *From Here to Eternity* (1953) and showed his versatility in challenging dramatic roles in *All My Sons* (1948), *The Rose Tattoo* (1955), *The Rainmaker* (1957), *Elmer Gantry* (1960, ACADEMY AWARD), *The Birdman of Alcatraz* (1962), *The Leopard* (1963) and *The Swimmer* (1968). As he aged, Lancaster made a successful transition to character roles, as in Louis MALLE’s *Atlantic City* (1980). He also

created memorable supporting characters in *Local Hero* (1983), *Field of Dreams* (1989) and other films. While his performances are often mannered, they show his complete dedication to, and his impressive command of, the actor's craft. Lancaster has gradually been acknowledged as one of the finest film actors of his generation.

Lanchester, Elsa (Elizabeth Sullivan) (1902–1986) British-born actress. After a successful stage career in London, Lanchester became one of HOLLYWOOD's most outstanding character actresses. Known for her talents in eccentric or comic parts, she scored a singular triumph in *The Bride of Frankenstein* (1935), a film in which she played both the title role and Frankenstein's creator, Mary Shelley. Her career was closely linked with that of her husband, Charles LAUGHTON, to whom she was married from 1929 until his death in 1962. They made a number of films together, most notably, *Witness for the Prosecution* (1957). After his death, she revealed that their marriage survived numerous homosexual liaisons on his part and affairs on hers. Her last film was *Murder by Death* (1976).

Land, Edwin Herbert (1909–1991) American inventor, scientist and industrialist. Born in Norwich, Connecticut, he attended Harvard University, but dropped out in 1932 to pursue his scientific interests on his own. Fascinated with polarized light, he began a series of inventions involving polarization and in 1937 founded the Polaroid Corporation. In 1943 Land conceived the idea for what was to be the most famous and successful of his many inventions (he held 533 patents): an instant camera that captured an image and developed it in a single-step process. He began marketing this Polaroid Land Camera in 1948 and introduced a color version in 1963. Land served as Polaroid's chairman until his retirement in 1981. Land was also a military adviser to the federal government and was an early advocate of the use of reconnaissance SATELLITES.

Landis, Kenesaw Mountain (1866–1944) American judge, first commissioner of professional baseball. In the early years of the 20th century professional baseball and the World Series had

caught the imagination of the American public. That same public was dismayed when it was revealed that several members of the Chicago White Sox had taken bribes to throw the 1919 World Series. The affair became known as the BLACK SOX SCANDAL. Judge Landis, a U.S. district court judge from Chicago, was enlisted to become the czar of baseball with broad powers to regulate the sport and banish those whose actions were not in the best interests of the game. Landis barred the errant participants for life and imposed a strict ban on gambling by ballplayers. Landis and those who followed established a tradition of a strong commissioner with sweeping powers to maintain the integrity of the sport.

Landon, Alf (red Mossman) (1887–1987) American politician. A banker and an oilman, Landon served as governor of Kansas (1933–37). He was widely praised for economy in government operations during the GREAT DEPRESSION. Reelected in 1934, he gained national renown for his support of Kansas farmers in the depth of the Depression. He was the Republican nominee for president in 1936, but lost the election to the enormously popular Franklin D. ROOSEVELT. Landon's daughter, **Nancy Landon Kassebaum**, was later a U.S. senator.

Landowska, Wanda (1877–1959) Polish-French harpsichordist and pianist. Born in Warsaw, Landowska studied at the conservatory there and began her career as a pianist in 1891. She later taught piano at the Schola Cantorum, Paris (1900–12). Fascinated with the music of the baroque period, she turned her attention to the harpsichord, making her debut on the instrument in 1903. Landowska taught harpsichord at the Berlin Hochschule (1912–19) before establishing her own Ecole de Musique ancienne at Saint-Leu-la-Forêt near Paris in 1919. She taught and gave renowned concerts of early music there until 1940, when World War II caused her to settle in the United States. Here she continued her activities as teacher, performer and recording artist. The guiding spirit in the 20th-century revival of interest in the harpsichord, much admired for her Bach interpretations, she was also an inspiration to modern composers. Both Manuel de FALLA and Francis

POULENC wrote harpsichord concertos expressly for her. Landowska and her husband, Henry Lew, were the authors of *Music of the Past*.

Landry, Tom (1924–2000) American professional football player and coach in the All-American Football Conference (AAFC) and the National Football League (NFL). Born in Mission, Texas, Landry began his football career as a quarterback and a fullback for the University of Texas Longhorns. In a successful playing career as a cornerback/safety and a punter for the New York Giants of the National Football League, Landry averaged an impressive 31 interceptions on defense and compiled a 40.4-yard punting average on special teams.

In his last two seasons as a player for the Giants, Landry began to develop an interest in coaching professional football. Landry ended his playing days in 1956 and for the next four seasons, served as the Giants's defensive coordinator. Landry did so well in this post that an NFL expansion team, the Dallas Cowboys, named him head coach in 1960.

As head coach of the Cowboys, Landry compiled an impressive 250-162-6 regular season record, as well as a 20-16 postseason record that resulted in two Super Bowls (VI and XII). More important, Landry modified the manner in which professional football was played through his liberal use of player substitution on offense and defense and his willingness to use multiple offensive formations and defensive zones to confuse opponents and capitalize on their inadequacies. Although his record and his role in the 20 consecutive winning seasons gave Dallas a national fan base, Landry was forced to resign as head coach in 1988 by Jerry Jones, who had purchased the team in 1987. After leaving the Cowboys, Landry retired from professional football, and was inducted into the Pro Football Hall of Fame two years later.

Lane, Sir Hugh Percy (1875–1915) Irish connoisseur and art collector. Born in Cork, Lane worked for a number of art dealers in London before opening his own gallery. In 1901 he commissioned John Butler YEATS to paint portraits of contemporary Irish-

men, a project that was completed by Sir William ORPEN. He also organized various exhibits of Irish art, and participated in the foundation of Dublin's Gallery of Modern Art. In recognition of his services to Irish art, Lane was knighted in 1909. He was drowned in the torpedo attack on the *LUSITANIA* in 1915. The provisions of his will caused a bitter controversy in IRELAND. His collection, now split into two parts, is rotated every five years for alternate exhibition in Dublin and London.

Lang, Fritz (1890–1976) German-born director of fantasy and suspense movie thrillers. Lang entered the film industry in Berlin as a screenwriter and director in 1918. With his wife, screenwriter Thea von Harbou, he made some of GERMANY's most famous films in the 1920s, including the expressionist fantasies *Der müde Tod* (*Destiny*, 1921), *Siegfrieds Tod* (*Siegfried's Death*, 1923), and *Metropolis* (1927); the visionary science fiction film *Die Frau im Mond* (*The Woman in the Moon*, 1929); the criminal conspiracy thrillers about "Dr. Mabuse" (1923); and the police procedural films *Spione* (*Spies*, 1928) and *M* (1931). After a hasty departure from Nazi Germany in 1933, Lang began a long career in America, where he became one of the architects of FILM NOIR, infusing the standard genres of the western (*The Return of Frank James*, 1940), romance (*Scarlet Street*, 1945) and gangster picture (*The Big Heat*, 1953) with his own unrelieved sense of darkness and paranoia. Disillusioned with HOLLYWOOD, Lang worked abroad after 1956, bringing the infamous "Dr. Mabuse" back for a final bow in *The 1000 Eyes of Dr. Mabuse* (1960).

Lang's central characters are usually victims or victimizers, either falling prey to their own obsessions (the child molester in *M*, the artist in *Scarlet Street*) or manipulating the world into their own insane images (the mad scientist Rotwang in *Metropolis* and Mabuse). In any case Lang's universe is closed to individual freedom—perhaps, significantly, like the motion picture set where Lang himself was able to exercise an almost despotic control.

Langdon, Harry (1884–1944) Generally regarded as one of America's greatest silent film comedians (along with CHAPLIN, KEATON and LLOYD), Langdon was born in Council Bluffs,

Iowa. Working in his teens as a ticket seller, circus clown, acrobat and ventriloquist, Langdon was noticed by producer-director Mack SENNETT. The collaboration produced a few amusing short films, but it was not until Langdon met gagwriter (later director) Frank CAPRA and director Harry Edwards that his comic character of the "child with adult desires" developed. The three went on to make dozens of two-reel and three-reel comedy hits, including *Picking Peaches* (1924), and features, including *Tramp, Tramp, Tramp* (1926) and *Long Pants* (1927). With success under his belt, Langdon fired Capra and Edwards in order to write and direct his own films. The result was a string of critical and commercial flops. Langdon was never able to resurrect his early success; he continued to work in the 1930s but only in occasional featured roles. In 1944 Langdon died of a cerebral hemorrhage; his films have largely been forgotten by the public, but his strong influence can be detected in the style of Stan Laurel (see LAUREL AND HARDY), as well as other comedy stars.

Lange, David (1942–) Prime minister of NEW ZEALAND (1984–89). Born in Auckland, Lange graduated in law from the University of Auckland in 1966. He practiced as a lawyer, was a tutor at the University of Auckland and completed a postgraduate degree in law. Lange entered parliament at a by-election in 1977; became deputy leader of the LABOUR PARTY, then in opposition, in November 1979; and became leader of the party on February 3, 1983, upon the resignation of Sir Wallace Rowling. Following Labour's victory in the July 1984 election, he became New Zealand's youngest prime minister in this century. He stepped down as prime minister in mid-1989. In 1996 Lange retired from Parliament.

Lange, Dorothea (1895–1965) American photographer. Born in Hoboken, New Jersey, Lange took an early interest in photography and operated a portrait studio from 1916 to 1932. She became famous for her photographs taken during the GREAT DEPRESSION, stark works that record the time, place and character of the people portrayed with rare power. Photographs such as *Migrant Mother*, *Nipomo, California* (1936) reveal poverty and dignity in

one powerful image. This work was part of a series Lange and her husband, the economist Paul Taylor, executed for the state of California, documenting the life of migrant workers. This project resulted in their book *An American Exodus* (1939). She worked for the Farm Security Administration (1935–42), on projects that studied rural America. After the outbreak of WORLD WAR II Lange created a series of documentary photographs that recorded the internment of JAPANESE AMERICANS. She also contributed many photo essays to LIFE magazine.

Langer, Suzanne K(naith) (1895–1985) American philosopher. Langer was one of the rare academic philosophers of the modern era to find a substantial popular readership. Her major work, *Philosophy in a New Key* (1942), which argued that all intellectual ideas are ultimately expressed in a symbolic mode, was reprinted many times and became a standard text in numerous undergraduate philosophy classes. Langer was educated at Radcliffe College, where she studied under the eminent philosopher Alfred North WHITEHEAD. Her other major works include *An Introduction to Symbolic Logic* (1937) and the three-volume *Mind: An Essay on Human Feeling* (1967–82).

Langley, Samuel Pierpont (1834–1906) American scientist, inventor and aviation pioneer. In the 20th century, Langley is known for his efforts to fly the first motor-driven airplane. His interest in the possibility of powered flight dated to 1886, the year before he became secretary of the Smithsonian Institute in Washington, D.C. By 1903 he had designed and built a 60-foot-long aircraft with a wingspan of 48 feet. The plane was launched by catapult off a 70-foot ramp on the Potomac River, but crashed and was wrecked. Less than two months later (December 17, 1903) the WRIGHT BROTHERS made the first successful powered flight at Kitty Hawk, North Carolina. AVIATION experts have since recognized that Langley's plane crashed not because of any faulty design, but because of the catapult method of launching.

Lanham, Charles Truman "Buck" (1902–1978) A career U.S. Army officer, Lanham led the first American

military unit to reach Paris (August 25, 1944) in WORLD WAR II. He was a friend of the writer Ernest HEMINGWAY and was said to be the model for the typical American soldier in Hemingway's novels. He retired with the rank of major general and was later chairman of Colt, the U.S. firearms manufacturer.

Lanphier, Thomas G(eorge) Jr. (1890–1987) American fighter pilot. In WORLD WAR II, Lanphier flew 112 missions in the South Pacific. In April 1943 he shot down the airplane carrying the commander in chief of the Japanese Royal Navy, Adm. Isoroku YAMAMOTO, known as the architect of the attack on PEARL HARBOR.

Lansbury, George (1859–1940) British LABOUR PARTY leader. Lansbury joined the Social Democratic Federation in 1892 and served as a Labour Party member of Parliament (1910–12 and 1922–40). An articulate reformer, he was active in fighting against poverty and unemployment, and he vigorously championed woman suffrage. A pacifist, he also opposed World War I. One of the founders (1912) of the *Daily Herald*, he edited the paper until 1922. Commissioner of works from 1929 to 1931, he led the opposition to Ramsay MACDONALD's National Government from 1931 to 1935, when he resigned as party leader. Attempting to promote Anglo-German understanding and avoid another war, Lansbury advocated British disarmament and visited HITLER in 1937.

Lansing, Robert (1864–1928) U.S. secretary of state. Born in Watertown, New York, Lansing graduated from Amherst in 1886. An authority on international law, he frequently served as counsel for the U.S. in international disputes. Lansing succeeded William Jennings BRYAN as secretary of state in 1915. Because Woodrow WILSON conducted foreign policy with his close adviser Edward M. HOUSE, Lansing had little influence on the decision to enter WORLD WAR I, although he advocated participation in the struggle. Lansing worked in harmony with Wilson until the PARIS PEACE CONFERENCE, when he lost the president's confidence because of his view that the LEAGUE OF NATIONS was not important. When Lansing conducted cabinet meetings during Wil-

son's illness, the president requested his resignation.

Lansky, Meyer (1902–1983) American organized crime figure. Born in Poland, Lansky was reputedly the financial mastermind of organized crime in the U.S. for more than four decades. He began his criminal career in the 1920s during PROHIBITION, and formed a notorious crime syndicate with gangster "Lucky" LUCIANO. Lansky was said to have amassed a multimillion dollar personal fortune through illegal operations in gambling, bootlegging, loan-sharking, stock manipulation and infiltration of legitimate businesses throughout the U.S. During his career, he was charged with many crimes, including tax evasion, assault and contempt of court; but he spent only two months of his life in prison.

Laos (Lao People's Democratic Republic) Laos covers an area of 91,405 square miles on the Indochinese peninsula in southeast Asia (see INDOCHINA). Under French control since 1907, Laos was occupied by Japan during WORLD WAR II, then became a free state within the FRENCH COMMUNITY in 1946. Full independence was granted in 1953. The country suffered political instability during the next 20 years due to conflict between pro-and anticommunist forces. The leftist political party's links with North Vietnam prompted the United States to initiate secret bombing raids into Laos to destroy North Vietnamese havens there (1964). In 1973 a cease-fire was signed; by 1975 the communists controlled the government and established the People's Democratic Republic. The ruling Lao People's Revolutionary Party (LPRP) is the only legal

LAOS

1907	Most of Laos under French administration as part of French Indochina.
1940–45	Japan occupies Laos, ruling through the Vichy French government.
1950	Prince Souphanouvong forms communist-inspired Pathet Lao after contact with Ho Chi Minh in northeast Laos.
1954	Geneva Accords establish Laos as an independent, neutral nation under the rule of royal government and allot two “regroupment” provinces, adjacent to North Vietnam, to the Pathet Lao.
1960	Civil war begins between troops of the pro-Western royal government and Pathet Lao.
1964	14-nation Geneva conference sets up coalition government with Prince Souvanna Phouma, a neutralist, as prime minister, anticommunist Prince Boun Oum, and communist Prince Souphanouvong as cabinet ministers.
1971	South Vietnamese troops backed by U.S. bombers invade Laos to attack Ho Chi Minh Trail; CIA admits U.S. has 30,000-man army in Laos.
1975	Following American withdrawal and the subsequent fall of South Vietnam to the communists, King Savang Vatthana abdicates; Pathet Lao take control of Laos with the support of North Vietnamese troops.
1988	Two American MIA searchers arrested in Laos after offering \$2.4 million for information; later claim that Laos still holds U.S. prisoners of war; charge is denied by Laotian authorities.
1989	First elections since 1975; Communists remain in power as all candidates must be approved by Lao People’s Revolutionary Party (LPRP).
1991	New constitution in place.
1994	Bridge over the Mekong River linking Laos and Thailand opens.
1997	Laos becomes a member of the Association of Southeast Asian Nations (ASEAN).
2003	The Fact Finding Mission, a U.S.-based exile group, announces the start of a revolution by the Lao Citizens Movement for Democracy in 11 provinces. Government refutes the claim.
2006	President Khamtay Siphandon is succeeded by Vice President Choummaly Sayasone as head of the LPRP.

political party. In 1997 Laos joined the Association of Southeast Asian Nations (ASEAN). In recent years bomb attacks against the government have occurred across Laos, attributed by some to revolutionary groups such as the Lao Citizens Movement for Democracy. In March 2006 the head of LPRP, President Khamtay Siphandon, was replaced by Vice President Choummaly Sayasone.

La Pasionaria See Dolores Gómez IBÁRRURI.

Lardner, Ring(gold Wilmer) (1885–1933) American short story writer and journalist. Lardner developed one of the unique voices in American literature—

wry, colloquial, subtly incisive as to nuances of character. His best known volume of stories, *You Know Me, Al: A Bushy's Letters* (1916), remains perhaps the finest fictional portrayal of baseball and its impact on American life. Lardner began his writing career as a journalist, covering sports for several years for newspapers in Chicago and New York. In the 1920s, he became a close friend of fellow writer F. Scott FITZGERALD. His tongue-in-cheek volume, *How to Write Short Stories* (1924), was typical Lardner with its bemused humility as to the nature of literary creation. Lardner also collaborated with George S. KAUFMAN on *June Moon* (1929) and other theatrical works. *Some Champions*

(1976) is a posthumous selection of Lardner's stories.

Lardner, Ring (Wilmer), Jr. (1915–2000) American screenwriter and author. The son of noted sports and short story writer Ring LARDNER, Lardner began his film career as a press agent for David O. SELZNICK. His first screenwriting work came when he collaborated on rewriting *A Star Is Born* (1937). Other screenplays include *Woman of the Year* (1942), for which he won his first ACADEMY AWARD; *The Cincinnati Kid* (1965); and *M*A*S*H* (1970), for which he won his second Oscar. Lardner joined the U.S. Communist Party in 1937 and was among the HOLLYWOOD TEN who refused

to testify to the HOUSE UN-AMERICAN ACTIVITIES COMMITTEE (HUAC) during its investigation of communist influence in Hollywood in 1947. Charged with contempt of court in 1950, he served 10 months in prison. Blacklisted, Lardner was unable to work in films again until 1965. In 1955 he published a book, *The Ecstasy of Owen Muir* in England, and in the late 1950s he wrote anonymously for television. In 1976 he published *The Lardners*, an account of his family.

Larionov, Mikhail Fyodorovich (1881–1964) Russian painter. Born in Teraspol, Larionov studied at the School of Painting, Sculpture and Architecture in Moscow. Interested in avant-garde art, he took an important part in the introduction of new ideas from FRANCE and ITALY into Russian painting. With his wife, Natalya Goncherova, he founded the Rayonist movement in 1912, advocating color expressed in radiating light as the “guiding principle” of painting. This early doctrine influenced the development of abstract art in Russia, particularly on Kasimir MALEVICH and SUPREMATISM. Larionov settled in Paris in 1914 and abandoned painting in 1915 when he began an association with Serge DIAGHILEV that started with set designing and ended with the artist’s involvement in all aspects of the BALLETS RUSSES.

Larkin, Philip (1922–1985) English poet, novelist and critic; a leading figure of THE MOVEMENT. Although hardly prolific, Larkin was one of the best known and most widely read English poets of his generation. Born in Coventry, he attended St. John’s College, Oxford, during WORLD WAR II, where he knew Kingsley AMIS. After graduating he became a librarian; from 1955 until his death he was the librarian of the University of Hull. His first book was a slender collection of poems, *The North Ship*, influenced by YEATS. His two novels, *Jill* (1946; revised 1963) and *A Girl in Winter* (1947), explore the theme of adolescent loneliness in wartime England with great sensitivity. Larkin’s literary reputation rests almost entirely on three poetry collections: *The Less Deceived* (1955), *The Whitsun Weddings* (1964) and *High Windows* (1974). Un-

derstated and carefully crafted, the poems in these books show the influence of Thomas HARDY. Moreover, they register the mood of provincial life in postwar England—a period of austerity and reduced expectations. Larkin’s attitude to life is summed up in his famous statement, “deprivation is to me what daffodils are to Wordsworth.” Larkin was also a noted jazz critic; his jazz reviews and articles were collected in *All What Jazz?* (1970).

Larsen, Leif Andreas (1906–1990) Norwegian sailor and WORLD WAR II hero. A member of the Norwegian RESISTANCE movement during the war, Larsen made 52 trips across the North Sea in fishing boats to smuggle arms, supplies and Allied agents into occupied NORWAY. He won 11 medals for bravery, making him one of the most highly decorated Allied naval officers of the war. His adventures were later retold in many books and films.

Lartigue, Jacques-Henri (1896–1986) French photographer. Little known until 1963, a retrospective at New York City’s MUSEUM OF MODERN ART led to Lartigue being recognized as a major 20th-century photographer. His work provided a matchless chronicle of Parisian high society with photographs taken when he was a child being particularly memorable.

Lashley, Karl (1890–1958) American neuropsychologist. Lashley is best known for his research into the relationship between the brain’s mass and its ability to learn. He taught at several universities between 1917 and 1955, including Harvard. He studied the relationship between behavior and brain damage in rats, and wrote *Brain Mechanisms and Intelligence* (1929).

Laski, Harold Joseph (1893–1950) British political scientist and economist. Laski attended Oxford University and had a distinguished teaching career at McGill University (1914–16), Harvard University (1916–20) and the London School of Economics (1926–50). A committed socialist, he was a member of the FABIAN SOCIETY and later became active in the British LABOUR PARTY, serving as its chairman in 1945 and 1946. Also holding a number of government

posts, he was a prime figure in moving his country toward a peculiarly British socialism. He is best known as a prolific and influential author. Among his books are *Political Thought in England from Locke to Bentham* (1920), *Karl Marx* (1921), *Communism* (1927), *Democracy in Crisis* (1933), *Faith, Reason and Civilisation* (1944) and *The American Democracy* (1948). Laski’s lively correspondence with his friend Justice Oliver Wendell HOLMES was published as *Holmes-Laski Letters* (2 vols., 1953).

Laski, Marghanita (1915–1988) British novelist, critic and radio personality; widely known as a broadcaster on “The Critics” and its successor, “Critics’ Forum.” One of her novels, *Little Boy Lost*, was the basis for a 1953 film about the displaced peoples of postwar Europe that starred Bing CROSBY. She wrote critical studies of such authors as Jane Austen, George Eliot and Rudyard KIPLING. A passionate amateur lexicographer, she was said to have contributed about a quarter of a million quotations to the four-volume supplement to the *Oxford English Dictionary*, the fourth volume of which was published in 1986.

Laskin, Bora (1912–1984) Chief justice of the Supreme Court of CANADA (1973–84). Laskin was appointed to the Court in 1970. His written opinions, which often dissented from the more conservative opinions of his colleagues, were praised for their legal scholarship. In 1974 he wrote the unanimous opinion upholding the Official Languages Act, which upgraded the position of French in the Canadian government.

Lasky, Victor (1918–1990) American journalist and author. An outspoken anticommunist, Lasky was a newspaper reporter and columnist, a Hollywood screenwriter and a lecturer for conservative organizations. His first book, *Seeds of Treason* (written with Ralph de Toledano), was based on the Alger Hiss spy case of the late 1940s and became a best seller. His other books included *J.E.K., the Man and the Myth* (1963), and *It Didn’t Start with Watergate* (1977), in which he showed

the Democratic administrations also had been guilty of “dirty tricks.”

Lassie Perhaps the most famous canine star of all time, Lassie was featured in eight feature films and a long-running television series. Trained by Rudd Weatherwax, the first Lassie was a male collie named Pal, who appeared in *Lassie Come Home* in 1943, when the intended star, a female collie, was shedding too heavily to perform. Pal's male offspring later succeeded him in the role. The last Lassie movie, *The Magic of Lassie*, was released in 1978.

late modernism Term that has come into use to describe and criticize current architectural and design practice and to designate work that continues to develop the ideas of MODERNISM, particularly the austere work of the INTERNATIONAL STYLE. While POSTMODERNISM tends to turn away from the ideas of the modern movement, introducing more decorative elements and often returning to historicism, the modernist direction survives and has also moved in the direction of greater complexity of form. The works of architects such as Charles Gwathmey and Robert Siegel, Richard Meier, and I.M. PEI with their strong loyalty to the modernist ethic, characterize the late-modernist direction.

Lattimore, Owen (1900–1989) American China scholar and writer. Born in Washington, Lattimore was educated in England and at Harvard. He then worked and studied in China and elsewhere in Asia, becoming an expert on Asian affairs. He edited the *Journal of Pacific Affairs* (1934–41) and wrote a number of books on the Far East. During WORLD WAR II he served the U.S. government in several capacities, including adviser to CHIANG KAI-SHEK. In 1950 while he was director of the Walter Hines Page School at Johns Hopkins University, he was accused by Senator Joseph MCCARTHY of being “the top Soviet espionage agent in the U.S.” A Senate Foreign Relations Subcommittee investigated the charges against Lattimore and concluded that they were “a fraud and a hoax.” Nevertheless, he was indicted for perjury in 1952 in connection with his Senate testimony; a federal judge dismissed the indictment in 1955 for lack of evidence. His brother **Richard Lattimore** was a distinguished poet and classics scholar noted for his translations of Homer and other ancient Greek poets and dramatists.

Lattre de Tassigny, Jean de (1889–1952) French general. A prominent military figure during WORLD WAR II, Lattre de Tassigny commanded the Fifth Army in Alsace in 1939. The following

year, he led the 14th Infantry in its attempt to repel the German invasion of France. He was arrested by the Germans in 1942, after having become the commander of the 17th Division in Montpellier, and sentenced to 10 years imprisonment. He escaped the following year, joining General GIRAUD and becoming a commander in French North Africa. In 1944 he led the First French Army in its landing in FRANCE, and fought northward until finally striking into GERMANY. Named inspector general of the army in 1945, he was posthumously granted the title of marshal of FRANCE.

Latvia One of the Baltic Sea republics of the USSR, Latvia is located between ESTONIA and LITHUANIA in northeastern Europe and covers an area of 24,704 square miles. The territory of modern Latvia was annexed to Russia by Peter the Great in 1709 and was controlled by German estate owners, called “Baltic Barons,” who served the Russian czar. In 1918 Latvia declared its independence, but it did not gain international recognition until 1921. Karlis Ulmanis became dictator in 1934 after economic problems forced the suspension of democratic government. His failure to obtain German protection against Soviet encroachment led to Russian occupation and establishment of Latvia as a Soviet

LATVIA

1918	National Council proclaims an independent Latvia.
1919–20	Soviet troops invade Latvia and set up a government; following their eviction, Latvian independence is recognized.
1940	Soviet troops invade Latvia, which is incorporated into the USSR
1941	Latvia occupied by Nazi Germany.
1944	Red Army returns.
1986	Beginnings of anti-Soviet demonstrations.
1991	Declaration of independence of the Republic of Latvia; Latvia admitted to the UN.
1993	Constitution of 1922 restored and first independent elections to parliament.
1999	Vaira Vike-Freiberga is elected president, first woman president in eastern Europe.
2004	Latvia admitted to NATO and the European Union.

republic in 1940. Germany occupied the country from 1941 to 1944. The loosening of authoritarian control in the Soviet Union under the leadership of Mikhail GORBACHEV led to Latvia's declaration of sovereignty and achievement of full independence. In August 1991 during the abortive coup by Soviet hard-liners against Gorbachev, Latvia declared its independence from the USSR. Latvia joined NATO and the EUROPEAN UNION in 2004.

Latvian War of Independence (1919–1920) After GERMANY's defeat in World War I, the Latvians proclaimed an independent state with Karlis Ulmanis (1877–1940) as prime minister. In early January 1919 Soviet forces invaded, seized the capital, Riga, and set up a Soviet government. German-Latvian troops with Allied approval forced the Soviets to withdraw in March 1919. By the TREATY OF VERSAILLES Germans were required to leave the area, but occupied Riga and were not expelled until November 1919, while the Soviets, again attempting a takeover, were evicted with Allied support by January 1920. By the Treaty of Riga, August 11, 1920, the Soviets recognized Latvian independence.

Lauder, Harry (1870–1950) Scottish entertainer. Primarily a comedian and singer, Lauder was one of the most popular music hall artists of the early 20th century and appeared widely in

both Britain and the U.S. One of the most highly paid entertainers of his day, he was also a prolific songwriter as well as a novelist and short story writer. His popular songs included "I Love a Lassie" (1905), "Roamin' in the Gloamin'" (1911) and "It's Nice to Get Up in the Morning" (1914). Lauder entertained British troops during WORLD WAR I and was knighted in 1919 for his aid to the war effort.

Laugh-In Zany American comedy-variety television series of the late 1960s. Its rapid-fire blackout sketches, burlesque gags and satiric pokes at contemporary America made it the number one program for two full seasons, 1968–70. It was a kind of "happening," a weekly push at the envelope of television propriety and censorship. Comedians Dan Rowan and Dick Martin presided over a cast of 40 regulars, each of whom appeared with a brief shtick, or tag, that became part of the national vocabulary: Arte Johnson had his guttural "Verrrry Interesting!"; Ruth Buzzi her ferocious umbrella; Lily Tomlin her nasal snort; Goldie Hawn her jiggle; and announcer Gary Owens his outrageously overmodulated tonsils. Catchphrases were everywhere: "Sock it to me!" and "Here come da judge!" and "You bet your bippy!" are just a few examples. The show was like a quick mosaic of interchangeable pieces that changed pattern from week to week. A "Jock Wall" concluded each program,

from which the faces of the cast popped in and out of little windows with quick one-liners. It ended its run in 1973. Six years later producer George Schlatter assembled a cast of unknowns and revived *Laugh-In* as a series of NBC specials. Although the show had grown stale and was dropped, at least one star was "discovered"—Robin Williams.

Laughton, Charles (1899–1962) British film and theatrical actor. Laughton was one of the most gifted character actors in the history of the cinema. Educated at the Royal Academy of Dramatic Arts, Laughton achieved successes on the London and Broadway stages before appearing in his first HOLLYWOOD feature, *The Old Dark Horse* (1932), a horror film. He won widespread fame for his title role in *The Private Life of Henry VIII* (1933), a British film directed by Alexander KORDA. Returning to Hollywood, Laughton gave memorable performances in *The Barretts of Wimpole Street* (1934), *Ruggles of Red Gap* (1935), and *Mutiny on the Bounty* (1935), in which he played Captain Bligh opposite Clark GABLE as Fletcher Christian. One of Laughton's finest performances was as Quasimodo in *The Hunchback of Notre Dame* (1939). Laughton directed only one film, the classic thriller *The Night of the Hunter* (1955), starring Robert Mitchum. His last film appearance came in *Advise and Consent* (1962). Laughton was married to the actress Elsa LANCHESTER.

Laurel and Hardy The team of **Stan Laurel** (born Arthur Stanley Jefferson, 1890–1965) and **Oliver Hardy** (1892–1957) stands alongside the MARX BROTHERS as one of the greatest comedic ensembles ever captured on film. Both Laurel and Hardy enjoyed independent careers as comic actors in silent films, and in the 1910s Laurel served as an understudy for Charlie CHAPLIN. But they were teamed together in 1926 by film producer Hal Roach and enjoyed immediate success as evidenced by a series of over 30 silent shorts directed in the late 1920s by Leo McCarey, George STEVENS and others. With the transition to sound, Laurel and Hardy turned eventually to feature films and Laurel himself took over artistic responsibilities. The basic premise in their films was simple but had universal appeal: The thin, woebegone Englishman Laurel

and the rotund, blustery American Hardy found themselves in circumstances they could neither control or understand. For all their good intentions, they were eternal victims of fate. Their performances were memorable because they combined outrageous slapstick pranks with genuine human pathos. The team won an ACADEMY AWARD for *The Music Box* (1932), a live action comedy short. Their classic comedy features include *Sons of the Desert* (1933), *Fra Diavolo* (1933), *Babes in Toyland* (1934), *Way Out West* (1937), and *A Chump at Oxford* (1940). In 1960 Stan Laurel was awarded a Special Oscar for his pioneering excellence in screen comedy.

Lauren, Ralph (1939–) American fashion designer whose career has vastly expanded from the introduction of wide necktie designs to designing clothing for men, women and children, as well as the environments they inhabit. Born in the Bronx, Lauren studied business at New York's City College at night while holding a wide variety of jobs in clothing stores, including Brooks Brothers, where he found an affinity for classic, sports-oriented clothing. There are overtones of belonging to upper-class circles in his relaxed styling and in his own lifestyle (he owns a 10,000-acre ranch in Colorado). In addition to clothing, his business now includes designs for fragrances, home furnishing and luggage. The restored Rhinelander mansion in New York serves as a flagship for his vast network of Polo/Ralph Lauren shops. He was the recipient of a 1970 Coty Men's Wear Award, the year before he began designing women's clothing. In 1992 Lauren accepted the Council of Fashion Designers of America's Lifetime Achievement award, the most celebrated award within the industry. Six years later, the Breast Cancer Research Foundation honored Lauren's contributions to research combating the disease by honoring him with its Humanitarian Award.

Laurier, Sir Wilfrid (1841–1919) Canadian statesman, prime minister of CANADA (1896–1911). Born in Quebec province, Laurier was educated at McGill University, became a lawyer and served in the Ottawa parliament as a Liberal member from 1874 to 1878. In

the opposition to the Conservative government from 1878 to 1896, he was appointed Liberal leader in 1887. In 1896 Laurier became the first French-Canadian prime minister, and the following year he was knighted. His 15-year tenure has been called the "age of Laurier," an era in which a Canadian identity was forged. During this period the country grew enormously, its economy flourished and it opened its doors to some two million immigrants who helped develop the Canadian West and build the nation's huge railroad system. Laurier sought to create harmony between Canada's French and English-speaking citizens and to strengthen links with Great Britain and the U.S. His trade ties to the U.S. were central to his defeat in the 1911 elections. Leader of the opposition until his death, he supported Canada's 1914 entry into WORLD WAR I, but opposed conscription and resisted the formation of a coalition government in 1917. (See also LIBERAL PARTY–CANADA.)

Lausanne, Treaty of Treaty signed in Lausanne, Switzerland, in 1923 that established modern TURKEY's borders and settled a number of territorial problems that arose at the end of World War I. The earlier (1920) Treaty of SEVRES had virtually destroyed the defeated OTTOMAN EMPIRE. However, its provisions were rejected by Turkish nationalists led by Mustafa Kemal (later known as ATATÜRK), who forced new negotiations when they drove Greek troops out of Smyrna and overthrew the sultan. According to the new treaty, Turkey recovered Smyrna, eastern Thrace and some islands in the Aegean and resumed its control of the DARDANELLES, which were demilitarized. Turkey also renounced claims on former Ottoman Empire territories. A separate agreement between Greece and Turkey arranged for the forced exchange of minority populations from each signatory country.

Laval, Pierre (1883–1945) French statesman. Born in the Auvergne, Laval became a lawyer and entered politics as a Socialist deputy in 1914. He held a number of governmental posts, began moving to the right politically and was elected as an independent senator in 1926. He served as premier from 1931 to 1932 and as premier and foreign

minister from 1935 to 1936. In 1935 he and British foreign minister Sir Samuel Hoare formulated a plan to partition ETHIOPIA in order to stop the Italian invasion, a scheme that would have appeased MUSSOLINI by giving much of the country to its invader. Laval's government fell after public uproar over the plan caused its withdrawal. After the fall of FRANCE in 1940, Laval became vice premier in the VICHY government, supporting close ties with Nazi GERMANY. He was dismissed on suspicion of attempting to overthrow Marshal PÉTAINE, but was reinstated in 1942. Facilitating Nazi policy, he nonetheless attempted to retain some distance from the Germans, a task in which he was largely unsuccessful. After the Allied invasion, the fleeing Germans arrested Laval in 1944, but he escaped to Spain in 1945. He subsequently surrendered himself to the Allies, and was returned to FRANCE to face treason charges. Found guilty in a trial whose fairness was questionable and in which he eloquently defended himself, Laval was sentenced to death. After unsuccessfully attempting to commit suicide, he was executed.

Laver, Rod(ney George) (1938–) Australian tennis player. Best known for his Davis Cup play, Laver may be the last player to have made a worldwide reputation as an amateur. He won Wimbledon twice before turning professional and led Australia to four Davis Cups, winning all six of his singles event in 1960, 1961 and 1962. He relinquished his amateur status in 1963 and went on to win 71 championships in 17 countries, including two additional Wimbledons, and a 1969 Grand Slam. Laver was the first player to break the \$1 million mark.

Lavin, Mary (1912–1996) Irish author. Though born in the U.S., Lavin moved to Ireland at the age of nine, and her writing evokes her enchantment with the Irish ambience. Encouraged to write by the playwright and Irish revivalist Lord DUNSANY, Lavin published her first collection of stories, *Tales from Bective Bridge* in 1942. Lavin was widowed and left with the management of a farm and three children, and remarried in 1969 after which she lived in Dublin and Meath. Her perceptive writing examines relationships,

depicting the lives of both the Irish peasantry and the middle classes. Other works include the novels *The House in Cluew Street* (1945) and *Mary O'Grady* (1950) and the short story collection *The Shrine and other Stories* (1977).

Lavrenyov, Boris Andreyevich (1894–1952) Soviet author. Lavrenyov joined the army in 1915 and served as a cavalry officer in World War I. In 1921 he began to write seriously. In the early stages of his literary career Lavrenyov was attracted to FUTURISM, but he later came under the influence of ACMEISM. He was a member of the Leningrad literary group *Sodruzhestvo*. Lavrenyov's stories are romantic and his plots dynamic. Among his stories are the collections *Crazy Tales* (1925) and *The Forty-First* (1924). He also wrote the plays *Smoke* and *The Debacle* (1928). Much of his work recounts incidents from the Civil War and the days of WAR COMMUNISM.

Law, Andrew Bonar (1858–1923) British politician, prime minister of the UNITED KINGDOM (1923). Born in New Brunswick, Canada, Law emigrated to Scotland at the age of 12 and was educated at Glasgow High School. He was a successful iron merchant in Glasgow when he was first elected to Parliament in 1900 as a member of the CONSERVATIVE PARTY. He served as parliamentary secretary to the Board of Trade from 1902 to 1906, and gained support from party members who considered party leader Arthur BALFOUR too remote. In 1911 he succeeded Balfour as the leader of the Opposition, strongly supporting the Ulstermen in the Irish crisis of 1912–14. At the outbreak of WORLD WAR I, Law supported the government and entered the ASQUITH coalition as colonial secretary, later becoming chancellor of the Exchequer and leader in the Commons under David LLOYD GEORGE from 1915 to 1919, and Lord Privy Seal from 1919 to 1922. Following Lloyd George's resignation in 1922, Law became prime minister, but was forced by an inoperable cancer to resign seven months later. Law's brief tenure set the pattern for British Conservatism between the two world wars.

Lawler, Richard (1895–1982) American surgeon who successfully performed

the world's first kidney transplant operation (1950). Lawler performed the operation only once, saying that he "just wanted to get it started." He was nominated for the NOBEL PRIZE in 1970 for his pioneering surgery but did not receive the award.

Lawrence, D(avid) H(erbert) (1885–1930) English novelist, story writer, literary critic, travel writer, poet and painter. Lawrence is one of the greatest figures in 20th-century English literature. Indeed, there are few writers in the history of world literature who can equal Lawrence in terms of a versatility and excellence shown in so many writing genres. He was born in Eastwood, Nottinghamshire, the fourth child of a struggling coal miner who was a heavy drinker. Lawrence, who suffered from frail health for much of his life, was very close to his mother, who provided encouragement for his artistic career. He earned a scholarship to Nottingham University and briefly pursued a teaching career. The publication of his acclaimed first novel, *The White Peacock* (1911), launched him as a writer. His other major novels include *Sons and Lovers* (1913), *The Rainbow* (1915), *Women in Love* (1920) and the controversial *LADY CHATTERLEY'S LOVER* (1928), a frank and beautiful love story that was for a time banned in both Great Britain and the U.S. as pornographic. Lawrence also wrote vibrant short stories and lyric poetry, travel classics such as *Etruscan Places* (1932) and even attained posthumous renown for his expressionistic paintings completed in the 1920s. Lawrence married Frieda von

Richthofen in 1914 and traveled with her through Europe, the U.S., Mexico and Australia in the final two decades of his life.

Lawrence, Ernest Orlando (1901–1958) American physicist. Born in Canton, South Dakota, Lawrence earned his Ph.D. from Yale University in 1925. In 1930, while a professor at the University of California at Berkeley, he began experiments that eventually led to his invention of the cyclotron, a device in which atomic particles are accelerated by means of an alternating electric field in a constant magnetic field. Lawrence received the 1939 NOBEL PRIZE in physics for this work. Later, he played a key role in the development of the atomic bomb. Element 103, lawrencium, is named for him.

Lawrence, Gertrude (Gertrude Lawrence Klasen) (1898–1952) British actress. Though she began her career performing in revues and musicals, Lawrence gained international acclaim in several Noel COWARD plays, most notably *Private Lives* (1930), which he wrote for her, and *Blithe Spirit* (1945). She also had personal triumphs in the Broadway musicals *Lady in the Dark* (1941) by Moss HART and Kurt WEILL and *The King and I* (1951) by Richard RODGERS and Oscar HAMMERSTEIN II.

Lawrence, Jacob (1917–2000) American painter. Born in Atlantic City, New Jersey, Lawrence studied at various schools and with various artists in New York City from 1932 to 1939. An African American, he has explored the black experience in the U.S. in many of

Artist Jacob Lawrence at an exhibit of his work in Boston, 1945 (NEW YORK WORLD-TELEGRAM AND THE SUN NEWSPAPER COLLECTION, LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

his figurative paintings. Flat, angular and decorative in style, often using tempera as a medium, Lawrence's work includes a number of painting cycles including *Harlem* and *Migration of the Negro* (1940–41). Lawrence is a noted teacher, and his work is included in collections such as the Whitney Museum of American Art and Museum of Modern Art, New York City, and the Phillips Collection, Washington, D.C.

Lawrence, T(homas) E(dward) (Lawrence of Arabia) (1888–1935) British soldier, adventurer, author and WORLD WAR I hero. Educated at Oxford, he participated in archaeological expeditions to the Middle East while still an undergraduate. He stayed in the region from 1911 to 1914, learning Arabic and working as an archaeologist. After the outbreak of World War I, he was posted to Egypt as a member of the British army's intelligence staff. In 1916, he joined the forces of the Arabian sheik Faisal al Husayn (later FAISAL I), becoming a leader in the Arab revolt against Turkish rule. His guerrilla tactics, striking at the Damascus-Medina railroad and fringe areas, were extremely successful in expelling the much larger Ottoman army from western Arabia and Syria (see OTTOMAN EMPIRE; WORLD WAR I IN MESOPOTAMIA). After the Arab forces took DAMASCUS in 1918, Lawrence returned to England. A delegate to the PARIS PEACE CONFERENCE after the war, he vainly fought for Arab independence. Thereafter, he was a research fellow at Oxford (1919) and a Middle Eastern adviser at the Colonial Office (1921–22).

Whether out of a sense of failure in the Arab cause, or from a desire from anonymity, Lawrence resigned from his post and in 1922 enlisted under the name of Ross as a mechanic in the Royal Air Force. His identity was discovered a year later and he joined the tank corps, later rejoining (1925) the RAF under the name of Shaw. His account of his Arabian adventures was privately printed in 1926 under the title *Seven Pillars of Wisdom*, later abridged to *Revolt in the Desert*. He died in a motorcycle accident near his home in Dorset on May 19, 1935. A man of intense contradictions, Lawrence remains one of the most legendary and enigmatic public figures of the 20th

century. His exploits formed the basis of David LEAN's film, *Lawrence of Arabia* (1962).

Laxness, Halldór (Halldór Guðjónsson) (1902–1998) Icelandic novelist. Laxness's early fiction, which includes the short stories *Nokkrar sögur* (Some Stories, 1923) and the novel *Verfarnir mikli frá Kasmír* (The Great Weaver from Kashmir, 1927), reflects his conversion to Catholicism in 1923 and the influence of the surrealist movement. Influenced by Upton SINCLAIR on a trip to North America in the late twenties, Laxness became a socialist, and it is for his subsequent political fiction depicting the lower classes of Iceland that he is best known. These include the two-volume novel, *Salka Valka* (1931–32), the first of his works to be translated into English; the two-volume *Sjölfstoett folk* (Independent People, 1934–35), and the tetralogy *Heimsljos* (World Light, 1937–40), which is considered his most important work. Laxness was awarded the NOBEL PRIZE for literature in 1955. Later works include the novel, *Brekkukotsannoll* (The Fish Can Sing, 1957) and the autobiographical *Skaldatími* (Poetic Age, 1963).

Leach, Bernard (1887–1979) English master potter in the handcraft tradition, who reflected modernist directions in his works. Leach was born in Hong Kong and studied the traditional art and craftwork of China, Japan and Korea, before moving to England in 1920. He established his own pottery at St. Ives in Cornwall where he produced individual works of high quality in terms of both craftsmanship and design. He eventually developed a range of basic designs that were hand-made in considerable quantity and available for practical use. His shapes were generally simple and functional in a way that matched the developing taste of MODERNISM; his brush-painted decorations, where they occur, suggest a more self-conscious orientalism. His book, *A Potter's Book* (1940), is a standard text and manual in the field.

League of Arab States See ARAB LEAGUE.

League of Nations International arbitration and peacekeeping organiza-

tion established in 1919. U.S. president Woodrow WILSON was the chief architect of the League of Nations, and its formation was one of his FOURTEEN POINTS. He was, however, unable to persuade the U.S. Congress of its merits, and the U.S. never became a member. The League of Nations constitution was adopted at the PARIS PEACE CONFERENCE and recognized in post-World War I peace treaties. The League's headquarters were established in Geneva; its first secretary-general was Sir Eric Drummond (1876–1951), a British diplomat and later Earl of Perth. The League consisted of three branches: a council, the main peacekeeping arm composed of between 8 and 10 members; the assembly, in which all members participated; and the secretariat, which was its administrative staff. There were 42 original member-nations, including UNITED KINGDOM, CHINA, FRANCE, ITALY and JAPAN. GERMANY was a member from 1926 to 1933 and the UNION OF SOVIET SOCIALIST REPUBLICS from 1934 to 1940.

The League's aim was to provide collective security to member countries, in that all would come to the aid of a country attacked or threatened by war. It had no armed forces and would instead rely on economic sanctions to coerce errant countries. Its successes included settling conflicts in Latin America and the Balkans and providing assistance to Russian and Turkish refugees in the 1920s, but it proved ineffectual against more powerful or determined countries. When the League failed to recognize Japan's annexation of MANCHURIA, Japan withdrew from the organization in 1933. ITALY withdrew in 1937 after the League imposed sanctions on it over the Abyssinian War, and the USSR was ejected in 1940 following its attack on FINLAND in 1939. As hostilities increased prior to World War II, most countries dismissed the League and operated independently. It was dissolved in 1946, and its functions were taken up by the UNITED NATIONS.

League of Red Cross Societies Federation of national Red Cross societies that administers worldwide relief efforts. Headquartered in Geneva, Switzerland, it was founded in Paris after World War I. From its inception, the League's purposes included the

prevention of disease, the encouragement of new national Red Cross organizations, the spreading of information regarding science and medicine and the coordination of national and international relief work. During its years of operation the League has participated in hundreds of relief, rescue and disease-prevention programs. In 1963 it was awarded the NOBEL PEACE PRIZE, shared with the INTERNATIONAL COMMITTEE OF THE RED CROSS (ICRC). Today the League has a combined membership of some 250 million from approximately 144 national groups and is one of the three components of the International Movement of the Red Cross and Red Crescent, which also includes the ICRC and the various national Red Cross societies.

Leakey, Louis S(eymour) B(azett)

(1903–1972) Anglo-Kenyan archaeologist and anthropologist. Born in Kenya to British missionary parents, Dr. Leakey is one of the best known anthropologists of the 20th century. His discoveries of early primate fossils in the Olduvai Gorge in east Africa helped shape the 20th-century view of human evolution. In 1959 he and his wife **Mary Leakey**, also a noted anthropologist, discovered fossils of *Zinjanthropus* (now called *Australopithecus boisei*), a close ancestor of humans. From 1961 to 1964 the Leakeys and their son **Jonathan Leakey** unearthed fossils of *Homo habilis*, the oldest known primate with human characteristics. Louis Leakey's theories about the age of humankind aroused much controversy. In 1972 his son **Richard Leakey**, who directed the National Museum of Kenya, reported the discovery of a 2.6 million-year-old skull that bore a close resemblance to the skull of modern humans. Richard Leakey suggested that modern humans evolved from this creature rather than from *Australopithecus*. This finding raised further controversy. In 1975 Richard Leakey discovered the skull of *Homo erectus* (estimated at 1.6 million years old), and in 1984 he and another paleontologist discovered a virtually complete *Homo erectus* skeleton.

Lean, David (1908–1991) British film director. Lean earned a reputation as one of the leading directors in the cinema, primarily due to the epic

grandeur and scope he instilled in classic films such as *The Bridge on the River Kwai* (1957) and *Lawrence of Arabia* (1962), both of which won the ACADEMY AWARD for best picture. Lean began his directorial career in the 1940s, first as an assistant to Noel COWARD and then as a director on his own film versions of the Coward plays, *Blithe Spirit* (1945) and *Brief Encounter* (1945). Lean went on to adapt two works by Charles Dickens to the cinema, *Great Expectations* (1946) and *Oliver Twist* (1948). *Lawrence of Arabia* (about T. E. LAWRENCE) vaulted Irish actor Peter O'Toole to world prominence. Subsequent films by Lean include *Doctor Zhivago* (1964), *Ryan's Daughter* (1970) and *A Passage to India* (1984). In the early 1990s he was working on a film version of Joseph CONRAD's novel *Nostromo*.

Lear, Norman (1922–) American television and motion picture producer/screenwriter, best known for *ALL IN THE FAMILY*. After serving with the U.S. Army Air Force in World War II, Lear worked for many years in television as a comedy writer; he and partner Bud Yorkin formed Tandem Productions, which produced a number of successful situation comedies depicting family life in the 1970s. *All in the Family* began its 12-year run in 1971 (with spinoffs *Maude*, 1972, and *The Jeffersons*, 1975). *Sanford and Son* debuted in 1972, and *Good Times* first appeared in 1974. Another Lear company, T.A.T. Communications, developed several additional series, including *One Day at a Time* and *Mary Hartman, Mary Hartman* (both beginning in 1975). After leaving television in 1978, Lear pursued political, environmental and spiritual concerns in activist organizations like People for the American Way, Business Enterprise Trust and a multimedia conglomerate, ACT III. He later produced a new comedy series about what he called "today's lack of spiritual values"; he also produced several motion pictures for director Rob Reiner, who had earlier portrayed "Meathead" in *All in the Family*.

Lear, William Powell (1902–1978) American industrialist and inventor. Lear held patents on more than 150 inventions. He devised the automatic pilot, which became a standard feature on military, commercial and private

aircraft. He also designed the first practical automobile radio and the eight-track stereo player. His small Lear Jet was designed for the corporate market and replaced other small propeller-driven aircraft as the most popular airplane model owned by businesses.

Leary, Timothy (Francis) (1920–1996) American psychologist and drug experimenter. Born in Springfield, Massachusetts, he received a B.A. from the University of Alabama (1942) and a Ph.D. from the University of California, Berkeley (1950). Leary began teaching at Harvard in 1958. There he and a colleague initiated a series of experiments with the hallucinogenic drug LSD, often using themselves and their students as subjects. Leary soon became a psychedelics evangelist, touting their revolutionary, consciousness-altering properties and helping to introduce them to influential members of the 1960s generation. His experiments caused friction with Harvard's administration and he was fired from his post early in the '60s. Having converted to Hinduism in 1965, Leary founded the League for Spiritual Discovery the following year. In 1967 he delivered a version of the anthemic 1960s line "Turn on, tune in, drop out." He was first arrested on a drug charge in 1965, and a subsequent 1970 arrest and conviction sent him into exile abroad and caused his 1973–76 imprisonment. With a somewhat softened message on drugs, Leary remained a COUNTERCULTURE spokesman until his death in 1996.

Leavis, F(rank) R(aymond) (1895–1978) British author and critic. An enormously influential literary scholar and critic, Leavis was born in and educated at Cambridge, where he was influenced by I. A. RICHARDS, whose textual approach to literary criticism Leavis embraced and enhanced. He married Q. D. Leavis in 1929, another student of Richard's, whose *Fiction and the Reading Public* (1932) addressed the correlation between literature and literacy. From 1932 until 1953 Leavis was chief editor of *Scrutiny*, the controversial journal which was a forum for the NEW CRITICISM, and in which he attacked what he considered the dilettantish elitism of the BLOOMSBURY GROUP. Leavis's many groundbreaking works, which in-

clude *Mass Civilization and Minority Culture* (1930), *The Great Tradition: George Eliot, Henry James, Joseph Conrad* (1948), and *Dickens the Novelist*, written with Q. D. Leavis, (1970), purport that “ethical sensibility” is the most important criteria by which to judge an author. He offended many by criticizing literary lions such as Thomas HARDY and Charles Dickens. Leavis created additional furor by his caustic response to C. P. SNOW’s lecture, *Two Cultures*, in *Two Cultures?: The Significance of C. P. Snow* (1962). Leavis taught at Cambridge until 1964.

Lebanese Civil War of 1958

Elected president of LEBANON in 1952. Camille CHAMOUN oversaw a predominantly Christian (Maronite) government that stressed closer ties to Europe and the U.S. Lebanese Muslims, who made up about half of the country’s population, favored stronger economic and political relationships with the surrounding Arab nations. On May 9–13, 1958, Muslim groups openly rebelled against Chamoun’s regime, rioting and fighting in the streets of Tripoli and BEIRUT, Lebanon’s capital. The newly formed United Arab Republic (a political union of Egypt and Syria) had allegedly instigated the violence against the pro-Western policies of President Chamoun, whose government seemed on the verge of collapse as rebels under several Muslim leaders and Druse (Druze) chieftain Kamal Jumblatt overcame army troops. Refusing to resign, Chamoun appealed to the U.S. for help; U.S. president Dwight D. EISENHOWER ordered American forces from the Sixth Fleet to land near Beirut to support the government, as well as to protect American lives and to guard against a possible Egyptian-Syrian invasion of Lebanon (July 16–20, 1958). Within a month the Lebanese government and army, assisted by more than 14,000 U.S. troops, had control of the situation. General Fuad Chehab, a Maronite Christian, succeeded Chamoun as president on September 23, 1958; a new cabinet of four Christians, three Muslims and one Druse was formed. The U.S. backed the new government and completely withdrew its troops from Lebanon by late October that year.

Lebanese Civil War of 1975–90

LEBANON’s various Muslim groups, prin-

cipally the Shi’ite and Druse (Druze) sects, which make up about half the population, were never happy with the 1943 National Pact, which established a dominant political role for the Christians, especially the Maronites, in the central government. Further complicating the political climate was the presence of refugee Palestinian Muslims, living in camps or bases, particularly in the south, from which guerrillas of the PALESTINE LIBERATION ORGANIZATION (PLO) were carrying out attacks on neighboring Israel. Native Lebanese Muslims tended to sympathize with the PLO.

On April 13, 1975, a bus carrying many Palestinians was assaulted by Christian Phalangists and the passengers slain—triggering a long and bloody civil war. At first a leftist Muslim coalition fought rightist Christians; in early 1976, the PLO joined the Muslims after Christians raided a Palestinian refugee camp. ISRAEL supplied arms to Christians. With the backing of the ARAB LEAGUE of states, SYRIA sent 30,000 troops to restore order in Lebanon and to implement a peace plan (1976). Elias SARKIS, a Maronite Christian, was elected Lebanon’s president and, with Syrian, Israeli, U.S. and Saudi support, attempted to establish authority. By 1977 Lebanon was divided into a northern section, controlled by Syrian forces, and a coastal section under Christian control, with enclaves in the south dominated by leftist Muslims and the PLO. Syrians and Christian militiamen were soon battling each other, and the Syrians shelled the Christian part of BEIRUT, Lebanon’s capital. In retaliation for a Palestinian guerrilla terrorist attack on Israel, Israeli troops invaded southern Lebanon (March 14, 1978) to wipe out PLO bases and occupied the area as far north as the Litani River. The Israelis complied with a United Nations demand for their withdrawal from the area, then occupied by a UN peace-keeping force (1978).

In 1980 Syria concentrated forces in central Lebanon’s Bekaa (al-Biqā) Valley and later moved Soviet-made surface-to-air (SAM-6) missiles there. When the Phalangists (Christians) occupied the hills around Zahle near the strategic Beirut-Damascus highway, Syria launched a major offensive against them; Israeli jets intervened

and attacked the Syrians and also bombed areas of Beirut in retaliation for PLO rocket attacks from Lebanon into northern Israel. A cease-fire went into effect on July 24, 1981, but it was temporary. To dispel the PLO, invading Israeli troops reached the outskirts of Beirut and forced the evacuation of PLO guerrillas in 1982.

Lebanon’s Phalangist president-elect Bashir Gemayel (1947–82), chosen to succeed the retiring Sarkis, was assassinated on September 14, 1982; his brother, Amin Gemayel (b. 1942), a more moderate Christian leader, became president—just days before 328 Palestinian civilians would be massacred by alleged Phalangists at the SABRA AND SHATILA refugee camps in west Beirut (September 16–18, 1982). Afterward U.S. Marines and British, French and Italian troops arrived in Beirut as a peacekeeping force. A bomb blast killed more than 50 people at the U.S. embassy in Beirut on April 18, 1983. Israeli forces withdrew from Lebanon’s Shuf Mountains, which the Druse under their leader Walid Jumblatt (b. 1947) occupied after heavy fighting against Christians and the Lebanese army. On October 23, 1983, and without warning, 239 Americans and 58 French died in separate, suicidal bomb attacks on U.S. and French military headquarters in Beirut.

At Tripoli, PLO leader Yasir ARAFAT and his loyalists were attacked and besieged by PLO dissidents, supported by Syria, for six weeks until they were evacuated by a U.N.-flag-flying Greek ship on December 20, 1983. U.S. warships off the coast bombarded Syrian and Druse positions. Faced with his country’s disintegration into multiple ministates, President Gemayel sought national reconciliation talks to settle differences among political leaders—Phalangist, Maronite, Druse, Sunni, Shi’ite and others—in order to stabilize the government. U.S. Marines left Beirut in February 1984, with Lebanon still occupied in part by Syrian and Israeli troops and still divided by bitter feuds and warring factions. After Gemayel left office in 1988, Christian general Michel Aoun refused to acknowledge the new Syrian-backed government. In March 1989 his forces began a bitter fight against the Syrians, and later, against Christian factions that supported the new government.

LEBANON

- ul>
- 1910 Lebanon is governed as a semiautonomous province under shared French-Turkish control; internal power shared between representatives of Christian, Muslim and Druze communities.
- 1920 League of Nations formalizes French mandate in Lebanon and Syria.
- 1926 Detached from Syria and made semiautonomous republic by French, with Bechera al-Khoury as first president.
- 1943 Religious communities reach agreement to form government dominated by Christians, who are majority in population; independence granted.
- 1948 Lebanon joins Arab League attacks on Israel; accepts Palestinian refugees in large numbers.
- 1952 Corrupt al-Khoury forced to resign; Camille Chamoun assumes presidency.
- 1958 Nasserist Muslims revolt; U.S. president Eisenhower sends U.S. Marines at Chamoun's request to restore order.
- 1964 Under President Fuad Chebab, "Chebabist" Muslim-Christian alliance leads to period of calm; economic boom as Beirut becomes center of finance and trade in the Middle East.
- 1967 After the Six-Day War, PLO forces move to southern Lebanon, conduct raids on Israel.
- 1975 Despite new Muslim majority, Christians refuse to revise Agreement of 1943; frightened by Muslim demands and PLO strength, Christian militias attack Muslims; all-out civil war ensues.
- 1976 Syria and the Arab League intervene in Lebanese civil war.
- 1978 Israeli forces briefly occupy southern Lebanon; UN forces intervene after Israeli withdrawal.
- 1982 Israel again invades Lebanon, to wipe out PLO; Muslim refugees massacred by Israeli-backed right-wing Lebanese Phalangist militia; multinational peacekeeping force intervenes; country divided into areas of military control, with little real authority for central government.
- 1984 Peacekeeping force withdraws after losing hundreds of soldiers in bombing attacks; Christians and Muslims each begin fighting among themselves; government is powerless as anarchy prevails.
- 1985 Israeli forces complete their withdrawal.
- 1990 General Aoun of Christian Militia occupies presidential palace; Elias Hrawi forms second government with Muslim backing; Syrian forces destroy Aoun's base; Hrawi proclaims "Second Republic" with new constitution reflecting Muslim majority but guaranteeing Christian and Druze rights.
- 1991 Christian and Druze ministers quit new government and threaten new bloodshed.
- 1992 Rafik Hariri becomes prime minister; Western hostages still held by Shi'ite groups are released.
- 1996 Israel bombs Hezbollah bases in Beirut, southern Lebanon and the Bekaa Valley.
- 1998 Army head Emile Lahoud becomes president, succeeding Ilyas al-Hirawi.
- 2000 Israel withdraws from southern Lebanon; Rafik Hariri again becomes prime minister.
- 2004 UN Security Council resolution calls for foreign troops to leave Lebanon; Syria ignores the move.
- 2005 Former prime minister Rafik Hariri is killed in a car bombing in Beirut; calls for Syrian withdrawal from Lebanon escalate; Syria withdraws its troops.
- 2006 Armed Hezbollah factions kidnap two Israeli soldiers across the border and fire shells on northern Israeli towns, causing new Middle East crisis.

This stage of the war consisted mostly of artillery shelling; the bloodshed continued and more areas of Beirut were reduced to rubble. Aoun finally surrendered in October 1990. In the following months, calm returned to Beirut, and Lebanon began to achieve a genuine peace.

Lebanon (Republic of Lebanon)

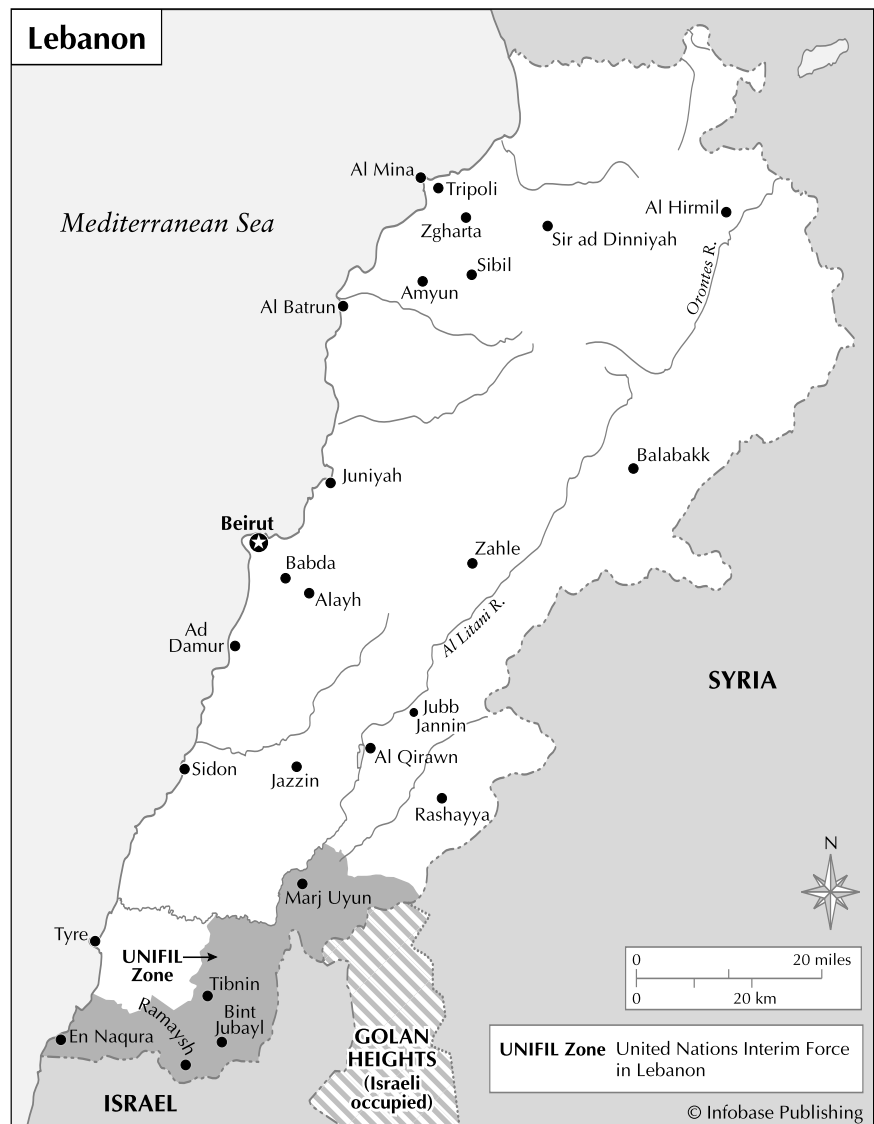

Lebanon covers an area of 4,014 square miles in southwest Asia, along the east coast of the Mediterranean. Part of France's LEAGUE OF NATIONS mandate for Syria in 1920, Lebanon became a semi-autonomous republic in 1926 and achieved full independence in 1944. The country fought with the Arab League against ISRAEL (1948–49). Internal stability was achieved for a period (1958–70) by maintaining a balance of political power between Christian and Muslim populations. The increased presence of the PALESTINE LIBERATION ORGANIZATION (PLO) by 1967 led to Israeli reprisal raids and eventual civil war between the PLO-leftist Muslim alliance and the Christians. As a result, Syrian forces occupied northern and eastern Lebanon in 1976, and Israel occupied southern Lebanon, withdrawing in favor of a UNITED NATIONS peacekeeping force (1978). Under President Amin Gemayel (1983–88) reform attempts and proposals to remove foreign troops failed, and increasingly volatile factions within the Christian-Muslim schism proliferated. Militant Muslim groups began kidnapping Western nationals and holding them hostage (18 known hostages by 1987). There was a complete breakdown of government authority by 1988, resulting in Michel Aoun heading a transitional military government based in Christian east Beirut while a rival government formed by President Elias Hrawi was headquartered in Muslim west Beirut. Aoun finally surrendered in late 1990, and the civil war came to an end. Despite the end of the civil war, terrorist groups such as HEZBOLLAH continued to operate in southern Lebanon, provoking cross-border raids by Israel in 1993 and 1996. In 2000 Israel withdrew its military forces from the “security zone” in southern Lebanon that they had occupied since 1985. This Israeli withdrawal allowed Hezbollah to employ southern Lebanon as a haven

for its fighters. In 2005 Lebanese prime minister Rafik Hariri, a critic of the Syrian presence in Lebanon, was assassinated. An explosion of anger in Beirut and other cities by demonstrators who blamed the Syrian government for the murder forced Syrian president Bashar al-Assad to comply with a UN Security Council resolution and withdraw the 14,000 Syrian troops from Lebanon. (See also LEBANESE CIVIL WAR OF 1975–90.)

Lebedev, Peter Nikolayevich (1866–1912) Soviet physicist. He studied at the Moscow Higher Technical School and at the universities of Strasbourg and Berlin and was appointed professor at Moscow University. He founded and built up the first

large school of physics in Russia. Lebedev conducted research in Maxwell's electromagnetic theory and succeeded in proving the pressure of light on solids and gases. His *Experimental Research on Light Pressure* was published in 1901.

Lebensraum German term meaning “living space,” and the doctrine it described. The term *Lebensraum* was introduced as early as the 1870s, but the concept did not become part of German policy until the 1920s and 1930s, when Adolf HITLER argued that GERMANY's boundaries were too small to support the German population; therefore, Germany would have to conquer foreign territory in order to give the German people more “living space.”

Hitler considered the Slavic countries to the east of Germany—namely, Poland and Russia—as Germany’s destined “Lebensraum.” In the NAZI mentality, the Slavic and Jewish people in these areas were inferior to the Aryan Germans. Germany thus had the right to occupy these lands and enslave or kill their people. The *Lebensraum* policy was carried out largely by Heinrich HIMMLER and the SS.

Le Brocquy, Louis (1916–) Irish painter, graphic artist and book and textile designer. Le Brocquy is one of the leading Irish artists of modern times, having won acclaim not only in his native land but also in England, America and France. The latter country awarded him a Chevalier of the French Legion of Honor in 1975. Le Brocquy has painted tinkers and other figures out of Irish folklore, as well as numerous canvasses devoted to children. He is also renowned for his portraits of literary figures including countrymen Samuel BECKETT, James JOYCE and William Butler YEATS. In 1992 *Aosdána*, an organization honoring literary, musical and visual artists in Ireland, recognized le Brocquy’s artistic contributions by designating him with the rank of *Saoi* (meaning “magnanimous man”), which was bestowed on him in 1994 by Ireland’s president Mary Robinson. Other recent awards include honorary PhDs awarded le Brocquy by Dublin City University (1999) and Queen’s University Belfast (2002), the French rank of *Officier des Arts et des Lettres* (1999), and the Belgian *Officier de l’Ordre de la Couronne Belge* (2001). Le Brocquy was commissioned to paint a portrait of Bono, the lead singer in the Irish band U2. The portrait was unveiled in October 2003 at Ireland’s National Gallery.

le Carré, John (David John Moore Cornwell) (1931–) British novelist known for his complex spy thrillers set during the COLD WAR. Educated at Oxford and Berne University, during the late 1950s he taught school at Eton and in Switzerland before joining the British foreign service. Ostensibly a member of the diplomatic corps in West Germany, he was actually an intelligence agent (1959–64). While in the Foreign Office he published two novels under the pen name John le

Carré. These books attracted little notice, but his third, *The Spy Who Came in from the Cold* (1963), won international acclaim as a classic of the genre. The novel concerns the efforts of a British agent, Lemas, to discredit an East German official. However, like many of his subsequent books, it can also be read as a gloss on cold war morality and the decline of Britain as a world power. Throughout his writing, le Carré debunks the myth of the glamorous spy popularized by Ian FLEMING. George Smiley, the hero (or antihero) of many of le Carré’s books (believed to be based on Sir Maurice OLDFIELD), is the antithesis of Fleming’s suave hero, James Bond. In le Carré’s world, the distinction between good and evil is often a matter of degree. Although his plots are meticulously detailed, le Carré is not interested primarily in the technical aspects of spycraft. Rather, he is concerned with the larger issues of loyalty, betrayal and faith. In this, in his careful prose style and in the doom-laden atmosphere of his novels, le Carré is the direct successor of Joseph CONRAD and Graham GREENE. Among le Carré’s other books are *A Small Town in Germany* (1968), *Tinker, Tailor, Soldier, Spy* (1974), *The Honourable Schoolboy* (1977), *Smiley’s People* (1980), *A Perfect Spy* (1986), *The Russia House* (1989) and *The Secret Pilgrim* (1991). (See also Kim PHILBY.) With the end of the Cold War, le Carré’s novels began to focus more on the clandestine nature of spycraft, as was the case in *The Night Manager* (1993), *Our Game* (1995), *The Tailor of Panama* (1996), *Single & Single* (1999), and *The Constant Gardener* (2000). In January 2003 the *London Times* published his essay entitled “The United States Has Gone Mad,” which criticized U.S. plans to invade Iraq.

Le Corbusier (Charles Edouard Jeanneret-Gris) (1887–1965) Swiss-born architect. Le Corbusier was one of the most influential architects of the 20th century. He was equally renowned for his theoretical writings and for his unique architectural projects, which were constructed in locales around the world. These latter projects included the *Unité d’Habitation*, a “vertical city” in Marseilles, and the Punjabi capitol complex at CHANDIGARH, India. Le Corbusier was closely associated with nu-

merous painters influenced by the Cubist movement, including Fernand LÉGER. In his writings Le Corbusier emphasized the need to plan for ideal cities of the future in which “modular” man could function with efficiency and safety. His major works included *Towards a New Architecture* (1923), *The City of Tomorrow* (1925), and *When the Cities Were White* (1937).

Ledbetter, Huddie “Leadbelly” (1888–1949) American blues singer and composer. He started his career by playing guitar at dances. He was jailed three times for murder, attempted murder and assault charges between 1918 and 1939. Writer John A. Lomax met him in prison and assembled his songs into a book, *Negro Folk Songs as Sung by Lead Belly* (1936). After his release from prison, Ledbetter toured France in 1949.

Le Duc Tho (Phan Dinh Khal) (1911–1990) North Vietnamese diplomat. A member of the North Vietnamese Communist Party Politburo from 1955 until his retirement in 1986, he negotiated secretly in Paris with U.S. national security advisor Henry KISSINGER in an effort to end the VIETNAM WAR. Those negotiations produced a cease-fire agreement and a withdrawal of U.S. troops, but fighting between North and South continued. The two men were jointly offered the NOBEL PEACE PRIZE in 1973, but Tho declined on the grounds that “peace has not yet been established.” He later directed the final military offensive by North Vietnam in 1975, which brought about the fall of the South Vietnamese government and the merger of the two nations under communist rule.

Led Zeppelin British rock-and-roll band (1968–80). Led Zeppelin is one of the most commercially successful and musically influential bands in the history of ROCK AND ROLL. While many critics disdain the band’s music, the Led Zeppelin sound—throbbing guitar and thrashing rhythm section overlaid with melodramatic vocals—defined heavy metal in the 1970s and inspired a host of imitative bands who continue to perform to this day. The members of Led Zeppelin were John Bonham, drums; John Paul Jones, keyboards and bass; Jimmy Page, guitar; and

Robert Plant, vocals. All 10 Led Zep-
pelin albums went gold or platinum in
total sales. The band's trademark an-
them, "Stairway to Heaven" (1971), is
considered one of the greatest rock-
and-roll songs of all time.

Lee, Ang (1954–) Taiwanese film
director and writer. Born in Taiwan, Lee
first exhibited his interest in the per-
forming arts when in 1978 he enrolled
in the University of Illinois to study
drama. While studying toward his B.A.
in theater, Lee developed an interest in
film and enrolled in the New York Uni-
versity (NYU) Film School, from which
he graduated in 1984. After leaving
NYU, he spent eight years searching for
funding for his film scripts. Lee re-
turned to Taiwan and won a script
contest through which he obtained
funding for *Pushing Hands* (1992), a
film that depicted a Taiwanese father-
son relationship. Lee followed *Hands*
with *The Wedding Banquet* (1993) and
Eat Drink Man Woman (1994). Both
films portrayed the relationship be-
tween a traditional Taiwanese father
and his cosmopolitan children and
were also nominated for the Academy
Award for Best Foreign Language Film.
Following these critically acclaimed
Chinese-language projects, Lee directed
a screen version of *Sense and Sensibility*
(1995), *The Ice Storm* (1997), and *Ride
with the Devil* (1999), all of which re-
ceived great critical praise. However, it
was not until his Chinese-language ad-
venture film *Crouching Tiger, Hidden
Dragon* (2000) that Lee experienced
both critical acclaim and box office suc-
cess. *Crouching Tiger* won the 2001
Academy Award for Best Foreign Lan-
guage Film, and proved one of the most
lucrative films of 2001, despite its use
of English subtitles. In 2006 Lee won
the Academy Award for best director
for *Brokeback Mountain* (2005).

Lee, Gypsy Rose (1914–1970)
American entertainer. Born Rose
Louise Hovick, Gypsy Rose Lee ele-
vated the striptease to an art form and
became the sophisticated queen of
burlesque. Intelligent as well as beau-
tiful, she became the toast of New York
intellectuals. She starred in the
ZIEGFELD FOLLIES in the 1930s and on
Broadway (*Star and Garter*), in addi-
tion to publishing a ghostwritten novel
(*The G-String Murders*) and hosting her

own national television talk show in
the 1960s. A Broadway musical based
on her life opened in 1959 (music by
Jule STYNE and lyrics by Stephen SOND-
HEIM), was made into a film in 1962
and was revived on Broadway in 1990.

Lee Kuan Yew (Lee Kwan Yu)
(1923–) Prime minister of SINGAPORE
(1959–1990); educated at Raffles Col-
lege, Cambridge University (double first
in law with star for special distinction)
and the Middle Temple, London. In the
early 1950s he was legal adviser to a
number of trade unions in Singapore.
Lee Kuan Yew helped found the PAP
People's Action Party in 1954 and was
elected to parliament in 1955. Prime
minister of Singapore since 1959, he
was widely recognized both within and
outside Singapore as a man of outstand-
ing intelligence, political skill and vi-
sion; but he was also seen as a man of
ruthless determination who has found it
increasingly difficult to tolerate opposi-
tion to his views. He was the dominant
figure in the political life of Singapore
and one of Asia's most well-known po-
litical figures. In 1990 Lee left the pre-
miership, though he remained in the
Cabinet as senior minister.

Lee Teng-hui (Li Denghui) (1923–)
Mayor of Taipei (1978–81), governor
of Taiwan province (1981–84), vice
president of Taiwan (1984–88), and
president of TAIWAN (1988–2000).
Born to a family of tea-leaf farmers, Lee
worked on his family's farm in Sanchih
and attended school on the Japanese-
controlled island of Taiwan until 1941,
when he qualified for several years of
study at Kyoto Imperial University.
After five years of studying at Kyoto,
Lee returned to Taiwan in 1946, where
he studied agricultural economics at
the National Taiwan University and re-
ceived a B.S. in 1948.

After 13 years directing the im-
provement of agricultural yields of Tai-
wanese farms, as an economist, on the
Joint Commission on Rural Recon-
struction (JCRR), Lee left the JCRR to
enroll at Cornell University, where he
studied the flow of capital investment
within the agrarian sector in Taiwan.
After receiving his Ph.D from Cornell in
1968, Lee returned to Taiwan where he
eventually accepted an appointment in
the Taiwanese Cabinet as a minister
without portfolio. In 1978 Lee was ap-

pointed mayor of Taipei, the capital of
Taiwan, and in 1981 became governor
of Taiwan province. Because of his suc-
cess as governor, President Chiang
Ching-kuo (Jiang Jingguo), son of for-
mer president CHIANG KAI-SHEK (Jiang
Jieshi), selected Lee as his vice presi-
dent in 1984, making Lee the first na-
tive-born Taiwanese to hold that office.
Together, Chiang and Lee worked to in-
troduce more democratic elements into
Taiwan, such as ending the state of
martial law in 1987 that had been in
force since the Chinese Nationalist
regime established itself in Taiwan in
1949. When Chiang died in 1988, Lee
became president of Taiwan as well as
president of the Kuomintang (Guo-
mindang). Lee continued to introduce
liberal reforms in Taiwan by sanction-
ing the formation of opposition parties
and the holding of free local and
provincial elections. In 1990 the Na-
tional Assembly elected Lee to a six-
year term as president. Following his
election, Lee modified the constitution
to ensure that the presidential office
would be filled through direct popular
election and its term would be only
four years. In 1996 he won the first
presidential election with 55 percent of
the vote. In 2000 Lee abstained from
running for reelection and resigned as
head of the Kuomintang.

During his elected terms as presi-
dent, Lee's greatest challenge was the
improvement of relations between
CHINA and Taiwan. Still viewing Tai-
wan as a "renegade province," the Peo-
ple's Republic of China (PRC)
vehemently protested Lee's 1995 pri-
vate visit to the U.S. and scheduled a
large naval exercise in Taiwanese wa-
ters during the election in an attempt
to intimidate those opposition candi-
dates who ran on platforms advocating
the independence of the island.

Left Socialist Revolutionaries The
heirs of the *narodnik* (see **Narodnaya
Volya**) tradition, the Left Socialist Revo-
lutionaries enjoyed the support of many
of the peasants. One-time allies of the
BOLSHEVIKS, their alliance foundered
when the Bolsheviks strengthened the
power of the army and police. The Left
Socialist Revolutionaries, however,
lacked clearly devised policies; although
angered by the reintroduction of the
death penalty, they kept their men in
the CHEKA. They opposed LENIN over

the Treaty of BREST-LITOVSK, in 1918; Muravev attempted to declare war on Germany and the Bolsheviks; and several groups of the Left Socialist Revolutionaries attempted to overthrow the Bolshevik leadership of the local Soviets in provincial towns. After the assassination of the German ambassador, Count Mirbach, Maria Spiridonova and other leading members were shot, and the Left Socialist Revolutionaries lost credibility and ceased to threaten the position of the Bolsheviks.

Léger, Fernand (1881–1955) French painter. Léger was deeply influenced by CUBISM, although he maintained a large degree of independence from all artistic movements during his lengthy career. He first came to prominence in the years prior to World War I after his canvasses were displayed at the *Section d'Or* exhibition of 1912, which also featured the work of numerous Cubist painters. Léger was fascinated with the possibilities of applying modern technology to artistic creation. He made a close study of architecture and became friends with LE CORBUSIER and the artists and craftsmen of the de STIJL movement. Léger's paintings also show the influence of the cinema and advertising art. His experience as an artilleryman during WORLD WAR I also showed itself in Léger's work and led him to theorize that machinery was the most successful and aesthetically significant of all human creations. In his later years Léger turned away from his abstract compositions to more figurative works.

Legion of Decency Formed in the U.S. in 1933 by the Catholic Church, the legion forced the film industry to adhere to a rigid moral code for all films; the church replaced it in 1966 with the National Catholic Office for Motion Pictures. Upset by what it considered to be an increasing number of immoral movies, like Mae WEST's *She Done Him Wrong* (1932), the Catholic Church launched its Legion of Decency campaign in 1933, led by Martin Quigley, owner of the industry trade paper *Motion Picture Herald*, and Archbishop John McNicholas of Cincinnati. The legion had two goals: to install a Catholic censor in Hollywood and to continue to pressure the industry to produce "clean" films. It achieved its first goal in 1934 when Will Hays, head

of the Motion Picture Producers and Distributors of America (MPPDA), hired Joseph Breen, an active lay Catholic, as censor. Its second goal was successfully defended for almost 30 years.

From 1934 to 1936, legion activities were centered in Chicago, where a "C," or Condemned, rating was initiated, forbidding Catholics to attend such films as *Anna Karenina* (MGM, 1935), *Laughing Boy* (MGM, 1934), *Of Human Bondage* (RKO, 1934) and *Girl from Missouri* (MGM, 1934). In 1936 Legion offices were moved to New York. Films were reviewed by the International Federation of Catholic Alumnae. A new rating system was developed that gave films an A-1 (Morally Unobjectionable), A-II (Morally Unobjectionable for Adults), B (Morally Objectionable in part) or C (Condemned). Each year the legion "pledge" was given by 20 million Catholics, who promised to avoid condemned and objectionable films. For three decades the legion quietly pressured Hollywood to alter hundreds of films. After an initial flurry of "C" ratings, the legion issued few because the industry began to rigidly enforce the motion picture code. There were notable exceptions. Howard HUGHES incurred the wrath of the legion when he released *The Outlaw* (1943), an over-sexed story of outlaw Billy the Kid. Roberto ROSSELLINI's *The Miracle* (Tinia, 1948) was condemned as "sacrilegious and blasphemous" in 1950; it was banned in New York, but the U.S. Supreme Court overturned the decision and declared films protected under the First Amendment.

In a postwar climate of growing freedom of expression, the legion was seen as an anachronism. When the industry began to restrict audiences and rate its films in 1966—G for anyone, M for mature audiences, R restricted and X for adults only—the legion's influence began to wane.

Lego Plastic construction toy developed in Denmark that has outstanding design quality along with very rich play possibilities. Lego is based on a modular plastic block studded on top with projecting disks that mate with a hollowed-out bottom so the blocks lock together. The system first appeared in 1947 and has gradually been expanded, with the addition of compo-

nents in many shapes and sizes, all using the same connecting detail and all in modular sizes. In 1955 sets were introduced that make up particular toys (some very elaborate), but all using interchangeable components so that the toy can be used in a wide variety of ways as a child grows. The manufacturer, Lego System A/S of Billund, Denmark, does not give design credit to any individual, although the firm's founder, Godtfred Kirk Christiansen, appears to have developed the concept based on the children's wood blocks that the firm made previously. Many variations of Lego have appeared, and many imitations are now made. Lego is a truly educational toy in both technical and aesthetic terms.

Le Guin, Ursula K. (1929–) American novelist, story writer, poet and essayist. Le Guin is best known for her science fiction novels, the most famous of which is *The Left Hand of Darkness* (1969), which depicted an alien planet on which female cultural values were dominant. She is the daughter of two well-known anthropologists, Alfred and Theodora KROEBER; an anthropological approach to customs and morals is one of the hallmarks of Le Guin's fiction. She is one of the most highly honored of science fiction writers—having won numerous Hugo and Nebula Awards—and her work in that genre has won the praise of mainstream critics as well. Other novels include *Wizard of Earthsea* (1968), *The Dispossessed: An Ambiguous Utopia* (1974), *The Lathe of Heaven* (1975) and *The Word for World Is Forest* (1976). *Orsinian Tales* (1976) is her best known story collection. *Always Coming Home* (1985) is a representative selection of stories, essays and poems. Since 1991 le Guin has published 27 books on topics ranging from science fiction to poetry, and has received 28 awards, including the Asimov Readers Award (1995 and 2003), and the Nebula Award (1996).

Lehar, Franz (1870–1948) Austrian composer. Lehar was an extraordinarily popular composer of operettas during the early decades of the 20th century. His beautiful melodies and lilting waltzes typified the gaiety and joie de vivre of life in Vienna early in the century. His most well-known op-

eretta, *The Merry Widow*, was first produced in 1905 and has enjoyed worldwide popularity with opera and light opera companies ever since.

Lehmann, Lilli (1848–1929) German singer. The greatest Wagnerian soprano of her time and one of the great performers of *Lieder*, Lehmann also excelled in the French and Italian repertoires, demonstrating her musical versatility and dramatic ability by mastering 170 roles in 119 operas. After performing with the Berlin Royal Opera, she made her New York Metropolitan Opera debut as Carmen in 1885. She thrilled Met audiences when she created the roles of Isolde in *Tristan and Isolde* (1886), Brunnhilde in *Siegfried* (1887) and Brunnhilde in *Die Götterdämmerung* (1888), for the first time in America. She gave *Lieder* recitals after 1909; among her students was future opera star Geraldine FARRAR. Lehmann also taught at the Mozarteum in Salzburg, Austria (from 1926). Her annual appearances as singer and director at summer performances in Salzburg (1905–10) gave the impetus for the establishment of the annual SALZBURG FESTIVAL in 1920.

Lehmann, Lotte (1888–1976) German-born opera singer, recitalist and voice teacher, considered one of the great dramatic sopranos and *Lieder* singers of the early 20th century. After appearing with the Hamburg Opera (1909–14), Lehmann gained international fame with the Vienna Royal Opera, establishing herself as a great Wagnerian soprano in such roles as Sieglinde in *Die Walküre* and Eva in *Die Meistersinger*. She also became the foremost interpreter of female roles in Richard STRAUSS's operas, creating the role of the Dyer's wife in *Die Frau ohne Schatten* (among others) and emerging as the greatest Marschallin in *Der Rosenkavalier* of her generation. In the 1920s she began giving *Lieder* recitals, which continued even after her retirement from opera. In addition, she became a well-known voice teacher, helping to establish the Music Academy of the West at Santa Barbara, California. The recipient of many awards and honors, she became an American citizen in 1945.

Leica Family of 35 mm cameras considered design classics, which are produced by the German optical firm of Ernst Leitz GmbH. of Wetzlar, Germany. The concept of the miniature camera using standard motion picture film was developed around 1913 by Oskar BARNACK, a technician employed by Leitz. In 1924 a commercial version of the camera was put into production, and improved versions were introduced in quick succession, adding refinements such as range-finder focusing, interchangeable lenses and a full range of fast and slow shutter speeds. The design of the Leica, based on the technical vocabulary of quality optical instruments (such as the microscopes made by Leitz) and on close adherence to the functional demands of the camera, reached its high point with the models F and G of the 1930s. Acceptance by a number of famous photographers, such as Henri CARTIER-BRESSON and Walker EVANS, combined with awareness of the camera's technical excellence, made it extremely popular, and early models are now collected by a cult of admirers. Later models, including the post-World War II series M versions, have maintained Leica's high level of design excellence. Many similar cameras were developed to compete with the Leica, but none have reached the same level of popularity.

Leigh, Vivien (Vivien Mary Hartley) (1913–1967) British screen and stage actress. Leigh, renowned as one of the most ethereally beautiful actresses of the 20th century, remains best known for her starring role as Southern heroine Scarlet O'Hara in the 1939 film *GONE WITH THE WIND*, for which she won an ACADEMY AWARD for Best Actress. Leigh first rose to prominence in the British cinema in the 1930s, most notably through her starring role opposite Laurence OLIVIER—whom she married after leaving her first husband—in *Fire Over England* (1937). She also appeared frequently on the British stage, including a 1937 role as Ophelia opposite Olivier's Hamlet. After *Gone With The Wind*, Leigh became an international star, though recurrent physical and emotional problems limited her roles in the final decades of her life. Her subsequent films included *Waterloo Bridge* (1940), *That Hamilton Woman* (1941), *Caesar*

and *Cleopatra* (1945), *Anna Karenina* (1948), a second Oscar-winning performance as Blanche du Bois in Tennessee WILLIAMS's *A Streetcar Named Desire* (1951), *The Deep Blue Sea* (1955), *The Roman Spring of Mrs. Stone* (1961) and *Ship of Fools* (1965).

Leighton, Margaret (1922–1976) British stage actress. Leighton came to prominence in the 1940s as an accomplished actress capable of playing the classic roles of the British theater. While a member of the renowned Old Vic company from 1944 to 1947, Leighton won acclaim for her roles as Raina in *Arms and the Man* by George Bernard SHAW, and as Regan opposite the Shakespearean King Lear of Laurence OLIVIER. Leighton subsequently appeared as Celia in *The Cocktail Party* (1950) by T. S. ELIOT and in three major Shakespearean roles—Rosalind, Ariel and Lady Macbeth—at Stratford-upon-Avon (1952). Leighton continued to be active in both London and Broadway theatrical productions until her death.

Leinsdorf, Erich (1912–1993) Austrian-born opera and symphonic conductor renowned for his affiliations with the Metropolitan Opera and the Boston Symphony Orchestra. Leinsdorf was a latter-day adherent to the objective, antiromantic school of conducting. He was born in Vienna, graduated from the Vienna Conservatory, and assisted Bruno WALTER and Arturo TOSCANINI at the Salzburg festivals in the mid-1930s. In 1938 he immigrated to the U.S., where he reigned supreme for 10 years at the Metropolitan Opera. He reached his zenith as Musical Director of the Boston Symphony in 1962–69 succeeding, chronologically, Serge Koussevitzky and Charles MUNCH. His mastery of large forces and relentless discipline with players made him an effective opera conductor. However, his methodical, calculating objectivity did not make him popular with many critics and performers. A man of great intellect with a thorough grasp of diverse subjects, he felt justified in altering or “adjusting” symphonic classics to his own standards. “I think these works should be edited in order to sound as well as they can sound,” he told this writer. “They should not be done literally the way they have been orchestrated originally, because our

orchestras are different, our halls are different, and our ears are different.” He was well known for his advocacy of music of the so-called second Viennese school—Arnold SCHOENBERG, Alban BERG and Anton WEBERN.

Lem, Stanisław (1921–2006) Polish science fiction writer. Lem is the first major writer in this genre to have emerged from Eastern Europe. Currently regarded as one of the leading voices in science fiction, Lem was educated in his native Poland and earned a medical degree in 1946. He has enjoyed the rare distinction of seeing his science fiction stories published in mainstream literary periodicals such as *The NEW YORKER*. Lem has also been influential, through his essays in the Polish journal *Quarber Merkur*, as a stringent critic of the overall literary standards of the science fiction genre. Lem’s major works of science fiction include *Solaris* (1970), *Memoirs Found in a Bathtub* (1977), *Memoirs of a Space Traveller* (1983) and *Imaginary Magnitude* (1984).

Lemaître, Abbé Georges Edouard (1894–1966) Belgian astronomer and cosmologist. After serving in World War I, Lemaître studied at the University of Louvain in Belgium from which he graduated in 1920. He then attended a seminary at Malines, and was ordained as a Roman Catholic priest in 1923. Before taking up an appointment at the University of Louvain in 1925, he spent a year at Cambridge, England, where he worked with Arthur EDDINGTON and a year in America where he worked at the Harvard College Observatory and the Massachusetts Institute of Technology. He remained at Louvain for the whole of his career, being made professor of astronomy in 1927. Lemaître was one of the propounders of the BIG BANG THEORY of the origin of the universe. EINSTEIN’s theory of general relativity, announced in 1916, had led to various cosmological models, including Einstein’s own model of a static universe. Lemaître in 1927 (and, independently, Alexander FRIEDMANN in 1922) discovered a family of solutions to Einstein’s field equations of relativity that described not a static but an expanding universe. This idea of an expanding universe was demonstrated experimentally in 1929 by Edwin HUBBLE who was unaware of

the work of Lemaître and Friedmann. Lemaître’s model of the universe received little notice until Eddington arranged for it to be translated and reprinted in the *Monthly Notices of the Royal Astronomical Society* in 1931. It was not only the idea of an expanding universe that was so important in Lemaître’s work, and on which others were soon working, but also his attempt to think of the cause and beginning of the expansion.

If matter is everywhere receding, it would seem natural to suppose that in the distant past it was closer together. If we go far enough back, argued Lemaître, we reach the “primal atom,” a time at which the entire universe was in an extremely compact and compressed state. He spoke of some instability being produced by radioactive decay of the primal atom that was sufficient to cause an immense explosion that initiated the expansion. This big bang model did not fit too well with the available time scales of the 1930s. Nor did Lemaître provide enough mathematical detail to attract serious cosmologists. Its importance today is due more to the revival and revision it received at the hands of George GAMOW in 1946.

LeMay, Gen. Curtis Emerson (1906–1990) U.S. Air Force officer. In WORLD WAR II, LeMay pioneered precision daylight bombing of GERMANY and JAPAN. It was he who received President Harry S. TRUMAN’s order to drop nuclear bombs on HIROSHIMA and NAGASAKI in 1945. In 1948 he led the BERLIN AIRLIFT, which overcame a Soviet blockade of the city. He commanded the STRATEGIC AIR COMMAND from 1948 until 1957, when he was named U.S. Air Force vice chief of staff. From 1961 to 1965 he held the position of U.S. Air Force chief of staff. Following his retirement, in 1968 he was the controversial running mate of presidential candidate George WALLACE; he advocated the nuclear bombing of Vietnam.

Lemmon, Jack (John Uhler Lemmon III) (1925–2001) American actor. Educated at Harvard University, Lemmon served in the navy and returned to begin his acting career in Off-Broadway productions and television dramas. He made his movie debut

opposite Judy Holliday in the comedy *It Should Happen to You* (1954). He later appeared in a number of films, his performance in *Mr. Roberts* (1955), winning a supporting actor ACADEMY AWARD. He became a major star through his association with director Billy WILDER, co-starring in *Some Like It Hot* (1959) and *The Apartment* (1960). His 1960s movies include the wrenching drama *The Days of Wine and Roses* (1962) and the hilarious comedy *The Odd Couple* (1968), the first of his many projects with actor Walter Matthau and writer Neil SIMON. His later films included *The Prisoner of Second Avenue* (1975), *The China Syndrome* (1979), *Tribute* (1980) and *Mass Appeal* (1984). A kind of Hollywood “Everyman,” Lemmon distinguished himself in a wide variety of roles, from farce to melodrama, and proved to be an enduring movie star.

Lemnitzer, General Lyman L. (1899–1988) U.S. Army commander. Lemnitzer, a WORLD WAR II hero who also served as a diplomat, helped to negotiate the surrender of Italian and German forces in Italy and Austria. Lemnitzer later commanded United Nations forces during the KOREAN WAR. In 1957 he returned to Washington and in 1960 was named chairman of the Joint Chiefs of Staff. His last post was as supreme Allied commander in Europe, a job he held until he retired from active duty in 1969.

Lemon, Bob (1920–2000) American baseball player and manager. One of the most consistent pitchers of the postwar era, Lemon posted 20-win seasons seven times. A fastballer, he was part of the Cleveland Indians’s fearsome pitching staff of the 1950s that included Bob Feller and Early Wynn. He led the American League in strikeouts in 1950. A solid hitter, he was occasionally used in pinch-hit situations, and finished his career with 37 home runs. Upon his retirement in 1958, he stayed in baseball as a coach and scout. He returned to the major leagues in 1970 with the Kansas City Royals, and won Manager of the Year honors in 1971. In the late 1970s and early 1980s, he managed the tumultuous New York Yankees, replacing the often-hired-and-fired Billy Martin, and later being replaced by him. Later yet, he returned to replace Gene

Michael, and was replaced by him in 1982. Lemon was named to the Hall of Fame in 1976.

LeMond, Greg (1962–) American cyclist. LeMond became the first non-European and first American to win the 2,500-mile, 22-leg Tour de France, in 1986. In April 1987 he was accidentally shot while hunting, and many believed his career was over. Nevertheless, he came back to win the Tour again in 1989 and was named "Sportsman of the Year" by *Sports Illustrated* magazine. In 1990 he won it for the third time, prompting the French sports paper *L'Étoile* to dub him "roisoleil," the "sun king." In 1994 LeMond retired from professional cycling.

Lendl, Ivan (1960–) Czechoslovakian-born tennis player. The son of two national tennis stars, Lendl became one of the top players of the 1980s. He won the U.S. Open singles championship three times from 1985 to 1987. He won the French Open twice and was Grand Prix Masters champion an unprecedented five times during the 1980s. His stern on-court demeanor prevented his ever becoming a crowd favorite, but tennis purists were enthralled by his powerful serve and forehand. Lendl moved to the U.S. in 1981. Lendl became a U.S. citizen in 1992 and retired from professional tennis in 1994.

Lend-Lease Act proposed by President Franklin D. ROOSEVELT and passed by Congress on March 11, 1941, while the U.S. was still a neutral party in WORLD WAR II. The Lend-Lease Act allowed the president to transfer, lend or lease war materials to "the government of any country whose defense the president deems vital to the defense of the U.S." It permitted the immediate supply of arms, ships, machinery, food and services to Great Britain and China. The lend-lease program was soon extended to the USSR and later to most of the Allied countries. It was also an important factor in pressing American industry to gear up for wartime production. From September 1942 the U.S. received "reverse lend-lease" from British COMMONWEALTH countries and the FREE FRENCH in goods and services supplied to U.S. troops abroad. By the time President Harry S. TRUMAN ended

the program on August 21, 1945, some \$50 billion of lend-lease aid has been supplied to the Allies, with some \$8 billion in "reverse lend-lease" given to the U.S. After the termination of lend-lease, American overseas aid was continued through the MARSHALL PLAN. Settlements of lend-lease debts were negotiated after World War II. The final settlement with the USSR was concluded in 1972.

Lenin (Vladimir Ilyich Ulyanov) (1870–1924) Russian revolutionary, leader of the Bolsheviks and chief theoretician of Russian Marxism. He was born at Simbirsk into a middle-class family. His brother Alexander was hanged in 1887 for planning an attempt on Czar Alexander III's life, greatly influencing Lenin's early life. Lenin studied law at Kazan University, but was expelled for subversive activity. Having studied Marx extensively, he went to St. Petersburg and organized the League for the Liberation of the Working Class. As a result he was arrested in 1897 and exiled for three years to Siberia, where he married Nadezhda KRUPSKAYA. He continued his revolutionary activities abroad. In 1903, in London, Lenin became the leader of the BOLSHEVIK faction of the Russian Social Democratic Labor Party. He returned to RUSSIA for the 1905 Revolution. In 1907 he fled to

Switzerland, and by means of underground organizations continued to master-mind the Russian revolutionary movement.

He was living in Switzerland during World War I and in March 1917 the Germans clandestinely arranged for Lenin to return home in a sealed train. Once in Petrograd, he turned his attention to the overthrowing of Alexander KERENSKY's provisional government, and was appointed chairman of the Council of People's Commissars. The APRIL THESES were published, and during that summer he took refuge in Finland before returning to organize, with TROTSKY, the OCTOBER REVOLUTION. He secured peace with Germany by the Treaty of BREST-LITOVSK and in 1919 set up the COMINTERN to work toward world revolution.

Lenin and the Red Army fought until 1921 before defeating the WHITES. His position as chairman was strengthened, and Lenin became a virtual dictator. To restore the economy, he instituted the NEW ECONOMIC POLICY in 1921. Lenin's health, which had been failing since an assassination attempt in 1918, grew worse. Although he warned that STALIN should not be allowed to continue as secretary general of the COMMUNIST PARTY, Lenin's warning went unheeded. He died in 1924, and his body, now embalmed, lay in a mausoleum in Red Square during the Communist era.

Leningrad See ST. PETERSBURG.

Leningrad, siege of (1941–1944) Siege operation during WORLD WAR II. On June 22, 1941, the Germans put 500,000 troops over the Russian frontier, and by November 1941 elements of that army were outside Leningrad. The Soviet forces, weakened by the GREAT PURGE, were unprepared. Leningrad was besieged and 750,000 people eventually perished. On January 15, 1944, the Russians began to break out of the town, and on January 20 succeeded in cutting the German supply corridor to the Gulf of Finland. On January 27 the two-and-a-half-year siege—one of the most heroically defended in the history of warfare—ended.

Lennon, John (1940–1980) British rock and roll composer, vocalist and guitarist. Lennon, who remains best

Russian revolutionary Vladimir Lenin (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

John Lennon and Yoko Ono, c. 1975 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

known for his 1960s years in the BEATLES, was one of the greatest songwriters in the history of ROCK AND ROLL, as well as one of its most outspoken personalities. Born in 1940 to a working-class LIVERPOOL family, Lennon took up the guitar at age 14 and, in 1955, began to play with fellow Liverpool teenager Paul MCCARTNEY. In 1958 the two formed a band named Johnny and the Moondogs that would transform into the Silver Beatles and then simply the Beatles. In the 1960s, Lennon and McCartney formed a songwriting team par excellence, drawing on their shared 1950s rock roots and their passion for studio experimentation. From "I Want to Hold Your Hand" (1964) to "Let It Be" (1970), Lennon-McCartney songs dominated and transformed popular music. In 1969 Lennon married Yoko Ono, with whom he would collaborate, after the breakup of the Beatles in 1970, on numerous musical projects. In the late 1960s, Lennon became a fervent antiwar spokesman and his song "Imagine" (1971) became an anthem of the peace movement. Lennon's final solo album *Double Fantasy* (1980), featured a Billboard number one hit song, "(Just Like) Starting Over." It was released just before the tragic murder of Lennon in New York City on December 8, 1980, which provoked worldwide mourning.

Leno, James Douglas Muir "Jay" (1950–) Comedian; television talk show host. Born in New Rochelle, New York, in 1950, Leno grew up in Andover, Massachusetts. After obtaining his B.A. in speech therapy from Emerson College in 1973, he performed as a

standup comic in many nightclubs during the 1970s and 1980s, using his sharp wit and evocative facial expressions to delight audiences. He also landed minor parts in films. But he discovered his true métier in comedy routines on late-night television. He made numerous appearances on the popular variety program *Late Night with David Letterman* and served for many years as the permanent guest host on Johnny Carson's *Tonight Show*. When Carson announced in 1991 his intention to retire the following year, Leno defeated David LETTERMAN in a spirited contest to succeed the popular Carson. After Letterman left NBC for CBS to create a new show titled *The Late Show with David Letterman*, Leno and Letterman duelled for the late-night audience for the rest of the decade and into the 21st century. Letterman's *Late Show* took an early lead in the ratings, but Leno overtook his rival in 1995 and has usually had higher ratings ever since. On *The Tonight Show's* 50th anniversary episode in September 2004, Leno announced his intention to retire in 2009, with the host of NBC's *Late Night*, Conan O'Brien, to replace him.

Lenya, Lotte (Karoline Blamuer) (1898–1981) Austrian born actress and singer. While acting in BERLIN in the 1920s Lenya met the composer Kurt WEILL, whom she married. She appeared in many plays on which Weill collaborated with Bertolt BRECHT, including *Die Dreigroschen Oper* (*THE THREEPENNY OPERA*, 1927), in which she created the role of the prostitute, Jenny. She and Weill fled to the U.S. after Adolf HITLER came to power in GER-

MANY. After Weill's death she resumed her stage career on Broadway, winning a Tony Award for playing Jenny in a revival of *Threepenny Opera* (1955); she was also in *Cabaret* (1966). She also appeared in films, including *From Russia With Love* (1963), and supervised and sang on a series of recordings of Weill's music.

Leonard, Hugh (pen name of John Keyes Byrne) (1926–) Irish playwright, theater critic and television and screenplay writer. Leonard worked as a civil servant before achieving success as a playwright in the 1950s. His first play, *The Big Birthday* (1956), was produced at the ABBEY THEATRE in Dublin and dealt with the social fabric of Irish life, as did subsequent plays including *A Leap in the Dark* (1957), *Madigan's Lock* (1958) and *The Passion of Peter Ginty* (1961), an adaptation of Henrik Ibsen's *Peer Gynt*. In 1959 Leonard began to write scripts for the BRITISH BROADCASTING CORPORATION while maintaining an active involvement in the theater. *Stephen D* (1962) is a stage adaptation of the writings of James JOYCE. Leonard focused on Anglo-Irish relations in the play *The Au Pair Man* (1968). Other plays by Leonard include *Da* (1973), *A Life* (1978), *Moving Days* (1981) and *Scorpions* (1983). *Home Before Dark* (1975) is his autobiography. Leonard published his sole novel, *Parnell and the Englishwoman*, in 1992.

Leone, Sergio (1921–1989) Italian film director. Leone was best known for his "spaghetti westerns"—violent, low-budget movies set in the American wild west but produced in Italy and Spain. His westerns helped revive a genre that, at the time, was thought to be dead. He also made an international star of actor Clint EASTWOOD by featuring him in such films as *A Fistful of Dollars* (1964), *For a Few Dollars More* (1965) and *The Good, the Bad, and the Ugly* (1966). Leone maintained that his movie violence was exaggerated because he "wanted to make a tongue-in-cheek satire of run-of-the-mill westerns." In 1984 U.S. film executives severely cut his last major project, an ambitious homage to American gangster films titled *Once Upon a Time in America*. Although the film had won awards in Europe, the truncated U.S.

version received a lukewarm critical reception and popular response.

Leoni, Raul (1905–1972) President of VENEZUELA (1964–69). Leoni spent 30 years in exile after participating in the insurrection of 1921 while a student. He was later leader of the Accion Democratica party (1958–64). As president of Venezuela, he maintained the country's rapid economic growth and fostered political stability.

Leonov, Alexei (1934–) Soviet cosmonaut; an accomplished artist, the personable Leonov has been on two historic space missions. During his Voskhod 2 mission (March 18, 1965) he became the first human to walk in space when he spent 10 minutes outside the spacecraft commanded by fellow cosmonaut Pavel BELYAYEV. The successful Voskhod mission almost ended in disaster, when the cosmonauts missed their prime recovery area and were forced to land in the Ural Mountains, spending a freezing, snowy night aboard the spacecraft before rescuers could arrive. Leonov's second mission was as commander of the SOYUZ half of the historic APOLLO-SOYUZ Test Project (July 1975), which found the American and Soviet spacecraft linking up to share friendship and scientific experimentation in space. His flight engineer on the historic mission was Valery Kubasov, and after the mission the two Soviets joined their American counterparts in a worldwide speaking tour demonstrating the possibilities of U.S./Soviet cooperation in space. It was the only time that such a joint mission was flown. Following the disintegration of the U.S. space shuttle *Columbia* in 2003, Leonov insisted that the U.S. should provide the Russian space agency with all available information regarding its design flaws.

Leonov, Leonid Maksimovich (1899–1994) Russian novelist. Having served in the Red Army, Leonov settled in Moscow and had his first work published in 1922. At the outset of his career he was a member of the Serapion Brotherhood (see SERAPION BROTHERS). At the same time, he was profoundly influenced by the writings of Dostoyevsky. Much of Leonov's work reflects his concern for universal ethical

and moral problems and the fate of Russia. His novels include *The Badgers* (1924) and *The Thief* (1927). He was later obliged to conform to the demands of SOCIALIST REALISM, demands that he found easier to fulfill in plays rather than in novels. His psychological plays include *The Invasion* (1924) and *The Golden Carriage* (1954).

Leontief, Wassily (1906–1999) Born in Russia and educated in Germany, Leontief served as an adviser to the Chinese government before immigrating to the U.S. He joined the Harvard faculty in 1931. Leontief was best known for developing the input-output method of economic analysis used for national planning. He won the NOBEL PRIZE for economics in 1973.

Leopold III (1901–1983) King of the Belgians (1934–51). When the Germans invaded BELGIUM early in WORLD WAR II (1940), Leopold surrendered to the Nazis instead of fleeing and establishing a government in exile, as his ministers had urged. Many Belgians regarded Leopold as a turncoat and collaborator for this act, and he left Belgium after the war. He returned in 1951 after a national referendum indicated that he would be accepted by his people. However, violent protests convinced him to abdicate in favor of his son Baudouin later that year.

Leopold, Aldo (1887–1948) American conservationist. Iowa-born, Leopold was a pioneering environmentalist. As an official with the U.S. Forest Service in the 1920s, he was instrumental in developing the science of wildlife management and he drafted the plan to set aside America's first wilderness area, Gila National Forest in New Mexico. He also taught at the University of Wisconsin and in 1935 was a founding member of the Wilderness Society. His credo as a naturalist is set forth in the autobiographical *A Sand County Almanac* (1949) and in the essays collected in *The River of the Mother of God* (1991).

Leopold and Loeb case One of the most sensational murder cases of the 20th century. Two wealthy Chicago teenagers, Nathan Leopold and Richard Loeb, planned what they con-

ceived of as the "perfect murder" for the sheer excitement of committing the crime and getting away with it. On May 21, 1924, the two college students abducted and bludgeoned to death Loeb's distant cousin, 14-year-old Bobby Franks, and dumped his body in a drain pipe. Inept criminals, they were soon captured. In the widely publicized trial that followed, famous trial lawyer Clarence DARROW admitted their guilt but argued against putting them to death. Darrow was successful in his defense, and they were each sentenced to life plus 99 years for kidnap and murder. Loeb was killed in a prison brawl in 1926; Leopold was released in 1958 and died in 1971.

Le Pen, Jean-Marie (1928–) French politician and founder of the National Front. Born in the small town of La-Trinité-sur-Mer in Brittany, he joined the French Foreign Legion in 1954 where he served in that military unit's struggles against rebel forces in INDOCHINA and ALGERIA. Two years later, he left the Foreign Legion and was elected to the French National Assembly as a member of Pierre Poujade's Shopkeepers' Party. In 1965 Le Pen helped organize the unsuccessful presidential campaign of far-right politician Jean-Louis Tixier-Vignancour. In 1972 Le Pen created the National Front and used the party repeatedly to stage his own runs at the French presidency. During his presidential campaigns from 1974 to 2002, Le Pen's repeated warnings of the dangers represented by continued immigration into France from North Africa increased his share of the first-round popular vote from 0.74 percent to 17 percent. Along with his continued anti-immigration stance (directed mainly at Muslims from North Africa), Le Pen also antagonized Jewish voters by dismissing the HOLOCAUST as "a detail of history" in 1987.

In 1998 Le Pen's party suffered a serious setback when its leading technocrat, Bruno Megret, attempted to unseat Le Pen as the head of the party. Although Le Pen loyalists defeated the effort, the struggle fractured the National Front and reduced its effectiveness as a national political organization. However, the infighting did not prevent Le Pen from gathering 17 percent of the popular vote in the 2002 elections, the

second highest of any candidate after the incumbent Gaullist president JACQUES CHIRAC. In the runoff election, Le Pen lost handily to the conservative Chirac who also drew votes from the left.

Lepeshinskaya, Olga Vasilyevna (1916–) Ballerina, graduated from the Bolshoi Theater School. One of the greatest Soviet dancers of her day, Lepeshinskaya's style is characterized by her virtuosity and strength. A member of the COMMUNIST PARTY since 1943, she served on numerous boards and committees.

Lerner, Alan Jay (1918–1986) U.S. lyricist and playwright. Lerner's greatest successes were the product of a longtime collaboration with composer Frederick LOEWE. Their hit Broadway musicals included *Brigadoon* (1947), *Paint Your Wagon* (1951) and *Camelot* (1960). Their most successful work of all was *My Fair Lady*, which opened on Broadway in March 1956 and ran for more than 2,700 performances. Another collaboration, *Gigi* (1958), is regarded as one of the most fully realized of all film musicals.

Lescaze, William (1896–1969) American architect born in Switzerland, who is credited with introducing the INTERNATIONAL STYLE in America. Lescaze had studied with Karl Moser before coming to the U.S. in 1920. His best known work (in partnership with George HOWE) is the 1932 Philadelphia Savings Fund Society (PSFS) building, the first fully modern skyscraper anywhere, and one of the first examples of MODERNISM in American architecture. Lescaze seems to have been the leader in the design of the building (Howe's earlier work had been quite traditional), so a major share of the credit for its success is his. After the partnership with Howe ended in 1934, Lescaze continued to practice architecture in New York, designing a number of modern townhouses (including his own on 48th Street), the Williamsbridge housing project in New York, and various other works including radio stations, office buildings and a pavilion for the 1939 NEW YORK WORLD'S FAIR. Lescaze also designed furniture, lighting and many small accessory products—all by-products of his architectural work.

Les Misérables (musical) Stage musical adaptation of the 1862 French novel by Victor Hugo. Inspired by the commercial success of a French musical adaptation of the book that premiered in September 1980, Cameron Mackintosh and Herbert Kretzmer began production of an English-language version of the musical. Their interpretation of *Les Misérables* premiered in 1985 in London and in 1987 on Broadway. It won eight Tony Awards its opening year in the U.S., including Best Musical, Best Score, and Best Director. On March 18, 2003, after 6,680 shows, *Les Misérables* ended its run on Broadway and became the second-longest running show in Broadway history after Andrew Lloyd Webber's musical, *CATS*; its performances in London continued through 2003.

Lesotho (Kingdom of Lesotho) A landlocked country within the Republic of SOUTH AFRICA, Lesotho covers an area of 11,715 square miles. Originally known as Basutoland, the country became a British Crown colony in 1884. Resisting incorporation into South Africa when that country was formed in 1910, Basutoland was granted a new

LESOTHO

1966	Lesotho is granted independence under the Independence Constitution. Moshoeshe II is proclaimed king. In a trial of strength between the king and Prime Minister Leabua Jonathan, the king is forced to yield.
1970	Lesotho holds first national elections. When the electoral defeat of his Basotho National Party appears imminent, Prime Minister Jonathan proclaims an emergency and suspends the constitution. Opposition leaders are arrested. The king is placed under house arrest and is later exiled for nine months.
1971	All political prisoners are released under a general amnesty.
1986	Jonathan is ousted in a pro-South African coup led by General Justin Lekhanya, who is sworn in as head of government.
1990	Lekhanya strips King Moshoeshe II of his power and sends him into exile. Moshoeshe's son Prince Mohato is sworn in as King Letsie III.
1995	King Moshoeshe II is restored to the throne but dies in a car accident and is again replaced by his son Letsie III.
2004	After a three-year drought the government declares a state of emergency and appeals for food aid.
2005	Lesotho starts a program that will test all its citizens for AIDS.

constitution in 1960 and achieved independence as the Kingdom of Lesotho in 1966. Political tensions between King Moshoeshoe II and Prime Minister Chief Leboa Jonathan led to the declaration of a state of emergency in 1970 and the eventual overthrow of Chief Jonathan in 1986 in a military coup led by Major General Justin Lekhanya. In 1990 the king's powers were reduced, consolidating power in the hands of a military council headed by Lekhanya. In 1995 Moshoeshoe II was restored as king, but he died later that year in a car crash and was succeeded by Letsie III. At the beginning of the 21st century, Lesotho finds itself plagued by severe drought and AIDS.

Lesser, Sol (1890–1980) Pioneer HOLLYWOOD film producer. Lesser started in the movie industry in 1907 as a producer of two-reel films. He went on to produce some 117 motion pictures, including a series of TARZAN films starring Johnny WEISSMULLER. Among his other credits were the ACADEMY AWARD-winning 1951 documen-

tary *Kon Tiki*, *Our Town*, *The Red House* and *Stage Door Canteen*. Lesser was also credited with introducing new ideas in film merchandising that became standard practice, including previews and personal appearances by the stars.

Lessing, Doris (Doris May Tayler) (1919–) British author. Lessing emerged as one of the most important fiction writers since World War II. Her first novel, *The Grass Is Singing* (1950), achieved immediate critical and popular acclaim, and contains one of her recurring themes: the experience of living in Africa (she was raised in Southern Rhodesia, now ZIMBABWE). Other prominent themes include the individual's search for wholeness, FEMINISM, the battle of the sexes and, later, mental collapse and extrasensory perception. She most often uses a solitary, strong woman pushed to the breaking point as her protagonist. Among her many novels are *The Golden Notebook* (1962), considered one of her best, the five-volume series *Children of Violence* (1952–69) and *Memoirs of a Survivor*

(1974). She later embarked on a series of space-age fantasy books, such as *The Sirian Experiments* (1981), and was a guest of honor at the 1987 World Science Fiction Convention.

In 1995 Lessing published the first volume of her autobiography, *Under My Skin*, which narrated her life from childhood until 1949; the second volume, *Walking in the Shade*, was released in 1997. The book subsequently received the James Tait Black Prize for best biography. In 1996 Lessing published her first new novel in seven years, *Love Again*, which was followed by *Mara and Dann* (1999), *Ben, in the World* (2000), and *The Sweetest Dream* (2002). In 2001 she received Spain's Prince of Asturias Prize in Literature (2001).

Lester, Richard (1932–) A controversial film director in the 1960s and '70s, Lester was born in Philadelphia, where he quickly advanced to director of a local television station. In the early 1950s he traveled throughout Europe and struggled to earn a living through writing and tuning pianos. Near starvation in 1955, Lester moved to England, where he met comedians Peter SELLERS and Spike MILLIGAN. Lester directed these two "Goon" in various shorts for British television, where he developed a reputation for broad comedy and satire. In 1964 and 1965 Lester's brand of humor clicked in two hilarious, off-the-cuff films featuring the BEATLES: *A Hard Day's Night* and *Help!* For the remainder of the decade Lester focused his creative energy on films with biting social satire, political commentary and black humor, such as *How I Won the War* (1967), *Petulia* (1968) and *The Bed-Sitting Room* (1969). Refusing to cater to studio demands, Lester struggled to find success in the early 1970s. But from the mid-1970s onward he returned to prominence with a series of entertaining adventure films, including *The Three Musketeers* (1974), *The Four Musketeers* (1975), *Robin and Marian* (1976), *Cuba* (1979) and *Superman II* (1980).

Letelier, Orlando (1932–1976) Chilean official. Letelier had been CHILE's ambassador to the U.S. and was serving as President Salvador ALLENDE's defense minister when Allende was

overthrown in a military coup in September 1973. Letelier was arrested at the time and, after his release in 1974, was exiled. He moved to the U.S., where he was employed by the Institute for Policy Studies, a Washington, D.C., research group. Letelier had become outspoken in his criticism of the Chilean junta's civil rights violations under General Augusto PINOCHET. On September 10 Letelier's Chilean citizenship was revoked. On September 21 Letelier was killed when a bomb exploded under his car in Washington. In 1980 the Federal District Court in Washington concluded that members of DINA, the Chilean national intelligence agency, had assassinated Letelier; in 1978 former DINA agent Michael Towley had confessed to planting the bomb, and, in 1987, another former DINA agent, Armando Fernández, also admitted involvement in the crime.

Letterman, David (1947–) American comedian and television talk-show host. Born in Indianapolis, Indiana, Letterman graduated from Ball State University in 1978 and worked as a weatherman for a local television station (1970–74). In 1975 Letterman moved to Los Angeles with the ambition of becoming the next Johnny Carson, then the king of late-night television.

In 1982 NBC tapped him to headline *Late Night with David Letterman*. *Late Night* found a loyal audience

among young professionals and college students, who appreciated Letterman's off-beat sense of humor and his aggressive interview technique with media figures.

In May of 1993 Letterman ended his stay with NBC and *Late Night* and moved to CBS to start production in September. After its opening night Letterman's show, *The Late Show with David Letterman*, beat Jay LENO both in the ratings and in critics' reviews of both programs. It was not until late 1995 that Leno caught up with Letterman and began several consecutive years of higher ratings for the *Tonight Show*.

Lévesque, René (1922–1987) Canadian politician. Lévesque entered politics as a Liberal with his 1960 election to the Quebec Legislative Assembly. He held a number of ministerial posts before being expelled from the LIBERAL PARTY in 1967 over the issue of Quebec sovereignty, which he had come to champion. He then formed the PARTI QUÉBÉCOIS. He led the party to power in the 1976 election when he was elected prime minister of the province. In 1979 he pushed through a law, fiercely opposed by Prime Minister Pierre TRUDEAU, that formalized the status of French as Quebec's only official language and made English-language commercial signs illegal. Lévesque resigned from the Parti Québécois in 1985, ending his political career.

Levi, Carlo (1902–1975) Italian novelist, essayist and painter. Levi earned a medical degree before turning to writing as a career. In the 1930s, he was exiled by the fascist regime of MUSSOLINI—which was displeased at his outspoken left-wing politics—to an isolated Italian village. This experience inspired Levi to write the novel *Christ Stopped At Eboli* (1945), a sensitive portrayal of life in an impoverished Italian village, which became an international best seller. As a result, Levi became a major figure in the neorealism movement in postwar Italian literature. His subsequent novels included *The Watch* (1950) and *The Linden Trees* (1959). From 1963 to 1972 Levi served in the Italian Senate.

Levi, Primo (1919–1987) Italian Jewish author. Levi's autobiographical writings reflected his experiences as a survivor of the HOLOCAUST. During

WORLD WAR II he served in the Italian RESISTANCE but was arrested and deported to AUSCHWITZ in 1943. His experiences there gave rise to his 1947 memoir, *If This Is a Man*, which became an international best seller. Levi pursued his literary vocation while working as a chemist at a paint factory in Turin for 30 years. *The Periodic Table* (1975), one of his most highly regarded works, fused his two callings, using the analogy of the chemical elements to analyze people and events. Levi committed suicide.

Levine, James (1943–) American conductor. Levine is best known as the principal conductor (since 1972) and musical director (since 1976) of the New York Metropolitan Opera. With George SZELL as his mentor, he became an apprentice conductor, then assistant conductor (1964–70) of the Cleveland Orchestra. In 1971 he made his Met debut conducting *Tosca*. He has appeared regularly at the SALZBURG FESTIVAL (since 1975) and has been a guest conductor with orchestras worldwide. Specializing in the Italian opera repertory, Levine has made many records of operas and symphonies. Throughout the 1990s Levine conducted the Metropolitan Opera on its international tours through Spain, Japan and Germany, such as the 1994 tour commemorating the opera's 120th anniversary. He received numerous awards in the U.S. and Europe for his musical contributions. In 1999 he became chief conductor of the Munich Philharmonic Orchestra, and in 2001 was chosen to succeed Seiji OZAWA as music director of the Boston Symphony Orchestra. He took up his new post in Boston in 2004.

Levison, Stanley (1912–1979) American lawyer, businessman and Jewish civic leader who played a prominent role behind the scenes in the CIVIL RIGHTS MOVEMENT of the 1960s. Levison was a key adviser to the Rev. Dr. Martin Luther KING Jr. and influenced the financial policies, strategy and tactics used by King and the SOUTHERN CHRISTIAN LEADERSHIP CONFERENCE.

Levi Strauss American firm specializing in the production of utilitarian work pants, the famous "Levi's" that

Comedian and talk-show host David Letterman
(PHOTOFEST)

have become accepted as fashion items in modern times. The original Levi Strauss began his business in San Francisco during the 1850s' gold rush making tents for prospectors. In the 1960s Levi's became a popular form of informal dress and acquired a status that made the brand name important in the world of fashionable apparel.

Lévi-Strauss, Claude (1908–) French anthropologist, the founder of STRUCTURALISM. Born in Brussels, Belgium, Lévi-Strauss studied law and philosophy at the University of Paris (1927–32). He taught sociology at the University of São Paulo from 1935 to 1937, at which time he began anthropological field work in Brazil, researches which continued in 1938–39. He taught at the New School for Social Research, New York, from 1941 to 1945 and was France's cultural attaché to the U.S. from 1946 to 1947. Director of the Ecole Pratique des Hautes Etudes, Paris, from 1950, he was elected to the chair of anthropology at the Collège de France in 1959. He was honored with election to the Académie Française in 1973. In formulating structuralism, he sought to analyze myths and kinship systems through a system of complicated mathematical and linguistic-based methods. The underlying structures thus discovered suggest, he posits, universal patterns of cultural behavior and uniform attributes of human logic. His methods and conclusions have been extremely influential, not only in anthropology, but in sociology, linguistics and literary criticism as well. Among his many works are *Elementary Structures of Kinship* (1949, tr. 1969), *Structural Anthropology* (1958, tr. 1963 and 1976), *Totemism* (1962, tr. 1963) and *Mythologies* (1964–71, tr. 1970–79).

Levy, Marv (1928–) National Football League (NFL) head coach. After serving as assistant coach at Coe College and the University of New Mexico, he became the head coach at New Mexico in 1958. He later served as head coach by the University of California (1960–64) and the College of William and Mary (1964–68).

In 1969 Levy entered the National Football League (NFL) as the special teams' coach for the Philadelphia Eagles, a position he later held with the Los Angeles Rams and the Washing-

ton Redskins. In 1973 he left the NFL for the Canadian Football League (CFL), where in five seasons he guided the Montreal Alouettes to two league championships (1974 and 1977). After four seasons as head coach of the NFL Kansas City Chiefs, Levy worked as a color commentator for telecasts of college and NFL football games. In 1986 he was hired as the head coach of the Buffalo Bills, an NFL team. In 12 seasons with the Bills, Levy compiled a 112-70 regular season record, and an 11-8 postseason record. He helped lead the Bills to four straight appearances in the NFL championship game, the Super Bowl (1990–93), but never won the championship game before his retirement in 1997. Levy was inducted in 2001 into the Pro Football Hall of Fame in Canton, Ohio.

Lewin, Ronald (1914–1984) British military historian. Critically acclaimed, Lewin was known for his books analyzing the leadership of Winston CHURCHILL and the strategies of field marshals Erwin ROMMEL of Germany and Bernard MONTGOMERY of Britain. Lewin served as chief of the BRITISH BROADCASTING CORPORATION's domestic radio service from 1957 to 1965. His most popular book was *Ultra Goes to War*, an account of Allied efforts to decode German secret messages during WORLD WAR II. (See also ENIGMA.)

Lewis, Alun (1915–1944) British poet. Lewis was born in Alberdare, a Welsh mining village, and educated at Aberystwyth University College and Manchester University. Lewis returned to Wales and taught for two years before deciding to enlist in 1940. His first volume of poetry, *Raider's Dawn*, was published in 1942. His first book of short stories, *The Last Inspection*, (1943), dealt with the tedium and drabness in the lives of soldiers in England waiting for assignment, themes which resurfaced in his most famous poem, "All Day It Has Rained." Lewis was posted to Burma in 1942, where he was killed in 1944. His lyrical poetry explores the themes of death and the fundamental isolation of the soldier and his resulting feelings of futility. Lewis's poetry shows the influence of Edward THOMAS. Other works in-

clude *Ha! Ha! Among the Trumpets* (1945), poetry; *In the Green Tree* (1948), a collection of letters and poetry; and *Selected Poetry and Prose* (1966), with an introduction by Ian Hamilton.

Lewis, Carl (Frederick Carlton) (1961–) American track and field star. Both of Lewis's parents were track stars, and he was already a standout by high school. Like so many American athletes, politics forced him onto the sidelines for the 1980 OLYMPIC GAMES. A winner of innumerable NCAA titles, he reached the world stage in 1983 in Helsinki, winning World Championship gold medals in the 100-meter dash, long jump and as part of a 400-meter relay team. The 1984 Olympics saw him win four gold medals in the 100-meter dash, 200-meter dash, 400-meter relay and the long jump. Lewis won another gold medal for the 100-meter dash in 1988, two gold medals at the 1992 Olympics for the 4-x-100-meter relay and the long jump, and a gold medal for the long jump in 1996.

Lewis, C(ive) S(taples) (1898–1963) British literary critic, scholar and author. Lewis was a fellow of Magdalene College, Oxford, and later a professor of medieval and Renaissance English at Cambridge. An eminent scholar, Lewis has written distinguished works of criticism including *The Allegory of Love* (1936), *English Literature in the Sixteenth Century* (1954) and *An Experiment in Criticism* (1961). Outside of literary circles, he is best known for his popular fiction, fantasy and science fiction novels, such as *Out of the Silent Planet* (1938), which shows the influence of J. R. R. TOLKIEN; *The Screwtape Letters* (1940) and *The Lion, The Witch and the Wardrobe* (1950), which is the first of a series of children's books known as the *Chronicles of Narnia*. Lewis's writing reflects his abiding Christianity and explores moral dilemma in that context. He has also written *Surprised by Joy* (1955), an autobiography emphasizing his religious life.

Lewis, Jerry (Joseph Levitch) (1926–) American comedic actor and film director. Lewis, who was a leading HOLLYWOOD box office draw in

the 1950s and 1960s, is best known for his cinematic slapstick style that combines physically distorted movements with psychological naivete verging on idiocy. To certain European film critics—most notably in France—he is one of the great clowns of the cinema. To most American critics, Lewis seems unduly obvious and obnoxious. Lewis first achieved film stardom in 1949 after forming a comedy team with straight man/crooner Dean Martin. Their first film, *My Friend Irma* (1949), was followed by 15 more until Martin left in a highly publicized breakup in 1956. Lewis has since pursued a solo career in films, television and nightclubs. His most highly regarded films, which he wrote and directed, are *The Ladies' Man* (1961), *The Nutty Professor* (1963) and *The Patsy* (1964). In recent decades, Lewis has become best known for his Labor Day telethons raising money for muscular dystrophy research.

Lewis, Jerry Lee (1935–) American rock-and-roll vocalist, pianist and composer. Lewis is one of the founding fathers of the ROCK AND ROLL sound that burst into prominence in the U.S. in the mid-1950s. Lewis is especially well known for a flamboyant performing style that features his trademark pumping barrelhouse piano. Born in Louisiana, Lewis was exposed to both black blues and gospel and white country music as a youth. In 1956 he was signed to a contract by Sam Phillips of Sun Records in Memphis, Tennessee. Lewis enjoyed two massive hits in 1957—*Great Balls of Fire* and *Whole Lotta Shakin' Goin' On*. Lewis followed these up with *Breathless* (1958) and *High School Confidential* (1959), but the adverse publicity that stemmed from his marriage to a 13-year-old cousin seriously hampered his climb to stardom. In the 1960s and after, recording for several record labels, Lewis made a comeback as a country and western performer. He remained a favorite among both rock and country audiences. The film *Great Balls of Fire* (1989)—made with Lewis's cooperation—portrays his early success and subsequent downfall in the 1950s. In 1995 Lewis and Bruce Springsteen both performed in a concert opening the Rock and Roll Hall of Fame in Cleveland, Ohio.

Lewis, John L(llewellyn) (1880–1969) American labor leader, president of the United Mine Workers of America (1920–60). Although highly controversial, Lewis was perhaps the single most important figure in the American labor movement in the 20th century. Born to Welsh immigrant parents in a coal-mining community in Iowa, he quit school after the seventh grade and entered the mines at age 15. A man of commanding presence with a talent for oratory and a fondness for Shakespeare, Lewis considered going on the stage before deciding to pursue a career in the labor movement. In 1909 he moved to the coal fields of central Illinois, where he began to rise rapidly in the local hierarchy of the United Mine Workers of America (UMW). In 1911 he became a field representative of the American Federation of Labor (AFL), a job that enabled him to travel widely through the minefields and to build strong personal support within the UMW. As a result, he became UMW vice president in 1917, acting president in 1919 and president of the UMW—the largest union in the AFL—the next year.

In the years following WORLD WAR I, Lewis emerged as a dynamic but ambiguous figure on the national labor scene. A champion of industrial unionism, he headed an unsuccessful challenge to the conservative leadership of AFL president Samuel GOMPERS in 1921. At the same time, Lewis exemplified a tough, pragmatic business unionism. A Republican and a strong believer in free enterprise capitalism, he crushed the strong radical faction opposed to his leadership. With the advent of the NEW DEAL, Lewis took advantage of the NATIONAL INDUSTRIAL RECOVERY ACT (1933) to launch a massive organizing drive in the coalfields, recruiting 300,000 miners to the UMW in two months. Unsuccessful in persuading the AFL to open its membership to unskilled and semi-skilled workers, Lewis brought together the leaders of 10 other unions under the Committee for Industrial Organization (CIO) in 1935. The CIO began a sweeping organizing campaign in basic industries. After conflicts with AFL craft unions, it became the independent Congress of Industrial Organizations in 1936.

As head of both the UMW and the CIO, Lewis lent vital support to President Franklin D. ROOSEVELT's 1936 re-election campaign. When WORLD WAR II began in Europe, Lewis opposed U.S. intervention and endorsed Wendell WILLKIE for president in 1940. Lewis resigned from the CIO presidency when Roosevelt won a third term. Following the Japanese attack on PEARL HARBOR, Lewis announced his support for the American war effort and joined other leaders in a no-strike pledge for the duration of the conflict. However, in 1943 he concluded that the government had taken advantage of the no-strike agreement to impose an unfair wage formula on workers, and he led a series of epic strikes in defiance of Roosevelt's threat to use federal troops to keep the mines in operation. Vilified by the press, Lewis nonetheless won a 35-hour work week and other benefits for UMW members.

After the war, Lewis was at odds with President TRUMAN's labor policies. Beginning in April 1946, after talks between the UMW and mineowners broke down, Lewis led a national strike. Within a month coal shortages forced a national brownout, to save fuel, and cutbacks in auto and steel production; the government seized control of the mines. After a series of proposals and countermoves, the government found Lewis and the union guilty of civil and criminal contempt and imposed the heaviest fine in American history up to that time. Lewis's bitter feud with Truman continued. During the EISENHOWER administration (1953–61) Lewis pursued cooperation rather than conflict with the coal industry. He never again seriously used the threat of a strike. Rather, he encouraged the largest mineowners to introduce mechanization and close inefficient mines, even at the expense of massive miner unemployment. Lewis resigned the leadership of the UMW in 1960 and became president emeritus.

Lewis, Richard (1914–1990) British tenor. He was one of the first British singers to achieve worldwide fame in opera and concert performances. He appeared as Troilus in the world premier of William WALTON's *Troilus and Cressida* (1955) and also sang leading roles in

the first performances of *Midsummer Marriage* and *King Priam* by Michael TIPPETT.

Lewis, Sinclair (1884–1951) American author. He began his career as a newspaper reporter and later worked for the Associated Press. His first major work, *Main Street*, was published in 1920, and *Babbitt* appeared two years later. In 1926 he refused to accept the PULITZER PRIZE for his *Arrowsmith*. Residents of his hometown resented his depiction of small-town life, but accepted him after he won the NOBEL PRIZE for literature in 1930. His most notable later work was *It Can't Happen Here* (1935). His total output includes 22 novels and three plays.

Lewis, Wyndham (1884–1957) British writer and painter. Lewis, as both novelist and critic, was one of the key figures in the emergence of the modernist school of literature, which also included Lewis's friends T. S. ELIOT, James JOYCE and Ezra POUND. Lewis was also an important painter and the central theorist behind Vorticism, a school of British painting that flourished around the time of World War I. Lewis first gained attention as a writer in 1909 when his short stories were published in *The English Review*, an influential quarterly edited by Ford Maddox FORD. In the 1910s, Lewis edited *Blast*, which became the leading avant-garde journal of its time in Britain. His novels include *Tarr* (1918), *The Childermass* (1928), *The Apes of God* (1930), *The Vulgar Streak* (1941) and *Self-Condemed* (1954). As a critic, his most important works are *Time and Western Man* (1927), *Filibusters in Barbary* (1932) and *Men without Art* (1914). Lewis authored several autobiographical volumes including *Blasting and Bombardiering* (1937).

Ley, Willy (1906–1969) German-American engineer and rocket pioneer. Born in Berlin, Ley studied at the University of Berlin and was on his way to becoming a zoologist when he chanced upon an early book on rocketry. From that moment the direction of his life was decided. One of the founders of the German Rocket Society he was also a writer whose popular books on rocketry captured the public's imagination. Although it was

Ley who introduced Werner von BRAUN into the German Rocket Society, his conscience would not permit him to follow von Braun and others in their collaboration with the Nazis after Adolf HITLER came to power. After coming to the United States in 1935, he became a naturalized citizen in 1944. Although Ley had tremendous influence among science fiction writers and space buffs in the U.S., it was von Braun, bringing to the United States his experience with the V-2 rocket used by the Nazis, who became America's hope for a space future. Although he had fought for it and dreamed about it all of his life, Ley died three weeks before Neil ARMSTRONG and Edwin "Buzz" ALDRIN made their historic touchdown on the moon.

Leyte Gulf, Battle of the (October 23–26, 1944) The decisive naval battle of WORLD WAR II IN THE PACIFIC. In a series of engagements U.S. naval forces, with air support, destroyed the Japanese fleet that had attempted to prevent the Allied landings on Leyte in the PHILIPPINES. The Japanese lost three battleships, four aircraft carriers, 10 cruisers, nine destroyers and one submarine; the American naval losses were much lighter. Although fighting continued in the Pacific for another nine months, the U.S. victory at the Leyte Gulf gave the U.S. complete sea supremacy in the Pacific.

Douglas MacArthur in the Philippines, 1944 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Lhevinne, Josef and Rosina Josef (1874–1944) and Rosina (1880–1976) Lhevinne were Russian-born pianists and music teachers. Both trained in piano in their native Russia—Josef earning a gold medal from the Moscow Conservatory in 1892 and Rosina winning a gold medal at the Kiev Conservatory in 1898. Josef also won the prestigious Anton Rubinstein piano competition in 1895. The two met when Josef was hired to give piano lessons to the young Rosina. They married in 1898. In subsequent decades, Josef became an internationally acclaimed piano soloist, while Josef and Rosina performed piano duets that established them as uniquely accomplished musical collaborators. In the 1910s the couple lived in Berlin, but in 1919 they moved to the U.S. and became founding members of the faculty of the Juilliard School of Music in New York City. After Josef's death, Rosina continued to teach at Juilliard to the end of her life. Among her most famous pupils was pianist Van CLIBURN.

Li, Choh Hao (1913–1987) Chinese-born biochemist. Li spent more than 50 years in the University of California system. In 1971 while at the University of California at San Francisco, he synthesized the human pituitary growth hormone, which he had discovered in the 1950s. In 1978 he discovered beta-endorphin, a powerful pain-killing substance produced in the brain. He was director of the laboratory of endocrinology at UCSF from 1983 until his death.

Liaquat, Ali Khan (1896–1951) First prime minister of PAKISTAN (1947–51). Liaquat was a leading member of the Muslim League in the 1920s and 1930s, working closely with Mohammad Ali JINNAH. After the partition of India and the creation of Pakistan in 1947, he became prime minister. Following Jinnah's death, he was the most powerful man in the new state. Criticized over his attempts to reduce tension with India and his refusal to declare Pakistan an Islamic state, he was assassinated by a fanatic in 1951.

Libby, Willard F(rank) (1908–1980) American chemist. Libby obtained his Ph.D. in chemistry from the

University of California at Berkeley (1933). During World War II he participated in the MANHATTAN PROJECT that developed the ATOMIC BOMB. He worked at Columbia University under Harold UREY on the gaseous-diffusion method of separating uranium isotopes. Shortly after the war, at the University of Chicago, Libby discovered that radioactive carbon decayed at a predictable rate. Since all living organisms naturally absorb minute traces of this carbon (carbon-14), this meant that by measuring this carbon in dead organic archaeological and geological remains, the age of these remains could be determined. This technique, known as radiocarbon dating or **carbon-14 dating**, had immense implications for extending knowledge about the past and helped revolutionize archaeology, anthropology, and geology. For his role in developing radiocarbon dating, Libby was awarded the 1960 NOBEL PRIZE for chemistry. In addition to his other work, Libby also served on the Atomic Energy Commission (AEC) (1954–59).

Libedinsky, Yuri Nikolayevich (1898–1959) Soviet author, one of the founders of the proletarian “October Group” in 1922. His short novel *A Week* (1922) won Libedinsky the party's favor, in spite of his nonproletarian origins. His next novel, *Tomorrow* (1923), implied that the Soviet Union should be rescued from the NEW ECONOMIC POLICY and was thus obviously less successful. Something of a political speculator, in his play *Heights* Libedinsky emphasized LENIN's warning that the party should not depend on officials trained by the czarist regime. He was expelled from the party in 1933 as a result of his novel *Birth of a Hero* (1930) but was later reinstated.

Liberace (Wladziu Valentino Liberace) (1919–1987) American pianist and entertainer. Liberace was known for his flamboyant showmanship and lavish costumes. Performing show tunes and popular arrangements of classical pieces, he became U.S. television's first matinee idol. In the 1950s his syndicated show was carried by a record number of stations. During this period he was said to have been the world's highest-paid entertainer, earning up to \$400,000 a week in Las

Vegas night clubs. He continued performing in Las Vegas after his show went off the air; he also toured and made occasional TV appearances. His death was believed to have been from complications resulting from AIDS.

liberalism Philosophical and political doctrine that emphasizes individual freedom and stresses the goodness and rationality of human beings. In broad terms, liberalism is contrasted to CONSERVATISM. Supporting change in the status quo, liberalism traditionally upholds the idea of progress. In the U.S., political liberalism is generally associated with the DEMOCRATIC PARTY, although many Republicans have embraced the main tenets of liberalism, while there have also been conservative Democrats. Liberalism in the modern era has largely centered on government as provider of individual freedom, and has asked the state to prevent the oppression of the individual and to provide decent conditions for all members of society. By supporting a government that intervenes in the national economy, liberals seek to provide for the economic and social welfare of the populace. This doctrine was instrumental in the creation of the WELFARE STATE in early 20th-century Europe and in providing an impetus for welfare state reforms in the U.S. The central figure in 20th-century American liberalism was undoubtedly President Franklin D. ROOSEVELT. His NEW DEAL programs, which encompassed the minimum wage, social security, welfare programs and progressive taxation, are all reflective of liberal thinking and have all become staples of the American social system. The liberal agenda in the last quarter of the 20th century included racial and sexual equality, public education and equitable health care. While some liberals have embraced the principles of socialism, the degradation of individual rights that has been a feature of COMMUNISM in the 20th century makes many liberals extremely antagonistic to the principles and practice of Marxism.

Liberal Party (Australia) Australian political party established in 1945. The Liberal Party was formed primarily by Sir Robert MENZIES, who became its first leader. He brought the non-Labour members of Parliament to-

gether and formed a mass organization to sustain them. The Liberal Party joined the coalition government formed by the Nationalist and Country parties, and Menzies was prime minister from 1949 until 1966. The coalition remained in power until 1972. It was returned under Prime Minister Malcolm FRASER in 1975 following the controversial administration of Gough WHITLAM but was defeated in 1983.

Liberal Party (Canada) One of CANADA's two major political parties. The Liberal Party was formed when Canada gained dominion status in 1867. The party adopted free trade and anticolonial policies. In English-speaking Canada the party's supporters included anticonservative, free-trade Ontario English (Clear Grits) and anglophone farmers. In French Quebec the party was largely based on anticlericalism. The party has a tradition of alternating Anglophone and Francophone leaders, many of whom became prime ministers. Twentieth-century Liberal prime ministers include Sir Wilfred LAURIER (1896–1911), William Lyon Mackenzie KING (1921–30, 1935–48), Louis ST. LAURENT (1948–57), Lester PEARSON (1963–68) and Pierre Elliot TRUDEAU (1968–79, 1980–84). Although Laurier and King actively encouraged American investment, Trudeau sought a more independent Canada both economically and politically. In the second half of the century the party's power base was in central Canada, primarily Ontario. Led by Prime Ministers JEAN CHRÉTIEN (1993–2003) and Paul Martin (2003–), the Liberal Party returned to power in the 1990s.

Liberal Party (New Zealand) Former New Zealand political party. The New Zealand Liberal Party was dominant at the beginning of the 20th century under the leadership of Prime Minister Richard Seddon. He left office in 1906, but the Liberals retained power until 1911. The Liberal Party took part in the wartime coalition government between 1915 and 1919 but went into decline after the war. Its leader, Sir Joseph Ward, restyled the party as the United Party in an effort to broaden its support. He was prime minister between 1928 and 1930. In 1935 the United Party joined with the

Reform and Democratic Parties to form the NATIONAL PARTY.

Liberal Party (United Kingdom) (Liberal Democratic Party from 1988) British political party established in 1877, known as the **Liberal Democratic Party** after 1988. Liberal policies occupy the moderate ground between the LABOUR and CONSERVATIVE parties. The Liberal Democratic Party advocates governmental decentralization, proportional representation in the House of Commons, reform of the House of Lords, and a mixed economy of nationalized industries and private enterprise. It also supports British membership in the EU and NATO. The Liberal Party entered the 20th century as one of the two major British political parties, but began to decline early in the century due to its division on the question of Irish HOME RULE and to the advent of the Labour Party. Liberals came to power in 1906 under the leadership of Sir Henry CAMPBELL-BANNERMAN, whose government included David LLOYD GEORGE and Herbert ASQUITH, who succeeded him in 1908. The party was split by disputes between Lloyd George and Asquith during World War I, and its radical elements were absorbed by the Labour Party. The Liberal Party continued to dwindle between the wars, and has not held office since the National Coalition of World War II. Although it supported the minority Labour government in 1977 and 1978 (the so-called Lib-Lab Pact), Liberals held no cabinet seats in that government. In 1981 the Liberals formed an alliance with the new SOCIAL DEMOCRATIC PARTY, and they ran joint candidates in the 1983 general elections. Despite substantial support in the opinion polls, the Liberals failed to make significant inroads in the general elections. In 1988 the two parties merged to form the Liberal Democratic Party, with Paddy Ashdown as its leader. The Liberal Democrats improved their political position throughout the 1990s, obtaining 46 seats in Parliament in 1997 and increasing their presence in local governments throughout Great Britain.

Liberation Theology The radical position initiated by many Catholic priests against oppressive regimes, es-

pecially in Latin American. It evolved in the 1960s and was expounded during the 1970s and 1980s despite the disapproval of the Vatican.

Liberia (Republic of Liberia) Liberia is located on the west coast of Africa and covers an area of 42,988 square miles. The Republic of Liberia was established

LIBERIA	
1926	Firestone Rubber Company begins operations in Liberia under the terms of a loan it made to the country; Liberian finances are brought under U.S. supervision.
1944	William Tubman inaugurated president; promotes foreign investment and local participation in government.
1947	Universal suffrage enacted.
1952	Firestone loan paid off 15 years before maturity.
1971	Tubman dies; William Tolbert ascends to the presidency.
1980	(April 12) Tolbert assassinated during coup led by Master Sergeant Samuel K. Doe; Doe suspends constitution and parliament and executes 13 leading officials of the former regime.
1985	(Oct. 15) Under allegations of election fraud Doe is elected president as head of the National Democratic Party of Liberia.
1988	(Oct. 10) William Kpolleh, leader of the Liberian Action Party, is imprisoned for plotting to overthrow the government.
1990	(July 30) Government troops massacre 300 to 600 men, women and children who have taken refuge in a Lutheran church in Monrovia; (Sept. 10) Doe is killed after being captured by rebel forces.
1991	A cease-fire is signed.
1993	A peace agreement is signed in Geneva, Switzerland.
1994	Groups excluded from transitional government reject peace agreement and resume violence.
1997	Charles Taylor is elected president.
2001	UN Security Council accuses Taylor of trading weapons for diamonds from rebels in Sierra Leone and imposes embargo on weapons.
2003	Rebels battle for control of Monrovia; Nigerian peacekeepers arrive. Charles Taylor goes into exile and U.S. troops arrive (August) and depart (September–October). Interim government and rebels sign peace agreement.
2004	Riots in Monrovia blamed on former combatants.
2005	First elections held since end of civil war. Ellen Johnson-Sirleaf is elected president.

in 1847 by freed American slaves who had returned to Africa. Under President William Tubman (1944–71) foreign investment and citizen involvement in government were encouraged. His successor William R. Tolbert continued these policies but encountered protests when he instituted economic changes, resulting in riots that were violently suppressed (1979). In 1980 Tolbert was assassinated and army sergeant Samuel K. Doe assumed power, gaining recognition and support from the U.S. A new constitution providing for universal adult suffrage without the qualification of property ownership was approved in 1984. Doe, who was elected president in 1985, survived several coup attempts before he was confronted with a bloody armed rebellion in northern Liberia (1990). The rebellion resulted in the deaths of partisans on both sides of the confrontation, and of many civilian deaths at the hands of both government and rebel forces. The situation degenerated into anarchy despite the attempts of neighboring African nations to intervene

in the dispute. Doe himself was killed as the rebels moved into the capital. Afterward, tensions continued between two rival rebel factions. There was a mass migration of Liberians into GUINEA and CÔTE D'IVOIRE. Although CHARLES TAYLOR emerged as the strongest force in Liberia, winning the 1997 presidential election, a popular uprising by his opponents led to his resignation in 2003. In 2005 Ellen Johnson-Sirleaf was elected president of Liberia, making her the first elected female president of an African country.

Libya (Socialist People's Libyan Arab Jamahiriya) Libya, located on the Mediterranean coast of north Africa, covers an area of 679,182 square miles. Part of the OTTOMAN EMPIRE since the 17th century, Libya was invaded by ITALY in 1911. The Turkish sultan relinquished all rights to the country in the 1912 peace settlement, and Italy secured its position through the strong-arm tactics of Governor Giuseppe Volpi (1921–32) and colonization (1938–39). The British cap-

tured the capital of Tripoli during WORLD WAR II (1945). The victorious Allies permitted the Libyans to form an independent country, the United Kingdom of Libya, under King Idris in 1951. In 1969 a military coup led by Colonel Muammer el-QADDAFI deposed the king and set up a military regime with Qaddafi as head. He closed Western military bases (allowed by Idris since 1952) and espoused Arab nationalism. The new constitution of 1977 established the Socialist People's Libyan Arab Jamahiriya. During the 1980s Qaddafi was condemned for his assassination campaign against Libyan exiles and his promotion of worldwide terrorism. Tensions between Libya and the U.S. over Libyan support of terrorism culminated in the U.S. bombing of Tripoli and Benghazi in 1986. Despite continued hostility to U.S. foreign policy throughout the 1990s, such as protesting the Oslo Accords and the WYE RIVER MEMORANDUM, Libya and the U.S. improved their relationship in 2003 when Libya obtained an end to UN sanctions after pledging to abandon its campaign to develop weapons of mass destruction.

Libya Raid (April 14, 1986) On April 4, 1986, a U.S. serviceman was killed in a bomb explosion in a West Berlin discotheque. The attack was believed to have been carried out by Libyan-trained terrorists. In retaliation, U.S. President REAGAN ordered a military strike against suspected terrorist bases in Libya. U.S. F-111 bombers based in Britain carried out the mission. The raid was highly popular in the U.S., but international opinion was divided.

Lichine, Alexis (1913–1989) Russian-born wine expert. An internationally recognized authority, Lichine specialized in promoting French wines in the U.S. In 1951 he purchased the Château Prieure-Cantenac winery near Bordeaux, France, which he renamed the Chateau Prieure-Lichine. He also founded Alexis Lichine & Co., a wine shipping firm that he later sold to the British brewer Bass. His books *The Wines of France* (1951; later retitled *Alexis Lichine's Guide to the Wines and Vineyards of France*) and the *Encyclopedia of Wines and Spirits*

(1967) were considered landmark reference books.

Lie, Trygve (1896–1968) Norwegian statesman, secretary-general of the UNITED NATIONS (1946–53). A Social

UN secretary-general Trygve Lie (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Democrat, Lie served in every Norwegian government from 1935 to 1946. Elected the first secretary-general of the UN, he was an early but unsuccessful advocate of the admission of communist CHINA to the UN. At the outbreak of the KOREAN WAR (1950) he took the initiative in organizing UN forces to assist SOUTH KOREA in checking aggression by NORTH KOREA. He resigned in 1953 and later reentered Norwegian politics.

Lieb, Fred (1888–1980) American sportswriter and baseball historian. Lieb started his career in journalism in 1911. Active for nearly 70 years, he wrote more than a dozen books on baseball and covered some 8,000 major league games. It was Lieb who called Yankee Stadium “the house that Ruth built” (see Babe RUTH). He was the first sportswriter to be inducted into the Baseball Hall of Fame.

Lieberman, Joseph (1942–) U.S. senator (1970–) and Democratic vice

presidential candidate (2000). Born in Stamford, Connecticut, Lieberman attended Yale University where he received his B.A. in 1964 and his law degree in 1967.

In 1988 Lieberman was elected to the U.S. Senate and was reelected in 1994, 2000, and 2006 (as an independent). Lieberman supported the 1991 Persian Gulf War launched by President George H. W. BUSH. In 1995 Lieberman began a three-year term as chairman of the Democratic Leadership Council, an organization charged with developing the national platform of the Democratic Party. In 1999, during President Clinton’s Senate trial, Lieberman rebuked Clinton for his affair with White House intern Monica Lewinsky, but did not vote to convict Clinton. In 2000 Lieberman was selected by Democratic presidential candidate AL GORE as his running mate, the first Jewish vice presidential candidate in American history. The Gore-Lieberman ticket lost the campaign to Republicans George W. BUSH and Dick CHENEY (see also FLORIDA BALLOT CONTROVERSY (2000)). Following his defeat, Lieberman resumed his post in the Senate and supported the initial foreign policy actions of the second Bush administration. In 2002 Lieberman had been a candidate for the Democratic presidential nomination but left the race in February 2004 after losing the Delaware primary.

Liebes, Dorothy (1899–1972) Leading American designer of textiles, known for her typically modernist use of strong colors and unusual materials. Liebes’s education was primarily academic, but in the 1930s she established a studio in San Francisco where she produced custom handweaves of simple design for designers and architects. In 1940 she became a designer for the production firm of Goodall Fabrics. As her reputation grew, she became a designer and consultant to a number of larger firms, including Sears Roebuck and DuPont. For many years she was the only textile designer with national public recognition.

Liechtenstein Liechtenstein is an alpine principality of central Europe, tucked between Austria and Switzerland and occupying a total area of only 61.8 square miles; it is the fourth smallest country in the world. Neutral

LIBYA

1911	Italy seizes Libya from weakened Ottoman Empire.
1938–39	30,000 Italian peasant farmers settled in Libya under Mussolini colonization policy.
1940–43	Italian and German forces use Libya as base of operations during World War II North African campaign.
1949	Libya is granted independence following Italy's defeat in World War II.
1951	United Kingdom of Libya proclaimed under King Idris (Muhammad Idris al-Mahdi al-Senusi).
1960s	Discovery of oil brings foreign investment, new wealth and social change.
1969	Coup led by Col. Muammer el-Qaddafi deposes King Idris; new Arab nationalist regime closes Western military bases, confiscates property of Jews and Italians.
1980	Libyan forces enter Chad; Qaddafi announces merger of the two countries; Libyan troops withdraw the following year.
1984	Britain breaks relations with Libya after Libyans fire on a crowd from their London embassy, killing a British policewoman.
1986	U.S. bombers raid Tripoli and Benghazi in retaliation for Libyan terrorist bombings.
1989	(January) U.S. Navy fighters shoot down two Libyan MIGs off Libyan coast; U.S. asserts that Libya is building chemical weapons factory with German assistance.
1991	Qaddafi releases international terrorist Abu Nidal from house arrest.
1992	UN imposes sanctions for Libya's refusal to extradite two Libyans suspected on bombing Pan Am flight 103 over Lockerbie, Scotland.
1993	A failed army coup leads to mass arrests.
1994	International Court of Justice rules against Libya's claim to the Aozou Strip in Chad. Libyan troops are withdrawn.
1996	United States imposes additional sanctions against companies doing business in Libya following continuing Libyan refusal to extradite Lockerbie suspects.
1998	Qaddafi announces realignment of Libyan foreign policy toward Africa and away from the Arab world.
1999	Libya surrenders two suspects in the Lockerbie bombing to Scottish court; UN Security Council suspends economic sanctions.
2001	Special Scottish court in the Netherlands finds one of two Libyans charged in the Lockerbie bombing guilty and he is sentenced to life imprisonment. The other is found not guilty.
2002	United States and Libya announce they have held talks to mend relations.
2003	Libya announces end of programs to develop weapons of mass destruction.

during both world wars of the 20th century, in 1919 Liechtenstein entrusted its external relations (previously handled by Austria) to neutral Switzerland, with which it established currency, customs and postal unions in 1921–24. Prince Franz Josef II succeeded his grand-uncle as ruler in

1938; the principality has since been governed by a coalition of the Patriotic Union (VU) and the Progressive Citizens' Party (FBP). Early in 1939 a plurality of 95% voted for continued independence and the Swiss link. In the postwar era Liechtenstein became increasingly prosperous as a financial

center, achieving one of the world's highest per capita incomes. In August 1984 Prince Franz Josef transferred his executive powers to Crown Prince Hans Adam, while remaining titular head of state. Female suffrage was narrowly approved by referendum in July 1984; in February 1986 an environ-

mentalist Free Voters' List (FW) just failed to win the 8 percent vote-share required for representation. Prince Franz Josef died in November 1989 and was succeeded by his son Hans Adam II. In 1990 Liechtenstein was granted UN membership. In 2003 Prince Hans Adam won sweeping new powers, allowing him to veto laws and select judges.

Lifar, Serge (1905–1986) Russian-born dancer and choreographer. He was the last world-famous dancer to emerge under the tutelage of Serge DIAGHILEV. He joined Diaghilev's *BALLETS RUSSES* in Paris in 1923 and two years later became the company's principal male dancer. Before that company disbanded in 1929, he created roles in a number of early ballets by George BALANCHINE, most notably *The Prodigal Son* and *Apollo*. He first tried his hand as a choreographer with Igor STRAVINSKY's *Le Renard*. From 1929 to 1945 and from 1947 to 1958, he served as ballet master of the Paris Opera Ballet. He greatly enlarged that company's repertory, restored technical standards and established the company's standards with the Parisian audience. He was also a prolific author of books on dance theory and dance history.

Life magazine American periodical. Started in 1936, *Life* magazine was conceived of by publisher Henry LUCE and his wife Clare Boothe LUCE. It was to be a large-format, inexpensive—its initial price was 10 cents an issue—photographic magazine. Its staff of photographers included Margaret BOURKE-WHITE and Alfred EISENSTADT, and it became known for its excellent photography, particularly for its stirring portraits of soldiers and war-torn Europe during WORLD WAR II. At its peak of popularity in the postwar years each issue sold 8 million copies worldwide. As the availability of televised images increased, the magazine foundered and eventually folded in the early 1970s but was later revived. In 2002 the Time Magazine Group announced that it was reviving *Life* magazine, and it would produce the publication at six-week intervals.

Likud Alliance of various right-wing Israeli parties, which, under the leadership of Menachem BEGIN, won the gen-

eral election of 1977, displacing the Israeli Labour Party for the first time in the country's history. Yitzhak SHAMIR later headed the Likud alliance. In the 1990s the Likud returned to power under Prime Ministers Benjamin Netanyahu (1996–99) and Ariel Sharon (2000–). In 2005 Prime Minister Sharon announced he was leaving Likud to start a new party, named Kadima.

Lillie, Beatrice Gladys (stage name of Constance Sylvia Munston, Lady Peel) (1898–1989) Canadian-born actress and comedienne, often called “the funniest woman in the world.” Lillie emigrated to England in 1910 to study music, and soon began appearing in theatrical revues. During a 50-year career she appeared in numerous plays, musicals and films in the U.S. and Britain, including *Auntie Mame*, *Around the World in Eighty Days*, *Thoroughly Modern Millie*, and *High Spirits*, a musical version of Noel COWARD's *Blithe Spirit*. Her one-woman show *An Evening with Beatrice Lillie* won her a Tony Award in 1953.

Lima Declaration Document of Pan-American solidarity issued in Lima, Peru, on December 26, 1938, by representatives of North and South American governments. Prompted by fascist incursions in Europe and by Japanese expansionism, it stated that a threat to the peace, security or territorial integrity of any republic in the Americas would be viewed as a threat to all of the American republics.

Limón, José (1908–1972) Mexican-American dancer, choreographer and teacher. Limón studied with Doris Humphrey and Charles Weidman and joined their company in 1930. In 1946 he formed his own dance company with Humphrey as coartistic director. The company received immediate acclaim as one of the outstanding modern dance troupes. Limón, himself, is one of the most influential and admired modern dance figures. He choreographed his most famous work, *The Moor's Pavane*, in 1949. Other important works include *The Traitor* (1954) and *Missa Brevis* (1958). In addition to world tours with his company and yearly performances at the American Dance Festival at Connecticut College, he has taught at the Juilliard School of

Music and various other colleges. After his death the José Limón Dance Company was in residence at the New York 92nd Street YM-YWHA.

Lin Biao (Lin Piao) (1908–1971) Chinese communist soldier and MAO ZEDONG's designated successor. Lin was a veteran of the LONG MARCH (1934–35), during which he commanded a communist army. He gained victories over CHIANG KAI-SHEK's KUOMINTANG (Guomindang) troops in 1948 and carried the war victoriously into central CHINA in 1949. Created a marshal in 1955 and minister of defense in 1959, he assisted Mao in organizing the CULTURAL REVOLUTION of the mid-1960s. Marshal Lin was declared Mao's designated successor by the Ninth Party Congress in 1966 but was killed in an air crash in 1971 while fleeing from China after an unsuccessful attempt to seize power in Peking.

Lindbergh, Charles Augustus (1902–1974) American aviator. Born

Charles Lindbergh with his plane, *The Spirit of St. Louis* (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

in Detroit, Michigan, Lindbergh was named for his father, a Republican congressman. Lindbergh attended flying school in Nebraska and bought his first plane in 1923. He entered the U.S. Army Air Corps Reserve in 1925 and also flew as an airmail pilot. In 1927, enticed by a \$25,000 reward being offered for the first nonstop solo transatlantic flight, Lindbergh won backing from a group of St. Louis businessmen, who funded the construction of a specially designed airplane, *The Spirit of St. Louis*. Lindbergh took off from New York's Roosevelt Field on the morning of May 20, 1927. Thirty-three and a half hours later he landed at Le Bourget, Paris, and was welcomed by a rapturous crowd. The flight brought Lindbergh worldwide fame. Upon his return to New York he was hailed as "the lone eagle" and given the largest ticket-tape parade ever held up to that time. A long series of speaking engagements and receptions followed. In 1929 Lindbergh married Anne Morrow, the daughter of noted American banker and diplomat Dwight W. Morrow. They attempted to settle into a quiet family life, but in 1932 their infant son was kidnapped and murdered. A highly publicized investigation and trial ensued (see LINDBERGH KIDNAPPING CASE). To escape the constant attention of reporters and the curious public, the Lindberghs moved to England (1935). In 1938 the German government invited Lindbergh to inspect the Luftwaffe. Lindbergh was highly impressed by Nazi GERMANY and its military forces. (Some authorities have suggested that Lindbergh was actually an American spy, reporting to the U.S. government on the German military buildup.) Returning to the U.S. (1939), he became an outspoken advocate of American ISOLATIONISM and made public appearances for the AMERICA FIRST Committee. His view that the new world war was strictly a European affair that America ought to ignore angered many of his previous admirers. After JAPAN attacked PEARL HARBOR, however, Lindbergh supported America's role in WORLD WAR II and flew combat missions in the Pacific. He became a brigadier general in 1954 and was a consultant to the Defense Department and an adviser to Pan American Airways.

His autobiography, *The Spirit of St. Louis*, won a PULITZER PRIZE in 1953. In

his later years, spent in Hawaii, Lindbergh was an active conservationist. Among his many accomplishments, Lindbergh was also the co-inventor (1936, with Alexis CARREL) of a so-called artificial heart that could pump nutrients through the human body. Lindbergh remains one of the most complex and fascinating figures of the 20th century. A man of great personal courage, he was also intensely private. Almost universally admired for his achievements in AVIATION, he was also criticized by many for his unorthodox political views.

Lindbergh kidnapping case (*New Jersey v. Bruno Hauptmann*) (1932–1936) Kidnapping and subsequent murder of the infant son of American aviator Charles A. LINDBERGH, followed by a sensational trial. Lindbergh became a national hero after his solo transatlantic flight in 1927 in *The Spirit of St. Louis*. Two years later, he married the writer Anne Spencer Morrow, and the couple settled in rural Hopewell, New Jersey. The couple's bliss was shattered when their infant son Charles Lindbergh Jr. was kidnapped from his nursery during the night of March 1, 1932. In the following weeks, Lindbergh and the police followed numerous false leads in the hope of recovering the Lindbergh baby unharmed. After paying a ransom and receiving a note about the baby's whereabouts, their hopes were dashed when the baby's body was discovered on May 12, not far from their home. The nation was stunned and a massive manhunt eventually led to the arrest of Bruno Richard Hauptmann, a German immigrant.

Although there was only circumstantial evidence and Hauptmann maintained his innocence, he was convicted. After a series of unsuccessful appeals Hauptmann was executed in the electric chair. However, controversy still lingers about the actual facts of the crime. The Lindbergh case was one of the most sensational of the 20th century, and the glare of publicity that followed the Lindberghs forced them to leave the U.S. for several years.

Lindsay, Nicholas Vachel (1879–1931) American poet. Born in Springfield, Illinois, Lindsay attended Hiram College, the Art Institute of Chicago and the New York School of Art. During his

early years, he walked the U.S. as a modern troubadour, selling his drawings and giving poetry readings to pay for his meals and his lodging. Lindsay's strongly musical and rhythmic poetry, often concerned with the American experience, is particularly effective when read aloud. Books that reflect his years of wandering include *Rhymes to Be Traded for Bread* (1912), *Adventures While Preaching the Gospel of Beauty* (1914) and *A Handy Guide for Beggars* (1916). Among his collected volumes of verse are *General William Booth Enters into Heaven* (1913), *The Congo* (1914) and *Collected Poems* (1930).

Line of Control (Kashmir) A 700-kilometer border between India and Pakistan established by the Simla Agreement in 1972. According to the agreement, the Line of Control was supposed to function as a temporary solution to the ongoing dispute between INDIA and PAKISTAN over the province of KASHMIR until both sides reached a diplomatic solution to that territory's status. To help enforce the Line of Control, a UN observation force that had been stationed along the Indo-Pakistani border since 1949 agreed to maintain a small presence along the new frontier. However, both sides have disputed the exact location of the Line of Control, which has led to frequent border clashes during times of tension in Kashmir. Since its establishment, the Line of Control has remained the starting point for offensives conducted by India into Pakistan and Pakistan into India. It is also the territory from which India has shelled Pakistan following outbreaks of Islamic separatism in Kashmir, such as the Hizbul MUJAHIDEEN insurrection begun in 1990 against Indian rule of the province that had claimed over 25,000 lives by the end of the decade.

Link, Edwin A. (1904–1981) American inventor. In the 1930s Link invented the flight simulator, a mechanical device that simulated night conditions and was used for many years to train millions of military and commercial pilots, including some 50,000 WORLD WAR II pilots. He founded Link Aviation in 1935 and went on to design many other advanced aviation devices. Some of these were used to train the first astronauts. Link also developed equipment for deep-sea exploration, including the

first submarine with an underwater exit hatch, and "The Shark," a protected television camera that could be lowered to depths that divers could not reach.

Lipatti, Dinu (1917–1950) Romanian concert pianist. Born into a musical family, Lipatti developed into a child prodigy. Encouraged by his godfather, composer Georges ENESCO, he attended the Bucharest Conservatory. When he placed second in an international competition in Vienna (1934), one of the judges, Alfred CORTOT, resigned from the jury in protest and invited Lipatti to study with him in Paris. Lipatti's budding career was curtailed by WORLD WAR II, which he spent in Switzerland. From 1944 to 1948, Lipatti was professor of piano at the Geneva Conservatory; during this period, through his recitals, concerts and recordings he won international recognition as a major artist, and was particularly renowned for his interpretations of the music of J. S. Bach and Frédéric Chopin. In 1948 he was diagnosed as having leukemia; musicians around the world, including Yehudi MENUHIN and Igor STRAVINSKY, donated money for his treatment. Despite his illness, Lipatti remained active until his final months; his last recital was in the autumn of 1950. He died on December 2, 1950, at age 33. Many critics consider Lipatti's premature death a tremendous loss to 20th-century music and feel that, had he lived, he would have been one of the greatest pianists of the century. In the years since his death, his legend has grown.

Lipchitz, Jacques (Chaim Jacob Lipschitz) (1891–1973) Born in Lithuania, Lipchitz settled in Paris in 1909 and studied at the Ecole des Beaux-Arts. He soon became associated with cubist artists, reinterpreting the tenets of CUBISM in sculpted form in works such as *Man with a Guitar* (1916, Museum of Modern Art, New York City). In the 1920s he experimented with transparent sculptures and by the 1930s began to create monumental and powerful semi-abstract sculpture. Lipchitz lived in the U.S. during the early 1940s and returned to France after World War II. The large and rhythmic forms and the mingling of the allegorical and the contemporary in subject matter that characterize his mature style may be seen as early as *The Rape of*

Europe (1941) and as late as *Peace on Earth* (1967–69). Lipchitz is widely considered to have played a pivotal role in the development of modern sculpture in the 20th century.

Li Peng (Li P'eng) (1928–) Chinese prime minister (1987–92). Born in Chengdu, his father was executed by the Kuomintang (Guomindang, ZHOU Enlai or Nationalists) in 1930. In 1939 he was adopted by CHOU EN-LAI, a leading member of the Chinese Communist Party (CCP). In 1941 Li attended the Institute of Natural Science in Yan'an. Six years later, he traveled the Soviet Union to study Soviet engineering techniques. In 1954 Li returned to China and began his long career as an electrical engineer and minister of the national electric power industry for the Communist Chinese government that defeated the Kuomintang in 1949. In 1982 he left the electrical industry to head the national water conservation agency and was named to the CCP's Central Committee. A year later, he was appointed vice prime minister and took control of the ministries of education, energy and transportation. In 1985 Li was inducted into the CCP's Politburo, the chief decision-making body in China. Following the resignation of ZHAO ZIYANG as prime minister of China in 1987, Li succeeded him and was appointed to a second term in 1992.

In June 1989 Li supported Chinese leader DENG XIAOPING's decision to use military force to brutally suppress the student-led movement in what became known as the Tiananmen Square massacre. Li had the responsibility to oversee Chinese efforts to deal with the harsh criticism of the government's actions from foreign powers, especially the U.S.

In March 1998 Li completed his second and final term as prime minister. He has remained active in Chinese politics through his continued participation in the Politburo and his appointment as chairman of the National People's Congress, the Chinese national legislature.

Lipinski, Edward (1888–1986) Polish economist. Lipinski twice served as director of POLAND's Institute of National Economy. In 1975 he resigned from the Communist Party and in 1976 helped

found the Committee for Workers' Self-Defense. That group, known by its Polish initials KOR, was credited with helping pave the way for the formation of the SOLIDARITY free trade union confederation in 1980. At Solidarity's first national congress in 1981, Lipinski dissolved KOR, declaring it had outlived its usefulness.

Lippmann, Walter (1899–1974) American journalist. Winner of two PULITZER PRIZES (1958, 1962), Lippmann was a dominant intellectual figure for four decades. In 1914 he helped establish the NEW REPUBLIC, serving as associate editor until 1917. He served as editorial page chief (1923–29) then editor (1929–31) of the *New York World*. He wrote his famous column, *Today and Tomorrow*, for the *NEW YORK HERALD-TRIBUNE* (1931–62), then for the *Washington Post* (1962–67). The column appeared in more than 250 newspapers worldwide. Lippmann was also the author of several books, including *Public Opinion* (1922) and *U.S. Foreign Policy* (1943). He retired in 1967.

Lippold, Richard (1915–2002) American sculptor. Born in Milwaukee, Lipinski studied at the University of Chicago and the Chicago Art Institute (1933–37), becoming an industrial designer. His link with industry and architecture was clear in his elegant geometrical constructions of gleaming wire and sheet metal. Exquisitely engineered, these intricately constructed works are suspended in space and use the play of light as part of their design. Lippold created a number of pieces for architectural installation, including *Orpheus and Apollo* at Avery Fisher Hall in Lincoln Center, New York City. Among his best known pieces are *Variation No. 7: Full Moon* (1949–50, Museum of Modern Art, New York City) and *Sun* (Metropolitan Museum, New York City). Lippold taught art and was a professor at New York's Hunter College from 1952 to 1967.

Lipset, Seymour M(artin) (1922–) American sociologist. Lipset is one of the most admired and influential sociologists to have emerged in postwar America. He was raised in a working-class New York Jewish family and came to know well the workings of the local printer's union to which his father

belonged. This knowledge came to bear in one of Lipset's major works, *Union Democracy* (1956), in which he argued that not all organizations necessarily created elite leaderships—equality could lead to better decision making when a healthy level of disrespect prevailed. Lipset, who taught at Berkeley, Columbia and Harvard universities, also sparked controversy in the 1950s by his analyses of the social origins of what he termed the “radical right”—a grouping of disaffected social groups who craved more status or feared losing what status they had and were thus deviant at root. *Political Man* (1960) argued that the delicate social and ideological balances necessary to maintain democracy were in danger of eroding. Lipset's later writings include *The Politics of Unreason* (1970). From 1992 to 1993 Lipset served as president of the American Sociological Association. In 1996 Lipset released two books—*American Exceptionalism: A Double-Edged Sword*, and *Jews in the New American Scene*—that he coauthored with Earl Raab. Lipset received the World Association for Public Opinion's Helen Dinnerman Prize in 1997 for his contributions to international policy issues. Lipset held a joint appointment as senior fellow at the Hoover Institution at Stanford University and Hazel Professor of Public Policy and professor of sociology at George Mason University.

Lisspector, Clarice (1925–1977) Brazilian novelist and short story writer. Lisspector was the daughter of Ukrainians who immigrated to Brazil shortly after her birth. She attended law school in Rio de Janeiro while working as a journalist. One year after graduation (1943) she published her first novel, *Perto de coração selvagem* (Close to the savage heart). Because Brazilian writers of the 1940s were preoccupied with social problems and realistic fiction, critics were shocked by the poetic luminosity and introspectiveness of her prose; nevertheless, the book won the Fundação Graca Aranha prize. Her finest novel was *A Mac no escuro* (1961; tr. 1967 and reissued 1986 as *The Apple in the Dark*). In all she produced 15 volumes of fiction. Despite her high reputation in Latin America, her work is still difficult to obtain in translation.

Lissitzky, El(iezer Markovich) (1890–1941) Russian painter, designer

and architect. Born in Smolensk, Lissitzky studied engineering at Darmstadt (1909–14), returning to Russia in 1919 to teach at the Vitebsk art school and becoming a professor at the Moscow Academy of Arts in 1921. Working closely with other members of the Russian avant-garde, Lissitzky began (1919) to create abstract drawings and paintings using strong color and simple geometrical shapes that he named *Prouns*. When the Russian government manifested active disapproval of abstract art, he left the country and settled in GERMANY in 1922. There he helped to popularize SUPREMATISM and CONSTRUCTIVISM and added ideas from these movements to BAUHAUS philosophy. He returned to Moscow in 1928. Well represented in European and American museums, he was the author

of a number of volumes, including *Russia; The Reconstruction of Architecture in the Soviet Union*. (1930).

List, Eugene (1918–1985) American concert pianist. List gained international fame in 1945 when, while serving in the U.S. Army, he was asked to perform for Winston CHURCHILL, Harry S. TRUMAN and Joseph STALIN at the POTSDAM CONFERENCE. Later he championed the music of the 19th-century American composer Louis Moreau Gottschalk. He also toured in “monster concerts” featuring performances by 20 or more pianists at a time, seated two to a keyboard.

Lithuania One of the three Baltic Sea republics, Lithuania is located in North-east Europe. After Lithuania declared its

LITHUANIA

1918–20	War for independence against Bolshevik Russia; Lithuanian independence recognized internationally.
1922	A new constitution is enacted.
1940	Soviet Union invades.
1941	Nazi Germany invades.
1944	Soviet Union reconquers Lithuania and begins mass arrests and persecutions.
1956	Russification campaign begins.
1990	Lithuania declares independence from the Soviet Union, but a military crackdown leads to numerous civilian deaths.
1991	Lithuania is granted independence.
1992	A new constitution is promulgated.
1998	Valdas Adamkus is elected president.
2000	Center-right coalition of the Lithuanian Liberal Union and the New Union wins parliamentary elections and form a government.
2001	Coalition collapsed and former president Algirdas Brazauskas becomes prime minister.
2004	Lithuania is admitted to NATO (March) and the EU (May); Valdas Adamkus is reelected president and general elections produce a new coalition under Algirdas Brazauskas as prime minister.

independence in 1918, invasion by Russian BOLSHEVIKS led to the Russo-Lithuanian War, which ended with the Treaty of Moscow in 1920. Recognized as a democratic republic in 1922, Lithuania continued to face conflict with GERMANY over the port of Memel (administered by Lithuania until HITLER's annexation in 1939) and with Poland over the city of Vilna (controlled by Poland until 1939). After the NAZI-SOVIET PACT of 1939, Lithuania's vulnerability to Soviet expansion led to a vote in 1940 to peacefully join the Soviet Union. Some liberalization under Soviet leader Mikhail GORBACHEV encouraged Lithuania to move toward independence (1988–89). However, a Soviet crack-down in late 1990 resulted in civilian deaths. On February 9, 1991, Lithuania voted overwhelmingly (in a nonbinding referendum) for independence, though Gorbachev refused to recognize the vote. Following the abortive coup by Soviet hard-liners against Gorbachev, Lithuania obtained its independence from the USSR in September 1991. It joined the EUROPEAN UNION (EU) in 2004.

Lithuanian War of Independence (1918–1920) Lithuania declared its independence (February 1918) when the Russian czar was overthrown. Soviet forces invaded, but were driven out by Germans. German troops withdrew after their World War I surrender, and Soviets invaded January 1919; the Poles intervened, driving the Soviets out. In December of that year the Lithuanian-Polish border, defined by the Allies, gave Vilnius to Lithuania. Fighting continued with the Soviets until they recognized Lithuanian independence in the Treaty of Moscow on July 12, 1920. Polish raiders, led by General Lucian Zeligowski (1865–1947) captured Vilnius, established a provisional government and by plebiscite demonstrated that a majority of its citizens wanted union with POLAND. Lithuanian relations with Poland were severed, but by 1922 Lithuania, minus Vilnius, had been recognized as a democratic republic.

Little, Royal (1896–1989) U.S. business executive, credited with inventing

the modern corporate conglomerate. The textile company Little founded in 1923 (which later became known as Textron, Inc.) showed little promise for expansion in the early 1950s, so Little branched out into other fields by acquiring a diverse range of companies. He stepped down as Textron chairman in 1960 and later founded a venture capital firm.

Little America U.S. base on ANTARCTICA. Located on the Ross Ice Shelf, south of the Bay of Whales, it was established in 1928 by Commander Richard E. BYRD. Some 30 miles east, another U.S. base (Little America IV) served as a research station during the INTERNATIONAL GEOPHYSICAL YEAR (1957–58).

Little Review, The American magazine. Founded in Chicago in 1914 by Margaret C. Anderson, the magazine was devoted to promoting the arts. Its home base was moved to San Francisco, New York and finally Paris before Anderson decided to cease publication in 1929. Foreign editors included Ezra POUND. The magazine presented reproductions of modern paintings and sculptures, and published the work of such writers as James JOYCE, Amy LOWELL, Sherwood ANDERSON, T. S. ELIOT, Marianne MOORE, Wallace STEVENS and W. B. YEATS.

Litvinov, Maxim Maximovich (Meir Wallach) (1876–1951) Soviet diplomat and politician. Of Jewish background, Litvinov joined the Social Democratic Labor Party in 1898 and its Leninist faction in 1901. Having taken part in the 1905 Revolution, in 1907 he moved to London where he worked as a clerk. Named representative of the Soviet government in Great Britain after the 1917 Revolution, he was arrested and later exchanged for the British ambassador. Deputy foreign commissar in 1921–30 and 1939–46, Litvinov was foreign commissar from 1930 to 1939. He made a considerable impression at the LEAGUE OF NATIONS by advocating disarmament. Removed from the post in 1939, shortly before the pact with HITLER, he was appointed deputy foreign minister (1941–46) and was ambassador to Washington (1941–43).

Liu Shaoqi (Liu Shao-ch'i) (1898–1974) Chairman of the People's

Republic of CHINA (1959–69). Elected to the Central Committee of the Communist Party in 1927, Liu was appointed a political commissar during the LONG MARCH. A principal vice chairman of the party on the establishment of the Chinese People's Republic in 1949, Liu succeeded MAO ZEDONG as chairman (head of state) of the People's Republic. He lost his position as heir apparent to Mao during the CULTURAL REVOLUTION in 1966. Criticized for defending the importance of industrial workers instead of the primacy of the peasantry as a spearhead of the revolution, he was deprived of all his party offices in 1968. He disappeared from public life the following year.

Living Theatre (1951–1970) Avant-garde theater group founded in 1951 by Julian Beck and Judith Malina, who served as the principal theorists and directors of the group. The Living Theatre quickly established itself in New York City as one of the leading Off-Broadway troupes. Its many experimental productions, which featured improvisation and modern resetttings of classic plays, included stagings of *The Connection* by Jack Gelber (1959) and a VIETNAM WAR-era version of *Antigone* by the Greek dramatist Sophocles (1967). After extensive touring in Europe during the 1960s, the Living Theatre was dissolved in 1970.

Lleras Camargo, Alberto (1903–1990) Colombian politician. Lleras served as president of COLOMBIA (1945–46 and 1958–62). Following the establishment of the ORGANIZATION OF AMERICAN STATES in 1948, he served as the group's first president. He was instrumental in devising a 1957 coalition between his Liberal Party and the Conservative Party that helped end a widespread rural conflict known as "La Violencia." In 1961 he helped organize the Latin American Free Trade Association to help reduce tariffs in the region.

Llewellyn, Richard (pen name of Richard Dafydd Vivian Llewellyn Lloyd) (1907–1983) Welsh playwright and novelist. Llewellyn's first and best known novel, *How Green Was My Valley* (1939), became an international best seller and was made into an ACADEMY AWARD-winning film (1941) directed by

John FORD. It depicted life in a Welsh coal-mining community.

Llewellyn-Davies, Richard (Lord Llewellyn-Davies) (1912–1981) Welsh architect and city planner. Head of the prominent British architectural firm of Llewellyn-Davies Weeks, he also taught at the University of London, where he was made head of the Bartlett School of Architecture in 1960. However, it was as a designer of NEW TOWNS after World War II that he won international fame. He designed Rushbrooke Village and Milton Keynes, among other new towns in Britain and elsewhere. His other works included London's Stock Exchange and the new wing of the Tate Gallery, and the Atlantic Richfield research complex in Philadelphia. He was made a life peer in 1963.

Lloyd, Harold (1894–1971) U.S. motion picture actor. Lloyd had already worked for the Edison Company before 1915, when he began appearing as "Lonesome Luke" in a series of one-reel comedies for Hal Roach. His enormous success guaranteed artistic control of his own films, and Lloyd went on to produce longer and feature-length comedies. He portrayed himself as a bumbling young man constantly getting into the most hair-raising situations. He was the highest paid actor of the 1920s, and renowned as one of the silent screen's most innovative performers and directors. Lloyd acted in some 500 films, some of the most popular including *For Heaven's Sake* (1926), *The Kid Brother* (1927) and *Speedy* (1928).

Lloyd George, David (1863–1945) British statesman, prime minister (1916–22); born in Manchester but raised in Wales. Lloyd George was apprenticed to a solicitor in 1878 and set up his own law practice six years later. He was elected as a LIBERAL PARTY member of Parliament in 1890 and served there for the next 55 years. He became president of the Board of Trade in 1905 and was appointed chancellor of the exchequer by Herbert ASQUITH in 1908. In the latter office, he carried out a number of significant social reforms, including the Old Age Pensions Act (1908) and the National Health Insurance Act (1911), both cornerstones of Britain's WELFARE STATE. In order to finance his pioneering programs, Lloyd George had new

land and income taxes enacted in 1909 that proved extremely unpopular with the wealthy, powerful and conservative land-owning members of the House of Lords, who vetoed the tax package. The clash that followed led to the Parliament Act of 1911, which ended the House of Lords' veto power. After the outbreak of WORLD WAR I, Lloyd George remained chancellor until 1915 when he succeeded to the post of minister of munitions and then became minister of war in 1916.

Later in 1916 he joined with Conservatives to form a coalition that ousted Asquith, and Lloyd George succeeded him as prime minister. While frequently quarreling with his generals, he was a forceful and effective wartime leader and was instrumental in unifying Allied military forces under Marshal FOCH. After the war, he led the British delegation at the PARIS PEACE CONFERENCE (1919), where he tried to steer a moderate course between CLEMENCEAU's calls for retribution and WILSON's idealistic programs, and did much to shape the Treaty of VERSAILLES. At home, he dealt harshly with the Irish question but finally set up the Irish Free State in 1922. After the CHANAK CRISIS of that same year, the Conservatives withdrew from the coalition and his ministry fell. From 1926 to 1931 he was head of a severely weakened Liberal Party. Although he sympathized with German grievances and paid a friendly visit to HITLER in 1936, Lloyd George came to strongly oppose the MUNICH PACT and the policy of APPEASEMENT. He was made an earl shortly before his death.

Lloyd Webber, Andrew (1948–) British composer. Andrew Lloyd Webber has established himself as one of the most successful composers in the modern musical theater. He first won international attention for a string of successes on which he collaborated with British lyricist Timothy Rice—*Joseph and the Amazing Technicolor Dreamcoat* (1968), *Jesus Christ Superstar* (1970), and *Evita* (1976). Webber then went on to compose the acclaimed musicals *Cats* (1981, based on humorous poems by T. S. ELIOT), *Starlight Express* (1984), the phenomenally popular *Phantom of the Opera* (1987), *Aspects of Love* (1989), *Whistle Down the Wind* (1996), and *The Woman in White* (2004). Lloyd Webber

founded the London-based Really Useful Company theatrical ensemble. Lloyd Webber's memorable melodies have earned him a fortune in royalties, but some critics charge that his works exploit surface effects and technical gimmickery at the expense of genuine emotional and intellectual depth.

Locarno Pact Series of agreements signed on December 1, 1925, by representatives of the governments of Belgium, Great Britain, Czechoslovakia, France, Germany, Italy and Poland, all of whom met at Locarno, Switzerland. As a whole, the treaties dealt with various problems that were unsettled after World War I. The principal agreement, signed by France, Belgium and Germany and guaranteed by Britain and Italy, confirmed the French and Belgian borders with Germany and reaffirmed the demilitarization of the RHINELAND. Arbitration agreements regarding Germany's eastern borders were also signed. A diplomatic triumph for Great Britain's Austen CHAMBERLAIN, France's Aristide BRIAND and Germany's Gustav STRESEMANN, the pact opened the way for Germany's entry into the LEAGUE OF NATIONS. The international harmony embodied in the Locarno Pact was shattered by HITLER's remilitarization of the Rhineland in 1936.

Lockerbie See PAN AM 103.

Lockheed Aircraft Corporation American firm founded in 1916 by Allan Lockheed (born Loughhead) in Burbank, California, to design and produce airplanes of advanced design. The single-engined, high-wing Lockheed Vega of 1927, designed by John K. NORTHROP, was one of the first truly streamlined airplanes, a monoplane without struts or wires. It was used by Amelia EARHART and Wiley POST in their pioneer flights and made Americans aware of the beauty possible in utilitarian forms. The Sirius of 1929 by the same designer was a low-winged design of similar styling, used by the LINDBERGHs in their early exploratory Arctic flights. The Orion introduced retractable landing gear and may be considered one of the most elegant of pre-World War II aircraft designs. The first Electra, a twin-engined, all-metal transport of 1934, was also an outstanding design, but was overshadowed

by the success of the larger Douglas DC-3. The postwar Lockheed Constellation and Super-Constellation carried forward the firm's reputation for outstanding design with the remarkably elegant forms of fuselage and the striking triple-rudder tail, destined, however to become obsolete with improving technology. Lockheed continues to produce military aircraft and the 1011 transport jet.

Lockheed scandal (1975) Scandal involving bribes and kickbacks paid by LOCKHEED Corporation to obtain foreign contracts. In 1975 it was revealed that Lockheed, an aircraft manufacturer, regularly made payments to influence peddlers, foreign politicians and foreign military leaders as part of its sales strategy in marketing its planes overseas. A Senate investigation revealed that the payments were made with the knowledge of the corporation's senior managers. Revelation of the payments had far-reaching consequences. In Japan, Lockheed had made over \$12 million in payments, including one to an aide close to Prime Minister TANAKA. In West Germany, Lockheed paid a kickback to the Christian Socialist Party, while in Italy the corporation made payments to members of the military. When it was revealed that Prince Bernhard, husband of Queen Juliana of the Netherlands, had secretly received \$1 million, he resigned all his public offices in disgrace. These revelations caused the forced early retirement of a number of senior Lockheed executives.

Lockwood, Margaret (1916–1990) British actress. Her first well-known role was in the 1938 Alfred HITCHCOCK film *The Lady Vanishes*. She became one of the most popular actresses of the 1940s, appearing in such notable films as *Night Train* (1940), *The Stars Look Down* (1941) and *The Wicked Lady* (1945). In the 1960s and 1970s she appeared with her daughter Julia in the British television series "The Flying Swan." Her last film appearance was in 1976, in *The Slipper and the Rose*.

Loden, Barbara (1934–1980) American actress-director. Loden was the first woman to write, direct and star in her own feature film. The film, *Wanda* (1970), about a drab, desperate Ap-

palachian housewife, won the International Critics Prize at that year's Venice Film Festival. Loden was married to Elia KAZAN, who directed her on Broadway in a Tony Award-winning performance in Arthur MILLER's play *After the Fall*.

Lodge, David John (1935–) British critic and novelist. Born in London, Lodge was educated at University College, London. He taught and in 1976 became professor of modern English literature at the University of Birmingham, then retired in the 1980s to write full time. Lodge's critical works *Language of Fiction* (1966), *The Novelist at the Crossroads* (1971), *The Modes of Modern Writing* (1977) and *Working with Structuralism* (1980)—show his familiarity with many literary movements while professing his allegiance to realism. His early fiction, such as *Ginger, You're Barmy* (1962), which drew on his experiences in National Service in the 1950s, were antiestablishment satires. He turned to a more comedic style with *The British Museum is Falling Down* (1965) and *How Far Can You Go* (1980; published in the U.S. as *Souls and Bodies*), which explore the effects of social change on members of the Catholic Church. Other works include the academic satires *Changing Places* (1975); *Small World* (1984); and *Nice Work*, which lampoons both radical academic politics and Thatcherism. Following the publication of *Paradise News* (1991), Lodge has released several additional novels, including *Therapy* (1995), *Home Truths* (1999), *Thinks* (2001), and *Author, Author: A Novel* (2004).

Lodge, Henry Cabot (1850–1924) U.S. senator. Lodge graduated from Harvard in 1871 and from Harvard Law School in 1874. He received the first Ph.D. granted by Harvard in political science in 1876. Lodge had a successful career as a historian and editor before being elected as a Republican to the U.S. House of Representatives (1887–93), where he championed civil service reform. He served in the U.S. Senate from 1893 until his death. In the upper house Lodge helped draft the Sherman Antitrust Act (1896), the Pure Food and Drug Act (1906) and the Tariff of 1909. He was an ardent protectionist and an opponent of the direct election of senators and woman suffrage. A close friend of Theodore

ROOSEVELT, he welcomed war with Spain in 1898 and supported the development of the armed forces. As chairman of the Senate Committee on Foreign Relations, Lodge bitterly opposed Woodrow WILSON's peace policy and led the successful fight against U.S. entry into the LEAGUE OF NATIONS after WORLD WAR I. Lodge played a major role in the Republican nomination of Warren HARDING in 1920.

Lodge, Henry Cabot, II (1902–1985) U.S. politician and diplomat. A Massachusetts Republican from a distinguished family, he was elected to the U.S. Senate in 1936 and reelected in 1942. He resigned his seat in 1944 to enter the army in World War II, the first senator since the Civil War to resign to fight in a war. After the war he was reelected (1946). In 1952 he was Dwight D. EISENHOWER's presidential campaign manager; that same year, ironically, he himself was defeated for reelection to the Senate by Democrat John F. KENNEDY. From 1953 to 1960, Lodge headed the U.S. delegation to the UN. In 1960, he was Richard M. NIXON's vice presidential running mate on the losing Republican ticket. He served as U.S. ambassador to VIETNAM (1963–64, 1965–67). After serving briefly as U.S. ambassador to WEST GERMANY, he was chief U.S. representative (1969) to the Paris peace talks on Vietnam. (See also VIETNAM WAR.)

Lodge, John Davis (1903–1985) American politician. Before entering politics, Lodge was a lawyer and then an actor. His most notable role was as Marlene DIETRICH's lover in *The Scarlet Empress*. He began his political career as a member of the House of Representatives (1947–51). He went on to become governor of Connecticut (1951–55) and U.S. ambassador to Spain (1955–61), Argentina (1969–74) and Switzerland (1983–85). He was the brother of Henry Cabot LODGE II.

Loeb, William (1905–1981) American newspaper publisher. A maverick ultraconservative, Loeb published New Hampshire's *Manchester Union Leader* and *New Hampshire Sunday News* and printed his editorials on the front page. Although his papers served a small state, from the 1950s through the 1970s he exerted great influence in national

politics because every four years New Hampshire held the first presidential primary. The *Union Leader*, the only statewide paper in New Hampshire, was his forum for evaluating—and usually denouncing—the candidates in the first presidential primary every four years. His black-and-white right-wing views embarrassed many thoughtful conservatives and doomed many liberal causes. Loeb dubbed Dwight D. EISENHOWER “Doppy Dwight” and Gerald FORD “Gerald the Jerk” but staunchly supported Ronald REAGAN. In 1972 he dealt a fatal blow to Edmund MUSKIE's presidential campaign. In spite of his generally reactionary tone, Loeb also supported the labor movement, vigorously attacked waste and corruption, and probably printed more readers' letters than any other paper in the country.

Loesser, Frank (1910–1969) American lyricist and song writer, best known for his musical *Guys and Dolls* (1950). The fusion of popular and classical traditions was his specialty. Loesser, born in New York into a family of talented artists, struck out on his own, working odd jobs until he was signed by RKO Studios in HOLLYWOOD as staff lyricist. By the mid-1930s he was collaborating with composers Burton Lane, Hoagy CARMICHAEL and Victor Schertzinger on film songs like “Two Sleepy People” (*Thanks for the Memory*, 1938), “See What the Boys in the Backroom Will Have” (*Destry Rides Again*, 1939) and “Jingle, Jangle, Jingle” (*The Forest Rangers*, 1942). During his wartime service, Loesser began writing both lyrics and music; soon thereafter he had two Broadway smash hits, *Where's Charley?* (1948, an adaptation of an old farce called *Charley's Aunt*) and *Guys and Dolls* (1950, based on the underworld characters of Damon Runyan). Few shows could boast a more tuneful score. Critic Brooks ATKINSON wrote: “Every song defined a character . . . There was not a commonplace nor a superfluous song in the score.” Perhaps Loesser's greatest achievement was *The Most Happy Fella* (1956), based on Sidney Howard's play *They Knew What They Wanted*, the story of a lovelorn California farmer and his mail-order bride. It was virtually a through-composed opera, juxtaposing arias like “Rosabella” with tuneful ditties like “Standing on the Corner.” His last

shows were *Greenwillow* (1960) and the brilliant *How to Succeed in Business Without Really Trying* (1961).

Loewe, Frederick (1904–1988) Austrian-born composer. Loewe immigrated to the U.S. in 1924, leaving behind a career in European operetta. Popular success eluded him until he teamed with lyricist Alan Jay LERNER in 1942. Their first hit Broadway musical was *Brigadoon* (1947), which was followed by *Paint Your Wagon* (1951). *My Fair Lady*, a musical version of G. B. SHAW's *Pygmalion*, was their biggest success, opening in March 1956 and running for more than 2,700 performances. Their last two major collaborations were the movie musical *Gigi* (1959) and the Broadway musical *Camelot* (1960).

Loewy, Raymond Fernand (1893–1986) French-born U.S. industrial designer. Loewy came to the U.S. after World War I and embarked on his career in 1929 when he redesigned the Gestetner duplicating machine in three days. That design was unchanged for decades. He was regarded as having pioneered the “streamlined” look that drastically altered the appearance of objects from toothbrushes to airplanes. Perhaps his single best known design was the Coca-Cola bottle, with another the interior of the SKYLAB space orbiter. His company, Raymond Loewy Associates, founded in 1945, was the world's largest industrial design firm.

Logan, Joshua (1908–1988) American playwright, director and producer. Winner of a PULITZER PRIZE in 1950 for coauthoring the musical play *South Pacific* with Oscar HAMMERSTEIN II, Logan is best known as the director of such plays as *Charley's Aunt* (1940), *Annie, Get Your Gun* (1946), *Mr. Roberts* (1948), *South Pacific* (1949), *Picnic* (1953) and *Fanny* (1954). As a film director, his credits include *South Pacific* (1958), *Fanny* (1961) and *Camelot* (1967). It was Logan who encouraged James STEWART to become an actor.

Logical Positivism School of philosophical thought that emerged in Vienna in the late 1920s. A major precursor of the school was Ludwig WITTGENSTEIN. The key figures in the creation of Logical Positivism were the

members of what was termed the Vienna Circle—most notably Rudolf CARNAP, Hans Reichenbach, and Moritz Schlick. Philosophers in Berlin, such as Carl HEMPEL, and in England, such as A. J. AYER, also contributed to its development. The Logical Positivists viewed themselves as extending the criteria of science to the entire range of subject matters traditionally analyzed by philosophy. In this effort, statements were to be judged as meaningful only insofar as they were empirically verifiable. As a result, the idealist philosopher's claim of having special insights on issues of metaphysics, ethics and the philosophy of mind were disallowed. Ethical statements, such as “murder is wrong,” were viewed as emotive or persuasive rather than verifiable assertions. Many Logical Positivists concluded that traditional philosophy as a whole had become largely meaningless. Logical Positivism had a considerable influence on the linguistic philosophy of later British philosophers such as J. L. AUSTIN.

Lombard, Carole (Jane Peters) (1908–1942) American film actress. The wife of actor William Powell and, later, of Clark GABLE, Lombard began acting in motion pictures at the Fox Studios in 1926 (see 20TH CENTURY-FOX). She gained fame for her beauty and her performances in “screwball” comedies. She appeared in such films as *No Man of Her Own* (1932), *My Man Godfrey* (1936) and *They Knew What They Wanted* (1940). She was killed in a plane crash while on a war bond sales drive.

Lombardi, Vince (1913–1970) American football coach. Devoted equally to his players as individuals and to the team as a whole, the Brooklyn-born Lombardi was one of the most successful football coaches of all time. He began his pro career as a coach with the New York Giants in 1954 and joined the Green Bay Packers as head coach and general manager five years later. Often remembered for stating “Winning isn't everything, it's the only thing,” he was also devoted to the ideal of equality among men both on and off the field, and refused to tolerate bigotry in any form. In the words of one of his players, “He's not prejudice—He treats us all like dogs.” Lombardi led his team, through nine frozen and muddy Wisconsin win-

ters, to six conference championships and five league championships. He retired in 1968, only to reemerge as the coach of the Washington Redskins a year later, leading them to their first winning season in more than a decade. The Super Bowl Trophy is dedicated to his memory.

Lombardo, Guy (1902–1977) Canadian bandleader. Lombardo was born in London, Ontario. In 1917 he and three brothers formed a band called the Royal Canadians, with Guy as its leader. In 1924 the Royal Canadians began playing in the Midwestern U.S., and by 1928 they had begun to appear in New York City. In 1929 they started their tradition of playing at the Waldorf-Astoria Hotel on New Year's Eve, featuring their theme song “Auld Lang Syne”; these appearances, which were later televised for many years, continued until the time of Lombardo's death.

London, Artur (1915–1986) Czechoslovakian diplomat and author. He was deputy foreign minister during the early days of the communist regime in CZECHOSLOVAKIA. One of a number of leading officials put on trial for revisionism during a STALINIST-style purge in the early 1950s, he was sentenced to life in prison after confessing his guilt. London was released from prison in 1956 after Nikita KHRUSHCHEV's historic denunciation of STALIN, and moved to France in 1963. In 1969 he published *L'Aveu* (The confession), which gave a graphic account of the tortures inflicted upon him in prison to get him to confess. The book was translated into many languages and made into a 1970 film starring Simone SIGNORET and Yves MONTAND.

London, Jack (1876–1916) American author. Drawing from his experiences during the Alaskan gold rush, London created several short stories and novels filled with adventure and rugged heroes, both men and dogs, who fight to survive against the forces of nature and civilization. He gained fame with three volumes of short stories, including *The Son of the Wolf* (1900). His novel *The Call of the Wild* (1903) has become an American classic. Other major novels include *White Fang* (1906), *The Sea Wolf* (1904) and *The Iron Heel* (1907), which best re-

veals his social and political beliefs. His most famous short stories are “To Build a Fire” and “The White Silence.” London's work has had considerable influence on such American writers as Ernest HEMINGWAY.

Lone Ranger, The Riding his horse Silver and accompanied by his Indian companion Tonto, this masked crime-fighter of the Old West was one of the premier heroes of 20th-century popular culture. The Lone Ranger made his debut in early 1933, on radio station WXYZ in Detroit; he was soon heard across America, with 2,596 adventures airing before the show was canceled in 1954. The Lone Ranger was also a syndicated comic strip from September 11, 1938, to April 1, 1984, with a 10-year hiatus from 1971 to 1981. In addition, he starred in movie serials, feature films (including the 1981 release *The Legend of the Lone Ranger*), comic books, novels, his own pulp magazine, a long-running television series and animated cartoons.

Long, Huey Pierce (1893–1935) U.S. politician. Long was admitted to the Louisiana Bar in 1915 after only seven months of study at Tulane University. His first political victory was his 1918 campaign for the state railroad commission. He won election for state governor in 1928 as a Progressive Democrat. Long survived impeachment on bribery charges his very first year in office. Later, he launched a sweeping campaign to solidify his political

Louisiana governor Huey Long (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

strength by legislative programs popular with rural voters. Elected to the U.S. Senate in 1930, he retained his governor's seat, at times with the help of the National Guard, until he could turn it over to a loyal supporter. Finally Long claimed his Senate seat in 1932. In 1934 he returned to Louisiana to consolidate his power in the state. He abolished local government, gained total control of the legislature and effectively acted as dictator. He was assassinated by a political opponent in the Louisiana State Capitol.

"long count" fight See JACK DEMPSEY.

Long March (1934–1935) After holding off KUOMINTANG (Guomindang, Chinese Nationalist) troops in mountainous parts of Jiangxi (Kiangsi) in southern CHINA for more than a year, the Chinese communist army of 200,000 men escaped encirclement and started an orderly retreat (October 1934). Fighting along the way, they crossed southeast China to the west and then north to Sha'anxi (Shan-hsi), a 6,000 mile trek over 18 mountain ranges, 24 rivers, a vast swamp and two enemy lines; about 50,000 men survived. The army was joined by about 50,000 along the way. CHU TEH (1886–1976) and MAO ZEDONG (1893–1976) led the Eighth Route Army, the largest force.

Longo, Luigi (1900–1980) Italian communist politician. Longo was among the founders of the Italian Communist Party (1922). He spent time in prison during MUSSOLINI's rule. During WORLD WAR II he became a guerrilla leader against the Germans. He was considered a superb organizer and rose through the party's ranks to become Communist Party secretary (1964–72). During his tenure the party gained credibility in Italian politics. However, Longo questioned the wisdom of working with the Christian Democrats—ITALY's governing party.

Longworth, Alice Roosevelt (1884–1980) Elder daughter and last surviving child of President Theodore ROOSEVELT. She was a leading figure in Washington, D.C., society for nearly 80 years and was renowned for her beauty, charm, acerbic wit and influential political connections. Sometimes called

"Washington's other monument," she was acquainted with and held outspoken opinions about virtually every important American political figure from President Benjamin Harrison to President Gerald FORD. Her husband, **Nicholas Longworth**, was Speaker of the House of Representatives (1925–31).

Lon Nol (1913–1985) President of the Khmer Republic (CAMBODIA, 1972–75). A general who held various ministerial posts under Prince SIHANOUK, including prime minister (1966–67), Lon Nol headed the government after Sihanouk was deposed in 1970. He established close ties with the U.S. and South Vietnam, permitting their forces to operate in Cambodia. He assumed total power in the new republic in 1972 but fled in 1975 as communist KHMER ROUGE rebels marched on the capital.

Loos, Adolf (1870–1933) Austrian designer and architect. Loos practiced in Vienna where, for a time, he worked with Otto Wagner. He designed a number of houses and shops there, notably the Karntner Bar (1908), the Goldman & Salatsch shop (1910) and the Steiner house. Although his own designs employed some decorative detailing, Loos is well known for his opposition to all decoration which he expressed in theoretical writings such as the essay "Ornament und Verbrechen" (1908; "Ornament and Crime"). Through his works and published writings Loos played an important role in the development of MODERNISM.

Loos, Anita (1893–1981) American screenwriter, playwright, novelist and social celebrity. Beginning her career as a child actress, Loos began writing plot outlines for films and eventually innovated the practice of writing screen captions for SILENT FILMS. Those she wrote for D. W. GRIFFITH's classic *Intolerance* (1916) were later lauded as classics of the genre. Among her 200-plus filmscripts were the highly acclaimed *San Francisco* (1936) and her adaptation of Clare Boothe LUCE's *The Women* (1939). She wrote several Broadway comedies, including *Happy Birthday* for Helen HAYES; and *Gigi*, an adaptation of the novel by COLETTE. She was probably most famous for the play *Gentlemen Prefer Blondes* (1926), later made into

two movies and two musicals. (The 1953 film version made a star of Marilyn MONROE.) Loos's writing style was characterized by witty dialogue and a tendency to satirize romance.

López Contreras, Eleazar (1883–1973) President of VENEZUELA (1935–41). Before assuming the presidency, López served as minister of war under the dictator General Juan Vicente GÓMEZ. He stepped in to lead the nation after Gómez's death.

López Rega, José (1916?–1989) Argentinian politician. A leading right-wing figure, he was regarded as the power behind Isabel PERÓN when she served as president of ARGENTINA following the death of her husband, General Juan D. PERÓN (1974). He was forced to resign as minister of social welfare in 1975, following charges that he had siphoned off millions of dollars from the Argentine treasury and exerted a sinister influence on Isabel Perón, who had consulted him as an astrologer. At the time of his death, he was awaiting trial for his role in organizing Argentina's right-wing death squads in the 1970s.

Lopokova, Lydia (1892–1981) Russian prima ballerina. While still in her teens Lopokova gained fame dancing with Serge Diaghilev's BALLETS RUSSES, appearing opposite Vaslav Nijinsky in *Carnival* during her first season (1910). After the RUSSIAN REVOLUTION she emigrated to Britain. Married to the British economist John Maynard KEYNES in 1925, she became a familiar and popular figure in English society.

Lorca, Federico García See GARCÍA LORCA, Federico.

Lorde, Audre (1924–1992) African-American author. Born in New York City, New York, Lorde entered the University of Mexico in 1954. She left that institution the following year to return to New York City, where she lived in Greenwich Village. Lorde attended Hunter College, where she received a B.A. in literature and philosophy in 1959. After obtaining an M.A. in library science in 1961 from Columbia University, Lorde worked as a librarian in Mount Vernon, New York, but later became a head librarian at the New York

Public Library. In 1968 she received a grant from the National Endowment for the Arts that allowed her to leave her job in New York and to become the poet-in-residence at Tougaloo College in Mississippi, where she also taught courses on poetry. While working at Tougaloo, Lorde published her first book of poetry, *The First Cities* (1968), followed later by another book of verse, *Coal* (1976). She also wrote *The Cancer Journals* (1980), which documented her ongoing struggle with breast cancer. Lorde also devoted her time to advancing the political position of lesbians, through such activities as the inaugural 1979 national march for gay and lesbian liberation held in Washington, D.C.

In 1980 she returned to New York City to teach English literature at Hunter College, where she headed the Audre Lorde Poetry Institute. She left that position in 1985 to move to St. Croix in the Virgin Islands. In 1991 New York governor Mario Cuomo awarded Lorde the Walt Whitman Citation of Merit, which made her the New York poet laureate for two years. However, her tenure as laureate ended in 1992 when she died of breast cancer.

Lord of the Flies Novel by William GOLDING published in 1954. The story depicts a group of upper-class school boys stranded on an island after an airplane wreck. Initially, they attempt to set up a democratic society, but soon degenerate into cruel savages acting out barbarian rites and rituals that eventually lead to the deaths of two boys. The mythic novel was Golding's response to *The Coral Island* by R. M. Ballantyne, a cheerful, boys' adventure story with the same initial premise, and it reflects Golding's pessimistic belief in the inherent cruelty and evil of man. The *Lord of the Flies* was an immediate success upon its publication in 1954, and is still part of the curricula in many English departments. It was filmed by the British director Peter Brooks in 1963; a second film version was released in 1990.

Lord of the Rings A famous trilogy of fantasy novels by philologist and Merton professor of English, J. R. R. TOLKIEN. The *Lord of the Rings* trilogy consists of *The Fellowship of the Ring* (1954), *The Two Towers* (1954), and *The Return of the King* (1955). The story

these novels tell is begun in an earlier Tolkien novel, *The Hobbit* (1937), which introduces Bilbo Baggins, a hobbit who lives in Middle Earth. Hobbits are an ancient people who somewhat resemble humans in form and are by nature unobtrusive and peaceful, albeit capable of heroic valor should the need arise. The need does arise when Bilbo gains hold of a master ring that is sought by the evil Sauron of Mordor as part of his plan to conquer Middle Earth. The *Lord of the Rings* trilogy focuses on the quest of Frodo, Bilbo's heir, to destroy the ring by journeying to the far-off fire mountain Orodruin, where he can throw it into the cracks of doom. Many critics have seen Christian symbolism in the characters and events of the trilogy, although Tolkien himself was careful to disclaim any explicit allegorical interpretation. In 2001 New Line Cinemas released its first adaptation of the Tolkien series, *The Fellowship of the Ring*, followed in 2002 and 2003 by *The Two Towers* and *The Return of the King*, respectively. At the March 2004 Academy Awards ceremony, *Return of the King* received 11 Oscars, tying the record set by *Ben Hur* and *Titanic* for the most Academy Awards received by a single movie.

Loren, Sophia (Sofia Villani Scicolone) (1934–) A stunning and apparently ageless film star, Loren has appeared on film for almost five decades. Born in Rome, Loren started as a walk-on in Italian films, worked her way to stardom and afterward appeared in many American films, including *The Pride and the Passion* (1957), *Houseboat* (1958), *Desire Under the Elms* (1958) and *Arabesque* (1966). In 1961 she won an ACADEMY AWARD as best actress for her performance in the Italian film *Two Women*; her performance in *A Special Day* (1977) also received critical acclaim. She received an honorary Academy Award in 1990 for her cumulative body of work. In 1996 Loren returned to Hollywood filmmaking with her appearance in the comedy *Grumpier Old Men*. She is married to the producer Carlo Ponti.

Lorenz, Konrad (1903–1989) German ethnologist. Lorenz was born in Vienna and received his M.D. from the University of Vienna in 1928, followed by a Ph.D. in zoology in 1933. Over the

course of his distinguished academic career, he held a number of positions in European universities and received numerous awards, including the 1973 NOBEL PRIZE for physiology or medicine, which he shared with Karl von Frisch and Nikolaas TINBERGEN. Lorenz is known particularly for his work on individual and group behavior patterns, imprinting (rapid, virtually irreversible learning occurring during a critical period early in life) and aggression, which he believed to be partially innate in some animals, including humans.

Lorre, Peter (Lazlo Lowenstein) (1904–1964) Hungarian-born film and stage actor. Lorre is widely acknowledged as one of the great character actors in the history of the cinema. He began his career as a stage actor appearing throughout Central Europe—to no great acclaim—in the 1920s. But Lorre won international recognition for his powerful portrayal of a child murderer in the classic German film *M* (1931), directed by Fritz LANG. Lorre fled GERMANY after the NAZIS rose to power and, after a brief time in England during which he appeared in the film *The Man Who Knew Too Much* (1934), directed by Alfred HITCHCOCK, he came to America. In HOLLYWOOD, Lorre achieved fame for his portrayal of the Japanese detective Mr. Moto in a series of B-action films that appeared in the late 1930s. He then achieved film immortality for his supporting roles as Joel Cairo in *The Maltese Falcon* (1941) and Ugarte in *Casablanca* (1943). Lorre's career foundered in the 1950s, due in part to ill health, but he made a comeback in the 1960s through appearances in Roger CORMAN horror films such as *Tales of Terror* (1962) and *The Raven* (1964).

Losey, Joseph (1909–1984) American film director. Losey was educated at Harvard and devoted his early career to stage direction, most notably the Broadway production of *Galileo Galilei* (1947). He then went to HOLLYWOOD; however, his left-wing political sympathies got him blacklisted during the MCCARTHY era (see MCCARTHYISM, HOLLYWOOD TEN). As a result, Losey moved to England, where he worked on films for several years under an assumed name before directing *Time Without Pity* (1957) under his real name. In the 1960s, Losey became a preeminent

figure in the British film industry as a result of a series of artistic successes, including *The Servant* (1963), *Accident* (1967) and *The Go-Between* (1971), on which he collaborated with writer Harold PINTER. Subsequent films by Losey included *Mr. Klein* (1976) and *Don Giovanni* (1979). *Losey on Losey* (1968) is a selection from his writings on film.

Loss, Joe (Joshua Alexander Loss) (1909–1990) British band leader. He was one of the most prominent figures in the big band era in Britain in the 1930s and 1940s. He remained popular for more than 50 years, and his band frequently performed on television and for royal social affairs, until the 1980s.

lost generation Term coined by Gertrude STEIN that refers to the generation of expatriate American writers who lived and worked in Paris and other European capitals during the post-WORLD WAR I era. Besides Stein herself, other lost generation figures include Sherwood ANDERSON, Ernest HEMINGWAY and F. Scott FITZGERALD. (See also JAZZ AGE.)

Louganis, Greg(ory) (1960–) American diver. Considered by many to be the greatest diver of all time, Louganis won 47 national and 13 world championships. His first Olympic medal came in 1976, when he won a silver medal in platform diving. He was expected to reach his athletic peak in 1980, when the U.S. boycott of the OLYMPIC GAMES kept him from competition. He won the 3-meter springboard and 10-meter platform gold medals in 1984; his final Olympic victories in 1988 made him the first diver in history to win those medals in successive OLYMPIC GAMES. The 1988 victories were hard-won, as Louganis hit his head on a diving board, then competed the next day with multiple stitches in his head. He retired from diving after the games to pursue an acting career. In 1994 Louganis openly admitted his homosexuality at the Gay Games (an international sports competition). The following year he disclosed that he had AIDS. He has written several books on breeding dogs and continues to promote AIDS awareness.

Louis, Joe (Joseph Louis Barrow) (1914–1981) American boxer, widely

World heavyweight boxing champ Joe Louis, 1947
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

regarded as the greatest heavyweight champion of all time. The son of an Alabama sharecropper, Louis took the heavyweight title from James J. BRADDOCK in 1937 and held it until his first retirement in 1947—the longest reign of any champion in his weight class. Known as the “Brown Bomber” because of his vicious left jab and powerful right straight, Louis entered professional boxing in 1934, after two years as an amateur. His first loss came at the fists of German champion Max SCHMELING in 1936; Nazi propagandists seized on Schmeling’s 12th-round knockout of Louis as proof of Aryan superiority over the black race. In their rematch on June 22, 1938, however, Louis knocked Schmeling out in the first round. He successfully defended his title a record 35 times. Besides defeating many second-rate challengers (on his so-called Bum of the Month tour), Louis also vanquished the top heavyweights of his day. After the second Schmeling fight, his most memorable victory came against Billy Conn on June 18, 1941; Louis dropped Conn in the 13th round of that spirited contest. He came out of retirement in 1950 to be beaten by then-champion Ezzard Charles and emerged from his second retirement in 1951, only to fall in his final fight to Rocky MARCIANO. In his 71 pro bouts, Louis had 68 victories, 54 by knockouts. In his later years, he suffered from financial difficulties and from health problems. Louis’s triumphs and quiet

dignity made him a national hero, particularly to black Americans.

Louis, Morris (1912–1962) American painter. A leading figure in COLOR-FIELD PAINTING, he was born in Baltimore and studied at the Maryland Institute (1929–33). During the 1930s he joined other artists in executing projects for the WPA’s Federal Arts Project. A resident of Washington, D.C., he taught at the Washington Workshop Center and the Corcoran School of Art (1952–62). Louis is known for his vibrant, stained paintings created by pouring thinned pigment onto unprimed canvasses. These large abstract works moved from the “veils” of the early 1950s to bursting “florals” and, in his last works, “stripes” such as *Pillars of Dawn* (1961, Wallraf-Richartz Museum, Cologne).

Love Canal Highly publicized toxic waste site in Niagara Falls, New York; it focused public attention on the dangers of hazardous wastes. In 1978 residents in the area around a waterway named Love Canal were experiencing severe health problems. Neighbors brought suit against Hooker Chemical Company, the former owner of the land, and the matter drew national attention. Investigations revealed that the cause of their problems was the residue of the chemicals Hooker had dumped in the neighborhood years earlier. Although the extent of the danger was disputed, President Jimmy CARTER declared a state of emergency in the neighborhood. The inhabitants eventually moved elsewhere after the state of New York bought the majority of their homes, then bulldozed the structures. When Hooker Chemical was merged into Occidental Petroleum, Occidental agreed to compensate the former residents and also agreed to clean up the site.

Lovecraft, H(oward) P(hillips) (1890–1937) American writer, poet and essayist who was a major figure in 20th-century supernatural fiction. He spent most of his life in Providence, Rhode Island, one of several New England cities that served as a model for his legend-haunted fictional city, Arkham. Poor health and his reclusive nature reinforced his solitary pursuit of reading and writing. Never a prolific

contributor to professional publications Lovecraft gained an enthusiastic following from his extensive work for amateur presses and as a consultant for other writers. Contemporary disciples such as Robert Bloch, Henry Kuttner and August Derleth—and later such masters as Brian Lumley and Ramsey Campbell—have all acknowledged his powerful influence. In his best stories—“The Colour Out of Space” (1927), “The Call of Cthulhu” (1928), the novels *At the Mountains of Madness* (1936) and *The Shadow over Innsmouth* (1936)—Lovecraft achieved a unique fusion of evolutionary theory and the type of science that appears in gothic horror tales, especially astronomy. He created a pattern of pseudomorph (the Cthulhu Mythos) that presented the world as a violent intersection of human and cosmic forces locked in a perpetual struggle. His dense and stilted style and rather archaic diction lent these lurid tales a peculiar dignity, elegance and expansiveness. Two years after his death August Derleth and Donald Wandrei established Arkham House, a press devoted to perpetuating Lovecraft’s work. Lovecraft’s work has been adapted extensively for television and films.

Lovell, Sir Alfred Charles Bernard (1913–) British astronomer. Lovell was awarded his Ph.D. from the University of Bristol in 1936. In 1951 he was named director of the Jodrell Bank (now the Nuffield Radio Astronomy Laboratories), where he was instrumental in building the world’s first large radio telescope, completed in 1957. In the coming decades, the telescope proved particularly valuable in the investigation of pulsars and quasars. Lovell was knighted in 1961.

Lovell, James (1928–) U.S. astronaut. “The moon is essentially gray, no color . . . looks like plaster of Paris, sort of gray sand” is how Lovell described the surface of the moon during the flyby flight of Apollo 8 (December 21–27, 1968). If, in the words of science fiction writer Robert Heinlein, “The moon is a harsh mistress,” then we might wonder if such an unflattering description jinxed Lovell’s next lunar mission. As commander of Apollo 13 (April 11–17, 1970), Lovell and his crewmates Fred Haise and Jack

Swigert, gave the world some tense moments when an explosion aboard their spacecraft forced the three men into a dangerous and improvised return to Earth aboard the cramped and poorly equipped lunar module. A veteran of 30 days in space, in addition to his two APOLLO missions Lovell also piloted GEMINI 7 (December 4–18, 1965) and Gemini 12 (November 11–15, 1966). After retiring from NASA in March 1973 he entered private industry.

Lovestone, Jay (1898–1990) Lithuanian-born labor leader. Head of the American Communist Party in the 1920s, Lovestone later became a staunch anti-communist. He had advocated an independent party line in the U.S. and, as a result, was attacked by Soviet leader Joseph STALIN in a well-publicized argument in 1929. By 1940 Lovestone concluded that communism had become nothing more than a totalitarian conspiracy. He later served as international affairs director of the AFL-CIO, where he wielded considerable influence as the American labor movement’s representative in international affairs.

Low, George M. (1926–1984) Viennaborn engineer who was a major force in the APOLLO space program. As a member of the NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA) and its predecessors from 1949 to 1976, Low helped draft the 1960 memo that suggested to President John F. KENNEDY that the U.S. could put a man on the moon by the end of the 1960s. After astronauts GRISSOM, WHITE and CHAFFEE were killed in a launch pad fire (January 27, 1967), Low was charged with redesigning the Apollo spacecraft. He successfully drove the program to meet its end-of-decade deadline. In 1976 he became president of his alma mater, Rensselaer Polytechnic Institute.

Lowell, Amy (1874–1925) American poet. The Lowell family occupies a special place in the history of American poetry. Amy Lowell was a descendant of the 19th-century poet James Russell Lowell, as well as an ancestor of the famous modern poet Robert LOWELL. Amy Lowell published her first verse at age 36, and soon became one of the most prominent American poets of her era, winning the PULITZER PRIZE in 1925 for her volume *What’s O’Clock*. In the

1910s Lowell worked together with Ezra POUND to draw attention to the poetic school of IMAGISM, which Pound soon began to call “Amygism” in wry tribute to Lowell’s fervent leadership of the new literary movement. Lowell’s other works include a two-volume biography of John Keats (1925). Her *Collected Poems* appeared in 1955. Glenn R. Ruhley has written a biography of Lowell, *The Thorn of a Rose* (1975).

Lowell, Percival (1855–1916) U.S. astronomer. Wealthy enough to pursue his own interests, Lowell was the world’s most famous amateur astronomer, as well as founder of the Lowell Observatory at Flagstaff, Arizona, in 1894. He was also an important force in instituting the search that led to the discovery of the planet Pluto in 1930. Lowell is most famous, however, for his “observations” of “canals” on Mars. Inspired by the writings of Italian astronomer Giovanni Schiaparelli, Lowell believed that he saw a connecting pattern among the shifting patterns of dark and light material on the Martian surface (which we now know to be rock surfaces periodically exposed by wind-driven sand). He convinced himself that he was observing an intricate and elaborate network of artificial canals on the red planet. Not discouraged that other observers failed to report similar findings, Lowell wrote numerous articles and books in support of his observations, putting forth his romantic theories of an arid, dying planet populated by intelligent inhabitants who dug the canals to move water from its poles to the plains. Although Lowell was mistaken in his observations, his enthusiastic writings helped to keep popular interest in astronomy and the solar system alive in the age before spacecraft, and also influenced a generation of science fiction writers (see Edgar Rice BURROUGHS.)

Lowell, Robert Traill Spence, Jr. (1917–1977) American poet. The scion of a Boston Brahmin line, Lowell was educated at Harvard (1935–37) and Kenyon College (1938–40). He was imprisoned as a conscientious objector during WORLD WAR II (1943–44) and later spent significant periods in mental hospitals. His turbulent marriages to three writers were well known: Jean STAFFORD (1940–48), Elizabeth

HARDWICK (1949–72) and Caroline Blackwood (1972 to his death). *Lord Weary's Castle* (PULITZER PRIZE, 1947) and *The Mills of the Kavanagh's* (1957) focus on his conversion to Catholicism. *Life Studies* (1959) marked a breakthrough into more personal, less rhetorical poetry. *Notebook, For Lizzie and Harriet*, *The Dolphin* (Pulitzer Prize, 1973) and *Day by Day*, all published in the 1970s, represented an attempt to create a larger work along the lines of POUND'S CANTOS or BERRYMAN'S *Dream Songs*. Lowell is generally considered the father of the CONFESSIOAL POETS.

Lowry, Malcolm (1909–1957) English novelist and short story writer. Lowry is best known for his novel *UNDER THE VOLCANO* (1947), which is an acknowledged classic of 20th-century literature. Lowry, who was educated at St. Catherine's College in England, interrupted his academic studies to go to sea and work for 18 months as a deckhand. This experience formed the basis for his first novel, *Ultramarine* (1933), which appeared when Lowry was 24. Despite this early success, Lowry endured subsequent years of poverty and neglect as a writer. He also battled his own chronic alcoholism. In 1936 Lowry visited Mexico, an important setting for many of his works. In 1939 he settled in Dollarton, British Columbia, where he built for himself a crude squatter's shack in which he lived with his second wife, the novelist Margerie Bonner and wrote in seclusion for more than a decade. Other novels by Lowry include *In Ballast to the White Sea* (1936), the unfinished *Lunar Caustic* (1968) and *Dark Is the Grave Wherein My Friend Is Laid* (1969). His *Selected Letters* were published in 1967.

loya jirga A “grand council” called by the head of state in AFGHANISTAN and generally including leaders of the nation's major tribes as well as important bureaucratic, political, military and religious figures. For over a millennium, *loya jirgas* have served to ratify important decisions of state, such as the one that convened in 1941 to confirm Afghanistan's neutrality during WORLD WAR II and the one that met in 1985 to ratify the constitution for the Democratic Republic of Afghanistan. In September 2001, as the U.S. prepared to invade

Afghanistan to overthrow the TALIBAN government and eliminate AL-QAEDA, the terrorist group responsible for the terrorist attacks of SEPTEMBER 11, 2001, four *loya jirgas* emerged, each claiming to speak for the Afghani people in the hopes of replacing the Taliban as the country's governing force. Instead, after U.S. forces toppled the Taliban regime, an interim government established by the U.S. coalesced around Hamid KARZAI. In 2002 the former king of Afghanistan, Zahir SHAH, convened a new session of the *loya jirga*. The 1,501 delegates named Karzai president of Afghanistan and designated his cabinet officers.

Lubin, Isador (1896–1978) American economist. Lubin was a leading member of President Franklin D. ROOSEVELT'S BRAIN TRUST and helped shape the NEW DEAL. As U.S. commissioner of labor statistics (1933–46), he supervised and made famous the CONSUMER PRICE INDEX.

Lubitsch, Ernst (1892–1947) German-born film director many of whose major works were produced in HOLLYWOOD. Lubitsch was one of the most stylish and sophisticated directors of comedy in the history of cinema. The phrase “the Lubitsch touch” became, in the 1930s and 1940s, synonymous with the subtle and refined handling of adult themes of love and betrayal in the elegant style of drawing room comedy. His best known film is *Ninotchka* (1939), which featured Greta GARBO in her first comedic role as a dour Russian communist agent who is induced to see the charms of Western bourgeois decadence by dapper Melvyn DOUGLAS. *To Be or Not to Be* (1942), starring Jack BENNY and Carole LOMBARD, was a parody of Nazi pretensions set in occupied Poland. Other Lubitsch films include *Monte Carlo* (1930), *Trouble in Paradise* (1932) and *The Merry Widow* (1934).

Lucas, George (1944–) American film director and producer. Lucas is one of the most popular filmmakers in the history of HOLLYWOOD. He is best known as the creator of the *Star Wars* trilogy—*Star Wars* (1977), which Lucas directed,

The Empire Strikes Back (1980) and *Return of the Jedi* (1983) which he scripted and produced. The phenomenal box office success of these films, with their pioneering use of computer technology to create elaborate special effects, proved that blockbuster action and storytelling—without reliance on previously established big-name stars could capture the hearts and pocketbooks of audiences. Lucas's first directorial effort was a low-budget science fiction film *THX 1138* (1970). His first critical breakthrough was the acclaimed *American Graffiti* (1973). He has also been associated with director-producer Steven SPIELBERG. Lucas now devotes his primary efforts to producing films. Lucas developed three additional movies for the *Star Wars* saga—*The Phantom Menace* (1999), *Attack of the Clones* (2002), and *Revenge of the Sith* (2005)—which were set in the time before the original *Star Wars*.

Luce, Clare Boothe (1903–1987) U.S. editor, playwright and politician. Luce's career included the editorship of *Vanity Fair* (1933–34) and the writing of hit plays, most notably *The Women* (1936). Her political career included two terms as a Republican congresswoman from Connecticut (1943–47) and service as U.S. ambassador to ITALY (1953–57). She was married for 32 years to media mogul Henry R. LUCE, the founder of the *TIME* magazine empire. After his death in 1967, she moved to Hawaii, where she lived until she returned to Washington in 1983. Long identified with the conservative wing of the REPUBLICAN PARTY, she served on President REAGAN'S Foreign Intelligence Advisory Board.

Luce, Henry R(obinson) (1898–1967) American editor and publisher. A titan of the publishing world, Luce founded *TIME*, the first modern news magazine, with Yale classmate Briton Hadden in 1923. He went on to successfully establish the business magazine *Fortune* (1930), the photojournalistic *LIFE* (1936) and *Sports Illustrated* (1954). His magazines reflected his personal views on politics and the free enterprise system. He also acquired radio and television stations and began publishing books under the Time-Life imprint. He was married to diplomat and playwright Clare Boothe LUCE.

Luciano, Charles “Lucky” (Salvatore Luciana) (1897–1962) American organized crime leader. Born near Palermo, Sicily, he emigrated to the U.S. (1906) and was soon arrested for shoplifting. By 1916 Luciano had become a member of New York’s infamous Five Points gang; by the early 1920s he was an important figure in bootlegging. He subsequently assumed second-in-command status in the family of mob chieftain Giuseppe “Joe the Boss” Masseria. During a war (1928–30) between the Masseria factions and the opposing Maranzanos, Luciano solidified relations with younger gangsters in both camps. In 1931 Luciano was responsible for murdering both Masseria and Maranzano. Luciano then became the undisputed head of organized crime in New York and the leading figure in a new national crime syndicate that soon controlled bootlegging, prostitution, drugs, gambling, loanshark activities and labor racketeering. He prospered until 1936, when he was convicted on prostitution charges through the efforts of the crusading prosecutor Thomas E. DEWEY. Sentenced to 30 to 50 years imprisonment, he continued to control organized crime from his cell until his release in 1946, when he was deported to Italy. He wielded power from Cuba for a while but was returned to Italy, where his influence steadily waned.

Lucky Jim Novel by Kingsley AMIS, published in 1954. It earned Amis a reputation as one of the ANGRY YOUNG MEN, and remains his most popular work. The story is set in a provincial British university where its lower-middle-class hero, Jim Dixon, is a lecturer. His radical, anarchist views expressed and reflected the discontent and anger of the young British leftists in the 1950s.

Ludendorff, Erich (1865–1937) German general. Commissioned in the infantry in 1882, Ludendorff was appointed to the Prussian general staff as a major in 1906. In the early days of WORLD WAR I, he led his troops in the capture of the Belgian citadel at Li ge. Thereafter, he was named army chief of staff under HINDENBURG. Both became war heroes after the eastern front victories at Tannenberg and the Masurian Lakes (1914). As the war progressed, the two men made most of GERMANY’s important military deci-

German general Erich Ludendorff (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

sions, and from 1916 to 1918 Ludendorff exercised enormous power in civilian life as well. He was largely responsible for the beginning of unrestricted submarine warfare in 1917 and for the final offensive of 1918. When it failed, Ludendorff insisted on an armistice; after it was concluded, he fled to Sweden. Returning to Germany the following year, he engaged

in antigovernment activity, supporting the KAPP PUTSCH (1920) and HITLER’s “BEER-HALL PUTSCH” (1923). He was a National Socialist member of the Reichstag from 1924 to 1928. Although he broke with Hitler, he remained a vociferous supporter of “Aryan” rights and deplored Jews, Catholics and Freemasons alike.

Ludwigshafen am Rhein (Ludwigshafen) City on the Rhine River, Germany. A center of German chemical production, it was bombed heavily by the Allies in WORLD WAR II. In 1948 there was a massive explosion that destroyed several chemical plants and killed a number of workers.

Lugosi, Bela (B la Ferenc Dezso) (1882–1956) Hungarian-born film and stage actor. Although Lugosi was a working actor for more than four decades, his enduring fame stems from a single role with which he became permanently identified: the evil vampire, Count Dracula. Lugosi’s portrayal of the caped count in the classic 1931 film by Tod BROWNING—which followed Lugosi’s successful Broadway run in the same role—typecast him forever after in macabre and horrific roles. Prior to his stardom as Dracula Lugosi had been a successful film and stage actor in both Europe and the U.S. to which he had emigrated in 1921. In the 1930s and 1940s, Lugosi appeared almost exclusively in horror films, notably *The Black Cat* (1934), *Mark of the Vampire* (1935) and *The Raven* (1935). Lugosi’s career declined in the 1950s, while his increasing psychological identification with the role of Dracula led to his being buried—pursuant to his own instructions—in his vampire cape.

Lukacs, G r gy (1885–1971) Hungarian writer, Marxist philosopher and literary critic. In 1918 Lukacs joined the Hungarian Communist Party. In 1930 he moved to Moscow and from 1933 to 1944 worked at the Institute of Philosophy of the Soviet Academy of Science. He exerted considerable influence on European communist thought and is noted for having formulated a Marxist system of aesthetics that opposes political control of artists and that defends humanism. Having returned to Hungary in 1945, Lukacs twice served as

minister of culture. His publications include *Studies on Lenin* (1970) and *Solzhenitsyn* (1970, tr. 1971).

Lukashenko, Aleksandr Grigoryevich (1954–) Belarusian politician and president of Belarus (1994–). Born in the Byelorussian Soviet Socialist Republic, Lukashenko served in the Soviet armed forces and became the director of a state farm before winning election to the Supreme Soviet of the republic in 1990. He was one of the few members of the parliament to vote against the resolution that ratified the breakup of the Soviet Union and the establishment of the Commonwealth of Independent States, of which the newly independent republic of Belarus became a member. In the following years he became a vocal critic of the widespread corruption in the government of the new state and in 1994 was elected president in the country's first free democratic elections. As president he has presided over impressive economic gains that contrasted sharply with the economic stagnation in the other Slavic republics of the former Soviet Union, Russia and Ukraine. Lukashenko, however, resisted the trend toward privatization and the introduction of free-market economic practices that swept many of Belarus's neighbors and retained close economic ties to Russia. His authoritarian methods, which have included restrictions on freedom of speech, press and assembly, as well as rigged parliamentary and presidential elections and national referenda, have been severely criticized by human rights groups, the European Union, and the United States. In 1996, after forcing through a referendum granting the president additional powers, Lukashenko suspended the elected parliament and replaced it with a hand-picked group of legislators. Two years later he evicted the ambassadors from several Western countries from their residences in the capital to demonstrate his displeasure with their governments' criticism of his undemocratic methods. After winning reelection in 2006 in a contest universally criticized for irregularities, Lukashenko remained one of the last remnants of the old authoritarian tradition in the former Soviet republics in Europe.

Lula da Silva, Luis Ignacio (1945–) Brazilian labor leader and politician, president of Brazil (2003–). Born to an illiterate peasant family, Lula (a nickname by which he came to be known) left school after the fourth grade and worked as a street vendor and in a steel factory before obtaining his high school equivalency diploma. While working in an auto parts factory he began his career as a radical union activist and in 1978 became the president of the country's steelworkers' union. In 1980 he helped to found the left-wing Workers' Party at a time when Brazil was ruled by a right-wing military dictatorship. In 1986 he was elected to congress on the Workers' Party ticket and in 1989 was defeated in his bid to become president in the first free elections since the end of military rule. After leaving parliament in 1990 Lula became active in the movement that led to the impeachment of President Fernando Collor de Mello for corruption in 1992 and ran unsuccessfully for the presidency twice during the decade of the 1990s.

Although Lula's calls for radical social and economic reforms alarmed the business classes, he was elected president in the 2002 elections and took office on January 1, 2003. Once in power, Lula moderated his radical political rhetoric and pursued pragmatic policies designed to improve the country's difficult economic situation. While attacking the problem of poverty and hunger in Brazil, he pursued relatively moderate fiscal and budgetary policies in order to reassure international financial markets and the International Monetary Fund (IMF). As a result of these policies, the country's high inflation rate was brought under control; it enjoyed a trade surplus after many years of deficits; and Brazil was able to repay its debt to the IMF in 2005, two years ahead of schedule. Under Lula Brazil's foreign policy steered a middle course between radical populism and anti-Americanism of Venezuelan president Hugo Chávez and the free-market policies of the George W. BUSH administration in Washington, D.C. In 2005–06 Lula's government was rocked by financial scandals that tarnished its reputation and threatened Lula's chances of reelection to the presidency.

Lumet, Sidney (1924–) American motion picture and television director. As a child actor in Philadelphia and New York, Lumet appeared in many radio and Broadway plays. After service in World War II he began directing for some of the early CBS television dramatic anthology series, including *Omnibus*, *Alcoa Theater*, *Goodyear Playhouse* and *You Are There* and acquired a reputation for economical, efficient directing. His film career began with an adaptation of Reginald Rose's courtroom drama, *12 Angry Men* (1957). Half of his subsequent film projects derived from the theater—most notably Eugene O'NEILL's *Long Day's Journey into Night* (1964), Chekhov's *The Sea Gull* (1968), and *Equus* (1978), *The Wiz* (1979) and *Deathtrap* (1981). Many of his other films probe the gritty streets, tangled lives and police corruption of New York City. *Serpico* (1974) and *Prince of the City* (1981) were about cops who defy their peer groups to maintain their own code of morality; *Q&A* (1990) examined the opposite side of the same issue. Lumet's finest achievement may be *The Pawnbroker* (1965), starring Rod Steiger as Sol Nazerman, a Jew whose CONCENTRATION CAMP memories haunt his daily life. Its uncompromising harshness and brief nudity challenged—and defeated—HOLLYWOOD attempts to censor it. However, many audiences and critics have been put off by Lumet's rather humorless tone and his apparent lack of a consistent style. During the 1990s Lumet directed three films: *A Stranger Among Us* (1992), *Guilty as Sin* (1993), and *Night Falls on Manhattan* (1997). In 1993 Lumet received the Directors Guild of America's D. W. Griffith Award in recognition of his cinematic accomplishments.

Lumière brothers, the Auguste (1862–1954) and Louis (1864–1948) Lumière were pioneers of French cinema and the movement known as the documentary. Sons of a photographer, they developed a dry-plate process that made the family's plant in Lyons Europe's leading manufacturer of photographic products. By 1894 they had invented the Cinématographe, which, unlike the Edison Kinetograph, was a portable, hand-cranked mechanism that combined the operations of cam-

era, printer and projector. Within a year Louis had photographed on short lengths of film numerous actualities of French life—the arrival of a train, factory workers at the Lyons plant, fishermen with nets, the demolition of a wall—and shown them to members of the Société d'Encouragement pour l'Industrie Nationale. On December 28, 1895—generally accepted as the birthday of world cinema—these images were projected before a paying audience in the basement of the Grand Café on the Boulevard des Capucines in Paris. This, a full four months before Edison's first projected films in New York City. Soon, the Lumières dispatched an army of skilled photographers ("operators") around the world to shoot what later would be called newsreels showing the coronation of Czar NICHOLAS II in Moscow, the inauguration of President MCKINLEY, etc. After 1900 the brothers sold their filmmaking interests and devoted their time to invention and the manufacture of photographic processes (including a three-dimensional film process that Louis introduced in his 70s). Today the Lumières, especially Louis, are regarded as founders of cinema.

Lumumba, Patrice (1925–1961)

First prime minister of the Democratic Republic of the CONGO in 1960. In the same year his party emerged as the largest in the national assembly, and the Belgians chose him to be the first prime minister, with KASAVUBU as president. During his four-month incumbency he faced various crises, notably the secession of Katanga province (see KATANGA REVOLT). He was dismissed for seeking Soviet help, arrested by the army and handed over to Katanga rebels, who murdered him in 1961.

Lunacharsky, Anatoly Vasilyevich (1875–1933) Russian author, literary critic and politician. Deported in 1898 for revolutionary activities, Lunacharsky joined the Bolsheviks and worked on the party's journal *Vperyod*. Imprisoned during the 1905 Revolution, in 1909 he started a school for an elite of Russian factory workers on Capri; he was assisted by Maxim GORKY and Alexander Bogdanov. The three of them broke from LENIN, forming their own left-wing subfaction. In

1917 he joined Lenin and TROTSKY in Russia and was appointed people's commissar for education. A supporter of Bogdanovism during the 1920s, he introduced many innovations into the educational system. In 1933 he was appointed ambassador to Spain but died shortly after the appointment. The author of some 14 plays, Lunacharsky also produced many works of literary criticism.

Lunt and Fontanne English-born actress **Lynne Fontanne** (1887–1983) and her husband, American actor **Alfred Lunt** (1892–1977), formed one of the most celebrated couples to act on the American stage in the 20th century. Married in 1922, over the next 40 years Lunt and Fontanne starred together in 27 plays. They scored their biggest hit with *O Mistress Mine*, which opened in New York City in 1946 and completed 451 performances. Among the playwrights with whom Fontanne and Lunt worked were Noel COWARD, Robert E. SHERWOOD, Terence RATTIGAN and Jean GIRAUDOUX; they also acted in G. B. SHAW's *Arms and the Man* and Friedrich DURRENMATT's *The Visit*. The couple won numerous honors, including a Presidential Medal of Freedom from Lyndon B. JOHNSON in 1964 and a special Tony award in 1970. Fontanne was praised for her elegant demeanor, sultry voice and comedic talents.

Lunts, Lev Natanovich (1901–1924) Soviet essayist and playwright. A member of the SERAPION BROTHERS, Lunts wrote the plays *The Apes Are Coming* and *The City of Truth*, a courageous anti-Bolshevik play. He emigrated and died abroad.

Luo Ruijing (Lo Jui-ching) (1906–1978) Chinese communist official. Lo took part in the LONG MARCH of 1935. During the 1950s he was minister of public security in the People's Republic of CHINA. He was later army chief of staff. During the CULTURAL REVOLUTION he was purged by the RED GUARDS and disappeared from public view until his rehabilitation in 1975. He returned to the Central Committee of the Chinese Communist Party in 1977.

Lurcat, Jean (1892–1966) French artist and designer. Lurcat is known

primarily for his important role in stimulating renewed interest in tapestry making in the 20th century. Lurcat created his first tapestry in 1917. By 1939 he had established a tapestry works in Aubusson that attracted international attention. Major tapestries by Lurcat include *Four Seasons* (1940), *Apocalypse Tapestry* (1948) and *The Song of the World* (1957–64). Lurcat was a highly versatile artist who also worked in theatrical set and costume design, lithography and book illustration.

Luria, Aleksandr R(omanovich) (1902–1977) Russian psychologist and neurologist. Luria was a prodigal figure in Soviet psychology. He earned degrees in medicine, education and psychology and, at an early age, pioneered techniques in the objective, experimental measurement of human emotions. As head of the department of neuropsychology at Moscow University he undertook considerable research on the function of language and how it relates to mental development. During World War II he improved techniques for brain surgery and postoperative recovery for trauma patients. His major works include *Higher Cortical Functions in Man* (1966), *The Mind of a Mnemonist* (1968), *The Working Brain* (1973) and *Basic Problems of Neurolinguistics* (1976).

Luria, Salvador Edward (1912–1991) Italian-American physician who shared the 1969 NOBEL PRIZE for medicine or physiology with Max DELBRÜCK and Alfred D. Hershey. Luria was a professor at MIT from 1959 to 1978. In awarding the prize, the Nobel Foundation cited Luria's "discoveries concerning the replication mechanism and the genetic structure of viruses," which "set the solid foundation on which modern molecular biology rests." An ardent pacifist, Luria spoke out against the VIETNAM WAR (see ANTIWAR MOVEMENT). His outspokenness was apparently the reason behind his inclusion on a 1969 list of scientists who were barred from participating on advisory panels of the U.S. Department of Health, Education and Welfare.

Lusaka Accords A UN-sponsored 1994 agreement between the Angolan government controlled by the Popular Movement for the Liberation of Angola

(MPLA) and the rebel organization known as the National Union for the Total Independence of Angola (UNITA). The Lusaka Accords succeeded the Bicesse Accords of 1991 that had briefly established a cease-fire and arranged for national elections. When UNITA lost the elections to the MPLA, the civil war resumed. The new accords called for a cease-fire in the civil war between the MPLA and UNITA, for the disarmament of the UNITA rebels by February 1998, and for the inclusion of several UNITA members in a government of national unity. They also required the UNITA leader, Jonas Savimbi, to cease his illegal trade of diamonds on UNITA-controlled land, which Savimbi had used to fund his war effort. However, Savimbi did not comply with the UN timetable for disarmament. Instead he seized Congolese territory rich in diamond deposits during the multiparty civil war in the Congo, which he used to provide additional sources of revenue for his rebellion against the MPLA.

Lusitania British passenger ship. Hit by a German submarine torpedo, the *Lusitania* sank in the Atlantic off the south coast of Ireland on May 7, 1915. The Cunard luxury liner was unarmed but carried concealed munitions for the Allies. The sinking resulted in almost 1,200 deaths, among them 128 Americans. There was an immediate large-scale public outcry in the U.S., with some people calling for a declaration of war. President Woodrow WILSON asked GERMANY for reparations, which was denied. This incident caused public opinion to shift in favor of U.S. entry into WORLD WAR I on the side of the Allies.

Luthuli, Albert John (1898–1967) South African political and civil rights leader. Born near Bulawayo, a descendant of Zulu chiefs, he was educated at a Methodist mission school and taught there for 15 years. Appointed chief in 1936, he advocated the church's policy of nonviolence in the struggle against racial discrimination. In 1945 he joined the AFRICAN NATIONAL CONGRESS, becoming president of the Natal branch in 1951 and head of the organization in 1952. Deposed as chief and restricted by the South African government in his political activities, he nonetheless headed a campaign of passive resist-

ance against APARTHEID. In his efforts, Luthuli was influenced by his religious convictions and by the American CIVIL RIGHTS MOVEMENT. Arrested many times, he was banished to his village in 1959. In 1960 the government outlawed the ANC, and in 1962 Luthuli's statements were banned from publication. Luthuli was awarded the 1960 NOBEL PEACE PRIZE. His autobiography *Let My People Go* was published two years later.

Lutoslawski, Witold (1913–1994) Polish composer. Lutoslawski was one of the major avant-garde composers of the postwar era. Strongly influenced by the atonal compositional techniques of modernists such as BÉLA BARTÓK and Igor STRAVINSKY, Lutoslawski composed

highly experimental works that occasionally allowed for jazz-like improvisation by orchestral members. His major compositions include *Little Suite* (1951), *Concerto for Orchestra* (1954), *Funeral Music* (1958), *Venetian Games* (1961) and the choral composition *Three Poems by Henri Michaux* (1963).

Lutyens, Sir Edwin Landseer (1869–1944) English architect. Born in London, Lutyens studied at the South Kensington School of Art. Lutyens started his practice in 1889, designing a number of palatial country homes. Influenced by the Arts and Crafts style, his beautifully crafted houses represent a fusion of traditional English elements with a very personal approach. From domestic to public ar-

chitecture, he executed a number of important projects that merge neoclassicism with mannerism. These include the plan for NEW DELHI, India (1912–14), that city's imposing Viceroy's Palace (1920–31) and Liverpool's monumental Anglican cathedral (1929–41). He is also known for his war memorials, among which are the Cenotaph in London (1920), FRANCE's Thiepval Memorial Arch (1924) and memorials at Manchester, England, and Johannesburg, South Africa.

Luxembourg, Grand Duchy of A landlocked country located in the northwest corner of Europe, covering an area of 998 square miles. Luxembourg's link with the Netherlands was severed in 1890, when the accession of a female to the Dutch throne impelled Luxembourg, where Salic Law applied,

to choose a male sovereign from the House of Nassau. Salic Law was eventually revoked in 1912 to allow the accession of Grand Duchess Marie-Adelaide, whose sympathies for Luxembourg's German occupiers during WORLD WAR I attracted much criticism. Following an abortive republican coup attempt in early 1919, French pressure obliged Marie-Adelaide to abdicate in favor of her sister CHARLOTTE. Under the 1919 VERSAILLES TREATY Luxembourg was declared perpetually free of all ties with Germany, and in 1922 the Belgium-Luxembourg economic union was formed. Successive interwar governments were dominated by the Christian Social Party (CSV), although in 1937 the Social Democrats joined a coalition that enacted modern social legislation. During WORLD WAR II Luxembourg was again overrun by the Germans (1940)

and annexed to the Third Reich (1942). Grand Duchess Charlotte and her ministers escaped to London. Her son, Prince (later, Grand Duke) Jean, was one of the first Allied soldiers to enter liberated Luxembourg in 1944. In the postwar era Luxembourg was a founding member of NATO (1949) and of the WEU (1955). It also joined the BENELUX economic union with Belgium and the Netherlands (1948) and the EUROPEAN COAL AND STEEL COMMUNITY, EUROPEAN ECONOMIC COMMUNITY and EURATOM (1951–58), rapidly achieving renewed prosperity on the basis of its large iron and steel industry. In 1992 Luxembourg, a charter member of the European Economic Community, joined the European Union (EU). In 2000 Prince Henri became grand duke following Grand Duke Jean's abdication. The general election of 2004 returned

LUXEMBOURG

1912	Change in law allows female to succeed to the throne; Grand Duchess Marie-Adelaide becomes sovereign.
1914	German occupation; Marie-Adelaide is vocally sympathetic to German cause.
1919	Abortive republican coup; Marie-Adelaide forced to abdicate in favor of her sister, Princess Charlotte; new constitution increases power of the elected government, decreases that of the monarchy; ties with Germany renounced in perpetuity.
1922	Economic union formed with Belgium.
1940	Second German occupation.
1944	(December) Battle of the Bulge; thousands of American soldiers buried on Luxembourg soil.
1948	"Benelux" economic union with Netherlands and Belgium.
1951	Membership in European Coal and Steel Community contributes to steel-making boom.
1963	One-thousandth anniversary as independent state.
1964	Charlotte abdicates in favor of her son, Prince Jean.
1967	Compulsory military service abolished; volunteer army under 1,000-strong established.
1968	"Explosion Scolaire"; rapid increase in school-aged children leads to education reform.
1975	Slump in steel-making leads government to encourage electronics and other industries.
1992	Luxembourg became a member of the new European Union.
2000	Prince Henri becomes grand duke following Grand Duke Jean's abdication.
2002	The euro becomes the national currency.
2004	Jean-Claude Juncker, prime minister since 1995, forms a government after his party wins the general election.

Jean-Claude Juncker of the conservative Christian Social Party to the office of prime minister, which he has held since 1995.

Luxemburg, Rosa (1871–1919) German revolutionary leader and social theorist. Born in Russian Poland, she was involved in revolutionary activities from the age of 16. Forced to flee Switzerland in 1889, she helped to found the Polish Socialist Party in 1892. Becoming a German citizen by marriage in 1898, she became a leader of the left wing of the German Social Democratic Party. A fiery orator and brilliant writer, she was part of the 1905 revolution in Russian Poland and was active in the Second INTERNATIONAL. Differing with more moderate German socialists, she and Karl Liebknecht founded the radical Spartacus League in 1916. Two years later it became the German Communist Party. Luxemburg was imprisoned during much of World War I (1916–18). After the SPARTACIST uprising in Berlin, she and Liebknecht were again arrested in 1919. While being transported to prison, both were murdered by German soldiers. Luxemburg's best known work is *Accumulation of Capital* (1913, tr. 1951).

Lvov, Prince Georgi Yevgenevich (1861–1925) Social reformer and statesman. Lvov was active in the ZEMSTVA movement and chairman of the All-Russian Union of Zemstvos. He formed a provisional government at the request of the provisional committee of the state дума in February 1917 following NICHOLAS II's abdication and was prime minister until KERENSKY replaced him in July of that year. He lived in exile in France after the Bolshevik seizure of power.

Lyautey, Louis-Hubert-Gonzalve (1854–1934) French soldier and colo-

nial administrator. A career officer, educated at Saint-Cyr, he served in Algeria, Madagascar and Indochina before being appointed French resident general in MOROCCO in 1912. He spent the next 13 years (with the exception of 1916–17, when he was war minister) as administrator of the protectorate. Lyautey maintained French control there during World War I and later was successful in a campaign against the Berber tribes of ABD EL-KRIM. As an administrator, he supported Arab traditions, helped to develop the economy, aided in the building of the port of Casablanca and extended the borders of the protectorate. Created a marshal of France in 1921, he resigned his colonial post in 1925.

lynching of Leo Frank Infamous case of American ANTI-SEMITISM. In April 1913 Mary Phagan, a 14-year-old employee of the National Pencil Co. in Atlanta, Georgia, was found brutally raped and murdered. Although penciled notes accused a black, suspicions fell on Leo Frank, the 29-year-old, Brooklyn-born Jewish manager of the company. An air of clamorous anti-Semitism pervaded the 30-day trial of Frank, who was found guilty and sentenced to death. For the next two years, the verdict was appealed as far as the U.S. Supreme Court, but rejected by all. In 1915 Georgia governor John M. Slaton, who had been petitioned to save Frank and presented with evidence that he was innocent, commuted his sentence to life imprisonment. On August 17, 1915, a group of men entered the prison in which Frank was incarcerated, and abducted and hanged him.

Lyons, Joseph Aloysius (1879–1939) Australian statesman, prime minister (1931–39). Born in Tasmania, he taught school there for 13 years before entering the Tasmanian legislature as a

Labour member in 1909. Serving as Tasmania's first Labour premier (1923–28), he was elected to the federal Parliament in 1929. He held cabinet posts until 1931, when he broke with the Labour Party over its economic policies and helped found the coalition United Australia Party. As prime minister, he was able to improve the nation's economy and expand its military forces in response to mounting threats from Japan.

Lysenko, Trofim Denisovich (1898–1976) Soviet agronomist and genetic theorist. Born in Karlovka, Lysenko attended the Kiev Agricultural Institute. During his early years at Odessa's Institute of Selection and Genetics, he worked on the vernalization of spring wheat, a moistening and cold treatment of seed that promotes early flowering. In the course of this work Lysenko became convinced that the acquired effects of vernalization could be inherited. From this faulty assumption, he went on to reject the accepted Mendelian theory of inheritance and to postulate the inheritance of acquired characteristics. This doctrine dovetailed with Marxist dogma regarding social and economic improvement, and Lysenko became a great favorite of STALIN. As president of the Lenin Academy of Agricultural Science (1938–56, 1961–62) and director of the Institute of Genetics of the Soviet Academy of Sciences (1940–65), he quashed all opposition and became the virtual dictator of Soviet genetics, with all teaching and textbooks in the USSR forced to reflect his views. Lysenko's career faltered and his ruinous effect on Soviet biological science lessened after the death of Stalin in 1953. He was completely discredited in 1965 after the retirement of KHRUSHCHEV.

M

Ma, Yo-Yo (1955–) French-born Chinese cellist. Born in Paris, Yo-Yo Ma began to study the violin, the viola and the cello when he was four years old, but soon began to specialize in playing the latter instrument. In 1960 at the age of five, Ma appeared in his first public recital. By 1962, after studying under the renowned cellist Janos Scholz for over a year, Ma enrolled in the prestigious Juilliard School of Music in New York City. For the next 11 years, he studied cello at Juilliard under the tutelage of Leonard Rose. In 1970 Ma gave his first performance in New York City, and shortly afterward made his national debut as a performer in a program organized by American composer Leonard Bernstein. Ma enrolled at Harvard University in 1972, where he studied music and graduated in 1976.

In his professional career, Ma has become well known for both live and

recorded performances. Over the past 27 years, he has developed a sterling reputation for his live performances of famous European composers ranging from Bach to Bartók, two of the composers whose works he recorded for Sony Records, the record company with which Ma has an exclusive contract. For his work on some 50 albums of recorded music, Ma has received 13 Grammy Awards.

Maastricht Treaty Also known as the Treaty of European Union. This treaty is a December 1991 agreement among the 12 members of the EUROPEAN COMMUNITY (EC) that called for the creation of a common currency and central bank among all EC members, as well as a common approach to defense, environmental and foreign policies. It also provided for the free transit of labor among EC states. It initially encountered some

opposition in countries such as France, Germany, Great Britain and Denmark, which had expressed concern over the effect of increasing foreign competition, relative currency devaluation through the creation of a single European currency known as the EURO, and reduced control over their national economies. However, only Denmark voted to reject the treaty in June 1992, before holding a second national referendum in May 1993, that resulted in Denmark's decision to join the EUROPEAN UNION (EU), the new international relationship created among EC members by the Treaty of Maastricht. On November 1, 1993, after all 12 members had ratified the treaty, the EU came into existence and assumed control over all the intergovernmental bodies created by the EC. The replacement of national currencies by the euro occurred in 1999, with the exception of the British, Danish, and Swedish national currencies.

Virtuoso cellist Yo-Yo Ma (PHOTOFEST)

Maazel, Lorin (1930–) American conductor. Born in Neuilly, France, Maazel was brought to the U.S. as a child. A musical prodigy, he studied violin, piano and conducting and made his conducting debut at age seven; by the time he was 15, he had conducted most of the major orchestras in the U.S. After studying philosophy, music and fine art at the University of Pittsburgh, he turned to music full-time. He has been director of the Berlin Radio Symphony Orchestra (1965–75), New Philharmonia Orchestra (1970–72, 1976–80), Cleveland Orchestra (1971–82), Orchestre National de France

(1977–82), Vienna State Opera (1983–84) and Pittsburgh Symphony Orchestra. In addition, he has served as guest conductor of other major orchestras throughout the world. Maazel is known for his superb baton technique, intellectual approach to music and polished performances. Particularly acclaimed for his interpretations of romantic works, he has an impressive repertoire that extends from Bach to STRAVINSKY, and has made many recordings. In 2002 Maazel became the music director of the New York Philharmonic Orchestra.

Macao Macao consists of a peninsula and two islands; the southernmost, Liha de Coloane, is connected to Liha da Taipa by a causeway, and Liha de Taipa is connected to the Chinese mainland of Macao by a bridge. The terrain is flat and essentially urban. There is no land suitable for cultivation. The Portuguese colonized Macao in 1557 and for 200 years the territory flourished as one of the world's major East-West trading posts for silks, gold, spices and opium. Britain's occupation of nearby Hong Kong in the mid-19th century undermined Macao's position as a trading center. In 1848 the Portuguese declared Macao independent from China, an assertion not recognized by the Chinese until 1887. In 1951 Portugal proclaimed Macao an Overseas Province. Macao suffered widespread rioting at the height of the CULTURAL REVOLUTION in China during the mid-1960s. The protests unnerved the Portuguese and served to increase Beijing's influence in the territory.

Shortly after the 1974 Portuguese revolution, the new government offered to return Macao to Chinese rule. China turned the offer down but indicated that it had a comprehensive plan to resume sovereignty over both Macao and HONG KONG. In early 1976 Portugal promulgated an "organic statute" granting Macao greater autonomy and providing for a directly elected minority on the 17-member legislative assembly. In February 1979 Portugal and China established diplomatic relations, with Macao defined as "Chinese territory under Portuguese administration." Sino-Portuguese talks opened in Beijing in June 1986 and ended 10 months later in the signing of a formal agreement on the reversion of Macao to China in 1999. The agreement was

based upon the "one country, two systems" principle that had formed the basis of China's negotiated settlement with the United Kingdom in 1984 concerning the future of Hong Kong. In elections in October 1988, three of the six directly elected seats on the legislative assembly were won by a pro-liberal grouping; the remaining seats were retained by the conservative Electoral Union group, which had gained four seats in 1984 elections. In 1999 the Portuguese territory reverted to Chinese rule as a Special Autonomous Region (SAR). Since reuniting with China, Macao's leadership has sought to improve the territory's educational system and to expand its tourist attractions, which include casinos and resorts, in an attempt to compete with fellow SAR Hong Kong for a greater share of the tourist market in Asia.

MacArthur, Douglas (1880–1964)

American general, widely considered one of the most brilliant military minds of the 20th century. Born in Little Rock, Arkansas, MacArthur was the son of a general and attended West Point, graduating at the head of his class in 1903. His early assignments took him to the PHILIPPINES and JAPAN, and he was an aide to President Theodore ROOSEVELT from 1906 to 1907. During WORLD WAR I he served with distinction in France: first as chief of staff of the 42nd (Rainbow) Division, then as commander of the 84th Infantry Brigade. After the war, promoted to the rank of brigadier gen-

U.S. Army general Douglas MacArthur (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

eral, he became superintendent of West Point (1919–22), where he raised military and academic standards. He held a variety of field commands from 1922 to 1930, when he was named a full general and appointed army chief of staff, a post he held for the next five years.

MacArthur was appointed adviser to the U.S. military mission in the Philippines in 1935. He retired from the U.S. Army in 1937 and spent four years building the nascent Philippine military. With war imminent, however, he was recalled to active duty in 1941 by President Franklin D. ROOSEVELT as commander of American forces in the Far East. MacArthur valiantly defended the Philippines from Japanese attack until February 1942, when he was forced to retreat but vowed to return. He was awarded the Medal of Honor and immediately posted to Australia as supreme Allied commander in the Southwest Pacific. He masterminded a brilliant campaign in New Guinea and was successful in recapturing the Philippines (October 1944–July 1945), wading ashore with his troops in October 1944. In December of that year, MacArthur became the army's first five-star general; the following April he was appointed commander of the U.S. Army in the Pacific. In this capacity, he accepted Japan's unconditional surrender on the U.S.S. *MISSOURI* on September 2, 1945. From 1945 to 1951 MacArthur directed the Allied occupation of Japan, modernizing and rehabilitating the defeated nation while introducing a new democratic constitution as well as democratic institutions and political practices. He antagonized many people in the U.S., however, with his austere and autocratic style. When fighting broke out in KOREA, he was appointed supreme UNITED NATIONS commander (June 1950). His typical strategic cunning was employed in the amphibious landings at INCHON, but he was surprised by the massive intervention of Chinese troops. Wishing to bomb CHINA and to check the spread of COMMUNISM in the Far East, MacArthur came into direct conflict with President Harry S. TRUMAN, who relieved him of command on April 11, 1951. Returning to the U.S., perceived as a farsighted hero by conservatives and a dangerous demagogue by liberals, he gave a dramatic speech to Congress defending his aims and policies. His presidential ambitions were quashed by his failure to

achieve the Republican nomination in 1952, and he then became a successful businessman. MacArthur published *Reminiscences* in 1964.

MacBride, Sean (1904–1988) Irish lawyer, politician and diplomat. MacBride was the son of the famed Irish beauty and revolutionary Maud Gonne (who inspired much of YEATS's poetry) and Gonne's husband, **Colonel John MacBride**, who was executed for his part in the 1916 EASTER RISING. Following in his parents' footsteps, Sean MacBride was active in the IRISH REPUBLICAN ARMY from 1917 until 1937. He then joined the Irish bar and became Dublin's most successful trial lawyer. In 1946 he founded a radical nationalist party, Clann na Poblachta, which helped oust the FIANNA FÁIL party two years later. From 1948 through 1951, he was the finance minister of the coalition government under which Ireland became an independent republic. He was a cofounder of AMNESTY INTERNATIONAL in 1961 and acted as secretary general of the International Commission of Jurists from 1963 to 1970. From 1974 to 1976 he was the UN commissioner for NAMIBIA. He shared the Nobel Peace Prize with Japanese statesman Eisaku SATO in 1974 and was awarded the Soviet equivalent, the Lenin Prize, three years later.

MacColl, Ewan (James Miller) (1915–1989) British folk singer and songwriter. He led the folk music revival in Britain in the 1950s and 1960s. He was also a cofounder, with Joan Littlewood, of the touring Theatre Workshop. One of his songs, "The First Time Ever I Saw Your Face," won a Grammy Award for American singer Roberta Flack in 1972.

MacDiarmid, Hugh (pen name of **Christopher Murray Grieve**) (1892–1978) Scottish poet and essayist. MacDiarmid, one of the greatest Scottish poets of the 20th century, was especially well known for his effort to revive the neglected Scottish language. He was educated in his home town of Langholm, Scotland, as well as in Edinburgh. His earliest writings were journalistic in nature, supporting left-wing political issues and cultural and political independence for Scotland. His first major work was the long poem *A Drunk Man Looks at the*

Thistle (1926). Other volumes of MacDiarmid's verse include *To Circumjack Centcrastus* (1930), *First Hymn to Lenin and Other Poems* (1931), *Scots Unbound and Other Poems* (1932) and *In Memoriam James Joyce*. MacDiarmid was awarded the Foyle Poetry Prize and the Fletcher of Saltoun Medal, as well as an honorary doctoral degree from Edinburgh University. *Collected Poems* appeared in 1962; *Selected Essays*, in 1969.

MacDonald, Dwight (1906–1982) American essayist, critic and editor. He is known for his witty and acerbic writings on culture, politics and film. While a writer for *Fortune* magazine (1929–36), MacDonald became a committed socialist and Trotskyite. (See LEON TROTSKY.) A leading figure in American left-wing intellectual circles during the 1930s and 1940s, he was associated with the PARTISAN REVIEW from 1938 to 1943. A pacifist, he opposed WORLD WAR II, and in the 1960s was an outspoken critic of American involvement in the VIETNAM WAR. He was a longtime staff writer for *The NEW YORKER* (1951–71) and a film critic for *Esquire* (1960–66).

MacDonald, J(ames) E(dward) H(ervey) (1873–1932) Anglo-Canadian painter and poet. Born in England, he emigrated to Canada in 1887. As a member of Canada's GROUP OF SEVEN, he sought to portray the natural splendors of his new homeland, painting north country panoramas in stylized forms and vivid colors. In his verse, MacDonald was strongly influenced by the 19th-century Americans Henry David Thoreau and Walt Whitman.

MacDonald, John D(ann) (1916–1986) U.S. author. Over the course of a 40-year writing career, he wrote dozens of books—most of them mysteries. His best-known character was the detective Travis McGee, a tough, cynical expert in salvaging who lived on a Florida houseboat. McGee appeared in 21 books published between 1964 and 1985. Each of those books bore a title that included a color.

MacDonald, Margaret (1865–1933) British-born artist-designer. She worked closely with her sister Frances MacDonald from 1894 until her marriage to Charles Rennie MACKINTOSH in 1900. MacDonald was educated at the Glas-

gow School of Art, where she met Mackintosh. Her reputation is based primarily on her watercolor paintings and book illustrations, as well as her collaboration in textile design with Mackintosh. After she and Mackintosh relocated to London in 1916, her work as a painter sustained them as his career tapered off in his later years.

MacDonald, (James) Ramsay (1866–1937) British Labour Party leader, prime minister of the UNITED KINGDOM (1924; 1929–35). MacDonald, born in poverty in the Scottish village of Lossiemouth, settled in England in 1886. An outspoken advocate of socialism, he joined the Independent Labour Party in 1894 and in 1900 became secretary of the newly formed LABOUR PARTY. He was elected Member of Parliament for Leicester in 1906 and then held the seat until 1918. MacDonald ably led the parliamentary Labour Party from 1911 until 1914, when his pacifist views cost him his influence at the outbreak of WORLD WAR I. Elected again in 1922 for Aberavon, he was reelected leader of the parliamentary party, thereby heading the Opposition. In a general election called by Stanley BALDWIN, MacDonald became Britain's first Labour prime minister (January 1924); he also served simultaneously as foreign secretary. Following the publication of the ZINOVIEV LETTER urging a communist overthrow in Britain, the Labour Party was accused of pro-communist sympathies, and the Conservatives were reelected to power in November 1924.

MacDonald again became Labour prime minister from 1929 to 1931. However, the worsening financial situation caused a split in the party (see GREAT DEPRESSION). MacDonald resigned and then formed a coalition with the Conservatives and Liberals, known as the NATIONAL GOVERNMENT, which he headed from 1931 to 1935. Labour Party loyalists viewed MacDonald's formation of the National Government as a betrayal of Labour principles and felt that social ambition had wooed him away from his working-class origins. Although MacDonald maintained a Labour influence in foreign affairs and defense issues, the Conservatives dominated domestic affairs. MacDonald resigned in 1935 and was again succeeded by Baldwin. He remained in the cabinet

as Lord President of the Council until his death on a vacation cruise. In his prime MacDonald was a skillful administrator with hopes for world peace through the LEAGUE OF NATIONS. His later years were troubled by declining health and disillusionment.

MacDowell Colony In New Hampshire, a permanent summer retreat for writers, composers and artists. Originally a farm, it was purchased in 1896 by composer Edward MacDowell as a retreat. Following his death in 1908, a fund was formed and used to establish the colony. Considered a Mecca for creative artists, it is one of the longest-lasting art colonies in the country. The colony's distinguished roster of fellows includes poet Edwin Arlington ROBINSON, novelist Thornton WILDER, composer Leonard BERNSTEIN and artist Milton AVERY.

Macedonia Formerly the southern half of YUGOSLAVIA and now an independent republic (1991–). After the BALKAN WARS of 1912 and 1913 and the breakup of the OTTOMAN EMPIRE Macedonia was freed from Turkish

control and subsequently divided up between Greece, Bulgaria and Serbia. After World War I Serbia joined the

Kingdom of Yugoslavia, the southern province including all of what is present-day Macedonia. During World

MACEDONIA

1912–13	After the First Balkan War, Macedonia is partitioned between Bulgaria, Greece and Serbia.
1918	The Serbian part of Macedonia is included in what will become Yugoslavia.
1941–44	Macedonia is occupied by Bulgaria.
1945	Marshal Tito becomes premier of liberated Yugoslavia. Collectivization and mass purges are undertaken by the Communist-dominated government.
1953	Tito is elected president of Yugoslavia.
1980	Tito dies.
1991	Following a referendum, Macedonia proclaims independence and adopts a new constitution.
1992	Macedonia sees the peaceful withdrawal of the Yugoslav army, making Macedonia the only Yugoslav republic to achieve independence without war.
1993	The nation becomes a member of the UN.
1995	The nation becomes a member of the European Council.
1999	Nearly 250,000 ethnic Albanians from Kosovo seek refuge in Macedonia when NATO begins a campaign of air strikes against Yugoslavia.
2001	The Albanian National Liberation Army begins an insurgency from Kosovo, soon controlling territory in northern and western Macedonia. A peace agreement is signed in August.
2005	Macedonia becomes a candidate for membership in the European Union.

War II the Axis powers occupied the area, and Macedonia was divided between Bulgaria and Italy. At the end of the war Macedonia became a republic within the communist Federal Republic of Yugoslavia, run by Marshal TITO, who ruled the country until his death in 1980. The first noncommunist government since 1945 was elected in 1990, and in 1991 the country peacefully seceded from Yugoslavia and declared independence. In 1993 it joined the UN and in 1995 the Council of Europe. Macedonia managed to remain peaceful through the Yugoslav wars of the early 1990s but was destabilized later in the decade due to the influx into the country of 250,000 Albanian refugees from the conflict in the neighboring Serbian province of Kosovo. In 2001 an Albanian paramilitary group started an insurgency in Kosovo and soon controlled the north and west portions of Macedonia. The war was ended that same year by the intervention of a NATO peacekeeping force. Macedonia officially became a candidate in 2005 for membership in the European Union.

MacEntee, Sean (1889–1984) Irish nationalist and politician. MacEntee was a cofounder of the Irish Republic and the last surviving member of the first government established by the FIANNA FAÏL party of Eamon DE VALERA (see IRELAND). He fought against the British in the 1916 EASTER REBELLION and was sentenced to death but reprieved at the last minute and released from prison (with de Valera) under a general amnesty (1917). MacEntee was elected to the parliament of the Irish Free State in 1927. During his career he held a total of 27 posts in Fianna Fail governments, including those of finance minister and deputy prime minister. He retired in 1969.

Machine Art Term used in art history and criticism to describe the relationship that developed in the 1920s and 1930s linking many modern artists with the increasing role of industrial machinery in production and its influence on products and the environment. The concept of the house as a machine for living was expressed by LE CORBUSIER, and artists such as Marcel DUCHAMP incorporated machine-made elements into their work. With the inclination of MODERNISM to turn away from ornament, the actual

forms of machines and mechanical parts came to be seen as having aesthetic value in their own right. In 1934 the MUSEUM OF MODERN ART, New York City, mounted an exhibit titled *Machine Art* in which such objects as springs, ball bearings and boat propellers were exhibited as art. Also shown were designed objects with strongly mechanistic character such as plumbing components, tools, instruments and utensils, as well as designed items with machinelike qualities such as clocks and furniture. In its effort to find an expressive quality suited to the technological nature of modern life, the Modern movement has had a continuing interest in the machine. The catalog of the *Machine Art* exhibit and the book *The Machine Age in America 1918–1941*—published in connection with an exhibition at the Brooklyn Museum dealing with this subject—are excellent reviews of the way mechanical devices have affected design and art.

Machito (Frank Grillo) (1915–1984) Cuban-born bandleader. Machito moved to the U.S. in 1937 and pioneered the use of complex Latin rhythms in JAZZ in the early 1940s. His New York-based band, the Afro-Cubans, influenced such jazz greats as Dizzy GILLESPIE and Charlie PARKER. Machito's influence also extended through the Latin dance music known as Salsa, which was popular at the time of his death.

MacInnes, Helen Clark (1907–1985) Scottish-born novelist known for her stories of intrigue and espionage. MacInnes immigrated to the U.S. in 1937 with her husband, classics scholar Gilbert Highet. She began writing in the early 1940s. Several of her novels are set during WORLD WAR II, while others involve COLD WAR espionage. Her books were translated into 22 languages, and four were made into films, including the bestselling *Above Suspicion* (1941; filmed 1943), *The Venetian Affair* (1963; filmed 1966) and *The Salzburg Connection* (1968; filmed 1972).

Mack, Connie (1862–1956) American baseball owner-manager. Mack began his 60-year baseball career as a catcher, primarily with the Pittsburgh Pirates. He became player-manager of the team in 1894 and retired from both positions two years later. In 1901 he took on the job of managing the Philadelphia Athletics (known as the As), an entry in

the newly formed American League. They quickly emerged as the team to beat, topping the league in six of its first 14 seasons. He led the As to five World Series championships in nine fall classic appearances and went on to post a record 3,776 wins—and 4,025 losses. Mack was named to the Baseball Hall of Fame in 1937 and retired 13 years later in 1950, having managed the As for 50 years.

Mack, Walter Staunton (1895–1990) U.S. businessman. Mack built Pepsi into the second-most popular soft drink in the U.S. after COCA-COLA. He served as president and chairman of Pepsi-Cola Co. (1951–83), helping to turn the small softdrink firm into a major business through a combination of clever advertising and promotional activities. He resigned from the firm following a series of disputes with the board of directors over his promotional campaigns and went on to head several other companies.

Macke, August (1887–1914) German painter. Born in the Ruhr Valley, he studied at the Academy of Düsseldorf. He traveled to Paris several times from 1907 on and was deeply influenced by such French movements as CUBISM and FAUVISM and by the orphism of Robert DELAUNAY. In Munich in 1909 Macke met KANDINSKY and MARC; in 1911 he became a founding member of the BLAUE REITER group. A major figure in German EXPRESSIONISM, Macke employed luminous color and linear pattern in defining a very personal view of landscapes, cityscapes and figures. He traveled to Tunisia with Paul KLEE in 1914, producing subtly transparent watercolors in vividly heightened colors. His brilliant career was cut short on a battlefield in France during WORLD WAR I.

Mackenzie, Compton (1883–1973) British novelist and autobiographer. Mackenzie was one of the most widely read British fiction writers of the first half of the 20th century, and his novels continue to find a readership to this day. Educated at St. Paul's School and at Oxford University, Mackenzie began his writing career in the 1900s as a poet before enjoying success with his first novel, *The Passionate Elopement* (1911). Two other best sellers followed quickly—*Carnival* (1912) and *Sinister Street* (1913–14). Mackenzie served in British

naval intelligence during WORLD WAR I, an experience he chronicled in *Athenian Memories* (1931) and which formed the basis of two later novels, *Water on the Brain* (1933) and *Whisky Galore* (1947). Mackenzie was knighted in 1952.

Mackintosh, Charles Rennie (1868–1928) Scottish architect and designer. Born in Glasgow, he was trained as an architect. In the early 1890s he became one of the first Britons to use the ART NOUVEAU style, employing it in decorative and graphic arts as well as in such architectural works as the Glasgow School of Art (1898–99), where he merged it with native Scottish traditions. Some of the finest of his Art Nouveau efforts are in the architecture, interior decor, furniture and murals of the four Miss Cranston's Tearooms in Glasgow (1896–1901). He is also noted for a number of turn-of-the-20th-century Scottish country houses that updated the 17th-century manor style. These include Windyhill (1899–1901) and Hill House (1902–03). A participant in the Vienna Secession exhibition (1900), he influenced the development of 20th-century European architecture.

MacLeish, Archibald (1892–1982) American poet, playwright and statesman. Educated at Yale (B.A., 1915) and Harvard (LL.B., 1919), MacLeish gave up his law practice to join the LOST GENERATION of American expatriates in PARIS in 1923. His poems of this period show the influence of POUND, T. S. ELIOT and the symbolists. After his return home in 1928, he became an increasingly public figure, and his poetry reflected this sense of social commitment. A passionate critic of President Herbert HOOVER and an outspoken foe of NAZISM, MacLeish joined President Franklin D. ROOSEVELT's NEW DEAL administration. He was librarian of Congress (1939–44), assistant director of the Office of War Information (1942–43) and assistant secretary of state (1944–45). He represented the U.S. in the organization of UNESCO and from 1949 to 1962 taught at Harvard. MacLeish won three PULITZER PRIZES for his poetry and drama; *Conquistador* (1932), *Collected Poems: 1917–1952* (1953) and *J.B.: A Play in Verse* (1959). *Collected Poems* also won the BOLLINGEN PRIZE and a National Book Award. His screenplay for *The Eleanor Roosevelt Story* received an ACADEMY

AWARD in 1966. In his later years he also protested against MCCARTHYISM and the VIETNAM WAR.

MacLennan, (John) Hugh (1907–1990) Canadian writer. A novelist and essayist, he was the author of seven major fiction works. His novel *Two Solitudes* (1945) became a symbol of the conflict between English- and French-speaking Canadians. His other works include *The Watch That Ends the Night* (1959) and *The Colour of Canada* (1967).

MacLeod, Roderick (1892?–1984) British officer in WORLD WAR II. He organized two top-secret operations to mislead the Germans about Allied invasion plans. Using limited personnel and equipment to simulate large-scale troop movements, and leaking false information about these movements, MacLeod created “phantom armies” in Britain during 1943–44. The first ruse led the Germans to expect an invasion in Norway, where they diverted troops. The second caused the German high command to expect the D-DAY landings to come at CALAIS rather than NORMANDY as they actually did on June 6, 1944. Both deceptions played a significant role in the success of the Allied INVASION OF NORMANDY.

MacLiammoir, Micheal (Micheal Wilmore) (1899–1978) Irish theatrical actor, set designer and playwright. MacLiammoir, one of the major figures in the 20th-century Irish theater, began his acting career as a child. He first achieved renown through founding, with Hilton EDWARDS, the GATE THEATRE in Dublin in the 1920s. MacLiammoir created striking set designs—influenced by the ART DECO style of artists Aubrey Beardsley and Leon BAKST—for more than 300 productions at Dublin Gate. He also appeared there as Romeo, Hamlet and Othello, among other leading roles. MacLiammoir achieved international success with three one-man shows: *The Importance of Being Oscar* (1960), a tribute to Oscar Wilde; *I Must Be Talking to My Friends* (1963); and *Talking about Yeats* (1970).

Macmillan, (Maurice) Harold (1894–1986) British statesman, prime minister of the UNITED KINGDOM

(1957–63). Born in London, Macmillan was the grandson of the founder of the Macmillan publishing house. Educated at Eton and at Balliol College, Oxford, he served in the Grenadier Guards in WORLD WAR I and was wounded three times. A member of the CONSERVATIVE PARTY, he entered politics after the war and was elected to Parliament in 1924 for the constituency of Stockton. Except for two brief periods, he served in the House of Commons for the next 40 years.

In the 1920s Macmillan built a reputation as a leading progressive within the party. In the mid-1930s he joined Winston CHURCHILL in criticizing the foreign policy of the BALDWIN and CHAMBERLAIN governments—particularly Chamberlain's policy of APPEASEMENT toward Adolf HITLER's GERMANY. He served in Churchill's government in 1940 as a junior minister before entering the cabinet in the special post of resident minister in North Africa. Later during WORLD WAR II he was also responsible for Britain's relations with her Allies in the Mediterranean and the Balkans, and served as liaison between Churchill and General Dwight D. EISENHOWER.

Minister of housing from 1951 to 1954, he subsequently served as defense minister (1954–55), foreign secretary (1955) and chancellor of the exchequer (1955–57). He succeeded Anthony EDEN as prime minister following Eden's resignation over the SUEZ CRISIS. Macmillan held office during a period of apparent economic prosperity, although there were some troubling signs in the British economy. In his famous WIND OF CHANGE speech (1960), Macmillan was the first British prime minister to publicly acknowledge and accept the fact that the BRITISH EMPIRE was no longer viable. He presided over the independence of a number of British colonies, mostly in Africa. Widely respected both at home and abroad, Macmillan reestablished good relations with the U.S. after the U.S. rebuke of Britain over the Suez affair. His personal friendships with U.S. presidents and John F. KENNEDY helped maintain British prestige even after it was clear that Britain was no longer a world power. Macmillan resigned after the PROFUMO AFFAIR brought about domestic criticism of his government. In retirement, Macmillan was revered as an elder statesman. After turning down

honors on several occasions, he accepted a life peerage as the Earl of Stockton in 1984.

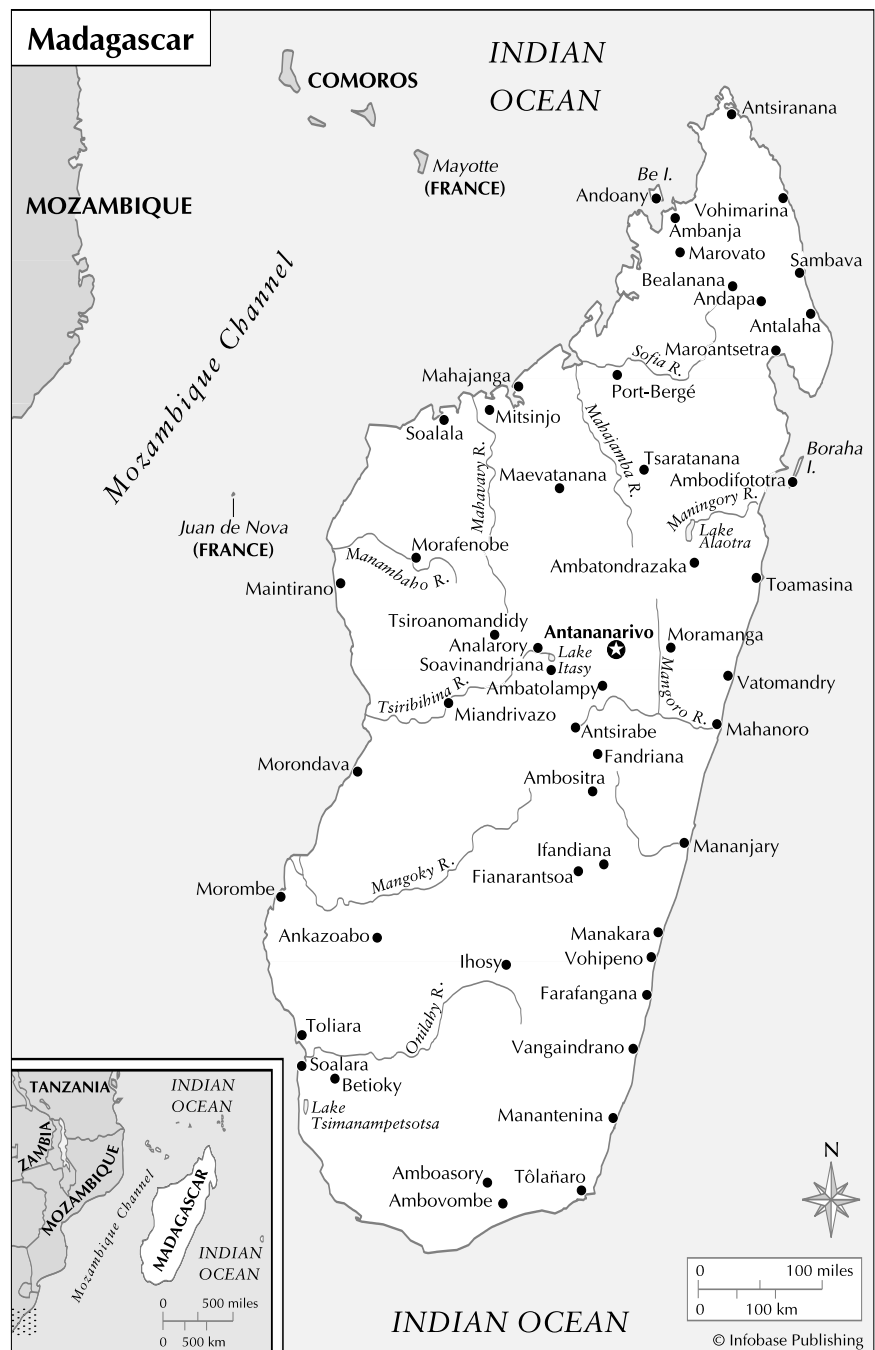

Macmillan, Kenneth (1929–1992) British dancer, choreographer and ballet director. Macmillan, one of the major choreographers of the 20th century, began his career as a dancer with Sadler's Wells Theatre Ballet (1946) and Sadler's Wells Ballet (1948). After 1952 he worked for both companies and choreographed his first ballet, *Dances Concertantes*, in 1955. In 1958 he began working with ballerina Lynn Seymour, who became the inspiration for such ballets as *Baiser de la Fée* (1960) and the popular *Romeo and Juliet* (1965). Appointed resident choreographer of the Royal Ballet in 1965, he also served as director of the German Opera Ballet in Berlin from 1966 to 1969. He directed the Royal Ballet from 1970 to 1977, creating such works as the innovative *Anastasia* (1971), *Manon* (1974) and *Elite Syncopations* (1974) for that company. He became artistic associate of AMERICAN BALLET THEATRE in 1984 and has choreographed and staged his ballets for many other companies.

MacNeice, (Frederick) Louis (1907–1963) Anglo-Irish poet, playwright and translator. Born in Belfast, the son of an Anglican bishop, MacNeice attended Marlboro public school in England before going to Oxford in the late 1920s. At Oxford he was a prominent member of W. H. AUDEN's circle and briefly shared the left-wing sympathies of Auden, Stephen SPENDER and C. DAY LEWIS. Ultimately, however, he was skeptical of all political systems. After graduating with a first in classics, he taught at Birmingham University and at Bedford College, University of London. From 1941 until his death he wrote and produced features, including numerous radio plays, for the BBC. MacNeice's poems view modern urban life through an introspective and ironic sensibility; the often playful lyricism of his work is matched by formal grace, moral intensity and philosophical seriousness. His translations of Aeschylus and Goethe are highly regarded. Somewhat shy, puritanical and conscious of his Northern Irish roots, MacNeice always felt distanced from the English society in which he moved, despite his success. During his lifetime he was overshadowed by

Auden, but since his death his work has been reevaluated, and he is now regarded as a major literary figure in his own right, especially in Britain and Ireland. MacNeice's unfinished autobiography, *The Strings Are False*, was published posthumously in 1966, and his *Collected Poems* were issued the following year.

Madagascar (Democratic Republic of Madagascar) Madagascar, which comprises the main island and several

smaller islets, is located in the Indian Ocean, off the southeast coast of Africa. France made Madagascar a colony in 1896, but Malagasy resistance flourished, resulting in brutal French suppression of riots in 1898–1904 and 1947–48. The country achieved autonomy in 1958, full independence in 1960. Philibert Tsiranana was president of the First Republic (1960–72) but resigned after protests and economic problems grew. An interim military

MADAGASCAR

1960	Madagascar becomes a sovereign and independent state within the French Community as the Malagasy Republic, with Philibert Tsiranana as president.
1975	The directorate is superseded by the Supreme Revolutionary Council, headed by Commander Didier Ratsiraka.
1986	Violent demonstrations take place in Toamasina in response to food shortages and the government austerity program. Student protests erupt at the University of Madagascar in Antananarivo.
1987	Rioting breaks out. Indian and Pakistani traders are attacked owing to resentment of their comparative wealth during a period of increased poverty.
1988	Prime Minister Desire Rakotoarijaona resigns and is replaced by Victor Ramahatra.
1989	President Ratsiraka is reelected with more than 60% of the vote.
1993	Albert Zafy, a doctor, is elected president in the first free elections under the new constitution.
1996	In September the National Assembly impeaches President Zafy for failure to renegotiate favorable terms with the International Monetary Fund. Zafy steps down in October. Ratsiraka wins the December presidential elections.
2001	Opposition candidate Marc Ravalomanana claims victory in presidential elections and charges Ratsiraka with rigging election results.
2002	Violence between rival protesters breaks out after Ravalomanana declares himself president in February. In April the Constitutional High Court names Ravalomanana as winner of the December elections after a recount.

regime dissolved parliament and closed foreign military bases. The present Democratic Republic was formed in 1975 with Didier Ratsiraka as president. He has moved the country toward socialism, but economic problems, regional rivalries, coup attempts and brutal suppression of demonstrations have plagued his regime. During the kung fu riots (1984, 1985) several people died as the government suppressed the martial arts cult. In 1987 many Indians and Pakistanis left the country in the face of prejudicial attacks. Although democratic reforms were introduced into the constitution in 1992, Madagascar has remained politically unstable, fluctuating between the control of Ratsiraka and his opponents. In 1993 Ratsiraka was defeated by Albert Zafy in the first multiparty elections. Zafy failed to make improvements and was impeached in 1996. Ratsiraka was reelected in the ensuing elections. The 2001 elections resulted in controversy when opposition leader Marc Ravalomanana's claim to victory was disputed

by Ratsiraka. Madagascar's high court ruled in favor of Ravalomanana, who survived a coup attempt in 2003 to continue as president.

Madariaga, Salvador de (1886–1978) Spanish author and diplomat. Madariaga was Republican SPAIN's ambassador to the U.S. (1931) and its delegate to the LEAGUE OF NATIONS (1932–34). He was a leading critic of Generalissimo Francisco FRANCO and left Spain at the outbreak of the SPANISH CIVIL WAR.

Madonna (1958–) American musician and actress. Born Madonna Louise Ciccone in Bay City, Michigan, she studied dance on a scholarship at the University of Michigan before leaving the university at the end of her sophomore year to pursue a career in music in New York City, where she performed with a band at clubs. In 1983 she recorded her first album, *Madonna*, which contained the popular singles "Lucky Star," "Borderline," and "Holiday," all of which be-

came popular singles by the end of 1984. Madonna followed the success of her first album with several others, in-

Pop star Madonna in a poster for her controversial 1991 documentary, *TRUTH OR DARE* (PHOTOFEST)

cluding *Like A Virgin* (1984), *True Blue* (1986), *Like A Prayer* (1989), *Bedtime Stories* (1994), *Ray of Light* and *Confessions on a Dance Floor* (2005).

In addition to her music career, Madonna has also regularly appeared in motion pictures. In 1985 she made her on-screen debut in *Desperately Seeking Susan*, a comedy in which she played Susan, a woman attempting to evade her boyfriend (Aidan Quinn). In the 1980s Madonna followed *Susan* with *Shanghai Surprise* (1986) and *Who's That Girl?* (1987). In 1990 she starred in her first major motion picture, *Dick Tracy*, in which she played Breathless Mahoney, a nightclub singer who later proves to be an assassin. Following *Dick Tracy* Madonna appeared in *Shadows and Fog* (1992); *A League of Their Own* (1992); *Body of Evidence* (1993); *Evita* (1996)—for which she won a Golden Globe award in 1996 for best actress in a musical or comedy—*The Next Best Thing* (2000); *Swept Away* (2002) and the James Bond film *Die Another Day* (2002).

madrassa Arabic for “school.” An Islamic school for Muslim students designed to educate Islamic children in the practices and teachings of their faith. Madrassas separate male and female students into separate class meetings to discuss the Koran and instruct them in Arabic grammar and Islamic law and history. Following the terrorist attacks of SEPTEMBER 11, 2001, the madrassas organized in South Asia by the DEOBANDI sect of Islam were criticized for indoctrinating their students in ISLAMISM, a fundamentalist Islamic movement that required a strict application of Islamic law and the removal of all non-Muslim elements from society. It was also alleged that these Deobandi-sponsored madrassas served as recruiting grounds for the terrorist group AL-QAEDA that arranged the terrorist attacks of September 11, 2001.

Maeght, Aimé (1906–1981) French printer, art dealer and art promoter. During half a century as an art dealer, Maeght promoted the careers of such leading European artists as Joan MIRO, Alberto GIACOMETTI, Georges BRAQUE and Henri MATISSE. He persuaded many of them to produce lithographs of their work in order to reach a broader public. In 1964 he founded the Foundation

Marguerite et Aimé Maeght, an innovative museum.

Mafia Secret society of organized crime. Formed in medieval Sicily to fight French oppression of Italians, the name is an acronym of *Morte alla Francia Italia anela!* (Death to the French is Italy's Cry!). The organization evolved into a strongarm group with considerable local autonomy and assumed its criminal identity in 19th-century Sicily. There, in spite of regular campaigns against it (notably by Benito MUSSOLINI), it came to have the tremendous political and social control that it maintains to this day. The Mafia arrived in the U.S. with Sicilian immigrants in the late 1800s. The first killing in the U.S. that is attributed to the Mafia supposedly occurred in Louisiana in 1889 at the beginning of a waterfront war in New Orleans between Sicilian and Neopolitan gangsters. That war is said to have marked the Mafia's entry into big-time U.S. crime. The organization was soon operating in many large cities, often preying on the Italian immigrant community. During PROHIBITION (1920–33) the Mafia grew enormously, controlling the bootleg liquor business and running such enterprises as prostitution, loansharking, gambling and narcotics. As in Sicily, it has over time also taken control of a number of legitimate businesses in America, although their identity remains shadowy. The U.S. Mafia is comprised of a number of regional “families” operating in recognized territories. The American history of the group includes bloody struggles for the control of families as well as a modernization movement, which was largely engineered by “Lucky” LUCIANO, and which brought the Mafia closer to other, non-Italian factions of organized crime. Also referred to as the Cosa Nostra (Our Thing), it comprises an estimated 24 families and remains a dominant force in criminal activities in contemporary America.

Magic Code name for material derived from the breaking of the Japanese diplomatic code, a feat accomplished by American cryptographic experts in 1940. The information produced by the Magic operation was vital to Allied success in a number of areas related to Axis activities. These included data on plans for Japanese KAMIKAZE attacks on U.S. warships, intelligence on German coastal

defenses in the event of an Allied invasion of Occupied France, information on the development and locations of Germany's lethal V-2 rockets and facts about the spying activities in the U.S. of Spanish diplomats working for Japan.

Magic Mountain, The The most famous novel (1924) of German author Thomas MANN. Its central protagonist, Hans Castorp, is a young German burgher with solidly bourgeois values who has just completed his college studies and is planning, at the outset of the novel, to embark upon an engineering career. But the course of Castorp's life is changed when he goes to visit his tubercular cousin who is residing in a sanatorium high on a mountain—metaphorically, the “Magic Mountain” of the title. While paying his visit, Castorp himself is diagnosed by a physician as suffering from tuberculosis. As a result, his planned visit of three weeks extends on for seven years. In the course of his stay, Castorp grows spiritually as a result of his new, removed perspective of the world. He and his fellow tuberculosis victims, who engage in protracted philosophical dialogues on the declining state of European civilization, come to symbolize the detached helplessness of Western intellectuals confronted with historical forces that they can dissect and judge but never control. Mann's novel is thus a portrait of the conditions in Europe that led to WORLD WAR II.

magic realism (art) A style of figurative painting prevalent in the U.S. during the 1930s and, to a limited extent, in the 1940s and 1950s. Considerably influenced by the heightened sensibilities and distortions of SURREALISM, it is characterized by subject matter taken from everyday life. These images are elevated to the extraordinary by their portrayal in minutely precise details and excruciatingly brilliant light. Painters drawn to this style include Ivan Le Lorraine ALBRIGHT, Peter Bloom and Philip EVERGOOD. Among later practitioners of magic realism are the painters George TOOKER and Paul Cadmus.

magic realism (literature) Literary movement centered in Latin America. Magic realism is a school of fiction that calls for the narrative intermingling of realistic portrayals of social conditions

along with mythic fantasy. A key precursor of magic realism was William FAULKNER, whose novels frequently drew upon the inner dreams and reveries of his characters while providing a detailed and realistic portrait of life in the American South. The generation of Latin American novelists that rose to prominence in the 1960s—notably Miguel Angel ASTURIAS of Guatemala, Julio CORTAZAR of Argentina, Carlos FUENTES of Mexico, Guillermo Cabrera Infante of Cuba and Gabriel GARCÍA MÁRQUEZ of Colombia—became the key proponents of magic realism as a distinct literary school. *One Hundred Years of Solitude* (1970) by García Márquez, with its family chronicle structure overlaid with fantasies and dreams, is perhaps the leading exemplar of the methods of magic realism.

Maginot Line French fortification system running for 200 miles along the Franco-German border from Switzerland to Belgium. Consisting mainly of entrenchments and underground forts, it was built from 1930 to 1934 and was named for André Maginot (1877–1932), French minister of war during the first years of its construction. It was built to act as an impregnable barrier to German invasion—built by a militarily and emotionally exhausted France that was intent on using it as a deterrent to avoid another Great War. During WORLD WAR II, this fixed line was easily flanked by German armored forces, which advanced through Belgium in 1940. Its failure led to the fall of FRANCE in June of that year. The Maginot Line has come to be symbolic of fixed defensive positions that are open to mobile attack, and of the false sense of security that such lines can provide.

Magritte, René (1898–1967) Belgian painter and art theorist. Magritte first won international attention in the 1920s as one of the most original painters in the school of SURREALISM. Heavily influenced by the metaphysical paintings of Giorgio de CHIRICO, Magritte developed a style laden with dreamlike imagery that was quietly poetic in tone, without the violent elements that marked much Surrealist painting of the period. Magritte sometimes painted verbal statements onto his canvasses to accompany his pictorial images, as in the case of his famous painting *The Wind and the Song*

(1928–29), which portrays a pipe below which is written “*Ceci n’est pas une pipe*” (This is not a pipe). Other renowned canvasses by Magritte include *The Conqueror* (1925), *The Lovers* (1928) and *The Key of Dreams* (1930).

Mahathir bin Mohammad, Datuk Seri (1925–) Malaysian politician, member of the Malaysian House of Representatives (1965–69), and Senate (1973–75), minister of education (1974–78) and trade and industry (1978–81), and prime minister of Malaysia (1981–2003). Born in Alur Setar, Mahathir began his political career in 1965 when he was elected to parliament. However, he was defeated when he ran for reelection in 1969. Shortly after those elections, riots broke out in Malaysia protesting the leadership of Prime Minister TUNKU ABDUL RAHMAN. Mahathir soon joined in the public criticism of the Tunku with his book *The Malay Dilemma* (1969). After serving in the Malaysian Senate, Mahathir became minister of education in 1974. In 1978 he became minister of trade and industry, from which post he sought increasing access to foreign markets for Malaysian exports and increased investment in Malaysian facilities.

In 1981 Mahathir became prime minister and was appointed the president of the United Malays National Organization (UNMO). He guided the National Front parliamentary coalition, in which UNMO was the principal party, to successive victories in the 1982, 1986, 1990, 1995 and 1999 national elections. He also became increasingly involved in promoting Malaysia’s participation in the Association of Southeast Asian Nations (ASEAN) and the ASIA-PACIFIC ECONOMIC COOPERATION (APEC) forum. When the Asian-Pacific region was plunged into an economic crisis in 1997, Mahathir came under fire for his lavish spending on such projects as the world’s tallest building, the Petronas Towers. Additionally, some economists expressed concern that his efforts to insulate the Malaysian currency from attacks from international speculators would lead to a weakened economy. However, the Malaysian currency and domestic market recovered fairly rapidly, compared to other Asian-Pacific countries like Japan. In 2003 after a series of antigovernment protests, and after angering several foreign governments with statements widely interpreted as anti-Semitic, Mahathir left office.

Mahfouz, Naguib (1911–2006) Egyptian novelist, playwright and screenwriter. A prolific author familiar to the Arab-speaking world, Mahfouz was relatively unknown to Westerners when he became the first Arabic writer to receive the NOBEL PRIZE in literature (1988). He first received acclaim for the novel *Madaq Alley* (1947) but is best known for *The Cairo Trilogy* (1956–57). Mahfouz’s novels are realistic works generally portraying the lower and middle classes of Cairo. Mahfouz was criticized in Arabic countries for his moderate stance toward Israel (he received death threats), and his books were banned by religious leaders for what was perceived as his condemnation of Islam.

Mahler, Gustav (1860–1911) Conductor and composer most famous for his large-scaled, intensely romantic yet intricately crafted symphonic works. In Arnold SCHOENBERG’s words, he was “a man in a torment of emotion exerting himself to gain inner harmony.” Born in Kalischt, Bohemia (then part of the Austro-Hungarian Empire), Mahler’s musical precocity led to his enrollment in the Vienna Conservatory in 1875. Because his early efforts, including his First Symphony (1889), were rebuffed, he began a successful career as an opera conductor in, successively, Laibach, Olmütz, Kassel, Prague, Leipzig, Budapest and Vienna (where he served as artistic director at the Imperial Opera from 1897 to 1907). Driven, often ruthless in his quest for perfection, he virtually revolutionized modern operatic production. However, he seemed to live primarily for those times when he could escape the opera stage and spend his

Composer Gustav Mahler (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

summers in Steinbach or Maiernigg or Toblach composing his 10 symphonies. These works, in the judgment of historian David Ewen “are the last word in German Romanticism,” struggling to convey in tones “the meaning of life and death, of the universe and nature, of eternal love and fate, of suffering, and resignation, and of resurrection.” Mahler once told Jean SIBELIUS that “a symphony must embrace the world.” His symphonies frequently drew upon songs he had composed to the texts of the Brentano-Arnim German folk poetry collection, *Das Knaben Wunderhorn* (*The Youth's Magic Horn*, 1805–08)—a strange world of talking animals, macabre jests, haunted forests and military marches.

In 1907 fate delivered three hammer blows to Mahler: the death of his daughter Maria, his departure from the Vienna Opera, and the medical diagnosis of a grave cardiac deficiency. He wrote: “At the end of my life, I must go back to living like a beginner and learn again how to stand.” He underwent psychoanalysis with Sigmund FREUD, and in 1908 accepted the post of director of the Metropolitan Opera in New York City. During his few years in New York he conducted exceptional performances of operatic and orchestral works, but he returned to Vienna after wearying of disputes with musicians and with the Metropolitan's board.

In his final years Mahler composed a triptych of “farewells” to the world—the Ninth Symphony, fragments of the Tenth Symphony, and the magnificent orchestral song-cycle, *Das Lied von der Erde* (*The Song of the Earth*, 1908). Set to texts by ancient Chinese poets, the work concludes with the famous “Der Abschied” (“The Farewell”) to which Mahler penned these lines of his own: “My heart is peaceful, awaiting its hour . . . The beloved earth everywhere flowers and becomes green again.” The final page, one of the most astonishing pages in all music, features an endless repetition by the voice of “Ewig” (“Forever”) to a diaphanous background of cello, flute and oboe. Mahler did not live to hear this work; and, according to his wishes, not a word was spoken nor a note sung at his burial.

In the decades after his death, Mahler's music was championed by his main disciple, conductor Bruno WALTER, and by a few others. However, his

symphonies did not gain a secure place in the repertory until the 1960s, when Leonard BERNSTEIN's interpretation received wide critical and popular acclaim.

Mahler, Margaret S. (1897–1985) Hungarian-born American psychiatrist. She was clinical professor of psychiatry at Albert Einstein College of Medicine from 1955 until 1974. Her pioneering research into the psychological development of very young children led her to the conclusion that the foundation for adult character structure was laid in the first three years of life. These ideas were summarized in her 1976 book, *The Psychological Birth of the Human*.

Mahon, Derek (1941–) Northern Irish poet, editor, screenwriter and translator; widely considered the direct successor to Louis MACNEICE. Born in Belfast, Mahon read classics at Trinity College, Dublin. He was later poetry editor for the *New Statesman* in London. His work reflects a profound awareness of the ironies of 20th-century existence. Technically, his poetry achieves a formal grace and perfection matched by few other poets of this century. Mahon's books include *Poems 1962–1978* (1979), *The Hunt by Night* (1982), *Antarctica* (1985) and *Selected Poems* (1991). Since publishing his *Selected Poems* in 1990, Mahon has released *The Yaddo Letter* (1992), *The Hudson Letter* (1995), *The Yellow Book* (1997), *Collected Poems* (1999), *The Seaside Cemetery* (2001), and *Resistance Days* (2002). He received the Cholmondeley Award for Poets (1991) and *The Irish Times/Aer Lingus Poetry Prize* (1992).

Mailer, Norman (1923–) American novelist, story writer, essayist and journalist. Mailer is one of the most acclaimed and controversial American writers of the postwar era. Raised in a Jewish family in Brooklyn, Mailer was educated at Harvard University and served in the U.S. Army during World War II. He drew upon his experiences of combat to write his acclaimed first novel, *The Naked and the Dead* (1948). Mailer's next two novels, *Barbary Shore* (1951) and *The Deer Park* (1955), were less successful with the critics and the public, but his essay *The White Negro* (1957) won praise as an astute analysis of race relations and alienation in Amer-

ica; it also revealed Mailer's affinity with the BEAT GENERATION. In the 1960s his most important work was *The Armies of the Night* (1968)—an example of NEW JOURNALISM that earned Mailer a PULITZER PRIZE. His many subsequent works include *The Prisoner of Sex* (1971), an analysis of FEMINISM from the male perspective; *The Executioner's Song* (1979), a study of death-row prisoner Gary Gilmore that garnered Mailer a second Pulitzer Prize; and *Ancient Evenings* (1985), a historical novel set in Dynastic Egypt. Active in the ANTIWAR MOVEMENT during the VIETNAM WAR, Mailer has been involved in other liberal and radical causes. His stormy personal life has brought him much attention in newspaper gossip columns, but whether his work will have lasting literary value is a matter of debate. Mailer has since published *Harlot's Ghost* (1992), a 1,300 page account of CIA activities; *Oswald's Tale* (1995), a biography of Lee Harvey Oswald inspired in part by research Mailer uncovered while writing *Harlot's Ghost*; and *The Gospel According to the Son* (1997). In 2005 Mailer was given an honorary medal for lifetime achievement by the National Book Awards.

Maillart, Robert (1872–1940) Swiss structural engineer. His work in reinforced concrete structures, particularly bridges, made Maillart one of the very few engineers to become internationally famous for the aesthetic qualities of his work. He was trained at the Zurich Technical College and worked for several established engineering firms before setting up his own practice in 1902. He became a specialist in the design of concrete bridges, designing more than 40 of increasingly elegant modernist form. The most famous of his works, all in Switzerland, are the Val Tschiel Bridge, near Donath (1952); the spectacularly beautiful Salginatobel Bridge with a 295-foot span and three-hinged arch, near Schiers (1929–30); the curving Schwandbach Bridge (1933); the bridge over the Thus, near Felsegg (1933); and the Arve Bridge at Vessy, Geneva (1936). Many of Maillart's bridges are in obscure places where local authorities were willing to accept his dramatically simple designs. Maillart also designed various other structures.

Maillol, Aristide (1861–1944) French sculptor and graphic artist. He

began as a painter, studying at the Ecole des Beaux-Arts in Paris. By 1903 he was associated with the Nabis. Maillol began to sculpt sometime between 1895 and 1900. His first sculptures were small-scale figures in wood or ceramic, but he quickly began much larger projects. His characteristic sculptures are larger-than-life female nudes—massive, idealized and sensuous. Strongly influenced by the classical Greek ideal, his style crystallized during a 1908 trip to Greece. At once strong and langourous, smoothly modeled and beautifully balanced, his nudes are often cast in bronze. Among his typical sculptures are *The River* (c. 1901, Museum of Modern Art, New York City) and *Pomona* (1910, Tuileries, Paris). Maillol is also known for the flowing linear quality of his woodcuts, many of which illustrated classical Greek and Roman poetry.

Majdanek Site of a Nazi CONCENTRATION CAMP, located near Lublin, Poland, during WORLD WAR II. Jews, Poles, Russians and other people from Nazi-occupied Europe were sent to Majdanek during the early 1940s; as many as 1.5 million were killed in the camp's gas chambers.

Major, John (1943–) British politician, prime minister of the UNITED KINGDOM (1990–97). Born into a lower-middle-class family, Major was raised in Brixton, a run-down district of London. He left school at 16 in order to help support his family and never attended university. He held a variety of odd jobs, including clerk, cement mixer and bus conductor. He also experienced unemployment and spent several months on the dole. Major's fortunes changed when he obtained a job with the district bank; he decided to pursue a career in banking and quickly gained his professional qualifications. He joined Standard Chartered Bank in 1965 and became an assistant to the bank's chairman, who later served as chancellor of the Exchequer in the cabinet of Edward HEATH. Major entered politics in the late 1960s, serving in local government in South London from 1968 to 1971. An unsuccessful candidate for Parliament in 1974, he was elected to the House of Commons in the 1979 general election that swept Margaret THATCHER and the Conservatives into power. As a backbencher, he drew the notice of Thatcher, who made

him a junior minister for social security (1986) and then chief secretary of the Treasury (1987). In June 1989 Major replaced Geoffrey HOWE as foreign secretary. Three months later Thatcher named him chancellor of the Exchequer upon the resignation of Chancellor Nigel Lawson. Conservative members of Parliament elected Major as party leader after Margaret Thatcher announced her resignation in November 1990. Major thus became, at age 47, the youngest British prime minister of the 20th century. He was expected to follow many of Thatcher's policies but to take a more conciliatory view on several major issues, including the controversial community charge (poll tax) and the proposed monetary union with Europe. Major strongly supported the UN coalition action against IRAQ in the PERSIAN GULF WAR. Although Major and the Conservatives staved off defeat in the 1992 national election, the party continued to lose popularity. In the 1997 national election, the Conservatives were voted out of office, and Major was replaced by Labour Party leader Tony BLAIR.

Makarios III (1913–1977) Archbishop of the Orthodox Church of Cyprus and president of the Republic of CYPRUS. The son of a poor shepherd, he studied theology in GREECE and the United States. Ordained in 1946, he became bishop of Kition in 1948 and archbishop in 1950. A leader in the struggle for ENOSIS (union) with Greece, he was elected president of Cyprus in 1959, 1968 and again in 1973. He survived several assassination attempts and a 1974 coup that resulted in a five-month exile in MALTA and the UNITED KINGDOM. He was unable to prevent Turkish occupation of much of northern Cyprus.

Makarov, Oleg (1933–) Soviet cosmonaut and design engineer. Encouraged by the experience of his friend and fellow design-engineer Konstantin Feoktistov in *Vokshod 1*, Makarov, of Sergei KOROLEV's design bureau, also applied to fly in space. As a result, he became one of the steady players in the Soviet program, making four flights in the position of flight engineer between 1973 and 1980. His first flight, aboard *Soyuz 12* (September 1973) with Vasily Lazarev, was the first to follow after the tragedy of *Soyuz 11*, during which three cosmonauts suf-

focated because a valve leaked during reentry (to allow enough room for three they had worn no space suits). Makarov and Lazarev wore space suits in the redesigned *Soyuz* and their brief two-day mission went smoothly. Paired off again with Lazarev, Makarov was to visit Salyut 4 in a 60-day mission two years later. But luck was not with them; their *Soyuz 18-A* booster aborted shortly after launch on April 5, 1975. Their command module separated from the booster and careened back to Earth, landing the two in the mountains near the Chinese border. As the *Soyuz* plunged downward, the cosmonauts endured an agonizing pressure of 18 Gs, which may have caused internal injuries.

Makarov made it back onto the flight docket, and three years later he and Vladimir DZHANIBEKOV took *Soyuz 27* (January 1978) up to the Salyut 6 space station that Makarov had helped design. After their one-week visit with Yuri Romanenko and Georgy Grechko, who were on a 30-day mission there, they returned in Romanenko and Grechko's *Soyuz 26* spacecraft, leaving the fresh vehicle at the space station. November 1980 saw Makarov back at Salyut 6, this time on a repair mission with fellow cosmonauts Leonid Kizim and Gennady Strekalov. After 13 days, they had the station ready for its next long-duration crew, returning aboard their *Soyuz T-3* craft, recently redesigned to accommodate three cosmonauts.

Makarov, Stepan Osipovich (1848–1904) Russian admiral in charge of defense during the RUSSO-JAPANESE WAR. Makarov went down with his flagship, the *Petropavlovsk*, outside Port Arthur.

Makarova, Natalia (1940–) Russian-born ballerina. After studying at the Kirov Ballet School in Leningrad, Makarova joined the Kirov Ballet Company in 1959. She won a gold medal at the Varna Ballet competition in 1965. In 1970 she chose to stay in the West at the conclusion of the Kirov's European tour and joined AMERICAN BALLET THEATRE that same year, making her debut in *Giselle*. Noted for an elegant style and expressiveness, her *Giselle* is considered the finest of the 1970s and early 1980s. She has been a guest artist with companies worldwide, most especially with the ROYAL BALLET in Britain. She has received acclaim for

her dancing in such modern ballets as Antony TUDOR's *Jardin aux Lilas* and *Dark Elegies* as well as for the classical repertory.

Maki, Fumihiko (1928–) Winner of the 1993 Pritzker Architecture Prize. Born in Tokyo, Maki refined his interest in post-Bauhaus architecture at Tokyo University, where he received his B.A. in architecture in 1952. He then traveled to the U.S. to pursue his graduate education in architecture, first at the Cranbrook Academy of Art in Bloomfield Hills, Michigan, and later at Harvard University's Graduate School of Design, where he served as an apprentice with firms in New York and Boston. After obtaining his M.A. in architecture in 1956, he taught architecture, first while at Washington University and then at Harvard's Graduate School of Design.

In 1965 Maki left Harvard to return to Tokyo and established his own architectural firm, Maki and Associates. He developed a strong interest in constructing the interior layout of business complexes to encourage cooperation and a diversity of viewpoints. To this end, he utilized a synthesis of metal, concrete and glass, as well as more modernist building materials such as anodized aluminum and stainless steel. He also helped found the Metabolists, a group of like-minded young Japanese architects who sought to ensure that their structures emphasized flexibility and could be aesthetically incorporated into the city in which it resided. In the mid-1980s Maki became well known in Japan for his design of the National Museum of Modern Art in Kyoto, which opened in 1987. He has also designed buildings in the U.S., such as Yerba Buena Gardens Visual Arts Center in San Francisco, and in Germany, such as the Isar Buro Office Park in Munich. Maki also designed the Prefectural Sports Center in Osaka, Japan, and the Hillside Terrace Apartment Complex in Tokyo. In 1993 Maki was selected as the recipient of the Pritzker Prize, the most prestigious international architectural award, for his contributions to modern architecture.

Maklakov, Vasily Alexandrovich (1870–1957) Russian liberal and lawyer. A member of the second, third and

fourth dumas, he acted as counsel for the defense for political cases during the 1905 Revolution. A member of the Constitutional Democratic Party, he was appointed ambassador to France by the provisional government in 1917. He subsequently acted as leader of the Russian emigrés in Paris.

Malamud, Bernard (1914–1986) U.S. author. He was regarded as one of the most distinctive Jewish literary voices in postwar America. His works often reflected a concern with Jewish values and a belief in the nobility of ordinary people. His first novel, *The Natural*—an allegorical tale about the rise and fall of a baseball player—was published in 1952. Later novels included *The Assistant* (1957), *The Fixer* (1966) and *The Tenants* (1971). Some of his best-known short stories appeared in the collections *The Magic Barrel* (1958) and *Idiot's First* (1963).

Malan, Daniel F(rançois) (1874–1959) South African political leader, prime minister of SOUTH AFRICA (1948–54). Trained as a clergyman, Malan was a pastor in the Dutch Reformed Church until World War I, when he became an editor of an Afrikaner nationalist newspaper. He officially entered politics in 1918 as a Nationalist member of Parliament and served as minister of the interior, public health and education in the government of J. B. M. Hertzog (1924–33). When the National Party won the 1948 election Malan became prime minister. In that office he was one of the main architects of APARTHEID. Fighting any movement toward racial integration, he urged the development of segregated black "homelands." Malan retired in 1954.

Malawi (Republic of Malawi) Malawi covers an area of 45,735 square miles in southeast Africa. Originally a British colony known as Nyasaland

MALAWI

1953	Malawi becomes part of the white-dominated Central African Federation, which includes South Rhodesia (Zimbabwe) and North Rhodesia (Zambia).
1964	Nyasaland becomes a fully independent dominion within the Commonwealth under the name Malawi, with Hastings Banda as prime minister.
1966	Malawi is declared a republic, with Banda as president.
1971	Banda is made president-for-life.
1988	Malawi and Mozambique sign an agreement on the repatriation of Mozambican refugees in Malawi.
1992	About 100,000 people demonstrate against Banda's authoritarian rule.
1994	Makili Muluzi becomes president.
1997	Banda dies in South Africa at the age of 99.
1999	Muluzi is reelected president.
2000	Muluzi dismisses his entire cabinet after high-ranking officials are accused of corruption, in a move aimed at placating foreign donors. However, his new government includes many of the same people.
2004	Bingu wa Mutharika is elected president.

(1907–53), the country joined Northern and Southern Rhodesia to form the Central African Federation (1953–63), before achieving independence in 1964. The country became a part of the

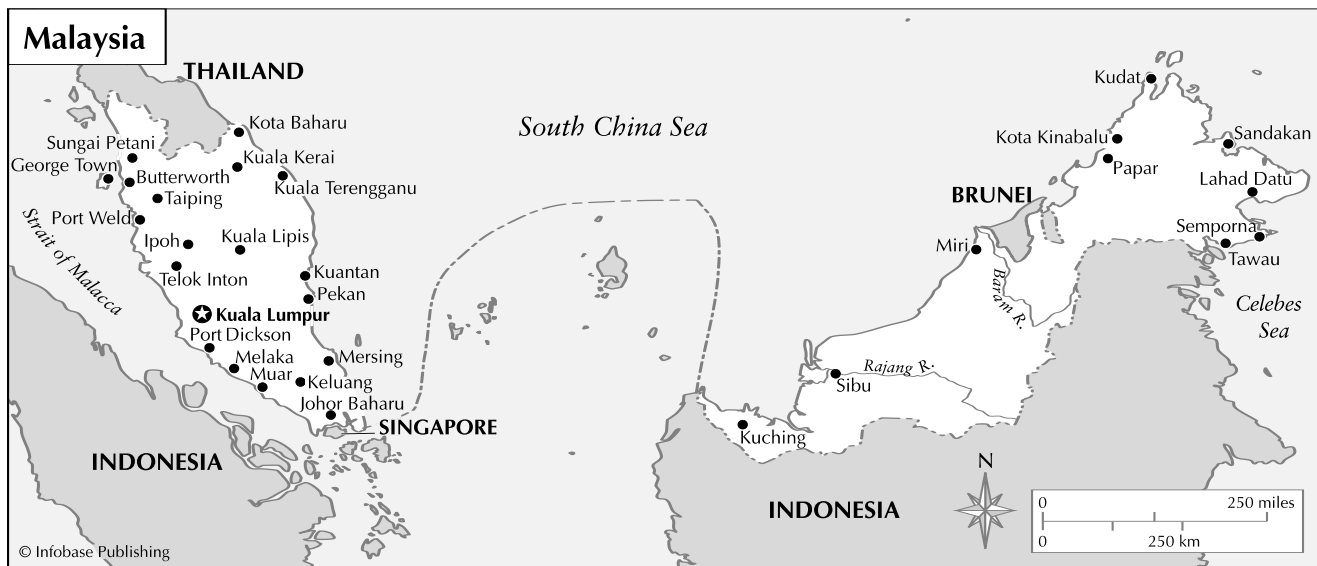

COMMONWEALTH as the Republic of Malawi and elected Dr. Hastings Kamuzu BANDA president in 1966 (became president for life in 1971). Suspicions concerning the Banda gov-

ernment's responsibility for assassinations of opposition leaders living in Zimbabwe, as well as the deaths of possible successors, have been rampant. Tensions with Mozambique over Malawi's supposed aid to Mozambique rebel groups surfaced in the 1980s but were resolved in 1988. In the 1994 presidential elections, the United Democratic Front candidate, Makili Muluzi, defeated Banda and immediately restored some civil liberties at the beginning of his five-year term. In 1999 Muluzi won reelection to a second and final term as president (the Malawi constitution prohibited anyone from serving in office for more than 10 years). Although Muluzi arranged for the World Bank to cancel half of Malawi's foreign debt in 2000, his administration was repeatedly besieged by allegations of corruption surrounding the mismanagement of the country's agricultural resources. In May 2004 he was succeeded by Bingu wa Mutharika.

Malaysia (Federation of Malaysia)

Comprising a total land area of 127,225 square miles in Southeast Asia, Malaysia consists of two separate sections, East (Sarawak and Sabah on the island of Borneo) and West Malaysia. In 1896 the states of Perak, Selangor, Negri Sembilan and Pahang were reunited to form the Federated Malay States under British rule; by 1914 the remaining Malay states came under British control. Invaded by Japan in 1942, Malaysia returned to British control in 1946, then formalized its federation status in 1948. The country achieved independence in 1957 as the Federation of Malaysia. Tensions between the Malay population and the increasing number of Chinese and Indian immigrants led to political and economic unrest, resulting in declarations of a state of emergency in 1948 and again in 1969. Economic and human rights reforms have alleviated some problems, but opposition groups continued to press for more political freedom during the 1980s. In 1997 an Asian economic crisis gripped Malaysia. Six years later, Prime Minister Dr. MAHATHIR BIN MOHAMMAD resigned and was succeeded by Abdullah Ahmad Badawi.

Malcolm X (Malcolm Little) (1925–1965) American black militant. Born

in Omaha, Nebraska, he moved east at 16, settled in New York City and became involved in the crime of Harlem's

underworld. In prison from 1946 to 1952, he was impressed with the writings of Elijah MUHAMMAD and, after his

release, joined the BLACK MUSLIM movement. Rejecting his "slave name," he changed it to Malcolm X, embraced black separatism and supported armed self-defense. Highly intelligent and a fiery orator, he quickly became the movement's foremost spokesman, winning it a host of new members. When an ideological split between Malcolm and Muhammad caused Malcolm's suspension as a minister in 1963, the firebrand left the Nation of Islam. Making the pilgrimage to Mecca in 1964, he proclaimed his conversion to orthodox Islam and founded a rival group, the Organization for Afro-American Unity.

MALAYSIA

1914	Britain gains control of Malay Peninsula.
1942	(February) Singapore falls to the Japanese.
1957	(Aug. 31) Malaya granted independence from Britain.
1963	(September) Malaya, Singapore, Sarawak and North Borneo join together to form the state of Malaysia.
1965	(Aug.) Singapore leaves the federation.
1969	(May) Race riots between Chinese and Malays break out and state of emergency is declared.
1981	Datuk Seri Dr. Mahathir Mohammad of the United Malays National Organization Party is elected prime minister.
1990	(Oct. 21) Mahathir is reelected.
1997	The Asian economic crisis strikes hard at Malaysia with markets and currency falling throughout 1997-98.
1998	Currency and foreign investment controls implemented to combat deepening recession.
1999	Controls are lifted as economic health returns. Mahathir is reelected prime minister.
2001	Clashes between Malays and ethnic Indians. Malaysia and Singapore resolve long-standing disputes.
2003	Mahathir resigns as prime minister and Abdullah Ahmad Badawi assumes the post.
2004	Prime Minister Badawi wins landslide general election.

Malcolm X, a leader of the Black Muslim movement
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Forsaking the doctrine of racial separation, Malcolm advocated the struggle for radical social reform. In February 1965 he was shot and killed while addressing a public meeting in New York by assassins alleged to be Black Muslims. His book, *The Autobiography of Malcolm X* (dictated to Alex HALEY, 1964), has become an American literary and sociological classic.

Maldives The Maldivian archipelago comprises some 1,190 islands (202 of which are inhabited) in a chain of 20 coral atolls, covering an area of 116 square miles; in the Indian Ocean over 400 miles southwest of Sri Lanka. Protected from monsoon devastation by barrier reefs (faros), none of the islands rises above 5 ft. in elevation. Settled by its original Dravidian inhabitants per-

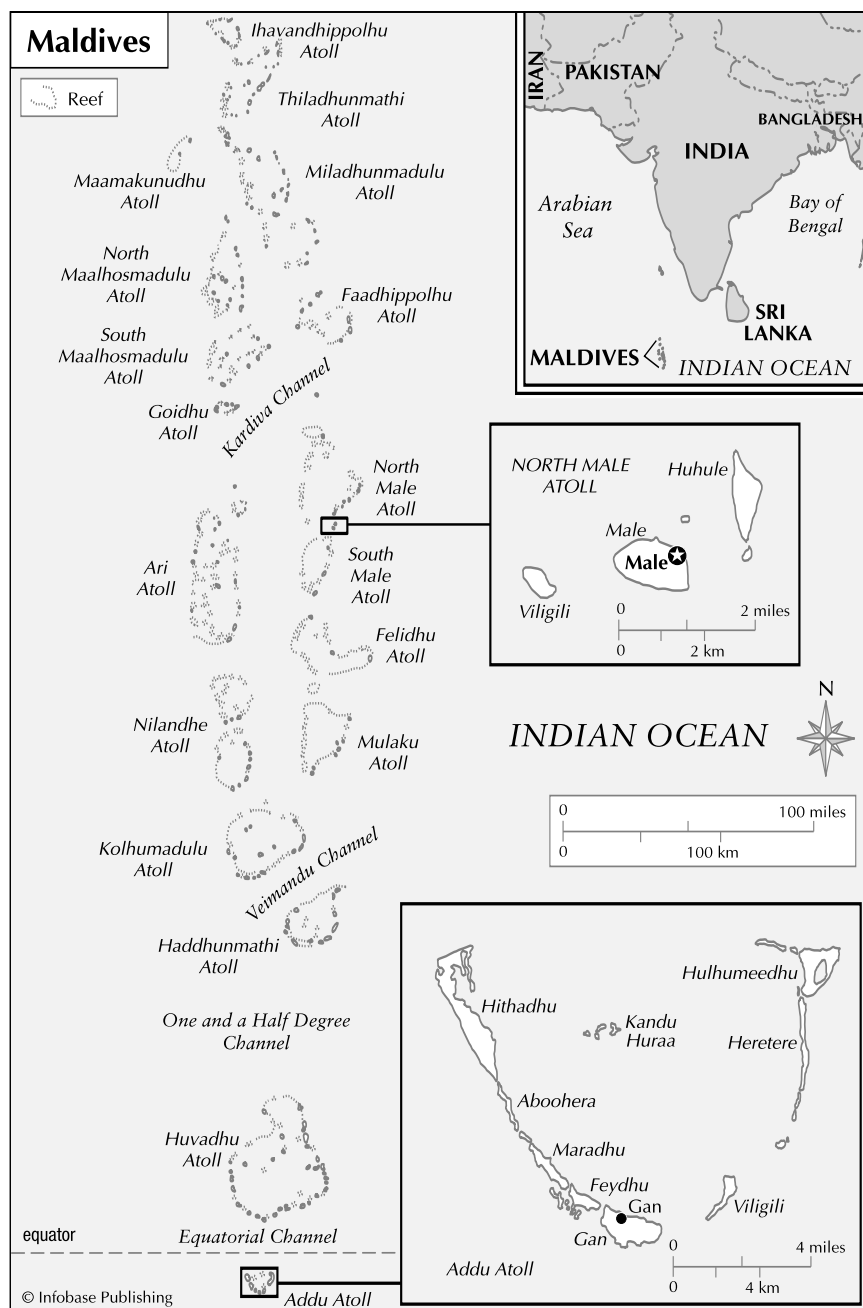

haps as early as the fourth century B.C., the Maldives became a British protectorate in December 1887. The powers of the sultans were circumscribed by provisions of a 1932 constitution, and a short-lived modernizing regime set up a republic (1953–54)—before a coup restored the sultanate. Ibrahim NASIR, prime minister to the last of the sultans (from 1957) and effective leader of the country at the time of independence (July 26, 1965), became president when a referendum approved a republican constitution (November 11, 1968). He strengthened the powers of the presidency (1975) but then stood down and left the country (1978); Maumoon Abdul GAYOOM was elected to succeed him. Re-elected for successive presidential terms (1983, 1988), Gayoom survived three

attempted coups (1980, 1981, 1988), in each of which he saw the hand of his predecessor Nasir. The 1988 coup was suppressed only when Indian troops were dispatched to defeat the mercenaries, who apparently came from Sri Lanka. Meanwhile, Gayoom confirmed a nonaligned foreign policy practiced by his predecessor, who in 1957 had rejected a Soviet bid to lease the island of Gan. The Maldives joined the COMMONWEALTH as a special status member (July 1982) and became a full member on June 20, 1985. Al-Gayoom retained his hold on power throughout the 1990s, winning reelection to the presidency in 1993, 1998 and 2003, giving him an unprecedented sixth term as the country's leader.

Since 2002 the Maldives's government has repeatedly voiced concerns

MALDIVES

1887	The islands of the Islamic sultanate of the Maldives become an internally self-governing British protectorate, which remains a dependency of Sri Lanka until 1948.
1932	The sultan becomes an elected position when the Maldives's first constitution is introduced.
1953	The Maldivian Islands become a republic within the Commonwealth, as the ad-Din sultanate is abolished.
1954	The sultan is restored.
1968	Following a popular referendum, the Maldives sultanate is replaced with a republican form of government, with Ibrahim Nasir as president.
1978	President Nasir steps down for health reasons, and Maumoon Abdul Gayoom is elected president.
1983	President Gayoom is reelected to a five-year term.
1988	President Gayoom is reelected to another five-year term in September. In November a coup attempt launched by an amphibious force, composed mostly of ethnic Tamil mercenaries from Sri Lanka, is quashed with the assistance of Indian army commandos.
1990	Two separate international reports warn that global warming could cause the ocean to submerge the Maldives within 100 years.
1993	President Gayoom runs unopposed for a fourth five-year term as president.
1998	President Gayoom is reelected to a fifth term as president.
2003	Crowds riot in the capital city of Male, seeking democratic reforms. President Gayoom is reelected to a sixth term as president.
2004	In December, a magnitude 9.0 earthquake off the coast of Indonesia creates tidal waves that kill about 100 Maldivians and displace 12,000. Of the country's 199 inhabited islands, 73 are severely damaged or destroyed completely.

about the rising sea level and its effect on the archipelago's future. In September 2002 al-Gayoom addressed the World Summit on Sustainable Development in Johannesburg, South Africa, and asked the international community to take all possible measures to reduce the increasing temperatures across the globe that have contributed to rising sea levels in the Indian Ocean.

Malenkov, Georgi Maximilliano-
vich (1902–1988) Soviet politician. Malenkov succeeded STALIN as premier

in March 1953 and was also, very briefly, first secretary of the COMMUNIST PARTY. He was alleged to have played a key role in the Stalinist purges in which millions of Soviet citizens died. His premiership was marked by a somewhat more conciliatory attitude toward the West and by attempts to increase the production of consumer goods. Nikita KHRUSHCHEV forced him from power in 1955. In 1957 Malenkov was removed from all important posts and banished to remote Kazakhstan in Central Asia to manage a hydroelectric plant.

Malevich, Kazimir (1878–1935) Russian artist, one of the first abstract painters. Influenced by IMPRESSIONISM, FAUVISM and CUBISM, in 1913 Malevich evolved his own abstract geometrical style, known as SUPREMATISM, in which only geometrical elements were used in construction. After teaching painting from 1919 to 1921 in Moscow and Leningrad, he traveled to Weimar, where he met Wassily KANDINSKY, and published his *The Non-Objective World*. Among his best-known paintings is the famous *White Square on a White Background*. Unfortunately his work met with official disapproval, and Malevich died in poverty in 1935.

Mali (Republic of Mali) The landlocked country of Mali is located in western Africa and covers an area of 478,640 square miles. A French colony originally known as French Soudan (1920–58), the country was renamed the Sudanese Republic in 1958 and became an autonomous state within the FRENCH COMMUNITY. It united with the Republic of SENEGAL to form the Federation of Mali in 1959. When the federation became independent in 1960, Senegal seceded, and the Republic of Mali was declared. The first president, Modibo Keita, consolidated power in a one-party system but was overthrown in 1968 in a peaceful army coup. The new leader, General Moussa Traoré, has maintained power by suppressing all protests. A brief war (December 25–29, 1985) with BURKINA FASO over a disputed border was resolved in 1986. In 1992 Alpha Konaré won Mali's first free multiparty presidential election. Three years later Konaré participated in government talks with Tuareg tribal leaders in an effort to stave off future conflicts with the indigenous group and to assure the return of several thousand refugees to Mali. In 1999, following the trial and conviction of former Mali president Moussa Traoré, Konaré commuted his death sentence to life imprisonment. After Konaré was succeeded by Amadou Toumani Touré in 2002, Mali was beset by political and civil turmoil. In October 2002 the entire government resigned without explanation, and an interim government of national unity was formed. Additionally, problems within Mali's Islamic community resulted in 10 deaths in August 2003

when opposing Islamic groups briefly fought in the state's western region. In the same year an Islamic group allied with the terrorist organization al-Qaeda came under assault by the Mali army.

Malik, Charles Habib (1906–1987) Lebanese diplomat. A Greek Orthodox Christian, he helped draft LEBANON'S 1943 constitution granting political hegemony to the Christian community. He was one of the last surviving signatories of the UNITED NATIONS Charter, which he helped draft in 1945. In 1958 and 1959 he was president of the United Nations General Assembly and was Lebanese ambassador to the U.S. (1953–55) and foreign minister (1956–58).

Malik, Yakov A(leksandrovich) (1906–1980) Soviet diplomat. During his career Malik served as the USSR's ambassador to the UNITED NATIONS (1948–52, 1968–76) and deputy foreign minister. He joined the COMMUNIST PARTY in 1938 and played a key

MALI

- | | |
|------|---|
| 1904 | French Sudan (Soudan) becomes part of the Federation of French West Africa. |
| 1958 | Following a referendum, French Sudan becomes the République Soudanaise (Sudanese Republic) within the French Community. |
| 1959 | Mali Federation is established, with Senegal and the Sudanese Republic as members. Modibo Keita is elected president of the federation. |
| 1960 | Mali Federation breaks up when Senegal withdraws. |
| 1968 | President Keita is overthrown by a military coup led by General Moussa Traoré, who becomes president. |
| 1985 | Border fighting with Burkina Faso (former Upper Volta) reerupts. |
| 1986 | Burkina Faso and Mali accept World Court settlement of dispute over Agacher Strip. |
| 1992 | Alpha Konaré is elected president, as his party, the Alliance for Democracy, wins 76 of the 116 assembly seats. |
| 1996 | The World Bank praises the economic turnaround headed by Konaré's government. |
| 1999 | Traoré is convicted and sentenced to death on corruption charges, but Konaré commutes the sentence to life imprisonment. Konaré announces that he will not run for a third term as president. |
| 2002 | Amadou Toumani Touré, who overthrew Traoré in 1991, returns to power after winning a landslide victory in presidential elections. |

role in negotiating the terms that ended in the Berlin blockade in 1949 (see *BERLIN AIRLIFT*). He is best remembered, however, for the decision to boycott the UN Security Council in 1950. When the *KOREAN WAR* broke out, the U.S. took advantage of his absence to persuade the Security Council to send UN forces to *SOUTH KOREA*. A year later, Malik proposed a Korean truce; this led to talks between the two sides and an eventual cease-fire in 1953. Malik was regarded as one of his country's leading experts on the West. (See also *COLD WAR*.)

Malina, Frank J. (1912–1981) U.S. rocket pioneer and aeronautical engineer; his pioneering work on solid-fuel rockets helped set the stage for early U.S. rocket development. With aerodynamist Theodore von KARMAN, Malina helped found what is now NASA's JET PROPULSION LABORATORY in California in the late 1930s. They researched high-altitude rockets and during *WORLD WAR II* they worked on jet-assisted takeoff (JATO) for propeller airplanes, using the same rocket principles. In 1945 von Karman and Malina tested the first WAC Corporal rocket, which they had designed for use as a high-altitude sounding rocket. It was one of the early predecessors of space-age rocket power in the U.S. Malina later left JPL to become head of the scientific research division of UNESCO in France, where he died.

Malinovsky, Rodion Yakovlevich (1898–1967) Soviet marshal. Having served with the French army in *WORLD WAR I* and having fought in the *RUSSIAN CIVIL WAR*, Malinovsky joined the party in 1926. In 1930 he graduated from the M. V. Frunze Military Academy. During *WORLD WAR II*, he proved to be a distinguished commander during the *STALINGRAD* offensive (1942). He then led the Southwest Army Group (1943) and the Second Ukrainian Army Group (1944), which occupied Romania and Hungary. In 1945 he liberated Czechoslovakia and commanded the Transbaikalian Army Group in the brief war against Japan; in 1945–46 he commanded the Soviet forces in Manchuria. A candidate member of the party's central committee from 1952, in 1957 he was appointed minister of defense.

Malinowski, Bronislaw (1884–1942) Polish-born British anthropologist. Malinowski studied at the University of Kraków, from which he received a Ph.D. in physics and mathematics in 1908, as well as the University of Leipzig and the London School of Economics. He performed field research in Africa, Melanesia and Mexico, and taught at the University of London from 1924 to 1942, in addition to lecturing at universities in America and throughout Europe. A brilliant descriptive ethnographer, Malinowski originated the theory of "functionalism," that is, that a culture should be studied as a complex whole that functions to satisfy its members' primary biological needs. He also argued against the judgmental 19th-century view that placed various cultures on a developmental ladder ranging from "savagery" to "civilization."

Malle, Louis (1932–1995) French motion picture director who sprang from the generation of the *NOUVELLE VAGUE* in the late 1950s. Unlike many of his colleagues—TRUFFAUT, GODARD, CHABROL, Rivette, Vadim—Malle never stopped working and continued to make films of enormous variety and consistent quality. After studying at the Jesuit College at Fontainebleau he turned to filmmaking in 1951–52 and codirected with Jacques COUSTEAU the classic underwater documentary, *Le Monde de Silence* (*The Silent World*, 1956). His *Ascenseur pour l'Echafaud* (*Elevator to the Gallows* [*Frantic*], 1957) and *Les Amants* (*The Lovers*, 1958) are regarded as early expressions of that movement, but Malle's work is difficult to categorize. While his color film *Zazie dans le Metro* (1960) is full of hi-jinks and chases, *Le Feu Follet* (*The Fire Within*, 1963), is a harrowing depiction in black-and-white of the last hours of a suicidal alcoholic. On the one hand, he closely observed contemporary life and poverty in his documentary *Calcutta* (1969), and on the other, lovingly re-created the period charm of the 19th century in *Viva Maria* (1965) and *Le Voleur* (*The Thief of Paris*, 1967). His controversial American film *Pretty Baby* (1978) is full of the lush imagery and sensuality of the New Orleans brothels; *My Dinner with Andre* (1981) explores the tensions between the imagination and reality in a dinner conversation be-

tween an intense theater director and a down-to-earth playwright. Malle's masterpiece is the autobiographical *Au Revoir, les Enfants* (*Goodbye, Children*, 1988), a closely observed, poignant memoir of children growing up in Nazi-occupied Paris during *World War II*. "Of the New Wave survivors," writes historian John Baxter, "he is the most old-fashioned, the most erotic, and, arguably, the most widely successful."

Mallet-Stevens, Robert (1886–1945) French designer of furniture and architectural interiors, an important figure in the development of *MODERNISM* of the 1920s and 1930s. Mallet-Stevens was a student of the Ecole Spéciale d'Architecture from 1905 to 1910 and an admirer of the work of such pioneers as Charles Rennie MACKINTOSH and Josef HOFFMANN. Beginning in 1912 he produced furniture and interiors in an early modern style, and his work gradually moved toward the modernism of the *de STIJL* movement with similarities to the early efforts of LE CORBUSIER. He designed pavilions for the Paris exhibitions of 1929 and 1937. Mallet-Stevens was a frequent contributor to journals dealing with modern design and wrote a book on modern stained glass.

Mallett, Jane (1899–1984) Canadian actress and comedienne. Mallett's career spanned nearly 60 years. Mallett played a leading role in the development of Canadian theater, film, radio and television and was active in major theatrical and broadcasting unions. In 1975 she received the Order of Canada and became one of the first to be awarded honorary membership in the newly independent Canadian Actors' Equity.

Malone, Richard Sankey (1909–1985) Canadian journalist. During his military career, Malone was one of the few members of the Allied forces to serve in all theaters of *WORLD WAR II*. He created the Canadian Army's public relations service and its newspaper, *The Maple Leaf*. He began as assistant general manager at the *Winnipeg Free Press* (FP) in 1936 and eventually became its publisher and editor in chief. From that base, he built the FP chain, acquiring newspapers throughout CANADA. Malone was publisher and

editor in chief of one of FP's purchases, the *Toronto Globe and Mail*, from 1974 to 1978.

Malraux, André (1901–1976) French novelist, art critic, essayist and government minister. Malraux was a major figure in French letters and culture in the 20th century. He began his career as a world traveler with leftist political leanings. Malraux participated in revolutionary activities in CHINA in the 1920s and fought on the Loyalist side in the SPANISH CIVIL WAR in the 1930s. His experiences in China were reflected in his first novel, *The Conquerors* (1928), as well as in his most famous novel, *Man's Fate* (1933). A subsequent novel, *Man's Hope* (1938), drew from his experiences in Spain. Malraux was a leader of the French RESISTANCE during WORLD WAR II and became a close associate of Charles DE GAULLE, who later named Malraux minister of culture (1959–69). *The Voices of Silence* (1951) is Malraux's major work of art criticism. *Antimemoirs* (1967) is his autobiography.

Malta (Republic of Malta) Located in the central Mediterranean Sea, Malta consists of the islands of Malta, Gozo, Comino and the uninhabited islets of Cominotto, Filfa and St. Paul; total land area of 122 square miles. Governed by Great Britain since 1800, the ancient island was claimed by Italy during WORLD WAR II and endured heavy bombing by the Axis powers. Malta was granted self-government by Britain in 1947 and achieved full independence in 1964, though still maintaining defense and economic ties with Britain. The country became a republic within the COMMONWEALTH in 1974. Of strategic importance due to its proximity to the Suez Canal, Malta hosted British and NATO forces (1972–79), then proclaimed its neutrality and nonalignment (1979–80). During the presidency of Dom Mintoff (1971–84) Malta established relations with several communist and Arab countries. In 2004 Malta joined the EUROPEAN UNION (EU).

Maltese Falcon, The (1929) American detective novel subsequently adapted into three different film versions for HOLLYWOOD. *The Maltese Falcon*, written by the renowned American mystery author Dashiell HAMMETT, has remained immensely popular with

readers due to its chiseled, laconic dialogue full of a wit and intelligence that was new to the mystery genre. Hollywood producers were naturally drawn to the novel, but the first two film adaptations—*The Maltese Falcon* (1931) and *Satan Met a Lady* (1936)—are eminently forgettable. The 1941 film version, written and directed by John HUSTON and starring Humphrey BOGART as detective Sam Spade, has become a classic and is regarded as one of the earliest examples of FILM NOIR. The basic plot of *The Maltese Falcon*—as Hammett wrote it and Huston adapted it—concerns the elusive quest for a black statue of a falcon that is filled with priceless jewels. Sam Spade is a tough, worldly-wise cynic who fends off the lies of seductive Brigid O'Shaughnessy (played by Mary Astor in the film) and the evil of the Fat Man (portrayed by Sydney Greenstreet) to solve the paradoxical mystery of the falcon while avenging the murder of his partner.

Mamet, David (1947–) American playwright. One of the finest contemporary dramatists, Mamet is particularly known for his dialogue. He taught theater at several universities, including the Yale School of Drama (1976–77), and was founder-director of the avant-garde St. Nicholas Theatre Company of Chicago (1973–76). His plays are frequently set in Chicago and focus on the underbelly of society (con artists, drifters) and the crucial interpersonal relationships that hold life together. He was greatly influenced by the improvisational comedy of the Second City Cabaret (in Chicago) where he worked for a while. Major plays include *Sexual Perversity in Chicago* (1975), *American Buffalo* (1976), *A Life in the Theatre* (1977), *Glengarry Glen Ross* (1984), for which he received the PULITZER PRIZE, and *Speed-the-Plow* (1987). Mamet has also made his mark as a screenwriter with such films as *The Verdict* (1982) and *The Untouchables* (1987). In the 1990s Mamet began to focus primarily on screenplay production and composed the scripts for such films as *Hoffa* (1992), *Malcolm X* (1992), *Vanya on 42nd Street* (1994), *Wag the Dog* (1997), and *The Winslow Boy* (1999). Mamet also directed two films in the 1990s: an adaptation of his play, *Oleanna* (1994), and *The Spanish Pris-*

oner (1997), a dark espionage film with comedian Steve MARTIN.

Mamouliau, Rouben Zachary (1898–1987) Russian-born film and stage director. Trained under VAKHTANGOV and STANISLAVSKY at the Moscow Art Theatre, he immigrated to America in 1926 and directed many notable plays for the Theatre Guild, including DuBose Heyward's *Porgy* (1927). He later directed the premiere of George GERSHWIN's operatic version, *Porgy and Bess* (1935). His first talking films for PARAMOUNT PICTURES, *Applause* (1929) and *City Streets* (1931), were acclaimed among the most innovative sound films of the day. In fact, all of his best films were distinguished by the imaginative use of image and sound—especially the horror classic *Dr. Jekyll and Mr. Hyde* (1932), the Jeanette MacDonald–Maurice Chevalier musical *Love Me Tonight* (1932), *Queen Christina* (with Greta GARBO, 1933) and the Technicolor *Becky Sharp* (1935). Mamouliau periodically returned to the Broadway stage, directing the premieres of such landmark productions as *Oklahoma* (1943), *Carousel* (1945) and *Lost in the Stars* (1949). His later films included *Summer Holiday* (1948), a musical version of Eugene O'NEILL's *Ah, Wilderness!*; and *Silk Stockings* (1957), a remake of *Ninotchka* starring Fred ASTAIRE.

Manchukuo Name of the Japanese puppet state in Chinese MANCHURIA from 1932 to 1945. The Japanese had long coveted Manchuria, with its rich natural resources and raw materials. They seized the province with little resistance in the early 1930s while CHINA was in political turmoil (see CHINESE CIVIL WAR OF 1930–34). Henry PU-YI, who had been the last Manchu emperor of China, was installed as formal ruler of Manchukuo, but real power rested with the Japanese. Few governments recognized Manchukuo as an independent state, and it was returned to Chinese rule after WORLD WAR II.

Manchuria Located in northeastern China, Manchuria became a part of China in 1903 and has been an autonomous area within China since 1924. Both Russia and Japan have dominated Manchuria at various times. In 1931 Japan seized several Man-

churian cities and created the puppet state of MANCHUKUO, controlling the region until the end of WORLD WAR II. Soviet troops occupied Manchuria from August 1945 to April 1946. The Chinese communists gained control of Manchuria during the Chinese civil war (1945–49). Since the formation of the People's Republic of China (1949), relations with the Soviet Union have been tense, and both countries continue to keep troops massed along the Manchurian border.

Mancini, Henry (1924–1994) American composer and arranger. Born in Cleveland, Ohio, Mancini studied music at the Carnegie Institute in Pittsburgh and the Juilliard School in New York City. He then studied composition in Los Angeles and in 1952 became a composer-arranger for Universal-International film studios. Thus began a long, illustrious career creating memorable themes and scores for films and television. In 1958 Mancini won an Emmy for creating the jazzy theme for the *Peter Gunn* TV series. He received ACADEMY AWARDS for his scores for *Breakfast at Tiffany's* (which included song hit “Moon River”) (1961) and *Victor/Victoria* (1982). Other well-known film scores Mancini has created include those for the *Pink Panther* films (1963, 1975), *Days of Wine and Roses* (1962), *Charade* (1963) and *Once Is Not Enough* (1976).

Mandela, Nelson (1918–) Black South African nationalist leader. Mandela practiced law until 1952, when his hostility to APARTHEID led him to join the AFRICAN NATIONAL CONGRESS (ANC). He traveled widely in SOUTH AFRICA in the 1950s, championing his ideal of a free, multiracial society. After the ANC was banned in 1961 he evaded arrest until 1962, when he was jailed for five years. In 1963 he was charged under the Suppression of Communism Act, and after an eight-month trial sentenced to life imprisonment. Although held in prison for over 25 years, he remained an important figure for black South Africans. During this time his wife **Winnie Mandela** continued to take an active part in politics, traveling widely at home and abroad and championing Mandela's causes despite restrictions imposed on her by the South African government.

Many blacks and whites were suspicious of Winnie Mandela's motives and methods, however, especially after she was implicated in the murder of a young black man in the late 1980s. Nelson Mandela was released from prison by Prime Minister F. W. DE KLERK in 1990 and allowed to resume his activities. Following his release Mandela became the leader of the ANC and began negotiations with De Klerk to end the system of apartheid in South Africa and to create a governmental structure that would give voting rights to all South Africans while reassuring white South Africans they would not be the target of reprisals. Mandela and De Klerk eventually created a three-person presidency that would ensure that at least one white South African shared executive authority with the more numerous black political parties. In 1993 Mandela and De Klerk both received the Nobel Peace Prize for their efforts at producing political reconciliation. In 1994 the first free nationwide elections were held in South Africa, which resulted in the ANC's becoming the largest political party in Parliament and the selection of Mandela as president.

Mandela devoted his presidency to improving South Africa's economy and encouraging job growth in the country's industrial sector by encouraging foreign corporations to establish business interests in South Africa following the end of the antiapartheid international boycott. He also sought to improve the quality of public housing available and to create the rudiments of a national health care system. In 1996 Mandela supported the creation of a new constitution for South Africa that strengthened the authority of the central government, further defined the rights of minorities within South Africa, and codified the civil liberties of all citizens. In 1997 he announced he would not seek reelection as president and resigned as leader of the ANC, in order to allow for a smooth transfer of authority. He was replaced by Thabo MBEKI as ANC leader, then the deputy president of South Africa. In June 1999 Mandela's term expired and Mbeki succeeded him as president of South Africa.

Mandelstam, Osip (1891–1938) Russian poet. One of the foremost Russian poets of the 20th century,

Mandelstam was the son of a Jewish leather merchant and grew up in Warsaw and St. Petersburg. He studied at the Sorbonne and the University of Heidelberg, then returned to St. Petersburg where he allied himself with the poets Anna AKHMATOVA and Nikolai GUMILEV. They christened themselves Acmeists in 1913, espousing the concrete and concise in poetry (see ACMEISM). Mandelstam's first book of poetry was *Stone* (1913). Due to the RUSSIAN REVOLUTION and his reluctance to serve its cause in his writing, his future work went unpublished or was circulated with great circumspection. After the revolution (1917), Mandelstam sought relative political freedom in the Crimea. In 1921 he married Nadezhda Khazina, who courageously preserved much of his poetry after his death. In the late 1920s Mandelstam concentrated on translating Italian poetry, and produced the lyrical prose works *The Noise of Time* (1925) and *The Egyptian Stamp* (1928). He was arrested in 1934 for an anti-STALIN poem and sent into internal exile in the provincial town of Voronezh for three years. In 1938 he was again officially condemned, and died soon after in a transit camp in Siberia. The hallmarks of Mandelstam's poetry are a detached tone, majestic language, an abundance of literary and historical allusions and themes often revolving around art.

Manhattan Project (formally, Manhattan District Project) Code name for the top secret American project to develop the atomic bomb during WORLD WAR II. During the 1930s, some scientists recognized the theoretical possibility of constructing an atomic bomb. Acting on the belief that Nazi Germany could develop such a bomb, Albert EINSTEIN wrote to U.S. president Franklin D. ROOSEVELT describing the destructive potential of such a weapon and urging a major research program so that the U.S. would be the first nation with the bomb. This letter spurred Roosevelt's decision to institute a crash program, later known as the Manhattan Project. U.S. Army general Leslie R. GROVES was appointed chief administrator. The project was carried out primarily at a facility in Oak Ridge, Tennessee, and, beginning in March 1943, at a “super” laboratory at Los Alamos, New Mexico. American physicist J. Robert

OPPENHEIMER was director of the Los Alamos laboratory and persuaded top nuclear physicists to join the project. Among scientists engaged in the Manhattan Project were Oppenheimer's brother Frank OPPENHEIMER, Enrico FERMI, Edward TELLER, British physicist William George PENNEY and hundreds of others. Shrouded in secrecy, the Manhattan Project culminated in the successful test of the first atomic bomb on July 16, 1945. The atomic age had begun. Although highly controversial, the Manhattan Project is widely regarded as a model for any scientific project requiring the coordination of resources and energy to solve a particular problem.

Mankiewicz, Herman J. (1897–1953) American film producer and screenplay writer. Mankiewicz, the older brother of screenplay writer and director Joseph MANKIEWICZ, enjoyed considerable success in HOLLYWOOD both as a producer of commercial comedies and as a serious screenplay writer. He began his career as a New York theater critic in the 1920s contributing to the *New Yorker*, among other publications. Mankiewicz came to Hollywood in 1926 and, after a stint of writing titles for SILENT FILMS, came to prominence as the producer of the MARX BROTHERS films *Monkey Business* (1931), *Horsefeathers* (1932) and *Duck Soup* (1933). He also wrote the screenplays for numerous films, including *Dinner at Eight* (1933) and *The Pride of the Yankees* (1942). But Mankiewicz remains best known for his collaboration with Orson WELLES on the ACADEMY AWARD-winning screenplay for the classic film *Citizen Kane* (1941). Controversy continues over the question of whether Mankiewicz or Welles had the major hand in the screenplay.

Mankiewicz, Joseph L(eo) (1909–1993) American film director, producer and screenwriter. Mankiewicz, the brother of screenwriter and producer Herman J. MANKIEWICZ, became one of the most influential HOLLYWOOD directors of the 1940s and 1950s. He began his career as a journalist, then moved to writing English subtitles for German films, before coming to Hollywood in 1929. His early screenplays include *Million Dollar Legs* (1932) and *Our Daily Bread* (1934), a socially conscious—and

controversial—film directed by King VIDOR. Mankiewicz also produced films, most notably *The Philadelphia Story* (1940). In the 1940s he took up directing his own scripts and, remarkably, won Oscars for Best Director and Best Screenplay in consecutive years for *A Letter to Three Wives* (1949) and *All About Eve* (1950). His career suffered from the commercial disappointment of *Cleopatra* (1963), but he later worked on the acclaimed mystery *Sleuth* (1972), starring Michael Caine and Laurence OLIVIER.

Manley, Michael (1925–1997) Jamaican prime minister. Manley's father, **Norman Washington Manley**, was Jamaica's first prime minister and the founder of the People's National Party. Michael Manley was appointed to the Senate by his father in 1962. Five years later, he was elected to the House of Representatives. When his father retired in 1969, Manley succeeded him as leader of the People's National Party. In 1972 he began his first term as prime minister and attempted to introduce socialist reforms. He alienated the United States by his overtures to Fidel CASTRO and by the Jamaican government's acquisition of 50 percent of American and Canadian companies' Jamaican interests. He was reelected in 1976 but was unable to curb Jamaica's increasing unemployment. In 1980 Edward P. Seaga of the Jamaica Labor Party became prime minister. With a more moderate platform than he had maintained in the 1970s, Manley returned to power in 1989 when the People's National Party won 44 of the 60 seats in Parliament. Manley upheld the good relations with the U.S. established by Seaga, but also proposed a rebuilding of Jamaica's schools and tax breaks and incentives to small farms and businesses. Manley was forced to resign his office in 1992.

Mann, Thomas (1875–1955) German novelist, story writer and essayist. Mann, who was awarded the NOBEL PRIZE for literature in 1929, is widely regarded as one of the greatest German writers of the 20th century. Two of his most famous works are the novella *DEATH IN VENICE* (1911) and the novel *THE MAGIC MOUNTAIN* (1924). Mann, whose brother Heinrich also became a renowned novelist, was raised in a

middle-class bourgeois family whose values he depicted in his first novel, *Buddenbrooks* (1901). Over the next two decades, Mann devoted much of his energies to the novella and short story: *Tristan* (1902), *Tonio Kroger* (1903), *Felix Krull* (1911) and *A Man and His Dog* (1918) being prominent examples. In 1933 Mann, an outspoken opponent of the NAZIS, exiled himself from GERMANY and lived in California from 1930 until after the war. Other novels by Mann include the tetralogy *Joseph and His Brothers* (1933–43) and *Doctor Faustus* (1948).

Mann Act U.S. law enacted in 1910 and aimed at abolishing the “white slave trade” (prostitution). The federal law bans the transportation of women across state lines for immoral purposes. Little used during the second half of the century, the first recorded prosecution under the act involved a celebrity. Heavyweight boxing champion, Jack JOHNSON, the first black American champion, was prosecuted under the act after he encouraged a white woman whom he later married to leave a brothel where she was working to travel with him to another state. After Johnson was convicted and sentenced to a year in jail, he fled the country but ultimately returned and served his sentence.

Mannerheim, Carl Gustav Emil (1867–1951) Finnish military and political leader, president of FINLAND. Born of a wealthy and distinguished Finnish-Swedish family in Villnaes—in what was then the Russian province of Finland—he was trained as a soldier and commissioned in the Russian imperial army (1889). He served in the RUSSO-JAPANESE WAR (1904–05) and by the outbreak of WORLD WAR I had attained the rank of general in the czar's army. He was a commander in the war, returning home in 1917, when Finland declared its independence. In 1918, after Finnish BOLSHEVIKS occupied Helsinki, Mannerheim organized a White counterforce and, with German help, drove the communists from Finland. He served briefly as regent of Finland and was defeated in the presidential elections of 1919. He was appointed head of the Finnish defense council in (1931) and built the Mannerheim Line, an unsuccessful attempt to stem Soviet invasion, which

occurred in 1940. He commanded Finnish forces in the RUSSO-FINNISH WAR (1939–40) and led his troops against the Soviets again during WORLD WAR II (1941–44). In 1944 he was appointed president of Finland and concluded an armistice with the USSR. He retired in 1946.

Manning, Olivia (1908–1980) British novelist best known for six novels that together comprise a series titled *Fortunes of War*, which Anthony BURGESS has called “the finest fictional record of [WORLD WAR II] produced by a British writer.” Born in Portsmouth, England, Manning was raised in Ireland. Just before the outbreak of World War II she accompanied her new husband to Bucharest, Romania, where he lectured for the BRITISH COUNCIL. As German forces invaded the Balkan nations, the couple fled first to Athens, then to Egypt and finally to Jerusalem, in Palestine. Following the war they returned to London, where Manning lived and wrote until her death. Her first novel, *Among the Missing*, was published in 1949, and several others followed during the 1950s. The three books in *The Balkan Trilogy* (the first part of *Fortunes of War*) appeared in 1960, 1962 and 1965, respectively; the six-novel series was completed in *The Levant Trilogy* (1977–80). *Fortunes of War* takes a somewhat feminist view of personal relations during the war, but its scope and richness have earned it comparison with such masterpieces as Tolstoy’s *War and Peace* and DODGER’S *The Demons*. Manning was awarded a CBE in 1976.

Manning, Timothy Cardinal (1909–1989) Roman Catholic archbishop of Los Angeles (1970–85). After being appointed to the post in Los Angeles, he worked to heal rifts that had opened between the diocese and the city’s black and Hispanic Catholics. He was a liberal on social issues such as the VIETNAM WAR and the 1983 deportation of Salvadoran refugees, but conservative on theological issues such as ABORTION and birth control. He was elevated to cardinal in 1973.

Man O’War (1917–1947) Thoroughbred racehorse. Until SECRETARIAT, no modern racehorse was mentioned in the same breath as Man O’War. Bred by the Belmont family, the big chestnut made

his racing debut in 1919 and won by six lengths. Although handicappers continued to increase the weight he was asked to carry, he knew defeat only once, and that was the result of an inexperienced starter operating the gate. He achieved international celebrity status as he shattered track records wherever he ran. Never a Triple Crown winner, as he was not entered for the Kentucky Derby, he won the Belmont by 20 lengths and set world and American records for the 1 3/8 miles at 2:14 1/5 (2:14:12). After winning 19 of his 20 races, Man O’War was retired as a three-year-old because the higher weights he would be asked to carry as a four-year-old increased the risk of injury. He was an outstanding stud, and many hundreds of successful racehorses can trace back to Man O’War on either side of their pedigree, including the great WAR ADMIRAL. Man O’War died of a colic attack at the age of 30. His memorial service was attended by thousands, and he was mourned by millions throughout the world.

Mansfield, Katherine (Katherine Mansfield Beauchamp) (1888–1923) British short story writer. Mansfield was born in New Zealand but moved to London in 1908. After a very brief marriage (1909), she became pregnant. Her first collection of stories, *In a German Pension* (1911), reflects her experience of giving birth to a stillborn child in Bavaria. In 1911 Mansfield met John Middleton MURRY, editor of *Rhythm* (to which she contributed short stories), and married him in 1918. They were friends of Frieda and D. H. Lawrence, with whom they founded the short-lived *Signature* magazine. Mansfield’s other collections include *Bliss and Other Stories* (1920), *The Garden Party and Other Stories* (1922), and *Something Childish* (1924). Mansfield’s original and sometimes ironic stories evidence the influence of Anton CHEKHOV. She died of tuberculosis in a sanatorium in France.

Mansfield, Mike (1903–2001) U.S. senator. A Democrat from Montana, Mansfield served a record 16 years as the majority leader of the U.S. Senate, from 1961 to 1977. He was particularly known for his influence in foreign affairs, and had a clear vision of the requirements of national security and balance-of-power relationships. He

also served 10 years in the U.S. House of Representatives. He carried out foreign diplomatic assignments for Presidents Dwight D. EISENHOWER, John F. KENNEDY and Lyndon B. JOHNSON. He was appointed ambassador to Japan by President Jimmy CARTER, and retained the position under President REAGAN.

Manship, Paul (1885–1966) American sculptor. Born in St. Paul, Minnesota, he was educated at the St. Paul Institute of Arts, the Pennsylvania Academy of the Fine Arts and the American Academy at Rome, where in 1909 he was awarded the Prix de Rome. Manship used his rigorous academic training and his immersion in the art of ancient Rome and Renaissance Italy as inspiration for his muscular, realistic sculpture of human and animal figures, often drawing on classical mythology for subject matter. Usually working in bronze or marble, he produced many individual sculptures, such as *Dryad*, *Little Brother* (Metropolitan Museum of Art, New York City) and *Pronghorn Antelope* (Art Institute of Chicago), as well as major public commissions, including *Actaeon* (Brookgreen Gardens, Georgetown, S.C.) and *Prometheus* (Rockefeller Center, New York City).

Manson, Charles (1934–) American mass murderer. Born in Cincinnati, Ohio, Manson was a habitual criminal who had served a number of terms in prison before setting up his notorious “family” commune in the California desert in the 1960s. His young hippie following, mainly women, believed that Manson was a godlike figure and subscribed to his bizarre, drug-riddled, and satanist-tinged apocalyptic philosophy. His complete control over this cult was exerted in the murders that he masterminded. At his direction, members of his group savagely killed seven people, including actress Sharon Tate, in two houses near Beverly Hills in August 1969. The bloody details of the crimes were front-page news for months—as were the subsequent Los Angeles trials of Manson and four of his accomplices. Manson was found guilty of murder and in 1971 was sentenced to death. When California abolished the death penalty, his sentence was commuted to life imprisonment.

Manstein, Erich von (1887–1973) German soldier. A general during WORLD WAR II, he engineered the Nazi invasion of Western Europe and led conquering German troops into France. As commander of the 11th German Army, he defeated forces of the USSR in the Crimea in 1941 and in 1942 was unsuccessful in efforts to relieve the troops of General Friedrich von Paulus at STALINGRAD (see WORLD WAR II ON THE RUSSIAN FRONT). A critic of HITLER'S Russian campaign, von Manstein was dismissed from duty in 1944. Condemned to an 18-year prison sentence by a British court in 1949, he was freed in 1953.

Manteuffel, Hasso von (1897–1978) German general who was commander of the Nazi attack during the BATTLE OF THE BULGE in WORLD WAR II.

Mantle, Mickey Charles (1931–1995) American baseball luminary. Born in Oklahoma, as a boy Mantle was groomed for baseball by his father, who named him in honor of Mickey Cochrane, a great catcher. Signed in high school by the New York Yankees, Mantle played in the minor leagues after graduation. In 1951 he was brought to New York as a centerfielder. Beginning in 1952, he hit over .300 in 10 of his 18 seasons. He was the American League's most valuable player in 1962. He hit 54 home runs in 1961 (the same year his teammate Roger MARIS hit 61 to break Babe RUTH's record by one), and played in 12 World Series. He retired in 1969. His autobiography is titled *The Mick*.

Man Who Was Thursday, The G. K. CHESTERTON'S best-known novel, a seminal work in the history of the modern fantastic tale. Published in 1908 it is, by turns, a detective story, allegory, and (according to its subtitle) "nightmare" whose violently bizarre imagery and baffling ambiguity have been compared to Franz KAFKA. A young detective infiltrates a band of anarchists bent on destroying the world only to discover that each member, like him, is also a detective in disguise assigned to the same case. Meanwhile, the group's leader, the diabolically mysterious "Sunday," leads them all on a mad chase ultimately revealing himself to be a godlike entity who mocks their efforts. Man is born to

search but not necessarily to understand, he says: "Since the beginning of the world, all men have hunted me like a wolf—kings and sages, and poets and law-givers, all the churches, and all the philosophers. But I have never been caught yet." Life, while not a sinister conspiracy, may yet turn out to be a cosmic prank. According to his *Autobiography* (1937) Chesterton wanted to vanquish with 20th-century optimism the pessimism and despair of the 19th century. However, this tour-de-force of paradoxes also implies any real meanings in life must remain secrets, hidden behind inscrutable masks.

Manzu, Giacomo (1908–1991) Italian sculptor. Born in Bergamo, he was apprenticed to a woodcarver in 1919, traveled to Paris in the late 1920s and settled in Milan in 1930. Aware of avant-garde movements in sculpture, he nonetheless chose representational works of classical antiquity and of such masters as Donatello and Rodin as his models. Mainly executed in bronze, his work is figurative, dignified and calm—often with a religious tone or subject matter. Among his many commissioned sculptures are the bronze doors at Salzburg Cathedral (1958) and the bronze *Door of Death* (1962) at St. Peter's Basilica in Rome.

Maoism System of communism adopted in CHINA under MAO ZEDONG. Maoism envisions a more flexible political system than Marxism-Leninism and claims that self-reliance is more important than state authority—and that the concept of revolutionary momentum, as expressed in the CULTURAL REVOLUTION, is more important than the state machine. Various terrorist groups in the West professed themselves to be Maoist, but in China Maoism waned under Mao's successors, who were concerned most of all with modernizing the nation's economy.

Mao Tse-tung See MAO ZEDONG.

Maowad, René (1925–1989) Lebanese politician, president of LEBANON (1989). A Maronite Christian from northern Lebanon, the moderate Maowad had been a member of Parliament since 1957 and had served as a cabinet minister three times. After the resignation of President Amin Gemayel in Sep-

tember of 1988, there were two rival interim premiers—General Michel Aoun, head of a military cabinet in Christian east Beirut that claimed to be Lebanon's sole legitimate government, and Selim al-Hoss, a Sunni Moslem in west Beirut. Following Aoun's declaration dissolving Parliament, 30 members of Parliament, most of them Christians, disputed his right to do so. Joining together with 27 deputies (mostly Muslim) they elected Maowad as Lebanon's 9th president in November 1989. Maowad was assassinated after only 17 days in office when a bomb exploded next to his motorcade on November 22, in Muslim west Beirut. No group claimed responsibility for the bombing. Another moderate, Elias Hrawi, was quickly elected president by Parliament on November 24, 1989.

Mao Zedong (1893–1976) Chinese political leader, founder of the People's Republic of CHINA. Born into a peasant family in Shao-shan, Hunan province, he studied the traditional Chinese classics and also received a modern Western education. He first encountered Marxism while working at Peking University and was soon converted to its doctrine. Mao was a founding member of the Chinese Communist Party (CCP) in 1921 and became its leader in Hunan. In a united effort with the KUOMINTANG, he organized peasant and industrial unions and became (1926) director of the Peasant Movement Training Institute. The CCP and the Kuomintang split in 1927. In the ensuing purge of communists, Mao fled to the countryside and, along with CHU TEH, formed a communist-led guerrilla army that operated in the hinterlands from 1928 to 1931. This stress on the rural areas, with support coming from the peasantry rather than from an urban proletariat, was to be the hallmark of the Chinese brand of communism that Mao pioneered.

In 1931 Mao was named chairman of the newly created Soviet Republic of China, with headquarters in Kiangsi province. Battered by attacks from the Nationalist forces led by CHIANG KAI-SHEK, Mao led his Red Army in the epic LONG MARCH (1934–35), trekking 6,000 miles before reaching northern Shensi and establishing a new govern-

ment at Yenan. After the XIAN INCIDENT of 1936, Mao and his communists again collaborated with the Nationalists, this time forming a united front against the Japanese that lasted from 1937 to 1945. After the war, the uneasy alliance again broke and civil war (1946–49) resulted in the rout of the Kuomintang by Mao's forces and the establishment (1949) of the People's Republic of China with Mao as chairman.

His slogan-captioned attempts at making a truly Chinese communist stake began with the Hundred Flowers movement of 1956–57 in which intellectuals were encouraged to criticize the party. The second manifestation was in Mao's GREAT LEAP FORWARD (1958), a failed program that called for rapid industrial development and the total dismantling of private property. At the same time, Mao continued to struggle against domination by the USSR Forced from his chairmanship in 1959, he was replaced by LIU SHAOQI. However, Mao soon regained primacy by means of the CULTURAL REVOLUTION, which peaked in the late 1960s and was spearheaded by his wife, CHIANG CH'ING. During this period, the "little red book" of Mao's maxims became the ultimate authority for political correctness, and Mao and his ideology were the objects of fanatical worship. Liu was ousted in 1968, and in 1969 Mao, who had continued as chairman of the Communist Party, chaired the Ninth Communist Party Congress. The following year he was named supreme commander of the nation and the army.

Mao consolidated his power during the 1970s, drawing further away from the USSR and initiating ties with the U.S. highlighted by a 1972 Peking meeting with President Richard NIXON. Mao is recognized as one of the most important Marxist theoreticians, and his writings have had particular influence throughout the THIRD WORLD. He succeeded in creating an enormous social revolution and in unifying his huge and once-fragmented nation. However, the excesses of Mao's government have caused some diminishing of his stature in his homeland in the years since his death.

Mapai (Miphlegeth Poalei Israel) Israeli Workers' Party, founded in PALESTINE in 1930 and usually called the Labor Party. A moderate left-wing

party, it dominated Israeli governments until the election of Menachem BEGIN in 1977.

Mapam United Workers' Party, an Israeli socialist party far to the left of MAPAI, drawing much of its support from the kibbutzim.

Mapplethorpe, Robert (1946–1989) American photographer. Mapplethorpe was known for his dramatic, austere black-and-white photos, many with homoerotic or sadomasochistic content. Retrospectives of his work appeared at the Institute of Contemporary Art in Philadelphia, at the Whitney Museum of American Art in New York City, and elsewhere. In June 1989 the Corcoran Gallery of Art in Washington, D.C., announced that it had canceled a retrospective in order to avoid political controversy at a time when Congress was reviewing its annual appropriation for the National Endowment for the Arts, whose funds would have been used to underwrite the exhibit. The Washington Project for the Arts mounted the retrospective instead. In 1990 the Cincinnati Museum of Art and its director were tried but acquitted of obscenity charges after showing the same Mapplethorpe exhibit.

Maradona, Diego Armando (1960–) Argentine soccer player—the outstanding player of the 1980s. Maradona's hallmark was his phenomenal ball control and goal-scoring abilities. A phenom, Maradona made his professional debut at 15 for Argentinos Juniors in 1975. His goal-scoring rate was astounding, gaining him adulation throughout his homeland. Astonishingly, he was omitted from Argentina's 1978 World Cup winning team, but rebounded from this disappointment to become the focus of the 1982 World Cup side. Following the tournament he joined Spanish giant Barcelona, but after an injury-filled tenure there he was traded to Napoli in Italy, where his career regained its momentum. He led Napoli to its first Italian championship, but his greatest triumph was the 1986 World Cup, where his virtuoso performances gained Argentina the championship. Napoli regained the Italian title in 1990, but injuries and harassment seemed to disenchant Maradona. During the 1990–91 season

he missed training and games and in March 1991 was tested positive for drug use. In April the Italian authorities banned him from soccer for 15 months. Following a similar suspension from the 1994 World Cup, Maradona played for Boca Juniors until his retirement in 1997.

Maravich, Peter "Pistol Pete" (1948–1988) American basketball star. As a college basketball player, he was the greatest scorer in National Collegiate Athletic Association history. From 1968 to 1970, he scored a record 3,667 points for Louisiana State University. During his 10-year NBA career, he averaged 24.2 points per game. He led the league in scoring during the 1977 season and was inducted into the Basketball Hall of Fame in 1987. Throughout his career, he was known for his droopy socks and long hair.

Marble, Alice (1913–1990) U.S. tennis player. The top woman player of the late 1930s, she was credited with introducing the aggressive serve-and-volley style of play to women's tennis. She won the U.S. women's amateur singles title four times, in 1936, 1938, 1939 and 1940, and dominated the women's doubles championships with her partner Sara Palfrey Fabryan. She won the Wimbledon singles championship in 1939. In 1940 she turned professional, playing in exhibition matches and giving tennis clinics in the U.S. and abroad. In 1945, during the last months of World War II, she worked undercover as a U.S. intelligence agent in neutral Switzerland.

Marc, Franz (1880–1916) German painter. Born in Bavaria, he studied painting in Germany and became acquainted with modern art during trips to Paris in 1903 and 1909. In 1910 he met Auguste MACKE, who was to influence the expressionistic nature of his work. In 1911 he became a founding member of the BLAUE REITER group. Marc took the figures of animals, usually horses, as his primary subject matter, portraying them in an almost mystically evocative manner in richly vibrant colors and expressively rounded forms. Among his paintings in this genre are *Blue Horses* (Walker Art Center, Minneapolis) and *Yellow Horses* (1912, Staatsgalerie, Stuttgart). His later works

depict nature in increasingly abstract shards of form and color, as in *Tyrol* (1913–14, Bavarian State Museum, Munich). Already one of Germany's leading expressionist painters by the beginning of WORLD WAR I, his career was cut short by his death in battle at VERDUN.

Marceau, Marcel (1923–) French mime. Marceau has received international acclaim as a mime performer, instantly recognizable in his most famous persona of the amiable, white-faced Bip in such sketches as the “tug-of-war.” Influenced by the silent films of Charlie Chaplin, he began using wordless sketches while working as a teacher. As a solo performer he has appeared throughout Europe and the U.S. He established his own mime company in the late 1940s, which tours the world performing complete mime-dramas, such as the well-known drama based on Gogol's *The Overcoat* (1951). In 1998 Marceau was named a Grand Officer of France's National Order of Merit.

Marcel, Gabriel (1889–1973) French philosopher and playwright. Marcel was one of the leading representatives of Christian existential philosophy. Educated at the Sorbonne, Marcel served in the RED CROSS during WORLD WAR I. The central event of his life was his conversion to Roman Catholicism in 1929—an event he described in his writings as breaking through to true freedom by means of religious faith. Marcel was a philosophical adversary of the atheistic existentialism of fellow French philosopher Jean-Paul SARTRE. His major works include *Metaphysical Journal* (1927), the two-volume *The Mystery of Being* (1951) and *The Existential Background to Human Destiny* (1963). Marcel also wrote a number of plays with Catholic themes that were widely produced in their era.

“March on Rome” (1922) In the summer of 1922 Italy was in chaos; the government couldn't cope with the fascists, who had seized power in Bologna, Milan and other cities. Benito MUSSOLINI, leader of the National Fascist Party, demanded the government's resignation. Premier Luigi Facta belatedly declared a state of siege when the fascists began to march on Rome (October 28, 1922), but King VICTOR EMANUEL III refused to sign the martial

law decree, dismissing Facta. Mussolini, arriving by railroad sleeping car from Milan, found only 25,000 of his BLACK SHIRTS occupying Rome, but thousands joined them next day, coming on special trains to cheer Mussolini. The king permitted him to form a government to reestablish order.

March on Washington Massive civil rights rally held in Washington, D.C., on August 28, 1963. The march, organized by Rev. Martin Luther KING Jr., was attended by more than 200,000 people who gathered to demand immediate equality in jobs and full civil rights for American blacks. The demonstrators gathered in the morning at the Washington Monument, then marched down Constitution and Independence avenues to the Lincoln Memorial. There, almost completely filling the mall, they listened to addresses by the march's leaders, the most significant of which was Dr. King's eloquent speech in which he said “I have a dream.”

Marciano, Rocky (Rocco Francis Marchegiano) (1923–1969) American boxer. An all-around athlete, Marciano gave up a professional baseball career for boxing. As an amateur, he won all but three of his 30 fights. He turned to a professional boxing career in 1947 and began his climb to the heavyweight title. During that struggle, he became only the second person to knock out Joe LOUIS. In 1952 he fought the titleholder, Jersey Joe Walcott, and knocked him out for the title. Over the next four years, Marciano's title was challenged six times, and six times Marciano defended the title successfully. He retired an undefeated champion with 49 wins, 43 of them knockouts. He met an untimely death in a plane crash.

Marconi, Marchese Guglielmo (1874–1937) Italian electrical engineer and inventor. Marconi, the second son of a prosperous Italian country gentleman and a wealthy Irishwoman, was educated in Livorno and Bologna. He studied physics under several well-known teachers and learned about the work on electromagnetic radiation of Heinrich Hertz, Oliver Lodge, Augusto Righi and others. Marconi became interested in using Hertz's “invisible rays”

to signal Morse code and in 1894 began experimenting to this end at his father's estate. Although he was soon able to transmit radio signals over a distance of more than a mile, he received little encouragement to continue his work in Italy and was advised to go to England. Shortly after arriving in London in 1896 Marconi secured the interest of officials from the war office, the Admiralty and the postal service. He spent the next five years in demonstrating and improving the range and performance of his equipment—and in overcoming the prevailing skepticism. In 1897 he helped to form the Wireless Telegraphic and Signal Co. Ltd., which in 1900 became Marconi's Wireless Telegraphy Co. Ltd.

He achieved the first international wireless (i.e., radio) transmission, between England and France, in March 1899; this aroused considerable public interest and attracted attention in the world's press. In the same year the British navy's summer maneuvers, with several ships equipped with Marconi's apparatus, helped to convince the Admiralty and mercantile ship owners of the value of radio telegraphy at sea. In December 1901 Marconi for the first time transmitted radio signals in Morse code across the Atlantic, a distance of some 2,000 miles. Marconi created a sensation, becoming world famous overnight and silencing many of his critics from the scientific world, who had believed that radio waves could not follow the curvature of the Earth. But they did, and this phenomenon was explained by Arthur Kennelly in 1902 as being due to a reflecting layer—the ionosphere—in the Earth's atmosphere. Thus radio telegraphy became a practical system of communication, especially at sea. Marconi spent the rest of his life improving and extending his wireless and managing his companies.

Although a good deal of Marconi's work was based on the ideas and discoveries of others, he was responsible for some notable inventions. He held the first of all radio telegraphy patents based on the use of waves (1896); the elevated antenna (1894); patent 7777, which enabled several stations to operate on different wavelengths without mutual interference (1900); the magnetic detector (1902); the horizontal directional antenna (1915); and the

timed-spark system of generating pseudocontinuous waves (1912). From about 1916, Marconi began to exploit the use of radio waves of short wavelength, which allowed a more efficient transmission of radiant energy. In 1924 the Marconi Company obtained a contract to establish shortwave communication between England and British Commonwealth countries; by 1927 a worldwide network had been formed.

Marconi was a plenipotentiary delegate at the 1919 PARIS PEACE CONFERENCE, and in 1923 he joined the Fascist Party and became a friend of MUS-SOLINI. Marconi received several honorary degrees and many awards, which included the NOBEL PRIZE for physics jointly with Karl Braun (1909), and was president of the Royal Italian Academy in 1930. At the hour of his state funeral, all post office wireless telegraph and wireless telephone services to the British Isles observed a two-minute silence.

Marconi Scandal British political scandal of 1912–13. When Britain's government ordered the British Marconi Company to build wireless stations throughout the British Empire in 1912, cabinet ministers were rumored to have profited from their knowledge of the scheme by buying shares in the company. A committee report (1913) cleared Attorney General Sir Rufus Isaacs, Lord Murray of Elibank and LLOYD GEORGE, then chancellor of the Exchequer, of corruption charges.

Marco Polo Bridge Incident Clash between Chinese forces and Japanese troops on July 7, 1937. It occurred at the Marco Polo Bridge that crosses the Yungting River at Wanping in China's northern Hopeh province. This incident marked the beginning of the Second SINO-JAPANESE WAR (1937–45). Provoked by the Japanese, who refused to negotiate, the action provided a convenient pretext for the Japanese occupation of Peking and Tientsin, while Chinese troops were forced to retreat to the south.

Marcos, Ferdinand Edralin (1917–1989) President of the PHILIPPINES (1965–86). Marcos was born in Ilocos Norte province. He served in both the Philippine and U.S. armies in WORLD WAR II and emerged from the war as a

highly decorated officer. Years later, Marcos dismissed persistent allegations that his war record has been fabricated. He claimed that the documentation of his military exploits had been destroyed in a fire. After spending 15 years in the Philippine legislature, Marcos was elected to his first term as president in 1965. He was reelected in 1969. In 1972 Marcos imposed martial law in the Philippines and adopted a new national constitution under which he became prime minister as well as president. The country remained under martial law until 1981. Marcos's grip on power in the Philippines began to weaken following the assassination in 1983 of Benigno Aquino, the nation's leading opposition figure, who was shot dead upon returning from exile. Marcos blamed the killing on a professional hit-man with ties to the communists, but the country's opposition movement accused the government of masterminding the murder. In the face of increasing unrest at home and new pressure from the U.S. to enact reforms, Marcos decided in November 1985 to call a snap election to test his popularity. The decision backfired when the opposition rallied around the presidential candidacy of Corazon AQUINO, who had assumed the mantle of leadership from her late husband. The subsequent elections, on February 7, 1986, were marred by fraud. Marcos declared himself victorious, but Aquino initiated a nationwide campaign of civil disobedience in an attempt to topple the government. Marcos's fate was sealed when the nation's two top military leaders resigned February 22 and threw their support to Aquino. Marcos left the country for Hawaii February 26 aboard a U.S. Air Force plane.

Marcuse, Herbert (1898–1979) German-born political philosopher and social critic. Marcuse taught at the Frankfurt Institute for Social Research before fleeing the Nazis in 1934. He immigrated to the U.S., where, over the next four decades, he taught at Harvard, Yale, Columbia and other universities. Strongly influenced by both Marx and Freud, Marcuse argued that society suffered from psychological and economic repressions that could be alleviated only by revolution. Marcuse was a major influence on the

New Left politics of the 1960s. His major works include *Reason and Revolution* (1941), *Eros and Civilization* (1955) and *One-Dimensional Man* (1964).

Mariana Islands, Northern (Commonwealth of the Northern Mariana Islands) The Northern Mariana Islands lie in the North Pacific Ocean and cover an area of 184 square miles (see page 957); the southern islands are limestone with fringing coral reefs, while the northern islands are volcanic. The capital is SAIPAN. Inhabited from 1500 B.C., the islands came under Spanish colonial rule in 1668. After losing the Spanish-American War of 1898, Spain ceded GUAM to the U.S. and sold the rest of the Marianas to Germany. With the outbreak of WORLD WAR I, JAPAN took possession of the German islands. In 1920 the LEAGUE OF NATIONS mandated control of Micronesia (which includes the Marianas) to Japan. In August 1944 Japanese forces in the Marianas were defeated by the U.S., and in 1945 the U.S. Navy assumed control of Micronesia. In 1947 the UNITED NATIONS established the Trust Territory of the PACIFIC ISLANDS, a "strategic trust" under U.S. administration. In a plebiscite in June 1975 the people of the Northern Marianas voted to become a self-governing U.S. commonwealth territory separate from the rest of the Micronesian territories. The new status came into force in January 1978, elections for the territory's governorship and bicameral legislature having been held in December 1977. In 1984 the U.S. government entered into negotiations with the landowners on Tinian Island over the use of their land for military purposes. In November 1986 the Northern Mariana islanders were granted U.S. citizenship. The total population in 2004 was just over 78,000.

Marich, Man Singh Shrestha (1942–) Nepalese political leader, selected by King BIRENDRA to be prime minister in 1986. Shrestha was born an illegitimate child in a low-caste family of the Newar clan. At one time a member of the Nepali Communist Party, he was a high school headmaster before winning an uncontested election to the Rashtriya Panchayat. In 1990 Marich was succeeded by LOK-ENDRA BAHADUR CHAND.

Mariel Boatlift Beginning in April of 1980, boatloads of Cuban refugees began leaving Mariel Harbor in CUBA to emigrate to the U.S. These freedom flotillas, as they came to be known, were headed mostly for Florida. The U.S. was having difficulties assimilating the influx of refugees, and U.S. Coast Guard blockades were expensive and largely unsuccessful. Some of the Cubans were contained in refugee and resettlement camps; others were confined in federal prisons to undergo expulsion hearings—a move ordered by President Jimmy CARTER in June. He also announced a plan in September to help Florida with its resettlement efforts, which included federal absorption of the costs of resettlement, prosecution of boat owners who attempted to profit from the refugees and relocation of some to a settlement camp in Puerto Rico. On September 26, the Cuban government closed Mariel Harbor, thus ending the boatlift—but some 125,000 Cubans entered the U.S. during its five-month duration.

Marin, John (1870–1953) American painter. An important early modernist, he was born in Rutherford, N.J. Marin studied architecture and worked as an architectural draftsman before turning to the study of painting at the Pennsylvania Academy of the Fine Arts from 1899 to 1901. Traveling to Europe in 1905, he was influenced by the work of James McNeill Whistler, and lived a meager existence abroad for five years. After he returned to the U.S. his work was first exhibited by Alfred STIEGLITZ (1909). He soon drew acclaim as a superb watercolorist and was recognized for his powerful use of the medium. Taking for his subject the skyline of New York City, the deserts of Taos, New Mexico, and the seascapes of Maine, he painted with energy and expressiveness, employing bold brushstrokes, colors that are alternately subtle and vivid and an approach that mingled the abstract with the realistic. Marin's oils and watercolors are included in virtually every important collection of modern American art. (See also MODERNISM.)

Mariner probes A series of U.S. planetary probes, launched from 1962 to 1973, that greatly expanded our knowledge of the solar system. *Mariner 1* was

launched on July 22, 1962, but was destroyed after veering off course following its launch. *Mariner 2* was launched on August 27, 1962, and flew by Venus in December of that year, measuring the Venusian temperature and confirming the existence of the solar wind. *Mariner 3* was launched on November 5, 1964, but failed to obtain the necessary velocity and headed for an unplanned orbit around the sun; communication with the craft was lost 10 hours after launch. *Mariner 4* was launched November 28, 1964, and passed by Mars in July 1965, returning photographs of the planet's surface. *Mariner 5* was launched June 4, 1967, and passed Venus in October of that year, measuring the Venusian temperature, testing its atmosphere and determining the planet's mass and diameter. *Mariner 6* was launched on February 24, 1969, and its twin *Mariner 7* was launched on March 27, 1969; they passed Mars in July and August, respectively, returning photographs and performing experiments testing the planet's temperature, atmosphere and size. *Mariner 9* was launched May 30, 1971, and entered Martian orbit in November of that year, returning more than 7,000 photographs of the planet before losing contact with Earth in October 1972. *Mariner 10* was launched November 3, 1973, flying by Venus in February 1974 and by Mercury in March and September 1974 and again in March 1975; the Mercury flybys resulted in the discovery of the planet's magnetic field. *Mariners 11* and *12* were renamed *Voyager 1* and *Voyager 2*. The latter was launched on August 20, 1977, and flew by Jupiter in July 1979, Saturn in August 1981, Uranus in January 1986 and Neptune in August 1989. *Voyager 1*, which was delayed by technical problems, was launched on September 5, 1977, and passed by Jupiter in March 1979, Saturn in November 1980 and Uranus in December 1985.

Marinetti, Filippo T(ommaso) (1876–1944) Italian aesthetic theorist, essayist and poet. Marinetti is best remembered as the principal ideologue for the right-wing, Italian segment of the multinational aesthetic movement known as FUTURISM. In his *Foundation and Manifesto of Futurism* (1908) and other writings, Marinetti argued for the aesthetic beauty of modern technology, pitted poetic dic-

tion against common language usage and held that nationalism and warfare were worthy of artistic exaltation. In the 1920s and after, Marinetti became a major spokesman for the fascist regime of Benito MUSSOLINI.

Marini, Marino (1901–1980) Italian sculptor. Beginning his career as a painter, he continued to paint and create prints while becoming an internationally known sculptor. Marini, influenced early in his career by classical Roman statuary, developed an intensely individualistic style that found its finest expression in figures of horses and riders. These powerful equestrian sculptures are exemplified by the monumental *Horse and Rider* (1952–53) in the collection of the Hirshhorn Museum, Washington, D.C.

Maris, Roger Eugene (1934–1985) American baseball player. In 1961, as an outfielder for the New York Yankees, Maris set an all-time single-season record of 61 home runs, breaking Babe RUTH's record of 60 set in 1927. He received much hostile media and fan attention from those who did not wish to see Ruth's record overturned. There were also those who would have preferred to see Maris's teammate Mickey MANTLE break the record. Maris played with the Yankees until 1966 when he was traded to the St. Louis Cardinals. He retired from baseball in 1968 with a career total of 275 home runs in the major leagues.

Maritain, Jacques (1882–1973) French philosopher. Educated at the Sorbonne and the University of Heidelberg, Maritain was a Protestant who converted to Roman Catholicism (1906) under the influence of the mystical poet Léon Bloy and an advocate of scientific materialism who was started on a path toward neo-Thomism by the philosophy of Henri BERGSON. He taught at a number of universities in France and the U.S. and was the author of over 50 books of philosophy and numerous scholarly articles. His applications of the philosophy of St. Thomas Aquinas to the contemporary world can be found in his works on metaphysics, politics, religion and aesthetics. Among his books are *The Degrees of Knowledge* (1932, tr. 1937), *True Humanism* (1936, tr. 1938), *Man*

and the State (1951) and *On the Use of Philosophy* (1961).

Markelius, Sven (1889–1972) Swedish architect who introduced the vocabulary of MODERNISM through the INTERNATIONAL STYLE to Sweden. Markelius was trained at the Stockholm Technical College and Academy of Fine Arts. The concert hall at Halsingborg (1932) was his first major work. His simple and elegantly modern Swedish Pavilion at the NEW YORK WORLD'S FAIR OF 1939 brought him international notice. He was Stockholm's city architect and planner from 1944 to 1954 and was the primary planner of the satellite town of Vällingby near Stockholm, a much-admired example of advanced concepts in town planning. Markelius also often combined work in architecture with interior design. He was a member of the team that developed the design for the United Nations Headquarters building in New York; the interior of one of the council chambers there is a fine example of his work. Markelius's work combines the ideas of International Style modernism with a certain humane quality that is characteristic of the best of Scandinavian design.

Markert, Russell (1899–1990) U.S. choreographer. In 1916, he formed the high-kicking chorus line "The 16 Missouri Rockets." They were later billed as "The American Rockets" and were hired by showman Samuel (Roxy) Rothafel for the opening of RADIO CITY MUSIC HALL in 1932. Markert acted as director and choreographer for the troupe, which became known as the Radio City Musical Hall Rockettes, until his retirement in 1971.

Markham, Beryl (1902–1986) British-born aviator. She grew up in KENYA, where she learned to fly and became a bush pilot. She pioneered the scouting of elephants and other wild game from the air. The first person to fly solo across the Atlantic from east to west, her historic flight took place in September 1936 in bad weather. She took off from Abingdon, England and landed more than 21 hours later in a Nova Scotia bog. New York City, her intended destination, honored her with a ticker tape parade. Her historic flight was described at length in her memoirs, *West with the*

Night, first published in 1943. Upon its rerelease in 1983, it was hailed by critics in Britain and the U.S. Also a professional horse trainer, she had six Kenya Derby winners.

Markievicz, Countess Con(stance) (Constance Gore-Booth) (1868–1927) Irish nationalist. A member of a prominent aristocratic Protestant family in the west of Ireland, Constance Gore-Booth married a Polish count in 1900. She became involved in radical Irish politics and participated in the EASTER REBELLION (1916). She was sentenced to death but pardoned and released from prison in 1917. The following year, as a SINN FÉIN candidate, she became the first woman elected to the British Parliament but (along with the other victorious Sinn Féin candidates) refused to take her seat. Instead, she became a member of the new provisional Irish Parliament. W. B. YEATS celebrated Markievicz and her sister in his poem "In Memory of Eva Gore-Booth and Con Markievicz," although he later condemned her radical politics.

Mark Morris Dance Group American dance repertory group (1980–). In 1980 American professional dancer Mark Morris formed the Mark Morris Dance Group (MMDG) with several of his friends and colleagues, and premiered a show at the Merce Cunningham Studio in New York City. Since its relatively inauspicious beginning, the MMDG has gone on to perform at the annual Brooklyn Academy of Music's Next Wave festivals (1984–2003) and the Jacob's Pillow Dance Festival in Lee, Massachusetts (1986–2003), and to offer regular shows in touring circuits in major cities and in foreign countries as far afield as Australia. In addition to these touring performances, the MMDG gained great recognition in 1988 when it became the official dance company for the national opera house in Brussels, Belgium, the Théâtre Royal de la Monnaie, where it has staged performances of *L'Allegro, Dido and Aeneas* and *Platée*.

Markova, Alicia (Lillian Alicia Marks) (1910–2004) English dancer. One of the great Giselles of her time, Markova began her career as a member of Serge DIAGHILEV'S BALLETS RUSSES (1925–29). From 1930 to 1935 she

danced with Ballet Rambert and Vic-Wells Ballet, becoming the first English ballerina to dance the classic roles while creating others in many new ballets, such as Frederick ASHTON'S *Facade* (1931). As a ballerina with AMERICAN BALLET THEATRE (1941–46) she created many roles, including Juliet in Antony TUDOR'S *Romeo and Juliet* (1943). The Markova-Dolin Company, originally formed with Anton DOLIN in 1935, was re-formed in 1945 and became the London Festival Ballet in 1950. Since her last performance in 1962, Markova served as ballet director of the New York Metropolitan Opera (1963–69), visiting professor of ballet at the University of Cincinnati (1971–74) and first president of the London Festival Ballet.

Marley, Bob (Robert Nesta Marley) (1945–1981) Jamaican reggae singer. With his group The Wailers, he helped establish the popularity of Reggae music in Britain and the U.S. during the 1970s. An outspoken advocate of Rastafarianism, he survived an assassination attempt in 1976.

Marne, First Battle of the (1914) In August 1914 German armies invaded Belgium and northeastern France, advancing to the Marne River within 15 miles of Paris. The French staged a desperate counterattack to the German right flank on September 6, 1914, which opened a gap in the German line. British and French troops advanced into the opening, attacking the other flank. The German armies, pushed further apart, retreated to the northern bank of the Aisne River, digging trench defenses and thus initiated the trench warfare of the next four years. The battle quashed German expectations of a quick and easy victory.

The **Second Battle of the Marne** began in late May 1918 when German forces began a powerful offensive against French positions, fighting their way to the Marne. After crossing the Marne on July 15, a German division was trapped and surrendered. On July 18, French, British and American troops under supreme Allied commander Marshal Ferdinand FOCH counterattacked; by mid-August the Germans were in full retreat and back to pre-war German boundaries by September. They were soon to sue for peace.

Marquand, J(ohn) P(hilips) (1893–1960) American novelist. Born in Wilmington, Delaware, to an aristocratic New England family, he attended Harvard University, where he encountered the Boston Brahmins (who were to be the main subjects of his gently satirical novels). His earliest fiction was in the detective story genre, and he won fame with the character of the Japanese sleuth Mr. Moto. Marquand achieved acclaim as a serious novelist with the publication of *The Late George Apley* (1937), a novel of manners among Boston's best, brightest and richest, which was awarded a Pulitzer Prize. His other novels include *Wickford Point* (1939), *So Little Time* (1943) and *Point of No Return* (1949).

Marsalis, Wynton (1961–) Celebrated American jazz trumpeter who was a key participant in a series of dynamic events crucial to reenergizing the 1980s jazz scene. Marsalis, the younger brother of noted saxophonist Branford Marsalis and son of venerable pianist Ellis Marsalis, attained initial success at age 19 with Art BLAKEY and the Jazz Messengers. In 1981 his debut album as a leader led to the formation of his own group. Marsalis, like Benny GOODMAN, also won kudos for his classical playing. In 1984, he became the first musician to garner Grammy awards for jazz ("Think of One") and classical (Haydn/Hummel/L. Mozart Trumpet Concertos). Marsalis has been a vigorous spokesman for "authentic" jazz as embodied in the traditions of BEBOP and FUSION JAZZ, rock and rap. Also, Marsalis has insisted that jazz, "America's classical music," be accorded the same kind of respect tendered to European classical music. Through these varied activities, Marsalis has become a well-known media personality; indeed, his success has encouraged the promotion of a number of promising young jazz players, a phenomenon chronicled in a 1990 *TIME* magazine cover story. At the heart of Marsalis's success, though, is a commanding style in which his virtuosic technique and emotional depth are displayed with a neo-bop vocabulary suggesting the dexterity of Clifford BROWN and the dramatic poignancy of Miles DAVIS. Throughout the 1990s Marsalis has prolifically written, performed and

recorded music. As the director of the Lincoln Center Jazz Orchestra and Artistic Director of the Jazz at Lincoln Center organization, Marsalis has played an integral role in the production of the following performance works—*In This House, On This Morning* (1992), *Six Syncopated Movements* (1993), *At the Octoroon Balls* (1995), *Sweet Release* (1996), *Big Train* (1998), and *Them Twos* (1999). In 1996 he accepted a Peabody Award for his participation in the *Making the Music* series broadcast on National Public Radio. A year later Marsalis received a Pulitzer Prize in recognition for his musical work, *Blood on the Fields*. In 2001 Marsalis was designated a "Messenger of Peace" by UN Secretary-General KOFI ANNAN.

Marsh, Dame (Edith) Ngaio (1899–1982) New Zealand-born mystery novelist. She wrote 31 thrillers featuring a scholarly and charming detective, Chief Inspector Roderick Alleyn of Scotland Yard. In 1966 she was made a Dame of the British Empire by Queen Elizabeth II.

Marshall, George C(atlett) (1880–1959) American Army officer, diplomat and statesman. Born in Uniontown, Pennsylvania, Marshall attended the Virginia Military Institute and joined the army in 1902. After service in the Philippines and the U.S., Marshall held high administrative and planning posts in France during WORLD

WAR I and was an aide de camp to General John PERSHING (1919–24). He was stationed in China (1924–27), was assistant commandant of the Army Infantry School (1927–32) and headed several CIVILIAN CONSERVATION CORPS camps during the GREAT DEPRESSION. Having established a reputation for brilliant strategic and organizational skills, Marshall quickly rose to become assistant U.S. Army chief of staff and deputy chief of staff in 1938 and chief of staff in 1939, the year he was promoted to the rank of full general.

Warning of probable armed conflict ahead, he stressed military preparedness, significantly modernizing and enlarging the army, urging the passage (1940) of the Selective Service Act and reorganizing the War Department. After the outbreak of WORLD WAR II, he became Franklin D. ROOSEVELT's military adviser, accompanying the president to the Allied summit conferences and proving himself a consummate diplomat. In military affairs, Marshall directed U.S. operations in both Europe and the Pacific, coordinating the North African and Sicilian campaigns, aiding the besieged USSR, helping to plan the cross-channel invasion of the European continent and urging the dropping of the ATOMIC BOMB on Japan. He was named General of the Army in 1944.

Emerging from the war as a national hero, he retired from army service in 1945. That year he became President TRUMAN's emissary to China, where he failed in an attempt to achieve a settlement of its civil war and a coalition between opposing Nationalists and Communists. In 1947 he was appointed Truman's secretary of state. In this post, he was successful in urging a firmer American policy toward the Soviet Union and in formulating and implementing the European Recovery Program, or MARSHALL PLAN, a comprehensive program of economic and technical assistance aimed at rebuilding war-torn Europe. In recognition of the plan's success, he was awarded the 1953 NOBEL PEACE PRIZE. In poor health, Marshall resigned from office in 1949, but he was recalled to service (1950) after the outbreak of the KOREAN WAR as Truman's secretary of defense. During this period of service, he extended the draft and desegregated the armed forces. Marshall retired permanently in 1951, one of Amer-

U.S. Army general George C. Marshall (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

ica's most respected military and diplomatic figures.

Marshall, Thurgood (1908–1993)

First black justice of the U.S. Supreme Court (1967–91). A native of Baltimore and a graduate of Howard University Law School, Marshall became involved with the NAACP before WORLD WAR II and headed the NAACP Legal Defense and Education Fund. In this position, he was at the very center of the U.S. civil rights movement, coordinating the NAACP's legal challenges to segregation in voting rights, education and public accommodations. Marshall was chief counsel in the famous *BROWN V. BOARD OF EDUCATION*, in which the Supreme Court outlawed separate but equal schools. He was appointed a federal judge by President John F. KENNEDY and in 1967 was elevated to the Supreme Court by President Lyndon JOHNSON, who early in his career had supported segregation. Marshall joined the liberal wing of the Court and helped affirm much of the legislation of the era aimed at protecting minorities. In later years, as the Court grew more conservative, he became known for his liberal dissents and his public criticism of both politicians and potential nominees to the Court.

Marshall Islands The Marshall Islands consist of two island chains of 30 atolls and 1,152 islands, including the former U.S. nuclear test sites of BIKINI

and ENIWETOK; total land area is 70 square miles (see map, page 957). The capital is Majuro. An influx of American and European whalers, traders and missionaries in the 19th century caused major social upheaval. Annexed by Spain in 1874, the Marshalls became a German protectorate in 1885. With the onset of WORLD WAR I, JAPAN took possession of the islands. In 1920 the LEAGUE OF NATIONS gave Japan a mandate to administer Micronesia, and in 1945, at the end of WORLD WAR II, the victorious U.S. Navy took control. In 1947 the UNITED NATIONS established the Trust Territory of the Pacific Islands, under U.S. control. From 1946 to 1958 the U.S. used Bikini and other atolls in the Marshalls to test nuclear weapons. Preparations for Micronesian self-government led to a referendum in July 1978 on a common constitution for the whole territory. The Marshallese voted against, and in 1979 the Republic of the Marshall Islands' separate constitution took effect. In 1982 over 1,000 dispossessed landowners from Kwajalein Atoll launched Operation Homecoming, a four-month protest against the U.S. military's use of the atoll as a missile testing range.

In October 1986 a Compact of Free Association between the Marshall Islands and the U.S. government came into effect: The Marshalls would be internally self-governing while the U.S. would retain responsibility for foreign relations and defense. The compact also ensured that the U.S. would maintain its military bases in the islands for at least 15 years and annually provide \$30 million in economic aid. U.S. administration of Micronesia formally ended in November 1986. Following the UN's decision to terminate the island's trustee status in 1990, the Marshall Islands were admitted to the world body in 1991. Despite a continued dispute with the U.S. federal government concerning additional compensation payments for the damage caused by the Bikini Atoll nuclear test in the 1950s, the Marshall Islands have sought to improve ties with the U.S. In 2003 U.S. president George W. BUSH agreed to provide the islands with \$3.5 billion in aid over a 20-year period.

Marshall Plan U.S. plan—formally, the European Recovery Program—for

the reconstruction of Europe after WORLD WAR II. The plan was formulated by U.S. secretary of state George C. MARSHALL and his aides, with suggestions from the European nations. At the end of the war Europe lay in ruins. Marshall recognized that, without a comprehensive package of U.S. aid, Europeans—victor and vanquished alike, stateless people and displaced persons—would continue to suffer from hunger, disease, a depressed economy and political instability. Moreover, Marshall was wary of the Soviet Union's intentions and believed that it was necessary to revive western Europe economically and materially in order to prevent COMMUNISM from spreading further. He also believed that a revitalized Western Europe would stimulate U.S. production and trade. Marshall announced the plan during a commencement address at Harvard University (June 1947). "It is logical that the U.S. should do whatever it is able to do to assist in the return of normal economic health in the world, without which there can be no political stability and no assured peace," he said. "Our policy is directed not against any country or any doctrine but against hunger, poverty, depression and chaos." By the spring of 1948 Marshall had persuaded a majority in Congress to support the plan. The Marshall Plan provided \$17 billion in assistance to 16 European nations between 1948 and 1952 and was perhaps the most ambitious international peacetime project ever attempted. Immensely successful, it helped restore prosperity to devastated areas of Europe, most notably WEST GERMANY. For his role in developing the European Recovery Program, George C. Marshall was awarded the 1953 Nobel Peace Prize.

Martin, Frank (1890–1974) Swiss composer known for his contrapuntal techniques, and his use of harmony and stylized folk songs in his operas, ballets, instrumental and vocal works. A pianist and harpsichordist as well as a composer, Martin also taught at the Institute Jaques-Dalcroze (1927–38), was founder-director of the Technicum Moderne de Musique (1933–39) in Geneva and taught at the Cologne Hochschule für Musik in Germany (1950–57). His works include the oratorio *In terra pax*, which was specially

Supreme Court justice Thurgood Marshall (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

commissioned to commemorate the end of WORLD WAR II (1945), and his opera *Der Sturm* (1952–54; *The Tempest*).

Martin, Glenn (1886–1955) U.S. airplane manufacturer. Educated at Kansas Wesleyan University, Martin began to build gliders in 1907 and by 1908 was experimenting with pusher type airplanes. He taught himself to fly and built one of the first airplane factories in the United States in 1909, in Wichita, Kansas. Martin later produced the first American-designed airplanes for Liberty engines and constructed Martin bombers.

Martin, Graham A(nderson) (1912–1990) U.S. diplomat. Martin, the last U.S. ambassador to South VIETNAM, after the fall of SAIGON (1975), was sharply criticized for having mishandled the evacuation of American personnel. Thousands of Vietnamese who had worked for the U.S. were left behind, together with hundreds of classified documents.

Martin, Joseph William, Jr. (1884–1968) U.S. politician. He was elected as a Republican to the Massachusetts state legislature (1912–17). In 1925 he won a seat in the U.S. House of Representatives where he served for 42 years. He was elected minority leader in 1939, and he was Speaker of the House from 1947 to 1949 and 1953 to 1955. He created a strong Republican organization in the House, and opposed many of ROOSEVELT's and EISENHOWER's legislative programs.

Martin, Mary (Virginia) (1913–1990) American musical theater and film actress. She made her Broadway debut in 1938 in the Cole PORTER musical *Leave It to Me*, in which she sang the show-stopping “My Heart Belongs to Daddy.” She starred in Richard RODGERS and Oscar HAMMERSTEIN II's *South Pacific* (1949). In 1954 she created on Broadway the role for which she is best known, that of PETER PAN; the musical was presented on television soon afterward. She won a TONY AWARD for her performance in *The Sound of Music* (1959), as well as for *Peter Pan* and *Annie Get Your Gun*. Her son, Larry Hagman, starred in the television series *Dallas*.

Martin, Steve (1945–) American comedian, film actor and screenplay writer. Martin is one of the major comedic talents of his generation. He began his show business career in the 1960s as a writer for television and won an Emmy for his scripts for *The Smothers Brothers Comedy Hour*. In the 1970s he turned to stand-up comedy and won national attention for his appearances on *SATURDAY NIGHT LIVE*. He recorded two Grammy award-winning albums, *Let's Get Small* and *Wild and Crazy Guy*. Martin's famous stand-up image featured a pure white suit, which he sometimes wore along with bunny ears. In the late 1970s Martin turned to comedic film acting, a field in which he became preeminent. While maintaining great box office popularity, Martin is also highly regarded by critics for the genuine pathos he brings to many of his performances and for the diversity of roles and scripts he seeks out. Major films featuring Martin include *The Jerk* (1979), a tribute to Jerry LEWIS comedies; *Pennies from Heaven* (1981), a dark musical scripted by Dennis POTTER; *Dead Men Don't Wear Plaid* (1982), a witty spoof of FILM NOIR detective movies; *All of Me* (1984), for which he won a Best Actor Award from the New York Film Critics Circle; *Roxanne* (1987), a modern adaptation of *Cyrano de Bergerac*; *Dirty Rotten Scoundrels* (1988), in which he and Michael CAINE play a pair of con men; and *Parenthood* (1989). Martin continues to appear in comedy films such as *Housesitter* (1992) and *Bowfinger* (1999) and dramas such as *The Spanish Prisoner* (1997) as well as writing and directing stage productions, such as the highly acclaimed play *Picasso at the Lapin Agile* (1997). Martin has also written two successful novels, *Shopgirl* (2000) and *The Pleasure of My Company* (2003).

Martin du Gard, Roger (1881–1958) French novelist and playwright. Martin du Gard first achieved recognition with his second novel, *Jean Barois* (1913), a fictional portrait of the Dreyfus scandal. It was championed by André GIDE, who was to become a friend and correspondent. Martin du Gard is best known for the eight-volume *roman fleuve*, *Les Thibault* (the first six volumes were translated as *The*

Thibaults; the latter two as *Summer 1914*). Published between 1922 and 1940, the novels depict the degeneration of society prior to WORLD WAR I by following two bourgeois families—one Catholic and one Protestant. Martin du Gard received the NOBEL PRIZE for literature in 1937. Other works include *Confidence Africaine* (*African Secret*, 1931); the play *Un Taciturne* (*A Silent Man* 1932), and the unfinished novel begun in 1940, *Les Souvenirs du colonel Maumort* (*The Memoirs of Colonel Maumort*).

Martinelli, Giovanni (1885–1969) Italian-American tenor. Born near Padua, Martinelli made his concert and operatic debuts in Milan in 1910. He first achieved recognition when Giacomo PUCCINI selected him as the lead tenor for the premiere of his *THE GIRL OF THE GOLDEN WEST* in 1911. Martinelli made his American debut in Philadelphia in 1913, and months later he sang for the first time at New York's Metropolitan Opera. For 32 seasons, Martinelli was the Met's principal tenor in the Italian and French repertoires, singing some 50 leading roles.

Martínez Ruis, José (pseudonym: Azorín) (1873–1967) Spanish writer. Born in Manóvar, he studied law in Valencia, later becoming a noted and extremely prolific essayist, novelist and playwright. Influenced by ANARCHISM, he began as a leftist writer, but grew increasingly conservative as his career progressed. An important figure in the Generation of 1898, he was especially concerned with defining the nature of Spanish life and character. His compactly written essay collections include *El alma castellana* (1900), *Castilla* (1912) and *Clásicos y modernos* (1913). Among his many novels are the autobiographical *La voluntad* (1902), *Antonio Azorín* (1903) and *Las Confesiones de un pequeño filósofo* (1904), as well as the later experimental and surrealist works *Felix Vargas* (1928) and *Pueblo* (1930). His terse style and his concern with the continuity of Spanish history exercised an important influence on modern Spanish letters.

Martinique Martinique is a Caribbean island with a total area of 425 square miles. Its mountainous terrain includes a

dormant volcano, while the island's coastline is heavily indented and subject to hurricanes and flooding. The capital is Fort-de-France. Colonized by France in 1635, the island's capital, St. Pierre, was completely destroyed during a volcanic eruption of Mt. Pelée in 1902 that left only one survivor—a resident of the city's jail. In 1947 Martinique became a department of France. Demands for greater autonomy were expressed during the 1950s by the Parti Progressiste Martiniquais (OOM), founded and led by Aimé CESAIRE. Rioting in 1959 led to the French government devolving some of its powers in 1960, but a 1962 plebiscite produced a majority in favor of retaining departmental status. In 1974 Martinique also became a region of France and in 1982 was granted more autonomy. The left-wing parties, led by the PPM, succeeded in gaining a small majority on the new regional council, but the general council remained under the control of the right-wing and center parties. In 1986 the left-wing parties maintained their control of the regional council, but in elections to the general council in 1988, although they secured a majority of the seats for the first time, they failed to gain the presidency of the council. Since December 1999 when it signed the Basse Terre Declaration, the government of Martinique, along with the governments of FRENCH GUIANA and GUADELOUPE, has repeatedly sought greater autonomy under French rule. However, the island has retained its legal status as an overseas department of France.

Martins, Peter (1946–) Danish dancer, choreographer and ballet master. An outstanding male dancer from the mid-1960s to the mid-1980s, Martins later served as ballet-master-in-chief of the NEW YORK CITY BALLET (NYCB). He joined the ROYAL DANISH BALLET in 1965, then became a principal dancer with NYCB in 1969. He created roles in several ballets, including Jerome ROBBINS's *The Goldberg Variations* (1971) and George BALANCHINE's *Duo Concertant* (1972). Works choreographed for NYCB include *Calcium Light Night* (1978). In 1983 he became joint ballet-master-in-chief of NYCB (with Robbins) and was named sole ballet master in 1989.

Martinson, Harry (1904–1978) Swedish poet and novelist. Abandoned at an early age, Martinson fled from a number of foster homes before going to sea in his late teens. Forced by illness to return to Sweden in 1929, Martinson began publishing his first poetry, which was strongly derivative of KIPLING. With *Nomad* (1931), a collection of free verse, he began to establish his own voice. Subsequent poetry is steeped in primitivism. Martinson's fiction includes the autobiographical novels *Nässlorna blomma* (*Flowering Nettle*, 1935) and *Vägen ut* (*The Way Out*, 1936). His best-known works are the novel *Vägen till Klockrike* (*The Road*, 1948) and the epic poem *Aniara; En revy on Manniskan i tid och rum* (*Aniara: A Review of Man in Time and Space*, 1956), which some consider to be his masterpiece, blaming the English translation for its lukewarm reception outside of Sweden. Martinson was a joint recipient of the NOBEL PRIZE for literature in 1974, along with Eyvind JOHNSON.

Martinu, Bohuslav (1890–1959) Czech composer. Martinu, who began his career as a violinist with the Czech Philharmonic (intermittently from 1913 to 1923), is known for his mastery of modern counterpoint and his lyricism inspired by Czech folk traditions. He first gained recognition with the choral/orchestral *Czech Symphony* (1918) and the ballet *Istar* (1921). From 1923 to 1940 he lived in Paris, and his compositions of this period reflect the influence of the French modernists. Martinu fled to the United States in 1941 and became visiting professor of music at Princeton University (1948–51). His best-known works include *Memorial to Lidice* (1943) and numerous chamber works, which were his forte.

Marvin v. Marvin (1976) Also known as the “palimony case,” this 1976 trial established that an unmarried cohabitant could sometimes sue his or her partner after a romantic breakup and receive payments similar to alimony. The case involved the well-known actor Lee Marvin and his companion Michelle Triola, who had obtained the services of the flamboyant matrimonial attorney Marvin Michel-

son. The couple had cohabited, essentially as husband and wife, for a number of years, without benefit of wedlock, and later separated—at which point Michelle demanded a monetary settlement from the actor. Although married couples typically divide their marital property, the law at the time had no such provision for unmarried cohabitants: Living together outside marriage was considered to be against public policy. The Marvin case established that an unmarried cohabitant could receive a division of property on the breakup of the relationship on the showing that a formal or informal agreement existed to do so. However, Michelle had failed to prove that any contract to split property ever existed and she ultimately ended up with no damages. Although this was a California case, the concept of “palimony” quickly spread to a number of other states as well. A similar case involving actor William Hurt occurred in 1989.

Marx Brothers Comedy stars of vaudeville, stage and screen. The Marx Brothers were five real-life brothers from a New York City tenement: **Chico** (Leonard) (1887–1961), **Harpo** (born Adolph, which later became Arthur) (1888–1964), **Groucho** (Julius Henry) (c. 1890–1977), **Gummo** (Milton) (c. 1893–1977) and **Zeppo** (Herbert) (1901–79). Encouraged by their mother, Minnie, and Uncle Al (Al Shean of the vaudevillian team “Gallagher and Shean”), the brothers toured with their comedy act under various names (including “The Three Nightingales”) until they performed on Broadway in *I'll Say She Is* in 1924. This was followed by the Broadway hits *The Coconuts* (1925) and *Animal Crackers* (1928)—filmed in 1929 and 1930, respectively. Moving to HOLLYWOOD with the advent of TALKING PICTURES, for such classic films as *Monkey Business* (1931), *Duck Soup* (1933) and *A Night at the Opera* (1935), the team developed their own hilarious brand of farce, poking fun at convention and confounding audiences with non-sequiturs and double-entendres. Groucho became the leering, wisecracking pseudo-intellectual; Harpo, the mute clown; and Chico, the Italian con-artist. Zeppo appeared in a few early films as straight man but quit to become an

agent; Gummo did not work in films. After the act split up in the early 1950s, Groucho went on to write several books and host the TV comedy quiz show *You Bet Your Life*. Spurred by a Marx Brothers revival in the 1970s, Groucho went on a successful one-man tour and recorded the popular album *An Evening with Groucho*.

Marxism-Leninism, Institute of Moscow's chief institution of study and research into the history and theory of communism. In 1931 the Marx-Engels Institute and the Lenin Institute merged to form the Marx-Engels-Lenin Institute; it served as a tool of Stalin during his lifetime. From 1953 to 1957 many of the main ideological policies of the party leadership allegedly were based on the findings of the institute.

Masaryk, Jan (1886–1948) Czechoslovak diplomat and foreign minister, son of Tomáš MASARYK. Jan Masaryk attended the PARIS PEACE CONFERENCE of 1919–20 and was Czech minister (diplomatic envoy) to London from 1925 to 1928. He resigned after the MUNICH PACT (1938) ceded Czechoslovakia's SUDETENLAND to Germany. He spent WORLD WAR II in London as foreign minister and deputy prime minister of the Czech government-in-exile (1941–45). On the liberation of CZECHOSLOVAKIA he continued as foreign minister. Although unsympathetic to the increasingly pro-Soviet policy, he remained in office after the communist coup in 1948 but died a few days later after falling from a window in the Czech foreign ministry. His death has never been satisfactorily explained; many suspect he either committed suicide under duress or was murdered by the communists.

Masaryk, Tomáš Garrigue (1850–1937) Czech philosopher and political leader, founding president of CZECHOSLOVAKIA (1918–35). Born in Moravia, he received a doctorate in 1876 and was a professor of philosophy at the Czech University, Prague, from 1882 to 1914. An ardent democrat, he served in the Austrian parliament from 1891 to 1913 and again from 1907 to 1914. In 1900 he founded the Progressive (Realist) Party to advance his ideas of social reform, Czech equality and suffrage and the unification and protection of mi-

Tomáš Masaryk, first president of Czechoslovakia
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

norities. An early advocate of a federation of self-governing nationalities within the AUSTRO-HUNGARIAN EMPIRE, by the outbreak of WORLD WAR I he was supporting Czech independence. In 1914 he and Eduard BENEŠ fled to London, where he formed a council that was recognized by the Allies in 1918 as Czechoslovakia's de facto government. During the war years, Masaryk traveled throughout Europe and the U.S., winning support and funding for the Czech cause. At the end of the war, the state of Czechoslovakia was established and Masaryk was elected its first president, winning reelection in 1920, 1927 and 1934. He was at least partially successful in creating a multicultural democracy and was revered throughout the world as a democratic leader. He was the father of Jan MASARYK.

Mason, James (1909–1984) British-born actor. Mason was noted for playing suave aristocrats and refined, romantic villains. His career spanned nearly half a century, and he acted in more than 100 films. He was nominated for ACADEMY AWARDS for his performances in *A Star Is Born*, *Georgy Girl* and *The Verdict*. Mason's other films include *The Seventh Veil*, *Odd Man Out*, *The Desert Fox* and *Lolita*.

Masood, General Ahmed Shah (1953–2001) Born in Jangalak, Afghanistan, to a local police commissioner and his wife, Masood entered the Kabul Polytechnic Institute for Engi-

neering and Architecture and, later, joined the Jamiat-e Islamic Party.

Following the Soviet invasion of Afghanistan and the installation of a pro-Soviet puppet government in 1979, Masood fought with the MUJAHIDEEN, a diverse group of Islamic freedom fighters, against the Soviet military forces and their allies in the Afghan government. When the Mujahideen captured the capital of Kabul in 1992, Masood became the minister of defense. Soon allegations of corruption within the defense ministry contributed to growing divisions within the mujahideen government and led to its fragmentation and the start of a civil war among the various factions. Heading what became later known as the NORTHERN ALLIANCE, Masood occasionally launched rocket attacks on cities held by his opponents. He soon had to withdraw from Kabul into the north-eastern region of Afghanistan on account of the powerful TALIBAN faction that had gained control of the government. In September 2001 Masood was killed by agents of the Taliban in an effort to reduce the effectiveness of the Northern Alliance against the Taliban in the ongoing civil war.

Massey, Vincent (1887–1967) Canadian statesman. Born in Toronto, he was a teacher and government official before becoming president of his family business (1921–25). A supporter of the LIBERAL PARTY, he was CANADA's first minister to the U.S. (1926–30) and high commissioner for Canada in Great Britain (1935–46). Massey was chairman of the Royal Commission on National Development in the Arts, Letters, and Sciences (1949–51) and chancellor of the University of Toronto (1947–52). From 1952 to 1959, he served as governor general of Canada, the first native-born Canadian to hold that post. His memoirs were published in 1963.

Massey, William Ferguson (1856–1925) NEW ZEALAND statesman, prime minister (1912–25). Born in Ulster, he emigrated to New Zealand in 1870, farming near Auckland and becoming the political spokesman for local dairy farmers. He entered the New Zealand parliament in 1894. Leader of the conservative Opposition Party (later the Reform Party), he became prime minister in 1912 and held the office until his

death. An agrarian conservative, he supported moderate land reforms and suppressed his country's labor unions. A strong supporter of the British Empire, he sent an expeditionary force to Europe at the outbreak of WORLD WAR I and served in the British war cabinet (1917–18). During the war, he participated in the coalition National government of the Reform and Liberal parties (1915–19). After the war, Massey opposed the movement to give New Zealand greater independence by making it a dominion within the empire.

Massine, Léonide (1895–1979) Russian-born choreographer and dancer whose ideas helped to shape 20th-century ballet. After training at the Imperial Ballet School in St. Petersburg, Massine joined Serge DIAGHILEV'S BALLETS RUSSES, winning immediate acclaim in Michael FOKINE'S *The Legend of Joseph* (1914). Massine's *PARADE* (1917), which he choreographed, is considered a milestone in modernist ballet. Other notable works choreographed by Massine include *La Boutique Fantastique*, *The Three-Cornered Hat*, *Gaieté Parisienne* and *Jeux d'Enfants*. The 1948 film *The Red Shoes*, which he choreographed and performed in, won Massine wide popularity.

Massing, Hede (1899–1981) Austrian-born actress who served as a spy for the Soviet intelligence network in the U.S. (1933–37), when she became disillusioned. Massing testified against Alger Hiss at his second perjury trial in 1950. She was the only witness to corroborate the allegations by Whittaker CHAMBERS that Hiss, a former State Department official, had been a member of the COMMUNIST PARTY underground in Washington, D.C.

Masson, André (1896–1987) French painter and graphic artist. Born in Balagny, Masson studied at the Académie des Beaux-Arts, Brussels and Ecole des Beaux-Arts, Paris. His early work was influenced by CUBISM and by the painting of Juan GRIS in particular. After meeting André BRETON, Max ERNST and Joan MIRÓ in 1924, Masson became an exponent of SURREALISM—the style for which he is best known. His exploration of the subconscious led him to experiment with “automatic writing,” and spontaneous drawing in which personal imagery is developed. Travel-

ing to Spain in the 1930s, he painted bullfighters and other Catalonian themes, and when he visited the U.S. (1941–45), he explored African-American and American Indian imagery. Masson settled in Aix-en-Provence in 1947 and devoted himself to landscape painting. An extremely versatile artist, he is also known for his work as a book illustrator, sculptor, set and costume designer and writer.

mass production Widely used term that describes the modern method of industrial production in which a large number of identical items are made by mechanized techniques. “Serial” production is a similar term, also referring to manufacturing based on the concept of the assembly line, where the object is moved (often by mechanized conveyors) past the work stations of individuals who perform particular repetitive tasks. The concept is based on the rationalization of production in which the steps of the manufacturing process are carefully analyzed and equipment is provided (often specially designed) so that each step can be accomplished with a minimum of handwork. Avoiding the delays and constant changes of task that are typical of craftwork increases efficiency and permits a maximum of mechanization that makes the manufacturing process as nearly automatic as possible.

The early enthusiasm for assembly-line production has been somewhat dimmed in recent years by recognition of the unfortunate consequences of monotonous, repetitive tasks for the individual worker. These effects also often lead to a decline in quality since pride in one's skill is negated when the demand for speed is the only significant work criterion. Recent efforts to organize work teams with greater responsibility for a total product and its quality have been introduced in some factories, including the classic assembly-line plant—the automobile factory. At the same time, automation in which human workers are entirely replaced by automatic machinery (robots) makes possible mass production without the costs of human labor. Computer control of automated production also makes possible the efficient manufacture of varied products on a single assembly line.

Masters, Edgar Lee (1869–1950) American poet. Born in Garnett, Kansas,

Masters attended law school and was a practicing attorney in Chicago from 1892 to 1920. He owes his fame to one volume of poetry, *Spoon River Anthology* (1915), a series of epigrammatic free verse epitaphs that capture the character, triumphs and tragedies of the citizens of a typical American small town. Masters's other volumes of poetry include *Starved Rock* (1919), *Domesday Book* (1920) and *Illinois Poems* (1941). He was also the author of several novels and of such biographies as *Lincoln the Man* (1931), *Whitman* (1937) and *Mark Twain* (1938). His autobiography, *Across Spoon River*, was published in 1936.

Masters and Johnson American sex researchers William Howell Masters (1915–2001), a gynecologist, and his wife, Virginia Eshelman Johnson (1925–), a psychologist, were pioneers in the field of human sexuality and the testing of various forms of sexual response. In the course of their work, they have exploded a number of widely held misconceptions about the nature of human sexuality. Masters and Johnson detailed their researches in their volumes *Human Sexual Response* (1966), *Human Sexual Inadequacy* (1970) and *Homosexuality in Perspective* (1979). They also did influential work in sex therapy and set up an extensive training program for therapists at the institute they established in St. Louis in 1970. In 1993 Masters and Johnson decided to end their 21-year marriage, and Johnson retired from their jointly run clinic. Masters died in February 2001.

Mastroianni, Marcello (Vincenzo Domenico) (1924–1996) A charming, handsome film star from Fontana Liri, Mastroianni was generally regarded as the leading Italian screen actor of his generation. On-screen from 1947, the “Italian Cary GRANT” starred in more than 80 (primarily Italian) films, including *White Nights* (1957), *Where the Hot Wind Blows* (1958), *Divorce Italian-Style* (1962) and *Marriage Italian-Style* (1964). In America, he is best recognized in films directed by Federico FELLINI, such as *La Dolce Vita* (1960), *8 1/2* (1963), *City of Women* (1981) and *Ginger and Fred* (1986).

Masuku, Lookout (1939–1986) African guerrilla leader. He was a

leader in the struggle that led to the establishment of the black-ruled nation of ZIMBABWE in 1980. From 1980 to 1982, he was deputy commander of that country's national army. He was arrested in 1982 on charges of conspiring against Prime Minister Robert MUGABE's government. Acquitted in 1983, he was kept under detention until 1986.

Masursky, Harold (1922–1990) U.S. geologist-astronomer. Working with NASA since the U.S. Ranger series in the early 1960s, Masursky specialized in studies of the surfaces of the moon and the planets of the solar system and has participated in almost every NASA planetary project since that time. As leader of the team that selected and monitored observations of Mars by the *Mariner* spacecraft, he also helped to select the *Viking* landing sites on Mars and is a member of the Venus Orbiter Imaging Radar Science Working Group. A familiar face at NASA press conferences, he was also involved in NASA's Pioneer and Voyager projects. Masursky was a senior scientist with the U.S. Geological Survey. He took his degree from Yale University in 1951 and has received four medals from NASA for exceptional scientific achievement.

Mata Hari (1876–1917) Dutch spy. Mata Hari was the stage name of Margaretha Geertruida Zelle, a glamorous dancer from the Netherlands who settled in Paris. She entered Germany's secret service in 1907. During WORLD WAR I, she transmitted important military secrets to Germany that had been given to her by her many Allied officer lovers. In 1917 she was arrested, tried, convicted. She was executed by a French firing squad on October 15.

Mathewson, Christopher “Christy” (1880–1925) American baseball player. Mathewson's fadeaway curve, a forerunner of the screwball, made him one of the most successful and feared right-handers of his era. He spent most of his career with the New York Giants (1900–16), where in 1905 he led the team to a World Series victory by pitching three shutouts in six days. He went to the Cincinnati Reds as a pitcher-manager (1916–18), but his pitching career was ended by WORLD WAR I, when he was gassed in France. He finished with

373 victories and 83 shutouts. Upon his return from the war, he was named president of the Boston Braves, a post he held until his death in 1925. Mathewson was among the first group of players named to the Baseball Hall of Fame, in 1936.

Mathias, Robert Bruce (1930–2006) American athlete. One of the greatest athletes of all time, Mathias was the only man ever to win the grueling Olympic decathlon twice. In high school, he starred in football and basketball, as well as track. Shortly after his high school graduation, he won his first Olympic gold medal as a decathlete. In the years before his next Olympic triumph, he starred as a fullback for the University of Southern California football team and also won four consecutive U.S. decathlon championships. Mathias went on from his athletic career to pursue his political aspirations and was elected to the U.S. House of Representatives in 1966. (See also OLYMPIC GAMES.)

Mathieu, Georges (1921–) French painter. Self-taught, Mathieu began painting in 1942. Two years later, influenced by American ABSTRACT EXPRESSIONISM, he started to paint the large, lyrical and abstract works for which he is known. Extremely calligraphic in nature, his paintings are executed quickly in slashing strokes against a colored ground. A precursor of PERFORMANCE ART, he executed some of his works in front of an audience. Mathieu is also known for his posters and designs for the theater.

Mathis, Johnny (John Royce Mathis) (1935–) American popular singer. Born in San Francisco, Mathis joined Columbia Records in New York in 1956. He originally wanted to be a jazz singer, but Mitch Miller persuaded him to concentrate on ballads. A unique and haunting emotional quality made his voice unmistakable in such hits as “Misty” (1959), “The Shadow of Your Smile” (1960) and “The Twelfth of Never” (1961). “When a Child Is Born” was a No. 1 hit in Britain in 1976.

Matisse, Henri (1869–1954) One of the greatest French painters of the 20th century. After abandoning law studies in Paris, Matisse began to study painting with Gustave Moreau

(1892). Soon, in work like the portrait *Green Stripe* (1905), he started working with the vibrant colors, complementary contrasts and spontaneous gestures of FAUVISM, the first real revolution in 20th-century painting. Matisse strove to eliminate all traces of “illusion” in his images for the sake of a greater emphasis upon the two-dimensionality of color and shape. His great works, like *Dance and Music* (1909–10), celebrate the writhing sensuality of color shapes; and *Red Studio* (1911) and *Harmony in Red* (1908) use vibrant color to unify areas of flat, decorative arabesques. Some of his later works, such as the *Bather by a River* (1917), achieve a more monumental grandeur and austerity. He was also a forceful sculptor. His relief bronzes include *Back I-IV* (1909–30). After moving to Nice, where he worked for most of the rest of his life, he turned increasingly to his famous “cut-out” techniques, organizing simple compositions from pieces of brightly colored paper. The culmination of his work came in his decorations for the Chapel of the Rosary at Vence (1949–51), a gift to the nuns who had looked after him during an illness. Despite a crippling arthritis, Matisse continued to work until his death.

Matisse, Pierre (1900–1989) Internationally known art dealer and younger son of artist Henri MATISSE. Born in France, he moved to the U.S. in 1925 and, with little encouragement from his father, arranged a series of exhibits and eventually established his own gallery in New York City. He helped popularize the works of such artists as Joan MIRÓ, Marc CHAGALL and Jean DUBUFFET.

Matsuoka, Yosuke (1880–1946) Japanese diplomat and statesman. Born in JAPAN, Matsuoka went to Oregon at the age of 13 and later attended the University of Oregon. He joined the Japanese foreign service and served as JAPAN's chief representative to the LEAGUE OF NATIONS (1932–33), where he expressed his country's expansionist philosophy and withdrew from the organization. He was president of the South Manchurian Railway (1935–39). As Japan's foreign minister (1940–41), he concluded the AXIS Pact with GERMANY and ITALY (1940) and negotiated (1941) a nonaggression agreement

with the USSR. He was a strong supporter of Japan's entry into WORLD WAR II and opposed negotiations with the U.S. Indicted as a war criminal, he died before his trial.

Matsushita, Konosuke (1894–1989) Japanese manufacturing magnate, founder of Japan's Matsushita Electrical Industrial Co., the world's largest producer of consumer electrical goods. He rose from poverty to found his own firm (1918) based on his success with a new electric light socket. By the 1980s the company had sales of an estimated \$41 billion and produced everything from electric rice cookers to video cassette recorders—many of which were sold under the brand name Panasonic. Matsushita was often regarded as the pioneer of the modern Japanese corporation, with its emphasis on *marugake* (strong social ties between a company and its employees).

Matta Echuarren, Roberto Sebastián (1912–2001) Chilean painter. Usually known simply as Matta, he was born in Santiago. He moved to Paris, where in the 1930s he studied architecture with LE CORBUSIER. There he met André BRETON and other important figures in French SURREALISM. From 1938 to 1947 Matta painted in a Surrealist style, creating works with a strange otherworldly, almost cosmic aura. In 1939 he traveled to the U.S., where he met and was influenced by Marcel DUCHAMP. His later works were more abstract in nature, taking advantage of the linear designs of controlled spills and the atmospheric effects of deep color.

Matteotti affair Giacomo Matteotti (1885–1924), a leader of the Italian Socialist Party and an outspoken opponent of FASCISM, was murdered in June 1924—apparently by fascist thugs. His death triggered antifascist demonstrations in the Italian parliament and pleas for the reestablishment of democracy. Italian leader Benito MUSOLINI, who claimed ignorance and disapproved of the affair, reacted by banning socialist meetings and censoring the press. In 1926 several fascists were arrested for the murder, but they received little punishment. Antifascists subsequently invoked the affair to rally support. During WORLD WAR II, the Italian RESISTANCE movement formed Matteotti Brigades. A postwar investi-

gation of the affair (1947) found a group of extremists over which Mussolini had little control responsible for the murder.

Matthews, Burnita Shelton (1894–1988) U.S. judge. Her 1949 appointment as a judge on the U.S. District Court for the District of Columbia reportedly made Matthews the first woman to serve as a federal district judge. By the time of that appointment, she had practiced law in Washington for three decades and had become known as a champion of women's rights. She continued hearing district court cases until 1983.

Matthiessen, F(rancis) O(tto) (1902–1950) American educator and literary critic. Matthiessen was a professor of history and English at Yale and later at Harvard. His critical works, which show the influence of Van Wyck BROOKS, include *The Achievement of T. S. Eliot: An Essay in the Nature of Poetry* (1935) and *American Renaissance: Art and Expression in the Age of Emerson and Whitman* (1941). He also wrote the biography *Sarah Orne Jewett* (1929).

Mauchly, John William (1907–1980) American engineer, co-inventor (with J. Presper Eckert Jr.) of the first electronic computer. Working with Eckert, Mauchly built ENIAC (Electronic Numerical Integrator And Computer) for the U.S. War Department in 1946. The computer took up 15,000 square feet and applied electronic speed to mathematical tasks for the first time. The two later designed the more advanced UNIVAC I computer (1951).

Maudling, Reginald (1917–1979) British politician. A member of the CONSERVATIVE PARTY, Maudling was first elected to Parliament in 1950 and held his seat until his death. He served in the governments of five prime ministers, notably as chancellor of the Exchequer (1962–64) and home secretary (1970–72). He narrowly missed in two bids for party leadership—and the prime ministership—in 1963 and 1965.

Maugham, Syrie (1879–1955) Noted British interior designer and decorator. She was married for a short time to the writer Somerset MAUGHAM. Her individual style, developed in the

1930s, made use of pale, monochromatic colors and eventually moved toward all- (or nearly all) white schemes. Her firm, Syrie Ltd. established in the 1920s and began by producing work of the traditional eclectic character typical of decorators' taste of the time. As her style developed, Maugham often chose glass, mirror and silvered frames with otherwise largely white finishes. Although her white rooms often included furniture and details of traditional design character, these elements were often finished in white—reflecting her particularly personal way of working.

Maugham, W(illiam) Somerset (1874–1965) British novelist. Orphaned at the age of 10, Maugham was raised by his aunt and his uncle, a clergyman. He practiced medicine before turning permanently to writing. He recreated his austere childhood in the autobiographical novel *Of Human Bondage* (1915, filmed 1946), his best known work. The protagonist, Philip Carey, suffers from a club foot and later, while a medical student, from an obsessive, unrequited love for a rapacious lower-class woman. Maugham was traumatized by a childhood stutter. He established himself as a writer with his first novel, *Liza of Lambeth* (1897), which reflected his work as an obstetrical clerk in the slums of London and which was considered an example of the "new realism." It was the beginning of a successful and lucrative career, yet Maugham was always troubled by his status as a second-rate writer, a feeling

British author W. Somerset Maugham (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

he expressed in *The Summing Up* (1938). Other works include the novels *The Moon and Sixpence* (1919), *Cakes and Ale* (1930) and *The Razor's Edge* (1944) and the plays *The Circle* (1921) and *For Services Rendered* (1932). Also notable is the short story "Rain" (1921), which has been staged and was filmed four times.

Mau Mau A society formed in 1948 among the Kikuyu tribe in KENYA, then a British colony. The Mau Mau sought the forcible eviction of white farmers from traditional Kikuyu lands by invoking ancient rituals and by murder. In 1952, following a violent Mau Mau uprising, Kenyan authorities responded with military force, declared a state of emergency and arrested Jomo KENYATTA as an instigator. The following year, the Mau Mau was responsible for the massacre of more than 80 people, the majority of whom were African. The Kikuyu and other tribes became disgusted with the rebellion, which was effectively subdued by 1954. The state of emergency was not lifted, however, until 1960. During the Mau Mau uprisings, an estimated 11,000 Kikuyu Mau Mau, 1,800 Africans opposed to them, 167 Kenyan security personnel and 68 Europeans—the original targets of the rebellion—were killed.

Mauritania (Islamic Republic of Mauritania) Mauritania covers an area

of 397,850 square miles in northwestern Africa. A French protectorate in 1903, Mauritania was incorporated into FRENCH

WEST AFRICA in 1904 and became a French colony in 1920. Achieving autonomy within the French Community in

MAURITANIA

| 1903 | The region formally becomes a French protectorate. |
| 1920 | Mauritania becomes a French colony with French West Africa. |
| 1960 | Mauritania gains independence as a member of the French Community. |
| 1968 | Government efforts to abandon French and introduce Arabic as the official language and medium of instruction in schools lead to riots in the black south. |
| 1971 | Riots mark French president Pompidou's state visit to the country. |
| 1978 | Ould Daddh is ousted in a bloodless coup led by army chief of staff Mustapha Ould Mohamed Salek. |
| 1984 | Prime Minister Taya comes to power in a bloodless coup. |
| 1989 | Border dispute with Senegal results in violence. |
| 1993 | U.S. halts aid due to Mauritania's support of Iraq during the 1991 Persian Gulf War. |
| 2005 | Military coup takes place while President Taya is out of the country. Ely Ould Mohamed Vall is named military leader, while Taya is living in exile. |

1958, the country declared its independence as the Islamic Republic of Mauritania in 1960. The resentment of the black African population toward the officially declared Arab identity of the country led to riots in 1966 and 1979. Tensions between Mauritania and MOROCCO over the status of the Saharan Arab Democratic Republic existed from 1976 to 1986, while internal political instability was the result of a series of military coups between 1978 and 1984. A bloodless coup in 1984 brought Colonel Moaouie Ould Sidi Mohamed Taya to power. His government has pursued a democratization policy. In 1989 a dispute with SENEGAL escalated into ethnic violence, resulting in hundreds of deaths and the expulsion of 40,000 black Mauritanians into Senegal. In 1993 the U.S. suspended economic aid to Mauritania because it had supported Iraq in the 1991 Persian Gulf War and because of its mistreatment of its population. In 2005 the military stage a coup while Taya was out of the country. Taya went into exile while the military junta named Ely Ould Mohamed Vall as leader.

Mauritius Located east of Madagascar, Mauritius is composed of a main island, 20 adjacent islets and the dependencies of the Agalega and Rodrigues Islands and the Cargados Carajos shoals—a total land area of 718 square miles. Mauritius was under

MAURITIUS

1968	Mauritius gains independence from Great Britain and becomes a member of the Commonwealth of Nations.
1982	Mouvement Militant Mauricien (MMM) gains control of the National Assembly, led by Anerood Jugnauth.
1983	Ousted by the MMM, Jugnauth forms the Mouvement Socialiste Mauricien (MSM), whose coalition with the MLP wins a parliamentary majority, making Jugnauth prime minister.
1987	Jugnauth's coalition is reelected.
1991	Jugnauth's coalition is reelected.
1992	Mauritius becomes a republic in the Commonwealth.
1999	Three days of rioting by Creole youths in February results in damages estimated at \$150 million. Discontent among Creoles over their failure to participate in Mauritius's economic progress is cited as a cause.
2000	Sir Anerood Jugnauth becomes prime minister.

British control from 1810 to 1968 when the country achieved independence and became a member of the COMMONWEALTH. Ethnic tensions among the French Creoles, Muslims and immigrant Indian workers have dominated the political scene in Mauritius, resulting in periodic strikes and government crackdowns, a series of unstable coalition governments, and the formation of a left-wing political party. Anerood Jugnauth formed an alliance with several political groups and was elected prime minister in 1983 and again in 1987. Under his leadership the economy has improved, though there have been two attempts to assassinate him (1988, 1989). In March 1992 Mauritius became a republic within the British Commonwealth. Since that time Mauritius has experienced some ethnic tensions and the formation of coalition governments along those divisions.

Maurois, André (pen name of Emile Herzog) (1885–1967) French novelist, literary critic and biographer. Maurois was successful in a number of literary genres but remains best known for his romantic-style biographies that imaginatively re-created the psyches of his subjects. Maurois's many biographical studies include works on British prime minister Benjamin Disraeli (1924), the English poet Lord Byron (1930), and the French novelists George Sand (1952) and Honoré de Balzac (1965). Maurois also wrote a number of popular novels, such as *The Silence of Colonel Bramble* (1918), and was an influential literary critic who was an early champion of the works of Marcel PROUST. His major autobiographical work is *Memoirs 1885–1967* (1970). He received the NOBEL PRIZE for literature in 1952.

Maurras, Charles (1868–1952) French political writer and critic. A literary and political conservative, he was a founder of the *École romane*, a neo-classical movement in French letters. A monarchist and nationalist, he disseminated his views as editor of the *Action française* and by writing such book as *Enquête sur la monarchie* (1909) and *Mes idées politiques* (1937). He was elected to the Académie française in 1938. A collaborator during the German occupation, he was expelled from

the Académie and in 1945 was sentenced to life imprisonment. He was pardoned just before his death.

Maxwell, Robert Ian (Jan Ludwig Hoch) (1923–1991) Czech-born British publisher, head of an information and communications empire that included printing, publishing and cable television companies in 16 countries. His initial publishing success came with Pergamon Press (purchased in 1951), which filled a need for the dissemination of scientific information. Among the companies he owned are the Mirror Group Newspapers in England (since 1984), Macmillan, Inc. (since 1988) and *The New York DAILY NEWS* (since 1991). Maxwell was a LABOUR PARTY member of Parliament (1964–70) and was active in the Czech RESISTANCE during WORLD WAR II. A year after his mysterious drowning off the Canary Islands in 1991, the Mirror Group was forced to file for bankruptcy. It was later discovered that he had taken money from his companies' pension funds to shore up the firms' deteriorating finances.

May, Elaine (Elaine Berlin) (1932–) American comedic actress, film director and screenplay writer. May first achieved success in show business in the 1950s, when she formed a stage comedy team with Mike NICHOLS. Together they enjoyed a Broadway hit with *An Evening with Mike Nichols and Elaine May* (1960). After the team broke up, May went on to become a pioneering figure in HOLLYWOOD as a woman who wrote, acted in and directed feature films. As an actress, she appeared in the comedies *Luv* (1967) and *Enter Laughing* (1967). One of her finest efforts—which May wrote, directed and costarred in with Walter Matthau—is the comedy *A New Leaf* (1971). Other films directed by May include *The Heartbreak Kid* (1972) and *Ishtar* (1987). She also cowrote the script for the hit comedy *Heaven Can Wait* (1978). May made a Hollywood comeback in the 1990s with her screenplay work on *The Birdcage* (1996) and *Primary Colors* (1998).

May, Rollo Reese (1909–1994) American psychologist. May studied to be a Congregational minister before turning to psychology and earning a

Ph.D. in clinical psychology at Columbia University (1949). In his books he has explored the relationship between creativity and inner satisfaction. Many of his books, including *The Meaning of Anxiety* (1950), *Love and Will* (1969), *The Courage To Create* (1975) and *Freedom and Destiny* (1981), have become best sellers. His humanistic approach to psychology has had a strong influence on the NEW AGE MOVEMENT.

Mayakovsky, Vladimir Vladimirovich (1894–1930) Russian poet. In 1908 Mayakovsky joined the Communist Party, and in 1911 he met some of the early FUTURISTS. His first collection of poems, *As Simple as Mooing* (1916), met with success. He wrote many poems about the revolution, including "150,000,000" (1920), in which President WILSON personifies capitalism. He also wrote satirical plays, including *The Bedbug* (1921). He was the leading representative of the Futurist school, and Mayakovsky had considerable influence on subsequent poets. Disenchanted with the party, he committed suicide in 1930; later he was eulogized by Stalin.

Mayer, Albert (1897–1981) American architect and city planner. Mayer cofounded the firm of Mayer, Whittlesey & Glass (1935) and was its senior partner. His views were influential in the creation of the U.S. Housing Authority (1937). An advocate of rationally planned urban expansion, he was the designer for many housing projects in the U.S. He gained international renown in the 1950s as the master planner for India's NEW TOWN CHANDIGARH.

Mayer, Arthur Loeb (1886–1981) Legendary American motion picture exhibitor and distributor, onetime head of publicity at PARAMOUNT PICTURES. Mayer would use any gimmick to fill a movie theater. His showings of double-feature horror films at New York's Rialto Theater earned him the epithet The Merchant of Menace. After WORLD WAR II he imported such outstanding Italian films as *Open City* and *The Bicycle Thief* and lectured on film history at colleges across the U.S.

Mayer, Louis B. (1885–1957) Russian-born motion picture pioneer

and celebrated chief executive of MGM. Mayer followed his immigrant father's occupation of junk dealer in Boston until his company failed. In 1907 he took over the management of a theater chain and 10 years later formed his own production company, Louis B. Mayer Pictures. After the merger in 1924 that formed METRO-GOLDWYN-MAYER, he became vice president and general manager of the West Coast operation. At his peak in the 1930s and 1940s, Mayer was the epitome of the HOLLYWOOD mogul—ruthless, hardworking, paternalistic, staunchly conservative, vindictive toward his enemies, loyal to the point of indulgence to his friends—and obsessed with making movies. His annual salary of \$1.25 million was the highest in the nation. Mayer's favorite among all his MGM pictures was *The Human Comedy* (1943), written by William SAROYAN. The film reflects Mayer's sentimental ideas, portraying an America of small towns and decent and industrious citizens, who, despite their differences, feel an almost spiritual sense of family. After years of infighting at MGM, Mayer was ousted in 1951 by former aide Dore SCHARY. He refused an opportunity to return as president of the company in 1957.

May Fourth Incident Protest of May 4, 1919, by some 3,000 Chinese students in Beijing. They had massed to demonstrate their disapproval of the continuation of internationally sponsored imperialism in CHINA, which was manifested at the PARIS PEACE CONFERENCE with the awarding of Germany's former concessions in Shandong province to Japan. The students marched to the legation quarter to present their grievances and then protested at the home of Ts'ao Ju-lin (China's minister of communications and former vice foreign minister), where some were arrested. While the incident had little immediate importance, it triggered the MAY FOURTH MOVEMENT, which has been an important factor in the development of Chinese culture in the 20th century.

May Fourth Movement Popular reform movement in CHINA that produced a virtual revolution in thought and culture from 1919 to 1921. It was sparked by the MAY FOURTH INCIDENT

and early on resulted in a variety of strikes and anti-Japanese boycotts, which were influential enough to prevent Chinese delegates to the Paris Peace Conference from signing the TREATY OF VERSAILLES. As the movement escalated, it grew to include other aims beyond the elimination of Japanese imperialism in China. These included a program to improve literacy among the populace, an increased popularity of Western liberal ideas, the promotion of a vernacular literature and a widespread refutation of the traditional Confucian social hierarchy. This period of growing modernism also saw the beginnings of Chinese Marxism.

Mayo Clinic Noted American medical facility at Rochester, Minnesota. Started in 1889, it is one of the largest and most widely recognized medical centers in the world. Founded by William Worrall Mayo and his two sons to care for surgical patients, the clinic's functions changed to those of a general medical center just before World War I. Over 200,000 patients are treated at the Mayo Clinic annually.

Mayotte Island in the Mozambique Channel between Mozambique and Madagascar, forming part of the Comoro Archipelago and covering a total area of 145 square miles; the earliest inhabitants were a Melano-Polynesian people. In 1912 Mayotte was combined with the other Comoro Islands to form a dependency of France's colony of Madagascar. In 1946 the islands became a separate French overseas territory. Internal autonomy was granted in 1961. Elections to the Chamber of Deputies in December 1972 produced a strong majority for the coalition of parties in favor of independence. A referendum on December 22, 1974, resulted in a 96 percent majority throughout the Comoros for independence but not in Mayotte, where 64 percent voted against. In July 1975 the Comoran Chamber of Deputies unilaterally declared the islands independent, despite the protests of Mayotte. FRANCE remained in control of Mayotte and proposed a referendum on the island's future; held on February 8, 1976, it produced a 99 percent vote in favor of retaining links with France. The French government refused to consider making the island a department, but granted it the status of a territorial

collective, a status between that of a department and an overseas territory. Following a Comoran coup in 1978 the new government offered to include Mayotte in a new federal system. Mayotte refused. In March 1987 there were outbreaks of rioting between the local population and illegal immigrants from the Comoros. In a 2001 referendum nearly three-quarters of the populace voted in favor of Mayotte remaining a territory of France, though still claimed by Comoros.

Mays, Benjamin E. (1895–1984) Black American educator and a champion of the CIVIL RIGHTS movement. Mays gained an international reputation while dean of the Howard University Divinity School (1934–40). From 1940 to 1967 he was president of Morehouse College, where his students included Martin Luther KING Jr. King later called Mays his “spiritual and intellectual leader.” Mays also served on the Atlanta Board of Education (1969–81).

Mays, Willie Howard, Jr. (1931–) American baseball player. Undisputedly one of the greatest baseball players ever, Mays was a major figure during the glory years of New York baseball in the 1950s and 1960s. He was a brilliant fielder, with a career putout total of 7,095, a record that still stands. He led the New York Giants to the National League pennant in 1954 with a .345 batting average, and his outstanding fielding helped them win the World Series. Mays went with the team when they moved to San Francisco after the 1957 season. Although his play continued to sparkle, with another 50-home-run season, Mays was never as happy there as in New York. He finished his career with the New York Mets in 1973, with a career total of 660 home runs. He was named to the Hall of Fame in 1979.

Maysles, David Peter (1933–1987) U.S. filmmaker. He and his brother **Albert Maysles** (1933–) played key roles in the development of the documentary genre known as *verité*, which used handheld cameras, natural sound, and no scripts or staged sets. The best known of the brothers' films were *Salesmen* (1969), *Gimme Shelter* (1970, about the ROLLING STONES) and *Grey Gardens* (1975).

Maytag, Frederick Lewis (1857–1937) U.S. manufacturer. He converted his small business into a factory at Newton, Iowa, in 1907 to manufacture hand-operated washing machines. Four years later he introduced a motorized washing machine. A leader in the industry by the early 1920s, the company's management was taken over by Frederick's son in 1926. With its ongoing research and promotion, the company produced the first automatic washer in 1948 and continued to be a leading manufacturer of major appliances. The city of Newton still calls itself the "Washing Machine Capital of the World."

Mazowiecki, Tadeusz (1927–) Polish journalist and political leader, premier of POLAND (1989–90). A leading Catholic intellectual, Mazowiecki was active in the SOLIDARITY movement during the late 1970s and the 1980s and was a trusted adviser to Lech WALESIA. In 1989, when the Communist premier resigned under increasing pressure from Solidarity and the non-communist Polish majority, Mazowiecki was nominated for the post by Communist Party leader and president General Wojciech JARUZELSKI. Confirmed by the Polish parliament in a vote of 378 to 4 (with 41 abstentions), Mazowiecki became the first noncommunist premier in four decades. The momentous vote represented the first known democratic transfer of power away from a ruling communist party. It was an important milestone in the events of 1989 to 1990 that signaled the end both of the communist domination of Eastern Europe and of the COLD WAR. Mazowiecki faced considerable political and economic problems in governing Poland. In 1997 he wrote the preamble to the Polish constitution. In 2005 he was cofounder of the Polish Democratic Party.

Mazursky, Paul (1930–) American film director, producer, screenplay writer and actor. Mazursky emerged as one of the most prolific directors in HOLLYWOOD during the 1970s and 1980s. His major successes have combined a deft comic touch with a substantive look at social issues of the day. Mazursky began his career in films with minor acting roles in the 1950s but scored a major commercial hit with

his first directorial effort, the comedy about wife-swapping, *Bob & Carol & Ted & Alice* (1969). In the ensuing two decades, Mazursky produced, scripted and directed a host of films, most notably *Harry and Tonto* (1974); *An Unmarried Woman* (1978), which was one of the first films to examine the impact of divorce on women; *Moscow on the Hudson* (1984); *Down and Out in Beverly Hills* (1986); and *Moon Over Parador* (1988).

Mbeki, Thabo (1942–) South African politician, member of the African National Congress (ANC) political party (1956–), president of the ANC (1997–) and president of South Africa (1999–). Born in Idutywa, South Africa, Mbeki joined the ANC's Youth League in 1956 and participated in its efforts to gain followers among black South Africans in secondary schools. In 1959 he was elected secretary of the African Students' Association, which disintegrated the following year after many of its leaders were arrested by the South African police.

In 1962 Mbeki left South Africa for Britain, where he obtained an M.A. in economics at Sussex University in 1966. In 1970 he returned to Africa and became a leader in the struggle against apartheid in his country. As chief of the ANC's Department of Internal Affairs, he headed negotiations with the South African government of F. W. DE KLERK in 1989 for the release of imprisoned ANC activist NELSON MANDELA, and later for the creation of a new constitution giving black South Africans the right to vote in national elections. In 1994 Mandela selected Mbeki as the first deputy president following the ANC's electoral victory. In 1997 Mbeki succeeded Mandela as president of the ANC, and in 1999 Mbeki replaced Mandela as the president of South Africa.

As president, Mbeki attempted to resolve several of the critical issues facing his nation. Foremost among them was the spreading AIDS epidemic. Although earlier in his presidency he had voiced skepticism about the threat of HIV or AIDS, Mbeki agreed in 2003 to accept several millions of dollars in U.S. aid to contain the spread of the virus. He also continued Mandela's efforts to end South Africa's economic recession by encouraging greater foreign investment in the South African econ-

omy, to reconcile opposition groups within South African politics, and to improve South Africa's relations with neighboring African states. In 2004 the ANC won the South African general elections in a landslide, ensuring Mbeki's reelection to a second five-year term as president.

Mboya, Tom (1930–1969) Kenyan politician. A member of the Luo tribe, Mboya was educated at Ruskin College, Oxford, before returning to Kenya to serve as treasurer of the Kenya African Union and as secretary of the Kenya Local Government Workers Union in the 1950s. He was among the first African members elected to the Kenya legislative council (1957), and he distinguished himself as a member of the Kenya African National Union (KANU)—the leading political party. After the country's independence in 1963, Mboya served as minister of labor, minister of justice and minister of economic planning under Jomo KENYATTA. He seemed destined for higher office but was assassinated in Nairobi (1969). Demonstrations following his murder brought Kenya close to civil war. A member of the Kikuyu tribe was found guilty of the killing and was hanged.

McAdoo, William Gibbs (1863–1941) U.S. politician. He was involved with organizing the Hudson and Manhattan Railways, which built tunnels under the Hudson River between New York and New Jersey. Later, he was appointed to the Woodrow WILSON cabinet as secretary of the treasury (1913–18). Married to Wilson's daughter Eleanor (1914), he was chairman of the Federal Reserve Board and director general of U.S. railroads. McAdoo was elected senator from California and served in that capacity from 1933 to 1938.

McAuliffe, Anthony C. (1898–1975) McAuliffe was the American general who purportedly sent the reply "Nuts!" to a German ultimatum to surrender during the BATTLE OF THE BULGE (December 1944) in WORLD WAR II. At the time, he was acting commander of the 101st Airborne Division at BASTOGNE. (He was second-in-command to Major General Maxwell D. TAYLOR, who was attending conferences in Washington, D.C., when the battle

started.) McAuliffe later commanded the 103d Infantry Division in the European campaign.

McAuliffe, (Sharon) Christa (1948–1986) American teacher who was killed in the explosion of the *SPACE SHUTTLE CHALLENGER* (January 28, 1986). She had been selected from more than 10,000 applicants to be the first civilian passenger on a U.S. spaceflight. A high-school social studies teacher from Concord, New Hampshire, she had planned to broadcast lessons from space on the Public Broadcasting Service to schoolchildren throughout the U.S.

McCain, John Sidney, Jr. (1911–1981) American naval officer. The son of a four-star admiral, during *WORLD WAR II* he commanded three *SUBMARINES* and sank 20,000 tons of Japanese shipping. He was decorated for his accomplishments. During the *VIETNAM WAR* he served as commander in chief of U.S. forces in the Pacific. McCain was a dedicated advocate of the importance of seapower to the national interest.

McCain, John (1936–) U.S. naval officer (1958–81), and Republican member of the House of Representatives (1983–86) and the Senate (1987–) from Arizona. Born in the Panama Canal Zone, McCain followed his father, *JOHN SIDNEY MCCAIN JR.*, and grandfather and entered the U.S. Naval Academy, from which he graduated in 1958. Serving as a naval pilot in the Vietnam War, McCain was captured by the North Vietnamese and remained a prisoner of war (POW) for five years. When he was released by North Vietnam, McCain returned to the U.S. and attended the Naval War College from 1973 to 1974, followed by a tour of duty as the U.S. Senate's naval liaison from 1977 to 1981. McCain moved to Arizona in 1981, where he was elected to the House of Representatives the following year. After two terms in the House, McCain won the U.S. Senate seat vacated by Barry Goldwater in 1986, and was reelected by sizable margins in 1992 and 1998.

In 1999 McCain entered the race for the Republican presidential nomination. After performing well in the New Hampshire, Michigan, and Arizona primaries, McCain's presidential cam-

paign ended soon after he lost the California primary to Texas governor *GEORGE W. BUSH*. Following Bush's election in December 2000, McCain repeatedly concurred with criticisms expressed by Senate Democrats of President Bush's domestic policies. McCain also cooperated with Democratic senator Russell Feingold to reform campaign finance laws. In foreign affairs, McCain supported the March 2003 invasion of Iraq to overthrow Iraqi dictator Saddam *HUSSEIN*.

McCarren-Walter Act Legislation codifying U.S. immigration laws. Passed in 1952 over the veto of President Harry S. *TRUMAN*, the law maintained the national quota system of the 1924 New Quota Act but ended the earlier legislation's total ban on immigration of Asian and Pacific peoples. Provisions required elaborate screening of immigrants to keep out subversives and authorized the deportation of immigrants for communist and communist-front activities even after they had been naturalized.

McCarthy, Eugene Joseph (1916–2005) American politician. Born in Watkins, Minnesota, McCarthy later taught at the College of St. Thomas, St. Paul, Minnesota (1946–49). A Democrat, he entered politics in 1948 and served five terms in the U.S. House of Representatives (1949–59). McCarthy became a senator in 1959, establishing a liberal voting record and a reputation

Senator Eugene McCarthy (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

as a thoughtful, quiet intellectual. In 1966 he began to enunciate his opposition to President Lyndon B. *JOHNSON*'s *VIETNAM WAR* policy. In 1967 McCarthy announced his candidacy for the Democratic presidential nomination on a platform that supported a negotiated peace. Surrounded by a dedicated army of college students, McCarthy made surprisingly good showings in early primaries. His candidacy was one factor in Johnson's withdrawal from the race. McCarthy lost the nomination to Senator Hubert H. *HUMPHREY*. Retiring from the Senate in 1971, he returned to teaching. His subsequent attempts to reenter political life, including an independent bid for the presidency in 1976 and a run in a Senate primary in 1982, were unsuccessful.

McCarthy, Joseph Raymond (1908–1957) American politician. Born in Grand Chute, Wisconsin, McCarthy studied law at Marquette University and, after practicing law in his home state, became a circuit judge (1940). After *World War II* service in the marines, he entered politics in 1946 by defeating incumbent Wisconsin senator Robert M. *LA FOLLETTE JR.* for the Republican nomination and easily besting his Democratic rival. He was little noticed until 1950, when he accused the State Department of harboring communists. When asked for proof, McCarthy simply made new and more virulent accusations, making General George C. *MARSHALL* a particular object of scorn. Reelected in 1952, McCarthy gathered a loyal following around him and was soon appointed chairman of the Senate Permanent Investigations Subcommittee. Tapping into America's *COLD WAR* fears and wildly exacerbating them, he assumed great power and was responsible for the relentless pursuit of those he considered communists, subversives or fellow travelers and for the public disgrace of many. His attacks reached new heights in 1954 when his charges of communist infiltration into the U.S. Army provoked hearings that were broadcast on national television (see *ARMY-McCARTHY HEARINGS*). As a result of the hearings, the army was cleared and later that year McCarthy was censured by the Senate. After this censure, his influence underwent a steep decline. McCarthy's activities inspired the

term MCCARTHYISM, denoting violent and unfounded political attack.

McCarthy, Joseph Vincent (“Marse Joe”) (1887–1978) American baseball manager. McCarthy managed the legendary New York Yankees between 1931 and 1946. In that span, he led the Yankees to eight American League pennants and seven World Series titles. McCarthy was elected to the Baseball Hall of Fame in 1957.

McCarthy, Mary Therese (1912–1989) American novelist and critic. She was regarded as one of America’s pre-eminent literary figures from the 1930s through the 1970s. Many of her works, including the memoir *Memories of a Catholic Girlhood* (1957) as well as the novel *The Group* (1963), about the lives of eight Vassar College graduates, were autobiographical. Her sharp-edged critical writings and comments often provoked other literary figures. She touched off a feud with Lillian HELLMAN after she declared in a television interview, “Everything she [Hellman] writes is a lie, including ‘and’ and ‘the.’” Hellman sued for libel but died in 1984 before the case could reach trial. In 1984 McCarthy received both the National Medal for Literature and the Edward MacDowell Medal for outstanding contribution to literature.

McCarthyism Term derived from the behavior of U.S. senator Joseph MCCARTHY in the early 1950s. It refers not only to McCarthy’s activities, but also to the atmosphere in which he operated at the height of the COLD WAR. In his crusade against communists and “subversives,” McCarthy resorted to a variety of unethical tactics. These included making sensational and unsubstantiated charges against hitherto respectable citizens, claiming to have lists and statistics that supported his charges, and twisting witnesses’ words to make them seem guilty or uncooperative. By assuming a patriotic, self-righteous stance, McCarthy made those who denied his charges seem guilty. While McCarthyism originally meant an unthinking right-wing attack against anything that vaguely smacked of COMMUNISM, the term has been expanded to encompass the cynical leveling of any kind of unfair political charges.

McCartney, Sir (James) Paul (1942–) British rock and roll songwriter, vocalist, and bassist. Despite a solo career that has now lasted three decades, McCartney remains best known for his songwriting and vocals as a member of THE BEATLES. He and fellow Beatle John LENNON formed what many critics feel was the greatest songwriting team in the history of rock and roll. In 1970, after the breakup of The Beatles, McCartney released a highly successful eponymous solo album, *McCartney* (1970). In 1971 he formed the band Wings, which featured his wife, Linda, on keyboards and as an accompanying vocalist. There resulted a steady stream of singles hits by the ensemble Paul McCartney and Wings, including “My Love” (1973), “Live and Let Die” (1973), “Band on the Run” (1974) and “With a Little Luck” (1978). McCartney has also continued to pursue independent projects, making the hit song “Ebony and Ivory” (1982) in collaboration with Stevie WONDER and another hit, “Say Say Say” (1983), in collaboration with Michael JACKSON. In 1995 the remaining Beatles used a demo tape of John Lennon to release “Free As a Bird”—the band’s first new song in twenty-five years. Despite his declining musical production, now primarily focused on producing orchestral and classical pieces for EMI Records (with the exception of the 1999 album *Run Devil Run*), McCartney has continued to receive honors. In 1997 he was knighted by Queen Elizabeth II and in 1999 was inducted into the Rock and Roll Hall of Fame. He was active in fund-raising for the victims of the terrorist attacks in the United States on September 11, 2001, and put in a memorable musical performance at half-time during the Super Bowl in 2005.

McCay, (Zenas) Winsor (1867–1934) American illustrator, cartoonist and pioneer of motion picture ANIMATION. Born in Spring Lake, Michigan, McCay spent 15 years working as a cartoonist for the *Cincinnati Commercial Tribune*. In New York after 1902, he began his famous comic strips *Dream of the Rarebit Fiend* (*New York Evening Telegram*) and *Little Nemo in Slumberland* (*New York Herald*). Both depicted the nightmares and fantasies of dreamers. These strips were more than just a popular art, writes biographer John Canemaker; they were “an anticipation

of surrealist conceits in juxtapositions of fantastic occurrences in mundane settings, the instability of appearances, and the irrationality of life.” Between 1908 and 1911 he hand-colored over 4,000 drawings on 35mm film for *Little Nemo* and in 1911 began touring the vaudeville theater circuits, showing his animated film and illustrating his monologues with hastily drawn sketches of his characters. In 1912 he created *The Story of a Mosquito* and in 1914 *Gertie the Dinosaur*, executing between 6,000 and 10,000 sketches each, on transparent rice paper. Lasting only a few minutes apiece, the films were timed so that the characters seemed to respond to McCay’s on-stage “cues.” His most ambitious animated film was *The Sinking of the Lusitania* (1918), a fervently anti-German response to the wartime tragedy (see *LUSITANIA*). After completing several more films, including another *Gertie* picture, McCay returned to newspaper cartooning on the *New York American*. Canemaker claims McCay was the first person to make and exhibit a hand-colored cartoon, the first to base a cartoon on a successful comic strip and the first to use the medium in a highly personal way.

McCloy, John J(ay) (1895–1989) U.S. lawyer and diplomat. He played key roles in a number of government and business operations. Among his most memorable assignments was that of U.S. high commissioner in Germany (1949–52); during that time he oversaw the creation of a democratic civilian government and supervised the disbursement of \$1 billion in aid to the war-ravaged German economy (see *MARSHALL PLAN*). He also served as assistant secretary of war, president of the WORLD BANK, chairman of Chase Manhattan Bank and of the FORD FOUNDATION, and consultant to presidents KENNEDY, JOHNSON, NIXON and FORD.

McCormack, John (1884–1943) Irish tenor. McCormack, who enjoyed great success both as an opera performer and as a singer of Irish popular songs, was the favorite vocalist of the great Irish novelist James JOYCE, who proclaimed McCormack to be an artistic genius. McCormack made his operatic debut in Italy (1906) and thereafter enjoyed success in both Europe and America, winning special

Irish tenor John McCormack (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

praise for his role as Don Ottavio in Mozart's *Don Giovanni*. But while critics loved McCormack's voice, they found him a wooden actor—a verdict that McCormack himself did not dispute. After 1913 McCormack appeared strictly as a concert singer with a repertoire that drew from both opera and popular song; he was a favorite with audiences until his death. McCormack was made a papal count in 1928 and received many other honors. Many of his recordings have been remastered and remain available on LP records and compact discs.

McCormack, John William (1891–1980) American politician. A Democrat from Boston, Massachusetts, McCormack served in Congress for more than 40 years (1928–70), rising to the powerful position of Speaker of the House (1962–70). He was from an Irish family and was considered a model of the old-style big-city politician who tended to the needs, both great and small, of his home district. In Congress he was noted for his parliamentary skill and shrewd, temperate style, which helped him influence committee selection, shape legislation and control debate. As Speaker he helped formulate and steer through the House the outpouring of domestic legislation in the mid-1960s. (See also Lyndon B. JOHNSON; GREAT SOCIETY.)

McCovey, Willie Lee (1938–) American baseball player. One of the most fearsome home run hitters of all time, McCovey was one of the few players to have homered in every National League stadium. His career,

which stretched over four decades (1959–80), ended with a total of 521 home runs. He is perhaps best remembered for the hit he didn't get, a 1962 World Series line drive caught by Yankee Bobby Richardson that finished off the Giants' hopes in the bottom of the ninth inning of the seventh game. Traded to the San Diego Padres in 1974, he returned to the Giants for the remainder of his career in 1977. He retired in 1980, and was named to the Hall of Fame in 1986.

McCracken, James (1926–1988) American dramatic tenor; a mainstay of New York City's Metropolitan Opera Company in the 1960s and 1970s. In 1963 McCracken became the first U.S.-born singer to sing the title role in *Otello*, which remained his most celebrated role.

McCrea, Joel (1905–1990) U.S. actor. He appeared in more than 80 films, many of them Westerns, and specialized in playing calm, dependable heroes. His best known Westerns included *Wells Fargo* (1937), *Union Pacific* (1939) and *Ride the High Country* (1962). He also starred in the Alfred Hitchcock thriller *Foreign Correspondent* (1940) and in such comedies as *Sullivan's Travels* (1941), *The Palm Beach Story* (1942) and *The More the Merrier* (1943). With the money he earned from acting, he was able to return to his first love, ranching, and built several large spreads in California.

McCullers, Carson (1917–1967) U.S. novelist. Partially paralyzed by a series of strokes while in her 20s, she was bound to a wheelchair during her last years. Her major works include *The Heart Is a Lonely Hunter* (1940), *The Member of the Wedding* (1946), *The Ballad of the Sad Cafe* (1951) and *Clock without Hands* (1961).

McCutcheon, John T. (1870–1949) American cartoonist. His first political cartoon work appeared during the political campaign of 1896. He traveled the world, visiting the Gobi Desert and Amazon River valley, and also covered the Boer conflict and the Mexican revolution of 1914. His cartoons reflected his extraordinary background. He won the PULITZER PRIZE for cartoons in 1931. His writings include *Cartoons by Mc-*

Cutcheon (1903) and *Mysterious Stranger and Other Cartoons* (1905). The *Chicago Tribune* has continued to reprint his "Indian Summer" cartoon on an annual basis, believing it to be typical of the Midwest heritage.

McDivitt, James (1929–) U.S. astronaut. Command pilot of *Gemini 4* (June 3–7, 1965), McDivitt also commanded *Apollo 9* (March 3–13, 1969), which was the first test in space of the lunar module. With David Scott in the command module, McDivitt and Rusty Schweickart moved into the lunar module, nicknamed "Spider," and ran tests in preparation for its future moon excursions. An air force pilot with 145 combat missions to his credit, McDivitt logged nearly 339 hours in space. He retired from NASA in 1972 to enter private industry.

McDonnell, James S., Jr. (1899–1980) American aircraft manufacturer, known for his innovation in aerospace invention and design. As chairman of the McDonnell Douglas Corporation, McDonnell built the company into one of the world's largest manufacturers of commercial jetliners, military aircraft, spacecraft, and missiles. (See also Donald Wills DOUGLAS.)

McEnroe, John (1959–) U.S. tennis player. As an 18-year-old amateur, he was the youngest man ever to reach the finals at Wimbledon. He dominated the world of tennis throughout the 1980s, and was only the second player to take the U.S. Open title three consecutive times (1979–81). He also won three Wimbledon singles titles, as well as doubles titles at both events. Known for his hot temper and undisciplined on-court antics, he only rarely let his emotions get the better of his game. He married actress Tatum O'Neal, in 1994 but they divorced. Three years later he married rock musician Patty Smyth.

McEwen, John (1900–1980) Australian politician who served briefly as prime minister (1967–68). McEwen was known primarily for his leadership in international trade while trade minister. He was the architect of many trade treaties and opened up dozens of new export markets, including the USSR and the People's Republic of

CHINA, for Australian products. He worked to maintain Australia's close agricultural trade relationship with Britain and strongly opposed Britain's entry into the COMMON MARKET.

McGovern, George S(tanley) (1922–) American political leader. Born in Avon, South Dakota, he attended Dakota Wesleyan University, served as a bomber pilot in WORLD WAR II, taught American history (1949–53) and earned his Ph.D. during his last year of teaching. A Democrat, he served in the House of Representatives (1957–61) and was director of President John F. KENNEDY's Food for Peace program (1961–62). Elected to the Senate in 1962, he compiled a liberal record and became an early and outspoken opponent of the VIETNAM WAR. The Democratic Party's nominee for president in 1972, he was overwhelmingly defeated by Richard M. NIXON. McGovern returned to the Senate but was defeated in a bid for reelection in 1980. In August 2000 McGovern received the Presidential Medal of Freedom for his contributions to American political life and for his work as a U.S. ambassador to the United Nations Food and Agricultural Agencies in Rome, Italy, between 1998 and 2001. In 2001 McGovern was appointed United Nations Global Ambassador on World Hunger.

McGuckian, Medbh (1950–) Northern Irish poet. Born in Belfast, she was educated at Catholic schools and at Queens University, Belfast, where she was later the first female writer-in-residence (1986–88). She emerged in the 1980s with three collections and won several major prizes. Her work, highly lyrical and often surreal, explores the feminine subconscious. Her books include *The Flower Master* (1982), *Venus and the Rain* (1984), *On Ballycastle Beach* (1988), *Captain Lavender* (1944) and *Drawing Ballerinas* (2001).

McGwire, Mark (1963–) American baseball player. Born in Pomona, California, McGwire played baseball in high school as a pitcher, and became a star hitter at the University of Southern California (USC) and played on the U.S. Baseball Team at the 1984 Olympics. After two years in the Oakland Athlet-

Hitter Mark McGwire, playing for the Oakland Athletics (PHOTOFEST)

ics' (A's) minor league system, McGwire joined the A's for 18 games in the 1986 season. In 1987 McGwire won the AL Rookie of the Year because of his record-setting 49 home runs. In part because of his power hitting, the A's made it to the World Series in 1988, 1989, and 1990, and won the Series in 1989. Halfway through the 1997 season Oakland traded him to the St. Louis Cardinals of the National League. The following season, McGwire broke the major league baseball season home run record of 61 set by ROGER MARIS in 1961. After hitting his 62nd home run on September 8, 1998, McGwire ended the season with 70 home runs. His record stood until 2001, when BARRY BONDS hit 73 home runs for the San Francisco Giants. Beset by injuries, McGwire retired in 2001. During a congressional hearing in 2005, McGwire refused to answer pointed questions about his alleged use of steroids, casting a pall over his record-breaking performance as a home run hitter.

McIntyre, Oscar Odd (1881–1938) American newspaper columnist. He began his career in journalism as a feature writer in Missouri, and soon became a political writer and then the managing editor of the Dayton, Ohio, *Herald*, in 1906. His "New York Day by Day" was syndicated in 550 newspapers.

McIver, Loren (1909–1998) American painter. Born in New York City, she studied there at the Art Students

League. Her pale, misty, poetic canvasses depict forms on the margins of usual attention—such as fallen leaves, chalk scrawls or oil puddle rainbows marking city streets, cracks in the pavement or an ancient window shade. McIver's paintings include *Hopscotch* (1940, Museum of Modern Art, New York City) and *The Street* (Corcoran Gallery of Art, Washington, D.C.).

McKay, John (1922–1975) One of the top U.S. test pilots during the 1950s and early 1960s, McKay flew such advanced aircraft as the X-1 rocket plane, the Douglas Skyrocket and the X-15. After growing up in the West Indies, McKay returned to the United States and received his pilot's license at the age of 18. He flew combat missions for the U.S. Navy during World War II and after the war earned his B.S. in aeronautical engineering from Virginia Polytechnic Institute. Rejoining his old employer (NACA—The National Advisory Committee on Aeronautics) after graduation in 1950, he began his career as a test pilot at Edwards Air Force Base in California. McKay flew over 20 flights on the X-15 advanced rocket plane, reaching an altitude of 295,600 feet on one of his flights (September 28, 1965). Although by air force standards this should have qualified him as an astronaut, McKay was not awarded astronaut wings because he was a civilian. A crash landing during an X-15 flight on November 9, 1962, nearly ended his life, but McKay recovered to fly the plane again. His death in April 1975 was attributed to injuries suffered in that crash.

McKenna, Siobhan (1923–1986) Irish actress. Her most acclaimed role was as the title character in George Bernard SHAW's play *St. Joan*. Her portrayal of Joan of Arc took London by storm in 1954 and had a similar effect on Broadway two years later. Among landmarks in her later career were her solo show *Here Are Ladies* (1970), an anthology of women as seen by various Irish writers, and her portrayal in 1977 of Sarah BERNHARDT. She began her stage career with Gaelic parts, and Irish audiences saw her in a Gaelic-language version of *St. Joan* that she herself had prepared. She also performed frequently at the ABBEY THEATRE.

McKinley, William (1843–1901) Twenty-fifth president of the UNITED STATES. After serving with distinction in the Civil War, he returned to Ohio to practice law. After serving in the House of Representatives as a Republican from 1876 to 1891 (except for a brief period), he was elected governor of Ohio in 1891 and 1893. McKinley won the Republican nomination for president in 1896. The early part of his presidency was relatively uneventful, but he later proved to be an able war president during the Spanish-American War (1898). He was the architect of the policies that acquired and governed the new territories coming under U.S. jurisdiction. On July 7, 1898, he signed the bill annexing Hawaii; the Treaty of Paris signed December 10, 1898, freed Cuba and ceded Guam, Puerto Rico and the Philippines to the U.S.; and on December 2, 1899, American Samoa was acquired by treaty. Reelected in 1900, his term had scarcely begun when he was shot in Buffalo, New York, on September 6, 1901; he died after nine days. He was greatly admired for his quiet efficiency, his integrity and a faultless private life. (See also Theodore ROOSEVELT.)

McLaren, Norman (1914–1987) Scottish-born Canadian filmmaker. He was one of the most inventive figures in the history of film ANIMATION. His career began in his native Scotland and continued in England, the U.S. and Canada. He eventually emerged as Canada's most admired film artist. For most of his career, he was associated with the National Film Board of Canada. His early experimentation at the fledgling NFB in the 1940s included making animation without a camera by drawing directly on clear acetate. Later he developed the technique of **pixillation**—live action seen in staggered single frames—for his cartoon *Neighbors*, about a deadly fight between two men over a flower on their property line. The 1952 ACADEMY AWARD given to the film was but one of more than 500 international awards McLaren won for about 60 short films he created in Canada.

McLuhan, (Herbert) Marshall (1911–1981) Canadian professor of English at University of Toronto (St. Michael's College). He developed theories about the role of the electronic

media in mass popular culture. His books—including *The Mechanical Bride* (1951), *Understanding Media* (1964) and *The Medium Is the Message* (1967)—argue the thesis that print is an outmoded medium, too “linear” in its approach to reality, while television and other visual media override time and distance instantaneously—making the world a “global village.” The advertising and broadcasting industries took up McLuhan's ideas with great enthusiasm, since they showed recognition and respect in a way not previously offered to these fields. McLuhan's name and his ideas were widely discussed in the 1960s and 1970s and exerted considerable influence in design fields, where understanding present and future developments is always important. McLuhan's work is now little read and discussed, although its basic message still has validity.

McMahon, Brien (1903–1952) American politician. Following graduation from Fordham and Yale universities, he practiced law and became a judge in Norwalk, Connecticut. He was elected to the U.S. Senate (1945–56), where he chaired the Joint Committee on Atomic Energy (1945–47) and authored the act that led to the formation of the Atomic Energy Commission.

McManus, George (1884–1954) American cartoonist. His famous comic strip *Bringing Up Father* appeared in over 700 papers around the world, in 27 languages. His other comic series include *Let George Do It* and *The Newly Weds and Their Baby Snookums*. He was awarded an honorary tribute in the *Congressional Record* of January 26, 1932.

McMillan, Edwin Mattison (1907–1991) American scientist. McMillan was a professor of physics at the University of California at Berkeley from 1934 to 1973. In 1940, working with Philip ABELSON, he discovered the first element heavier than uranium, element 93, which he named neptunium, after the planet Neptune. McMillan also predicted the discovery of element 94 (plutonium), which was later found by a team working under Glenn SEABORG; McMillan and Seaborg shared the 1951 NOBEL PRIZE in chemistry. In 1945 McMillan conceived the synchrotron,

which was 40 times more powerful than the cyclotron developed by Ernest LAWRENCE.

McNair, Ronald E. (1950–1986) U.S. astronaut, one of seven killed in the explosion of the SPACE SHUTTLE CHALLENGER on January 28, 1986. He was a physicist and an expert on lasers. When he flew on a shuttle mission in 1984 he became the second African American in space.

McNamara, Robert Strange (1916–) U.S. secretary of state. McNamara taught business administration at Harvard (1940–43) and served in the Army Air Corps during World War II. He was an executive of the Ford Motor Company (1946–60), where he was responsible for sweeping reforms in the managerial system and production techniques that led to the modernization of the firm. He became president of Ford in 1960 but resigned shortly thereafter to serve as secretary of defense during the KENNEDY and JOHNSON administrations. McNamara centralized decision making in the hands of the civilian secretary at the expense of the military secretaries and introduced modern management techniques to the department. He also shifted strategy away from nuclear weapons and high technology, strengthening conventional fighting capacity. An early advocate of escalating the VIETNAM WAR, McNamara resigned in 1968 after recommending that the president turn over major responsibility for ground combat to the South Vietnamese. He served as president of the WORLD BANK from 1968 to 1981.

McPherson, Aimee Semple (1890–1944) American evangelist. A highly flamboyant figure in the 1910s and 1920s, McPherson was one of the most successful of American evangelists. Billing herself as the “World's Most Pulpit-chitinous Evangelist,” she founded the International Church of the Four-Square Gospel in Los Angeles, California, raised \$1.5 million from her followers and built the 5,000-person capacity Angelus Temple to house her services, which featured faith healing and baptisms in the faith. In 1926 McPherson was apparently kidnapped, but, during a subsequent criminal obstruction of justice trial, facts emerged

indicating that she had been trysting with a married lover during the month in question. While McPherson was ultimately acquitted, she never regained her former popularity.

McQueen, Steve (1930–1980) American film actor whose portrayal of tough, freewheeling loners made him a national emblem in the 1960s. After training on the stage at the Neighborhood Playhouse and the Actors Studio in New York, he made his Broadway debut in *Hatful of Rain* (1955) and his screen debut in *Somebody Up There Likes Me* (1956). In 1958 he starred in a low-budget horror classic, *The Blob*, and landed the starring role in the television series *Wanted! Dead or Alive*. During a 22-year movie career during which he made more than 24 films, he created an enduring character who lived on the outer fringes of society, surviving by quick wits, sturdy self-reliance and a quirky humor. Among his notable later films were *The Great Escape* (1963), *The Cincinnati Kid* (1965), *The Sand Pebbles* (1966), *The Thomas Crown Affair* (1968), *Bullitt* (1968) and *Papillon* (1973).

McReynolds, James C. (1862–1946) Associate justice, U.S. Supreme Court (1914–41). A graduate of Vanderbilt University and the University of Virginia Law School, McReynolds established a successful law practice in Nashville, Tennessee. After an unsuccessful run for Congress he was appointed to the Justice Department by President Theodore ROOSEVELT and specialized in prosecuting antitrust cases. After returning to private practice he was appointed U.S. attorney general by President Woodrow WILSON in 1912, and in 1914 he was elevated to the Supreme Court. Although a Democrat, he took conservative positions on the bench. He reputedly would not sit next to either Justice BRANDEIS or CARDOZO, both of whom were Jewish. He retired in 1941.

McShann, James Columbus “Jay” (1916–) American jazz pianist and leading exponent of the KANSAS CITY JAZZ sound of the 1930s. Born in Muskogee, Oklahoma, Jay taught himself piano as a child. At the age of 20 he moved to Kansas City, Missouri, where he listened to and played with the emerging jazz greats of the time—

Count BASIE, Joe TURNER and Pete Johnson. “When I came to Kansas City, the town was wide open, jumpin’, the joints staying open 24 hours a day,” McShann told this writer. “I hadn’t heard anything like it. I didn’t want to go to bed; I was afraid I’d miss something.” In 1939 he formed his own big band and took his new discovery, Charlie “Yardbird” PARKER, to the Savoy Ballroom in New York City. But WORLD WAR II intervened; there was a subsequent decline in the popularity of the big bands; and by 1950 McShann was back in Kansas City to study at the Conservatory of Music (now part of the University of Missouri, Kansas City). He maintains an active schedule, still recording frequently for the Capitol, Atlantic, Black and Blue, and Sackville labels; and travels extensively to most of the top international jazz festivals. In 1988 he was the subject and dedicatee of a major Alvin AILEY ballet, *Opus McShann*. Today he is the last major survivor of the legendary Kansas City sound—a distinctive blend of improvisation, uptempo blues and a driving boogie-woogie beat. His signature piece, “Hootie’s Blues,” derives its name from jazz slang of the 1930s, referring to a state of intoxication, known as “getting hooted.”

Mead, Margaret (1901–1978) American anthropologist. Educated at Barnard College (B.A., 1923) and Columbia University (M.A., 1924; Ph.D., 1929), where she studied with Franz BOAS, Mead began her study of Pacific islands culture in the mid-1920s. *Coming of Age in Samoa* (1928), a best seller that influenced several generations of students to enter the nascent field of anthropology, was followed by *Growing Up in New Guinea* (1930), *Sex and Temperament in Three Primitive Societies* (1935) and, most important, *Male and Female* (1949), an application of anthropological findings to the contemporary urban West. *An Anthropologist at Work* (1959) is a study of close friend and colleague Ruth BENEDICT; *A Rap on Race* (1971) is a dialogue with James BALDWIN; *Blackberry Winter*; *My Earlier Years* (1972) is her memoir. Although some colleagues criticized her methods, her broad-based, intuitive approach to cross-cultural analysis revolutionized the field. A prolific author and lecturer and a regular contributor to *Redbook* for 17 years,

she became a popular celebrity as well as an intellectual and scholar.

Means, Russell (1940–) American Indian activist. In 1972 Means participated in the week-long occupation of the offices of the Bureau of Indian Affairs—designed to dramatize grievances against the government’s Indian policies. The following year he was one of the leaders of the 71-day armed occupation of Wounded Knee, South Dakota, organized to demand a Senate investigation of Indian treaties. Means continued to participate in feature films throughout the 1990s, including *The Last of the Mohicans* (1992), *Wagons East!* (1994), *Natural Born Killers* (1994), *The Song of Hiawatha* (1997), *Black Cat Run* (1998) and *Thomas and the Magic Railroad* (2000). He also provided the voice for Chief Powhatan in the Disney animated feature film *Pocahontas* (1995).

Meany, George (1894–1980) American labor leader. Born in New York City, Meany became a plumber at 16 and began his union career in 1922. He swiftly moved from the Plumbers Union into the Hierarchy of the AMERICAN FEDERATION OF LABOR (AFL), becoming president of the New York federation in 1934 and secretary-treasurer of the national union in 1940. He succeeded William GREEN as the union’s president in 1952. Meany was an important force in the merging of the AFL and the CONGRESS OF INDUSTRIAL ORGANIZATIONS (CIO) in 1955. He became the AFL-CIO’s first president and was reelected thereafter without opposition. A vocal anticommunist, Meany strongly supported American involvement in the VIETNAM WAR. He broke with the union movement’s traditional support of Democrats, refusing to support the candidacy of George MCGOVERN in 1972 and later becoming a critic of the policies of President JIMMY CARTER.

Medawar, Sir Peter Brian (1915–1987) British zoologist. Born in Rio de Janeiro, Brazil, Medawar immigrated to Great Britain and attended Oxford University. Graduating in 1939, he continued there in research under Howard Florey and as a professor. Later (1947–51) he taught zoology at the University of Birmingham and comparative anatomy at University

College, London (1951–62). Director of the National Institute of Medical Research in London until 1971, he was later affiliated with the Clinical Research Centre and a professor of experimental medicine at the Royal Institution. During WORLD WAR II he became interested in medical biology and he subsequently developed a concentrated fibrinogen used to heal damaged and grafted nerves. The war also precipitated Medawar's experiments on burns and the rejection of skin grafts, and he discovered that grafts were more or less successful depending on the genetic closeness of the donor and recipient. He and Sir Frank Macfarlane BURNET discovered acquired immunological tolerance, which later helped in the development of organ transplantation. For their discovery, Medawar and Burnet were awarded the 1960 NOBEL PRIZE for physiology or medicine.

Medellín Cartel A powerful criminal organization of COCAINE producers and traffickers based in Medellín, COLOMBIA, the center of that country's illegal drug trade. Active in the late 1980s and into the 1990s, this violent cartel was believed responsible for about 80 percent of the cocaine smuggled into the U.S. The group assassinated Colombian judges, police officials, newspaper editors and others who opposed them. On August 18, 1989, cartel gunmen assassinated Colombian senator Luis Carlos Galán—a leading presidential candidate and opponent of the drug trade—at a campaign rally near Bogotá. When President Virgilio Barcos announced an all-out war against the cartel, the cartel's paramilitary group, the Extraditables, threatened to escalate the violence and to kill 10 judges for each suspected drug trafficker extradited to the U.S. A total of 550 lower-court judges in Bogotá quit on August 25. After the arrest of a cartel financial adviser, nine bank offices in Medellín were dynamited and other bombings occurred in the days following. On August 30 a curfew was imposed in Medellín and nine other Colombian cities, and the U.S. ordered dependents of American diplomats to leave the country. In subsequent months, several cartel leaders were arrested and their property seized. Although the Medellín cartel suffered setbacks, it remained a dangerous

criminal force. During the 1990s the Medellín Cartel came under increasing assault from U.S. and Colombian military forces in the U.S.'s WAR ON DRUGS, which included American training of Colombian special forces, and joint Colombian-American assaults on cartel airport runways and cocaine plantations. In December 1993, the Medellín Cartel was dealt a substantial blow when its leader, Colombian lord Pablo ESCOBAR was killed in a gunfight with Colombian security forces. The cartel also encountered commercial competition from the Revolutionary Armed Forces of Colombia (FARC), a leftist rebel group that funded its military operations against the Colombian government through profits from the sale of cocaine to the U.S. and other countries.

Medicaid American national health insurance for the needy who could not otherwise afford care, including all of those on public assistance. Like MEDICARE, the program was established in 1965. With its costs paid by the federal, state and county governments, it is administered by individual states, each of which must meet federal standards but also has a good deal of latitude in the services it provides. Medicaid plans usually provide for inpatient and outpatient hospital services; nursing home care; services by physicians, dentists and optometrists; X-rays, drugs and other medical necessities. While the Medicare system has proven the focus of many reform attempts since President William Jefferson CLINTON unveiled his own Medicare reform plan in June 1999, Medicaid has neither received the same attention nor benefited from the same type of reform legislation. For instance, the December 2003 Medicare initiative signed by President George W. BUSH permitted Medicare to negotiate for reduced prescription drug costs for senior citizens did not offer the same benefits to Medicaid recipients. However, some legislation has been enacted at the state level, such as the reform passed by the Maine state legislature in 2000.

Medicare U.S. national health insurance for those aged 65 and over. Like MEDICAID, it was established in 1965 by amendments to Social Security. Managed by the Health Care Financing

Administration of the Department of Health and Human Services, Medicare provides hospital insurance for most people 65 and over, along with supplementary medical insurance. In addition, it provides certain severely disabled people with health insurance. Medicare pays for a portion of hospital and nursing home care and for some health services administered at home. After paying a certain deductible amount, those covered by Medicare are entitled to 60 days of hospital care and, with a relatively small payment, to 30 more days thereafter. Medicare recipients are also eligible for 100 days of skilled nursing care, the first 20 days at no cost, the following 80 partly paid for by the recipient. Medicare also pays for physicians' services, prescription drugs and a number of other medical costs after a small yearly deductible, picking up 80 percent of "reasonable charges." Medicare is financed by a tax paid by workers and employers as well as by the self-employed as part of their Social Security payments. With the end of the 20th century and the impending retirement of "baby boomers," the federal government began evaluating how best to assure that Medicare could continue to provide adequate assistance to the elderly. In December 2003 President George W. BUSH signed a \$400 billion initiative to reform the structure of Medicare through increased subsidies of Health Maintenance Organizations (HMOs) and through offering seniors a plan to reduce the cost on their overall prescription drug purchases by 10 to 25%.

Medici, Emilio Garrastazu (1905–1985) Brazilian general and politician. A career army officer, in 1969 he became BRAZIL's third military president since the 1964 overthrow of that country's civilian government. He remained in power until 1974.

Médecins Sans Frontières (Doctors Without Borders) International organization of medical professionals providing aid to victims of epidemics, natural disasters, starvation, and wars, and winner of the 1999 Nobel Peace Prize. Founded in Brussels, Belgium, in 1971 by Bernard Kouchner and several other French doctors, Médecins Sans Frontières (MSF) attempted to provide a more rapid response for medical

assistance than the International Red Cross. It first intervened following a 1972 earthquake in Nicaragua, following which it offered medical treatment to victims of the Vietnam War as well as Cambodian and Vietnamese refugees in Thailand. During the 1980s, MSF was best known for its efforts to combat famine in Ethiopia and Sudan, as well as to provide food to the war-torn cities of Uganda.

In 1990 MSF opened its first non-European office in New York City. The following year it sent a mission to Kuwait in order to provide medical and food relief following that country's liberation during the Persian Gulf War. Throughout the rest of the 1990s, MSF worked to provide medical and food relief to areas plagued by civil war, such as BOSNIA AND HERZEGOVINA, BURUNDI, RWANDA, and SOMALIA. For its humanitarian missions, MSF received the Nobel Peace Prize in 1999. By 2000 MSF had offered its relief services in over 80 nations, in which it was aided by its over 2,000 volunteers from 20 countries worldwide.

Medina, Harold Raymond (1888–1990) American U.S. District Court judge who achieved fame in 1948 when presiding over the trial and conviction of 11 Communist Party members at the height of the anticommunist MCCARTHY era. Born in Brooklyn and educated at Princeton and at Columbia University Law School, Medina was a successful lawyer in private practice when in 1947 he was appointed a federal district court judge in Manhattan. In 1952 he was elevated to the prestigious federal Second Circuit Court of Appeals after the retirement of the Justice Learned HAND. Although Medina wrote hundreds of opinions in a remarkably long 33-year career on the bench, he is best remembered for the 1949 opinion convicting 11 communist leaders. At the time the country was involved in a rage of anticommunist sympathy, and the lengthy trial became a focal point with the judge the center of attention. Although Medina's opinion convicting the communist leaders under the SMITH ACT for advocating the overthrow of the federal government was upheld by the Supreme Court, the dissenting judges roundly criticized Medina's handling of the case as onesided. Medina retired in

1958, although he continued to hear cases until 1980 as a senior judge.

Meet the Press NBC public affairs program, the longest-running series on American network television. It was created by Martha Rountree and Lawrence Spivak in 1945 as a radio program. It moved to local television in Washington, D.C. in 1947 and was first telecast over the network later that year. Spivak, who had always appeared as a regular panelist, became the moderator in 1965 and served in that capacity for a decade. Replacements have included Bill Monroe, Marvin Kalb and Chris Wallace. In 1991 NBC journalist Tim Russert became moderator.

Megawati, Sukarnoputri (1947–) President of INDONESIA (2001–2004). Her father, Sukarno, helped lead Indonesia in its struggle for independence from the Dutch after World War II. At age 40 she joined the opposition to the government of her father's successor, Suharto. In 1987 and 1992 she ran unsuccessfully as a congressional candidate of the Indonesian Democratic Party (IDP), and in 1993 became president of the party. In 1996 Megawati's association with opposition to Suharto's presidency prompted Suharto to remove her as leader of the IDP and to prevent her from running in the May 1997 national elections. In response Megawati formed a new political party, the Indonesian Democratic Party of Struggle. In 1999 her popularity as an opponent of the former Suharto regime led to her party becoming the largest in the Indonesian parliament. However, a coalition organized by Abdurrahman Wahid, an Islamic cleric, resulted in Wahid's election as president in October 1999, with Megawati becoming the vice president. When Wahid was impeached after investigations into his alleged mismanagement of government agencies and funds, Megawati succeeded him in July 2001 as president of Indonesia. She was defeated for reelection in 2004 after a relatively mediocre record of dealing with the country's economic problems.

Meier-Graefe, Julius (1867–1935) Hungarian-born writer and critic who was influential in encouraging and publicizing the ART NOUVEAU move-

ment in the late 19th and early 20th centuries. Meier-Graefe was trained in engineering at Munich and Zurich and, in 1890, settled in Berlin. In 1893 he traveled in England and there met William Morris. Meier-Graefe later moved to Paris and met Samuel Bing (1895). The two worked together to found the Art Nouveau movement. In 1897 he founded the magazine *Dekorative Kunst* (published from 1897 until 1929 in Munich), which publicized Germany's Art Nouveau. After 1905 Meier-Graefe became somewhat disillusioned with the ideas of Art Nouveau and turned his attention to art criticism and history. In 1934 he left Germany to escape NAZISM and, in the last year of his life, applied for French citizenship.

Meiklejohn, William (1903–1981) HOLLYWOOD talent agent. He discovered such stars as Mickey ROONEY, Judy GARLAND and a young radio sportscaster named Ronald REAGAN. Meiklejohn spent 60 years as a scout, 20 of them as talent chief at PARAMOUNT PICTURES.

Mein Kampf (*My Struggle*) Book (1925–27) by Adolf HITLER, regarded as the bible of NAZISM. Hitler dictated *Mein Kampf* to his confidant Rudolf HESS while the two were serving a prison sentence for their part in the Munich BEER HALL PUTSCH (1923). Most readers have found *Mein Kampf* not only distasteful but also dull and unreadable. In a turgid, rambling style, Hitler rants against the JEWS (see ANTI-SEMITISM), the VERSAILLES TREATY and democracy, while extolling the virtues of the "Aryan race." Many, both in Germany and without, dismissed the book as the ravings of a crackpot. However, Hitler was remarkably honest and precise in stating his goals. Historians have speculated that, had the threats in *Mein Kampf* been taken seriously, the tragic consequences of Hitlerism might have been forestalled. Among other things, *Mein Kampf* called for the abolition of the WEIMAR REPUBLIC, the rebuilding of German military might, retribution against France and Russia for Germany's defeat in WORLD WAR I, German territorial expansion (see LEBENSRAUM) and the eradication of the Jews and other "inferior" peoples (see FINAL SOLUTION; HOLOCAUST).

Meir, Golda (Golda Mabovitz) (1898–1978) Israeli political leader, prime minister (1969–74). Born in Kiev, Russia, she and her family immigrated to the U.S. in 1906, settling in Milwaukee. She married Morris Myerson in 1917 and moved to PALESTINE in 1921. She held important posts with the British-run Jewish Agency and the World Zionist Organization before and during World War II. After Israeli independence in 1948, she was ambassador to the USSR, labor minister (1949–56) and foreign minister (1956–66). In 1956 she took the Hebrew name Meir (light-giver). After the death of Levi Eshkol in 1969, she became interim prime minister and was elected to the post later that year. In October 1973, when the Egyptian and Syrian armies combined in a surprise attack, she rallied Israeli forces but was widely blamed for her nation's lack of military preparedness (see YOM KIPPUR WAR). Unable to form a government after Labor Party defeats in 1974, she resigned from office while retaining enormous personal popularity at home and abroad.

Meitner, Lise (1878–1968) Austrian-Swedish physicist. Meitner entered the University of Vienna in 1901, studied science under Ludwig Boltzmann and obtained her doctorate in 1906. From Vienna she went to Berlin to attend lectures by Max PLANCK on theoretical physics. Here she began to study the new phenomenon of radioactivity in collaboration with Otto HAHN, beginning a partnership that was to last 30 years. At Berlin Meitner met with remarkable difficulties caused by prejudice against women in academic life. She was forced to work in an old carpentry shop and forbidden by Emil FISCHER to enter laboratories in which males were working. In 1914, at the outbreak of WORLD WAR I, she became a nurse in the Austrian army, continuing to work with Hahn during leave periods. In 1918 they announced the discovery of the radioactive element protactinium.

After the war Meitner returned to Berlin as head of the department of radiation physics at the Kaiser Wilhelm Institute. Here she investigated the relationship between the gamma and beta rays emitted by radioactive material. In 1935 she and Hahn began work

on the transformation of uranium nuclei under neutron bombardment. Following HITLER's annexation of Austria in 1938 she was no longer safe from persecution and, like many Jewish scientists, left Germany. With the help of Dutch colleagues she found refuge in Sweden, obtaining a post at the Nobel Institute in Stockholm. Hahn, with Fritz Strassman, continued the uranium work and in 1939 published results showing that nuclei were present that were much lighter than uranium. Shortly afterward Meitner, with Otto Frisch (her nephew), published an explanation interpreting these results as fission of the uranium nuclei. For this she received a share in the 1966 Enrico Fermi Prize of the Atomic Energy Commission.

Melba, Dame Nellie (Helen Porter Mitchell) (1859–1931) Australian operatic soprano. Born in a suburb of Melbourne, Melba studied in Paris with Mathilde Marchesi. She made her European operatic debut in Brussels in 1887 and her American debut at the Metropolitan Opera in 1893. Performing regularly at London's Covent Garden, New York's Metropolitan Opera and various European opera houses, she was acclaimed for such roles as Gilda in Verdi's *Rigoletto* and Violetta in PUCCINI's *La Traviata*. Made a Dame of the British Empire in 1918, she retired from the stage in 1926 and returned to Australia as president of the Melbourne Conservatory. Possessing a superb coloratura, Melba was noted for her pure tone throughout the operatic register, her perfect breath control and her birdlike trill. According to critic Irving Kolodin, her voice was "one of the most precious gifts that heaven ever put in a human throat." One of the leading celebrities of her time, Melba lent her name to such edibles as Melba toast and peach Melba.

Melchior, Lauritz (1890–1973) Danish opera singer. Melchior was perhaps the greatest interpreter of the *Helden-tenor* lead roles that proliferate in the Ring Cycle operas of the 19th-century composer Richard Wagner. Melchior made his debut as Tannhauser in 1918 and followed with portrayals of the Wagnerian heroes Siegfried, Lohengrin, Tristan and Parsifal. Melchior frequently appeared at the Bayreuth Wagnerian

festival, as well as at Covent Garden in London and at the Metropolitan Opera in New York. He spent the last 20 years of his life in America, where he taught voice and continued to perform.

Melen, Ferit (1906–1988) Turkish politician. Melen held the posts of premier (1972–73) and defense minister of TURKEY (1971–72, 1975–77). Melen first became defense minister during one of Turkey's most violent periods, when the military struggled to control what Turks referred to as "the anarchy"—a period of extremist kidnappings, robberies and murders. The draconian countermeasures the military initiated succeeded only after martial law was declared and secretive courts-martial were held, harshly punishing thousands for allegedly attempting to impose a Soviet-style communist regime by terror.

Méliès, Georges (1861–1938) French stage conjurer and pioneer in the narrative motion picture at the turn of the 20th century. He was the son of a wealthy footwear manufacturer. Although he joined his brothers in the management of the family factory, his ambitions in painting and magic led him to sell his business interests in 1888 and purchase the Théâtre Robert-Houdin. After enthusiastically viewing the program of films by the LUMIÈRE BROTHERS at the Grand Café in Paris in 1895, he developed his own camera and included his films in his stage programs. He utilized cinematic techniques of editing and superimpositions to transfer the effects and transformations of fairy pantomimes and magic shows to celluloid. At first they were simple "illusions," like *Escamotage d'une dame* (*The Vanishing Lady*) in 1896. By the time he produced *Le Voyage dans la lune* (*A Trip to the Moon*), however, they were elaborate story films with painted sets and machinery of his own design. These "artificially arranged scenes," as he called them, were made in his glass-enclosed studio in the garden of his Montreuil home—the first European movie studio—and released under the imprimatur of Star Films. At the peak of his success in 1903, he opened an American studio, where his brother, Gaston, made westerns. After the release of one of George's most ambitious films, *A la*

conquête du Pôle (*The Conquest of the Pole*) in 1912, he went into decline. Failing fortunes forced him to sell his estate (1913), return to the variety stage (1915), declare bankruptcy (1923) and spend the remainder of his days running a toy concession at the Montparnasse railway station. His relative obscurity was relieved somewhat by the awarding of a Legion of Honor Medal and a pension in 1931. Méliès's importance in the development of the story-film tradition can scarcely be exaggerated. His energies were indefatigable and his imagination unbounded. The motto of his Star Films company was characteristic: "The World Within Reach"—as was his comment on the making of *The Conquest of the Pole*: "Cook and Peary claimed to have reached the Pole. In fact, I don't think either one did. I said to myself, I'm going to go there."

Mellon, Andrew William (1855–1937) U.S. financier and cabinet member. Born in Pittsburgh, Mellon joined the family banking firm in 1874. He was active in developing the aluminum, coal and oil industries as well as in consolidating banking. By 1921, when Warren HARDING appointed him secretary of the treasury, Mellon was one of the wealthiest men in the U.S. As secretary, Mellon worked to lower taxes and reduce the national debt. He believed that business would prosper in proportion to a reduction in taxes; prosperity would then filter down to individual workers and farmers. During his tenure (1921–31), Mellon reduced the national debt by over \$8 billion despite drastic tax cuts. Mellon did not foresee the GREAT DEPRESSION and emphasized retrenchment as a means to combat it. He resigned in 1932 and served as ambassador to Great Britain until 1933. In 1937 he donated his art collection, valued at \$25 million, as well as funds for a museum to house it, to the U.S. The donation was the foundation of the National Gallery of Art, opened in 1941.

Memel, Insurrection at (1923) The predominantly German city of Memel (Klaipėda) in western LITHUANIA had been under Allied control since the end of World War I. Despite Lithuanian requests, the Allies established a French garrison in the city. On

January 11, 1923, an insurrection engineered by the Lithuanians, whose troops occupied the district, forced out the French. The Allies protested but then decided to make Memel an autonomous region within Lithuania, and passed the Memel Statute on May 8, 1923, ratifying the decision.

Menchú Túm, Rigoberta (1959–) Guatemalan humanitarian activist and winner of the 1992 Nobel Peace Prize. Born into a Quiché (an indigenous ethnic group) agrarian community located in a northwestern region in GUATEMALA, Menchú began working to support her family when she was eight years old as a migrant laborer. Eventually, she left her family to work as a maid in the country's capital, Guatemala City. In the late 1970s Menchú began to sympathize with the efforts of revolutionaries in Guatemala to protest the human rights abuses committed by the military-dominated government. In response, Menchú and those members of her family who joined her in the protests became targets of government-sponsored paramilitary forces, leading to Menchú's exile in MEXICO in 1981. While in Mexico, she lectured in an effort to raise international awareness about the troubles caused by the government and military forces in Guatemala. She also dictated *I, Rigoberta Menchú* (1983), an autobiographical book that also discussed agrarian culture in Guatemala and the ongoing struggle between Guatemalan revolutionaries and the Guatemalan military. As a result of her efforts to raise international condemnation of Guatemala for its treatment of dissident groups, Menchú received the Nobel Peace Prize in 1992. After receiving the Nobel prize Menchú returned to Guatemala, where she began working with dissident groups. In 1998 she released her second book, *Crossing Borders* (1998).

Mencken, H(enry) L(ouis) (1880–1956) U.S. author and philologist. He began his career as a reporter in Baltimore. In 1924 he founded the *American Mercury* with fellow critic George Jean Nathan, and served as its editor through 1933. After visiting England Mencken became interested in American linguistics. The outcome of his research was the authoritative *The American Language* (1919), which was revised in 1921, 1923 and 1936; it was

followed by *Supplement One* (1946) and *Supplement Two* (1948). Like George Bernard SHAW, Mencken was known for his insistence on correct usage of language. His other works include *Ventures into Verse* (1908) and the series of six collections of satirical essays called *Prejudices* (1919–27).

Mendelsohn, Erich (1887–1953) German-born architect associated with the development of MODERNISM through the unique expressionist character of some of his earlier work. Mendelsohn was trained at the Technical High School in Munich and was then active in theater design while coming in contact with artists of the expressionist BLAUE REITER group. After service in WORLD WAR I, he opened an office in Berlin (1919) and began work on a research laboratory for studies relating to EINSTEIN's theory of relativity. This led to his most famous work, the Einstein Tower at Potsdam, completed in 1924. It is an astronomical tower and observatory built in a flowing, sculptural form (intended for concrete construction but actually executed in brick and steel)—which is viewed by critics as expressionistic. Commissions that followed, for houses, industrial and commercial buildings, led to designs that were generally more reserved and related to the INTERNATIONAL STYLE. Mendelsohn's Department Store buildings in Stuttgart and Chemnitz, Germany, for the firm of Schöken are the best-known works of this period (1926–29), while his own house at Rupenhorn in Berlin (1930) is a fine example of his residential work, done in typically international-style terms. Mendelsohn visited the U.S. in 1924, studied the skyscraper architecture of the day and had a meeting with Frank Lloyd WRIGHT, which led to a continuing relationship. The atonal music of Arnold SCHOENBERG was also an ongoing source of stimulation for him.

In 1933 Mendelsohn left Germany for England, where he established a partnership with Serge Chermayeff. Together they designed the De La Ware Pavilion at Bexhill (1934–35). In 1939 Mendelsohn left for Palestine, where he had a number of commissions, but in 1941 he relocated to the U.S. and became a citizen in 1946. He was active as a lecturer and teacher and then designed the Maimonides Hospital

(1946–50) in San Francisco. A number of residential and institutional projects followed; his last major work was the Mount Zion Community Center in St. Paul, Minnesota (1950–54).

In spite of his extensive achievements, Mendelsohn is usually viewed as a secondary figure somewhat outside the main life of modernist development. A recent resurgence of interest in his work has led to exhibition of his striking sketches, with their strongly expressionist qualities, and fresh interest in his unique style. Bruno Zevi's book *Erich Mendelsohn* (1985) is an excellent, compact summary of Mendelsohn's achievement.

Menderes, Adnan (1899–1961) Turkish statesman. Menderes studied law and entered politics in 1932 as a moderate critic of ATATÜRK. One of the founders of the reformist Democratic Party, Menderes became prime minister in 1950. He strengthened TURKEY's links with the West and sponsored its NATO membership in 1952. He also negotiated the CYPRUS agreement in 1959. Menderes was forced to rule dictatorially in April 1960 because of widespread disorders. His regime was overthrown in May 1960 by army officers under General Gursel. Sentenced to death, Menderes was hanged in September 1961.

Mendès-France, Pierre (1907–1982) French politician, premier of FRANCE (1954–55). A socialist from a middle-class Jewish family, he served in the National Assembly (1932–40). He was arrested by the Germans shortly after they invaded France (1941) but escaped from a Nazi prison and joined Charles de Gaulle's FREE FRENCH forces. After the war he again served in the National Assembly (1946–58). He was elected premier in June 1954 but held office for only seven months. During this short tenure he negotiated an end to the FRENCH-INDOCHINA WAR and began negotiations to grant independence to TUNISIA. He resigned in February 1955 after losing a vote of confidence over his policies on France's North African colonies. He remained in the National Assembly until his unpopular opposition to de Gaulle led to his defeat in a general election. He returned to the assembly briefly from 1967 to 1968.

Menem, Carlos Saúl (1930–) Argentine politician and president of Argentina (1989–1999). Born to a Muslim family of immigrants from Syria in the Argentine town of Anillaco, Menem converted to Catholicism and became a lawyer and political supporter of Argentine populist leader Juan Domingo PERÓN. After his election as governor of La Rioja province in 1973, he was imprisoned by the military government that had overthrown the government of Perón's wife Isabel in 1976. After his release from prison in 1981 and the fall of the military junta in 1983, Menem was again elected governor of La Rioja. Running on a populist Peronist program of wage increases for the working class, Menem was elected president in 1989.

In the early years of his presidency, Menem confronted serious economic problems and, to the surprise of many of his left-wing supporters, introduced a series of free-market reforms (such as the privatization of public utilities) that reduced the hyperinflation that had swept the country. As a result of these reforms, Argentina experienced a long period of economic growth, which was also facilitated by the regional customs union MERCOSUR that Menem played a key role in forming. After Menem's reelection to a second term in 1995, Argentina's impressive growth rate slowed while the country ran up a huge foreign debt and enormous budget deficits. To compound his difficulties with the economy, Menem was criticized for pardoning many of the military leaders of the junta that had ruled the country from 1976 to 1983. He failed in his bid for a third term in 1999 when the Argentine Supreme Court ruled it unconstitutional. In 2001 Menem was indicted for an alleged plot to smuggle arms to Croatia and Ecuador, but charges were eventually dropped for lack of evidence. In the 2003 presidential election Menem withdrew from the second round, when it became clear that his opponent Nestor Kirchner would win in a landslide, and then had to deal with a government investigation of corruption.

Mengele, Josef (1911–1978?) Nazi war criminal. Known as "the Angel of Death," Dr. Josef Mengele was chief medical officer at AUSCHWITZ concentration camp in Poland, where he was

responsible for deciding which prisoners would die immediately and which would be used for slave labor. He also conducted horribly cruel and scientifically worthless "medical experiments" on the camp's inmates. After the war, Mengele escaped to Argentina, where he was granted asylum. In 1960, faced with extradition to West Germany, Mengele escaped to Brazil and then to Paraguay, where he was reported to have drowned in 1978. In 1985 the alleged body of Mengele was exhumed for forensic identification to determine whether it was in fact that of the former Nazi SS official. DNA was extracted from several of the skeleton's bones and compared with blood samples from Mengele's wife and son living in Germany. The examination's results indicated a 99.9 percent probability that the body exhumed was indeed that of Mengele.

Mengistu Haile Mariam (1937–) President of ETHIOPIA (1977–91). Lt. Col. Mengistu took part in the coup that deposed Emperor HAILE SELASSIE in 1974. He became head of state in 1977 and began to reorganize Ethiopia along Marxist lines. The country was torn by insurrection in ERITREA, war with SOMALIA and a devastating famine in the mid-1980s that cost as many as one million Ethiopian lives. In May 1991, after rebel forces cut supply routes to the capital of ADDIS ABABA, Mengistu fled into exile in Zimbabwe. Since 1991 Mengistu has remained in exile in Zimbabwe. In 1994 an Ethiopian court initiated legal proceedings against the former dictator for alleged acts of genocide committed against Eritreans and Somalis.

Mennin, Peter (1923–1983) American composer. One of the leading American composers after World War II, he composed nine symphonies and a variety of concertos and chamber works that won high acclaim. In 1962 he became president of the Juilliard School of Music in New York. Under his direction, the size and reputation of Juilliard grew. He established Juilliard's Theater Center in 1968, the American Opera Center in 1970 and a permanent conducting program in 1972.

Menninger, Karl Augustus (1893–1990) U.S. psychiatrist. In the 1920s, with father **Charles Frederick**

Menninger and brother **William Menninger**, he founded the Menninger Clinic and Foundation in Topeka, Kansas. He believed that emotional troubles could be eased by a sufficiently loving, caring environment. He also argued that crime was a result of mental and emotional illness and therefore advocated psychiatric treatment for prisoners. His 13 books and numerous magazine articles helped educate Americans about psychiatry. His books included *The Human Mind* (1930), *Love against Hate* (1959) and *Whatever Became of Sin?* (1988).

Menninger Family American psychiatrists. Dr. Charles F. Menninger and sons Drs. Karl and William Menninger founded the Menninger Foundation and Clinic in Topeka, Kansas. Dr. Charles Menninger (1862–1953) led his sons in pioneering the treatment of physical disorders in a community clinic setting. The clinic changed its total emphasis to psychiatry in 1941. William also served as chief consultant on psychiatry to the surgeon general of the United States Army during WORLD WAR II.

Menninger Foundation Clinic Medical facility in Topeka, Kansas, established by Dr. Charles F. Menninger and his sons Drs. Karl and William Menninger in 1925 (see MENNINGER FAMILY). One of the world's leading psychiatric centers, it is part of the Menninger Foundation, a nonprofit organization. The clinic includes two psychiatric hospitals, a department of neurology, and internal medicine, neurosurgery, and outpatient and aftercare programs.

Menotti, Gian Carlo (1911–) Italian composer. Menotti is considered the foremost composer/librettist of modern, popular American opera. His first success was the one-act comic opera *Amelia Goes to the Ball*, staged at the Philadelphia Academy of Music in 1937. He received the PULITZER PRIZE for his operas *The Consul* (1950) and *The Saint of Bleeker Street* (1954). Menotti's most popular work, *AMAH! AND THE NIGHT VISITORS* (1951), became an annual Christmas event on television. His non-operatic works include the ballet *Sebastian* (1944), the symphonic poem *Apocalypse* (1951) and

The Halcyon symphony (1976). In addition, he founded the Spoleto Arts Festival in Charleston, South Carolina, in 1977 and remained its artistic director until 1991.

Mensheviks Russian political party established in August 1917 at a congress of several social democratic groups. The Mensheviks proposed a proletarian party working with the liberals in order to replace the autocracy with a democratic constitution. Before 1917 "Menshevik" referred to the non-Leninist faction of the Russian Social Democratic Labor Party. Although the Mensheviks worked with the BOLSHEVIKS during the 1905 Revolution, and reunited with them the following year, relations were strained. The Mensheviks themselves were divided into the "liquidationalists," the "party-minded Mensheviks" of the center, the followers of Pavel Axelrod and the followers of TROTSKY. In 1922 the Mensheviks were suppressed, and in 1931 a show trial took place in Moscow. In 1920 a group of Mensheviks left Russia and settled in the United States.

Menuhin, Yehudi (1916–1999) American-born violinist, conductor, teacher and author. Born in New York City, Menuhin first made his mark as a child prodigy. He studied with Louis Persinger and Sigmund Anker and made his debut with the San Francisco

Orchestra at the age of seven. Continuing his studies in Europe with Adolf Busch and Georges ENESCO, he debuted in Paris at age 10 and in 1929 appeared as a soloist with orchestras in Berlin, Dresden and London to great acclaim. He made a triumphant world tour during the 1934–35 season, then retired briefly to study his art. In subsequent years Menuhin became one of the world's most sought-after violin soloists, famous for his warm tone, intense playing and interpretive depth. A performer both of the classics and of modern music (BARTÓK's "Sonata for Solo Violin" was written for him), Menuhin also explored a number of other musical traditions, such as Eastern music in collaboration with sitarist Ravi SHANKAR and JAZZ with French violinist Stéphane Grappelli. He established a music festival at Gstaad, Switzerland (1959), directed England's annual Bath Festival (1959–68), founded the Menuhin School of Music at Stoke d'Abernon, Surrey (1963) and became president of the Trinity College of Music, London (1972). A gifted conductor, he led his own chamber orchestra and guest-conducted major orchestras in Britain, Europe and the U.S. As a violinist, he often performed chamber pieces with his sister, Hepzibah Menuhin (1920–81), and his son, Jeremy, both pianists. Menuhin made numerous recordings as violin soloist, chamber musician and conductor. He became a British subject in 1985.

Menzies, Sir Robert Gordon (1894–1978) Australian statesman, prime minister of AUSTRALIA (1949–66). Born in Jeparit, Victoria, he became a barrister in his home province, entered provincial government in 1928 and was elected to the Australian parliament in 1934. He served as attorney general (1935–39) in the Joseph LYONS government, became prime minister upon Lyons's death in 1939 and lost his post in 1941. During his time out of office (1943–49), he led the parliamentary opposition to the Labour Party government and strove to create a coherent Liberal Party ideology. In 1949 a Liberal-Country Party coalition swept the Labor government from power, and Menzies again became prime minister. During his lengthy time in office, from 1949 to 1966, he

Violinist and conductor Yehudi Menuhin (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Prime minister of Australia Robert Gordon Menzies
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

was known for his anticommunist stance, for his development of a thriving Australian economy and for his establishment of strong ties with the U.S. and other Western powers.

Mercader, Ramón (1914–1978) Spanish laborer who assassinated exiled Soviet leader Leon TROTSKY in Mexico City in 1940, using a pickax. Mercader was convicted of the murder and imprisoned until 1961. Although Mercader always insisted that he had acted alone, the assassination was ordered by Soviet dictator Joseph STALIN, and the details were probably planned by Soviet agents of the NKVD.

Mercer, John Herndon “Johnny” (1909–1976) American lyricist, composer and singer. Born in Savannah, Georgia, Mercer moved to New York in the late 1920s. By the mid-1930s, he had earned a place among the most successful American lyricists. He eventually published more than 1,000 songs, working with the top composers of his day. As a singer, Mercer appeared on film and became popular on radio in the 1930s. He was also a cofounder of Capital Records, in 1942. His songs include: “I’m an Old Cowhand” (1936), “Jeepers Creepers” (1938, with Harry Warren), “Come Rain or Come Shine” (1946, with Harold ARLEN), “In the Cool, Cool, Cool of the Evening” (1951, with

Hoagy CARMICHAEL) and “Moon River” (1961, with Henry MANCINI).

Mercer, Mabel (1900–1984) British-American singer. Born in Burton-upon-Trent, Staffordshire, the daughter of an American father and a British music-hall singer, Mercer began performing at an early age. After World War I, she moved to Paris, where she appeared at BRICKTOP’s from 1931 to 1938. Next she went to New York City, where she became popular at the Ruban Bleu. She sang at various clubs throughout the 1950s in New York, eventually opening her own establishment. She continued to perform into the 1980s, and received the American Medal of Freedom in 1983.

Merchant, Vijay Madhavji (1911–1987) Indian athlete; one of the greatest batsmen in the history of cricket and an elder statesman of the sport in India. In a career that ran from 1929 until 1951, Merchant’s first class average of 71.22 ranked second only to that of Sir Donald BRADMAN’s 95.14.

Merckx, Eddy (1945–) Belgian bicycle-racing champion. The dominant cyclist of the late 1960s and ’70s, Merckx won the Tour de France five times (1969–72 and 1974), a record he shares with Jacques Anquetil and Bernard Hinault, both of France. Merckx also holds the record for the most wins in the sport’s top events, with a total of 39 victories. He won the world professional road race title three times (in 1967, 1971 and 1974), a record he shares with Alfredo Binda of Italy and Rik van Steenbergen of Belgium. He won the Tour of Italy a record five times (1968, 1970, 1972–74), a mark he shares with Binda and Fausto Coppi of Italy. Merckx also holds the record for most wins in a season, 54, in 1971. In 1996 Merckx was awarded the title of Baron by the Belgian monarchy.

MERCOSUR (Mercado Común del Sol) (“Southern Cone Common Market”) A customs union among the South American nations of ARGENTINA, BRAZIL, PARAGUAY and URUGUAY. Created on January 1, 1991, with the signing of the Asuncion Treaty, MERCOSUR has grown to include BOLIVIA, CHILE, COLOMBIA, PERU and VENEZUELA as associates of the union, making it the

third largest trading bloc in the world with over 240 million consumers. Since its inception MERCOSUR has striven to enhance integration among its members and to improve their economic productivity and development. Its efforts are governed by a Common Market Council (CMC) that organizes the integration of MERCOSUR members’ economies. The members of MERCOSUR hope to attract greater foreign investment by collectively stabilizing their economies, as well as producing a fully integrated common market and trade policy and a Common External Tariff (CET) by 2006, a goal stated in the 1997 Protocol of Montevideo signed by its members. Another goal of MERCOSUR is to allow unrestricted travel within the MERCOSUR area by a citizen of each MERCOSUR member. However, a decline in intraunion trade in 2001 and 2002 cast doubt on the ability of MERCOSUR to meet its timetable for integration. In an effort to expand MERCOSUR exports within the Western Hemisphere, the organization’s leaders met with representatives from Mexico in 2002 to reduce tariffs between that North American nation and the South American customs union. As a result, Mexican imports of Argentine automotive parts and Uruguayan milk increased substantially in 2003. MERCOSUR also began negotiations with another regional economic organization, the ANDEAN COMMUNITY, in an effort to create a joint free-trade area between both customs unions. Some have speculated that this effort by MERCOSUR nations to organize an enlarged economic trade bloc will result in its wholesale inclusion in the proposed hemispheric-wide Free Trade Association of the Americas. But some MERCOSUR nations, notably Brazil, have proved reluctant to emphasize trade within the Western Hemisphere at the expense of a more global approach to international trade.

In its efforts to improve its members’ economies, MERCOSUR negotiated a 1995 agreement with the EUROPEAN UNION (EU), which accounts for almost 30% of MERCOSUR’s export trade, to enhance bilateral trade and political cooperation between the two organizations. However, conflicts have emerged over MERCOSUR’s desire to gain greater access to the European beef, poultry and sugar markets,

and the EU's insistence on providing subsidies to domestic producers of these commodities. To facilitate the growth of MERCOSUR member states' economies and to expand their total trade with the EU, MERCOSUR has reduced its reliance on trade with the U.S. By 2001 most MERCOSUR members had benefited from this arrangement, with export revenue increases of 3.4% (Argentina), 6.9% (Brazil), and 5.9% (Paraguay). But other member states have suffered in the trade transition from a U.S.- to an EU-oriented economy; Uruguay, for example, saw its export revenues decline by 9.5%.

Mercury program (Project Mercury) The Mercury program was the first U.S. manned spacecraft program. Seven pilots from the navy, air force and marines were chosen as the first U.S. astronauts; they were popularly known as the Mercury Seven. Several unmanned tests were made in 1960 and early 1961. The cramped quarters of the small Mercury capsule could carry one astronaut, strapped into a seat for the duration of the flight. The capsule was launched atop an Atlas rocket, originally designed as an Intercontinental Ballistic Missile (ICBM). The first two manned flights, in 1961, were short, suborbital flights to test the capsule's controls. Four orbital missions followed. The Mercury astronauts became national heroes; one, John GLENN (the first American to orbit the Earth), later became a U.S. senator. One of the Mercury Seven, Deke SLAYTON, was grounded because of a heart

problem and did not go into space during the Mercury program.

Meredith, James Howard (1933–) American CIVIL RIGHTS activist. Born in Kosciusko, Mississippi, Meredith spent nine years in the air force before returning to his native state in 1960. In 1961 he applied to the all-white University of Mississippi and the following year became the first African American to enter the institution. His court-ordered admission followed months of federal litigation, which ultimately desegregated "Ole Miss" and touched off rioting that brought National Guard and army troops to the campus. Meredith graduated in 1963, attended Columbia Law School and subsequently became a businessman in New York City. Continuing his involvement in the civil rights cause, he participated in demonstrations during the 1960s and was wounded while marching in Mississippi (1966). He unsuccessfully attempted to enter politics in the 1970s.

Merkel, Angela Dorothea (1954–) German statesperson, the first female chancellor of Germany. Angela Dorothea Kasner was born in Hamburg in 1954 to a Lutheran pastor and his wife, Herlind, a schoolteacher. Shortly after her birth her father accepted a pastorate in a town 50 miles north of Berlin in the German Democratic Republic. Kasner studied at the University of Leipzig and the Central Institute for Physical Chemistry of the Academy of Sciences. After receiving her Ph.D. in physics she became a researcher in quantum chemistry. In 1977 she married physicist Ulrich Merkel, whose surname she took. After her divorce in 1982, she married chemistry professor Joachim Sauer but retained Merkel as her professional name. After the fall of the Berlin Wall she entered politics and was elected to the Bundestag (the lower house of the German parliament) in the first post-reunification election, in December 1990, as a member of an East German party that had merged with the West German Christian Democratic Union. She assumed office as minister for women and youth in the cabinet of Chancellor HELMUT KOHL and in 1994 became minister for the environment, a post that brought her into the public spotlight.

After the Kohl government was voted out of office in 1998, Merkel was

elected secretary-general of the Christian Democratic Union and chair of the party two years later. After the Christian Democratic Party was defeated by the Social Democratic Party of Chancellor Gerhard SCHRÖDER in the elections of 2002, Merkel became the leader of the conservative opposition in the Bundestag. She became a vocal proponent of free-market economic policies and called for an improvement of relations with the United States. She supported the U.S.-led invasion of Iraq in 2003 in the face of strong opposition from the Schröder government and German public opinion. In the national elections of 2005 her party won enough legislative seats to form a "grand coalition" with the Social Democrats. As head of the senior partner in the coalition, Merkel was elected the first female chancellor of Germany since its creation in 1871.

Merman, Ethel (1909–1984) American musical-comedy star. Merman was known for her booming voice and brash style. Her career spanned 50 years, and her perfect diction and pitch made her a favorite of many of the master composers and lyricists of her time. Her major successes on Broadway included leading roles in Cole PORTER's *Anything Goes*, Irving BERLIN's *Annie, Get Your Gun* and the Jule Styne—Stephen SONDHEIM musical *Gypsy*. She also starred in 14 movies, including *Alexander's Ragtime Band*. In 1972 she received a Tony Award for the entire body of her work.

Merrill, James (1926–1995) American poet. The son of the founder of the Merrill Lynch brokerage house, Merrill was acknowledged as one of the foremost poets of his time. He established himself as a lyric poet with his earliest volumes, such as *The Black Swan* (1946). With the publication of the volumes *The Fire Screen* (1969) and *Braving the Elements* (1972), Merrill was praised as the finest lyric poet in America, and he received the PULITZER PRIZE. He also excelled as a narrative poet with such poems as *Days of 1971* (1972) and his three-part visionary epic published in one volume as *Changing Lights at Sandover* (1981). In addition, he wrote dramas, such as *The Immortal Husband* (1956), and novels, including *The Seraglio* (1957).

Astronaut John Glenn enters the Mercury-Atlas 6 spacecraft, 1962. (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Merritt, Abraham (1884–1943) American master of science fantasy during the Golden Age of the pulp magazine in the 1920s and 1930s. In contrast to the sober routines of his full-time job editing the popular magazine *American Weekly*, Merritt let his mind run wild in his spare time. His first great success, *The Moon Pool* (published first in *All-Story Magazine*, 1918) told of a gateway into the Earth and the remnants of a Great Race that dwelt there. *The Face in the Abyss* (1923), which depicted a race of Snake Women in the Andes Mountains; *The Ship of Ishtar* (1924), which described a miniature sailing ship encompassing a cosmos of Good and Evil; and one of his finest stories, “Three Lines of Old French” (1918), which took a World War I infantryman back in history for a lesson in human immortality, followed. Two of his stories were adapted into movies—*Seven Footprints to Satan*, (1927) and *Devil Doll* (from *Burn, Witch, Burn!*) (1933)—although he disowned the results. Scorning orthodox religions, and something of a fatalist himself, Merritt questioned man’s complacency in an unknowable, even hostile universe. “For in that vast crucible of life of which we are so small a part,” he wrote in *The Metal Monster* (1920), “what other Shapes may even now be rising to submerge us?”

Merritt, H(iram) Houston (1902–1979) Pioneer neurologist and codeveloper (with Dr. Tracy J. Putnam) in 1936 of the anti-epilepsy drug Dilantin (diphenylhydantoin).

Merton, Thomas (1915–1968) American Trappist monk and spiritual writer. Merton, known as Father Louis once he became a priest, was one of the most important spiritual writers of his time. After teaching English at Columbia University for a brief period, he entered the Catholic Church (1939), joining the Trappist order at Our Lady of Gethsemane monastery in Kentucky (1941). He was ordained a priest in 1949. Among Merton’s many spiritual works are *Seeds of Contemplation* (1949), *No Man Is an Island* (1955) and *Mystics and Zen Masters* (1967).

Messerschmitt, Willy (Wilhelm Messerschmitt) (1898–1978) German aircraft designer, engineer and in-

dustrialist. Messerschmitt made and flew his own gliders at age 15. By age 26, he had formed his own aircraft manufacturing company. He was best known for the airplanes he produced for the Luftwaffe in WORLD WAR II. More than 30,000 of his ME-109 single-engine fighter planes were built; these fighters gave the Luftwaffe air supremacy during the early part of the war. Messerschmitt’s ME-262 was the first operational combat jet. After the war, Messerschmitt was examined by an Allied denazification court (1948). The court found that he had been forced to build aircraft for the German war effort against his will. For the next 10 years, Messerschmitt and his company manufactured prefabricated houses and sewing machines. They resumed building airplanes in 1958.

Messiaen, Olivier (1908–1992) French classical music composer and critic. Messiaen was a highly original composer who led a 1930s movement, the *Jeune France*, that called for greater feeling and flamboyance in classical music, in contradistinction to the technical and intellectual emphases of the LES SIX school of the 1920s. During WORLD WAR II, Messiaen was imprisoned by the Nazis for two years. After the war, he taught at the Paris Conservatory for several decades. His major works include *Quartet for the End of Time* (1941), *Modes of Duration and Loudness* (1950), *Catalog of Birds* (1959) and *The Transfiguration* (1969). Messiaen summarized his compositional methods in the two-volume work *The Technique of My Musical Language* (1944).

Messter, Oskar (1866–1943) German inventor, producer and motion picture director. His father ran an optical plant, and by 1896 young Oskar was adapting the American cinematograph and the French cinematographe into devices of his own for the recording, printing and projection of filmstrips. Technically, his greatest innovation was the Maltese Cross, a device that made it possible for a filmstrip to move intermittently through camera and projector. He is also credited with the first use in Germany of the close-up—as early as 1897. In 1910 he founded a company to manufacture film equipment, and in 1914 he began producing the German

newsreel *Messter Woche* (The Messter weekly), purportedly the first German newsweekly of its kind. Among his many commercial movies were *Salome* (1902), *Verkannt* (1910), *Richard Wagner* (1912) and *Ungarische Rhapsodie* (1913). He retired from active film production in 1917 when his company, Messter-Film, merged with Nordisk-Film and Viennese Sascha-Film to form the giant conglomerate Universum Film Aktien Gesellschaft (UFA).

metal music Also known as “heavy metal” or “punk rock.” Metal music emerged in the 1970s as a reaction to the more commercialized variants of “rock ‘n roll” or “rock” music, such as disco, and popular artists and bands such as ELTON JOHN and FLEETWOOD MAC. Bands such as Black Sabbath, Judas Priest, and LED ZEPPELIN helped develop the distinctive sound and rhythm of metal music, which relied heavily on the use of electric guitars and bass instruments. However, they provoked criticism from fans of more traditional rock because of their occasionally violent and occult lyrics and musical scores (Black Sabbath), and for destroying their hotel rooms while on national or international tours (Led Zeppelin). As a result of this criticism and because of the novel nature of metal albums, bands and singles, the fan base for this genre of rock—predominantly lower-middle-class and working-class males—remained relatively small.

In the late 1970s, metal music began to include a new wave of bands that propelled metal into the foreground of popular music in the U.S. and Great Britain. Led by bands such as AC/DC, Guns N’ Roses, Iron Maiden, KISS, Metallica and Van Halen, metal bands regularly released albums that dominated album sales and radio airwaves. These “second generation” metal bands preserved many of the idiosyncrasies of metal music’s founders, such as occasional references to occult rituals and singles emphasizing loud use of electric guitars. However, they differed from their predecessors when they began to utilize the relatively new format of the music video featured on networks such as MTV. In these videos, filmed footage of a band playing one of its songs would be interspersed with visual effects or depictions of a

fictional storyline related to the content of the song. Also, in their onstage performances and their music videos, the members of such metal bands became known for their unusual outfits, pyrotechnics, and sexually suggestive lyrics and movements. In large part because of the new image projected by the metal bands of the late 1970s and 1980s, metal music began to develop a large fan base among young women. Many of the principal performers in these bands—such as Eddie Van Halen, David Lee Roth, John Bon Jovi and Axl Rose—becoming sex symbols in the American and British markets. Over the course of the 1980s, an estimated 40 percent of album sales on the American market came from metal bands.

In the 1990s, metal music's popularity declined, as the popular music market became increasingly dominated by alternative or "grunge" rock bands such as R.E.M., Smashing Pumpkins, and Nirvana, as well as by "hip-hop" or "rap" music. As a result, metal bands began to produce less popularly oriented music and return to the more traditional styles favored by the genre's white male working-class listeners. However, there have been occasional exceptions to this rule, as bands such as Bon Jovi and AC/DC have maintained a degree of their popularity from the 1980s, and have scored occasional hits with singles such as Bon Jovi's "It's My Life" (2000).

metaphysical painting Term coined by the Italian painter Giorgio de CHIRICO to define a kind of pre-SURREALIST painting that placed objects and figures in unexpected and mysterious juxtapositions. Conceived while de Chirico was in Paris from 1910 to 1915, it arose as a reaction against the dynamism of FUTURISM and exalted the stillness of classical antiquity, the architecture of ancient and Renaissance Italy and the validity of the dream world. Influenced by the philosophy of Nietzsche, Schopenhauer and Weininger, metaphysical painting attempted to portray a magically separate reality, defined by a raked perspective and inhabited by dramatic shadows, enigmatic figures, dressmakers' dummies, classical statuary and colonnaded buildings. The other important adherent of the style was the painter Carlo CARRA, with whom de

Chirico founded the magazine *Pittura metafisica* in 1920.

Metaxas, Joannis (1871–1941) Greek general, statesman, dictator (1936–41). A career soldier commissioned in the army in 1890, he served in the Greco-Turkish War (1897) and the BALKAN WARS (1912–13). Appointed chief of the general staff in 1915, he was exiled to Italy in 1917 when Greece's entry into WORLD WAR I on the Allied side clashed with his pro-German sympathies. Returning in 1920, he led a coup attempt and was again exiled (1923–24). A leading royalist, he held a number of government posts from 1928 to 1936. In 1936, after the reestablishment of the monarchy, Metaxas was appointed prime minister. He assumed dictatorial powers later that year, dissolving parliament and suspending the constitution. When Greece was invaded by Italy in 1940, Metaxas aligned his country with the Allies and directed Greek RESISTANCE.

Metro-Goldwyn-Mayer One of Hollywood's "Big Five" production/exhibition motion picture studios (along with WARNER BROS., RKO, TWENTIETH CENTURY-FOX and PARAMOUNT) and, arguably, the most prestigious. The complex history of its formation began with the establishment in 1912 of a theater chain by former nickelodeon and peep-show entrepreneur Marcus Loew. Needing more movie product, Loew acquired the Metro Picture Corporation in 1920 and Goldwyn Pictures Corp. and Louis B. MAYER Pictures in 1924. The new organization, Metro-Goldwyn-Mayer (MGM), was under the control of Louis B. Mayer as studio vice president and Irving THALBERG as vice president in charge of production. The years up to Thalberg's death in 1936 are generally considered MGM's peak period. Popular and prestigious pictures of that time include *Greed* (1924), *The Big Parade* (1926), *Ben Hur* (1927), *Flesh and the Devil* (1928), *Freaks* (1932), *Grand Hotel* (1932), *The Thin Man* (1934), *David Copperfield* (1935), *Mutiny on the Bounty* (1936) and *The Good Earth* (1936). By the mid-thirties MGM had 4,000 employees and 23 sound stages on its 117-acre lot in Culver City. An average of 40 features were made each year, costing approximately \$500,000 each.

By the 1940s MGM's boast that it presented "more stars than there are in the heavens" seemed justified. Luminaries included Greta GARBO, Clark GABLE, the BARRYMORES, Jean HARLOW, Joan CRAWFORD, Spencer TRACY, Mickey ROONEY, Elizabeth TAYLOR, Judy GARLAND, William Powell and many others. Popular series included short subjects—such as "Pete Smith Specialties," "Tom and Jerry" cartoons, and Hal Roach comedies—and feature programs—such as the Andy Hardy, TARZAN, and Dr. Kildare series. MGM also released the pictures of its British production company, Denham Studios under Michael Balcon, including *The Citadel* (1938) and *Goodbye, Mr. Chips* (1939), as well as numerous independently made movies—most notably, *GONE WITH THE WIND* (1939). A particularly noteworthy series of musicals appeared in the 1940s and early 1950s under the guidance of producers and filmmakers Arthur Freed, Stanley Donen, Vincente MINNELLI, and Gene KELLY—*Meet Me in St. Louis* (1944), *The Pirate* (1948), *On the Town* (1949), *An American in Paris* (1952), *Singin' in the Rain* (1953), *Seven Brides for Seven Brothers* (1955) and many others. After 1951 many changes affected the studio. The separation of MGM and the Loew's parent company was forced by government antitrust action. Following a bitter dispute between Mayer and Loew's president, Nicholas Schenck, Mayer was forced to resign and was replaced by his former production chief, Dore SCHARY. More corporate turnovers ensued. In 1969 Kirk Kerkorian bought the studio and began selling off the assets, disposing of the British studios and companies such as MGM Records. A public auction sold off many of the costumes and props. In 1979 MGM merged with United Artists, and the amalgamation has produced only sporadic releases, including the successful *Spaceballs* and *Moonstruck* (1988). In 1986 Kerkorian sold the MGM studio to media mogul TED TURNER. Turner subsequently sold the studio back to Kerkorian while retaining MGM's film library, which he would later use for his cable station, Turner Classic Movies (TCM). In 1990 Kerkorian again sold the studio, this time to Italian financier Giancarlo Piretti. Six years later, Kerkorian again repurchased MGM.

Metropolis Prototype of the modern science fiction film. Directed by German filmmaker Fritz LANG in 1926 (and premiered in Berlin early in 1927), its futuristic architectural designs and special effects have had a profound effect on the genre. It was the most lavish and expensive film ever shot at the gigantic UFA studio complex in Berlin. Although it led to the virtual bankruptcy of that studio, and its absurd story of the revolt in the year 2000 of underground workers against their “topside” capitalist bosses was poorly received by the critics, there was no denying its spectacular visual and technical work. Cinematographer Karl Freund and set designers Otto Hunte and Karl Vollbrecht served up spectacular images of a divided world—above, the dazzling modern city of towers and flying machines (presided over by the despotic John Frederson), and below, the nightmarish world of gigantic machines and brain-washed workers (terrorized by the mad scientist, Rotwang). The hallucinatory images of the machines transforming into legendary monsters, the panic of the underworld citizens during a flood and the creation in Rotwang’s laboratory of a robot remain unforgettable. The cutting of 7 of its original 17 reels for the American release (1927) accounts for the choppy, occasionally incomprehensible storyline of the release-prints available today.

Mexican Civil War of 1911 Francisco I. Madero (1873–1913), a U.S.-educated lawyer and liberal, called for the ouster of Mexican dictator Porfirio DÍAZ and opposed him in the presidential election of 1910. Díaz had Madero arrested and, after the balloting, proclaimed himself the victor. On November 20, 1910, Madero and his supporters launched an armed revolt. Although the Porfirian army contained most of the outbreaks in 1911, Pascual Orozco maintained resistance in Chihuahua state, and in May 1911 rebel forces under him and Francisco “Pancho” VILLA captured Ciudad Juárez. Thus encouraged, revolutionaries throughout MEXICO took up arms. With his own support crumbling, Díaz was forced to accept the Treaty of Ciudad Juárez stipulating his prompt resignation; Madero was elected president in October. But Madero could not control the forces he had unleashed, and

the events of 1911 ushered in two decades of bloodshed. (See also MEXICAN REVOLT OF 1914–15.)

Mexican Civil War of 1920 Venustiano Carranza tried to dictate who would succeed him as president of MEXICO (see MEXICAN REVOLT OF 1914–15). He chose a little-known diplomat named Ignacio Bonillas, but Alvaro Obregón, who had helped put Carranza in office and served as his minister of war, felt the office should be his. Obregón’s former comrade-in-arms, Adolfo de la Huerta, then governor of the state of Sonora, and General Plutarco Elías CALLES, chief of the Sonoran armed forces, called for Carranza’s resignation. When Carranza sent federal troops into Sonora to break a labor strike, Huerta declared Sonora an independent republic. Obregón and Calles marched south, collecting arms and volunteer troops as they went. Finding no soldiers willing to oppose Obregón and his rebel army, Carranza fled from the capital, Mexico City, toward Veracruz aboard a train loaded with gold he had taken from the national treasury. En route, he learned that the governor of the state of Veracruz had joined the rebels; he then fled on horseback into the mountains, where he was betrayed and murdered. Obregón entered Mexico City unopposed; Huerta became provisional president and, after a special election, was succeeded by Obregón later in 1920.

Mexican Insurrections of 1926–29 Mexico’s election of 1924 brought to the presidency Plutarco Elías CALLES, who implemented the previously unenforced anticlerical provisions of the 1917 constitution. In early 1926 officials of the Mexican Roman Catholic Church issued a condemnation of the provisions. Calles responded by closing Catholic schools, convents and seminaries; forcing the registration of priests; and accusing the Catholic hierarchy of treason. In mid-1926 Catholic laypersons retaliated by stopping all but their essential purchases, and soon the Catholic clergy ceased performing clerical functions. The *cristeros*, whose cry was *Viva Cristo Rey* (“Long Live Christ the King”), took up arms against the anticlerical government and caused widespread destruction and murder in a dozen Mexican states. Although the Catholic hierarchy

disavowed any connection with the *cristeros*, the government ordered the nationalization of church property, the deportation of several bishops, priests and nuns and the execution of a number of Catholics. Government forces crushed most of the *cristeros* by early 1928. Alvaro Obregón was elected president of Mexico on July 1, 1928. (He was assassinated later that month and was succeeded by Emilio Portes Gil, who was appointed provisional president.) The undisputed political power in Mexico still lay with Calles, even though in March 1929 another insurrection erupted under the leadership of politically and religiously discontented generals whose followers ravaged the country for about two months before the government restored order. Calles influenced the election to the presidency of Pascual Ortiz Rubio (1877–1963) in 1929; a half-hearted military insurrection against Ortiz failed; and Ortiz assumed office as Calles’s puppet and continued his anticlerical policies.

Mexican Revolt of 1914–15 By a successful coup d’état, Victoriano Huerta gained the presidency of MEXICO on February 18, 1913, overthrowing Francisco I. Madero. Huerta was opposed by the separate forces of Emiliano ZAPATA in the south, of Venustiano Carranza in the northeast, of Francisco “Pancho” VILLA in the north, and of Alvaro Obregón in the northwest. These four opposing forces increased their military activities until by the spring of 1914 they controlled about three-quarters of Mexico, confining Huerta and his followers to the areas around Mexico City, the capital, and Veracruz. U.S. president Woodrow WILSON refused to recognize Huerta’s government, whose hostile acts resulted in American forces seizing and occupying Veracruz (April 21, 1914). When Villa’s forces seized Zacatecas and Obregón’s took Guadalajara and Querétaro, Huerta resigned as president. The rival leaders, Villa and Obregón, raced for the capital; Obregón arrived first and proclaimed his friend Carranza “First Chief” of Mexico. The leaders met at Aguascalientes to organize a government in late 1914, but Mexico was already torn by anarchy. Villa and Zapata occupied Mexico City, while Carranza and Obregón took control of Veracruz. Although Villa and Zapata had more troops and held about

two-thirds of the country, Carranza was recognized by the U.S. and eight other nations in the Western Hemisphere as de facto president of Mexico. Carranza controlled the northeastern border with the U.S., across which he could purchase arms; he also had the expert military assistance of Obregón and the shrewdness to promise the people social reform. In early 1915, Obregón and his troops occupied the capital, forcing Villa to flee to the surrounding countryside. Villa and his forces were pursued to the town of Celaya, where Obregón employed military tactics developed in WORLD WAR I. His troops dug trenches and strung barbed wire around Celaya, and after a three-day battle in April 1915, they won a decisive victory over Villa, who retreated northward. Villa's men pulled up railroad tracks to prevent pursuit by their foes. Both Villa and Zapata continued guerrilla warfare against Car-

ranza, who later became president officially. Obregón was appointed minister of war. (See also MEXICAN CIVIL WAR OF 1911; MEXICAN CIVIL WAR OF 1920; VILLA'S RAIDS.)

Mexico North American republic bordered by the U.S. to the north, the Gulf of Mexico and the Caribbean to the east, GUATEMALA and BELIZE to the south and the Pacific Ocean to the west. Its capital is Mexico City. General Porfirio DÍAZ took control of Mexico's government in 1876, and was its effective dictator for the next 34 years. His capitalist government favored the wealthy, and following a revolution, was toppled by Francisco I. Madero in 1910. Madero was himself overthrown and murdered in 1913 when Adolfo de la Huerta took power. The U.S. did not recognize his government, and landed troops in Veracruz in 1914, but ARGENTINA, BRAZIL and CHILE intervened

to prevent a war. Following a raid in the U.S. by the revolutionary Francisco "Pancho" VILLA in 1916, the U.S. invaded northern Mexico in his pursuit, but failed to capture him. Venustiano Carranza initiated constitutional reforms in 1917. Following a brief civil war in 1920, a moderate, socialist government prevailed under the governments of presidents Alvaro Obregón and Plutarco Elías CALLES. In 1929 Calles founded the National Revolutionary Party, which was renamed the Institutional Revolutionary Party (PRI) in 1946, and which has peacefully dominated subsequent Mexican politics. Since 1946, internal Mexican policy has stressed industrialization, which, while benefiting the upper and middle classes, did little for most of its rapidly increasing population. In the early 1980s Mexico's economic problems were exacerbated by a drop in oil prices. The peso was devalued in 1982,

MEXICO

1911	Dictator Porfirio Díaz overthrown by Francisco Madero; guerrillas in the north, led by Pancho Villa, and peasants in the south, led by Emiliano Zapata, revolt, calling for social change and land reform.
1913	Madero is shot; General Victoriano Huerta seizes power; Madero's followers unite behind Venustiano Carranza, a state governor, to fight Huerta.
1914	Backing Carranza, U.S. president Woodrow Wilson sends Marines to occupy the port of Veracruz to prevent arms from reaching Huerta's army.
1915	U.S. halts gun supply to Villa and Zapata, who continue to fight Carranza.
1916	Villa forces raid Columbus, New Mexico, killing 18 Americans in revenge for U.S. interference in Mexico; American force of 4,000 searches for Villa in Mexico but does not find him.
1917	Revolutionary constitution adopted; it curtails the power of Roman Catholic Church, establishes state education, declares mineral and subsoil rights the property of the nation and promulgates social and labor reforms.
1919	Emiliano Zapata killed.
1920	Venustiano Carranza killed during revolt led by General Alvaro Obregón, who becomes president.
1923	Pancho Villa killed; Marxist painter Diego Rivera begins monumental revolutionary murals for the Ministry of Education and the Agricultural School, Chilpancingo.
1926–29	Cristero Rebellion led by militant Catholic priests protesting suppression of church.
1929	National Revolutionary Party founded (PNR, named Mexican Revolutionary Party in 1938 and Institutional Revolutionary Party, PRI, in 1946).
1938	U.S. and British oil companies expelled and their property expropriated during a period of accelerated reform under President Lázaro Cárdenas.
1940	Exiled Bolshevik Leon Trotsky murdered in Mexico by Stalin's agent.
1942–45	Mexico enters World War II on side of Allies; war supply exports expand economy dramatically.
1953	Women receive right to vote.
1957	Diego Rivera dies.
1968	Summer Olympics held in Mexico City.
1976	Economy suffering from worldwide recession, Mexico devalues currency twice to stabilize economy; after discovery of vast new oil deposits, accelerated production is planned.
1982	Close to bankruptcy, caused by rising interest rates and falling demand for oil, government announces it can no longer make payments on foreign debt.
1985	Earthquakes cause over 7,000 deaths and \$4 billion in property damage.
1990	Debt-reduction pact is signed to reduce \$54 billion debt to commercial banks; Japanese bankers write off 70% of \$8.9 billion in loans; magazine <i>Proceso</i> prints names and locations of 57 U.S. Drug Enforcement agents working inside Mexico.
1991	U.S. president George H. W. Bush and Mexican president Carlos Salinas de Gortari negotiate free trade agreement, pending ratification by U.S. Congress, against opposition of U.S. organized labor and environmental groups; pollution emergency declared in Mexico City, where respiratory illness is number-one cause of death.

(Table continues)

MEXICO (CONTINUED)

1994	Mexico joins the U.S. and Canada in the North American Free Trade Agreement (NAFTA).
1995	Following the devaluation of the peso in December 1994, the currency crashes.
1996	Zapatista National Liberation Front representatives and the Mexican government sign the first of six peace accords. Peace talks break off in September.
1997	In congressional elections in July, the PRI loses its majority for the first time since 1929.
2000	In July, the PRI loses the presidency for the first time in 71 years to PAN candidate Vicente Fox. The PAN wins 224 seats, the PRI, 209, and the PRD 67 in the lower house of congress.
2001	A bill is passed increasing the rights of indigenous peoples.
2002	Millions of security files are released revealing the torture and killing of hundreds of political activists in the 1960s and 1970s by security forces.
2005	Security and Prosperity Partnership of North America is signed by Mexico, Canada and U.S.
2006	Results of July 2 presidential elections are disputed, but Felipe Calderón is formally declared the winner.

but in the following two years Mexico faced extreme unemployment and inability to pay its foreign debt. A devastating earthquake in Mexico City in 1985 worsened the situation. PRI claimed dominance of the 1985 elections, but there were charges of vote fraud. While a PRI candidate won the presidential election, opposition parties prevailed in the 1989 gubernatorial elections. Mexico, the fourth largest oil-producing nation, benefited from the rising oil prices resulting from the IRAQ invasion of KUWAIT in 1990. Mexican foreign policy has traditionally been dominated by the U.S., but Mexico criticized U.S. intervention in Central America, and also maintains ties with CUBA. Mexico's economic union with the U.S. and Canada in the 1994 **NORTH AMERICAN FREE TRADE AGREEMENT (NAFTA)** failed to produce the economic prosperity envisioned by President Carlos Salinas de Gortari. The resulting economic downturn played a part in the National Action Party's (PAN) victory in the 2000 presidential elections. Results of the July 2, 2006, elections, which gave a narrow victory to the New Action Party's Felipe Calderón, were questioned by Andrés Manuel López Obrador, of the Revolutionary Democratic Party, but Calderón was officially declared the winner.

Meyer, Hannes (1889–1954) Swiss-born German architect known for his

role at the BAUHAUS where he followed Walter GROPIUS as director (1928–30). Meyer was trained at the technical college at Basel and in Berlin. He began teaching at the Bauhaus in 1927 and also submitted an admired but unsuccessful entry to the Palace of the League of Nations competition held that year. After resigning from the Bauhaus, he worked in the USSR (1930–36) and in Mexico (1939–49) where he was director of an institute for town planning. While at the Bauhaus, Meyer was the editor of eight issues of *Bauhaus* magazine published from 1928 to 1929. The 1965 book by Claude Schnaidt, *Hannes Meyer: Buildings, Projects and Writings*, is a comprehensive survey of his work.

Meyerhof, Otto Fritz (1884–1951) German-American biochemist. Meyerhof devoted the greater part of his academic life to the study of the biochemistry and metabolism of muscle and shared the NOBEL PRIZE for physiology or medicine with Archibald Hill in 1922. He held professorships at Kiel and Heidelberg universities, was director of physiology at the Kaiser Wilhelm Institute for Biology, Berlin, and was director of research at the Paris Institute of Biology. In 1940 he immigrated to America, where he joined the medical faculty of the University of Pennsylvania. Meyerhof demonstrated that the

production of lactic acid in muscle tissue, formed as a result of glycogen breakdown, was effected without the consumption of oxygen (i.e., anaerobically). The lactic acid was reconverted to glycogen through oxidation by molecular oxygen, during muscle rest. This line of research was continued by Gustav EMBDEN and Carl and Gerty CORI, who worked out in greater detail the steps by which glycogen is converted to lactic acid—the **Embden-Meyerhof pathway**.

Meyerhold, Vsevolod Yemilyevich (1874–1942) Russian actor and director. Meyerhold worked with V. I. Nemirovich-Danchenko and Konstantin STANISLAVSKY at the Moscow Art Theater (1898–1902). In 1902 he founded the Society of New Drama in Russia. His method of production known as “biomechanics” involved reducing the actor to the status of a puppet under the control of the producer. He used a bare stage and stylized gestures. In 1920 he became head of theater in the People's Commissariat for Education. He founded his own theater in Moscow. Innovative and modernistic, he worked closely with Vladimir MAYAKOVSKY. In 1915 he made two films, now lost, *The Strong Man* and *Dorian Grey*, which are known to have influenced contemporary filmmakers. From 1920 Meyerhold had a working studio with student

directors, including Sergei EISENSTEIN. Accused of Formalism, he was arrested in 1939 and “disappeared.”

MGB Russian abbreviation for Ministry of State Security. Name of the Soviet security service (1946–53), and responsible for internal security; the MGB replaced the NKVD and NKGB. Under BERIA's leadership and STALIN's orders the MGB became exceedingly powerful. Jewish intellectuals were harassed in 1949, and an operation was led against the former supporters of ZHDANOV. The wave of terror and the powerful position of the MGB reached its zenith with the discovery of the DOCTOR'S PLOT of 1952. Following the death of Stalin the ministry was once again subordinated to party control and was reorganized as the KGB (Committee of State Security).

MI5 British counterintelligence organization, created in 1909. MI5 was organized to fight subversion in Britain and to undertake counterintelligence operations abroad. During WORLD WAR I and WORLD WAR II, MI5 was successful in countering German spy networks in Britain. However, it was unable to prove that one of the top agents of MI6, Kim PHILBY, had long been a Soviet spy and had passed top secrets to the USSR. There were also allegations that MI5's director, Sir Roger Hollis, was a Soviet secret agent.

MI6 British intelligence agency, also known as the Secret Intelligence Service (SIS), founded in 1911. The British counterpart of the American OSS and, later, the CIA, MI6 operates under the highest secrecy. During the 1940s and 1950s one of MI6's top agents, Kim PHILBY, was a double agent for the Soviet Union.

Michener, James A (Ibert) (1907?–1997) American novelist best known for his historical epics. There is uncertainty about the actual place and date of Michener's birth. He held a number of diverse jobs, including acting and sportswriting before his education and eventual position as a naval historian in the South Pacific. Michener's first work of fiction was *Tales of the South Pacific* (1947), which inspired the Rogers and Hammerstein musical *South Pacific* (1949, filmed 1958). His

later novels are epic, often historical, adventures and include *The Bridges at Toko-Ri* (1953, filmed 1954), *Hawaii* (1959, filmed 1966, and as “The Hawaiians” in 1970), *Centennial* (1974) and *Alaska* (1988), among many others. Michener's nonfiction includes *The Bridge at Andau* (1957), *America vs. America: The Revolution in Middle-Class Values* (1969); he also wrote on Japanese art.

Mickey Mouse World-famous animated film character and ambassador for all Walt DISNEY enterprises. “The mouse that built an empire,” as Disney described him, was born on a train somewhere between Chicago and Los Angeles in 1927. Disheartened by the failure of his “Alice” series of cartoons and by the loss of rights to the “Oswald Rabbit” character, Disney recalled his days in Kansas City as a youth when he shared his studio with a field mouse. That mouse (dubbed by his wife Lillian as “Mickey” contrary to Walt's wishes to name him “Mortimer”) created a sensation at his first public appearance on November 18, 1928, in New York City's Colony Theater. *Steamboat Willie* (1928) not only launched the mouse but was an innovation in the new technique of synchronized-sound TALKING PICTURES. At a rate of 18 cartoons a year, Mickey soon became a national craze. With faithful Minnie and his arch-nemesis, Peg-Leg Pete, Mickey danced, tumbled, flew, and rode through slapstick adventures on screen and, after 1930, in the daily newspapers for King Features Syndicate. With all the trappings of success—an Oscar, the patronage of British aristocracy, his image in Madame Tussaud's—Mickey after 1940 became more of an entrepreneur than a movie star. He presented classical music to the public in FANTASIA (1940), opened the Disneyland theme park in 1955, the Walt Disney World park in 1971, hosted two television shows—*The Mickey Mouse Club* (1955) and *The New Mickey Mouse Club* (1977)—and lent his stature and image to all Disney-related activities. Before his retirement (albeit a temporary one) in 1953, Mickey made 120 cartoons in all. Walt Disney himself provided Mickey with a voice. And it is well known that Walt's mannerisms, sturdy individuality, occasional shyness all were adapted to Mickey's char-

acter. When Walt died in 1966, Mickey lived on, of course. But the edition of *Paris Match* magazine that appeared at the time displayed Mickey on its cover—with a tear in his eye.

microchip A small, often microscopic series of electronic circuits composed of as many as several million minute transistors embedded into a thin square piece of silicon measuring approximately one inch per side. Microchips were developed in 1958 by Jack Kilby, an employee of Texas Instruments, to reduce the physical space occupied by computers by performing the central processing unit (CPU) and memory functions previously held by a noticeably larger series of TRANSISTORS. Initially, microchips facilitated the development of computers by serving as CPUs that accelerated the computation and processing power of these machines. Later advances in CPU structure enabled CPUs to regulate audio and visual output on computer monitors and projection screens, as well as in other complex electronic devices, and other consumer goods, such as televisions, alarm clocks, microwaves, hand-held calculators and Personal Digital Assistants (PDAs). Microchips can also function in a memory capacity in such devices as hand-held calculators and computers.

Micronesia, Federated States of The Federated States of Micronesia consist of four major island groups in the North Pacific Ocean (see page 957) with a total area of 271 square miles; its 607 islands vary geologically from mountainous terrain to coral atolls. Spain sold the Carolines, where Micronesia is situated, to Germany in 1899. At the outbreak of WORLD WAR I Japan took possession of the German Pacific colonies, and in 1920 the LEAGUE OF NATIONS mandated control of Micronesia to JAPAN. Truk Lagoon in the Carolines was one of Japan's most important bases during WORLD WAR II. The American Navy took command of Micronesia following Japan's defeat in 1945. In 1947 the United Nations established the Trust Territory of the PACIFIC ISLANDS, under U.S. control.

Moves toward preparing Micronesia for self-government began in the 1960s. In a referendum in July 1978, of the six Trust Territory districts only

four islands voted in favor of a common constitution. They became the FSM. In October 1982 the FSM and U.S. governments signed a Compact of Free Association, under which the FSM would be internally self-governing while the U.S. maintained responsibility for defense—primarily to deny access to other powers rather than to establish its own bases. U.S. administration of Micronesia formally ended in November 1986. In 1991, following the termination of its UN trusteeship a year earlier, Micronesia was admitted to the UN. Eleven years later, the sovereign nation of Micronesia, working together with the equally sovereign Marshall Islands, renegotiated its relationship with the U.S., and signed a deal worth an estimated \$3.5 billion dollars over a 20-year period.

Microsoft American software company. In 1975 Bill GATES and Paul Allen created Microsoft in Albuquerque, New Mexico, to develop new versions of BASIC, a computer programming language, for computer manufacturers such as Apple Computer, Commodore Computer and Tandy. Four years later, Microsoft moved its operations to Bellevue, a town in Washington near Seattle. In 1980 Microsoft landed a contract with IBM (INTERNATIONAL BUSINESS MACHINES) to produce an operating system for the line of PERSONAL COMPUTERS (PCs) that IBM was developing for the consumer and business market. Microsoft then purchased the copyright to 86-DOS, an operating system developed by Tim Paterson, adapted its format and licensed it to IBM as Microsoft Disk Operating System (MS-DOS). However, Microsoft's deal with IBM was not exclusive, and Microsoft sold other licenses to similarly designed personal computers, referred to as "clones." Along with MS-DOS, Microsoft also began developing application programs for business and personal computer use, such as its spreadsheet programs Multiplan (1982) and Excel (1984), and its word processing program Microsoft Word (1984).

In 1985 Microsoft began selling an application program known as Windows, a graphical user interface (GUI) program that allowed IBM and IBM-clone PC users to move a cursor on a computer screen to different images or "icons" that represented different com-

puter files or application programs. Microsoft later issued Windows 2.0 in 1987 and Windows 3.0 in 1990 that offered updated GUI features and improved user performance. Microsoft later issued upgrades to Windows 3.0 with Windows 3.1 and Windows 3.11. When Microsoft and IBM ceased to work together in the production of software in 1991, the former continued to produce improved and increasingly complex updates of its Windows software, such as the business-oriented Windows NT (1993), Windows 95 (1995), Windows 98 (1998), Windows 2000 (2000), and Windows XP (2002).

As Windows and DOS became the most commonly used software programs for PCs in their respective genres, allegations began to emerge that Microsoft engaged in unfair business practices, such as the illegal use of copyrighted software designs, and by making it difficult for rival software companies' programs to interact with PCs running on Windows or DOS. In 1993 Microsoft won a substantial legal victory when a judge ruled that its Windows software did not infringe on the copyright held by Apple Computers for a similar and earlier-developed GUI for Apple's computers. In 1997 the Department of Justice renewed its earlier prosecution of Microsoft for antitrust activities, claiming the corporation had breached a previous agreement by seeking to ensure that PC manufacturers to whom they had licensed Windows 95 also installed Microsoft's web browser, Internet Explorer, as the sole software program for accessing the Internet. In 2000 a federal court ruled that Microsoft had indeed violated antitrust laws by the manner in which it promoted Internet Explorer over its competitors and called for the company to be divided into two separate entities. While an appellate court agreed in 2001 that Microsoft possessed a monopoly over the internet browser market, it reversed the ruling that called for the division of Microsoft.

Midler, Bette (1945–) American actress and singer. Born in Hawaii, Midler received her first motion picture role in the film *Hawaii*, in which she played the wife of a missionary. She later moved to New York City and joined the cast of the Broadway musical *Fiddler on the Roof* and worked as an

entertainer at the Continental Baths, where she entertained the establishment's homosexual male clientele with musical numbers and costumes from the 1920s through the 1960s. In the 1971 rock opera *Tommy*, she played both the Acid Queen and Mrs. Walker. In 1972 she released her first album, *The Divine Miss M*, which included songs from her routines at the Continental Baths, such as the 1940s piece "Boogie Woogie Bugle Boy." In 1979 Midler starred in *The Rose*, a film inspired by the life and death of rock musician Janis Joplin, earning her a Golden Globe Award and an Academy Award nomination for Best Actress. In 1984 Midler signed a long-term contract with Walt Disney Studios. Although she substantially reduced her concert performance schedule in order to concentrate on her film career, she recorded several songs for the soundtrack of *Beaches*, one of which "The Wind Beneath My Wings," became the number-one single in the U.S. in 1988. Since then, her musical and motion picture careers have rarely overlapped. She played a USO entertainer in *For The Boys* (1991) and appeared in the 1993 CBS television production of the musical *Gypsy*. But most of her musical performances, such as her 1993 single "From A Distance" and her stage show in the same year at Radio City Music Hall, focused on songs independent of her career as an actress.

Midway Island group in the central Pacific, northwest of the Hawaiian Islands; site of critical WORLD WAR II naval battle between the American and Japanese navies. One of the decisive battles of the war, Midway (June 3–6, 1942) saw the destruction of the main Japanese carrier fleet and forced Japan into a defensive posture in the Pacific. Unaware that U.S. intelligence had broken Japanese military codes and therefore knew of his intentions, Admiral YAMAMOTO pressed ahead with his plans to seize Midway. The Japanese fleet, including four aircraft carriers and about 250 planes, was intercepted by a U.S. force including three carriers and about 350 aircraft, (plus those stationed on Midway itself). In ferocious dive-bomb attacks, American pilots destroyed all four Japanese heavy carriers, two cruisers, three destroyers, and 250 aircraft and killed 3,500 men;

American losses were two ships, including the carrier *Yorktown*, 150 planes and 300 men. (See also **WORLD WAR II IN THE PACIFIC**.)

Mies van der Rohe, Ludwig (1886–1969) German architect and designer; one of the most acclaimed of 20th-century architects. His stylistic penchant for simplicity and clean elegance, as evidenced by his famous saying “less is more,” shows itself in both his architectural projects and his furniture designs. He is an important figure both in the history of **MINIMALISM** and in the development of the international design school of architecture. Mies van der Rohe began his architectural career in 1907 without any formal training. In the early 1910s, he worked for the German-based architectural firm of Peter Behrens, a firm that also numbered among its architects Walter GROPIUS and LE CORBUSIER. From 1930 to 1933 Mies van der Rohe served as director of the **BAUHAUS**. After the Nazis came to power he remained in Germany for several years. In 1938 he fled to the U.S., where he spent most of the remaining years of his life. His most famous architectural works include the **BARCELONA PAVILION** (1929) in Barcelona, Spain, a largely glass structure without interior walls, and the Lakeshore Drive Apartments (1948–51) in Chicago, Illinois.

Mifune, Toshiro (1920–1997) Popular Japanese motion picture actor who was frequently associated with the films of Akira KUROSAWA. He was born in Tsingtao, China, to Japanese parents. His appearance as the bandit in Kurosawa's landmark *Rashomon* (1950) led to a list of notable subsequent collaborations—as a psychologically disturbed police detective in *Stray Dog* (1949), a swash-buckling young *ronin* (masterless samurai) in *Seven Samurai* (1954), a murderous feudal king in *Throne of Blood* (1957), and an opportunistic swordsman in *Yojimbo* (1961). Beyond question he was the best known Japanese actor abroad, appearing in American films like *Hell in the Pacific* (1969) and *Midway* (1976), in which he portrayed Admiral YAMAMOTO. His abilities to convey an inner intensity as well as a flamboyant physicality are perhaps best fused in Kurosawa's *Red Beard* (1965), where he portrayed a quiet, dedicated doctor whose work in the ghettos

forces him to dispatch his enemies with some impressive techniques in judo and swordplay.

migrant labor Body of transient or nonnational laborers working in a foreign country. The term is usually specifically applied to the black labor force in **SOUTH AFRICA**, which was housed in barracks or hostels by employers and separated from their families. Elsewhere, Mexican (Chicano) laborers in the southwestern U.S. (generally referred to as **migrant workers**), Algerian workers in France and Turkish workers (called *Gastarbeiter*) in Germany and Switzerland are also examples of migrant labor.

Mihailović, Draza (1893–1946) Yugoslav military leader. Born in southern Serbia, he became an officer and served with the Serbian army during **WORLD WAR I**. After the fall of Yugoslavia (1941) during **WORLD WAR II**, Mihailović organized the **CHETNIKS** (Serbian **RESISTANCE** forces), and was named minister of war by the Yugoslav government-in-exile. Meanwhile, a communist **Resistance** group under Josip TITO was also fighting the Nazis, for the most part in Bosnia and Montenegro. As the war continued, Mihailović an ardent royalist and Serbian nationalist, opposed and finally fought Tito—and thus gradually lost Allied support. He was captured by Tito's partisan forces in 1946, tried for treason and sentenced to death. Although voices were raised throughout the world to protest his sentence, Tito considered him a threat to the nascent communist regime, and Mihailović was executed.

Miki, Takeo (1907–1988) Japanese politician; first elected to the Japanese Diet in 1937 and reelected 19 times before his death, making him the parliament's longest-serving member. In the late 1930s, Miki sought to prevent **JAPAN** from becoming involved in a war against the U.S. After **World War II**, he rose to become one of the top leaders of the Liberal Democratic Party. When that party needed a candidate to refurbish its image following the 1974 resignation of Premier Kakuei TANAKA, it drafted Miki. He himself resigned from the premiership two years later in reaction to a poor showing by the Liberal Democrats in a parliamentary election.

Mikoyan, Anastas Ivanovich (1896–1978) Soviet communist official. Mikoyan joined the **BOLSHEVIKS** in 1915 and became a member of the **POLITBURO** in 1926. He served under every Soviet leader from **LENIN** to **BREZHNEV** and was in the front rank of the Kremlin hierarchy for nearly 50 years. His longevity was remarkable, considering the mortality rate of high-ranking officials during the rule of **STALIN**. He became deputy prime minister in 1937. He was later first vice chairman of the Council of Ministers (1955–64) and president of the Soviet Union (1964–65).

Milburn, Jackie (John) (1924–1988) English football (soccer) star and a member of Britain's most famous footballing family. Milburn gained widespread fame as a center-forward for Newcastle United and for England. After retiring from active play, he became a team manager and, later, a sportswriter.

Milestone, Lewis (1895–1980) Russian-born **HOLLYWOOD** film director. Milestone directed more than 30 films in a 40-year career and won **ACADEMY AWARDS** for *Two Arabian Knights* (1928) and *All Quiet On The Western Front* (1930), adapted from Erich Maria REMARQUE's **WORLD WAR I** novel. His other film credits included *The Front Page* (written by Ben HECHT and Charles MacArthur), *The General Died at Dawn*, *Of Mice and Men* (adapted from John STEINBECK's novel), *The North Star* (a **WORLD WAR II** film set in the USSR), and *A Walk in the Sun*, a classic film about American G.I.s in **ITALY** during **World War II**. Milestone's directorial style was noted for its fluid camera technique, crisp dialogue, strong characterization, and vivid realism.

Milhaud, Darius (1892–1974) French composer. Born in Aix-en-Provence, he trained at the Paris Conservatory (1910–15) under Paul Dukas, Vincent d'INDY and others. He was a diplomatic aide to Paul CLAUDEL in Brazil (1917–18), coming into contact with Brazilian folk music, and later visited the U.S. where he became acquainted with **JAZZ**. Both forms were to influence his music. Returning to France, he became a member of the modernist group known as **LES SIX**. Milhaud taught composition at Mills

College, Oakland, California, from 1940 to 1947, teaching thereafter at the Paris Conservatory. A prolific composer, he wrote over 400 works. He used polytonality to great effect in compositions noted for their decided rhythmic structure, excellent craftsmanship and expressive instrumentation. Milhaud is especially celebrated for his operas, including *Le Pauvre Matelot* (1930; libretto by Jean COCTEAU), *Christophe Colomb* (1930; libretto by Claudel), *Bolivar* (1943), *David* (1953) and *St. Louis, King of France* (1970–71; libretto by Claudel). His oeuvre also includes 12 symphonies, concertos, orchestral music, incidental music for plays, chamber pieces, choral works and songs.

Milland, Ray (1905–1986) Welsh-born actor. He was best known for his role as an alcoholic writer in the 1945 film *The Lost Weekend*, a performance that won him an ACADEMY AWARD for best actor. His 56-year career in Britain and the U.S. included numerous television roles and parts in almost 150 films, including *Dial M for Murder* and *Lady in the Dark*.

Millar, Richard William (1899–1990) American businessman. He was regarded as one of the pioneers in the development of Southern CALIFORNIA's aerospace industry, and helped to forge strong links between the investment and aircraft communities. He served as president of Bankamerica Corp. before joining Northrop as chairman from 1947 to 1949. After a scandal involving illegal payments to political candidates, Millar was returned as chairman for 1975–76. He continued to serve as a board member until 1984.

Millay, Edna St. Vincent (1892–1950) U.S. poet. Her poem "Renascence" was given a literary prize by the publication *The Lyric Year* in 1912. After graduating from Vassar in 1917, she published the volume *Second April* in 1921. *The Ballad of the Harp-Weaver* (1922) was awarded the PULITZER PRIZE. Influenced by English poets Keats and Hopkins, she has written on a variety of New England subjects.

Miller, Arthur (1915–2005) American playwright. One of the most acclaimed American dramatists of the

American playwright Arthur Miller (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

postwar period, he was born in New York City and educated at the University of Michigan, where he began writing plays. A profoundly serious writer, concerned with the morality of ordinary decisions and the tragic elements of everyday life, Miller scored his first big commercial success with *All My Sons* (1947, film 1948). His next box office triumph was the work widely considered his masterpiece, *DEATH OF A SALESMAN* (1949, film 1952). Winner of the PULITZER PRIZE, it is the story of Willy Loman, an ordinary man betrayed by the shallow values of the American dream. Miller's social conscience is clear in all his work, and is particularly in evidence in his Tony-winning *The Crucible* (1953), a drama set in the 17th-century Salem witch trials that serves as a parable of the effects of MCCARTHYISM. The Pulitzer Prize-winning tragedy *A View from the Bridge* (1955) details the breakdown of a Sicilian-American working-class family and *After the Fall* (1964) is a fictionalized view of Miller's troubled life with his second wife, Marilyn MONROE. His other plays include *Incident at Vichy* (1965), *The Price* (1968) and *The Creation of the World and Other Business* (1972). He is also the author of a novel, *Focus* (1945), the screenplay for *The Misfits* (1961), a short story collection and the television film *Playing for Time* (1980). Miller remained active throughout the 1990s, composing three plays: *The Ride Down Mt. Morgan* (1991), *The Last Yankee* (1993), and *Broken Glass* (1993). *Broken Glass* went on to win the 1993 Olivier Award for Best Play. Miller

also adapted the script for his play *The Crucible* for a feature film production starring Daniel Day-Lewis and Winona Ryder. In 1997 the film *The Crucible* (1996) earned Miller an Academy Award nomination for best adapted screenplay.

Miller, Glenn (1904–1944) American big band jazz bandleader, trombonist and arranger. Miller began his career as a trombone player and arranger for various 1930s jazz big bands, including the ensemble led by Jimmy and Tommy DORSEY. In 1938 he formed his own big band, which enjoyed a series of hits, including "Chattanooga Choo Choo," "In the Mood," "Moonlight Serenade" and "Tuxedo Junction." In 1942 Miller volunteered to become the leader of the U.S. Army Air Force band, based in Europe, which aired radio broadcasts to entertain the troops during WORLD WAR II. He died in a 1944 plane crash while en route from England to Paris.

Miller, Henry (1891–1980) American writer. Miller has been acknowledged by fellow writers as diverse as Norman MAILER, Isaac Bashevis SINGER and John UPDIKE as the leading force in the 20th century in widening the boundaries of literature to include frank portrayals of lust and sexuality. Miller created a sensation with the publication of his classic first work, *Tropic of Cancer* (1934), an autobiographical novel that offered a lyric and bawdy portrayal of bohemian life in Paris. *Tropic of Cancer* was banned as obscene in the U.S. for nearly three decades, before a 1964 decision by the U.S. Supreme Court upheld its literary value. *Tropic of Capricorn* (1936) applied a similar approach to Miller's years of coming to manhood in his native Brooklyn. Miller proved himself a gifted literary critic and philosophical essayist in works such as *The Wisdom of the Heart* (1941), *The Time of the Assassins* (1946), and *The Books in My Life* (1952). *The Colossus of Maroussi* (1941) is a stirring account of Miller's travels in Greece just prior to World War II. *Sexus* (1948), *Plexus* (1963) and *Nexus* (1965) are a trilogy of autobiographical novels.

Miller, Izzetta Jewel (1884?–1978) American actress and feminist. In the early 1920s Miller twice ran for the

U.S. Senate from West Virginia, but was unsuccessful. She was the first woman in the American South to be nominated to run for national office by a major party (the DEMOCRATIC PARTY).

Miller, Jonathan Wolfe (1934–) British director. Although trained as a medical doctor, Miller has spent most of his life as a director in theater, television and opera. His first success was as coauthor and actor in the 1960 revue *BEYOND THE FRINGE*. He directed his first play, John OSBORNE's *Under Plain Cover*, in 1962. He is particularly noted for his innovative direction of Shakespeare's plays for television during the 1980s. An associate director of Britain's National Theatre from 1973 to 1975, Miller also served as artistic director of London's Old Vic Theatre from 1986 until March 1991. Among his notable productions are *King Lear* (1969), Chekhov's *Three Sisters* (1976) and Racine's *Andromache* (1988). Since 1991 Miller has directed operas among them, *La Fanciulla del West* (1991), *Le Nozze di Figaro* (1991), *Tamerlano* (2001), and *Die Entführung aus dem Serail* (2003). In 2002 Miller was knighted.

Miller, Johnny (1947–) American professional golfer. Born in San Francisco, Miller developed an interest in golf after being trained in the game's techniques by his father, Larry, and later by golfing coach John Geertson. This training helped Miller win the 1964 U.S. Junior Amateur Open and rank eighth at the 1966 U.S. Open, in which he played as an amateur. After graduating from Brigham Young University in 1969, Miller joined the Professional Golfing Association (PGA). In his fourth year in the association, Miller won his first major golfing tournament on the PGA's schedule, the 1973 U.S. Open. The following year he won eight PGA tournaments, including the Dean Martin–Tucson Open, the World Open and the Kaiser International. Although he did not win a PGA major event, such as the U.S. Open or the Masters' Tournament, in 1974 he earned more prize money than any other golfer. This achievement represented the first time someone had won what is called the "money title" between 1971 and 1980 other than PGA leaders Jack NICKLAUS or Tom Watson. In 1976 Miller captured his second major tournament, the British Open. Since then he

has won seven PGA tour events, giving him a career total of 24 PGA victories. In 1998, in recognition of his accomplishments in the golfing world, Miller was inducted into the World Golf Hall of Fame.

Miller, Perry (1905–1963) U.S. historian. Miller received his Ph.D. from the University of Chicago in 1931. He joined the Harvard faculty in 1931 and taught at that university until his death. A giant in the field of intellectual history, Miller wrote extensively on American Puritanism. His works argued that religion rather than economics was the primary motive for Puritan settlement in New England. Among his major works are *Orthodoxy in Massachusetts* (1933), *The New England Mind* (1939), *From Colony to Province* (1953) and *Errant into the Wilderness* (1956).

Miller, Stanley Lloyd (1930–) American chemist who tested the theory, first proposed by the Russian scientist Aleksandr OPARIN, that life on Earth arose out of a "primordial soup." In 1953, while working toward his Ph.D. at the University of Chicago, Miller published the results of an experiment whereby he produced a number of amino acids in an environment that simulated the early atmosphere of the Earth, which was believed to be similar to that of Jupiter and Saturn. To many scholars his famous paper, *A Production of Amino Acids under Possible Primitive Earth Conditions*, was evidence of the spontaneous origin of life. However, subsequent research has shown that for a single protein to develop from simpler amino acids, other principles would have to be involved. Miller has been a professor of chemistry at the University of California in San Diego since 1968.

Milligan, Spike (Terence Alan Milligan) (1918–2002) British humorist. Best known for his association with the hit radio program *THE GOON SHOW*. Milligan had a tremendous impact on British humor. He made his radio debut in "Opportunity Knocks" (1949), then, in collaboration with Peter SELLERS, Harry Secombe and Michael Bentine, cowrote and performed in *The Goon Show* (1949–60). Famous for his zany, surrealistic and slightly skewed brand of humor, Milligan appeared in numer-

ous television series and motion pictures and also on stage, most notably in *Treasure Island* (1961, 1973, 1974, 1975). In addition he wrote many humorous works, including *Puckoon* (1963) and *The Looney: An Irish Fantasy* (1987).

Millikan, Robert Andrews (1868–1953) American physicist. In 1923 Millikan won the NOBEL PRIZE for physics for determining that the electric charge of an electron was always a simple multiple of the same basic electrostatic unit. In conjunction with this project, Millikan also attempted to demonstrate the validity of Albert EINSTEIN's description of the photoelectric effect, which was cited in his own Nobel award of 1905. Following Millikan's crowning achievement of 1923, he began a major study of cosmic rays, which would occupy him for the rest of his career. He argued that these rays were electromagnetic radiation photons, rather than charged particles, but his theory was later disproved by Arthur COMPTON.

Mills, Irving (1894–1985) U.S. composer and music publisher. In 1919 he cofounded a music publishing company called Mills Music that was to remain under his direction until 1965. He was best known for his association with Duke ELLINGTON, which began in 1926 and lasted until 1939. After discovering Ellington in a Broadway nightclub, Mills became his publisher and manager, as well as collaborating with him on such songs as "Mood Indigo" and "Sophisticated Lady." He also did much to advance the careers of other such well-known artists as Cab CALLOWAY, Hoagy CARMICHAEL and Milton BERLE.

Mills, Sir John (Lewis Ernest Watts) (1908–2005) British actor. Mills was one of Britain's finest stage and screen actors since the 1930s. His stage career began at the London Hippodrome in 1929 and included leading roles in such varied works as *Charley's Aunt* (1930), Noel COWARD's drama *Cavalcade* (1931), *A Midsummer Night's Dream* (1939) and Brian Clark's *The Petition* (1987). In 1961 he made his New York stage debut in the title role of Terence Rattigan's *Ross*. Mills has also appeared in numerous films, including *Ryan's Daughter* (1971) for

which he won an ACADEMY AWARD as best supporting actor.

Mills, Wilbur Daigh (1909–1992) American politician. Born in Kensett, Arkansas, Mills was trained as a lawyer and was a probate judge before his election as a Democratic member of the House of Representatives in 1938. A protégé of House Speaker Samuel RAYBURN, he was appointed to the prestigious Ways and Means Committee (1943) and assumed its chairmanship (1958). The House's foremost tax expert, he was a budget-balancing fiscal conservative who nonetheless supported various liberal reforms. He was extremely influential in molding the Tax Reform Act of 1969. Mills's distinguished political career ended in disgrace after his affair with a striptease dancer was revealed. Involved in a notorious incident at Washington's Tidal Basin with "the Argentine Firecracker" in 1974, he soon relinquished his post as committee chair. Mills retired from the House in 1977, later admitting his alcoholism.

Milne, A(lexander) A(lexander) (1882–1956) English author. Although he wrote much fiction and drama for adults, Milne is best known for his whimsical portraits of childhood in his various children's books. He worked as a freelance journalist (1903–06), then as assistant editor of the humor magazine *Punch* (1906–14) before becoming a full-time writer. In collaboration with illustrator E. H. Shepard, Milne created the memorable characters of Christopher Robin and Winnie-the-Pooh, among others, in the prose works *Winnie-the-Pooh* (1926) and *The House at Pooh Corner* (1928), and the books of verse *When We Were Very Young* (1924) and *Now We Are Six* (1927), which have become classics of children's literature. His works for adults include the novel *The Red House Mystery*.

Milošević, Slobodan (1941–2006) President of the Serbian Republic (1989–97) and of YUGOSLAVIA (1997–2000). The son of an Orthodox priest, Milošević graduated from Belgrade University with a degree in law in 1964. After working in the state-run natural gas company and the United Bank of Belgrade, he was named head of the Belgrade Communist Party in

1978. In 1986 he became the leader of the Serbian Communist Party. On April 24, 1987, Milošević delivered a stridently nationalistic speech to a Serbian crowd in the town of Kosovo Polje that was protesting alleged abuse at the hands of the predominantly Albanian population in the Kosovo region of Yugoslavia. He continued to incite pro-Serb demonstrations that forced the leaders of Kosovo and the multi-ethnic north Serbian province of Vojvodina to leave office. In May 1989 Milošević was elected president of the Serbian republic within the Yugoslav federal state. Milošević oversaw the creation of a new Serbian constitution that called for direct presidential elections and increased the president's authority, although it limited his tenure to two terms in office. The constitution was adopted in mid-1990 and Milošević won the first direct presidential election in December of that year and was reelected in 1992.

Milošević also became involved in the Serbian effort to prevent the secession of the Yugoslav provinces of BOSNIA AND HERZEGOVINA, SLOVENIA and CROATIA from the federated state. When Slovenia, Croatia, and Bosnia-Herzegovina declared their independence, in 1991–92, Milošević launched a Yugoslav invasion of Bosnia and Croatia, to protect the approximately 580,000 ethnic Serbs living in Croatia and the estimated 1.6 million Serbs living in Bosnia. This Yugoslav civil war raged until Milošević met with Croat and Bosnian leaders at the U.S.-sponsored Dayton Conference in 1995, where he signed the DAYTON ACCORDS and recognized Croatian and Bosnian independence in exchange for safeguards for the Serb population in both countries.

Constitutionally barred from running again for Serbia's presidency, Milošević ran for and won the presidency of Yugoslavia in July 1997. As president of Yugoslavia he led the country into war over the secessionist campaign in Kosovo. With a large ethnic Albanian majority, the province sought to emulate Croatia and Bosnia, employing diplomacy and guerrilla tactics to achieve independence (see KOSOVO LIBERATION ARMY). In 1998 Milošević responded to the insurrection in Kosovo by ordering the expulsion of Albanian Kosovars and the

destruction of their villages. Milošević's military operations in Kosovo ended as a result of a NATO air campaign against Yugoslavia in the spring and summer of 1999.

On September 24, 2000, Milošević ran for reelection as president of Serbia. Although the initial tally had him losing to the opposition candidate, Vojislav Koštunica, Milošević insisted that the margin of victory was narrow enough to warrant a runoff election. This led to protests throughout Yugoslavia, which forced Milošević to resign on October 5. In 2001 Milošević was arrested by the Serbian government and transferred to The Hague, Netherlands, where he was tried by the International Criminal Tribunal for Yugoslavia (ICTY) for alleged war crimes committed during Yugoslavia's civil conflicts of the 1990s. He died in his cell of a heart ailment before the end of his trial.

Milstein, Nathan (1904–1992) Russian-American violinist. Born in Odessa, Milstein studied in his home city and at the St. Petersburg Conservatory with Leopold Auer. He began playing in Odessa at the age of 15 and followed this performance with a recital in Kiev, where he met and impressed the young Vladimir HOROWITZ. Shortly thereafter, the two began to give concerts together, sometimes joined by Gregor Piatigorsky. Given government permission to leave the USSR for two years, Milstein debuted in Berlin in 1925 and made a stunning impact with his first Paris performance shortly thereafter. He made his first American appearance in 1929 and became a U.S. citizen in 1942. An acclaimed virtuoso with a large classical repertoire, Milstein was known for his phenomenal technique, sure yet delicate style and superb musicianship.

Mindszenty, József (1892–1975) Hungarian Roman Catholic cardinal. He was ordained a priest in 1915, became a monsignor in 1937 and was appointed bishop of Veszprém in 1944 while the Germans occupied HUNGARY. Outspoken in his anti-Nazi views and his opposition to the persecution of Jews, he was arrested by Hungarian Nazis and imprisoned from 1944 to 1945. After World War II, he was named archbishop of Esztergom and

primate of Hungary, becoming a cardinal in 1946. As opposed to communism as he was to fascism, he was again arrested in 1948, by the Hungarian government; charged with treason and currency offenses, he was convicted and sentenced to life in prison. Freed during the HUNGARIAN UPRISING of 1956, he took refuge in Budapest's American embassy when the revolt was crushed by the Soviets. He remained there as a symbol of opposition to communism, refusing to recognize the 1964 resumption of relations between the Vatican and Hungary. As stubborn as he was committed, Mindszenty finally left Budapest for Rome in 1971, but he remained anathema to the Hungarian regime. In 1974 Pope PAUL VI, in an attempt to improve relations between Hungary and the Vatican, officially removed Mindszenty as Hungarian primate.

Mingus, Charles (1922–1979) American bassist-composer, one of jazz history's towering giants. Growing up in Los Angeles, his first notable experiences were with such traditionalists as trombonist Kid ORY, trumpeter Louis ARMSTRONG and vibraphonist Lionel Hampton. After moving to New York, Mingus worked with such bebop giants as trumpeter Dizzy Gillespie and saxophonist Charlie PARKER. As a bassist, Mingus displayed a virtuoso technique and remarkably broad stylistic range; his thorough command of the major jazz styles was a hallmark of his composing as well. And, in works such as "Ysabel's Table Dance" (1957), "Fables of Faubus" (1959) and "Epitaph" (1962), one finds traces of jazzdom's various traditions; also present are dark sonorities (achieved with low-pitched instruments), collective improvisations (an influence on the 1960s "free jazz" movement) and overlapping riff or ostinato figures. Mingus worked out the details of his music, where traditional distinctions between written and improvised sections were often blurred, in various "workshop" situations. His compositions were under constant revision in "performances" resembling rehearsals more than formal concert presentations. A temperamental iconoclast, Mingus lived much of his life in economic and emotional chaos. His sensational autobiography, *Beneath the Underdog*, was published in 1971.

minimalism Name for an aesthetic approach that minimizes consciously artistic and illusory effects. Minimalism emerged in the 1960s as a significant force, especially in the visual arts and in music. Painters such as Barnett Newman and Ellsworth KELLY employed flat colors and stark geometrical shapes in their canvasses, while sculptors such as Carl André and Donald Judd displayed basic shapes and structures such as piled bricks and white-painted cubes. In music, minimalism showed itself in the simple melodic and harmonic progressions of composers such as Philip GLASS, Steven Reich and Terry Riley. In addition, minimalism influenced architectural design, although its key exponent in this field—MIES VAN DER ROHE—was a precursor rather than a follower of minimalism. In literature, the minimalist aesthetic played a tangential role in shaping French NOUVELLE ROMAN theory and also influenced the verse of Robert CREELEY and other American poets.

Minnelli, Vincente (1910–1986) American motion picture director. Recognized for his innovative use of color, he was best known for such film musicals as *Meet Me in St. Louis* and *Gigi*, for which he won an ACADEMY AWARD in 1958. He and his first wife, Hollywood legend Judy GARLAND, were the parents of movie star Liza Minnelli.

Minton, Sherman (1890–1965) Associate justice, U.S. Supreme Court (1949–56). A graduate of Indiana University and Yale University Law School, Minton served as Indiana public counselor before being elected to the U.S. Senate as a NEW DEAL Democrat in 1934. Defeated for reelection in 1940, he secured a federal post in Washington and was later appointed a justice of the U.S. Court of Appeals for the Seventh Circuit. He was appointed to the Supreme Court in 1949 by President Harry S. TRUMAN, with whom he had served in the Senate. Despite his liberal background, Minton proved to be a conservative on the Court, especially in cases involving criminal law. He dissented in many civil liberties decisions in the WARREN Court, but supported the majority decision in *BROWN V. BOARD OF EDUCATION*. He resigned from the Court for health reasons in 1956.

Minutemen Members of an extreme right-wing society founded in the U.S. in the 1960s to organize resistance to a feared Communist invasion. The organization had several hundred members, mainly in California and Illinois, and was declared subversive by the U.S. attorney general in 1965.

Miranda v. Arizona ("right to remain silent") (1966) Landmark American criminal case that established that criminal suspects must be informed of the constitutional right against self-incrimination when they are arrested. The Fifth Amendment of the U.S. Constitution provides that an individual accused of a crime cannot be compelled to testify against himself: The accused has the right to remain silent. The Supreme Court held that, on arrest, an individual must be informed of this right to remain silent before any interrogation may take place. In *Miranda*, the accused's conviction was reversed because he had been convicted based on a confession he had given without being informed of his rights. The rendition of the defendant's "Miranda rights" on arrest are familiar to viewers of television or motion pictures: "You have the right to remain silent; anything you say may be used in evidence against you in a court of law; you have the right to an attorney."

Mir Iskusstva (World of Art) Movement in Russian art at the turn of the 20th century. It took its name from the periodical founded by DIAGHILEV, which appeared from 1898 to 1904 and which published articles on modern Western European painting. At the same time, it also evaluated traditional Russian art. Diametrically opposed to the utilitarian idea that art should serve a socially useful function, the society advocated art for art's sake. It also organized several exhibitions to which the leading Russian artists of the day sent their work. Following the events of 1917, many of the Mir Iskusstva group emigrated. Among their number were Leon BAKST, Alexander BENOIS, Mstislav Dobuzhinsky, Michael LARIONOV and Nicholas ROERICH. Some of them collaborated with Diaghilev's BALLETS RUSSES.

Miró, Joan (1893–1983) Spanish-born artist. During the 1920s he was

one of the leading Surrealist painters in Paris, along with André MASSON, Antonin ARTAUD, and André BRETON. Miró's work combined elements of CUBISM and Catalan primitive art and was often dominated by bright colors and abstract designs. A long collaboration with the potter Joseph Artigas resulted in major works, including the large ceramic murals at Harvard University and at the UNESCO building in Paris. As well as a painter, Miró was also an accomplished sculptor, printmaker, potter and stage designer. His work particularly influenced American ABSTRACT EXPRESSIONIST painters such as Arshile Gorky, Robert MOTHERWELL and Jackson POLLOCK. (See also SURREALISM.)

Mir space station Orbiting space station constructed and maintained by the Soviet, and later Russian, space agencies. In 1986 the Soviet space program began launching modules into orbit. When assembled by Soviet cosmonauts, these modules, which served as living quarters and scientific laboratories for the *Mir* crews, formed the *Mir* space station. Although Soviet personnel originally conceived of a five-year lifespan for *Mir*, as indicated by their placing of the space station in a low-earth orbit 250 miles above the earth's surface, *Mir* surpassed their expectations and survived for 15 years. During that time, it held on average three crewmembers, ranging from technical personnel to scientists, and provided the facilities for such experiments as the growth of wheat in outer space. On June 29, 1995, the docking of the U.S. space shuttle *Atlantis* provided a venue for cooperation between Russian and American space agencies to resupply the station and transport personnel. It was also aboard *Mir* that the longest record for a single, continuous stay in space—437 days, 17 hours and 38 minutes—was set by cosmonaut Valeri Polakov. However, *Mir* encountered several problems during its relatively long lifespan. Two of its four science modules, Kvant-2 and Kristall, regularly supplied low yields from their solar blankets as a result of repeated tears in these structures from descending debris. Additional problems included *Mir*'s lack of procedures for disposing of waste products such as trash and defunct equipment, and the 1997 incapacitation of the Spektr

module when a supply vehicle collided with it to render it uninhabitable. Because of these continuing structural problems, as well as the Russian space agency's increasing commitment to the *International Space Station*, the Russian government sanctioned *Mir*'s destructive reentry into the Earth's atmosphere. After plotting a trajectory that substantially reduced the possibility of space-station debris striking inhabited areas, *Mir* reentered the Earth's atmosphere on March 23, 2001, and proceeded to disintegrate above an uninhabited region of the southern Pacific Ocean.

Mirza Ali Khan (1901?–1960) Fakir of Ipi, Pashtun tribal leader (on the Pakistan-Afghanistan border). A Muslim religious fanatic, he led violent uprisings in 1931–32. He was later financed by Axis agents to keep an estimated 36,000 British troops occupied with tribal warfare in the region.

Mishima, Yukio (Kimitake Hiraoka) (1925–1970) Japanese novelist, short story writer, dramatist. The scion of a noble samurai family, after receiving a law degree from Tokyo Imperial University in 1947, Mishima worked briefly in the Finance Ministry. His semi-autobiographical *Confessions of a Mask* (1949) touches on his homosexuality and desire for an early and glorious death. Rejected for service in World War II because of his frailty, Mishima embarked on a regimen of strenuous body-building and samurai training. In 1968 he formed a private army of 83 youths, the goal of which was to return Japan to its prewar non-Western traditions. On November 25, 1970, an hour or two after delivering the final manuscript of his tetralogy to the publisher, Mishima and four of his soldiers took the commander of the Eastern Ground Self-Defense Forces as hostage and in view of 1,200 witnesses committed ritual seppuku (disembowelment) while crying “Long live the Emperor!” Mishima was a prolific, some said facile, writer. Among his works in translation are *Five Modern Noh Plays* (1957), *The Temple of the Golden Pavilion* (1959), *The Sailor Who Fell from Grace with the Sea* (1965), *Death in Midsummer and Other Stories* (1966) and *Thirst for Love* (1969). Mishima himself regarded *The Sea of Fertility: A Cycle of Four Novels*

(1972–74) as the culmination of his work.

Missouri, USS U.S. Navy Iowa-class battleship; commissioned on June 11, 1944, it is the last of the super-dreadnoughts built by the U.S. On September 2, 1945, in the presence of General Douglas MACARTHUR and other Allied officers, Japanese officials signed surrender papers aboard the *Missouri* in Tokyo harbor, ending WORLD WAR II. (The papers are now displayed in the Truman Library in Independence, Missouri.) In 1986, in an effort to restore American naval strength, the *Missouri* was re-outfitted and reactivated.

Mistral, Gabriela (Lucila Godoy Alcayaga) (1889–1957) Chilean poet, educator, stateswoman. Though she won her reputation as a poet with *Sonets de la muerte*, which received the National Poetry Prize in 1914, Mistral had a parallel vocation first as a rural schoolteacher, later as director of schools throughout Chile and a university professor. The early suicide of her fiancé after discovery of his embezzlement of funds had a profound effect on the tone and themes of her work, which expressed despair and loneliness as well as sympathy with oppressed peoples and sometimes reflected a religious sensibility. Mistral represented Chile as honorary consul in Brazil, Spain, Portugal and the U.S. Between 1922 and 1938 she worked with Mme. CURIE and Henri BERGSON in the LEAGUE OF NATIONS. In 1945 she became the first Latin American to win the NOBEL PRIZE. After World War II she was associated with a number of American universities. She died at her translator's home in Hempstead, New York. Her works include *Desolación* (1922), *Ternura* (1924), *Tala* (1938) and *Lagar* (1954).

Mitchell, Clarence M. (1911–1984) Black American CIVIL RIGHTS activist. Mitchell was Washington lobbyist for the NATIONAL ASSOCIATION FOR THE ADVANCEMENT OF COLORED PEOPLE (NAACP) (1950–78). During much of the same period, he also lobbied for the Leadership Conference on Civil Rights. He first drew national attention in 1956, when he was arrested for refusing to use a blacks-only entrance to the Florence, South Carolina, railroad station. He was instrumental in the

passage of the CIVIL RIGHTS ACT OF 1964, the VOTING RIGHTS ACT OF 1965 and the Fair Housing Act of 1968. Mitchell was so influential among federal lawmakers that he was sometimes called the "101st senator." In 1980 he was awarded the presidential Medal of Freedom by President Jimmy CARTER.

Mitchell, Edgar (1930–) U.S. astronaut and the sixth person to walk on the Moon; Mitchell was lunar module pilot of Apollo 14 (January 31–February 9, 1971). Mitchell and fellow moonwalker Alan SHEPARD spent over 33 hours investigating the Moon's surface. A Navy pilot, he was one of 19 astronauts selected by NASA in April 1966; he retired from the navy and resigned from NASA in October 1972. Strongly interested in ESP (extrasensory perception) and the paranormal, Mitchell, who had attempted an ESP experiment during his APOLLO flight, founded the Institute for Noetic Studies, in Palo Alto, California. The purpose of the institute is to continue studies into ESP and similar activities. In 1974, Mitchell's coauthored book, *Psychic Exploration: A Challenge for Science*, stirred up a brief flurry of interest among ESP believers.

Mitchell, Joan (1926–1992) American painter. She was born in Chicago and attended Smith College, Columbia University, the Chicago Art Institute School and New York University. She lived in France since 1959 and was greatly influenced by the work of Claude MONET and Willem DE KOONING. A member of the second generation of ABSTRACT EXPRESSIONISM, Mitchell was known for her large, lush and highly sophisticated canvases.

Mitchell, John Newton (1913–1988) U.S. attorney general (1969–72) and director of the Committee to Reelect the President in 1972, Mitchell was one of President Richard NIXON's closest and most loyal advisers. The bugging of the offices of the Democratic National Committee in the WATERGATE apartment complex in 1972 and the scandal that followed led to his downfall. Mitchell spent 19 months in a federal prison, from 1977 to 1979, following his conviction for conspiracy, obstruction of justice and perjury.

Mitchell, Joni (Roberta Joan Anderson) (1943–) Canadian folk and rock and roll songwriter, vocalist, guitarist and painter. Mitchell, who was raised in Alberta, Canada, turned to music while attending the Alberta College of Art. She moved to Detroit in 1965, signed her first record contract in 1967 and soon gained a reputation as a first-rate songwriter after her songs were covered by stars such as Johnny Cash and Judy COLLINS. Mitchell's own debut album, *Song to a Seagull* (1968), was a critical and popular success due in large measure to her emotive and soaring voice. Her third album, *Ladies of the Canyon* (1970), featured her first hit single, *Big Yellow Taxi*. Other noteworthy albums by Mitchell include *For The Roses* (1972), *Court and Spark* (1974), *Mingus* (1979), her tribute to jazz giant Charles MINGUS, and *Dog Eat Dog* (1985). Mitchell continued to record throughout the 1990s, releasing albums such as *Night Ride Home* (1991), *Turbulent Indigo* (1994), *Hits and Misses* (1996), *Taming the Tiger* (1998), and *Both Sides Now* (2002). She was inducted into the Rock and Roll Hall of Fame in 1997. In September 2002, shortly before the release of her latest compilation *Travelogue* (2002), Mitchell announced that *Travelogue* was her last album and that she intended to retire from the industry. A month later Mitchell reversed her decision and announced she would continue recording.

Mitchell, Margaret (1900–1949) U.S. novelist. Interested in local history from an early age, she began to

Songwriter and musician Joni Mitchell (PHOTOFEST)

write for the *Atlanta Journal* in 1922 under the name Peggy Mitchell. In 1926 she started work on a novel based on stories told by family and friends. The outcome was *Gone with the Wind* (1936), which won a PULITZER PRIZE in 1937. It has since become one of the best selling novels of all time and the basis of the immensely popular movie of the same name released in 1939.

Mitchell, Reginald Joseph (1895–1937) British aircraft designer. Mitchell designed some of the most innovative airplanes of the 1920s. His S-4 Float-plane (seaplane) won the prestigious Schneider Cup in 1927, 1929 and 1931. During the 1930s Mitchell visited GERMANY and witnessed the might of the Luftwaffe, the new German air force created by HITLER and GÖRING. Realizing that war with Germany was probable and that the RAF was unprepared, he worked frantically to design a British fighter plane that could outmaneuver German fighters and shoot down German bombers. The product of his labors was the **Spitfire**, which first flew in 1936. Mitchell was already gravely ill and died the following year, before the fighter could prove itself in combat. The Spitfire helped give the RAF the edge in the BATTLE OF BRITAIN. Referring to "the few" (the Spitfire pilots) to whom so many owed so much, Prime Minister Winston S. CHURCHILL acknowledged Mitchell as the "First of the Few."

Mitchell, William "Billy" (1879–1936) U.S. Army officer. In 1898, Mitchell dropped out of college and enlisted in the army for the Spanish-American War. In 1915, he joined the aviation division of the Army Signal Corps and the following year was promoted from captain to major. With the U.S. entry into WORLD WAR I, Mitchell became an air officer of the American Expeditionary Forces, and in extensive combat he proved himself a talented air commander. In 1919 Mitchell was named assistant chief of the Air Service, in which capacity he became a vocal proponent of an independent air force and of enhanced air preparedness. By 1925, however, Mitchell's superiors had tired of his hectoring; they demoted him to colonel and transferred him to a much less visible position. That same year, when the navy's

dirigible *Shenandoah* was lost in bad weather, Mitchell made a statement to the press charging the navy and the War Department with “incompetence, criminal negligence, and almost treasonable administration of the national defense.” For this insubordination, he was court-martialed and given five years’ suspension of pay and rank. Mitchell resigned from the army in February 1926 and retired, although he continued to promote the supremacy of air power.

Mitchum, Robert (1917–1997)

American actor. Raised in New York City, Mitchum worked at a number of odd jobs and joined a local theater group. He moved to Southern California and acted in a community theater before making his first film, a western, in 1943. The sleepy-eyed actor became the archetypal HOLLYWOOD tough guy in such movies as *The Big Steal* (1949), *The Racket* (1951), *Cape Fear* (1962), *Farewell, My Lovely* (1975) and *The Big Sleep* (1978), the latter two based on detective novels by Raymond CHANDLER. A versatile actor, he also undertook comedy roles in such motion pictures as *Two for the Seesaw* (1962) and dramatic parts in such films as David LEAN’s *Ryan’s Daughter* (1970). In the latter part of his career, Mitchum became well known for his performances in such 1980s television miniseries as *North and South*, *The Winds of War* and *War and Remembrance*.

Mitford sisters English authors and daughters—Jessica (1917–1996), Nancy (1904–73), Unity (1914–48), Diana (1910–2003), Pamela (1907–94) and Deborah (b. 1920)—of the second baron Redesdale and his wife, Sydney Bowles. Jessica and Nancy have achieved international recognition as authors. Jessica is known for her journalistic exposés and her books that investigate controversial political and social issues. Her most famous works include *The American Way of Death* (1963); an anthology of her articles titled *Poison Penmanship: The Gentle Art of Muckraking* (1979); and her autobiography, *Daughters and Rebels* (1960). Nancy gained acclaim as a novelist, biographer and essayist. Her witty, often satirical novels about the English upper class include *Love in a Cold Climate* (1949) and *The Blessing* (1959). Her major biogra-

phies include *The Sun King* (1966), about Louis XIV of France. As editor of a volume of essays, *Noblesse Oblige: An Inquiry into the Identifiable Characteristics of the English Aristocracy* (1956), she helped to introduce the classification of English locution into “U” (upper class) and “Non-U” (non-upper class). Of the remaining sisters, Unity gained notoriety as a follower and friend of Adolf HITLER, and Diana married the leader of the British fascists, Sir Oswald MOSLEY. Deborah became the duchess of Devonshire, and Pamela ran a large farm.

Mitterrand, François (1916–1996)

President of FRANCE (1981–95). Mitterrand entered politics in 1946 as socialist deputy for the Nièvre department. He was a left-wing candidate against President DE GAULLE in 1965. After disagreement among the French socialist parties in the late 1960s, he recovered his political authority and was accepted as leader of the left throughout the 1970s. Again unsuccessfully contesting the presidency in 1974, in 1981 he defeated Valéry GISCARD D’ESTAING with barely more than 50 percent of the vote. From 1981 to 1986 Mitterrand was backed by a socialist majority in the National Assembly; but, following the parliamentary elections of 1986, he had to share power with a Gaullist majority led by Jacques CHIRAC as prime minister. Mitterrand was re-elected president in 1988. Despite his socialist background, he proved a pragmatic leader, at times following an austerity program to deal with economic problems. A strong supporter of the EUROPEAN ECONOMIC COMMUNITY, Mitterrand allied France with the U.S.-led coalition in the 1991 war against Iraq, sending French combat forces to the region. Mitterrand was succeeded by Chirac as president in 1995 and died of cancer a year later amid damaging allegations that he had maintained friendly relations with an official in the Vichy regime during World War II who had been involved in the deportation of Jews to the death camps.

Mix, Tom (1880–1940) American motion picture actor. Mix claimed to have served in the Spanish-American War (1898), and became a cowboy in Oklahoma in 1906. He got involved in wild west shows, attracted the attention of movie makers and entered

movies in 1910. His expert horsemanship made him a HOLLYWOOD star, and during the 1920s he was the leading box office draw. He appeared in more than 100 films, and made his last movie, *The Miracle Rider*, in 1935. During the 1930s he toured the country with his own wild west show. He died in an auto accident in the Southwest in 1940. The Tom Mix Museum is located in Dewey, Oklahoma.

Miyazawa, Kiichi (1919–)

Japanese politician, prime minister (1991–93) and finance minister (1998–2001). Born in Fukuyama to a prominent political family in Imperial Japan, Miyazawa graduated from Tokyo University and then worked for the Japanese Finance Ministry during the U.S. occupation of Japan. In 1953 he ran as a candidate of Japan’s Liberal Democratic Party (LDP) for a seat on the House of Councilors, the Upper House of the Japanese parliament. After winning that election he served in that body until 1965. After a two-year absence from politics, Miyazawa was elected to the House of Representatives. He began to serve in several ministerial positions, including minister of international trade and industry (1970–71), foreign minister (1974–76), finance minister (1986–88) and deputy prime minister (1987–88). Because of his success in his various positions, he was elected the party leader of the LDP in 1991, which also resulted in his becoming prime minister. Miyazawa promptly encountered obstacles within the LDP when he attempted to reform the party’s structure and enlarge its support base. In the 1993 national elections these conflicts contributed to the LDP’s first defeat in 38 years, which prompted Miyazawa to resign as head of the LDP. In 1998 Miyazawa briefly returned to power when he joined a coalition government as minister of finance in an effort to stem the economic recession in which Japan had languished since 1997. Despite his efforts, Japan’s economy continued to remain stagnant, leading to his resignation from the Finance Ministry in 2001.

Mizoguchi, Kenji (1898–1956)

Japanese filmmaker. Born in Tokyo, Mizoguchi worked as a textile designer and newspaper illustrator before turning to filmmaking in the early 1920s. In addition to his distinguished body

of 85 films—he was acknowledged as Japan's chief filmmaker during the 1940s—he also headed Japan's vast union governing all film production personnel. His reputation in the West was confirmed with *The Life of Oharu*, which won the Grand Prize at the Venice Film Festival in 1952. His post-war films, made with scriptwriter Yoshikata Yoda, actress Kinuyo Tanaka and the Daiei Films Studio, constitute an enduring string of masterpieces. His major themes include the ill-treatment of women (*Saikaku ichidai onna* [*The life of Oharu*], 1952) and the samurai epic (*Shin Heike monogatari* [New tales of the Taira clan], 1955). His extraordinary camera technique eschews traditional montage for the choreography of the moving camera and the revelation of the deep-focus shot. The viewer is both involved and distanced at the same time. *Ugetsu* sums up Mizoguchi's artistic and commercial priorities. The potter, Genjuro, abjures his crude wares for the more "artistic" creations inspired by his love for a spirit, the Lady Wakasa; he achieves a compromise between his commercial and elitist concerns. A revival of Mizoguchi's work was led in the 1960s by French NOUVELLE VAGUE artists Jean-Luc GODARD and Jacques Rivette.

Mizrachi Right-wing political party in ISRAEL; partner of HAPOEL HAMIZRACHI in the National Religious Party.

Mladić, Ratko (1943–) Yugoslav and Bosnian Serb military commander, and alleged war criminal. After enrolling in the Yugoslav military-industrial school at Zemun, in 1958, Mladić joined the Yugoslav People's Army. In 1991 he rose to the rank of commander of the 9th Corps of the Yugoslav People's Army, stationed in the Yugoslav province of CROATIA. Soon thereafter, the provinces of Croatia and SLOVENIA declared their independence from the federal state. Mladić headed the abortive campaign to suppress the Croatian independence movement, inflicting serious casualties on the Croat forces and evicting thousands of Croat civilians from their homes. In 1992 Mladić was promoted to command the 80,000-man Yugoslav Army stationed in the Serbian Republic of Bosnia, a political entity created on April 6, 1992, to forestall the independence move-

ment in the former Yugoslav province of BOSNIA AND HERZEGOVINA. In 1995 Mladić led Bosnian Serb militia forces into Srebrenica and Zepa, two areas designated as safe zones by the United Nations, expelling 40,000 Bosnian Muslim refugees and killing as many as 8,000. These acts prompted the International Criminal Tribunal for the Former Yugoslavia (ICTY), located at The Hague, Netherlands, to indict Mladić and the political leader of the Serbian Republic of Bosnia, Radovan Karadžić, for war crimes. In 1996 the ICTY issued a warrant for Karadžić's and Mladić's arrest, prompting the latter's dismissal as the head of the military forces of the Serbian Republic of Bosnia. However, despite the warrant and \$5 million reward offered by the U.S. government for information leading to Mladić's arrest, the former military leader remains at large, though he has been occasionally spotted in both Serbia and Bosnia.

Mobutu Sese Seko (full name **Mobutu Sese Seko Kuku Ngbendu Wa Sa Banga; Joseph Desere Mobutu**) (1930–1997) President of ZAIRE (formerly the Republic of the Congo, 1965–97). Mobutu was educated at mission schools and later at the Institute of Journalism in Brussels. He served in the Congolese army (1956–58) and worked for the newspaper *L'Avenir* (1956–58). He joined Patrice LUMUMBA's nationalist movement in 1957 and was a delegate at the roundtable conference on the Congo in Brussels (1959–60). During the political crisis surrounding the struggle between Lumumba and Joseph KASAVUBU, Mobutu took power in the name of the army in September 1960 until parliament was recalled in August 1961. Col. Mobutu was promoted to major general in 1961, later rising to lieutenant general and commander in chief of the Congolese armed forces. He supported Moïse TSHOMBE's leadership bid in 1964; but after intervening in the ensuing conflict between Tshombe and Kasavubu, Mobutu took power himself, becoming president of the Republic of Congo in November 1965. He remained in power and dominated the public life of Zaire. Mobutu adopted his present name in January 1972 as part of his Africanization policy. He is thought to have amassed enormous wealth; his fortune has been

estimated at \$5 billion and includes substantial property in Zaire and Europe. He was chairman of the OAU in 1967. Mobutu was expelled from Zaire in May 1997 by rebel forces. He died later that year in Morocco.

Moch, Jules (1893–1985) French politician. A Socialist, Moch played a major role in French politics both before and after World War II. During his career he held such posts as minister of public works, minister of the interior and minister of defense. As interior minister, he took measures to crush a series of Communist-led strikes in 1947 and 1948. His actions led to the permanent decline of the French Communist Party. In October 1949 he was premier of FRANCE for three days.

modal jazz Popular jazz style originally appearing in the late 1950s. Instead of following the comparatively complex chordal patterns found in the standard tunes of Tin Pan Alley, Broadway and Hollywood that were typically favored by jazz players up to the 1950s, the modal approach employs a limited number of predetermined or modal scales based loosely on the classical modes (dorian, phrygian, etc.) first used by the ancient Greeks. Though providing the system's basic melodic and harmonic building blocks, modal scales are seldom deployed in their pure form; indeed, like the frequent alterations and harmonic "substitutions" found in the traditional diatonic approach, improvisers using modal strategies have added their own contrasting harmonic colors and ornamentations. The broad acceptance of the modal approach can be explained by its relative harmonic simplicity and its exotic and meditative overtones; indeed, some modal approaches are based on various Middle Eastern, Oriental and minor scales. Modality was introduced by pianist Bill EVANS and most significantly because of his widespread visibility, trumpeter Miles DAVIS; Evans's "Peace Piece" (1958), Davis's "All Blues" (1959) and saxophonist John COLTRANE's "Impressions" (1963) are prime examples of modal compositions found in the contemporary jazz repertory.

modernism General term to describe certain artistic and cultural

movements; used by critics since the mid 20th century. Modernism is a concept that eludes precise definition, most likely because it has been used by so many analysts in such disparate contexts that no precise definition can avoid being overly narrow. Fundamentally, modernism refers to the tendency of 20th-century art, literature and music to value innovation and reformulation over and above received cultural and aesthetic traditions. Artists whose work exemplifies the modernist approach include Pablo PICASSO in painting, James JOYCE in literature, Ezra POUND in poetry, Igor STRAVINSKY in music and Ludwig MIES VAN DER ROHE in architecture. Modernism is regarded by some critics as having reached an end in the 1950s and 1960s, at which time it was superseded by POSTMODERNISM. Other critics argue that modernism is better viewed as a pancultural phenomenon the essentials of which can be discerned in all eras of human civilization.

Modigliani, Amedeo (1884–1920) Italian painter. Born in Livorno, Modigliani settled in Paris in 1906 and remained there for the rest of his life. His early work was influenced by CUBISM, by the artists Pablo PICASSO and Paul Cézanne and by African sculpture. His first paintings were characterized by distorted figures and large areas of flat color. Under the influence of his friend, Constantin BRANCUSI, Modigliani produced a number of important sculptures, such as *Caryatid* (1914, Museum of Modern Art, New York City), notable for their stylized vertical forms. From 1915 on, he devoted himself to painting, and his mature work dates from that year until the year of his death. His haunting portraits and languorously sensual nudes are expressively elongated, graceful in line, glowing with rich color; their eyes slanted and almond-shaped, their faces individualized yet simplified and mask-like. Unknown to all but his fellow artists, poor and ill with tuberculosis, he died at the age of 35. His works are included in important museum collections throughout the world.

Modjeski, Ralph (1861–1940) American engineer, the primary designer for a number of major bridges. Modjeski's best-known work is the Delaware River

suspension bridge between Philadelphia and Camden, New Jersey—now known as the Benjamin Franklin Bridge. Modjeski worked as a partner in several firms over the years, including Modjeski & Carlidge, designers of a steel railroad bridge over the Ohio River at Metropolis, Illinois (1914–17); Modjeski & Masters; and Modjeski, Masters & Chase. The Philadelphia-Camden bridge (1922–26) is sometimes referred to as the first truly modern suspension bridge, with its two cables and simple, X-braced towers. Paul CRET worked with the engineers as a consulting architect. The nearby Walt Whitman Bridge (1957) is similar but has a conceptually more modern structure and was built by Modjeski & Masters, working together with the firm of Ammann & Whitney.

Mogadishu raid (1977) Rescue operation carried out at the airport in Mogadishu, Somalia. Terrorists associated with the West German BAADER-MEINHOF GROUP had hijacked a Lufthansa airliner bound from Majorca to Frankfurt on October 13 in an attempt to extort money and free 13 prisoners. The pilot of the airplane was killed by the hijackers before the raid. A total of 86 passengers and crew members were freed by a squad of 28 West German commandos. Lasting less than a minute, the operation resulted in the death of three hijackers and the wounding of a hijacker, a commando and a hostage. Three imprisoned Baader-Meinhof leaders, including Andreas Baader, committed suicide in a West German prison hours after the rescue.

Mohammed Nadir Shah (1880–1933) King of Afghanistan (1929–1933), he quickly abolished most of his predecessor's reforms and began his own by calling together the *loya jirga*—an Afghan “grand council” equivalent to a congress—in 1930 and forming a new constitution in 1931. Although this gave the appearance of shared rule, the government was still very much a royal oligarchy. Nadir Shah did, however, begin many improvements, such as road construction and a banking system, that helped to modernize Afghanistan. In 1933 Nadir Shah was assassinated, and his son Zahir assumed the throne.

Mohammad Reza Shah Pahlavi (1919–1980) Shah of IRAN (1941–79); son of Reza Shah, he succeeded to the throne after his father was deposed by British and Soviet pressure. His long rule was interrupted in 1953 after an uprising led by Prime Minister Muhammad MOSSADEQ. He was soon reinstated, with the secret participation of the U.S., and assumed even greater powers of control over the government and the people of Iran. In 1963 the shah began a campaign of modernization that included land reform, the emancipation of women and the promotion of public education. However, as revenue from the nation's oil industries swelled, the shah's government became increasingly corrupt and his own royal extravagance as an ostentatiously uniformed international jet-setter became more extreme. The country suffered from inflation and economic distress, and the shah was opposed both by Muslim fundamentalists and by liberals, all of whom resented the repressive enforcement methods of his brutal secret police, SAVAK. Demonstrations in 1978 led to the full-scale revolution that deposed the shah in 1979 and brought the Ayatollah Ruhollah KHOMEINI to power. Ill with cancer, the shah fled Iran and (after brief stays in Morocco, the Bahamas, Mexico and the U.S.) finally found asylum in Egypt, where he died soon after.

Mohieddin, Ahmed Fuad (1926–1984) Prime minister of EGYPT (1982–84). Mohieddin served as deputy prime minister under President Anwar el-SADAT and formed his first cabinet under President Hosni MUBARAK after Sadat's assassination. He was also secretary general of Egypt's ruling National Democratic Party.

Mohmand, Abdul Ahad (1959–) The first Afghan cosmonaut in space. Mohmand made his Soyuz TM-6 flight to the Mir space station (docking August 31, 1988) at a time when Soviet troops were withdrawing from his country. His weeklong stay was spent making photographic surveys of Afghanistan and beaming television broadcasts of good will. But the trip home on Soyuz TM-5 with Soviet veteran Vladimir Lyakhov nearly turned public relations into disaster, when guidance problems left the two cosmo-

nauts stranded for 23 hours orbiting in space, their food and oxygen supply dwindling. Ground efforts to save them paid off, and they landed safely on September 7. Both were given awards for their courage.

Moholy-Nagy, László (1895–1946) Hungarian painter, sculptor, designer and photographer. Beginning as a law student, Moholy-Nagy became increasingly interested in art. In Berlin, he became a cofounder of CONSTRUCTIVISM, creating geometric sculptures of metal and translucent plastic and experimenting with photograms. In 1921 he met members of the de STIJL group and the bold geometric paintings he created in the early 1920s reveal his affinities with that group and with the Russian disciples of SUPREMATISM. An extremely influential teacher, he was a professor at the BAUHAUS from 1923 to 1928, coediting the school's publications with Walter GROPIUS. Settling in the U.S., he taught at the Chicago Institute of Design from 1938 to 1946. Moholy-Nagy showed his enormous versatility in such other works as films, stage sets and industrial designs. His books include *Painting Photography Film* (1925, tr. 1969) and *Vision in Motion* (1947).

Moiseiwitsch, Benno (1890–1963) Concert pianist; born in Odessa, Russia. Moiseiwitsch studied at the Black Sea port's Imperial Music Academy and in Vienna with the renowned Theodore Leschetitzky. In 1908 he moved to England, where he settled; he became a British subject in 1937, never returning to Russia. Moiseiwitsch was one of the most traveled virtuosos of his day, giving many concerts throughout Britain; he made his American debut in 1919 and made many recordings during the 1920s, '30s and '40s. His repertoire included music by Beethoven, Schumann and Chopin, as well as such 20th-century composers as POULENC, PROKOFIEV, STRAVINSKY and his friend RACHMANINOFF. During WORLD WAR II Moiseiwitsch was a frequent guest of British prime minister Winston CHURCHILL.

Moiseyev, Igor Alexandrovich (1906–) Choreographer and founder of the State Folk Dance Ensemble. After graduating from the Choreographic School of the Bolshoi in 1924, from 1924 to 1939 Moiseyev worked

as a dancer and choreographer at the Bolshoi Theater. Fascinated by the folk dances of the Soviet republics and wishing to create a national folk ballet, he founded the State Folk Dance Ensemble. The ensemble has toured extensively both abroad and in the Soviet Union, and has won much popularity. Moiseyev's dances include *Three Fat Men* (1935) and *The Snow Storm* (1959). On his 100th birthday in 2006, he received the congratulations of admirers all over the world.

Mojahedin Popular name of the Sazman-e Mojahedin-e Khalq-e Iran (Opposition Organization of the Crusaders of the Iranian People), an Iranian leftist political group. It was called the Islamic Marxists by the shah, a name that is still commonly used. It was

formed in 1966 by a group of young militants and began military operations five years later. In violent opposition to the shah's regime, group members robbed banks, bombed offices, assassinated American military officials and attempted to hijack an Iranian airliner. The main opposition to the regime of Ayatollah KHOMEINI after it broke with him in 1981, the organization was brutally suppressed by his forces. By 1986 it had ceased to be an important factor in Iranian politics. Nonetheless, it remains the largest leftist group in Iran and continues underground activities in opposition to the ruling regime.

Moldova Republic of the Soviet Union (1940–91), and independent republic (1991–). Located in the north-east region of the Balkan Peninsula,

MOLDOVA

1924	The Moldovan autonomous Soviet Socialist Republic (SSR) is created as part of the Soviet Union, composed of territory east of Dniestr River.
1940	Romania returns Bessarabia, east of the Prut River, to the Soviet Union, which divides it between the Moldovan SSR and Ukraine, with the Trans-Dniestr region transferred from Ukraine to Moldova.
1941	The Moldovan SSR is occupied by Romania and its wartime ally, Germany.
1944	The Red Army reconquers Bessarabia.
1946–47	Famine becomes widespread as agriculture is collectivized; rich farmers and intellectuals are liquidated.
1950	Settlers from Russia and Ukraine immigrate as industries develop.
late 1980s	An upsurge in Moldovan nationalism is encouraged by the glasnost initiative of reformist Soviet leader Mikhail Gorbachev.
1989	Nationalist demonstrations occur in Kishinev (now Chisinau).
1990	Economic and political sovereignty is declared.
1991	The Republic of Moldova is proclaimed a sovereign state on August 27. Moldova joins the Commonwealth of Independent States.
1992	Moldova becomes a member of the United Nations. A cease-fire is declared in the Trans-Dniester dispute.
1994	Multiparty elections are won by former Communists.
1995	Moldova is admitted to the Council of Europe.
1998	The Communist Party of Moldova wins the most seats in parliament.
2001	A pro-Russian Communist Party wins 70 of the 101 seats in parliament and a Communist is elected president.
2006	Russia energy company cuts the gas supply off when Moldova refuses to pay twice the previous price. A compromise is soon worked out.

Moldova was under the control of ROMANIA from 1918 to 1940. During this time, it was referred to as BESSARABIA. However, in 1939 the Soviet Union signed the GERMAN-SOVIET NONAGGRESSION PACT with Nazi Germany, which secretly authorized the Soviet Union to absorb this territory. Following the Nazi invasion of Poland in September 1939, the Soviet government sent military forces into Bessarabia (Moldova) in June 1940 to ensure the region's transfer to Soviet control. On August 2, 1940, the area became the Moldovan Soviet Socialist Republic within the USSR. A year later, Romania reclaimed Moldavia when it joined in Hitler's invasion of the Soviet Union and liberated the region from Soviet control. It continued to rule Moldova until 1944, when Soviet forces

reentered the territory and reattached it to the USSR. In 1947 the Moldavian S.S.R. was reestablished as a result of the peace treaty between the Communist government of Romania and the USSR. Between 1947 and 1953, Soviet leader Joseph STALIN sought to reduce the ethnic ties between Moldova and Romania by resettling a large portion of Moldova's population throughout the USSR, and by introducing many ethnic Russians to take their place. Additionally, the Soviet Union made efforts to incorporate Moldova into its economic infrastructure by building industrial centers throughout the region, which in turn provided jobs for the recently arrived Russians. The Soviets also required Moldavian citizens to use the Cyrillic alphabet and the Russian lan-

guage rather than the Latin alphabet and the Romanian language that had been previously used.

When Soviet leader Mikhail Gorbachev introduced the political reforms termed GLASNOST (or "openness") into the Soviet Union in the second half of the 1980s, the Popular Front of Moldova emerged to celebrate the unique history and heritage of the province. In November 1989 the followers of the Popular Front of Moldova engineered the replacement of Semyon Grossu, the first secretary of the Communist Party of Moldavia with the reformist Petru Lucinschi. In June 1990 the Moldavian Supreme Soviet declared the sovereignty of its own constitution above that of the USSR stipulating that Moldavian law superseded Soviet law.

The Moldavian legislature subsequently ended the Communist Party's monopoly on political power and began introducing economic reforms that sought to create a free-market economy. After the defeat of the reactionary coup against Gorbachev in August 1991 that the Moldavian Supreme Soviet declared the province's independence on August 27, 1991, and assumed full control of military and political institutions of the renamed state of Moldova. Other SSRs within the Soviet Union soon followed Moldova's example, which led to the Soviet Union's disintegration on December 25, 1991.

Since independence, Moldova has maintained relations with the former Soviet republics by joining the COMMONWEALTH OF INDEPENDENT STATES (CIS), an organization that has sought to encourage the preservation of strong economic, military and political ties among the former SSRs. Moldova has also sought integration within the political and economic framework of Western Europe. By 1994 it had gained admission into such European-oriented organizations as the European Bank for Reconstruction and Development, the Organization for Security and Cooperation in Europe, and (in conjunction with NATO members) the Partnership for Peace Program. Along with its efforts to strengthen relations with CIS members with its initiatives toward Europe, Moldova ended the separatist agitation in the self-proclaimed DNIESTER REPUBLIC, a short-lived ethnic Russian entity between Moldova and Ukraine. With the start of the 21st century the Communist Party was swept back into power, based on promises to help improve the living standards of one of Europe's poorest nations.

Moley, Raymond (1886–1975) Adviser to President Franklin D. ROOSEVELT and the leader of Roosevelt's BRAIN TRUST. It was Moley who coined the term NEW DEAL to describe Roosevelt's sweeping social reform program for dealing with the GREAT DEPRESSION. Moley broke with the President in 1936 when he could not reconcile himself with what he considered a radical trend in the New Deal.

Molina, Mario (1943–) Mexican-American chemist and winner of the

1995 Nobel Prize in chemistry. Born in Mexico City, Molina enrolled in the chemical engineering program at the National University of Mexico. In 1972 Molina received his Ph.D. from the University of California at Berkeley and remained at the institution to study the effects of certain industrial chemicals known as chlorofluorocarbons (CFCs) on the atmosphere and the environment. A year later, his research on CFCs, in conjunction with that of F. Sherwood Rowland, helped develop the "CFC-ozone depletion theory," which held that CFCs released into the atmosphere as a by-product of industrial production rapidly decomposed, producing chlorine atoms that degraded the ozone layer's integrity.

Teaching at the University of California at Irvine, Molina continued to conduct research on the effect on the ozone layer of compounds released into the upper atmosphere. In 1982 he left the University of California at Irvine and joined the Molecular Physics and Chemistry division of the Jet Propulsion Laboratory (JPL), where he focused his CFCs research on the chlorine-ozone reactions that occurred in polar stratospheric clouds. In 1989 he left the JPL to accept a position at the Massachusetts Institute of Technology (MIT), where he continued his research on the impact of chemical compounds on the upper levels of the Earth's atmosphere. In 1995 he, Paul Crutzen and F. Sherwood Rowland shared the Nobel Prize in chemistry for their research on the influence CFCs have on the degradation of the ozone layer.

Mollet, Guy (1905–1975) French statesman, premier (1956–57). A teacher and trade union leader, he took an active part in the RESISTANCE during the German occupation of France in WORLD WAR II. He was elected to the Chamber of Deputies in 1945 and served as secretary-general of the French Socialist Party (1946–69). During the Léon BLUM government, he was minister of state (1946–47) and vice premier (1951). While premier, he supported the unity of western Europe, sent French troops into Algeria to suppress a revolt (1956) and joined with Great Britain and Israel in invading Egypt during the SUEZ CRISIS (1956). Mollet subsequently served as minister of state under Charles DE GAULLE (1958–59).

Molotov, Vyacheslav Mikhailovich (1890–1986) Soviet communist official, a close aide of Joseph STALIN and a member of the Soviet leadership from 1921 to 1957. A nephew of composer Alexander SCRIABIN, he took the name Molotov ("The hammer") as a young revolutionary. As premier (1931–41), Molotov oversaw industrial and agricultural development. He helped implement Stalin's policy of forced COLLECTIVIZATION of farms, which led to famine in the UKRAINE. He also played a key role in the GREAT PURGE. As foreign minister (1939–49), he negotiated the GERMAN-SOVIET NONAGGRESSION PACT with Joachim von RIBBENTROP (August 1939). After the German invasion of the USSR in 1941, Molotov helped strengthen the Soviet alliance with the West. An opponent of Nikita KHRUSHCHEV, Molotov was expelled from the Politburo in 1957 after his failed attempt to oust Khrushchev. He was expelled from the COMMUNIST PARTY in 1962 but reinstated in 1984.

Molucca Islands Small island chain in the Pacific Ocean and territory of the Dutch Empire (1600s–1949) and INDONESIA (1949–). From the 17th century until 1949, these islands were administered as a separate imperial possession of the Netherlands. In that year, the Dutch government turned over control of this territory to the newly independent state of Indonesia, another former Dutch imperial possession in Southeast Asia. Originally the Molucca Islands were to be part of a federal governing structure in Indonesia, in which the indigenous peoples of the hundreds of islands comprising the country had a notable degree of autonomy. However, in 1950, Indonesian president Achmed Sukarno abandoned the federal structure in favor of a strongly centralized government that greatly reduced the autonomy in the Molucca Islands. In response, a secessionist movement among the predominantly Christian population in the southern half of the islands, called the Republic of the South Moluccas (RMS), began to stage sporadic attacks on the Indonesian central authority. This low-intensity counterinsurgency did not adversely affect the amicable relationship between Christians and Muslims in the southern islands. But these relatively subdued assaults inten-

sified in January 1999 when the southern region—in which Muslims and Christians had achieved rough numerical parity—exploded in a spate of violence between members of the two religions. The violence was fueled by both Muslim resentment at the efforts of the largely Christian RMS to gain foreign support for its cause and Christian resentment at the increased presence of Muslims in local positions of power. The violence quickly spread to the northern half of the island chain through the use of guerrilla tactics by both sides. In response to the efforts of the RMS to protect Christians and attack Muslims in the Moluccas, Islamic extremists formed the Laskar Jihad, an organization dedicated to using similar terrorist tactics to eradicate the RMS's efforts to establish an independent state, as militants in EAST TIMOR had done in 1999. The clashes between these two extremist groups have led to over 6,000 deaths since 1999.

Molyneux, Edward (1891–1974)

London-born Irish fashion designer. His career was based in Paris, where he catered to an elegant society of celebrities of the social and theatrical worlds. Molyneux was an art student in London when his fashion sketches were seen by Lady Duff Gordon (Lucile, as she was known in the world of fashion), who hired him as an artist and then as a designer for her Paris shop. After service in World War I, he opened his own house of fashion in Paris in 1919, beginning a long career of supplying simple elegance to such figures as Gertude LAWRENCE, whose Molyneux costumes in *Private Lives* made his work widely known and admired. He closed his firm in 1950 when he faced declining health, but, after a period of retirement in Jamaica, he recovered sufficiently to introduce a ready-to-wear line (1965) mass-produced under the name *Studio Molyneux*. His fame rests mainly on his simple, elegant designs of the 1930s.

Monaco, Principality of Tiny principality on the Mediterranean Sea coast of southeastern France in the hills fronting the Côte d'Azur; it is the second smallest independent state in the world. Princely absolutism gave way to constitutional rule in 1911. France recognized Monaco's sovereignty in 1918 and 1919, subject to its acting "in com-

plete conformity" with French interests. Occupied by the Italians (1940) and then by the Germans (1943), post-war Monaco reestablished itself as a major tourist center and, by virtue of economic union with France, became an integral part of the EUROPEAN COMMUNITY in the 1950s. Prince Rainier III succeeded to the throne in 1949 and on April 19, 1956, married U.S. film star GRACE Kelly.

In the face of growing pressure for increased powers from the elected National Council (in particular, following the collapse in 1955 of Monaco's leading bank, the Société Monegasque de Banque) Prince Rainier asserted his sovereign powers in 1959 by suspending the council. However, a revised constitution promulgated in 1962 guaranteed representative government and renounced royal divine right. Tensions with France over the principality's role as a tax haven were eased in 1963 by a convention placing certain Monaco-based companies under French fiscal law. Since 1963 the pro-Rainier National and Democratic Union group has dominated the National Council and won all 18 seats in the National Council in elections in 1978, 1983 and 1988. Monaco joined the UN in 1993. Prince Rainier died in 2005 and was succeeded by his son Albert, who became Prince Albert II.

Mondale, Walter F. (1928–) Vice president of the UNITED STATES (1977–81). A graduate of the University of Minnesota (1951) and of Minnesota Law School (1956), Mondale served as attorney general of Minnesota from 1960 to 1964. Active in the Democratic–Farmer–Labor Party of Minnesota, he gained national attention when he supported the cause of free legal counsel for indigent defendants in the case of *GIDEON v. WAINWRIGHT* (1963). When Mondale's mentor Hubert H. HUMPHREY vacated his U.S. Senate seat to run for vice president in 1964, Mondale was appointed as his replacement. Mondale was elected on his own in 1972. In 1976 Jimmy CARTER chose Mondale as the Democratic nominee for vice president. Mondale served as vice president of the U.S. from 1977 to 1981. The Democratic candidate for president in 1984, Mondale was the first candidate of a major party to choose a woman (Geraldine FERRARO) as his running mate. Advocating traditional liberal De-

mocratic policies, they lost in the landslide reelection of President Ronald REAGAN and Vice President George BUSH. In 1993 Mondale was appointed to a four-year term as the U.S. ambassador to Japan by President Bill Clinton.

Mondrian, Piet (1872–1944) Dutch painter. One of the foremost geometric modernists, he was born in Amersfoort, the Netherlands, and studied at the Amsterdam Academy. His early work consisted of naturalistic landscapes. He became aware of avant-garde movements in art around 1908 and traveled to Paris in 1910, discovering the Cubist works of PICASSO and BRAQUE. In Paris (1912–14), Mondrian struggled with his own interpretation of Cubism and, returning to Holland, began to create the rigorous geometrical work for which he is famous. In 1917 he and a number of other Dutch artists founded *DE STIJL* magazine and, with it, the movement that bears its name. Three years later, Mondrian explained his theories in the book *Neoplasticism*. The artist sought a plastic perfection through the use of intersecting straight lines meeting in right angles on vertical and horizontal axes and through a limitation of his palette to the primary colors of red, yellow and blue—along with black, white and gray. Through these purposely austere abstract means, he sought to express universal truths and to indicate the spiritual harmony of humankind and nature. Mondrian emigrated to the U.S. in 1940 and settled in New York City. Some of his finest compositions, such as *Broadway Boogie Woogie* (1942–45), can be found in New York's Museum of Modern Art, as well as in the Gemeente Museum, The Hague, and the Art Institute of Chicago. (See also MODERNISM.)

Monet, Claude (1840–1926) French painter. The paragon of Impressionism and a founder of the movement, Monet was born in Paris and spent his youth in Le Havre. There he struck up a friendship with the painter Eugène Boudin, who encouraged the young artist to paint in the open air—a practice that was central to his later style. Moving to Paris in 1859, Monet studied at the Académie Suisse and, after two years in the army, returned to the city to study painting. Living in appalling poverty, he persevered as a painter. At the same time, he became friendly with such artists as Camille Pissarro, Pierre Renoir,

Paul Cézanne and Alfred Sisley. In the late 1860s Monet began to paint landscapes that reflected what were to be his lifelong concerns: the changing effects of light and color caused by variations in time and season. Studying the laws of optics, he developed a unique manner of capturing the phenomena of light as it is expressed in the forms, textures and hues of the landscape by breaking it down into its color components.

In 1872 Monet painted *Impression, Sunrise* (Musée Marmotton, Paris), a work whose title was soon assumed by the Impressionist movement. From 1872 to 1875, he painted river and garden scenes in which the forms of objects begin to dissolve in a shimmer of color and a flurry of brushstrokes. From 1876 on, he concentrated on a number of single subjects, such as the Parisian Gare

Saint-Lazare. When his financial fortunes improved in the 1880s, Monet set about traveling through France, again painting the same subject in a series of views. These luminous, semi-abstract works are the culmination of his nature style. They include poplars, haystacks, the facade of Rouen Cathedral (1892–94) and the celebrated waterlilies (1899, 1904–25), which are lyrical masterpieces painted in his garden at Giverny. Among these *Nymphs* is the monumental triptych (c. 1920) in the Museum of Modern Art, New York City.

monetarism A macroeconomic theory that arose in the 1960s; it views the money supply as central to understanding price levels and the economy's performance. Monetarists argue that although monetary policy cannot influ-

ence either output or employment in the long run, it does determine price levels, and accordingly affects both output and employment in the short-term. Accordingly, monetary policy has a direct effect on the stability of the economy. Monetarism was a reaction to Keynesian economics, which downplayed the role of the money supply in explaining the operation of the economy (see John Maynard KEYNES). In the U.S., economist Milton FRIEDMAN was a leading monetarist. Monetarist principles were followed by the FEDERAL RESERVE under Paul Volcker and Alan Greenspan during the REAGAN administration in the U.S. They were also applied by Margaret THATCHER's government in the U.K.

Mongolia (Mongolian People's Republic) Mongolia comprises an area of

MONGOLIA

1911	Independence is proclaimed by Mongolian nationalists after the Chinese "republican revolution"; czarist Russia helps Mongolia to secure autonomy, under a traditionalist Buddhist monarchy in the form of a reincarnated lama, or "Living Buddha."
1919	Chinese sovereignty is reasserted.
1921	Chinese rule is overthrown with Soviet help.
1924	A People's Republic is proclaimed after the death of the Living Buddha, and the monarchy is abolished; a defeudalization program is launched, entailing collectivization of agriculture and suppression of lama Buddhism.
1932	An armed antigovernment uprising is suppressed with Soviet assistance; 100,000 are killed in political purges.
1957	Railway line from Ulaanbaatar to Beijing is opened.
1960	New constitution is promulgated.
1961	Mongolia is admitted to the United Nations.
1962	Frontier agreement is concluded between Mongolia and China.
1987	Mongolia and the United States establish diplomatic relations.
1990	The ruling Communist Party gives up power after peaceful demonstrations.
1992	Mongolia adopts a more democratic and market economy-oriented constitution.
1993	First presidential elections in 50 years take place.
1996	The Democratic Union Coalition wins parliamentary elections, marking the first time in 75 years that the Communists have not held power.
2000	Election of the former communist Mongolian Peoples Revolutionary Party (MPRP).
2005–2006	Both MPRP candidates for president and prime minister are elected.

604,090 square miles in north-central Asia. With the support of czarist Russia Mongolia broke from Chinese control and declared itself an independent monarchy in 1911, naming Jebtsun Damba Khutukhtu, the Living Buddha, of Urga as head of state. China occupied Mongolia (1919–20) after the Russian Revolution, but the Mongolians again declared independence in 1921, gaining military support from the newly formed USSR. The death of the Living Buddha brought a new Soviet-inspired constitution and the establishment of the Mongolian People's Republic (1924). The movement toward a socialist state brought slow collectivization of the economy (1928–1950s) and political purges (1922, 1939). During the presidency of Jambyn Batmonh Mongolia slowly initiated some reforms, paralleling those taking place in the Soviet Union. In addition, peaceful demonstrations occurred and new political organizations formed (1989–90). These demonstrations, together with the dissolution of the Soviet Union, resulted in the 1992 reform of Mongolia's constitution to allow for free multiparty elections. In 1993 the country held its first presidential election, and in 1996 the first non-Communist government in 75 years came to power. In 2005–06 two members of the former communist Mongolian People's Revolutionary Party were elected president and prime minister.

Monk, Thelonius Sphere (1917–1982) American jazz pianist and composer. His original style—dissonant and rhythmically innovative—created a mu-

sical bridge between 1930s SWING and the BEBOP style of the 1940s. He became popular in the 1950 when he began recording his compositions, including "Round Midnight," "Ruby My Dear," "Well, You Needn't" and "Blue Monk." After 1957 he appeared regularly in New York nightclubs.

Monnet, Jean (1888–1979) French statesman and financier. At the age of 31, Monnet was assistant secretary general of the LEAGUE OF NATIONS. During WORLD WAR II he conceived the idea for LEND-LEASE. The Monnet Plan, which he authored in 1947, led to France's postwar economic recovery through participation in the MARSHALL PLAN. An architect of the EUROPEAN COAL AND STEEL COMMUNITY (1952), he also played a major role in the formation of the EUROPEAN ECONOMIC COMMUNITY (EEC, 1957), and later worked to establish a European monetary reserve fund with a single European currency. Monnet never sought or held elective office, but was a behind-the-scenes, moving force in European political life for much of the 20th century.

Monod, Jacques Lucien (1910–1976) French biochemist. Monod graduated from the University of Paris in 1931 and became assistant professor of zoology there in 1934, having spent the years immediately following his graduation investigating the origin of life. After World War II, in which he served in the RESISTANCE, he joined the Pasteur Institute, becoming head of the cellular biochemistry department in 1953. In 1958 Monod began working with François

Jacob and Arthur Pardee on the regulation of enzyme synthesis in mutant bacteria. This work led to the formulation, by Monod and Jacob, of a theory explaining gene action and, particularly, how genes are switched on and off as necessary. In 1960 they introduced the term "operon" for a closely linked group of genes, each of which controls a different step in a given biochemical pathway. The following year they postulated the existence of a molecule, messenger RNA, that carries the genetic information necessary for protein synthesis from the operon to the ribosomes, where proteins are made. For this work Monod and Jacob were awarded the 1965 NOBEL PRIZE in physiology or medicine, which they shared with André Lwoff, who was also working on bacterial genetics. In 1971 Monod became director of the Pasteur Institute and in the same year published the best seller *Chance and Necessity*, in which he argued that life arose by chance and progressed to its present level as a necessary consequence of the pressures exerted by natural selection.

Monroe, Harriet (1860–1936) American poetry editor and publisher. One of the most influential figures in the publication and development of modern poetry, she began as an art and drama critic for various CHICAGO newspapers and also wrote her own verse. Her greatest fame came as editor of *Poetry: A Magazine of Verse*, which she founded in 1912. Its contributors included almost every major American poet of the period, including T. S. ELIOT, Marianne MOORE and Ezra POUND, whose reputations were largely made through appearance in the magazine. Monroe particularly favored IMAGISM but included a wide variety of work in the magazine. With Alice Henderson she edited *New Poetry: An Anthology of Twentieth-Century Verse in English* (1917, rev. 1923, 1932). *Poetry* continues today with substantial but lessened influence. (See also MODERNISM.)

Monroe, Marilyn (Norma Jean Mortenson) (1926–1962) American motion picture actress who became a sex symbol in the 1950s. After surviving abuse and neglect as a child, an unhappy first marriage (she was divorced in 1945) and tedious work in a wartime defense plant, she was discovered by

International sex symbol Marilyn Monroe, in a scene from *THE SEVEN YEAR ITCH*, 1955 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

pin-up photographers and HOLLYWOOD scouts. She changed her name and was in and out of the Fox and Columbia studios in a succession of bit parts. Finally, Fox signed her to a long-term contract in 1950, and by the time she married baseball hero Joe DIMAGGIO in 1954, she had made a thriller, *Niagara* (1952), a musical, *Gentlemen Prefer Blondes* (1953), and an adventure story, *River of No Return* (1954). At the height of her fame, when she had become the most sensational “sex goddess” in the movies, Monroe turned her back on Hollywood and, in a much publicized move, went to New York to study the famous “Method” with Lee and Paula STRASBERG. Her subsequent work in *Bus Stop* (1956), *Some Like It Hot* (1959) and her last film (scripted by playwright Arthur MILLER, her third husband), *The Misfits* (1961), showed greater range and subtlety. However, illness, depression, drug abuse and psychiatric problems cut short her promising career. She died in 1962 while filming *Something's Got to Give*, the victim of an apparent overdose of barbiturates.

Monroe, Marion (1898–1983) American child psychologist. With Dr. WILLIAM GRAY, she was coauthor of the famous Dick and Jane series of school books that from the 1940s to the early

1970s introduced millions of American schoolchildren to reading. The books fell out of favor with educators in the late 1960s and early 1970s because of their perceived racist and sexist attitudes and stereotypes.

Montagu, Ewen (1901–1985) British espionage agent. Montagu led the British counterespionage unit responsible for a WORLD WAR II hoax to deceive the Nazis over landings in the Mediterranean. Code named Operation Mincemeat, the hoax (1943) involved floating ashore on the Spanish coast what seemed to be the dead body of a British officer. The body bore faked documents, indicating that Sardinia and GREECE were to be the targets for the next main Allied effort in the Mediterranean, providing cover for the real invasion in Sicily. The operation remained secret until 1953, when Montagu wrote about it in the book *The Man Who Never Was*. That account of the operation sold more than two million copies and was made into a film in 1956.

Montale, Eugenio (1896–1981) Italian poet, critic, editor, translator and journalist. Although Montale produced only five volumes of poetry in 50 years, his citation for the 1975 NOBEL PRIZE for literature declared him to be “one of the most important poets of the contemporary West.” He supported his poetry as an editor, translator, literary journalist and music critic. In the 1930s he was forced to resign his position as curator of a rare book collection because he refused to join the Fascist Party (see FASCISM). In 1947 he began a long association with the Milan daily newspaper *Corriere della sera*. His most important works are *Ossi di seppia* (1925, Cuttlefish bones), *Le occasioni* (1939, The occasions), *La bufera e altro* (1956, The storm and other things). His poetry is marked by profound pessimism; it is highly subjective and symbolic. Along with UNGARETTI and QUASIMODO, he is associated with the movement known as **Hermeticism**. He is also a distinguished translator of HARDY, Dickinson, Melville, T. S. ELIOT and Eugene O'NEILL.

Montana, Joe (1956–) American football player, considered by many sports aficionados to be the greatest

quarterback of all time. Montana quarterbacked the San Francisco 49ers during their domination of the National Football League (NFL)—and the Super Bowl—in the 1980s. Winner of four Super Bowls, in 1982, 1985, 1989 and 1990, Montana was named most valuable player of the championship game three times. He holds the Super Bowl career passing record with 1,142 yards and 83 completions, as well as the single game mark of 357 yards. After his trade to the Kansas City Chiefs, Montana started at quarterback on that team for the 1993 and 1994 seasons. Although he led the Chiefs to the NFL playoffs in both years, including the AFC Championship game in January 1994, Montana failed to win a fifth Super Bowl title in his new home. At the end of his second season in Kansas City, Montana announced his retirement from professional football.

Montand, Yves (Ivo Livi) (1921–1991) Italian-born French actor and singer. Montand began his career performing in vaudeville and in the Paris music halls before gaining fame in Marcel Carne's film *Les Portes de la Nuit* (1946). International acclaim and stardom came with his performance in *Le Salaire de la Peur* (1953). He worked with several great directors, but his most important collaboration was with Costa-Gavras in the films *Z* (1968), *L'Aveu* (1970) and *Etat de Siège* (1973). He made a few Hollywood films, most notably Vincente Minnelli's *On a Clear Day You Can See Forever* (1970) with Barbra STREISAND.

Montecassino See CASSINO.

Montenegro Independent kingdom (1910–15), province of YUGOSLAVIA (1915–92), and constituent member of the Federal Republic of Yugoslavia (1992–2003). In 1910 after having established a liberal parliamentary constitution five years earlier, Prince Nicholas I Petrović became the first king of Montenegro. During the 1912–13 Balkan Wars, Montenegro allied with SERBIA, GREECE and BULGARIA, to expel the OTTOMAN EMPIRE from the Balkan Peninsula. Upon the outbreak of WORLD WAR I (1914–19), Montenegro supported SERBIA and RUSSIA in their war against the Central Powers. When Austria-Hungary and Germany

occupied Serbia and Montenegro in 1915, several bands of Montenegrin partisans united with similar groups of Serbians, Croats and Slovenes on the Greek island of Corfu. There they declared the union of their peoples under a single kingdom. After the victory of the Allies in 1918, this pact led to the establishment of the Kingdom of the Serbs, Croats, and Slovenes (later renamed Yugoslavia), of which Montenegro became and remained a province. On the establishment of the Communist regime at the end of WORLD WAR II, Montenegro became one of Yugoslavia's six constituent republics.

In 1992 following the declarations of independence by four Yugoslav republics—BOSNIA AND HERZEGOVINA, CROATIA, MACEDONIA, and SLOVENIA—the provincial government of Montenegro held a referendum to determine whether its citizens wished to remain united with the Serbian remnant of Yugoslavia, or whether they wished to declare independence. More than 66% chose to support a continued union with Serbia. Following this vote, Serbia and Montenegro formed a new political entity on April 27, 1992, the Federal Republic of Yugoslavia, in which both states would elect their own presidents and parliaments in addition to voting for leaders and presidential candidates for the federal government. However, Montenegro's amicable relationship with Serbia was subsequently strained, both by continuing developments in the Balkans and by changes in Montenegrin leadership. In 1997 Milo Djukanović, a businessman-turned-politician, won election as president of Montenegro, unseating Momir Bulatović, who had grown unpopular because of his continued support of the policies of SLOBODAN MILOŠEVIĆ designed to repress ethnic Albanians in the Serbian province of Kosovo and non-Serbs in the portion of Bosnia under Serb control. In 1998 the crackdown by Serbian and Yugoslav military forces on these ethnic Albanians resulted in intensified NATO-sponsored sanctions on Montenegro. When Serbia expanded its operations in Kosovo, prompting a series of NATO air-strikes to deter Milošević, thousands of Kosovo Albanians fled their homes and sought sanctuary in Montenegro. In 2001 Filip Vujanović was elected president of Montenegro. In 2003 the Federal Republic of Yugoslavia was officially

restructured and renamed Serbia and Montenegro and a new constitution was approved. Svetozar Marović was elected president of Serbia and Montenegro. A referendum on May 21, 2006, determined that the union of the two nations would be dissolved, and Montenegro declared its independence on June 3, 2006. Montenegro sided with NATO against Milošević, who was subsequently turned over to the International War Crimes Tribunal at the Hague, where he died.

Montessori, Maria (1870–1952) Italian educator. The first Italian woman to receive an M.D., Montessori graduated from the University of Rome in 1894. In 1907 she became head of the new Casa dei Bambini in the Roman slums of San Lorenzo, and here Montessori put to work her revolutionary educational theories, which stressed light discipline, spontaneity and child-directed learning. In 1909 Montessori began to train others in her techniques, which became known as the Montessori Method, and in 1911, the first American Montessori school opened, in Tarrytown, New York. Soon similar institutions were established through the U.S. and Europe. Although Montessori was a controversial figure, many of her educational concepts have been incorporated into traditional schools throughout the world.

Monteux, Pierre (1875–1964) The foremost French conductor of his generation. He was trained at the Paris Conservatory and became conductor in Paris of Serge DIAGHILEV'S BALLETS RUSSES (1912). During the next few years he conducted world premieres of some of the most important new music of this century, including Igor STRAVINSKY'S *Petrushka*, *Le Sacre du Printemps* and *Rossignol*; Maurice RAVEL'S *Daphnis et Chloe* and Claude DEBUSSY'S *Jeux*. Subsequently, he held numerous appointments in the U.S., including conducting at the Metropolitan Opera (1917–19), the Boston Symphony Orchestra (1917–19) and the San Francisco Symphony (1936–52). Rivaling Arturo TOSCANINI and Pablo CASALS in longevity, Monteux became music director of the London Symphony at the age of 86. Few conductors have been as universally beloved. Dapper and elegant, he was a superb technician and

the most amiable of men. Critic Virgil THOMSON described his famous transparent sound as possessing "perfect balance" and "translucency." A model of tact, restraint and economy, Monteux insisted a conductor must not "overconduct" or make "unnecessary noises or gestures"; certainly he must never "worry" or "annoy" his players. A protean figure, he led an all-embracing life in opera, ballet and symphony.

Montgomery, Bernard Law (first Viscount Montgomery of Alamein) (1887–1976) British field marshal. Educated at Sandhurst, Montgomery was commissioned in the Royal Warwickshire Regiment in 1908 and served with distinction on the western front during most of WORLD WAR I. In the years between the world wars, he held various staff and command posts in Britain and India. Probably the most important and popular British military commander in WORLD WAR II, "Monty" led an Expeditionary Force division in France from 1939 to 1940, and was involved in the evacuation of DUNKIRK. He was subsequently in charge of the commando raid at DIEPPE (1942) before being posted soon after to North Africa as commander of the Eighth Army. His military fame was assured there, as he commanded his troops in the spectacular victory over ROMMEL'S Afrika Korps at EL ALAMEIN (1942) and pursued the retreating German forces across Libya and Tunisia into Sicily and southern Italy. Commanding the Allied ground forces in the invasion of NORMANDY, Montgomery and his troops swept through France and into Germany during 1944

British field marshal Bernard Law Montgomery
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS
DIVISION)

and 1945. His successes, however, were somewhat marred by his strategic disagreements with the Allied supreme commander Dwight D. EISENHOWER. Promoted to the rank of field marshal in 1944, he was created a viscount in 1946. In postwar Europe, Montgomery was commander of Great Britain's occupation forces in Germany (1945–46), chief of the British general staff (1946–48) and deputy supreme commander of NATO (1951–58). He was the author of a number of books on military history and published *Memoirs* in 1958.

Montgomery bus boycott Struggle to end SEGREGATION on the public buses of Montgomery, Alabama. It took place from December 1955 until December 1956 and began when Rosa Parks, a black seamstress, was ordered to give up her seat on a bus to a white person. She refused and was arrested and jailed. Her action led to a boycott of the bus system by the black citizens of Montgomery. The boycott, led by the Rev. Martin Luther KING Jr., disrupted business as usual in the city. After a protracted struggle, it resulted in the desegregation of public transportation in Montgomery. This landmark event was one of the earliest victories of the CIVIL RIGHTS movement in the South.

Montherlant, Henri(-Marie-Joseph-Milon) de (1896–1972) French novelist, playwright and essayist. Born in Paris, by the time of World War II de Montherlant had become one of France's leading men of letters. He won the 1934 Grand Prix for *The Bachelors*. His 17 plays won popular acclaim and became part of the standard French theatrical repertoire. In 1960 he was elected to the French Academy. Like the American writer Ernest HEMINGWAY, early in his life de Montherlant was an active sportsman (and a bullfighter), and his works celebrate physical courage. Also like Hemingway, he committed suicide by shooting himself, apparently out of despondency over his failing health.

Montreux International Jazz Festival The Montreux International Jazz Festival, established in 1967, continues to be one of jazzdom's most broad-based and significant forums. Presided over until the late 1980s by Claude Nobs, the jazzfest has typically pre-

sented a wide variety of jazz stylists over a 17-day period in July of each year. In the mid-1970s, the inclusion of popular music groups led to the deletion of "Jazz" in the event's title; by the late 1970s, "Jazz" was back in the festival's title and its center ring. In addition to featuring internationally known jazz groups playing everything from BEBOP to fusion, and big band to dixieland, the festival has spotlighted student groups, many from the U.S. It has enjoyed sponsorship from a variety of recording companies, a productive relationship that through the years has yielded a number of excellent recordings, especially those issued by the Pablo and Atlantic labels. There is a co-operative arrangement with a "sister" event in the U.S., the Montreux-Detroit Kool Jazz Festival.

Montserrat A Caribbean island with a total land area of 39 square miles; it is a United Kingdom dependent territory. Between 1871 and 1956 Montserrat was administered as part of Britain's Federal Colony of the Leeward Islands, and between 1958 and 1962 it participated in the Federation of the West Indies. In 1960 a new constitution was granted, providing greater autonomy for the island. In 1978 the ruling Progressive Democratic Party (PDP) was defeated in elections by the opposition People's Liberation Movement (PLM), which won all seven seats in the Legislative Council. John Osborne, the leader of the PLM, became chief minister. The PLM won elections in 1983, and Osborne stated that he would be in favor of eventual independence for the territory. In June 1984 a state of emergency was declared after a strike by public service employees disrupted services. An early general election was held in August 1987 and again won by the PLM, which defeated the PDP and the more recent National Development Party. As a result of a severe volcanic eruption that began on July 18, 1995, two-thirds of Montserrat's population was evacuated and much of the island's surface was destroyed. By July 2004 only a few of those who left the island in 1995 had returned.

Monty Python's Flying Circus British comedy troupe and television show of the same name, noted for its bizarre sense of humor, ranging from

surreal farce to sophisticated satire. The troupe was formed by a group of students at Cambridge University in the early 1960s as an amateur stage entertainment revue; the members were **Graham Chapman**, **John Cleese**, **Eric Idle**, **Terry Jones**, **Michael Palin** and **Terry Gilliam** (the only American-born member). They turned professional, and the show was broadcast by the BRITISH BROADCASTING CORPORATION (BBC) from 1969 to 1974. It was also repeated on public television in the U.S. and was a huge hit in both countries. The group also made several irreverent but good-natured films, including *Monty Python and the Holy Grail* (1978) and *The Life of Brian* (1979). Several of the members—notably Cleese, Idle and Palin—went on to successful careers in other films and television shows. Gilliam launched a spectacular career in the movies, directing *Time Bandits* (1981) and *Brazil* (1985, cowritten by Palin). Chapman died in 1989.

Moody, Helen Newington Wills (1905–1998) American tennis player. Combining thoughtful play with power, Moody dominated women's tennis throughout the 1920s and 1930s, winning her first U.S. championship at the age of 17 in 1923. She would win that title six more times, as well as an astonishing eight Wimbledon championships and four French championships. In 1928 and 1929, she took the women's Grand Slam, winning all three titles. She was named to the International Tennis Hall of Fame in 1959.

Moody, William H. (1853–1917) Associate justice, U.S. Supreme Court (1906–10). A native of Massachusetts, Moody graduated from Harvard University and briefly attended its Law School, leaving to read law in a law office in Boston. He became a prosecutor and is remembered for the unsuccessful prosecution of Lizzie Borden. He was elected to Congress in 1895 and was selected by President Theodore ROOSEVELT as secretary of the navy and later as attorney general. Roosevelt appointed Moody to the Supreme Court. His nomination ran into opposition from business interests because, as attorney general, Moody had vigorously enforced the antitrust laws. In a highly unusual move he had personally argued in the antitrust case *Swift and*

Company v. United States. Moody was forced to resign from the Court after only four years because of ill health.

Moody Blues, The British rock and roll band, founded in 1964. The Moody Blues are best known for their successful blending of rock rhythms, orchestral string overlays and pop philosophy lyrics. The band enjoyed its greatest success with the album *Days of Future Passed (Dream)* (1967), which it recorded with the London Symphony Orchestra. The album featured the enduring hit single "Nights in White Satin." The personnel for this album were Graeme Edge, drums; Justin Hayward, vocals and guitar; John Lodge, bass; Mike Pinder, vocals; and Ray Thomas, flute and vocals. With occasional personnel changes, the band has remained together to the present day. Noteworthy albums include *In Search of the Lost Chord* (1968), *On the Threshold of a Dream* (1969) and *Octave* (1978). In 2002 Ray Thomas left the band.

Moon, Keith (1947–1978) British drummer who played in the rock group The WHO. Moon was one of the wild figures of the ROCK AND ROLL scene during the late 1960s and the 1970s. On one occasion, during a concert tour, he reportedly paid \$400,000 to a hotel for damages caused by his antics. Another time, he drove his Rolls-Royce into a swimming pool. He died of a drug overdose.

Moon, Sun Myung (1920–) South Korean evangelist. Moon is best known as the founder and spiritual leader of the Unification Church (1954). Between 200,000 and 2 million people belong to the church worldwide. Most recruits are young people (derogatorily called "Moonies") who are encouraged to leave families and jobs in order to live in communes and work for the church. Due to conflicts with his business enterprises, Moon moved church headquarters from South Korea to the U.S. in 1973. He was convicted of income tax evasion in 1984 and sentenced to a prison term. In the 1990s Moon became an avid supporter of the Republican Party in the U.S., often siding with it on cultural issues.

Moore, Archie (Archibald Lee Wright) (1913–1998) American

boxer. Moore began boxing in 1936, but it wasn't until 1952 that he defeated Joey Maxim for the light-heavyweight title. In 1955 he sought the heavyweight title but was defeated by Rocky MARCIANO. The following year he tried again and was defeated by Floyd Patterson. He was able to successfully defend his light-heavyweight title until 1962. Moore registered 136 knockouts during his 220-bout career. Moore also appeared in films—*The Adventures of Huckleberry Finn* (1959)—and written an autobiography, *Any Boy Can* (1971).

Moore, Brian (1921–1999) Irish-born novelist. Although he had written some early novels under the pseudonym Michael Bryan, Moore is best known for *The Lonely Passion of Judith Hearne* (1956; originally published in Britain as *Judith Hearne*, 1955; filmed 1987). This work depicts a lonely spinster who, thwarted in her last attempt for companionship, seeks solace in alcohol; it is typical of Moore's work with its themes of alienation and despair. Moore often called upon his experiences as an emigré to Canada and later the U.S. in his subsequent fiction, which includes *The Luck of Ginger Coffey* (1960), *I Am Mary Dunne* (1968), *The Mangan Inheritance* (1979) and *Lies of Silence* (1990).

Moore, Colleen (Kathleen Morrison) (1902–1988) American actress who was a popular star of HOLLYWOOD silent films and early talkies. In a career that extended from 1917 to 1934, Moore achieved stardom through her portrayal of a flapper in *Flaming Youth* (1923), helping to touch off a craze for bobbed hair and short skirts; probably her greatest success was *Lilac Time* (1928). One of Hollywood's highest paid stars in the silent era, her personal favorite of her 100 or so films was *The Power and the Glory* (1933), in which she appeared opposite Spencer TRACY.

Moore, Dudley (1935–2002) British composer-songwriter, comedian and actor. Moore first gained notice in the revue *BEYOND THE FRINGE* (1960), for which he also wrote the songs. He went on to a second career as an accomplished jazz pianist and also formed a memorable partnership with Peter COOK in such classic films as *Bedazzled* (1967). In the U.S. he is best known for

his starring roles in the hit film comedies *10* (1979) and *Arthur* (1981), in which he cultivated a bumbling but charming persona.

Moore, George Augustus (1852–1933) Anglo-Irish novelist. Moore studied painting in Paris, and his works show the influence of such French writers as Balzac and Zola. After returning to England he published *A Modern Lover* (1883). The novel's Bohemian subject matter caused it to be banned by circulating libraries in England, and Moore became an adamant opponent of censorship. Moore's other early novels include *A Mummer's Wife* (1885) and *Esther Waters* (1894), his best known work, which evokes his childhood home in County Mayo. Moore's later novels are of more epic proportions and include *The Brook Kerith* (1916) and *Heloise and Abelard* (1921). Moore was instrumental, along with W. B. YEATS, in the forming of the Irish National Theatre. Moore has also written the autobiographical *Confessions of a Young Man* (1888), *Memoirs of My Dead Life* (1906) and the three-volume *Hail and Farewell* (1911–14).

Moore, G(eorge) E(dward) (1873–1958) British philosopher. Moore, who was educated at Cambridge University and taught there for most of his adult life, was a highly influential philosopher who had a special fascination for the BLOOMSBURY GROUP. In his major work, *Principia Ethica*, Moore argued that ethical decisions hinged on a blend of idealism and utilitarianism. The idea of absolute good was an appropriate guide to right action in daily life. But right action, in turn, hinged upon moral obligations to others as well as the special value one assigned to aesthetic beauty and to personal joys such as friendship and love. Moore analyzed a variety of epistemological and ethical questions in *Philosophical Studies* (1922), in which his basic approach was to defend common sense as opposed to technical language analysis. Moore edited the influential British philosophical journal *Mind* from 1921 to 1947.

Moore, Henry Spencer (1898–1986) British sculptor. During WORLD WAR II he became widely known in Britain for his drawings of people huddled together taking shelter in the Lon-

don Underground during the blitz. He went on to become one of the most successful public sculptors of his age, and hundreds of his works came to grace parks, public squares and buildings throughout the world. His most characteristic subject was the reclining female. Many of his human figures had holes in them and small heads atop massive bodies. Among the best known of his works are the six-ton bronze sculpture completed in 1964 that decorated a fountain at Lincoln Center and the marble sculpture that decorates the headquarters of the UNITED NATIONS Educational, Scientific and Cultural Organization in PARIS.

Moore, Marianne (1887–1972) American poet. An indifferent student at Bryn Mawr (1905–09), where she was denied an English major, Moore burst onto the literary scene in 1915, when her first poems were accepted by the *Egoist* and *Poetry* magazines. Her originality, precise language, sharp and idiosyncratic vision and concentration of thought so impressed her literary peers that she was soon regarded as one of the leaders of the modernist movement in literature (see MODERNISM). Her position as editor of the *Dial* (1925–29) made her arguably the most powerful figure in modernist poetry in the 1920s. Her *Collected Poems* (1951) received the Bollingen Award, the PULITZER PRIZE and the NATIONAL BOOK AWARD. She went on to win vir-

American poet Marianne Moore (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

tually every prize and accolade offered to a poet in the U.S. In later years, her public image as a charming white-haired eccentric who appeared at Brooklyn Dodgers baseball games wearing a black tricorne hat overshadowed her reputation as a major poet.

Morales Ayma, Juan Evo (1959–) Bolivian coca farmer and president of Bolivia (2005–). Born to a poor family of the indigenous Quechua people, Morales became the leader of a coalition of coca leaf-growing farmers who opposed the government campaign financed by the U.S. to eradicate coca leaf production in Bolivia. He also formed a political party, the Movement for Socialism, that called for sweeping socioeconomic reforms in this impoverished South American country. Morales's movement won a notable victory in 2000 when it forced the government to back down from a plan to privatize the waterworks of a Bolivian city and hand it over to a multinational corporation. But it was peasant resistance to the U.S. backed coca-eradication campaign that brought Morales into the international spotlight. In 2001 he placed second in the presidential elections, surprising and alarming the traditional parties, and became an outspoken critic of the government. In the presidential elections of 2005, Morales ran on a campaign calling for the nationalization of key industries, price freezes on certain essential goods, an increase in taxation for the wealthy, and land redistribution. He also endorsed the legalization of the production of coca leaves for chewing as a dietary supplement, a habit indulged in by most indigenous peasants in Bolivia. Amid growing unrest in rural areas and political instability in the capital, Morales won a majority of the votes and became the country's first president of indigenous descent. He promptly aligned himself with Cuba's Fidel CASTRO and Venezuela's Hugo Chávez in opposition to the economic policies promoted by the U.S. and its supporters in Latin America. In 2006 Morales announced the nationalization of the natural gas industry and expressed hopes of nationalizing mining, forestry and other sectors of Bolivia's economy. Morales raised some eyebrows by visiting foreign heads of state (including the king of Spain) dressed in a striped sweater. On taking office he reduced his salary

by half and led a very spartan life as president of Bolivia.

Moral Re-Armament See Frank BUCHMAN.

Morandi, Giorgio (1890–1964) Italian painter. Born in Bologna, he lived in that city for most of his life, never leaving his native country. Early in his career (1918–20) he was associated with the METAPHYSICAL PAINTING of the painter Giorgio de CHIRICO. In the early 1920s he created his own style of still-life painting. In these quietly poetic compositions, Morandi portrayed humble bottles, vases and jars in simplified shapes and in a severely limited palette, mainly earth tones. He was also a skilled etcher, again using still lifes for his subject matter.

Morante, Elsa (1918–1985) Italian novelist. Morante is one of the most highly regarded Italian novelists of the post-WORLD WAR II era. Her novels reflect a deep sense of historical awareness and a sensitivity to the need for love and to the ultimate fragility of the human psyche. While not prolific, Morante has so carefully crafted each of her novels as to gain them the status of modern classics. Morante first gained international attention with *Arturo's Island* (1957), an examination of the relationship between individualism and societal demands. *History: A Novel* (1974) is a penetrating study of the impact of World War II upon European culture. *Aracoele* (1983) is a moving depiction of the difficulties of homosexual existence and the depth of a mother's love. Morante was at one time married to the Italian novelist Alberto MORAVIA.

Moravia, Alberto (Alberto Pincherle) (1907–1990) Italian author. Moravia was perhaps the best known and most widely read Italian writer of his time. His books explored sex, alienation and other contemporary social issues. His first novel, *The Time of Indifference* (1929), was published when he was 21 years old. His subsequent works include *The Women of Rome* (1949; filmed 1956), *The Conformist* (1951) and *Two Women* (1958; adapted for the screen by Vittorio DE SICA and starring Sophia LOREN).

Moreau, Jeanne (1928–) French actress and director. Moreau, who is known for her sultry eroticism and wry humor, achieved international acclaim, particularly for her work in the films of Louis MALLE, François TRUFFAUT, and Luis BUÑUEL. She began her career as a member of the Comédie Française (1948–52), then became the star of the Théâtre National Populaire. Her first screen success came in Malle's *L'Ascenseur pour l'échafaud* (1957). Her performance in Roger Vadim's *Les Liaisons Dangereuses* (1959) made her a star. Other famous roles were in Truffaut's *Jules et Jim* (1961), Buñuel's *Le Journal d'une femme de chambre* (1964) and Malle's *Viva Maria!* (1965) with Brigitte BARDOT. She has also written, sung and recorded her own songs. In the 1990s Moreau made only four film appearances: *Until the End of the World* (1991), *The Lover* (1992), *Beyond the Clouds* (1995), and *Ever After* (1998). During that decade Moreau also received several awards in recognition of her contributions to the silver screen, most notably a Golden Lion at the 1991 Venice Film Festival and a 1997 European Film Academy Lifetime Achievement Award.

Morgan, J(ohn) P(ierpont) (1837–1913) U.S. financier. Morgan was born in Hartford, Connecticut, and educated at the University of Göttingen. In 1856 he entered his father's banking firm and by the end of the century had made the firm (known as J. P. Morgan & Co. after 1895) one of the most powerful banking houses in the world. Morgan was a major force in the centralization of industry and credit around the turn of the 20th century. He also played a central role in the reorganization of U.S. railroads and in the marketing of government bonds. Morgan's personal influence helped stabilize financial conditions during the Panic of 1907. The financier was a target of the progressive Trust Busters. In 1904 the Supreme Court dissolved his Northern Securities Company, formed to control Western railroads, for violation of the Sherman Antitrust Act. The chief target of the 1912 Pujo investigation of the "Money Trust," Morgan emerged with his reputation and prestige unimpaired. A great philanthropist, he was a major benefactor of the Metropolitan Museum of Art. Morgan bequeathed his personal library to the public.

Morgan, J(ohn) P(ierpont), Jr. (1867–1943) U.S. businessman. The son of J. P. MORGAN, young Morgan became head of the house of Morgan after his father's death in 1913. As American agent for Great Britain in 1914, Morgan's banking firm raised huge amounts of money for the purchase of military supplies. The firm was not important in financing the war but handled most of the postwar loans, including those associated with reparations, while also sponsoring billions of dollars in domestic securities. A philanthropist, Morgan made large gifts to education and the arts.

Morgan, Thomas Hunt (1866–1945) American geneticist. Born in Lexington, Kentucky, Morgan earned his Ph.D. from Johns Hopkins in 1890. While a professor of experimental zoology at Columbia University (1904–28), he amended Mendel's laws of inheritance and developed the chromosome theory of genetics; he mapped individual genes, demonstrated genetic linkage and described the process of "crossing over," by which linkages are broken. In 1933, in recognition of his pioneering role as one of the founders of modern genetics, Morgan received the NOBEL PRIZE in medicine or physiology.

Morgenstern, Christian (1871–1914) German poet. Morgenstern contracted tuberculosis from his mother at an early age; due to his illness, he was forced to withdraw from the university. He moved to Scandinavia, where he translated the works of HAMSDUN, STRINDBERG and Ibsen. His popular nonsense verse appeared as *Galgenlieder* (1905) and *Palmstroem* (1910). However, he was strongly influenced by Rudolf Steiner and anthroposophism and thus regarded his serious mystical verse as his greatest achievement. He also published lyric love poems in *Ein Sommer* (1899) and *Ich und Du* (1911), but he is best remembered as a master of wordplay and nonsense whose inventiveness rivals that of Edward Lear and Lewis Carroll.

Morgenthau, Hans Joachim (1904–1980) German-born political scientist, author and teacher. A Jewish exile from Nazi GERMANY, Morgenthau taught at the University of Chicago for 17 years. There he became one of America's most

respected foreign policy analysts, known for writings that stressed national interest rather than world opinion in policy making. He was an early critic of American involvement in the VIETNAM WAR. He was also an outspoken critic of the USSR's treatment of JEWS and a strong advocate of nuclear arms control and DÉTENTE with the USSR.

Morgenthau, Henry, Jr. (1891–1967) U.S. secretary of the Treasury (1933–45). Born into a wealthy family, Morgenthau was a gentleman-farmer and a Hyde Park, N.Y., neighbor of Franklin ROOSEVELT. He assisted FDR's political comeback after Roosevelt was stricken with polio; and, after FDR became governor of New York, Roosevelt appointed his friend to a state post. Despite Morgenthau's lack of experience Roosevelt appointed him secretary of the Treasury when FDR went to the White House. Although a fiscal conservative, Morgenthau proved an active secretary and a major NEW DEAL figure. He was instrumental in financing the New Deal spending programs and in establishing a scheme to stabilize the world's monetary system. Toward the end of World War II his MORGENTHAU PLAN advocated a "pastoralized" Nazi Germany. After Harry S. TRUMAN became president on FDR's death in 1945, Morgenthau's influence waned and he resigned. He was critical of Truman for abandoning FDR's policy of cooperation with the USSR. In later years Morgenthau devoted himself to philanthropy, especially the United Jewish Appeal. He died at the age of 75 in 1967.

Morgenthau plan Plan advanced toward the end of World War II by U.S. secretary of the Treasury Henry MORGENTHAU to "pastoralize" Nazi GERMANY after the war. German industry would be dismantled, and Germany would be turned into an agricultural nation. Industrial areas would be annexed by FRANCE and POLAND, and the nation itself would be split into separate northern and southern states. The plan also proposed separating German children from their parents by sending them to special Allied boarding schools. Proposed by Secretary Morgenthau at the QUEBEC CONFERENCE in 1944, the plan was originally accepted by U.S. president Franklin ROOSEVELT and British

prime minister Winston CHURCHILL. However, they both dropped their support of the plan after the U.S. State Department and British Foreign Office rejected it as unworkable because it would require heavy subsidies from the Allies. The Nazi propaganda office used the plan to encourage Germans to resist the Allied invasion to the bitter end.

Morison, Samuel Eliot (1887–1976) U.S. historian. He started his teaching career in 1915 at Harvard and became a full professor there in 1925. Two of his books, *Admiral of the Ocean Sea* (1942) and *John Paul Jones* (1959), won PULITZER PRIZES. He was commissioned by President Franklin ROOSEVELT to write the 15-volume *History of United States Naval Operations in World War II* (1946–62).

Morley, Christopher (1890–1957) American author and editor. A Rhodes scholar, Morley began his career in publishing. He helped found *The Saturday Review of Literature* in 1924, for which he wrote until 1941, and served in an editorial capacity for many other journals and periodicals. Morley is best known for his popular novels which include *Parnassus on Wheels* (1917), *The Haunted Bookshop* (1919), *Kitty Foyle* (1939, filmed 1940) and *The Man Who Made Friends with Himself* (1949). Morley was also a poet, playwright and essayist; he also wrote the autobiography *John Mistletoe* (1931).

Moro, Aldo (1916–1978) Italian political leader. A prominent lawyer and Christian Democrat, he entered the constituent assembly in 1946, was elected to the Chamber of Deputies in 1948 and served as minister of justice from 1955 to 1957. Moro was also foreign minister (1965–66, 1969–72 and 1973–74) and prime minister (1963–68 and 1974–76). Considered an elder statesman in the Christian Democratic Party, he became its president in 1976, advocating rapprochement with the Communist Party. Moro was kidnapped on March 16, 1978, by the terrorist RED BRIGADES and was found shot to death on May 9, 1978. (See also ITALY.)

Moroccan War of 1907–12 The ALGECIRAS Conference (1906) stipulated

that Moroccan territorial integrity was to be enforced by France and Spain although these two powers agreed to partition MOROCCO between them eventually. In 1907 Moroccans rioted against foreign workers in Casablanca and were crushed by French troops; but native opposition reemerged in 1908 when Sultan Abd-al Azziz IV was deposed by his brother. The new sultan requested help to maintain order; in consequence Spanish troops suffered defeat by Rif tribesmen who attacked Fez, which the French then occupied (1909). Germany, protesting French actions, sent a gunboat to Morocco. War was averted when France ceded Congolese territory to Germany to gain recognition of French authority in Morocco. By the Treaty of Fez (March 30, 1912), the sultan agreed to a French protectorate, and France and Spain then split Morocco into four zones with French rule over three of them.

Morocco Coastal African nation, bordering the Mediterranean Sea on the north, the Atlantic Ocean on the

west; it is north of Mauritania and west of Algeria.

In 1912 Morocco was made wholly a French protectorate, with the exception of a small Spanish territory in the north. The 1920s saw a period of almost constant revolt, but Moroccan independence did not come about until 1956, when Mohammed V established an independent monarchy. Absolute power was consolidated by his successor, Hassan II. In 1976 the oil-rich region of the Spanish Sahara in the southwest was taken over jointly with MAURITANIA (which renounced its claim in 1979 after fierce guerrilla opposition), and Morocco regained full control of the territory. In 1991 Morocco agreed to a UN-monitored ceasefire in Western Sahara that called for a referendum on the territory's future. However, that vote has yet to occur. The following year King Hassan II inaugurated a new constitution that allowed for the election of a prime minister independent of the monarchy. In 1998 this led to the first government controlled by the opposition party. Following the death of King Hassan II in

MOROCCO

1904	Secret agreement between France and Spain divides control of Morocco.
1912	Rebellion against the sultan; French seize opportunity to send troops and proclaim protectorate; flood of French immigration begins.
1921	Abd el-Krim proclaims republic in the Rif Mountains; begins bitter five-year defense against French and Spanish.
1947	King Mohammed V leads independence struggle through Istiqlal Party.
1953	Mohammed exiled; terrorists fight French and Spanish.
1956	Independence granted by French; Mohammed returns; Spanish follow suit.
1961	Mohammed dies; his son crowned Hassan II; Morocco becomes world's leading source of phosphates.
1979	Polisario guerrillas wage independence struggle in Western Sahara; Hassan begins military buildup; price of phosphates drops; economy suffers.
1988	UN organizes peace talks with guerrilla forces.
1989	Polisario mounts new offensive; "Arab Maghreb" economic union joins countries of northwest Africa.
1991	Morocco agrees to a UN-monitored cease-fire in Western Sahara that endorsed a referendum on the territory's future.
1992	A new constitution is ratified, providing for a prime minister as the head of the government, to be appointed by the king.
1996	A national referendum approves creation of a second chamber in the legislature and direct election of members of the existing Chamber of Representatives.
1999	King Hassan dies and is succeeded by his son, who is crowned as King Mohammed VI.
2003	Casablanca court jails three Saudi citizens, members of al-Qaeda, for 10 years for plotting to attack British and U.S. warships in the Strait of Gibraltar in 2002.
2004	Earthquake in northern Morocco kills more than 500. A free trade agreement is signed with the U.S.
2005	Truth Commission claims more than 500 people were killed during King Hassan II's rule.

1999 and the ascension of his son, Mohammed VI, to the throne, Morocco has striven to resolve the disputed status of Western Sahara. King Mohammed VI has also personally engaged in talks with Spain to resolve the jointly disputed status of the island of Perejil. After deadly suicide bombings in Casablanca in 2003, Morocco launched a crackdown on suspected Islamic militants. King Mohammed's Truth Commission began to uncover possible human rights violations that occurred during King Hassan's reign.

Moro Wars (1901–1913) The Moros, Muslim tribespeople of central and western Mindanao in the PHILIPPINES, traditionally had lived apart from Christian Filipinos. The Spanish, rulers until driven out by Americans in 1898, had left them alone. The Americans, however, wished them to be assimilated; the Moros resisted with sporadic outbreaks beginning in 1901. In 1903 they attacked American troops in central Mindanao; in 1906, 600 Moro rebels, taking refuge inside a volcanic crater in Jolo, were slaughtered by U.S. troops under General Leonard Wood, resulting in

public indignation. The fighting ended after June 1913 and the Moros were left in peace.

Morrison, Herbert (1906–1989) U.S. radio reporter. His emotional broadcast of the crash of the German airship *HINDENBURG* at Lakehurst, New Jersey, in 1937 was recorded and made his voice familiar to millions.

Morrison, Herbert Stanley (1888–1965) British politician. The son of a London policeman, Morrison held a variety of jobs as he became involved in

the London LABOUR PARTY, becoming its general secretary in 1915. He entered the London County Council in 1922 and through his abilities as an organizer became its leader (1934–40). Morrison was a member of Parliament (1923–24, 1929–31 and 1935–45). He also served as minister of transport (1931), and as minister of supply in Winston CHURCHILL's coalition government (1940), after which he served as home secretary until the end of the coalition. Morrison was instrumental in creating the National Fire Service and was involved in the development of the social services adopted after Clement ATTLEE came to power in 1946. Morrison was deputy prime minister and lord president of the council from 1945 to 1951 when he served briefly as foreign secretary. He attempted to succeed Attlee as party leader in 1955 but was defeated by Hugh GAITSKELL.

Morrison, Toni (Chloe Anthony Wofford) (1931–) American novelist. Beginning with *The Bluest Eye* (1969), which examines black self-hatred, Morrison's original fiction has explored the black experience in a racist culture, as well as universal themes of human interrelations. Subsequent novels, include *Sula* (1973) and *Tar Baby* (1981). Morrison's work is both highly popular and critically esteemed. She was awarded the 1977 National Book

Nobel Prize-winning author Toni Morrison, 1977
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Critics Circle Award for *Song of Solomon* (1977) and the 1988 PULITZER PRIZE for *Beloved* (1987). Educated at Howard University and Cornell University, Morrison has been a member of the faculties of many American universities, including Princeton and Yale. In 1993 Morrison received the Nobel Prize in literature.

Morro Castle On September 8, 1934, the passenger liner *Morro Castle* caught fire off the coast of New Jersey and beached at Asbury Park. One-hundred-thirty passengers were killed in the disaster, which, because of its proximity to New York, was thoroughly covered by newsreel camera crews.

Morse, David Abner (1907–1990) U.S. labor leader. He was acting U.S. secretary of labor in 1948, and director general of the UNITED NATIONS' INTERNATIONAL LABOR ORGANIZATION from 1948 to 1970. He was an advocate of an eight-hour working day, child labor laws, maternity leave, workers' compensation and improved safety regulations. In 1969, Morse accepted the NOBEL PEACE PRIZE in behalf of the ILO.

Mortimer, John Clifford (1923–) British novelist and playwright. Mortimer trained and worked as a barrister before turning to writing. He is best known for the series "Rumpole of the Bailey," which centers on an eccentric barrister and his cases. These include *Rumpole* and *The Age of Miracles* (1989); early Rumpole books have been published in collections, such as *The Second Rumpole Omnibus* (1987). The series was successfully televised by the BBC. Mortimer's acute observations of life enrich his novels, which include *Summer's Lease* (1989), *Paradise Postponed* (1985) and its sequel *Titmus Regained* (1990). He is also known for his libertarian views and his stand against censorship. Other works include *A Voyage Round My Father* (1970), a biography of his father, and *Clinging to the Wreckage* (1982), an autobiography. Mortimer was formerly married to the novelist Penelope Mortimer.

Morton, Jelly Roll (La Menthe Morton) (1890–1941) American pianist-composer, ranks among jazzdom's

true innovators by dint of his unique amalgamation of the different black musical styles he learned and performed in his native New Orleans—namely, ragtime, instrumental blues, gospel songs, field hollers and minstrel show tunes. As a pianist, Morton is credited with "opening up" the through-composed ragtime of W. C. HANDY by interpolating sections designated for improvisation; Morton's "Grandpa's Spells" and "Kansas City Stomp" encapsulate the expanded ragtime approach that would be taken up in the 1930s by such piano virtuosos as Earl "Fatha" HINES. In ensemble works such as "Black Bottom Stomp" and "The Pearls," Morton proved that meticulous arrangements could include improvised sections without sacrificing clarity of form; the most significant examples of his group concept were recorded in 1926–27 by Morton's well-rehearsed and disciplined Red Hot Peppers. By the 1930s, given the whimsical nature of society's ever fickle and shifting musical tastes, Morton was considered passé. However, recordings made by folklorist Alan Lomax in 1938 revived Morton's career until ill health forced his retirement in 1940. Other classic Morton compositions include "Wolverine Blues," "Milenberg Joys" and the eponymous "Jelly Roll Blues."

Moscow Art Theater Founded in 1898 by Konstantin STANISLAVSKY and Vladimir NEMIROVICH-DANCHENKO, the Moscow Art Theater achieved worldwide acclaim for its theatrical naturalism. Stanislavsky, who was in charge of stage direction, strove to strip the theater of commercialism and stereotyped mannerisms by concentrating on inner moods and emotions; in this he was influenced by the German Meiningen Company. The original ensemble was composed of amateur actors from the Society of Art and Literature. The theater performed plays by GORKY, ANDREYEV, Maeterlinck and HAUPTMANN, and in particular the works of CHEKHOV. The theater continued to flourish after the revolution. It has undertaken several international tours and has influenced theaters all over the world.

Moser, Koloman (Kolo Moser) (1868–1918) Viennese artist, graphics and furniture designer. He was a founding

member of the Vienna Secession movement. Moser had studied painting before becoming acquainted with Josef HOFFMANN, Gustav Klimt and Josef Olbrich. In 1898 he designed a stained-glass window for Olbrich's Secession Gallery. In 1899 Moser began to teach at the Vienna School of Applied Arts—a post he held until his death. During his career he designed furniture—often using decorative inlays—jewelry, toys and bookbindings. He also designed stained glass for Otto Wagner's Vienna Kirche am Steinhof (1904), posters, and other graphics items, including an Austrian postage stamp of 1908. He was, with Josef Hoffmann, a founder of the Wiener Werkstätte. In his later years, Moser was chiefly active as a painter.

Moser-Proell, Annemarie (1953–) Austrian skiing champion. Known for her aggressive, risk-taking style, Moser-Proell joined the Austrian national ski team at age 15. Over the course of her career, she won 62 individual World Cup victories, more than any other woman. She also won a record seven World Cup downhill titles (1971–75, 1978–79) and won the overall World Cup title a record six times, in 1971–75 and again in 1979. From December 1972 to January 1974, she won 11 consecutive World Cup downhill races, a record. In the 1980 Winter OLYMPIC GAMES in Lake Placid, New York, Moser-Proell won a gold medal in the downhill. She announced her retirement from World Cup events that year.

Moses, Robert (1888–1981) American urban planner who transformed the landscape of NEW YORK CITY from the 1920s through the 1960s. A shrewd and aggressive bargainer known for his single-minded determination, he gained power within the state's public works system—at one point holding 12 positions simultaneously. He entered public service in 1919 under Governor Alfred E. SMITH. For various periods between 1924 and 1968 his titles included, among others, New York City parks commissioner, head of the State Parks Council and chairman of the Triborough Bridge and Tunnel Authority and of the New York State Power Authority. Although he was never elected to any

public office (he was an unsuccessful candidate for governor in 1934), behind the scenes he wielded more actual power than many of the governors and mayors under whom he served. During his reign he oversaw the construction of 75 state parks, 11 bridges and 481 miles of highway around New York City. He was also responsible for the development of massive housing complexes, tunnels, playgrounds, beaches, zoos, civic centers and exhibition halls. Among his projects were Lincoln Center, the New York Coliseum, Shea Stadium, the Robert Moses Niagara Power Plant and the 1964–65 World's Fair grounds. He held on to his power until the age of 80, when Governor Nelson ROCKEFELLER forced him to retire.

Moses exemplified the bigger-is-better approach to urban development in the 20th century. His monumental plans—often carried out at the expense of neighborhoods, tradition and human needs—contributed to the impersonality of the city. His projects in New York set an example that was repeated throughout the U.S. and in other parts of the world.

Mosley, Sir Oswald Ernald (1896–1980) British fascist leader. He began his political career as a Conservative member of Parliament in 1918, becoming an independent from 1922 to 1924, when he joined the Labour Party. A junior cabinet minister (1929–30), he resigned in a dispute over economic policies, and in 1931 founded the socialist New Party. Soon his views took a decidedly right-wing turn, and in 1932 he dissolved the New Party and founded the British Union of Fascists. When his first wife, Lady Cynthia Curzon died, he married (1936) Diana Guinness—a member of the MITFORD family, many of whom were active supporters of Adolf HITLER. Mosley began to stage fascist rallies and marches and to make violently anti-Semitic speeches. Mosley and his wife were interned in 1940 due to their espousal of the Nazi cause. They were released three years later. After the war, Mosley unsuccessfully attempted to revive his movement and his political career. His autobiography, *My Life*, was published in 1968.

Mosquito Coast (Miskito Coast, Mosquitia; Costa de Mosquitos) (Honduras and Nicaragua) A 40-mile-

wide region extending from the San Juan River in the north into northeast HONDURAS, its name having been derived from the Mosquito (Misketto) Indians. In 1894 it was made part of NICARAGUA under the dictatorship of José Santos Zelaya, an issue that was not settled until 1960, when the International Court of Justice awarded the northern coastal region to Honduras. In the early 1980s, the Sandinista regime in Nicaragua was accused of having massacred the Indian population occupying both sides of the border with Honduras.

Mossadeq, Mohammed (1881–1967) Iranian political leader, prime minister of IRAN (1951–53). Born in Tehran, Mossadeq entered politics in 1914 and served as foreign minister from 1922 to 1924. When the shah assumed dictatorial powers in 1925, Mossadeq protested by retiring from political life. He returned to governmental affairs as a member of the Iranian parliament in 1942. A militant nationalist who objected to foreign interference in Iran's affairs, he opposed Soviet attempts to exploit the country's oil resources and spearheaded the movement to nationalize the British-owned Anglo-Iranian Oil Company. A fiery reformer and powerful speaker who was extremely popular with the Iranian people, he was appointed prime minister in 1951 after the passage of the oil nationalization act. Thereafter, Western technology experts withdrew from the country, rendering Iran powerless to produce the oil on which the country's economy and Mossadeq's promised social reforms rested. With the nation in political crisis, Mossadeq was dismissed by the shah in 1953 and was subsequently arrested. Imprisoned for three years, he spent the rest of his life under house arrest.

Motherwell, Robert (1915–1991) American painter. Born in Aberdeen, Washington, he was educated at Stanford University and pursued graduate studies in philosophy and art history at Harvard and Columbia. He later taught art at a number of colleges. An articulate exponent of ABSTRACT EXPRESSIONISM, Motherwell edited the 15-volume series *Documents of Modern Art* from 1944 to 1961. His abstract works have

titles that often allude to philosophical or political ideas. Motherwell paints large bold forms in strongly contrasting colors with slashing brushstrokes. Created as a reaction to the SPANISH CIVIL WAR, his best-known works are a series of more than 100 powerful paintings entitled *Elegy to the Spanish Republic* (1947–76).

Mothopeng, Zephania Lekoane (1913–1990) South African political activist. He joined the AFRICAN NATIONAL CONGRESS in his youth but split with the organization in 1959 to form the more militant Pan-African Congress. The group opposed power-sharing with whites and refused to join negotiations proposed by government President F. W. DE KLERK. Mothopeng was jailed several times between 1964 and 1988 for his activities.

Motown American record company that was the wellhead of much of the important music of the 1960s. Motown artists included Smokey Robinson, the Temptations, Martha Reeves and the Vandellas, the Jackson 5, Stevie WONDER, the Four Tops and innumerable others. Founded in Detroit by paternal despot Berry Gordy, Motown became one of the most prominent black-owned corporations in the world. Gordy dictated artists' behavior on-and off-stage, including clothes, hair and choice of companions. Gordy was also reluctant to share financial information with the artists who were bringing in the revenue, and the label lost many artists in later years. Gordy's mark on the label's music is unmistakable, however, and the Motown sound instantly recognizable.

Mott, John Raleigh (1865–1955) American humanitarian and religious leader. Born in Livingston Manor, New York, he became an active member of the YMCA while an undergraduate at Cornell University, serving as national secretary of the organization's Intercollegiate Committee from 1888 to 1915. In 1888 he also became the director of the Student Volunteer Movement for Foreign Missions. In 1895 Mott founded the World's Student Christian Federation. As national executive of the American YMCA (1915) and general secretary of the National War Work Council (1916), he helped to

raise some \$200 million for WORLD WAR I relief efforts.

Mott became chairman of the International Missionary Council in 1921 and president of the World YMCA in 1926. During WORLD WAR II he worked on numerous fund-raising campaigns to support the YMCA's many humanitarian programs. In 1946 he shared the NOBEL PEACE PRIZE with Emily Greene BALCH. A leading Methodist layman and advocate of ecumenical efforts, he was named honorary president of the newly formed World Council of Churches in 1948.

Mott, Sir Nevill Francis (1905–1996) British physicist; studied at Cambridge University, gaining his bachelor's degree in 1927 and master's in 1930. Mott never pursued a doctorate but from 1930 until 1933 was a lecturer and fellow of Granville and Caius College, Cambridge. Subsequently he moved to Bristol University as a professor of theoretical physics. In 1948 he became director of Bristol's physics laboratories but returned later to Cambridge as Cavendish Professor of Experimental Physics, where he served from 1954 until his retirement in 1971. Mott's work in the early 1930s was on the quantum theory of atomic collisions and scattering. With H. S. W. Massey he wrote the first of several classic texts, *The Theory of Atomic Collisions* (1934). Other influential texts that followed were *The Theory of the Properties of Metals and Alloys* (with H. Jones, 1936) and *Electronic Processes in Ionic Crystals* (with R. W. Gurney, 1940). Each marked a significant phase of active research. Mott also began to explore the defects and surface phenomena involved in the photographic process (explaining latent-image formation) and did significant work on dislocations, defects and the strength of crystals. By the mid-1950s, Mott was able to turn his attention to problems of disordered materials, liquid metals, impurity bands in semiconductors, and the glassy semiconductors. His models of the solid state became more and more complex and included an analysis of electronic processes in metal-insulator transitions, often called "Mott transitions." In 1977 Mott shared the NOBEL PRIZE in physics with Philip ANDERSON and John Van Vleck for their "fundamental theoretical investigations of the

electronic structure of magnetic and disordered systems." Mott was knighted in 1962.

Moulin, Jean (1899–1943) Leader of the French RESISTANCE. A civil prefect in the French department of Eure-et-Loire when the Germans occupied France in 1940 during WORLD WAR II, Moulin was an active opponent of the Nazis, who imprisoned him. Released, he fled to London but returned to France and, from 1942 to early 1943, organized Resistance efforts, coordinated Resistance fighters in the north and south of France and united representatives of political movements, trade unions and political parties into a national Resistance council. Betrayed to the Germans, Moulin was captured on June 21, 1943, and, after nearly a month of torture by the GESTAPO, died on July 8, 1943.

Mountbatten, Lord Louis (Earl Mountbatten of Burma) (1900–1979) British naval officer, colonial administrator, member of the royal family; born Louis Francis Albert Nicholas Battenberg. As the last viceroy of INDIA, he guided that country's transition from Britain's largest colony to an independent nation and member of the COMMONWEALTH. A grandnephew of Queen Victoria, Mountbatten trained as a naval officer and served as a midshipman in WORLD WAR I. Early in WORLD WAR II he commanded a Royal Navy destroyer. He rose rapidly to become Allied Chief of Combined Operations in Southeast Asia, coordinating the Allied recapture of Burma from the Japanese. He also planned commando raids on German-held Europe before D DAY. In 1947, as part of Britain's plan to grant India independence, Prime Minister ATTLEE appointed him viceroy. Mountbatten accomplished his task in five months, negotiating successfully with NEHRU and JINNAH despite many obstacles. Following independence, he was India's first governor-general. He later held the posts of commander in chief of NATO forces in the Mediterranean, first sea lord (head of the British navy) and chief of the British defense staff. In his later years he was an influential adviser to his grandnephew, Prince CHARLES. While vacationing in Ireland Mountbatten was killed by a bomb

planted aboard his boat by IRA terrorists. After his death his cousin Queen ELIZABETH II changed the name of the royal family to Windsor-Mountbatten in his honor.

Moureu, Henri (1899–1978) French scientist and patriot. During WORLD WAR II Moureu foiled German plans to develop an ATOMIC BOMB by keeping the French supply of heavy water out of Nazi hands. He also foiled a German plan to destroy Paris with V-2 rockets. This he did by calculating the location of the German V-2 launching bases and passing this information to the U.S. Air Force, which destroyed them. Moureu was a member of the French Academy of Sciences.

Moynihan, Daniel Patrick (1927–2003) American politician. Moynihan gained prominence as a member of Governor Averell HARRIMAN's staff in the 1950s. He served as assistant secretary of labor (1963–65) in the KENNEDY and JOHNSON administrations. During the 1970s he was ambassador to India and to the UN. As urban affairs adviser to President NIXON he caused a furor by proposing a policy of "benign neglect" toward welfare recipients. Elected to the U.S. Senate as a New York Democrat in 1978, he supported a strong defense, criticized President REAGAN's Latin American policies and took a liberal approach to domestic issues. Moynihan decided not to run for reelection in 2000 and was succeeded by First Lady Hillary Rodham Clinton.

Mozambique (formerly: Portuguese East Africa) East coastal African nation south of Tanzania, bordering Zimbabwe, Malawi and Zambia to the west, South Africa to the south. Until recent times, the Portuguese dominated Mozambique for nearly 400 years, during which it had been used as a dumping ground for convicts, when Portugal's power waned in the 18th century, and later for slave trading, owing to heavy labor demands from Brazil in the late 18th and early 19th centuries. Actual control of the colony was wrested from Portugal for the most part, by renegade settler and native rebellions during the 19th century; the interior of Mozambique was not to be fully regained until 1920. The economy of the colony was

successfully developed, by Portugal's utter exploitation of Mozambique's native population. Its capital, the town of Mozambique, was replaced in 1907 by Lourenço Marques, renamed Maputo in 1976.

After the outbreak of guerrilla warfare in ANGOLA in 1961, PORTUGAL begrudged the colony token reforms, but not until 1964 did the Mozambique National Liberation Front, FRELIMO, openly declare war against the colonial government, which mired Portugal in a rapidly escalating, costly war. In 1974 the government in Lis-

bon was overthrown, and the new regime moved quickly to negotiate with the rebels. In 1975 Mozambique became an independent nation, with Samora MACHEL, Frelimo's former leader, as the new socialist head of state. War was declared with RHODESIA, where border clashes were frequent in 1976, and ZIMBABWE guerrillas operated out of Mozambique until 1979, when Rhodesia gained independence and emerged as the nation of Zimbabwe. It is estimated that 600,000 people died in the war. President Machel died in a suspicious

MOZAMBIQUE

1951	Mozambique becomes a province of Portugal.
1964	Armed struggle against Portuguese commences.
1975	Mozambique gains independence from Portugal; Samora Machel becomes ruler.
1976	Mozambique closes its border to Rhodesia in support of that country's guerrilla movement; the Rhodesian intelligence service forms and fosters the Mozambique National Resistance, which institutes terror campaign.
1986	Machel dies in mysterious plane crash and is succeeded by his foreign minister, Joaquim Chissano.
1989	Joint UNICEF/Mozambican report estimates that 600,000 have been killed in the civil war and 494,000 have died of malnutrition.
1990	Mozambique legislature adopts new constitution designed to establish a Western-style democracy.
1992	President Chissano signs peace accord with the anti-communist movement Renamo.
1994	President Chissano is elected president in the first ever multiparty elections, and Frelimo wins a narrow majority in the assembly.
1995	UN peacekeepers leave the country.
1999	Frelimo candidates win a majority of seats in elections to the assembly. Chissano is reelected president.
2000	The worst floods in 50 years ravage the country; international donors pledge \$453 million in relief.
2004	Frelimo's Armando Guebuza defeats Afonso Dhlakama of Renamo in presidential elections.

plane crash (Oct. 1986) and was succeeded by Foreign Minister Joaquim CHISSANO. In 1992 Chissano signed a peace accord with the anticommunist rebel organization Renamo. In 1995, a year after Chissano's reelection, UN troops departed because it appeared that the country's political situation had stabilized. However, subsequent developments—including allegations of corruption in the 1999 presidential election in which Chissano won a third term; the deaths of several imprisoned opposition supporters in November 2000; and the November 2002 allegations that Chissano was involved in the 2000 murder of jour-

nalist Carlos Cardoso—revealed serious political problems for the country. Chissano declined to run for another term in the 2004 elections, in which Armando Guebaza was elected president.

MPLA (People's Movement for the Liberation of Angola) A socialist movement that fought alongside UNITA and FNLA between 1961 and 1975 to secure Angolan independence from Portuguese rule (see ANGOLAN WAR OF INDEPENDENCE). After independence (November 10, 1975) it fought a civil war with UNITA and FNLA for control of the country; it was aided by CUBA.

Its People's Republic was eventually recognized as the true government of ANGOLA. (See also ANGOLAN CIVIL WAR.) In the 1990s the MPLA attempted to resolve its disputes with UNITA through diplomatic negotiations, such as the BICESSE ACCORD (1991), and the LUSAKA ACCORDS (1994). However, UNITA failed to abide by either agreement until its leader, Jonas Savimbi, was killed in 2002.

Mravinsky, Yevgeny Alexandrovich (1903–1988) Soviet conductor renowned for his interpretations of the Russian classics, particularly the symphonies of Tchaikovsky. Mravinsky led the Leningrad Philharmonic from 1938 until his death and was credited with transforming it into one of the world's great orchestras. Outside the USSR, he was known largely through his many recordings. He led the first performances of Dmitri SHOSTAKOVICH's fifth, sixth, eighth, ninth and tenth symphonies.

MTV A cable-based television network originally devoted to broadcasting music videos. Created in 1981, the network's original list of investors included Warner Communications and American Express, but was soon purchased by Viacom, Inc. Originally, MTV's programming schedule was dominated by the broadcast of music videos of various artists in the popular music genre of "soft rock," interspersed with commercials purchased by advertisers. However, by 1985 it became clear that more and more music fans of Generation X, the original target audience of MTV, were developing an interest in the genres of "heavy metal" or "METAL MUSIC," and "HIP-HOP" or rap music, and so MTV began to broadcast music videos from heavy metal groups like Van Halen and Metallica, and rap artists like Run DMC and Jam Master Jay. In 1985 MTV Networks launched Video Hits 1, a network designed to appeal to a more adult music audience. In 1989 MTV began to experiment with its programming lineup by reducing the number of music videos the network aired and introducing more programming it produced, such as the Cindy Crawford-hosted fashion show *House of Style* (1989), the animated series *Beavis and Butthead*, and the reality television series *The Real World* (1992).

Throughout the 1990s MTV continued this trend with additional original programs like *Total Request Live* (TRL), *Road Rules*, *MTV Cribs* and its annual *Video Music Awards*. During the 1990s, MTV also began to encourage greater voter registration among its audience. In 1992 it created *Rock the Vote!*, an organization dedicated to registering young adults 18 to 25 years old for local, state and national elections.

Mubarak, Hosni (1928–) President of EGYPT (1981–). Mubarak began his career in the Egyptian air force, rising through the ranks to become a squadron and then fighter brigade commander. After Egypt's defeat by ISRAEL in the SIX-DAY WAR (1967), Mubarak was appointed director of the Egyptian Air Academy. President NASSER appointed him air force chief of staff in 1969; in 1972 he was made commander in chief of the air force by President Anwar el-SADAT. In October 1973, during the ARAB-ISRAELI WAR OF 1973, he was promoted to lieutenant general; in 1975 Mubarak was appointed vice president of Egypt. He headed Egyptian delegations to the ORGANIZATION OF AFRICAN UNITY conferences in 1975 and 1976 and in 1981 was elected vice chairman and then secretary general of Egypt's ruling National Democratic Party. In October 1981, following the assassination of Sadat, Mubarak was elected president of Egypt in a national referendum. Although lacking the charisma of his predecessors, Mubarak has proved a capable leader. Faced with serious economic and political problems at home and in the region, he has generally continued Sadat's pro-Western policies and is the leading Arab moderate in seeking peaceful coexistence rather than confrontation with Israel. Mubarak supported the U.S. coalition against IRAQ during the PERSIAN GULF WAR. Mubarak survived a November 1995 assassination attempt masterminded by Islamist enemies. With the dawn of a new millennium, Mubarak has maintained an active role in international affairs. In 2000 he involved himself in the Israeli-Palestinian peace process, and attempted to broker an accord between PALESTINIAN AUTHORITY president Yasir ARAFAT and Israeli prime minister Ehud BARAK. In 2005 Egypt permitted multiparty elections

for the first time, but Mubarak's control of the electoral machinery assured his reelection despite allegations of fraud by rival candidates.

muckrakers Name applied to American social and political critics writing during the first decade of the 20th century. The writers, most of whom wrote for mass circulation magazines such as *Colliers*, *McClure's* and *Everybody's*, attempted to expose political and business corruption as well as problems such as child labor and prostitution. The term was derived from a 1906 speech by Theodore ROOSEVELT in which he criticized the writers for an interest in turning up only filth. Among the most famous muckrakers were Lincoln STEFFENS, Ida TARBELL and Upton SINCLAIR. The muckrakers prepared the way for many of the social and political reforms of the Progressive period including child labor and pure food legislation, greater regulation of business and direct election of senators. The public lost interest in the writers after 1912, but their influence was long-lasting.

Muddy Waters (1915–1983) American musician. The acknowledged king of the Chicago BLUES style of music, he was credited with having led the first electric blues-rock band using few players and maximum amplification. He began singing and playing guitar in the Mississippi Delta around 1930, and continued performing into the 1960s. He exerted a significant influence on modern popular musicians, including the ROLLING STONES.

Mugabe, Robert (1924–) African rebel leader, prime minister of ZIMBABWE (1980–). A member of the Shona tribe, Mugabe was educated at the University of South Africa and the University of London. He began his professional career as a teacher in the 1950s and his political career as a member of a group that opposed Rhodesia's white rule and favored independence. Detained by Rhodesian authorities in 1962, he fled to Tanzania and was a cofounder (1963) of the Zimbabwe African National Union (ZANU). Imprisoned by the Ian SMITH government from 1964 to 1974, he joined with Joshua NKOMO in 1976 and became joint leader of the Patriotic Front (PF).

Mugabe became ZANU's sole leader in 1975, and, as head of the Zimbabwe African National Liberation Army, he led a guerrilla war (1976–79) against the Rhodesian regime and the government of Abel Muzorewa. After the cease-fire, Mugabe and the ZANU-PF were victorious in the new nation's elections; and he became Zimbabwe's first prime minister. In 1987 a merger was negotiated between his ZANU-PF and Nkomo's opposition party, ZAPU. That same year, Mugabe engineered the passage of a new constitution under which he was appointed executive president and head of state. In August 2002 Mugabe ordered the seizure of farmland belonging to nearly 3,000 white commercial farmers, as the economy declined drastically.

Muggeridge, Malcolm (1903–1990) British journalist, author, social critic and television personality. Muggeridge was known for his caustic wit and iconoclastic views that frequently offended both the right and the left. Initially an admirer of Soviet COMMUNISM, he changed his mind after spending time there in the early 1930s as a journalist for the *Manchester Guardian*. He subsequently became a committed Christian. During WORLD WAR II, Muggeridge worked for British intelligence in Africa. From 1953 to 1957 he served as editor-in-chief of *Punch* and was credited with helping to sharpen the magazine's humor. After leaving *Punch* he turned to television journalism and book reviewing. His 1957 article, "Does England Really Need a Queen?" provoked a national controversy in Britain; he also ruffled feathers with his outspoken opinions on U.S. presidents EISENHOWER and KENNEDY. In the 1960s Muggeridge became a leading voice of traditional CONSERVATISM and denounced the COUNTERCULTURE. His book *Jesus Reconsidered* (1969) described his spiritual journey. His other books include *Something Beautiful for God: Mother Teresa of Calcutta*, *Confessions of a Twentieth-Century Pilgrim* and *Chronicles of Wasted Time: An Autobiography*.

Muhammad, Elijah (Elijah Poole) (1897–1975) American Black Muslim leader. Son of a Baptist minister, in 1923 he moved with his family to Detroit to find work. He experienced unemployment and welfare, and devel-

oped a bitter hostility to public assistance. In 1931, Wali Farad, the founder of Nation of Islam, renamed Poole as Muhammad. He was named Messenger of Allah in 1934 at Farad's disappearance. The Muslim faith grew under Muhammad's leadership and, after his death, continues to grow under the leadership of his son, Wallace.

Muir, Edwin (1887–1959) Scottish poet, essayist, novelist and translator. Muir is regarded by such critics as T. S. ELIOT as one of the finest English-language poets of the 20th century. Born on Orkney Island off the north coast of Scotland, Muir never received a university education, working instead at a series of dreary factory jobs through his 20s. By dint of self-education and his passion to write, he succeeded in establishing himself as an author of eminence. His most notable volumes of poetry are *Journeys and Places* (1937), *The Narrow Place* (1943), *One Foot in Eden* (1956) and the posthumous *Collected Poems* (1960). Muir's poignant *Autobiography* (1954) remains a classic of that genre. As a literary critic, he produced the influential *Structure of the Novel* (1928) and was invited to give the Charles Eliot Norton Lectures at Harvard University (1955–56), which were subsequently published as *The Estate of Poetry* (1962). Muir's best novel is *The Marionette* (1927). He and his wife Willa Muir were the first to translate the works of Franz KAFKA into English.

Muir, John (1838–1914) American naturalist and conservationist. Born in Dunbar, Scotland, he immigrated to the U.S. in 1849, studied at the University of Wisconsin and moved to California in 1868. Devoted to the American wilderness, he traveled throughout the U.S., spending years studying the flora and geology of the Yosemite Valley and Alaska, where he discovered the Muir glacier. He also traveled extensively in Australia, India and Russia. Muir's love and respect for America's wild places helped to convince President Theodore ROOSEVELT to preserve wilderness areas in an extended national park system. Roosevelt also established (1908) the Muir Woods National Monument in California to honor the naturalist's achievements. Among Muir's books are *The*

Mountains of California (1894), *Steep Trails* (1918) and the posthumously published journals of *John of the Mountains* (1938).

mujahideen Radical Islamic guerrilla fighters. In December 1979, following the assassination of Afghani leader Hafizullah Amin, Soviet forces entered AFGHANISTAN and imposed a pro-Soviet government upon the country under the leadership of Babrak Karmal. In response to this Soviet invasion, small bands of guerrilla fighters composed of men from Afghanistan and other countries in the Middle East (such as the Saudi-born Osama BIN LADEN) organized an insurgency against the Soviet-supported government and the Soviet forces in Afghanistan that ensured the government's hold on power. Calling themselves mujahideen ("Islamic fighters"), these loosely coordinated bands received military support and training from both the Carter and Reagan administrations, both of which sought to deny the SOVIET UNION a greater presence in Central Asia. For 10 years the mujahideen waged a ceaseless war against the Soviet forces, creating a situation for Moscow that many observers equated with the experience of the U.S. in the Vietnam War. In 1989 Soviet president Mikhail GORBACHEV decided that the military operation in Afghanistan was too costly, and announced the withdrawal of Soviet forces by the end of the year. Between 1989 and 1992 the mujahideen continued their efforts to overthrow the Soviet-installed government in Kabul. In 1992 they succeeded in entering the capital city, deposing the government and declaring an Islamic republic headed by Burhanuddin RABBANI. Following their victory, conflicts among the various mujahideen factions led to infighting. In 1994 a group of young Islamic fundamentalists called the TALIBAN began to gain the support of mujahideen such as bin Laden's AL-QAEDA, by calling for the strict application of Islamic law throughout the country. By 1996 the Taliban and their mujahideen supporters had captured Kabul and gained control of most of Afghanistan; the new regime waged a relentless campaign against rival factions of mujahideen, which had regrouped as the NORTHERN ALLIANCE. Even after the expulsion of the Taliban from power fol-

lowing the U.S.-led invasion of Afghanistan in October 2001, mujahideen continue to operate in Afghanistan, frustrating the efforts of Afghan president Hamid KARZAI to establish a strong central authority throughout the country.

Mujica Lainez, Manuel (1910–1984) Argentine novelist. Mujica was a leading figure in the Latin American school of MAGIC REALISM. His historical and fantastic novels were based on South American myths. Mujica Lainez's *Bomarzo*, banned by the Argentine government, made him known internationally and became a worldwide sensation as an opera with music by Alberto GINASTERA. He won Argentina's national prize for his 1957 novel *Invitados en el paraíso*.

Mukden (Chinese: Shen-Yang) Capital of China's province of Liao-ning, northeast on the Hun River, controlling north-south routes along the plain of south Manchuria. During the Russo-Japanese struggle for control of MANCHURIA it became a stronghold, first conquered by the Russians and then taken by the Japanese between February 19 and March 10, 1905, after the battle of Mukden. In 1924 the warlord Chan Tso-Lin made it his headquarters during the CHINESE CIVIL WAR, he was assassinated there in 1928. On September 18, 1931, a railroad was blown up, the so-called Mukden or Manchurian Incident, used by Japan to justify the invasion of Manchuria and the setting up of its puppet regime, MANCHUKUO. Under Japanese occupation from that time until 1945, Mukden was returned to Nationalist Chinese authority only to become a major battle site during the CHINESE CIVIL WAR OF 1945–49. In 1947–48, after 10 months of heavy fighting and severe casualties, where thousands starved and the Nationalist force was annihilated, Mukden fell to communist forces on November 1, 1948. It continued as a base for further conquest.

Mulder, Cornelius Petrus "Connie" (1925–1988) South African politician. Mulder almost defeated P. W. BOTHA for the prime ministership of SOUTH AFRICA in 1978. Shortly thereafter, his career in the ruling National Party was ruined by the exposure of his involvement in a secret influence-buying

campaign. This scandal, known as "Muldergate," forced his resignation as minister of information. Later, he was forced to resign as leader of the National Party, and, finally as a member of the parliament. Mulder reentered politics in May 1987, when he was returned to Parliament as a candidate of the extreme right-wing Conservative Party.

Muller, Hermann Joseph (1890–1967) American geneticist. Muller is considered by some the most influential geneticist of the 20th century. Born in New York City, he earned his Ph.D. from Columbia University in 1916. He began to study mutations at a number of institutions, including the Rice Institute in Houston, Texas, the Berlin Institute for Brain Research, and the Moscow Institute of Genetics, before becoming in 1945 a professor of zoology at Indiana University, where he worked for the rest of his career. Among Muller's important contributions to genetics was his discovery in 1926 that X RAYS are capable of causing genetic mutations, which furthered research by allowing investigators to create mutations in the laboratory. Muller was awarded the 1946 NOBEL PRIZE for physiology or medicine.

Mullin, Willard (1902–1978) American sports cartoonist. Mullin's distinctive pen-and-ink drawings appeared in the *New York World-Telegram* (1934–66), *Life*, *Look*, the *Saturday Evening Post*, and many other publications. His best-known creation was probably the character "the Brooklyn Bum," who symbolized the Brooklyn Dodgers baseball team and their fans. In 1971 the National Cartoonists Society voted Mullin "The Sports Cartoonist of the Century."

Mullis, Kary B. (1944–) Recipient of the 1993 Nobel Prize in chemistry. Born in Lenoir, North Carolina, Mullis received his B.S. degree in chemistry from the Georgia Institute of Technology in 1966 his Ph.D. in biochemistry at the University of California at Berkeley in 1972. He joined the University of Kansas Medical School in 1973 as a postdoctoral fellow in pediatric cardiology, and specialized in pulmonary vascular physiology, and then did two years of postdoctoral work at the University of California at San Francisco in pharmaceutical chemistry.

Two years later he accepted a position at the Cetus Corporation in Emeryville, California. Between 1979 and 1986 he worked on issues related to the chemical structure and nature of DNA, where he developed and patented the process known as a polymerase chain reaction (PCR), a method for exponentially increasing the duplication of DNA, producing billions of copies of single strands of DNA within a few hours. In addition to facilitating great advances in the fields of biotechnology, forensic science and genetic engineering, PCR also provided the scientific basis for Michael Crichton's novel, *Jurassic Park*. In 1986 Mullis left Cetus to become the director of molecular biology at Xytronyx, Inc. At Xytronyx Mullis focused his efforts on advancing the company's DNA technology and photochemistry divisions. In 1993 he won the Nobel Prize in chemistry for his development of PCR. Her other honors include the California Scientist of the Year (1992), the Thomas A. Edison Award (1993) the Japan Prize (1993), and membership in the National Inventors Hall of Fame (1998).

Mulroney, (Martin) Brian (1939–) Prime Minister of CANADA (1984–93). Born in Quebec, Mulroney received his law degree from Laval University in 1963. He became active in the PROGRESSIVE CONSERVATIVE PARTY while in college, after which he became a labor lawyer. He received national attention when he assumed presidency of the troubled Iron Ore Company in 1976, settled its labor disputes and turned a profit. He left the company in 1983 when he became leader of the Progressive Conservative Party. His party won the elections (1984) and he became prime minister. Mulroney had never held an elected office before and was the first leader of Canada to come from Quebec in 90 years. In 1988 Mulroney signed a trade agreement with President REAGAN that aimed to reduce trade barriers between the U.S. and CANADA; the Liberal Party opposed it. In the elections later that year, the Progressive Conservatives maintained a majority, and Mulroney remained prime minister. In 1989 he proposed a budget targeting reduction in Canada's deficit by half by the year 1994. Mulroney resigned as prime minister in 1993 as a result of declining popularity

due to the introduction of a new sales tax and the failed separatist referendum in Quebec in October 1992.

Mumford, Lewis (1895–1990) American cultural critic, urban planner, historian, political commentator and self-described social philosopher. Born in New York City, Mumford attended City College (but did not graduate) and later took graduate classes at Columbia University and the New School for Social Research. In his writings and lectures, Mumford examined almost every facet of modern life, including architecture, science, technology, literature and city planning. Humanistic and antitechnocratic in his outlook, Mumford was an outspoken critic of architectural congestion and its dehumanizing influence. He published his first book, *The Story of Utopias*, in 1922 while also contributing to various journals. His writing led to his teaching an innovative course on American architecture at the New School. In 1923 Mumford helped found the Regional Planning Association of America. Beginning in the 1930s, he wrote a column, "Sky Line," for *THE NEW YORKER*, reviewing architecture and discussing the urban landscape of New York and other cities. Mumford is perhaps best known for the "Renewal of Life" series, which consists of *Technics and Civilization* (1933), *The Culture of Cities* (1938), *The Condition of Man* (1944) and *The Conduct of Life* (1951). These works follow the history of cities from the 10th century and set forth Mumford's ideas on the betterment of city life. Other important works include *The City in History* (1961), *Technics and Human Development* (1967) and *The Pentagon of Power* (1971). In 1986 Mumford was awarded the National Medal of Arts.

Munch, Charles (1891–1968) The most important French conductor of his generation, excepting only Pierre MONTEUX. Although he was born in Strasbourg, most of his early training and performing (as a violinist) was in Germany, where he was concertmaster of the Leipzig Gewandhaus Orchestra under Wilhelm FURTWÄNGLER. After refusing to become a German national, he moved to Paris and began to conduct the Straram Orchestra in 1932.

Other positions followed—principal conductor with the Paris Philharmonic Orchestra and conductor of the Paris Conservatoire Orchestra. During WORLD WAR II he declined the directorship of the Paris Opera, refusing to collaborate with the Nazis. He was awarded the Legion of Honor after the war for his efforts on behalf of the French RESISTANCE. In 1948 he succeeded Serge Koussevitzky as conductor of the Boston Symphony Orchestra, remaining for the next 14 years. Not as temperamental as Koussevitzky or as authoritarian as George SZELL, Munch was most noted for his performances of the French repertoire—the ballets of RAVEL, POULENC and HONEGGER—and for his characteristic gentle humility and temperament. He conducted without a baton and usually from memory. “I came to conducting rather late,” he said with whimsical candor in his book, *I Am a Conductor* (1954), “only because I am too stupid to do anything else.”

Munch, Edvard (1863–1944) Norwegian painter; one of the most striking and influential painters of the 20th century. Munch stands alongside Paul Cézanne, Vincent Van Gogh and James Ensor as one of the key founders of the artistic school of EXPRESSIONISM. He held that painting should go beyond the depiction of nature and render visible the intense states of the soul, thereby illuminating the nature of human existence. Munch's most famous painting, *The Cry* (1893), illustrates the expressionist method by its utilization of line and color to underscore the fear and terror experienced by an isolated, screaming woman on a bridge over swirling water. Munch produced large numbers of portraits and landscapes and was also a gifted woodcut artist.

Muni, Paul (Muni Weisenfreund) (1896–1967) Austrian-born character actor who was a major HOLLYWOOD star in the 1930s. Muni came to America with his family and first appeared in Yiddish theater in New York City. He debuted on Broadway in 1926 and soon moved into film, where he was quickly nominated for an ACADEMY AWARD as best actor for his performance in *The Valiant* (1929). His film career was established with *Scarface*

(1931), in which he played a gangster resembling Al CAPONE. Muni subsequently gave notable performances in *The Story of Louis Pasteur* (1936), for which he won an Academy Award for best actor; *The Life of Emile Zola*; and *Juarez* (1939). He played a Chinese in the 1937 film adaptation of Pearl BUCK's *The Good Earth* and starred in the classic *I Am a Fugitive from a Chain Gang* (1933). After the 1930s he acted mainly on Broadway and made few films; his final film appearance was in *The Last Angry Man* (1959).

Munich Olympics massacre On September 5, 1972, during the 1972 summer OLYMPIC GAMES in Munich, West Germany, Palestinian guerrillas of the BLACK SEPTEMBER organization attacked and occupied the Israeli athlete quarters. They killed two Israelis and took nine others hostage. German security forces subsequently attempted to rescue the hostages as they were being taken out of the country at Munich's airport. During the attempt, the remaining nine Israelis were killed, as were two Germans and five Palestinians.

Munich Pact Agreement reached at the Munich Conference of September 29–30, 1938, by the heads of state of Germany (HITLER), Great Britain (CHAMBERLAIN), France (DALADIER) and Italy (MUSSOLINI). The agreement acceded to Hitler's demands by providing for Germany's occupation of the SUDETENLAND, a strategically important German-speaking region of Czechoslovakia. It also stipulated that plebiscites were to be held, which would have given residents a voice in the change, but the votes never took place. No Czech representative was present at the conference. Coming at a time of increased aggressive activity by Germany, the agreement was hailed by Chamberlain as a step toward peace in our time, and was simultaneously condemned by Winston CHURCHILL. The Munich Pact did not serve to halt, or even to slow Germany's march on Europe, and it is widely considered a blatant act of prewar APPEASEMENT—one that pushed Europe even closer to the brink of WORLD WAR II.

Muñoz Marín, Luis (1898–1980) Governor of PUERTO RICO (1948–64). An early believer in Puerto Rican inde-

pendence, Muñoz later advocated economic association with the U.S. He helped found the Popular Democratic Party in 1938. As Puerto Rico's first elected governor, he implemented Operation Bootstrap. This program brought roads and schools to backward rural areas and helped diversify the island's economy.

Munsey, Frank Andrew (1854–1925) U.S. magazine and newspaper publisher. *Munsey's Magazine* (1889) was the nation's first illustrated general-circulation magazine. He also pioneered the publication of mass-market, all-fiction magazines, printed on rough, wood-pulp paper and aimed at the general reading public; his editorial innovations and development of new writers and genres, like science fiction, drove the circulation of his magazines, like *Argosy* and *All-Story*, to unheard-of figures, creating a media form that splashily dominated U.S. newsstands for the first half of the 20th century. He eventually acquired a host of large-circulation newspapers in major U.S. cities. His practice of buying out competing newspapers made him a pioneer in newspaper consolidation.

Munson, Thurman (1947–1979) American baseball player. A star catcher, he was captain of the New York Yankees. He was the only Yankee ever to be named both American League rookie of the year (1970) and most valuable player (1976). An amateur pilot, he died when the private jet he was flying crashed near Canton, Ohio.

Muppets See JIM HENSON.

Murder, Inc. Popular name for a group of professional killers who worked on assignment for organized crime during the 1930s. It originated as a gang in Brooklyn, New York, and came to be controlled by the labor racketeer Louis (Lepke) Buchalter, who expanded the organization's activities to cover the entire nation. Known to organized crime as the Troop, the group was also led by mobster Albert Anastasia. During its 10 years of operation, Murder, Inc., was responsible for somewhere between 100 and 500 killings of underworld figures—the most prominent of whom was probably “Dutch” SCHULTZ. Its activities were

brought to light and ended in the early 1940s by the investigations of special prosecutor Thomas E. DEWEY, and many of the group were either convicted or killed. Later mob hits, which have continued to this day, have been executed on a less organized basis.

Murdoch, Iris (Alice Irene Murdoch) (1922–1999) British author, widely regarded as one of the most important English-language novelists of the 20th century. Born to an Anglo-Irish family in Dublin, she studied philosophy at Somerville College, Oxford. After World War II she worked briefly for the UNITED NATIONS Relief Agency (UNRA). She later became a lecturer in philosophy at St Anne's College, Oxford, and has published a study of Jean-Paul SARTRE and several works of philosophy. In the early 1950s she began writing fiction that explored such philosophical issues as good and evil, randomness and choice, and freedom and responsibility. Her plots are simultaneously gothic and witty; they usually involve a cast of eccentric characters in complex relationships. In Murdoch's world, love is both a disruptive and a healing force that has unforeseen dramatic consequences. Although Murdoch professed to be an agnostic, her more than 25 novels often reflect consciously religious concerns. Among her books are *Under the Net* (1954), *The Bell* (1958), *The Unicorn* (1963), *The Black Prince* (1973), *The Good Apprentice* (1984) and *The Message to the Planet* (1990).

Murdoch, Keith Rupert (1931–) Australian-American communications magnate. Educated at Oxford, Murdoch began his career in Adelaide, Australia, in 1953 when he inherited two modest-sized newspapers from his father. Returning to England in 1968, he started his British newspaper empire with the acquisition of *The News of the Week* (1968). His newspaper holdings grew to include London's three largest dailies, and he became famous for his shrill and often sleazy tabloids. In 1976 he began building his American holdings with the acquisition of *New York* magazine and the *New York Post* (later sold). He became a U.S. citizen in 1985. By the 1990s Murdoch controlled the world's first global media business encompassing television, publishing and entertainment. In Australia, he owned an airline, nine

magazines and more than 100 newspapers; in Great Britain, five national newspapers, eight magazines and Sky T.V. (a four-channel satellite system); in the U.S., he had 10 magazines, seven television stations, two magazines, a book publishing house (Harper-Collins, formerly Harper & Row) and the Fox television and motion picture conglomerate. Immensely successful yet beset by debt, Murdoch turned increasingly to innovations in electronic journalism. In October 1996 Murdoch launched FOX News Channel, a 24-hour competitor to Cable News Network (CNN). As majority shareholder and managing director of News Corporation, one of the world's largest media conglomerates, Murdoch has exercised great influence on the dissemination of news across the globe.

Murphy, Audie (1924–1971) American WORLD WAR II hero and movie actor. Attacked with his unit near Colmar, France, on January 26, 1945, Murphy used the machine gun on a burning tank destroyer to hold off six tanks and 250 enemy troops, killing about 50. Awarded more decorations during World War II than any other individual, including the Medal of Honor, Murphy later turned to acting and appeared in such films as *To Hell and Back* (1955). He made about 40 films, but by 1960 his popularity had faded. Turning to business he was unsuccessful and declared bankruptcy. He was killed in a light plane crash.

Murphy Brown American television series (1988–98). On November 14, 1988, CBS introduced the situation comedy *Murphy Brown* in its Monday night fall lineup. Starring Candice Bergen as the title character, a journalist and coanchor on the fictional network new program, *FYI* (For Your Information). The show revolved around Brown's private life and professional career. In 1992 *Murphy Brown* briefly became an important issue in the reelection campaign of President George H. W. BUSH and his vice president, Dan Quayle. Quayle publicly criticized one of the plot developments in the 1991–92 season of *Murphy Brown*, in which Brown became pregnant and decided to raise her child as a single mother. Quayle argued that the character's belief that she could raise her child independent of a father represented a sad commentary on the destruction of

the American family and traditional "family values." The controversy and attention surrounding Brown's single motherhood helped make the sitcom the fourth most popular television program in the 1992–93 season. However, after the defeat of the Bush-Quayle ticket, *Murphy Brown* entered a slump of its own, falling from the number four television program in 1993 to number 20 in 1996. The series finale of *Murphy Brown* was aired on May 18, 1998. During its 10 seasons, *Murphy Brown* won 18 Emmy Awards.

Murray, Sir (John) Hubert (1861–1940) Australian colonial administrator. Born in Sydney, the brother of Gilbert Murray, he was educated there and at Oxford University. He served in the BOER WAR and later practiced law in Australia. Appointed a colonial officer in Papua New Guinea in 1907, he became known for his humane treatment of the Papuans; the following year he was named the territory's lieutenant governor, a post he held until his death. His administration allowed economic development of the area without the enormous toll on its native population that was taken in many other colonial enterprises. Murray was knighted in 1925.

Murray, Les(lie Allan) (1938–) Widely considered the foremost Australian poet of his generation and one of the leading English-language poets of his time. Raised on a farm in New South Wales, in his mid-30s Murray began devoting himself solely to his writing. His interests are exceptionally wide-ranging, and his catholic tastes and knowledge are reflected in poems that are both intimate and all-encompassing. His books include *Poems against Economics* (1972), *The Vernacular Republic* (1976) and *Dog Fox Field* (1990). Murray continued to publish throughout the 1990s, and released such works as *A Working Forest* (1997), which contained several pieces of his prose, and *Translations from the Natural World* (1992), *Subhuman Redneck Poems* (1996), *Freddy Neptune* (1998), and *Conscious & Verbal* (2000), all of which included original poems that Murray authored.

Murray, Phillip (1886–1952) American labor leader. A Scot by birth, Murray was a coal miner who rose to the presidency of the United Mine Worker's Union (UMW). The position was a

powerful one because at the time coal was a vitally important fuel in the U.S. As head of the umbrella labor organization, the Congress of Industrial Organizations (CIO), he successfully led the drive to organize the steelworkers and later became president of the steelworker's union—the United Steelworkers of America.

Murrow, Edward R. (1908–1965) American radio and television newsman, war correspondent, and federal administrator. In the words of historian Daniel J. Leab, Murrow's verbal abilities “were coupled with a superb and dramatic sense of delivery as well as with a breadth and humanity of thought.” He was born in Greensboro, North Carolina, traveled extensively as a young man in academic-related activities for the National Student Federation, and joined CBS in 1935. Soon after his assignment to Europe, war broke out. He was everywhere—flying combat missions, reporting from the concentration camps, and transmitting from the rooftops during the London Blitz: “It’s a bomber’s moon tonight . . .” After the war with partner Fred Friendly he developed the television investigative news program, *SEE IT NOW*. He was not afraid of controversy, and in a landmark *See It Now* broadcast he attacked the red-baiting tactics of Senator Joseph McCarthy in 1954: “We must not confuse dissent with disloyalty,” he declared at the end of the show, glowering into the camera through a trail of cigarette smoke; “this is no time for men who oppose Senator McCarthy’s methods to be silent.” Al-

though there were other television shows after the demise of *See It Now*—*PERSON TO PERSON*, for example, a live series of interviews by two-way hookup between Murrow in the studio and celebrities in their own homes—Murrow grew increasingly disenchanted with CBS. He left in 1961 to serve as director of the U.S. Information Agency in the KENNEDY administration. After a prolonged battle with lung cancer, he died in April 1965. Ironically, just 10 years before, June 7, 1955, the chain-smoking Murrow had narrated a two-part television series on the relationship between cigarettes and cancer.

Murry, John Middleton (1889–1957) British author and critic. While still a student at Oxford, Murry began editing *Rhythm*, a modernist magazine (see MODERNISM). He was later to serve as editor for *The Athenaeum* (1919–21) and *The Adelphi* (1923–30). In his editorial capacity he was to gain an influence over British literary life, publishing the authors Katherine MANSFIELD (whom he married in 1918); D. H. LAWRENCE (with whom Murry and Mansfield would publish the short-lived magazine, *Signature*); Virginia WOOLF; T. S. ELIOT; and VALERY—among others. Murry was an outspoken critic of the GEORGIAN poets, and his critical works include *Dostoevski* (1916), *The Problem of Style* (1922) and *Son of Woman, the Story of D. H. Lawrence* (1931). Following Mansfield’s death in 1923, Murry—who married three more times—edited her works and wrote her biography in 1932. He also wrote the autobiography *Between Two Worlds* (1935).

Musa Dagi (Musa Dagh) (Turkey) West of Antakya, rising from the Mediterranean Sea, this southern mountain peak became a battleground for the Armenians’ heroic struggle against the Turks during WORLD WAR I; depicted by Franz WERFEL in his novel *The Forty Days of Musa Dagh*.

Museum of Broadcasting, The A nonprofit, public-access repository of more than 25,000 American television and radio programs located in midtown New York City. Sensing a need for a broadcasting archive, William S. PALEY, founder and longtime chairman of CBS Inc., conceived and funded the museum in 1976. As of the early 1990s it operates on a \$2 million annual budget deriving mostly from corpora-

tions, foundations, individual philanthropists and the small contributions of people using the facilities. Three-thousand hours of additional TV programming are added each year. Dozens of private viewing/listening cubicles enable visitors to review a wide range of fare, including *HALLMARK HALL OF FAME*, the ARMY-McCARTHY HEARINGS, the Nixon-Kennedy Debates and the work of pioneering figures in broadcasting, such as Edward R. MURROW, Ernie KOVACS, Orson WELLES, Leonard BERNSTEIN, Lucille BALL, Sid CAESAR and others. All materials at the museum have been transferred to video tape, and the originals are preserved in fire-proof, climate-controlled vaults. Activities include mounting traveling exhibitions, beaming seminars by satellite to college campuses, taping seminars for the permanent collection, presenting programs at the Manhattan location and sponsoring festivals at the Television Academy of Arts and Sciences in Los Angeles. A worldwide search continues for many lost television programs and newscasts, particularly material from the TRUMAN administration—the first administration to use television broadcasts. “What we have to do is come to terms with television as a creative force,” said the museum’s president Robert Batscha. “It has been a rich part of our lives and needs to be shared with future generations.”

Museum of Modern Art Museum located in New York City that houses one of the world’s premier collections of modern paintings, sculpture and other works of art. It was founded in 1929 by a group of prominent collectors in the city and was directed by Alfred H. BARR Jr. until his retirement in 1967. At first housed in rented facilities, the collection moved to its present location in 1945. Its building, designed in 1939 by Philip Goodwin and Edward Durell STONE, was enlarged by a new wing designed by Philip JOHNSON (1962–63). The nucleus of the museum’s impressive collection is the Lillie P. Bliss bequest of 1934, which included a number of important Cézannes as well as other significant modern works. The museum’s present permanent collection includes works from all of the major movements in European and American art during the late 19th and 20th centuries. The museum includes departments of painting and sculpture, architecture, film, prints and drawings. It also maintains an extensive

Journalist Edward R. Murrow (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

reference library, as well as educational programs, loan and circulating exhibitions and programs for film and video.

Musharraf, Pervez (1943–) Pakistani military officer, and head of state of Pakistan (1999–). Born in India, in 1943, Musharraf and his family moved to Karachi, Pakistan, in 1947 following the partition of British India into INDIA and PAKISTAN. In 1964 Musharraf entered the Pakistani army and gradually moved up its ranks. In 1998 Prime Minister Nawaz Sharif selected Musharraf to become the new head of the armed forces. Soon after his elevation, renewed fighting erupted between Indian and Pakistani forces in the disputed territory of KASHMIR. Soon after the conflict started, Musharraf publicly acknowledged that Pakistan had deployed troops in the disputed region, which hurt Sharif's efforts to achieve a diplomatic solution to the conflict. In October 1999, not long after Sharif fired Musharraf for his actions during the conflict with India, Musharraf organized the overthrow of the Sharif government in a bloodless coup that established martial law and made him the chief executive of Pakistan. By June 2001 Musharraf appointed himself president and promised he would restore civilian rule by October 2002.

Musharraf drew ire from Islamic fundamentalists for his support of the U.S. campaign against the terrorist group AL-QAEDA as well as the TALIBAN, the Islamic fundamentalist group that ruled Afghanistan from 1996 to 2001 with the support of Pakistan. In April 2002 Musharraf organized a national referendum in which Pakistani voters supported an extension of his executive rule for another five years. Seven months later, Musharraf honored his pledge to restore democratic rule to Pakistan when the National Assembly, Pakistan's national legislature, was permitted to reconvene and assume some of its earlier duties.

Musial, Stan(ley Frank) ("Stan the Man") (1920–) American baseball player. A St. Louis Cardinal for 22 seasons, Musial was one of the few athletes beloved by fans in every city. A three-time Most Valuable Player, he also led the National League in batting average seven times. He batted over .300 16 times. When he retired, he held more than 25 major league records. Upon his

retirement in 1964, he began working for the Cardinals in an administrative capacity and continued to do so for over 25 years. Musial was named to the Hall of Fame in 1969, and in 1972 became the first non-Pole to be awarded Poland's Merited Champions Medal.

Musil, Robert (1880–1942) Austrian novelist. Trained first for the military and then as an engineer, Musil later studied philosophy, psychology and mathematics, earning a Ph.D. from the University of Berlin in 1908. The success of his first novel, *Young Torless* (1906), caused him to reject an academic career and to devote himself to writing. In this short fictional work, as well as in his long, unfinished novel, *The Man without Qualities* (3 volumes, 1930–42), Musil reveals profound psychological and philosophical concerns in a style of great analytic subtlety. He was also the author of short stories, plays, essays and literary criticism. When the Nazis entered Vienna in 1938, Musil and his Jewish wife fled to Switzerland, where he spent his last years in poverty and obscurity.

Muskie, Edmund Sixtus (1914–1996) U.S. politician. After practicing law, he was elected to the Maine House of Representatives (1947–51), and in 1955 became the first Democratic governor of Maine in two decades. He served in the U.S. Senate from 1959 to 1980. He also served briefly as secretary of state in 1980–81.

Mussolini, Benito (1883–1945) Italian political leader who established FASCISM in ITALY; as Il Duce ("the leader"), he was the supreme authority in Italy from 1922 to 1943. Born in Predappio in Emilia Romagna, Mussolini was originally a journalist and a socialist and was active in the left-wing Italian opposition movement around the turn of the 20th century. He spent several years in exile in Switzerland. Returning to Italy, he became a well-known figure in left-wing journalistic circles, editing a leading journal and writing articles in favor of left-wing causes. At the outbreak of WORLD WAR I (1914) he professed pacifism but soon after abruptly changed his views and urged Italy's entry into the war on the side of the Allies. He was immediately expelled from the Socialist Party. However, his editorials and speeches

Italian Fascist leader Benito Mussolini (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

helped sway Italy to enter the war on May 24, 1915. He fought in World War I and was wounded.

After the war, Mussolini continued to espouse Italian nationalism and patriotism. He built a base of support among the working class and lower middle class, and organized a paramilitary group, known as the BLACK SHIRTS. During a period of domestic violence between socialist and fascist groups, Mussolini made a bold bid for power. He led his Black Shirts in the MARCH ON ROME and demanded that King VICTOR EMMANUEL III appoint him prime minister in order to restore order (1922); to his surprise, the king agreed. Mussolini subsequently consolidated his authority and on January 3, 1925, he proclaimed Italy a fascist state, with himself as dictator. His authority was confirmed by a plebiscite in March 1929.

Mussolini was driven by visions of himself as a new Caesar who would restore Italy's greatness. In numerous speeches and decrees, he called on Italians to devote themselves to his national goals; at the same time, he quietly eliminated all political opposition. He also desired an overseas empire. On his orders Italy invaded and conquered ETHIOPIA (1935–36), now without resistance from the poorly armed Ethiopians. Although initially suspicious of German chancellor Adolf HITLER, Mussolini met with the Führer and formed an alliance with him—the Rome-Berlin AXIS, a term coined by Mussolini. The following year Mussolini joined Hitler and the Japanese government in the Anti-Comintern

Pact; shortly thereafter he formally withdrew Italy from the LEAGUE OF NATIONS. When Hitler threatened CZECHOSLOVAKIA in 1938, Mussolini played the statesman and arranged a conference among Germany, France and Britain—the conference at which Neville CHAMBERLAIN signed the MUNICH PACT.

Mussolini brought Italy into WORLD WAR II on the side of his German ally—a disastrous move for Mussolini and Italy. Despite his long insistence on military glory and discipline, the Italian forces were ill-prepared for the world war and lacked Germany's armaments, organization and fighting will. After conquering ALBANIA, Italy suffered embarrassing reversals in its invasion of GREECE and in the NORTH AFRICAN CAMPAIGN in Libya. In both cases, Mussolini relied on German aid to salvage the situation. Following the Allied invasion of Sicily, Mussolini's Grand Fascist Council deposed Il Duce (July 24, 1943) and arrested him. On September 12, 1943, he was rescued by a German ss commando team acting on Hitler's orders. He subsequently declared a new fascist republic in northern Italy, but this was little more than a puppet government beholden to Nazi Germany. As the Allies drove northward, Mussolini attempted to flee in disguise but was captured by anti-fascist Italian partisans and executed (April 27, 1945).

Mustard, Dr. William Thornton (1914–1987) Canadian surgeon. A pioneer in pediatric surgery, he was best known for an operation called the Mustard Procedure. This procedure involved rerouting the blood flow in hearts of children born with major blood vessels on the wrong side. He retired as chief of vascular surgery at Toronto's Hospital for Sick Children in 1976.

Muthesius, Hermann (1861–1927) German design theorist, writer and spokesman for design causes of the early Modern movement. Muthesius studied philosophy before training as an architect at the Berlin technical college. He worked for several architects before becoming an official architect for the Prussian government in 1893. In 1896 he was sent to the German embassy in London to study and report on English design developments of the time. In articles published in

Germany, Muthesius reported on the ideas and work of William Morris and the Arts and Crafts movement and on Charles Rennie MACKINTOSH. Back in Germany (1904 to 1905), he published the three-volume *Das Englische Haus*, which brought the concepts of British domestic architecture and design to a German readership. Muthesius was an important figure in the formation of the DEUTSCHER WERKBUND (1907) and continued to encourage design quality through various roles in that organization. He exerted significant influence not only on the development of design and taste in Germany by introducing MODERNISM to that country in the 1920s but also on the character of German work since World War II.

mutual assured destruction (MAD)

Theory and strategy used to maintain the balance of power between the U.S. and the USSR during the COLD WAR. The MAD theory held, paradoxically, that the large number of nuclear weapons in each nation's arsenal would prevent these weapons from ever being used, because both nations would be destroyed in any nuclear war.

Muzorewa, Abel (1925–) Zimbabwean churchman and political leader. Bishop of the United Methodist Church in Southern Rhodesia in 1968, he was founder and president of the African National Council in 1971. Muzorewa mobilized African opinion against the proposed Rhodesia settlement of 1971–72. A member of the executive council of the transitional government in Zimbabwe-Rhodesia (1978–80), he was considered by the British government and Rhodesian whites to be more conciliatory than his rivals. However, he was heavily defeated by Robert MUGABE in the 1980 election. Muzorewa's autobiography is *Arise and Walk*.

Myanmar See BURMA.

Myer, Dillon S. (1891–1982) American government administrator. As director of the **War Relocation Authority** (1942–46), Myer supervised the internment of more than 100,000 Japanese-Americans during WORLD WAR II. However, he advocated the abolition of the agency and the return of Japanese

Americans to their homes. He was later cited by the Japanese-American Citizens League as a champion of human rights and common decency. After the war he served as commissioner of Indian affairs and as head of the Federal Public Housing Authority.

My Lai massacre Atrocity that took place on May 16, 1968, in the South Vietnamese hamlet of My Lai during the VIETNAM WAR. A U.S. platoon headed by **Lt. William L. Calley** invaded the town, a supposed VIET CONG stronghold, rounded up its civilian population and shot to death 347 unarmed men, women and children. The incident came to light in 1969 and was then investigated by the Army. Although 13 officers and enlisted men were eventually charged with war crimes, only Lt. Calley was found guilty. Convicted on March 29, 1971, he was sentenced to life imprisonment. The verdict caused a great deal of controversy, and the incident helped to fuel the ANTIWAR MOVEMENT. Calley's sentence was eventually reduced to 10 years, and he was paroled in March 1974.

Myrdal, Alva (1902–1986) Swedish diplomat. A cowinner of the 1982 Nobel Peace Prize, she first became known in the 1930s as a feminist, educator and sociologist. Later in her career, she held two major posts at the UNITED NATIONS. She also served as Sweden's ambassador to India, was a member of the Swedish parliament and a cabinet minister. Her husband, Gunnar Myrdal, was Nobel laureate in economics (1974).

Myrdal, (Karl) Gunnar (1898–1987) Swedish economist and social scientist. His seminal work *An American Dilemma: The Negro Problem and Modern Democracy* (1944) left a deep mark on the history of race relations in the U.S. He helped draft many social and economic programs in Sweden and was also a vigorous advocate of land reform in South Asia. As a UNITED NATIONS official he was an early promoter of East-West détente, and as an economist he criticized orthodox ways of thinking and pioneered new ones. He was cowinner of the NOBEL PRIZE in economics in 1974. His wife, Swedish diplomat Alva Myrdal, was cowinner of the 1982 NOBEL PEACE PRIZE.

Nabokov, Vladimir Vladimirovich (1899–1977) Russian author. An important and original voice in fiction and literary criticism, Nabokov left Russia in 1919, studying at Cambridge, in Berlin and in Paris before settling in the U.S. in 1940. Nabokov was a lecturer at Wellesley College and a professor of Russian Literature at Cornell University. Nabokov is perhaps best known for the controversial novel *Lolita* (1958), which depicts a middle-aged man's sexual obsession with a young girl. His writing is characterized by linguistic resourcefulness and perceptive narrative. His later works were written in English, which he translated to his native Russian. His other fiction includes *Mary* (1926), *Pale Fire* (1962) and *Look at the Harlequins!* (1974). Nabokov also wrote volumes of short stories and literary criticism, such as *Lectures on Literature* (1980) and his memoirs *Speak, Memory* (1967).

Nadelman, Elie (1882–1946) Polish-American sculptor. Born in Warsaw, he studied art in his native city and in Paris, where he lived from 1904–14. His work was exhibited in the U.S. at the Armory Show in 1913, and he emigrated to the U.S. the following year. Working mainly in metal or wood, he employed a number of styles in portraying the human form as simplified and often symbolic. His best known work is probably the elegantly

Russian novelist Vladimir Nabokov (LIBRARY OF CONGRESS)

jaunty bronze *Man in the Open Air* (c. 1915, Museum of Modern Art, New York City).

Nader, Ralph (1934–) American consumer advocate. Born in Winsted, Connecticut, Nader attended Princeton University and Harvard Law School. His role as a consumer activist began with his book *Unsafe at Any Speed* (1965), a study of defective automobile design and its relationship to accidents. This book and Nader's testimony before Congress (1966) were instrumental in bringing about the passage of the National Traffic and Motor Vehicle Safety Act of 1966. Two years later, the young lawyer organized a group of college in-

terns in Washington, dubbed Nader's Raiders, into an investigative team. This group formed the nucleus of the Center for Study of Responsive Law—the first of many Nader-affiliated organizations that studied consumer problems and advocated various reforms. Other Nader organizations include the Center for Auto Safety, the Public Interest Research Group, Public Citizen, Congress Watch and various groups specializing in litigation, health research and tax reform. Nader was an important figure in the passage of the Wholesome Meat Act (1967), and he has been an outspoken critic of nuclear power and the abuses of private industry and public institutions. A hero to many and a villain to some, Nader maintains a spartan lifestyle and a selfless devotion to social and political causes. In 2000 Nader ran as a candidate for U.S. president under the banner of the Green Party. By attracting votes that might otherwise have gone to Democrat Al GORE, he contributed to the victory of Republican candidate George W. BUSH.

Nagaland A state of northeastern INDIA, bordered by Burma to the east, Manipur to the south and Assam to the north and west. A setting for missionary activity since 1840, British posts in Nagaland were raided by the Japanese during WORLD WAR II, who failed in their attempt to capture Kohima, its capital. Since the 1940s the spirited Naga people violently opposed Indian statehood, and in 1956–57 they fought viciously against government troops. In 1961 Nagaland was incorporated

into India. Yet, the Nagas remain in favor of independence.

Nagano, Shigeo (1900–1984) Japanese industrialist and diplomat who helped shape JAPAN's post-WORLD WAR II foreign policy, domestic politics and economy. Nagano brought about the merger (1970) that made the Nippon Steel Corp. the world's largest steel-maker. Although a political conservative, he helped persuade Japanese businessmen to support the establishment of relations with CHINA and to cooperate with the USSR on development projects in Siberia. He was president of the Japanese chamber of commerce from 1969 until his death.

Nagasaki Port capital of Nagasaki prefecture, approximately 590 miles southwest of Tokyo. Nagasaki was the second Japanese city obliterated by the new ATOMIC BOMB, dropped by the U.S. on August 9, 1945, near the end of WORLD WAR II.

Nagorno-Karabakh A region in southwestern of AZERBAIJAN with a predominantly Armenian population. During the period of Soviet control of Armenia and Azerbaijan (1920–91), the Soviet government regularly altered the status of the region. In 1923 the territory was transformed into an autonomous region under Azerbaijani jurisdiction despite its 70 percent Armenian population. Seven years later JOSEPH STALIN ended the region's autonomy and made it a fully integrated

province of Azerbaijan. When Soviet leader MIKHAIL GORBACHEV introduced his political reform of GLASNOST (or "openness") in the mid-1980s, the long-suppressed Armenian-Azerbaijani conflict exploded in this region. Because GLASNOST allowed the right to form nonpolitical groups, independent of government control—Armenian movements emerged in Nagorno-Karabakh that emphasized the common cultural background shared with inhabitants of the Armenian S.S.R. By the end of the 1980s, these groups had begun to demonstrate for the province's union with the Armenian S.S.R., which led to bloody conflicts with Azerbaijanis. This conflict escalated following the secession of Armenia and Azerbaijan from the defunct Soviet Union at the end of 1991. In November 1991 a month before the dissolution of the Soviet Union, Azerbaijan abolished the vestiges of autonomy possessed by Nagorno-Karabakh. In response, the predominantly Armenian population declared its independence a month later and launched a guerrilla war against Azerbaijani rule. Over the next three years, these rebel forces in Nagorno-Karabakh received support from Armenia in their rebellion against Azerbaijan and their efforts to unite with Armenia. In 1994, after more than 15,000 deaths, the civil war was halted by a truce accepted by the Azerbaijani and Armenian governments and the two contending forces within Nagorno-Karabakh. Neither this armistice nor subsequent negotiations among parties concerned has produced a definitive settlement of the dispute.

Nagurski, Bronislau "Bronko" (1908–1990) American football player. Nagurski became a legendary running back and tackler with the University of Minnesota and the Chicago Bears in the 1920s and '30s. He helped lead the Bears to championships in 1932 and 1933, and by the time he retired, his name had become synonymous with gritty, dedicated play. In 1963 he was named a charter member of the Pro Football Hall of Fame.

Nagy, Imre (1896–1958) Hungarian political leader. Born in Kaposvár in southern HUNGARY, Nagy became a communist during WORLD WAR I. From 1930 to 1944 he lived in the

USSR, where he became an agricultural specialist. Returning to Hungary in 1945, he was responsible for a number of major land reforms. Becoming premier in 1953, he moderated the harsh communist policies of his predecessors, placing greater emphasis on agriculture and less on heavy industry, eliminating forced collectivization and initiating a more liberal political climate. Nagy was removed from office in 1955 for his criticism of Soviet influence and his growing independence, and he was expelled from the Communist Party in 1956. He was reinstated (1956) as premier during the HUNGARIAN UPRISING as head of a coalition government. After Soviet forces quelled the rebellion, Nagy took refuge in the Yugoslav embassy. He later left under a false promise of safe conduct, was arrested and taken to Romania, where he was secretly tried for treason. In 1958 Janos KADAR announced that Nagy had been executed. Many Hungarians regard Nagy a national hero. In 1989 the Hungarian Socialist Workers (Communist) Party declared that Nagy's trial had been unlawful; on June 16, 1989, Nagy was reburied in a solemn nine-hour ceremony in Budapest, attended by an estimated 250,000 Hungarians.

Naipaul, Shiva (1945–1985) Author and journalist born in Trinidad. Like his older and better-known brother, V. S. NAIPAUL (also a writer), Shiva Naipaul made London his home base. He journeyed widely in the THIRD WORLD and wrote about it in a critical and often satirical manner. Among his half-dozen books were *North of South* (1978), dealing with Africa; and *Journey to Nowhere* (1980), an account of the mass suicide in JONESTOWN, GUYANA, of the followers of Rev. Jim Jones.

Naipaul, V(idiadhar) S(urajprasad) (1932–) British novelist and essayist. Born in Trinidad, of Indian descent, Naipaul was educated at University College, Oxford, and settled in Great Britain in 1955. Naipaul's early fiction, most notably *A House for Mr. Biswas* (1961), takes place in Trinidad and depicts, in a sometimes comic, almost Dickensian fashion, the dissolution of a traditional way of life. His later works are darker and more political. They have been compared to the works of Joseph CONRAD because of

Mushroom cloud over Nagasaki, 1945 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

their pessimistic portrayal of human nature and because of Naipaul's themes of exile and alienation. These include *In a Free State* (1971, Booker Prize), *A Bend in the River* (1979) and *Among the Believers* (1985). His fictional memoir, *The Enigma of Arrival* (1987), depicts the uneasy attempt of a West Indian to come to grips with English life. Naipaul has drawn considerable criticism from left-wing writers for his blunt criticisms of third-world social and political attitudes and for his disdain of fashionable left-wing ideologies. Naipaul's brother Shiva NAIPAUL was also a distinguished writer. Naipaul received the Nobel Prize in literature in 2001.

Najibullah, Mohammed (1947–1996) Afghan Communist leader and president of AFGHANISTAN (1987–92). In April 1978, following a coup that brought the Communist Party into power, Najibullah, a longtime Communist activist, served in the communist government established by Hafizullah Amin. But he remained aligned with the faction led by Babrak Karmal, who favored closer alignment with the Soviet Union. In 1979 Soviet forces entered Afghanistan, overthrew Amin and replaced him with Karmal. The following year Karmal orchestrated his election as president of Afghanistan and made Najibullah one of his key subordinates. In 1986 Najibullah obtained Soviet support and replaced Karmal as Afghanistan's leader in large part because of Karmal's failure to end the civil war between the pro-Soviet government of Afghanistan and the various bands of MUJAHIDEEN supplied and partly trained by the U.S. Najibullah's regime came under threat when in 1989 the Soviet Union ended its 10-year military occupation of the country in support of the pro-Soviet government in Kabul. In 1992 Najibullah's regime completely collapsed when mujahideen, dominated by the Islamic Council of Mujahideen (which later became the NORTHERN ALLIANCE), entered Kabul. Najibullah fled to a UN compound in Kabul, where he resided for four and a half years. In September 1996 the TALIBAN, a political-religious group espousing ISLAMISM (the rigid application of Islamic law to all aspects of Afghanistan society), seized power in Kabul, took Najibullah from

UN-sponsored protective custody, and executed him.

Nakasone, Yasuhiro (1918–) Japanese statesman, and prime minister of Japan (1982–87). Born in Takasaki, Japan, Nakasone served as a naval officer during WORLD WAR II (1939–45) before entering the Japanese Ministry of Home Affairs in 1945 and working there for two years. In 1947 Nakasone won election to the Japanese Diet, the national legislature, as a member of the Liberal Democratic Party (LDP), a conservative party that dominated Japanese politics. In 1982 he became prime minister and won reelection to that position in 1984. Nakasone's tenure in office was atypical of Japanese leaders because of his flair, eloquence and forcefulness in dealing with foreign leaders, particularly with the U.S. president, Ronald REAGAN, with whom he worked to strengthen and maintain Japanese-American relations. In 1987 he resigned from the premiership and picked Noboru Takeshita as his successor, and continued to exert great political influence as a leader of one faction within Japan's ruling Liberal Democratic Party. Following his retirement from public office, Nakasone has functioned as an intermediary between successive LDP governments and Asian countries with which Japan has unresolved diplomatic issues, such as the continuing dispute between Japan and Russia over the KURILE ISLANDS.

Namath, Joseph William (1943–) American football player. The most outstanding quarterback of the 1960s at both the college and the professional levels, the charismatic, green-eyed Namath was as well known for his taste in nightclubs as for his athletic ability. During his career at the University of Alabama, the Crimson Tide dominated college football, achieving a rare undefeated record in 1964. Signing with the New York Jets of the American Football League, he set into motion the process by which the NFL and the competing AFL would become one by giving the AFL the credibility it had lacked. Hobbled by serious knee injuries, Namath led the Jets to the AFL championship in 1969 and shocked the football world by "guaranteeing" a Jets win over the NFL champion Baltimore Colts. In a victory as memorable as Babe Ruth's called shot, the cool and confident Namath led

the Jets to a stunning 16-7 victory over the Baltimore Colts and the forces of sports conservatism. He has gone on to a career as a commercial spokesman and sports commentator.

Namibia Former German colony, mandated to SOUTH AFRICA by the LEAGUE OF NATIONS on December 17, 1920. In October 1966 the South-West Africa People's Organization (SWAPO) launched a guerrilla campaign, which was stepped up in 1978 from bases in Angola and Zambia. In spite of the 1973 United Nations designation of SWAPO as the "sole authentic representative of the Namibian people," South Africa carried out a series of attacks on SWAPO camps in Angola. Despite a nonaggression pact signed by Angola and South Africa on February 16, 1984, SWAPO guerrilla activity in Namibia continued. In 1988 Angola, Cuba and South Africa signed an agreement providing for Namibian independence. Despite some preelection violence, UN-supervised elections were held in November 1989. Namibia formally gained independence on March 21, 1990. SWAPO held a majority of seats in the new government. President Sam NUJOMA and SWAPO retained their power in the 1994 and 1999 national elections, but President Nujoma announced he would step down at the end of his term in 2004. In 2004 Nujoma's political protégé Hifikepunye Pohamba won the presidential election.

Nanchang Uprising Revolt (1927) against China's KUOMINTANG (KMT) government that occurred in the city of Nanchang, capital of Kiangsi province. After communist members of the KMT were expelled in July, a garrison of some 30,000 communist soldiers under the leadership of CHU TEH rose against the government on August 1, 1927. They briefly founded a Chinese republic, before losing control of the city and fleeing west to eventually join MAO ZEDONG's forces. The Nanchang Uprising marked the birth of the People's Liberation Army—the military arm of what would become China's Communist government.

Nanking (Nanjing), Rape of Common term for the brutal treatment meted out to the inhabitants of the Chinese city of Nanking by the invading Japanese army during the SINO-JAPANESE WAR. Beginning on December

11, 1937, the terrible orgy of murder, torture and rape resulted in the death of hundreds of thousands of Chinese civilians and caused worldwide condemnation of the Japanese.

Nanook of the North Classic American documentary film by Robert J. FLAHERTY. Its combination of ethnological documentation, poetic expression, and entertainment values has influenced generations of documentarists. An experienced explorer and cartographer for the Canadian railroads, Flaherty began taking portable cameras and developing equipment on his expeditions to Eskimo country around Hudson Bay. In 1916 he prepared a film documenting Eskimo life, but it was destroyed in a fire. Undaunted, he worked for another five years to finance a new film. In 1920, subsidized by Revillon Frères, he spent 16 months shooting the lifestyle and hunting activities of Nanook, the celebrated hunter of the Itivimuit tribe. Not only did the tribesmen willingly re-create their customs (some of them already outmoded) for the camera, but they became accomplished technicians in developing the film and servicing the equipment. Despite some manipulations and

NAMIBIA

1920	South-West Africa (as Namibia was known) is mandated to South Africa by the League of Nations (later, the United Nations [UN]), with the goal of eventual independence.
1966	South Africa ignores UN action and extends apartheid laws to South-West Africa. SWAPO begins armed struggle.
1973	The UN recognizes SWAPO as the sole legitimate representative of the Namibian people.
1978	The Democratic Turnhalle Alliance wins elections boycotted by SWAPO, and a South African-backed internal government is established.
1988	An agreement between Angola, Cuba, and South Africa for Namibian independence.
1989	UN-sponsored elections are held. SWAPO wins majority in Constituent Assembly, which drafts a new constitution.
1990	Namibia becomes independent. Sam Nujoma becomes the first president.
1994	Nujoma and SWAPO reelected.
1999	Nujoma wins a third presidential term.
2001	Nujoma says he will not run for another term in 2004.
2004	Hifikepunye Pohamba, President Nujoma's nominee, wins the presidency.

distortions—the natives had to learn anew how to build igloos, for example—the results were an impressive reaffirmation of a vanishing lifestyle threatened by industrial incursion. HOLLYWOOD, of course, had no idea what to do with such a film, so Pathé Distributors released it in July 1922—to immediate success and acclaim. *Nanook*, according to John Grierson, “first drew world-wide attention to the film’s power of imaginative natural observation.” Meanwhile, Nanook himself died of starvation two years later while deer hunting in the Ungava interior; years later, Flaherty’s wife, Frances, recalled that once in Berlin she bought an “eskimo pie” confection depicting Nanook’s face on the wrapper.

Nansen, Fridtjof (1861–1930) Norwegian explorer, scientist, diplomat and humanitarian. Born near Oslo, Nansen studied at Christiania (now Oslo) University and embarked on his first expedition to the Arctic in 1882 while still a student. In 1888 he skied across GREENLAND, a journey chronicled in *First Crossing of Greenland* (1890). In order to prove his theory about the flow of ocean currents, he and his crush-resistant vessel, the *Fram*, anchored in the polar ice pack in 1893 and drifted, reaching Norway in 1896. In hopes of reaching the NORTH POLE, Nansen and a companion

left the ship and traveled by sledge and skis to the northernmost point ever reached at that date. This expedition provided much useful scientific data about the Arctic Ocean and made Nansen a heroic figure at home and abroad. Named a professor at Christiania University in 1897, he also headed (1901) an International Commission for Study of the Sea and made a series of explorations in the North Atlantic from 1910 to 1914.

Nansen also launched a career as a statesman, working for the separation of NORWAY and SWEDEN in 1905. The following year, he was appointed Norway’s first minister to Great Britain, serving until 1908. After WORLD WAR I, Nansen became Norway’s representative to the LEAGUE OF NATIONS. At the League, he was instrumental in providing relief to the victims of famine in Russia and in repatriating war prisoners. Becoming high commissioner for refugees in 1921, Nansen received the 1922 NOBEL PEACE PRIZE for his humanitarian work. He was the author of many books both on the Arctic and on international relations.

napalm (acronym for naphthenic and palmitic acids) A jellied gasoline used in flamethrowers and bombs. Napalm was used by both sides in the VIETNAM WAR—by the U.S. and South Vietnam primarily in the form of aerial bombs. The North Vietnamese and VIET CONG used it in flamethrowers, as in their massacre of the Montagnard villagers at Dak Son. Although fire has been used as a weapon since prehistoric times, napalm came into widespread use in WORLD WAR II, especially in flamethrowers used to destroy entrenched Japanese positions in the Pacific war. It was used extensively in the form of aerial bombs in the KOREAN WAR against Chinese and North Korean entrenchments. A favorite of television war coverage because of its vivid and awful display, use of napalm touched a primordial nerve among many Americans and aroused considerable controversy, including demonstrations against chemical companies that manufactured napalm.

Napster Online Web site that allowed users to exchange digitally recorded music files. In 1999 Napster made available computer software that al-

lowed individual Napster users both to make their digitally recorded music files available to other users and to download songs themselves that had been converted and compressed into the Moving Picture Experts Group Audio Layer 3 (MP3) format from the online files made available on other users’ PERSONAL COMPUTERS (PCs). When Napster began operation in December 1999, the Recording Industry Association of America (RIAA) quickly filed a lawsuit against the music-swapping service, claiming that it facilitated music piracy. In 2001 the 9th Circuit Court of Appeals ruled that, despite its denials, Napster did indeed know that numerous users were using its network to violate copyright law, but that the RIAA and its members could not sue Napster until they had informed the company of specific MP3 files present on its servers that violated copyright law. In March 2001 Napster installed a filtering software to detect copyrighted material and prevent users from making MP3 downloads of such material available through Napster’s servers. By mid-2001 it had made arrangements to license music files from AOL Time Warner, BMG Entertainment and EMI Group and make them available for download on its Web site, upon payment of a fee. The transformation of Napster from a free service to a paid service led to a 90 percent decline in the number of files available through its service, indicating a reduced consumer interest in its facilities. In 2002 Napster filed for bankruptcy and was sold to Roxio Inc. A year later, after improving its software and resolving issues with RIAA members, Napster returned to the online music scene and resumed operations.

Narain, Raj (1917–1986) Indian Socialist Party leader. His suit against then prime minister Indira GANDHI for electoral fraud (1975) precipitated a constitutional crisis that lasted nearly two years. When new elections were called in 1977, Gandhi was turned out of office and lost her parliamentary seat in Uttar Pradesh State to Narain. Narain was briefly health minister in the administration of Prime Minister Morarji DESAI. He later led a fierce political revolt that toppled Desai in the summer of 1979 and replaced him with Charan Singh. After Gandhi swept back into power in 1980, Narain fell out

Norwegian polar explorer and oceanographer Fridtjof Nansen (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

with Singh and founded his own socialist party, which had few followers.

Narayan, Jayaprakash (1902–1979) Indian statesman. An early disciple of Mohandas K. GANDHI, he worked with Gandhi to free India from British colonial rule through nonviolent means. He founded the Congress Socialist Party (1934), organized strikes against the British and served several long prison terms for his actions. After India achieved independence (1947) he helped found the Indian Socialist Party. He was a leader of the coalition that temporarily toppled Prime Minister Indira GANDHI from power in 1977. Although Narayan never held elective office, he wielded great moral and political influence as a result of his campaigns for social justice.

Narayan, R(asipuram) K(rishna-swami) (1906–2001) Anglo-Indian novelist. Narayan wrote in English, and his fiction explored the clash between Western ideology as imported by the British and the traditions of India. His first novel, *Swami and Friends* (1935), introduced the fictional town of Malgudi, which he developed and peopled in subsequent works such as *The Financial Expert* (1952), *The Painter of Signs* (1977) and the short story collection *Malgudi Days* (1982). Other works included his memoir, *My Days* (1975), and *The World of Nagaraj* (1990).

NASA See NATIONAL AERONAUTICS AND SPACE ADMINISTRATION.

NASDAQ U.S.-based stock exchange market for the purchase, sale and trade of shares in publicly held companies. In 1971 the National Association of Securities Dealers formed the National Association of Securities Dealers Automated Quotation (NASDAQ), with the goal of regulating the trading of over-the-counter stocks. Unlike the New York Stock Exchange, in which the purchase and sale of stock certificates occurs in a single central location, the trading of over-the-counter stocks was done over telephone lines. NASDAQ's creators hoped that the regulation of over-the-counter trade through NASDAQ would enable investors to purchase shares at better prices than was possible with unregulated individual

stock brokers who managed the trade of over-the-counter stocks.

Because many companies whose stocks traded over-the-counter were new to the market, such as computer-related firms, NASDAQ began to acquire a reputation as a barometer of the high-technology industries in the U.S. In 1990 NASDAQ changed its name to the Nasdaq Stock Market. Eight years after this change in title, it merged operations with the American Stock Exchange (AMEX), though both Nasdaq and AMEX continue to function as separate stock exchanges. During the 1990s, as companies began to invest heavily in computer and Internet-related technology, the value of stocks traded on the Nasdaq increased dramatically, and more investors bought into the companies on the young stock exchange. In 2001 the period in which these stocks had skyrocketed in value came to an end, as the stock market began a dramatic decline. It had become clear that many companies trading on Nasdaq were trading at inflated prices far out of proportion to their actual earnings.

Nash, Ogden (1902–1971) American poet. Nash is known for his stylish light verse, in which he employed puns and other verbal antics as well as unconventional rhymes and irregular meter. His verse began appearing in *The NEW YORKER* and other publications in 1931. His collections include *The Private Dining Room* (1953), *You Can't Get There from Here* (1957) and *The Untold Adventures of Santa Claus* (1965).

Nash, Paul (1889–1946) British painter, designer and photographer. Educated at the Slade School of Art in London, Nash served in the British army during WORLD WAR I. After being invalided by a wound, he became an official war artist and earned praise for his sketches at the front lines. In the 1920s and 1930s, Nash worked as a painter and wood engraver, as well as in applied arts such as upholstery and glass design and photography. In all these areas, Nash provided a unique blending of symbolic and surrealist elements. In the 1930s he was a principal founder of "Unit One," an avant-garde group of British artists and architects. Nash again served as an official war artist during WORLD WAR II.

Outline: An Autobiography (1949) was posthumously published.

Nashua (1952–1982) Thoroughbred racehorse. Bred at Claiborne Farm, Nashua was champion two-year-old of 1954, champion three-year-old and Horse of the Year the following year. Nashua's rivalry with his contemporary, the California-bred Swaps, began in the 1955 KENTUCKY DERBY, with Swaps taking the race by 1 1/2 lengths. Swaps returned home as Nashua went on to win the Preakness and Belmont. The two then met in a 1 1/4-mile match race at Washington Park, a race Nashua won by 6 1/2 lengths. As a four-year-old, he had an uneven campaign carrying heavy weights, but won the prestigious Jockey Club Gold Cup by 2 1/4 lengths, setting a 3:20 2/5 record in the process. He finished his career with 22 wins, four places, one show, finishing out of the money only three times. He retired to Spendthrift Farm, where he went on to become a successful sire, his progeny including the outstanding Damascus.

Nasir, Amin Ibrahim (1926–) Nasir became the first president of the independent Republic of MALDIVES in 1968. He had served as prime minister under Sultan Muhammad Amin Didi from 1957 to 1968, when the sultanate was abolished for the second time. Nasir eliminated the post of prime minister in 1975 and strengthened his powers; the following year he signed an agreement formally terminating the British military presence on the islands. After Nasir declined to stand for reelection in 1978, he left the country. He was later charged in absentia with misappropriation of government funds.

Nassau Agreement (December 18, 1962) An agreement between U.S. president John F. KENNEDY and U.K. prime minister Harold MACMILLAN on nuclear cooperation. Under the agreement, the U.S. would supply Britain with Polaris missiles for its submarines. The move antagonized French president DE GAULLE, who interpreted it as Britain's reassertion of its American rather than European loyalties. A month later, France vetoed Britain's entry into the EUROPEAN ECONOMIC COMMUNITY.

Nasser, Gamal Abdel (1918–1970) Egyptian political leader, first president of EGYPT (1956–70). Nasser was born near Asyut and educated at the Cairo Military Academy, graduating in 1938. A revolutionary from his youth, he was devoted to driving the British from Egypt. Nasser fought in the ARAB-ISRAELI WAR OF 1948 and was shocked by the Egyptian armed forces' inefficiency and corruption. He organized and led the anti-British republican group known as the FREE OFFICERS Movement that succeeded in ousting King FAROUK in 1952. In 1954 he toppled General Muhammad Naguib, a relative figurehead, becoming Egypt's premier and, two years later, its president. Instituting a system called "Arab Socialism," Nasser confiscated the nation's great estates and nationalized (1956) the SUEZ CANAL. This action provoked the SUEZ CRISIS, a brief Anglo-French invasion of the canal and an Israeli invasion of the Sinai. The ensuing ARAB-ISRAELI WAR OF 1956 was halted by a UNITED NATIONS cease-fire, which left Nasser with increased prestige and popularity in the Arab world for his stand against Israel and the West. Nasser was the head of the short-lived UNITED ARAB REPUBLIC (1958–61). He again came into conflict with Israel in 1967, during the SIX-DAY WAR. Taking responsibility for the humiliating defeat, Nasser resigned but popular support quickly returned him to office. In 1968 Nasser succeeded in obtaining

Egyptian president Gamal Abdel Nasser at the United Nations (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Soviet support for the massive ASWAN DAM project, for which the U.S. and Britain had refused to pay in 1956; it marked the apex of his career. Although increasingly dependent on Soviet support, he nonetheless was an important pan-Arabist and a hero to much of the THIRD WORLD. He died of a heart attack in 1970 while attempting to mediate a dispute between Jordan and the PALESTINE LIBERATION ORGANIZATION. Nasser is widely considered one of the preeminent Arab leaders of the 20th century.

Nasser, Lake Lake in southeastern Egypt and northern Sudan created by the ASWAN High Dam, built in the 1960s for the production of hydroelectric power. Having flooded such important archaeological sites as ABU-SIMBEL, whose temple had to be elevated above the waters, nearly 90,000 people, mostly Sudanese, were relocated when the lake was formed.

Nast, Condé (1873–1942) American magazine publisher. Nast achieved success as advertising manager for *Collier's Weekly* between 1898 and 1905. In 1909 he acquired *Vogue*, then a small society periodical, and turned it into America's leading fashion magazine. He established a British edition of *Vogue* in 1916 and a French edition in 1920. By 1922 Nast's holdings included *Vanity Fair* and *House and Garden*, and he formed Condé Nast Publications, which continues to publish many periodicals. Nast also founded the Vogue Pattern Company in 1914 and published the *Vogue Pattern Book* in 1925. Nast was known as a lavish host to New York society.

Nation, The American periodical founded in 1865. *The Nation*, a liberal weekly covering politics, philosophy and literature, has maintained its left-leaning, humanitarian stance throughout the shifts in American political thought. Frederick Law Olmsted, the architect of Central Park, proposed the formation of *The Nation*, which was established by Edwin Lawrence Godkin, who served as its editor from 1865 to 1881. *The Nation* was then owned by the *Saturday Evening Post* until 1918, when new editor Oswald Garrison Villard, son of the *Evening Post's* late editor, severed *The Nation's* ties with the

paper. Villard was a founder of the NATIONAL ASSOCIATION FOR THE ADVANCEMENT OF COLORED PEOPLE, and *The Nation* was an early supporter of that organization as well as the AMERICAN CIVIL LIBERTIES UNION. It also espoused pacifism, opposed the TREATY OF VERSAILLES, backed the strikers and Wobblies and was sympathetic to the Russian revolutionaries. In the 1930s, *The Nation* advocated sanctions against the Nazi-Fascist AXIS, supported the Loyalists in the SPANISH CIVIL WAR and Franklin D. ROOSEVELT and his NEW DEAL. *The Nation* fought MCCARTHYISM in the '50s, opposed American intervention in VIETNAM in the '60s, and rallied against the conservative trend of the REAGAN administration. *The Nation* has rarely broken even—its circulation hovers around 25,000—and it is supported by patrons committed to the liberal cause.

National Aeronautics and Space Administration (NASA) U.S. government agency that oversees advanced aeronautics; lunar, planetary and interplanetary spaceflights; and space probes, rockets and satellites. It was founded as an independent agency in 1958 and maintains headquarters in Washington, D.C. It has 10 major installations, including the John F. Kennedy Space Center, Cape Canaveral, Florida; the Johnson Space Center, Houston, Texas; the Goddard spaceflight Center, Beltsville, Maryland; the Marshall Space Flight Center, Huntsville, Alabama and the Jet Propulsion Laboratory, Pasadena, California. NASA has a staff of some 21,000 scientists, engineers and technicians. The agency grew rapidly in the 1960s and scored a triumph with its lunar-landing APOLLO missions. In 1973 it created America's first manned orbiting space lab, and in 1981 it launched the U.S.'s first manned space shuttle. After the explosion of the CHALLENGER shuttle in 1986, NASA's policies were widely investigated. Once held in the highest esteem, the agency was subjected to scrutiny and criticism, and its activities were to a large degree halted for two years. After management and safety reforms, NASA resumed manned spaceflight with the launch of the space shuttle *Discovery* in 1988. Following the disintegration of the space shuttle *Columbia* during reentry in 2003,

NASA suspended all shuttle launches, pending investigation. The shuttle resumed flight in 2005.

National Association for the Advancement of Colored People

(NAACP) American CIVIL-RIGHTS organization. The oldest and largest organization of its kind, with a 1990 membership of some 400,000, it strives to eliminate discrimination against blacks and other minorities. Its membership is mainly black but also includes many whites and others. It was founded in 1910 by the merging of the NIAGARA MOVEMENT formed by W. E. B. DU BOIS and a group of prominent white liberals. With lawyer Moorfield Storey as its first president, much of the group's power was wielded by Du Bois, who edited its magazine *Crisis* from 1910 to 1934. During its early years, the organization worked successfully to pass antilynching laws and to stop lynching in the U.S. Its main thrust has always been change through legal and legislative action, a moderate stance that brought it criticism by more radical civil rights advocates. The NAACP played an important role in many legal battles, most memorably the landmark school desegregation case *BROWN V. BOARD OF EDUCATION* of Topeka (1954). Led by Roy WILKINS from 1955 to 1977, it also was important in obtaining passage of the CIVIL RIGHTS ACTS of 1957 and 1964 and the VOTING RIGHTS ACT of 1965 and in winning extensions of the latter in the 1970s and '80s. In 2000 the NAACP organized protests to force the South Carolina state government to stop flying the Confederate battle flag over its capitol. In addition to litigation and lobbying, the NAACP runs voter registration drives, promotes education, acts to reduce poverty and hunger in the black community and protects the rights of black prison inmates. It is headquartered in Baltimore, Maryland.

National Education Association

(NEA) An organization of professional educators in the U.S., the NEA is the largest group of its kind in the world with a membership (2004) of 2,700,000. Founded in 1857 as the National Teachers Association, it received a congressional charter in 1906. Its goals include the improvement of public education and the increase of

salaries and benefits for teachers, administrators and other educators—from elementary school through college. It promotes these aims through professional activities, judicial and legislative efforts and collective bargaining. The NEA is headquartered in Washington, D.C., but has branches in every state and Puerto Rico and facilities for representing U.S. teachers abroad.

National Endowment for the Arts

(NEA) Arts funding arm of the National Foundation on the Arts and the Humanities founded in 1965. The NEA's stated purpose is to encourage the development and preservation of the arts in the U.S. It consists of a chairperson and 26 presidentially appointed members, who award grants to individual artists, state and local arts agencies and nonprofit organizations. The NEA became embroiled in controversy in the late 1980s when its funding of a photography exhibit by Robert MAPPLETHORPE (which included homoerotic images) drew criticism from the right, led by Senator Jesse Helms. After much debate about obscenity, censorship and federal funding of the arts, Congress established an Independent Commission to determine if the NEA should be restructured or perhaps even abolished. In October of 1990, the House of Representatives passed a bill that included the requirement that artists funded by the NEA and convicted of violating local obscenity laws must return their grant money. By 2003 the NEA had awarded over than 119,000 grants.

National Enquirer, The Published by Generoso P. Pope Jr., who converted the paper in 1952 to a tabloid featuring the bizarre and the gory. By the mid-1960s, the paper had a circulation of nearly one million and was making huge profits. Pope again changed the formula in the late 1960s, putting the paper into supermarkets and featuring celebrities, UFOs and predictions by clairvoyants. In 1988, the paper had a circulation of over 4.5 million. Due to several libel lawsuits in 1980s, the *Enquirer* was forced to tighten its reporting standards with regards to actual people and events. Despite this the *Enquirer* is often regarded as sensationalist. In recent years the circulation of the *Enquirer* has slumped below 1 million.

National Geographic Society Scientific and educational organization. Popularly known through its monthly publication *The National Geographic Magazine*, the National Geographic Society also sponsors expeditions and research projects in a broad range of fields, including anthropology, geography and oceanography. The Society was founded in 1888 and now has more than 10 million members worldwide. Its notable projects include sponsorship of Richard BYRD and Robert PEARY's polar expedition and the first U.S. trek to the peak of Mount Everest. Its other publications include *National Geographic World*, *National Geographic Research*, *National Geographic Traveler*, maps and other educational support materials. It also produces popular television specials on nature, science and exploration.

National Health Service

The British National Health Service Act became law in 1946. Based on the recommendations of the BEVERIDGE REPORT, the act's intent was to provide free, comprehensive "cradle-to-grave" medical, dental and ophthalmological services to all Britons. The National Health Service came into being during the Labour government of Clement ATTLEE and had been a long-term goal of the LABOUR PARTY and then minister of health, Ernest BEVIN. The program was an expensive one, and subsequent governments began imposing fees for some services. Margaret THATCHER's call for more private care and cutbacks in the Health Service in the 1980s resulted in real and threatened strikes by nurses and other health-care workers. In 1988 she fired the minister of health; created a new Cabinet position, secretary of state for health; and named Kenneth Clarke to the post. She planned a proposal by which doctors would operate within a budget and allot health services to their patients without exceeding it. The budget of the National Health Service in 2005–2006 was £80 billion.

National Industrial Recovery Act

Major NEW DEAL program, designed to regulate and revive industry; it was declared unconstitutional in 1935. When President Franklin ROOSEVELT assumed office at the height of the Depression, economic activity was at a standstill. The National Industrial Recovery Act

was passed to revive the industrial sector. Modeled after the War Industries Board of World War I, it established industry codes designed to increase capital investment, end destructive competition and create jobs. The antitrust laws were suspended for two years, and trade, prices and labor practices were controlled by industry codes, while workers were guaranteed collective bargaining rights. To ensure job creation the NATIONAL RECOVERY ADMINISTRATION (NRA) and the Work Projects Administration (WPA) were created to carry out the act's provisions and to put people to work. In practice the system was not as successful as planned. Little new investment actually occurred and the law was criticized by a wide array of groups. While unions found the act harmful, so did the small business community, which feared the growth of government-supported monopolies. In 1935 in *Schechter v. United States*, which involved interstate commerce provisions of the act, the Supreme Court held the National Industrial Recovery Act to be unconstitutional. The Court reasoned that the act went far beyond the scope of Congress's power to regulate interstate commerce.

National Institutes of Health (NIH) An agency in the Public Health Service division of the U.S. Department of Health and Human Services. Originally started in 1887 as the Hygienic Laboratory at the U.S. Marine Hospital in Staten Island, New York, NIH took its present name in 1948; its laboratories are now located in Bethesda, Maryland. NIH conducts biomedical research, supports the training of research scientists and funds approximately 40 percent of health research in the U.S. It is comprised of 11 institutes, each specializing in health fields, such as aging, child health and human development and cancer research. It also includes the National Library of Medicine, the Fogarty International Center for Advanced Study in the Health Sciences and its research hospital—the Clinical Center.

nationalization The process of assuming control and ownership of an industry on a national scale by a national government. This has happened

in a number of countries and for a variety of purposes. Some governments, especially those in the THIRD WORLD, have nationalized vital industries to gain local control and keep profits in their own country. Other governments have tried nationalization to promote efficiency or to promote social goals such as increased employment or subsidization of certain goods. Utilities such as airlines, electric and gas generation and distribution, postal services and communication companies are commonly nationalized. Although FRANCE and the UNITED KINGDOM nationalized many industries, they later sought to divest these holdings to private ownership. Forced nationalization without compensation is known as “expropriation.”

National Labor Relations Act (aka the Wagner Act) (1935) Landmark NEW DEAL legislation, sponsored by Senator Robert Wagner of New York, that established the right to collective bargaining and set up the **National Labor Relations Board**, a federal agency to oversee union elections. Although Congress legalized union membership and the right to peaceful picketing in the 1932 NORRIS-LAGUARDIA ACT, unions were still at a distinct disadvantage. The Wagner Act shifted this balance by providing a mechanism that enabled unions to hold certification elections under government supervision. The act also created the National Labor Relations Board (NLRB) with power to supervise elections and police “unfair labor practices”—such as interference with union organizing efforts, discrimination against union members and refusal to bargain in good faith with a duly-elected union representing workers.

National Labor Relations Board v. Jones & Laughlin Steel Corp. (1937) U.S. Supreme Court decision upholding a major NEW DEAL program. President Franklin D. ROOSEVELT's New Deal had run into a substantial roadblock when the Supreme Court overturned a number of the president's programs as unconstitutional. The Court had objected to New Deal programs as unwarranted governmental interference with private business. The NATIONAL LABOR RELATIONS ACT was a cornerstone of the New Deal, recognizing the right of workers to collectively bargain and es-

tablishing the National Labor Relations Board to supervise union elections. In a surprise decision, the conservative Supreme Court closely approved the legislation by a 5-4 margin. This marked the end of the Supreme Court's resistance to FDR's reform plans.

National Liberation Front (NLF) The National Liberation Front was appropriately named, for it was a classic communist-front organization. Formed in Hanoi in December 1960, the NLF was designed to disguise its communist control and thus draw support from noncommunist South Vietnamese disaffected with their government. Many noncommunist members of the NLF thought they were working for southern independence, and the ANTIWAR MOVEMENT in the U.S. championed the NLF as the true representative of the South Vietnamese people. The NLF stressed land reform, expulsion of foreigners, unfairness of South Vietnam's tax system and other issues.

After the war the North Vietnamese freely admitted that the NLF was their own creation, totally controlled and directed from Hanoi. Betrayed and disillusioned, many southern NLF leaders were purged or imprisoned or fled into exile. (See also VIET CONG.)

National Missile Defense (NMD) A missile defense program initiated by the United States. Fulfilling one of his campaign promises in 2002, U.S. president George W. BUSH withdrew the U.S. from the 1972 Anti-Ballistic Missile Treaty in order to pursue a small-scale missile defense system designed to prevent “rogue” states from launching a small number of nuclear-armed ballistic missiles at American targets. Unlike earlier missile defense program designs, such as the multilayered system known as the Strategic Defense Initiative begun in 1983 by President Ronald Reagan, the NMD program proposed by President Bush would be incapable of preventing a massive nuclear strike by Russian or Chinese intercontinental ballistic missiles (ICBMs). President Bush also offered to make the technology developed under the NMD program available to Russia, the other signatory state to the ABM Treaty that the U.S. had unilaterally abrogated. However, this NMD program raised concerns in other nuclear weapon states, such as Russia,

France, and China. These governments, as well as critics of the NMD program within the U.S., voiced concerns that this missile defense system could lead to a new nuclear arms race as countries might rush to devise means of defeating the proposed U.S. missile shield. In 2002 President Bush signed a directive to begin deployment of operational ballistic missile systems by 2004.

National Party (New Zealand)

New Zealand political party formed in 1935. During the GREAT DEPRESSION there were three conservative, anti-LABOUR parties in New Zealand: the Reform Party, the United Party and the Democratic Party. Their lack of unification contributed to Labour's stunning victory in 1935, after which the three parties' leadership called a convention to organize the National Party. It came to power in 1949 under the leadership of Sir Sidney Holland, who was prime minister until 1957, and again under Sir Keith HOLYOAKE (1960–72). From 1974 to 1984, National leader Robert Muldoon was prime minister. After the party's defeat (1984), Muldoon was succeeded by Jim McClay (1945–) as its leader.

National Party (South Africa)

South African political party (1914–2000). Created in 1914, the National Party (NP) became the political vehicle of the Afrikaners. These were descendants of Protestant Dutch and French settlers who had emigrated to South Africa in the 17th century to escape the religious wars in Europe. Its leaders favored the strict social, political and economic separation between the privileged white settlers and the other inhabitants of the newly created British dominion called the Union of South Africa (1910). In the white-only national elections in 1948, the NP ran on a platform of APARTHEID (“apartness” in the language of Afrikaans). This policy would segregate white South Africans from the three other racial categories the party identified—coloured (those of mixed racial ancestry), Asian (predominantly Indian), and Bantu (those of African ancestry)—and ensure the political, social and economic superiority of white South Africans.

In 1982 the party sought to reduce domestic and foreign pressure against its apartheid policies by amending the

South African constitution to create separate legislatures for coloured and Asian citizens. Five years later dissident elements in the NP began clamoring for reform, and in a few cases, the elimination of apartheid. When the party ignored their petitions, this produced a wave of resignations from the party.

In 1989 the NP launched a major campaign to reform apartheid. That year, South African president F. W. DE KLERK began to allow greater civil liberties for black dissident groups like the ANC. The following year, de Klerk released the ANC militant leader Nelson MANDELA from prison and announced his intention to end apartheid. Although he fell under increasing criticism from the more hard-line members of the NP, de Klerk's policies obtained the approval of the white electorate in a March 1992 national referendum. De Klerk also opened the NP to all races and entered into negotiations with the ANC and the Inkatha Freedom Party (an organization representing the Zulus) to create a new, multiparty and multiracial South Africa. These talks resulted in a November 1993 constitution that called for a tripartite presidency and permitted free elections for the first time in the country's history. In April 1994 the NP lost control of the government after winning the second highest number of delegates to the National Assembly. De Klerk began serving as deputy president under the ANC's leader, Nelson Mandela. Although the reforms undertaken by deKlerk did expand the NP's base of support to include the more affluent and urban members of the “Cape Coloured”—an ethnic group descended from Dutch, Khoisan and Indian ancestors—it continued to recede in political importance, especially after deKlerk retired from politics in 1997. In 2000, following the June 1999 national elections in which the NP's membership in the National Assembly had shrunk to 28 delegates, the NP united with the Democratic Party to form the Democratic Alliance.

National Public Radio Based in Washington, D.C., National Public Radio provides programming to its noncommercial radio station members nationwide. Its news programming includes the acclaimed *All Things Considered* and *Morning Edition*. It initially

relied on the Corporation for Public Broadcasting for the majority of its funding; in 1981 they provided two-thirds of its \$21 million budget. By 1983 NPR was close to bankruptcy but recovered by successfully seeking institutional donations. It then stopped depending on the Corporation for Public Broadcasting for support. The corporation now gives federal money directly to member stations, which pay higher rates to NPR for programming. By 1989 NPR had become solvent. In 2003 NPR was given \$200 million from the estate of the late Joan B. Kroc, widow of Ray Kroc, founder of McDonald's Corporation.

National Radio Astronomy Observatory (NRAO)

The largest radio-astronomy observatory in the U.S. It is used by scientists throughout the country, funded by the National Science Foundation and operated by Associated Universities Inc. Founded in 1956, NRAO's many radio telescopes have detected radio waves given off by a huge number of objects in space—from the planets of our solar system to vastly distant quasars. With headquarters, scientific offices and computer facilities in Charlottesville, Virginia, the NRAO is responsible for radio telescopes in Socorro, New Mexico; Kitt Peak, Arizona, and Green Bank, West Virginia. Its Socorro facility is the home of the Very Large Array, the world's most powerful radio telescope. It consists of 27 large mirrored reflectors, each 82 ft. in diameter and all operating as a single instrument. The Kitt Peak telescope, designed expressly to deal with extremely short radio waves, measures 39 ft. in diameter. The large Green Bank telescope, which with a diameter of 300 ft. was long the world's largest movable instrument of its kind, collapsed in 1988 and was completely destroyed. The other six smaller radio telescopes at the facility remain in operation. The NRAO constructed another instrument, the Very Long Baseline Array Telescope, which was completed in 1993 at a cost of \$85 million, which operates from Socorro, with 10 reflectors situated throughout the U.S. and in the Virgin Islands.

National Recovery Administration (NRA) U.S. government administrative bureau established in June 1933 under the NATIONAL INDUSTRIAL

RECOVERY ACT. One of President Franklin D. ROOSEVELT's earliest NEW DEAL creations, the NRA drew up and oversaw codes relating to fair competition in business and industry. These codes regulated prices, wages, working conditions, the construction of facilities and terms of credit. Administered by Hugh S. Johnson, it gained the cooperation of major industries throughout the U.S. The NRA was declared unconstitutional in May 1935 by a U.S. Supreme Court decision and it was subsequently abolished. A number of its provisions were enacted in later labor legislation.

National Review. Biweekly political magazine noted for its conservative outlook. The *National Review* was founded by William F. BUCKLEY Jr. in 1955, and has maintained its status as a leading journalistic forum for conservative political viewpoints. Buckley has edited the magazine since its inception, although in 1990 he announced his intention of turning over the primary editorial responsibilities to other hands in the near future. The *National Review* has frequently expressed opposition to government deficit spending, welfare programs and DÉTENTE with the USSR and other communist regimes. The magazine has won a loyal following of subscribers and regular readers and has achieved commercial as well as critical success. Buckley remained an editor-at-large with the magazine until his June 2004 decision to divest himself of his shares in the *National Review*, but the chief editorial duties have been exercised since 1997 by Rich Lowry.

National Rifle Association of America (NRA) Organization that promotes the shooting of rifles and pistols as a sport, in sharpshooting, hunting and other activities. Established in 1871, it sponsors competitions and chooses participants in international shooting events. With a membership that reached 3,000,000 by the early 1990s, the NRA also maintains a powerful lobby in Washington. The NRA opposes gun control and any other acts that it believes to provide unnecessary restrictions on the rights of gun owners and enthusiasts. From 1998 to 2003 acclaimed Hollywood film actor Charlton Heston served as the NRA's president. As of 2004 the NRA has 4 million members.

National Urban Coalition American organization that works to solve urban problems. Founded in 1970 through the merger of the Urban Coalition and Urban America, it attempts to identify and publicize serious urban problems and to take steps to begin dealing with these problems. With representatives from business and labor as well as leaders from civic, community, religious and minority-rights groups, the organization deals with issues of employment, housing, education, economic well-being and health care for urban Americans. The National Urban Coalition is headquartered in Washington, D.C.

Native Dancer (1950–1967) Thoroughbred racehorse. Known as “the Gray Ghost,” Native Dancer was an imposing gray colt who won all but one of his 22 races over the course of his brief career. Lightly raced but undefeated as a two-year-old, in his second season he lost only the Kentucky Derby, in which he was fouled. He went on that year to win the Preakness, Belmont, Arlington Classic and Dwyer and Travers Stakes. Asked to carry extraordinary weights as a four-year-old, his already weak ankles began to suffer and he was retired to stud. Among his outstanding descendants were Kauai King, NORTHERN DANCER and the brilliant Majestic Prince.

NATO See NORTH ATLANTIC TREATY ORGANIZATION.

Nauru (formerly Pleasant Island) Independent island state west of KIRIBATI in the west Pacific Ocean (see map, page 957), discovered in 1798.

In 1888 it was claimed by Germany, and was made an Australian LEAGUE OF NATIONS mandate at the end of WORLD WAR I. From August 1942 through WORLD WAR II Nauru was occupied by the JAPANESE, and in 1947 became a trust territory of AUSTRALIA, UNITED KINGDOM, and NEW ZEALAND, gaining independence in 1968. In 1999 Nauru joined the UN. Since joining the UN, Nauru has encountered domestic and international difficulties because of its 2001 agreement with Australia to act as a holding station for asylum seekers caught trying to enter Australia illegally, its alleged involvement in money laundering schemes and its ongoing efforts to honor its national debt.

Nautilus The world's first atomic-powered submarine, the USS *Nautilus* was launched in January 1954 and had its first sea trials a year later. It was developed largely through the advocacy of Admiral Hyman RICKOVER, who began supporting the idea of the nuclear-powered craft in the late 1940s. The 2,800-ton vessel was completed at a cost of some \$55 million. It measures 323 feet long, can attain a speed of over 20 knots per hour when submerged and carries a crew of 105. In August 1958 the submarine made the first undersea crossing of the North Pole; later that month it set an east-west transatlantic record for submarines traveling from Portland, England, to New York.

Navarre, Henri (1898–1983) French general. Navarre was commander in chief of the French forces in INDOCHINA from 1953 to 1954, when the VIET MINH defeated the French at the Battle of DIEN

BIEN PHU, which marked the end of the French attempt to maintain control in Indochina.

Navratilova, Martina (1956–) Czechoslovakian-born U.S. tennis player. The daughter of avid tennis players, she won the Czech singles title three times from 1972 to 1974. In 1974 she defected to the U.S. From 1978 to 1984 she won five Wimbledon singles titles, in addition to her six doubles titles. A two-time winner of the French Open, she did not win the U.S. Open until 1983, a feat she repeated in 1984. In 1993 Navratilova won the Paris Open, the last major tennis tournament she would win on the World Tennis Association tour. The following year she retired from professional tennis. However, she later returned to tournament tennis, and in July 2003 won the Wimbledon mixed doubles tournament with Leander Paes. This tied Navratilova with Billie Jean King's record of 20 Wimbledon titles. At Wimbledon in 2004, Navratilova played and won her first singles match in 10 years, beating her 24-year-old opponent in straight sets.

Nazism An ideology and a political movement that arose in GERMANY during the 1920s. Led by Adolf HITLER, crystallized in his National Socialist German Workers' Party (or Nazi Party), and at least partially defined in his book *MEIN KAMPE*, the movement ruled Germany from 1933 to 1945. The name "Nazi" was originally a derogatory abbreviation of the first word of the party's German name. Nazi ideology combined the pseudoscientific racism of such figures as the Comte de Gobineau (1816–82), Houston Stewart CHAMBERLAIN and the Nazis' own Alfred Rosenberg, with a powerful nationalism and sense of national destiny that demanded the unification of all German-speaking peoples. Violently anti-Semitic, it elevated the Germanic or "Aryan" race and placed the JEWS at the lowest end of the racial spectrum. A kind of FASCISM, it was authoritarian and totalitarian in character, allowing private property while suppressing individual rights.

Nazism arose as a result of the political, social and economic crises that befell Germany after the humiliation of its defeat in WORLD WAR I. Its ex-

Nazi propaganda before the outset of the Holocaust reading, "Germans! Defend yourselves! Do not buy from Jews!" (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

tremist positions appealed to a people exhausted by war and disillusioned with the performance of postwar democracy. Promising order and prosperity to the German people and exalting discipline and power, Nazism condemned democracy, socialism and communism with equal fervor. The movement drew adherents from the military, the farmers, the urban middle class and the wealthy industrialist classes, and by the mid-1920s the party had some 20,000 members. It became more appealing and more powerful with the GREAT DEPRESSION, holding out promises of economic stability and glory for the German nation. By 1929 the Nazi Party had some 176,000 members, and in the 1932 elections it emerged as Germany's most powerful political party.

In 1933 Hitler was named chancellor, and Nazism became Germany's ruling ideology (with the Nazi Party as the nation's only legal political party). The Nazis took control of all aspects of German life, abolishing freedom of the press and speech and severely limiting civil liberties. Having established a private army in the 1920s, the Nazis expanded their military strength by creating a fearsome secret police force, the GESTAPO. They also established CONCENTRATION

CAMPS, where they imprisoned Jews and other "enemies" of the Third Reich. Over the years, they murdered some six million Jews (see HOLOCAUST) and killed about five million others, including Gypsies, Slavs, homosexuals, communists and other political opponents of Nazism. In an attempt to build a German empire, the Nazis achieved ANSCHLUSS with Austria in 1938 and used strong-arm political tactics and intimidation that same year against Czechoslovakia, annexing its German-speaking SUDETENLAND. When the Nazis entered Poland in 1939, WORLD WAR II was launched and Germany entered on a course that was to see its utter defeat in the war, marking the disintegration of Nazism. The Nazi Party was officially banned by WEST GERMANY's postwar constitution. Nonetheless, the movement and its ideology reappeared in neo-Nazi groups that occasionally sprang up in Europe and the U.S.

Nazi-Soviet Pact See GERMAN-SOVIET NON-AGGRESSION PACT.

NBC (National Broadcasting Company) One of the three major U.S. radio and television networks. The National Broadcasting Company was established in 1926; its stock was owned

by RCA (Radio Corporation of America), Westinghouse and General Electric. RCA bought out the other two in 1930 to assume full ownership of the company. NBC established two national radio networks, the Red Network (with 25 stations) and the Blue Network (with six stations). During the GREAT DEPRESSION, NBC and its rival CBS provided news and entertainment programs to millions of radio listeners across the U.S. In 1943, the Federal Communications Commission ordered NBC to sell its Blue Network, which subsequently became ABC (the American Broadcasting Company). In the late 1940s and early 1950s, NBC pioneered programming in the new medium of television. NBC was especially known for its live drama and variety programs. In the 1960s, the network's news and documentary programs were noteworthy; NBC also programmed many new situation comedies and drama series. Live comedy returned to television in the 1970s via NBC's popular *SATURDAY NIGHT LIVE* program. By the 1980s, the NBC television network consisted of five NBC-owned stations plus some 210 affiliated stations; the NBC radio network included eight NBC-owned stations and about 300 affiliated stations. NBC was purchased by General Electric in 1986. Under GE the television network began to dominate the Nielsen ratings with programs like *Friends*, *Seinfeld*, *ER* and *THE WEST WING*.

NBC White Paper A notable series of investigative television documentaries. In its first real challenge to programs like CBS's *SEE IT NOW*, NBC lured Irving Gitlin from CBS to head the "creative projects" unit in NBC News. These network specials began with "The U-2 Affair" in November 1961 and included such other contemporary news subjects as "Angola: Journey to a War" (1961), "The Death of Stalin" (1963) and "Cuba: Bay of Pigs" (1964). Filmmakers like Robert Young and Albert Wasserman developed lightweight, portable 16mm cameras and sound equipment. This "cutting edge" technology enabled them to penetrate areas, from Angola to American slums, more easily and less obtrusively than had been possible with the old-fashioned 35mm camera equipment. By contrast to these probing contemporary investigations were programs like

"The Real West" (1961), narrated by Gary COOPER, which used historic photographs to re-create a vanishing aspect of American culture.

Neagle, Dame Anna (Florence Marjorie Robinson) (1904–1986) British actress. She was regarded as the first lady of British cinema from the late 1930s through the early 1950s. She was Britain's number one box office draw throughout most of the 1940s. From 1943 until his death in 1977, she was married to Irish-born producer Herbert Wilcox, who produced and directed nearly all her films. Among her most successful performances were two as Queen Victoria in *Victoria the Great* and in *Sixty Glorious Years*. Her portrayal of a WORLD WAR II heroine of the French Resistance in *Odette* (1950) was regarded as her finest performance. Also active in the theater, she came to be listed in the GUINNESS BOOK OF RECORDS for her 2,062 performances in the London musical *Charlie Girl*.

Nearing, Scott (1883–1983) American pacifist and radical of the early 1900s. He had a doctorate in economics and taught at several universities early in his career but encountered difficulty because of his Marxist, anti-establishment views. In 1915 he lost his teaching post at the University of Pennsylvania when he spoke out against child labor. He lost another job when he was indicted for opposing U.S. participation in WORLD WAR I. He later became a leading environmentalist, dedicated to simple, rural living. His ideas about the environment, which he and his wife, Helen, put into practice on their farm in New England, attracted a large following in the 1960s. The Nearings wrote *Living the Good Life* (1954); Scott Nearing's autobiography is *The Making of a Radical* (1972).

Neave, Airey (1916–1979) British WORLD WAR II hero and politician. An RAF flier during the war, Neave was shot down over Germany and held as a PRISONER OF WAR in Germany's notorious Colditz Castle but managed to make a daring escape. After the war he was on the British prosecution team in the NUREMBERG TRIALS. He was elected to Parliament in 1953. A supporter of,

and leading adviser to, Margaret THATCHER, he helped engineer her election to the leadership of the CONSERVATIVE PARTY in 1975. Neave took a particular interest in the problems of NORTHERN IRELAND, and it was widely assumed that he would become secretary of state for Northern Ireland in a Thatcher government. However, he was killed by a car bomb as he was leaving Parliament on March 30, 1979. The radical Irish National Liberation Army claimed responsibility for Neave's death.

Neel, Alice (1900–1984) American painter. The Pennsylvania-born expressionist painter spent most of her life in New York City. Highly individualistic in her style, she is noted for her psychologically acute and physically candid portraiture. Largely neglected during the postwar heyday of ABSTRACT EXPRESSIONISM, she was rediscovered in the late 1960s and 1970s and won a good deal of critical praise.

Negritude Literary movement among black writers from French colonies in Africa that originated in Paris during the 1930s. Founded by the Guianan poet Léon Damas, it championed and celebrated the uniqueness of black experience and talent. Léopold SENGHOR, later the founding father and first president of independent SENEGAL, was also a leader of the movement. Negritude was a consciousness-raising phenomenon that strongly influenced the black social and political revolution in the U.S. during the 1960s.

Negro leagues American baseball leagues formed in the era when black players were banned from major league teams. The Negro National League was formed in 1920; the Negro American League followed in 1937. After Jackie ROBINSON joined the Brooklyn Dodgers in 1947, breaking baseball's color bar, many other black players began to play for major league teams, and the Negro leagues declined in importance. The last, the Negro American League, was disbanded in 1960. Stars of the Negro leagues included pitcher Satchel PAIGE; outfielder Cool Papa BELL; and catcher Josh Gibson, who held the Negro leagues' home run record.

Nehru, Pandit Jawaharlal (1889–1964) Indian statesman and national-

Jawaharlal Nehru, first prime minister of India
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS
DIVISION)

ist, first prime minister of INDIA (1947–64). The son of attorney and journalist Motilal Nehru, Jawaharlal Nehru was born in Allahabad and educated in England at Cambridge University. After the AMRITSAR MASSACRE of 1919, he became active in the Indian Congress movement; with the support of Mohandas K. GANDHI, he assumed the presidency of the movement in 1929. In this position, Nehru was the chief architect of India's independence from Britain. Beginning in 1947, he served as the country's first prime minister, until his death in 1964. During his tenure, the pragmatic Nehru introduced industrial and social advances, guiding India to a role of leadership in the developing world. He was succeeded as prime minister by Lal SHASTRI, who was in turn succeeded by Nehru's daughter, Indira GANDHI.

Neill, Alexander Sutherland (1883–1973) Scottish educator. A revolutionary, progressive educator, Neill is best known for establishing the independent, self-governing Summerhill School which was based on the premise of making "the school fit the child." A teacher at various schools (1903–21), he first founded a school near Salzburg, Austria, but moved it to Leiston in Suffolk, England, and called it the Summerhill School (1927). The school was coeducational and catered to children from higher-income families, mostly American. He published many books on education, and his

ideas influenced the direction of education in both Britain and America.

Nelson, George "Baby Face" (Lester, J. Gillis) (1908–1934) American gangster. Born in Chicago, the diminutive bankrobber and killer began his recognized criminal career at the age of 14, when he was sent to a juvenile home for auto theft. By 1929 he was working as a strong-arm man for Al CAPONE's gang. Arrested during a bank robbery in 1931, he escaped prison the following year and joined DILLINGER's gang. Nelson quickly affirmed his violent reputation by indiscriminately killing bank guards and bystanders. After Dillinger's death at the hands of the FBI in July 1934, Nelson succeeded to the title of public enemy number one. He was killed by FBI agents during a shootout in Illinois four months later.

Nelson, Nate (1932–1984) Lead singer for the Flamingos (1954–62) and the Platters (1964–82). With the Flamingos he recorded the hit "I Only Have Eyes for You." His hits with the Platters included "Only You" and "Smoke Gets in Your Eyes."

Nelson, Ricky (Eric Hillard Nelson) (1940–1985) Ricky Nelson became a teenage singing idol for fans of ROCK AND ROLL during the 1950s. He appeared with his family on the long-running television show *The Adventures of Ozzie and Harriet*. By the time the show went off the air (1966), he had sold millions of records. Two of his biggest hits were "Mary Lou" and "Travellin' Man." In later years, he had a more modest career as a country rock musician.

Nemerov, Howard Stanley (1920–1991) American poet. Nemerov's first book of poetry, *The Image and Law* (1947), was critically acclaimed but derivative of T. S. ELIOT and other modernist poets. It was with *The Salt Garden* (1955) that he found his own voice. His realistic, romantic poetry often reflects an increasing concern with nature. Subsequent poetic works include *Inside the Onion* (1984) and *War Stories: Poems about Long Ago and Now* (1987). Nemerov's fiction, which shares with some of his poetry an ironic wit, includes *The Melodramatists* (1949) and *Stories, Fa-*

bles and Other Diversions (1971). Other works include *Figures of Thought: Speculations on the Meaning of Poetry and Other Essays* (1978) and *The Oak in the Acorn: On Remembrance of Things Past and on Teaching Proust, Who Will Never Learn* (1987). In 1988 he became the third poet laureate of the U.S. His sister was the photographer Diane ARBUS.

Nemirovich-Danchenko, Vasily Ivanovich (1848–1936) Author and journalist. He wrote prolifically, producing a vast number of narratives and novels directed at the general reader. Although superficial, his works are versatile and entertaining. They include *Personal Reminiscences of General Skobelev* (1884), *The Prices of the Stock Exchange* (1914) and *Peasant Tales of Russia* (1917).

Nemon, Oscar (1905–1985) One of Britain's most accomplished sculptors, he was famed for his portrait busts and full-size sculptures. Nemon's subjects included Queen ELIZABETH II, Margaret THATCHER, Dwight D. EISENHOWER and Sigmund FREUD. He was best known for his more than 50 likenesses of Winston CHURCHILL, one of which was in the members' lobby of the House of Commons.

Nemtchinova, Vera (1899–1984) Russian-born ballerina. Nemtchinova became a star of Serge DIAGHILEV's BALLETTS RUSSES in the 1920s and went on to lead several other dance companies. Her most famous role was as the androgynous "Girl in Blue" in *Les Biches*, Bronislava NIJINSKA's 1924 ballet about French sexual and social mores. Nemtchinova was hailed both for her abilities as a classical dancer and as an experimental performer in the modern mold.

Nenni, Pietro (1891–1980) Italian socialist politician. Nenni's political career spanned seven decades. In 1922 he succeeded Benito MUSSOLINI (who was then still a socialist) as editor of *Avanti*, a leading socialist newspaper. Strongly opposed to FASCISM, he was later imprisoned several times by Mussolini and spent a period in exile. He fought for the Loyalists in the SPANISH CIVIL WAR. After WORLD WAR II, he helped found the new Italian republic and served in its first government as

deputy prime minister and foreign minister. He led ITALY's Socialist Party from 1949 to 1969. His political alliance with the Italian Communist Party and his opposition to the NORTH ATLANTIC TREATY ORGANIZATION (NATO) earned him a Stalin Prize for Peace in 1952. He broke with the communists, however, and renounced the award after the Soviet invasion of Hungary (1957; see HUNGARIAN UPRISING). In 1962 he allied his party with the Christian Democrats in a coalition that ruled Italy until 1976.

neoexpressionism Term used for a revival and reinterpretation of 20th-century EXPRESSIONISM that flourished worldwide in the late 1970s, throughout the 1980s and into the 1990s. Rejecting passionless minimalist abstraction, the movement draws its subject matter from the contemporary world in figurative images that are often violent, brutal, childlike and erotic. Among the many different artists who have been attracted to elements of the style are the Americans David Salle and Julian Schnabel and the Spaniards Sandro Chia and Francesco Clemente.

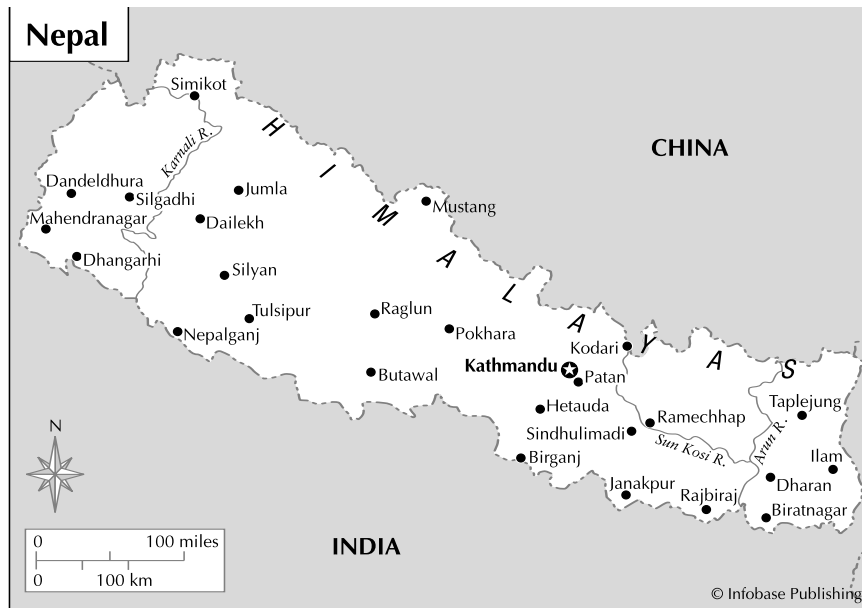

neorealism Italian literary movement that began in the late 1920s and came to dominate Italian literature in the 1930s, 1940s and 1950s. Its major figures included Alberto MORAVIA, Cesare PAVESE and Ignazio SILONE. A major precursor in Italian letters was the 19th-century novelist and story writer Giovanni Verga. Neorealism saw itself as a liberating impulse that could enable writers to abandon pseudo-sophistication and ornate literary stylings in favor of a more direct vision of life that encompassed the hopes and sorrows of everyday men and women. The neorealists frequently set their works in smaller Italian towns and villages as opposed to such cosmopolitan centers as Rome. In their blunt vision of the social and economic hardships of the Italian people, they were antifascist and a source of concern to MUSSOLINI's government. Neorealism had a great influence on Italian film directors of the 1940s, such as Roberto ROSSELLINI and Vittorio DE SICA.

Nepal Isolated central Asian kingdom bordering India in the northeast, Tibet and China in the north, landlocked by

NEPAL	
1923	Full independence is formally recognized by Britain.
1945	Rana Padma Shamsher becomes prime minister.
1946	The Nepali Congress Party is founded.
1950	Ranas family is in open conflict with the monarch, Tribhuvan. Tribhuvan, implicated in Nepali Congress Party conspiracy against Rana power, seeks and is granted asylum in India.
1951	King Tribhuvan is restored to the throne. Elections and the formation of a constituent assembly are promised. Interim constitution, the Government of Nepal Act, is promulgated.
1955	Tribhuvan dies and is succeeded by Mahendra as king. Nepal joins the United Nations.
1960	All political parties are banned. The king takes over direct control of government.
1972	Mahendra dies and is succeeded as king by his son Birendra.
1980	In national referendum, people vote for continuance of the current form of "partyless" government and against the reintroduction of political parties.
1990	Nepal adopts a new constitution providing for the king as head of state. Executive power is to be exercised by a prime minister, who leads the majority party in the legislature.
1991	Nepal hold its first election in 50 years.
1996	Maoist rebels, wishing to end the monarchy and replace it with a "people's democratic republic," attack government forces and gain control of certain parts of the country.
2001	King Birendra and all members of the royal family are murdered by Crown Prince Dipendra in a drunken rage. The king's brother Gyanendra assumes the throne.
2005	In the face of the rebel insurgency Gyanendra dismisses the government and assumes full power.
2006	Supporters of the multiparty system stage protests in Kathmandu. King Gyanendra announces the reinstatement of the parliament.

the Himalayan mountains. It was recognized as independent by GREAT BRITAIN in 1923. Nepal's Rana family held power as prime ministers from 1846 to 1950, and until 1956 Nepal exacted tribute

from TIBET. After a successful democratic revolt in 1950, autocratic rule was replaced by constitutional government, later modified under the regime of King Mahendra in the 1960s. After his death

in 1972 the king's son, Prince BIRENDRA, ascended the throne, and in May 1980 his monarchy and a parliament were ratified in Nepal's first election. Having aided BRITAIN during WORLD WAR I, Nepal over the years accepted financial aid from the USSR, China, and the U.S., though it remained essentially isolationist. In 1990 a Maoist people's movement party forced King Birenda to allow a multiparty government, and in 1991 Nepal held its first elections in 50 years. In 1996, in what has become known as the Nepal Civil War, Maoist rebels battled government forces and claimed several areas of Nepal to be under their rule. Birendra remained king until June 2001, when he, Queen Aiswarya, Prince Nirajan, and Princess Shruti were shot and killed by Crown Prince Dipendra over the latter's future marriage prospects. Dipendra promptly committed suicide, and Prince Gyanendra was crowned king of Nepal on June 4, 2001. A parliamentary system was established shortly after the regicide. In the face of an insurgency launched by Maoist rebels, however, Gyanendra assumed full powers in 2005. In 2006, facing widening protests, King Gyanendra announced he would reinstate parliament, which he dissolved more than a year before.

Neruda, Pablo (Nefalí Ricardo Reyes) (1904–1973) Chilean poet and diplomat. Neruda, who won the NOBEL PRIZE in literature in 1971, is

one of the most widely read poets of modern times. His works are popular in all parts of the world, including China and the USSR. Neruda uses a variety of free verse forms—from short, epigrammatic poems to longbreath lines reminiscent of Walt Whitman. Born in Chile, the son of a railroad worker, Neruda studied for a career as a teacher. But his book of lyric poems, *Twenty Love Poems and a Song of Despair* (1924), proved a phenomenal success and set him on a career as a writer. Neruda also served in the Chilean diplomatic corps for many years, including stints as a consul in Burma, Singapore, Argentina (where he met Federico GARCÍA LORCA) and Spain. A member of the Chilean Communist Party, Neruda ran as its candidate for the presidency of Chile in 1969 but then stepped aside in favor of Salvador ALLENDE. Other books of verse by Neruda include *Crepusculario* (1923), *Residence on Earth* (1933), *Canto General* (1950), *Elemental Odes* (1954) and *Extravagaria* (1958).

Nervi, Pier Luigi (1891–1979) Italian architect. Nervi was educated as a civil engineer, graduating in 1913. He had no formal training as an architect. Nonetheless, he went on to become an influential architect and winner of the 1965 gold medal of the American Institute of Architects. A pioneer in the structural and design use of concrete, in the mid-1940s he developed ferroce-

mento, a blend of mortar and steel-wire mesh. Using this material, he designed intricate buildings with soaring buttresses and swooping ceilings. Among his best-known buildings are the Turin Exhibition Hall (1949–50), the UNESCO building in Paris, the Palazzetto della Sport and other buildings for the 1960 OLYMPIC GAMES in Rome, and the Vatican Audience Hall.

Ness, Eliot (1902–1957) American law enforcement officer. Ness attended the University of Chicago and later joined the Justice Department. In 1928 he was put in charge of a hand-picked 10-man squad of incorruptible lawmen. Popularly known as the Untouchables, they were charged in general with fighting organized crime and in particular with eliminating Al CAPONE and his mob. They conducted a series of highly publicized brewery raids and distracted Capone while other agents ferreted out evidence of his income tax evasion, which led to his downfall. Ness was later named the Justice Department's chief investigator of PROHIBITION violations, first in Chicago, then in Appalachian moonshine territory. From 1935 to 1941 he was public safety director for crime-ridden Cleveland, Ohio and was credited with ridding the city of violence and corruption. He was federal director of the Division of Social Protection for the Office of Defense during WORLD WAR II, becoming a private businessman after the war. Ness's exploits were the subject of the popular television series *The Untouchables* during the 1950s and 1960s, and of a film by the same title (1989).

Netanyahu, Binyamin (1949–) Born in Tel Aviv, Israel, Netanyahu spent his childhood in Jerusalem and his adolescence in the U.S., where his father, Benzion Netanyahu, was a professor of history. In 1967 Binyamin Netanyahu entered a commando unit of the Israeli Defense Forces (IDF) for his obligatory military service, participating in several counterterrorism operations. After his discharge from the IDF in 1972, Netanyahu obtained a B.S. in architecture and a M.S. in management studies from the Massachusetts Institute of Technology in 1974. After working as a business consultant for several years, Netanyahu joined the foreign service

and became Israeli ambassador to the UN in 1984. In 1988 Netanyahu returned to Israel, where he was elected to the Knesset, the Israeli parliament, as a member of the right-wing Likud Party. In October 1991 he served as a senior member of the Israeli mission to the Madrid Peace Conference, which represented the first attempt at establishing a dialogue between Israel and the Arab countries of SYRIA and LEBANON, as well as with Palestinian delegates. In 1993 Netanyahu was elected chairman of the Likud Party and became prime minister in 1996, the year in which Israel held its first direct elections for that office. To ensure that Jerusalem would remain under Israeli rule, Netanyahu increased the number of Jewish settlements erected in the predominantly Arab districts of eastern Jerusalem. He also clashed repeatedly with the head of the Palestinian Authority Yasir Arafat. In the 1999 Israeli elections, Netanyahu lost the premiership to the new Labor candidate, Ehud BARAK, leading Netanyahu to resign his position in the Knesset and briefly retire from Israeli politics. Three years later, following the defeat of Barak by the Likud candidate, Ariel Sharon, Netanyahu returned to politics as Israeli foreign minister, a post he held for one year. Following national elections a year later, Netanyahu left the Foreign Ministry to become minister of finance. He resigned in 2005 in protest against the Sharon government's removal of Israeli settlements from the Gaza Strip.

Netherlands, The (Kingdom of the Netherlands) The Netherlands, popularly called Holland, lies on the North Sea coast of Western Europe and is bordered on the east by Germany and on the south by Belgium; the capital is Amsterdam but the seat of government is The Hague. A constitutional monarchy with a bicameral parliament, the sovereign is Queen Beatrix Wilhelmina Armgard (1938–), who became queen when her mother Queen Juliana, who had reigned since 1948, abdicated in 1980. Queen Beatrix was married in 1966 to Claus von Amsberg, a former West German diplomat, and gave birth to a son, Willem-Alexander Claus George Ferdinand in 1967—the first male heir to the throne since 1884. The monarch appoints a prime minister who is head of state and who chooses

the cabinet; Prime Minister Ruud Lubbers was appointed in 1982.

The Netherlands had a firm tradition of neutrality and remained so during WORLD WAR I, but in WORLD WAR II it was invaded in 1940 by Nazi Germany. During the occupation, 104,000 Dutch Jews were deported and killed, but many were hidden and saved by other citizens. Following liberation in 1945, the Netherlands became a founder-member of the NORTH ATLANTIC TREATY ORGANIZATION (NATO), a member of the Western European Union and of the BENELUX customs union.

In 1949 the Netherlands granted independence to its East Indies colony after a four-year war. The new Republic of INDONESIA expanded in 1963 when the Netherlands ceded its western half of New Guinea to Indonesia, finally ending 300 years of Dutch pres-

ence in Asia. In 1975 SURINAME, on the northeast coast of South America, became independent. The independence of its former colonies resulted in some economic instability at home due to increased immigration homewards and resulting unemployment. In 1953 the Netherlands' economic problems were exacerbated by destructive flooding. The autonomous NETHERLANDS ANTILLES is the sole Dutch territory outside of the Netherlands. A new constitution, based on the constitution of 1815, was introduced in 1983. In 1985, after much controversy, Prime Minister Lubbers agreed to accept the deployment of U.S. CRUISE MISSILES on Dutch soil. In 1994 Wim Kok, the leader of the country's Labor Party, became prime minister and led a three-party coalition into power. Wim Kok retained his premiership as the result

NETHERLANDS

1904	Dutch kill 541 Achinese in Sumatra; divide Timor island with Portuguese.
1914–18	Maintain neutrality during World War I.
1920	Permanent Court of Justice opens at The Hague.
1940	German troops invade, bomb Rotterdam; Dutch army surrenders, most of navy escapes to help Allies.
1945	Joins United Nations.
1947	Receives \$1 billion in Marshall Plan aid.
1948	Queen Wilhelmina abdicates in favor of daughter Juliana; nationalist revolts intensify in Netherlands Indies (Indonesia); Dutch circle Jakarta, arrest Sukarno in defiance.
1949	Netherlands recognizes Indonesian independence.
1954	Suriname and Netherlands Antilles made self-governing, equal members of Dutch kingdom.
1990	Nearly completed Oosterscheldedam, world's most advanced sea barrier, holds off highest flood waters in 37 years.
1991	Lends noncombat support to Operation Desert Storm in Persian Gulf.
1994	Wim Kok of the Labor Party is named prime minister.
1998	Kok's coalition wins reelection to parliament.
2000	Euthanasia is legalized based on strict procedures; national legislation permits homosexual couples to marry and adopt children.
2002	The government resigns following release of a report critical of its role in the Srebrenica massacre in Bosnia in 1995. Anti-immigration party leader Pim Fortuyn is shot dead by a lone gunman. In elections in May, CDA and List Pim Fortuyn form a new government under Jan Peter Balkenende. The Netherlands adopts the euro.
2003	Christian Democrats win a narrow victory in general elections and a center-right coalition with Balkenende as premier secures a second term.
2004	Massive protests in Amsterdam against public spending cuts and welfare reforms. Filmmaker Theo Van Gogh is murdered after receiving death threats for his controversial film on women's position in Islamic society.
2005	A radical Islamist is jailed for life for the murder of Van Gogh. Voters reject a proposed EU constitution.

of the 1998 national elections. He pushed through legislation in 2001 allowing homosexual couples to marry and adopt children. Since 1993 the Netherlands has become a vanguard state in the effort to permit euthanasia administered by physicians. The Dutch parliament formally authorized the procedure in 2000. In 2004 filmmaker Theo Van Gogh was murdered by a Dutch-Moroccan youth with radical Islamic beliefs, sparking debate about immigration and radical Islam in the Netherlands.

Netherlands Antilles Overseas territory containing the islands of Curaçao, Bonaire, and Aruba off the coast of South America, as well as several northern Leeward Islands, in the West Indies, in the Caribbean Sea. Formerly a colony, it became a territory of the Netherlands in 1954, with Willemstad, on Curaçao, as its capital. In 1969 it was the scene of civil strife, on Curaçao. In 1999 the Netherlands Antilles came under investigation for alleged money laundering, drug trafficking, and human rights violations on the five islands that make up the archipelago. In 2005 an agreement was signed that would make Curaçao and Sint Maarten associate states within the Kingdom of the Netherlands, while Bonaire, Saba and Sint Eustatius would become directly part of the kingdom.

Neto, Agostinho António (1922–1979) Angolan physician and revolutionary leader, president of ANGOLA (1975–79). Born in a village near Luanda, Neto was the son of a white Methodist missionary and a black Angolan woman. He studied medicine in Portugal and received his degree in 1958. As a student in Lisbon, he became active in the movement to depose Portuguese dictator Antonio SALAZAR and was imprisoned several times. Escaping from house arrest in 1962, he assumed leadership of the Popular Movement for the Liberation of Angola (MPLA), a Soviet-backed independence group. The MPLA emerged victorious, not only in its guerrilla war against Portugal, but also (with the aid of Cuban troops) in a subsequent civil war against two other nationalist organizations—Jonas SAVIMBI's National Union for the Total Independence of Angola (UNITA) and Holden Roberto's National Front for the Liberation of

Angola (FNLA). Neto was proclaimed president of an independent Angola in 1975. He established a one-party state that favored the USSR but sought ties with the West. Neto died in Moscow following surgery for cancer and was succeeded by José Eduardo DOS SANTOS.

Neuilly, Treaty of Post-WORLD WAR I agreement concluded in 1919 between the Allies and BULGARIA. Part of western Thrace was ceded to Greece and small border areas were ceded to Yugoslavia. In addition, southern Dobruja, acquired after the BALKAN WARS, was confirmed as Romanian territory. Reparations were imposed, as was the restriction of the Bulgarian army to 20,000 men.

Neumann, John von (János von Neumann) (1903–1957) German mathematician who studied at the University of Berlin, the Berlin Institute of Technology and the University of Budapest, from which he obtained his doctorate in 1926. Von Neumann was Privatdozent at Berlin (1927–29) and taught at Hamburg (1929–30). He left Europe in 1930 to work in Princeton, first at the university and later at the Institute for Advanced Study. From 1943 he was a consultant on the ATOMIC BOMB project. Von Neumann may have been one of the last men able to span the fields of pure and applied mathematics. His first work was in set theory (the subject of his doctoral thesis), but in 1928 he published his first paper in the field for which he is best known, the mathematical theory of games. This work culminated in 1944 with the publication of *The Theory of Games and Economic Behavior*, which von Neumann had coauthored with Oskar Morgenstern. Not all the results in this work were novel, but it was the first time the field had been treated in such a large-scale and systematic way. Apart from the theory of games von Neumann did important work in the theory of operators. Dissatisfied with the resources then available for solving the complex computational problems that arose in hydrodynamics, von Neumann developed a broad knowledge of the design of COMPUTERS and, with his interest in the general theory of automata, became one of the founders of a whole new discipline. He was much interested in the general role of science and technology

in society, and this led to his increasing involvement with high-level government scientific committees.

Neutra, Richard Josef (1892–1970) Austrian-born American architect, a pioneer in introducing modern architecture and design in the U.S. Neutra studied in Vienna with Adolf LOOS, and from 1921 to 1922 worked with Erich Mendelsohn before coming to the U.S. in 1923, where he met Louis Sullivan and worked briefly for Frank Lloyd WRIGHT. In 1926 Neutra moved to California where he established a successful practice designing houses in the INTERNATIONAL STYLE vocabulary of MODERNISM when such work was otherwise virtually unknown in the U.S. His Lovell ("Heath") house of 1927–29, with its white walls and bands of windows, established his style. It was included in New York's MUSEUM OF MODERN ART 1932 exhibition entitled *The International Style*. The desert house near Los Angeles for film director Josef Von STERNBERG, with walls of gleaming steel and large windows looking into a courtyard with a pool and curving walls (1936), is a striking example of the work that made him famous. Later work included schools and housing projects, such as the Channel Heights housing of 1946 at San Diego and the house of the same year for Edgar Kaufmann Sr. near Palm Springs, California. The massive Los Angeles County Hall of Records (1958), with automatically adjusting louvers for sun control, is an example of his later, large-scale work. Neutra's philosophy and design theories are set forth in his 1954 book *Survival Through Design*.

Nevelson, Louise (1900–1988) American sculptor. Born Louise Berliawsky in Kiev, Russia, she came to the U.S. with her family at the age of five. She studied at the Art Students League in New York (1929–30) and at the Hans Hoffmann School in Munich (1931), subsequently serving as an assistant to Diego RIVERA in Mexico City (1932–33). She traveled widely in Europe and Latin America, returned to the U.S. and had her first one-woman show in New York in 1941. Her abstract sculptures are often composed of found objects, mainly planks, chair legs, balusters and other turned pieces of wood. Assembled into boxes painted in uniform

tones of black, white or gold, they have a compelling and enigmatic presence. These compositions grew larger and more environmental as her career progressed. In the work of the 1960s and 1970s, Nevelson also made use of metals and Plexiglas. Her work is particularly well represented in the collections of New York's MUSEUM OF MODERN ART and Whitney Museum of American Art.

Nevins, Allan (1890–1971) American historian. Nevins earned a master's degree from the University of Illinois in 1913, after which he worked in New York City as a journalist. In 1928 he joined the history department of Columbia University, where he remained for three decades. During his long and fruitful career, Nevins wrote widely on American history, including his biographies of Grover Cleveland and Hamilton Fish, which won PULITZER PRIZES in 1932 and 1936, respectively, and his eight-volume history of the Civil War, *Ordeal of the Union* (1947–71). Nevins was also one of the founders of *American Heritage* magazine.

New Age movement The New Age movement, which first won attention during the intense social change of the 1960s with its proclamations of a new Age of Aquarius, emerged in the 1980s and 1990s as a loosely defined but highly cherished label for a broad variety of spiritual, social and personal concerns. Basically, New Age refers to an open attitude toward such belief systems as pagan, occult, oriental and modern syncretistic movements; it considers them to be valid spiritual alternatives to the Judeo-Christian tradition. The New Age also posits the end of a past historical epoch dominated by war, nationalism and materialism; points to a new planetary union of peoples that will combine benign development with ecological awareness. Key, albeit disparate, figures in the development of New Age thinking include Joseph CAMPBELL, TEILHARD DE CHARDIN, Aleister CROWLEY, Fritz PERLS, E. F. Schumacher, D. T. Suzuki and Alan Watts.

Newbery Medal American children's literature award. The John Newbery Medal was established in 1922 and is awarded annually by the Children's Librarians Sections of the American Library Association to notable

works of literature for children. It is named after John Newbery (1713–67), one of the earliest publishers of children's books. The medal itself was designed by the American sculptor, Rene Chambellan and is contributed by Frederic G. Melcher, the editor of *Publisher's Weekly*. The first medal was presented to Hendrik Willem Van Loon for *The Story of Mankind* (1922).

New Britain (German: Neu-Pommern) (Papua New Guinea). Largest of the islands of the BISMARCK ARCHIPELAGO, in the southwest Pacific Ocean, first discovered by the British in 1700. In 1884 it was colonized by Germany, and during WORLD WAR I was taken by AUSTRALIA and retained as a LEAGUE OF NATIONS mandate from 1920 to 1941. In January 1942 it was claimed by the Japanese, whose positions here subjected it to heavy U.S. air raids and follow-up invasions from late 1943 to March 1944, and it remained the scene of intense conflict until the end of WORLD WAR II.

New Criticism A term coined by poet and critic John Crowe RANSOM in *The New Criticism* (1941), which addresses the works of I. A. RICHARDS, T. S. ELIOT and William EMPSON, among others. The term's meaning has been stretched and blurred but generally it refers to literary interpretation based on close attention to the text and its nuance as well as emphasis on thematic organization. It rejects analysis of a work's background or its creator's motivation, focusing instead on each poem, story or novel as a self-contained work of art. Others associated with the New Criticism (not always willingly) include Robert Penn WARREN, R. P. Blackmur and F. R. LEAVIS. The New Criticism was dominant in the academic study of literature from the 1940s through the 1960s but has since been largely supplanted by other critical approaches such as FEMINISM, DECONSTRUCTION and STRUCTURALISM.

New Deal Economic and social reform program instituted by President Franklin ROOSEVELT in 1933. When Roosevelt assumed the presidency, the U.S. was in the depths of the GREAT DEPRESSION. Nearly one-quarter of the workforce had lost their jobs, and thousands of people, unable to pay

their bills, had been thrown out of their homes and farms. FDR was elected with a mandate to deal with the crisis. His program was radical for its day: The government established social programs and became involved in the economy in an unprecedented manner. Programs like the Civil Works Administration (CWA), CIVILIAN CONSERVATION CORPS (CCC) and WORKS PROGRESS ADMINISTRATION (WPA) used borrowed money to put the unemployed back to work. FDR also established the Social Security system to provide a universal, social safety net. Many feared this massive expansion of government power, and the Supreme Court initially struck down many of the programs. Although the New Deal helped many, it was the mobilization for World War II that decisively brought the U.S. out of the Depression. However, the legacy of the New Deal endures—an expanded federal government that continues to play an active role in the social and economic life of the country.

New Democratic Party (Canada) The third major Canadian political party behind the Liberals and Progressive Conservatives. The New Democratic Party is left-of-center and was formed in 1933 out of the United Farmers Party, the Socialist Party of Canada and various immigrant groups. Until 1961 the party was known as the Cooperative Commonwealth Federation. Its support has traditionally come from western farmers and working people in Ontario. To date, the party has been most successful at the provincial rather than the national level. During the 1970s the NDP controlled governments in the provinces of British Columbia and Saskatchewan. In 1990 the NDP shocked the nation as it took control of the government of Ontario, Canada's wealthiest and most populous province. However, the party has suffered from lack of support at the polls in the early years of the 21st century.

New Economic Policy Economic policy practiced by the Soviet government in 1921–28, replacing the policies of WAR COMMUNISM (1918–21). It aimed at revitalizing the economy by allowing greater freedom in agriculture, industry and trade. In this, the government was successful and raised

the national income above that of 1913. The NEP was followed by the first FIVE-YEAR PLAN.

Newfoundland Province of eastern CANADA. Although Newfoundland had been an independent British colony since 1855, France did not cede its fishing rights until 1904. With fishing, paper production and iron ore, Newfoundland's economy was strong until the end of WORLD WAR I, when demand for its exports declined. After squabbling between Quebec and Newfoundland over Labrador, the British Privy Council established the current boundaries of the provinces in 1927. During the GREAT DEPRESSION, Britain responded to an appeal for help by suspending Newfoundland's internal government and reassuming control in 1934. In 1948 Newfoundland elected to become a part of Canada, and in 1949 Newfoundland and Labrador became Canada's 10th province.

New Georgia See Solomon Islands.

Newhouse, Samuel Irving (1895–1979) American publishing and broadcasting magnate. Described as "America's most profitable publisher," Newhouse began with a single newspaper in 1922 and went on to build a multimillion-dollar communications empire. By the 1970s his properties included 31 newspapers in 22 American cities, seven magazines, six television stations, five radio stations, and 20 cable television stations. His son S(amuel) I(rving) "Sy" Newhouse II inherited the business and added the distinguished publishing firm Random House to the Newhouse empire in 1980.

Ne Win, U (1911–2002) Ne Win was by far the dominant figure in the political life of independent Myanmar (formerly BURMA). He was chief of the armed forces from 1948, deputy prime minister from 1948 to 1950, prime minister from 1958 to 1960, chairman of the Revolutionary Council from 1962 to 1974, president from 1974 to 1981 and chairman of the Burmese Socialist Program Party from 1962 to 1988. Ne Win had a retiring, self-effacing public persona; paradoxically, he exerted a most powerful charisma. It is widely believed that Ne Win corruptly acquired vast wealth.

This belief, allied to severely deteriorating economic conditions, fueled the unrest in mid-1988 that drove Ne Win to resign as chairman of the BSPP on July 12. He remained a powerful figure, and it is thought that he was the guiding hand behind the army coup of September 18, 1988.

New Journalism Style of journalistic writing that first won wide popularity in the U.S. in the 1960s. New Journalism is a blending of factual reporting and imaginative interpretation that first flourished in such magazines as *Esquire* and *Rolling Stone* and weekly urban tabloids, such as the *Village Voice*—rather than in traditional daily newspapers. The best New Journalism pieces brought a freshness of style and an impassioned mode of analysis to subject matter—such as presidential elections—that had long been handled in a strictly objective format. Among the key practitioners of New Journalism during its emergence were Joan DIDION, Norman MAILER, Gay Talese, Hunter S. THOMPSON and Tom WOLFE. The style has remained a staple of magazine writing ever since.

newly industrialized countries (NICS) Nations in the developing world that possess high-growth industrial centers, but which have not yet risen to the status of the G8 nations, (such as the U.S., Britain, France or Germany). An example of an NICs is Singapore, which has accumulated substantial reserves of foreign capital over several decades through its production of inexpensively produced, labor-intensive export products, such as clothing and toys. The economic development of such NICS generally follows what some economists have termed the “law of comparative advantage.” According to this principle, NICS will tend to produce goods that capitalize on the economic factor of production (land, raw materials, capital or labor) that the country possesses in abundance. For example, most NICS in East Asia originally had a large surplus of low-wage labor, which facilitates the production of labor-intensive goods.

Newman, Arnold (1918–2000) American photographer. Born in New York City, Newman is highly acclaimed for his portraits of famous writers, ac-

tors, artists and political leaders. His photographic style is probing and sharply focused. He often poses his sitters in a setting that reflects their personalities and professions. Newman has continued to organize exhibitions of his work, such as his 1992 presentation at the National Portrait Gallery titled *Arnold Newman's Americans* and the 2000 exhibition at the Corcoran Museum of Art titled *Arnold Newman: Breaking Ground*.

Newman, Barnett (1905–1971) American painter. Born in New York City, he studied at City College, Cornell University and the Art Students League. In the mid-1940s, he began to paint canvasses that exploded spatial convention by interrupting flat fields of pure color with one or more narrow vertical stripes. *Stations of the Cross*, a series of paintings he did from 1958 to 1966, are severe black-and-white compositions in which vertical bands interact with a raw ground in completely two-dimensional space. Newman's later paintings, such as *Blue Midnight* (1970), contrast large areas of color on huge canvasses, again separated and intensified by narrow stripes. Newman bridged the gap between ABSTRACT EXPRESSIONISM and COLOR-FIELD PAINTING—and was active in both movements. His works proved extremely influential on abstract painters of the 1960s and 1970s.

Newman, Paul (1925–) American movie actor. Born in Shaker Heights, Ohio, he attended Kenyon College and was trained as an actor at the Yale School of Drama and the Actors Studio. His meteoric rise to fame began with his stage role in *Picnic* (1953). He achieved HOLLYWOOD stardom in *The Long Hot Summer* (1958). Handsome, gifted and possessed of extraordinary blue eyes, Newman gained fame for roles as ironic and self-reliant antiheroes in such movies as *The Hustler* (1961), *Hud* (1963), *Cool Hand Luke* (1967), *Butch Cassidy and the Sundance Kid* (1969), *The Sting* (1973), *Absence of Malice* (1981), *The Verdict* (1982) and *Blaze* (1989). He gave memorable performances in two dramas by Tennessee WILLIAMS: *Cat on a Hot Tin Roof* (1959) and *Sweet Bird of Youth* (1962). Newman received an ACADEMY AWARD for his reprise of *The*

Hustler's Fast Eddie in *The Color of Money* (1986). He is also a successful director whose credits include *Rachel, Rachel* (1968), starring his wife, actress **Joanne Woodward**. The couple are also active in social causes. In the 1990s Newman appeared sparingly in Hollywood films, such as *Message in a Bottle* (1999). He also appeared on Broadway in a limited engagement as the Stage Manager in a revival of *Our Town* by Thornton Wilder. In 2005–6 he won an Emmy and a Golden Globe for his work in the miniseries *Empire Falls*.

Newport Jazz Festival One of the oldest jazz festivals in virtually continuous operation; first appeared in 1954 in Newport, Rhode Island, as a non-profit community event. Pianist-night club owner George Wein was its first artistic director, a position he still holds. From the start, the NJF has attracted loyal followings by featuring internationally known jazz stars; it also helped revive the jam session, an “institution” that had faded appreciably because of the music's growing sophistication and stylistic diversification. In 1958 a documentary film *Jazz on a Summer's Day* brought even greater fame. In 1961 the NJF was canceled by Newport's City Council because of riotous crowds in previous years; it was resumed in 1962 but in 1971 was again cut short because of unruly crowds. In 1972 it was moved to New York City where it became known as the Newport Jazz Festival/New York. Corporate sponsorship, an extended 10-day schedule and a host of venues ranging from Carnegie and Avery Fisher Halls to the Roseland Ballroom and Staten Island Ferry, have made the NJF America's premier jazz festival. Impresario Georg Wein has produced a number of “satellite” concert events around the world under the Newport banner; the NJF has also been the source of a large number of excellent “live” recordings. In 1986 the NJF changed its name to the JVC Jazz Festival/New York to acknowledge its prime sponsor, the Japanese Victory Corporation.

New Republic, The American periodical founded in 1914. A liberal weekly, *The New Republic* was founded by William Straight, who married the

wealthy Dorothy Whitney; the two financed the magazine and absorbed its losses. Under the editorship of Herbert Croly from 1914 until 1930, the magazine supported labor unions, woman suffrage and prison reform. It reluctantly abandoned its neutrality in WORLD WAR I but opposed the TREATY OF VERSAILLES, espousing "Peace without victory." Croly was succeeded by Bruce Bliven in 1930, and the magazine maintained its left-leaning stance, first supporting the socialist presidential candidate but later embracing Franklin D. ROOSEVELT. It accepted U.S. participation in WORLD WAR II. Henry A. WALLACE, former vice president to Roosevelt, became editor in 1946, and the magazine's circulation soared to nearly 100,000. In 1954 Dorothy Straight sold the magazine to Gilbert A. Harrison, and it went on to support the presidential bids of Adlai STEVENSON and John F. KENNEDY and later to assail the corruption of WATERGATE. In 1974, the magazine was sold again, to Martin Peretz, a lecturer at Harvard University, and has continued to uphold a moderate, liberal stance. Contributors to *The New Republic* have included Malcolm COWLEY, Margaret SANGER, Thomas WOLFE, John STEINBECK, Mary MCCARTHY and Delmore SCHWARTZ.

Newton, Huey P(ercy) (1942–1989) American black activist. In the late 1960s he cofounded the BLACK PANTHER Party, which advocated black self-reliance and self-defense against police racism and brutality. A charismatic symbol of black anger, Newton was dogged by frequent trouble with the law. When he was convicted in 1968 of voluntary manslaughter in the death of an Oakland, California, policeman, "Free Huey" became a rallying cry among radicals and many college students. The conviction was overturned in 1970, and the charges were dismissed after two subsequent trials ended in hung juries. Later troubles stemmed from charges that he had murdered a prostitute, charges that were ultimately dropped. He was convicted in the early 1980s for weapons possession. In the meantime, he earned a Ph.D. in social psychology (1980) and entered a drug-abuse program in 1984. He was shot to death on a street in Oakland.

New Wave Loosely defined and loosely organized movement in rock music that emerged in the 1970s. The New Wave, which became popular in both Britain and the U.S., embraced a number of highly disparate musical talents. It was united, however, by a reaction against both the superstar syndrome that had come to dominate rock and roll as well as the heavy-metal emphasis that had emerged in the early 1970s (with bands such as LED ZEPPELIN). Instead, the New Wave musicians sought to pare rock down to its basic 1950s rhythm forms and to introduce new sounds, such as Reggae and minimalist electronic music. Major New Wave musicians and bands include The B-52s, The Cars, Elvis COSTELLO, Dave Edmunds, Nick Lowe, Graham Parker, The POLICE and Jonathan Richman.

New Wave French film movement that began in the late 1900s. (See also NOUVELLE VAGUE.)

new world order Term coined by U.S. president George H. W. BUSH to describe a post-COLD WAR realignment in international relations among the world's nations. Among the main tenets of the new world order is the assumption that the U.S. and the USSR are no longer ideological enemies or military rivals; rather, the U.S. and the USSR would cooperate to assure that other nations (notably those formerly under communist rule in Eastern Europe) achieve self-determination. The ideals of the new world order were first put to the test during the PERSIAN GULF WAR. In that conflict, the USSR supported UNITED NATIONS resolutions to oust IRAQ from KUWAIT. Moreover, the USSR did not oppose U.S. military efforts in the conflict.

New York City Ballet One of the great dance companies in the world, it emerged under its present name in 1948 as the resident company of New York City Center after 14 years of development, during which time it was known variously as American Ballet, Ballet Caravan and Ballet Society. With George BALANCHINE as artistic director, Jerome ROBBINS as artistic codirector and Lincoln KIRSTEIN as general manager, the company developed a classical style that is distinctly American.

The company presented the first original full-length ballet created in America, Balanchine's *Midsummer Night's Dream* (1963), and staged a triumphant Stravinsky Festival in 1972 in honor of Balanchine's longtime musical collaborator, Igor STRAVINSKY. The repertory is dominated by the works of Balanchine, such as *Agon* (1957) and *Liebeslieder Walzer* (1960), and of Robbins, such as *Dances at a Gathering* (1969) and *The Goldberg Variations* (1971). Outstanding dancers associated with the company include Edward Villella, Maria TALLCHIEF, Suzanne FARRELL, Patricia McBride and Peter MARTINS. In 1964 the company took up residence at the New York State Theatre at Lincoln Center. After the death of Balanchine in 1983, Martins and Robbins became ballet masters in chief. In 2001 Christopher Wheeldon became the first individual to hold the title of Resident Choreographer for the New York City Ballet.

New Yorker, The American magazine founded by Harold Ross in 1925. The magazine established itself as a sophisticated, satirical weekly notable not only for its humor but also for its intelligent reporting. The many legendary American authors associated with the magazine's early days include Dorothy PARKER, James THURBER, E. B. WHITE, John HERSEY and the cartoonist Charles ADDAMS. The magazine maintains its literary standing, publishing fiction by John UPDIKE and Mavis GALLANT, among others. Since the editorial changes in the mid-1980s, however, when many longtime staffers left, some readers feel that its editorial quality has diminished. In 1985 *The New Yorker* was acquired by the publishing magnate S. I. NEWHOUSE.

New York Herald Tribune, The American newspaper begun in 1924 and folded in 1966. The *Herald Tribune* was formed by the merger of *The New York Herald* and *The New-York Tribune*, whose owners, Ogden M. and Helen Rogers Reid, bought the *Herald* from Frank A. Munsey for \$5 million. In its prime, the *Herald Tribune* was noted for its typographical excellence, quality writing and incisive political and foreign reporting and commentary. Its reporters were considered the best in the country, and its political columnists

included Walter LIPPMANN, Joseph Alsop and Roscoe Drummond. Its politics were consistently Republican except in 1964, when it supported Democratic presidential candidate Lyndon B. JOHNSON over Republican Barry GOLDWATER. The paper began to flounder following Ogden Reid's death in 1947 when his wife became president and their elder son, Whitelaw, editor. Mrs. Reid later withdrew, and her younger son Ogden became publisher and editor. In 1957 the *Herald Tribune* was bought by John Hay Whitney, head of Whitney Communications Corporation, but his attempts to revive the paper were of little avail. The 114-day newspaper strike of 1962–63 proved disastrous; the paper steadily lost money and was forced to shut down three years later.

New York Times, The American newspaper founded in 1851. Perhaps America's most venerated newspaper, the *Times* established its current reputation at the turn of the 20th century under the leadership of Adolph S. Ochs, who had been appointed publisher and general manager in 1896. Ochs adopted the motto "All the News That's Fit to Print," installed the paper's vast, worldwide network of correspondents, emphasized international news and established the paper's policy of printing important speeches, papers and news conferences in their entirety. The *Times* was the only paper to publish the complete TREATY OF VERSAILLES, and it won a PULITZER PRIZE in 1918 for its comprehensive publication of wartime documents. It received another Pulitzer in 1972 for printing the PENTAGON PAPERS. The *Times* and its staff have won more Pulitzer Prizes than any other American daily. The *Times* pioneered the use of the wireless in news gathering, and on election night, 1928, its famous electronic bulletin board began circling the Times Tower in Manhattan's Times Square. This building, to which the paper had moved in 1904, was sold in 1961.

Following World War I, the paper characterized its editorial policy as independent and Democratic, yet it upheld a fairly conservative stance. It backed Republican presidential candidates in the '40s and '50s yet denounced MCCARTHYISM. In the 1960s, under executive editor A. M. Rosen-

thal, it endorsed Democratic candidates and published the entire Warren Commission Report following John F. KENNEDY's assassination. But it was unsympathetic to the student uprisings in 1968, and Columbia University students picketed the home of publisher Arthur Ochs "Punch" Sulzberger. While its revelation of the Pentagon Papers helped bring about an end to the VIETNAM WAR, the *Times* was second to the WASHINGTON POST in its coverage of the WATERGATE break-in. In the mid-1970s, though, it led the way in exposing abuses in the CENTRAL INTELLIGENCE AGENCY.

In 1978 it began running a four-section daily, with the third section devoted to a different topic each day. The *Times* has been criticized from both the right and the left for its political views and its economic position. In the 1980s, its shift toward more entertainment and "soft" news incurred censure; however, it retains its worldwide reputation with a nationwide circulation of approximately 1,100,000 daily and 1,700,000 Sunday, and also owns other papers, magazines, radio and television stations and book publishers. In 2003 the newspaper became the center of controversy following revelations that one of its reporters, Jayson Blair, had plagiarized other periodicals in his work for the *Times*. Two years later another one of the paper's reporters, Judith Miller was jailed for several months for refusing to identify a confidential source to a grand jury. The newspaper staunchly defended her right to remain silent to protect her source. But after her release from jail, the reporter was forced to resign from the paper when evidence surfaced that she had misled her editors while filing stories alleging Iraq's possession of weapons of mass destruction that were based on unreliable sources.

New York Times v. Sullivan (1964) Landmark U.S. Supreme Court decision defining libel law and the right of the press under the First Amendment. In 1960 the *New York Times* ran a civil rights group's ad charging the Montgomery, Alabama, police with misconduct. Several statements in the ad were inaccurate, and a Montgomery court awarded the local police commissioner a \$500,000 libel award against the newspaper. The *Times* appealed, and

the case went to the Supreme Court. The Court absolved the *Times*, holding that if a public official or a "public figure" is libeled by a false report, the injured party must show that the press acted with actual malice in publishing the statement. Malice would consist of knowledge that the statement was false or reckless disregard of its falsity. A public figure is one who, although not a public official, is a party who has jumped or been thrust into the public limelight by news events.

New York Times v. United States Popularly known as the Pentagon Papers case; the Supreme Court refused to halt the publication of stories in the *New York Times* and *Washington Post* based on material from a classified Pentagon study of the origins of the VIETNAM WAR. The Nixon administration had attempted to halt publication of these stories, claiming that their publication during the continuing Vietnam conflict would be detrimental to national security. The Supreme Court rejected this argument and held that, under the First Amendment, suppression of the material would be an illegal prior restraint of freedom of the press.

New York World's Fair of 1939 Held in Flushing Meadows, Queens (1939–40), this exposition included a number of American exhibits as well as national exhibits from various countries around the world. It took for its theme "Building the World of Tomorrow." Costing nearly \$160 million, the Fair was symbolized by a 700 ft.-tall Trylon and a 200 ft.-diameter Perisphere. Among the better-known U.S. designers and architects who created sleek and streamlined exhibits for the 1939 World's Fair were Norman BEL GEDDES, Henry DREYFUSS, Raymond LOEWY and Walter Dorwin Teague. It was the last major World's Fair held until the Brussels Exposition of 1958.

New Zealand Country in the South Pacific, 1,000 miles south of AUSTRALIA. Formerly a British colony, New Zealand became a dominion in 1907 and was granted independence by the Statute of Westminster in 1931. Its full independence as a commonwealth was confirmed by its parliament in 1947. New Zealand aided Britain and fought with the Allies in both WORLD WAR I and WORLD WAR

NEW ZEALAND

1907	New Zealand made a dominion under the British Crown.
1910	Refrigeration makes it possible for Britain to buy huge quantities of New Zealand meat and dairy products.
1914	Almost 10% of population volunteers to fight in World War I; almost 2% killed.
1926	Granted self-government within British Commonwealth.
1935	Labour Party creates world's first welfare state in response to Great Depression.
1936	National Party formed in opposition.
1944	Wartime conditions encourage self-sufficiency in manufacturing.
1947	Granted full independence.
1949	National Party wins elections.
1951	ANZUS alliance formed with Australia and U.S.
1952	New Zealand grants independence to Western Samoa.
1953	One of history's worst train wrecks kills hundreds at Tangiwai.
1967	Decimal currency adopted.
1984	Effectively leaves ANZUS alliance by refusing to allow nuclear-powered or -armed ships to enter its harbors.
1985	<i>Rainbow Warrior</i> , a ship belonging to Greenpeace environmentalist group, is blown up in Auckland harbor by French Secret Service; government begins programs to aid Maoris, islands' indigenous population.
1987	Maori recognized as an official language.
1990	Recession creates dissatisfaction with Labour government; National Party wins elections in landslide.
1993	National Party wins a slight majority. In a referendum, voters approve a mixed, member-proportional representation and an increase in the number of seats in parliament from 99 to 120.
1995	Parliamentary agreement offers cash and land compensation to the Tainui on the North Island and a statement of regret and apology for past Maori-settler hostilities.
1996	The New Zealand First Party forms an alliance with the National Party.
1999	A Labor-Alliance coalition secures 59 of the 120 seats in national elections; its leader, Helen Clark, becomes prime minister.
2002	Clark wins a second term.
2004	A fierce debate over a bill in parliament to nationalize the seabed. Maori protesters affirm enactment of the bill would infringe their ancestral rights. The government survive a no-confidence vote. A law is enacted recognizing civil unions of gay couples.
2005	Prime Minister Clark wins a narrow election over the National Party.

II. New Zealand troops joined the UNITED NATIONS forces in KOREA in the 1950s, and a smaller contingent fought

in VIETNAM in the 1960s. New Zealand has a history of progressive social reform, having passed legislation on the

vote for women and on social security in the late 19th century. Beginning in 1935 under Prime Minister M. J. SAVAGE, the

LABOUR PARTY introduced public works programs, aid to farmers as well as health care and social security enhancements to mitigate the effects of the worldwide GREAT DEPRESSION.

In the early 1970s under the administration of Labour Party prime minister Norman Kirk, New Zealand experienced some economic instability due to the energy crisis and GREAT BRITAIN's decision to enter the EEC. New Zealand began withdrawing what troops it had in Southeast Asia at this time. Kirk died in 1974 and was succeeded by his finance minister, Wallace Rowling. The economy worsened and the National Party was voted into power in 1975 with Robert Muldoon as prime minister.

The Labour Party returned to power in 1984, led by David LANGE, who proposed an antinuclear defense policy. Lange's government strained relations with the UNITED STATES by refusing entry into New Zealand's ports of any nuclear-powered vessel or vessel bearing nuclear arms. In 1985 *Rainbow Warrior*, a vessel of the GREENPEACE environmental organization that was monitoring nuclear tests in the area, was mined in Auckland Harbor—arousing much indignation. French prime minister MITTERRAND later admitted the French secret service was responsible. New Zealand's relations with the U.S. improved in 1987 when the National Party supported a bipartisan non-nuclear policy. Although the

National Party continued its rule of New Zealand with a narrow victory in 1993, the Labour Party won the 1999, 2002 and 2005 elections, and Helen Clark became and remained prime minister.

Ngala, Ronald G. (1923–1972) Kenyan political leader. A moderate nationalist, Ngala was involved in the movement for Kenyan independence in the late 1950s and early '60s. In 1960 with Daniel Arap Moi, he formed the Kenyan African Democratic Union, which was a rival to Jomo KENYATTA's more militant Kenya African National Union (KANU). Ngala led a coalition government in the early 1960s before independence. In 1964, following independence (December 12, 1963), Ngala announced that the KANU would support Kenyatta as president of the new republic. (See also KENYA.)

Ngoyi, Lillian (1911–1980) Black nationalist South African leader known as “the mother of the black resistance.” From the mid-1960s until her death, Ngoyi was declared a “banned person” by the South African government. Under the banning order, the government restricted her movements and contacts and forbade her to be quoted by newspapers. She was also one of the first persons to be confined under a 90-day detention law, spending 71 days in prison without charge or trial in 1963. (See also SOUTH AFRICA, APARTHEID.)

Nguyen Van Linh (Nguyen Van Cuc) (1915–1998) Vietnamese communist leader. Nguyen Van Linh was elected secretary general of the Vietnamese Communist Party in 1986. He joined the students' union of the Vietnam Revolutionary Youth Association in 1929 and was imprisoned in 1930 by the French for his resistance activities. He joined the ICP upon his release from prison in 1936 and founded a provisional party organization and many party bases in Haiphong. He was arrested again in 1941 after conducting revolutionary activities in central VIETNAM. After his release in 1945 he became secretary of the Saigon Party Committee and led the resistance against the French. From 1957 until 1960 he was acting secre-

tary of the Central Party Commission for the South. In 1960 he was elected to the party central committee. Linh's party positions made him a major leader in southern resistance to the U.S.-backed regimes. He was appointed secretary of the Ho Chi Minh City Party Committee after reunification. He was reelected to the party central committee and appointed to the political bureau. Though origi-

nally a northerner, Linh spent much time in the south. He followed a reform policy and showed a willingness to experiment with free-market principles.

Niagara Movement Pioneering organization formed by black Americans whose aim was to fight racial discrimination in the U.S. Led by W. E. B. DU BOIS, it was founded in 1905 and

disbanded in 1910. The group was not particularly influential, but its ideas and programs were adopted by the NATIONAL ASSOCIATION FOR THE ADVANCEMENT OF COLORED PEOPLE (NAACP), an interracial group cofounded by Du Bois in 1909 that supplanted the Niagara Movement.

Nicaragua Largest Central American nation, bordered by EL SALVADOR and

NICARAGUA

- 1911 Nicaragua becomes a U.S. protectorate under the Knox-Castillo Treaty.
- 1934 Gen. Anastasio Somoza García, head of national guard, becomes dictator under National Liberal Party.
- 1956 General Somoza is shot and dies and is succeeded by his son Col. Luis Somoza Debayle.
- 1961 The Sandinista National Liberation Front (FSLN) is formed.
- 1967 General Anastasio Somoza, the younger brother of Luis, is elected president.
- 1972 Earthquake virtually destroys Managua; Somoza's control of foreign aid increases his power.
- 1979 FSLN overthrows Somoza. Daniel Ortega Saavedra is later named as coordinator of the "provisional junta of national reconstruction."
- 1982 Contra attacks begin; financial support for the contras is approved by the U.S. Congress.
- 1984 Ortega is elected president.
- 1990 Ortega is soundly defeated by Violeta Chamorro, the candidate sponsored by the 14-party National Opposition Union.
- 1990 The Chamorro government negotiates an end to hostilities with the contras.
- 1991 An economic stabilization plan announced; Former contras start to rearm.
- 1993 Hostile actions by Sandinistas and contras flare up.
- 1996 The National Assembly places the police under civilian authority. Violeta Chamorro is succeeded by Arnoldo Alemán.
- 1998 Hurricane Mitch kills approximately 4,000.
- 2000 The constitution is amended giving more power to the two largest political parties.
- 2001 Liberal Party candidate Enrique Bolaños Geyer elected president.
- 2002 Daniel Ortega is reelected leader of the opposition Sandinista Party.
- 2003 Nicaragua negotiates a free trade agreement with the U.S. Alemán is convicted of corruption. Vice President Bolaños is made president.
- 2004 World Bank forgives 80 percent of Nicaragua's debt to the organization.
- 2005 Fuel price and cost of living rises trigger weeks of violent protests. The government and an alliance of main opposition parties become embroiled in a power struggle, creating a political crisis, which eases when congress agrees to delay constitutional reforms.
- 2006 Daniel Ortega is elected president, returning to power after 16 years.

HONDURAS to the north, by the Caribbean Sea on the east, by COSTA RICA on the south and the Pacific Ocean to the west. In 1909 a revolution broke out against the harsh presidency of José Santos Zelaya, and with help of the UNITED STATES, drove him from office. In 1912 U.S. Marines landed in Nicaragua to help quell rebellion against President Adolfo Díaz and to protect American investments, thus beginning an almost unbroken U.S. military presence in the country, which would continue until 1933. General Augusto César SANDINO led rebels who were resentful of U.S. intervention. The U.S. helped establish a National Guard, which was led by Anastasio SOMOZA García. After the departure of the U.S. Marines, Somoza had Sandino assassinated and later forced President Juan Sacasa out of office and assumed power. The Somoza family led a repressive and corrupt regime, aided by the U.S., toward whose interests they were friendly. In 1979 the Sandinista National Liberation Front (FSLN), with broad-based popular support, toppled the government of Major General Anastasio SOMOZA DEBAYLE, who fled the country.

The Sandinistas established a junta to run the government. Initially moderate, the junta became increasingly left-leaning. In 1981 President REAGAN, changing that the Sandinistas had communist ties and were supplying arms to EL SALVADOR, revoked U.S. economic aid and set out to overthrow the government of Daniel ORTEGA, the revolutionary leader who became president in 1984. The CIA began covert operations, including mining Nicaraguan harbors, and the U.S. backed the counterrevolutionary CONTRAS, initially with the approval of Congress and later illegally. In 1985 Reagan declared a trade embargo on Nicaragua, further destabilizing the economy. In 1988 the Sandinistas and the contras negotiated a cease-fire, and elections were scheduled for 1990, when Violeta Barrios de CHAMORRO, a former publisher of *La Prensa* and a member of a prominent political family, was elected president. In 1996 Chamorro was succeeded by Arnoldo Alemán (1996–2001). In 2003 Alemán was convicted of embezzlement; Vice President Enrique Bolaños became president. Daniel Ortega was elected president in November 2006.

Nicaraguan Civil War of 1909–12

In 1909 conservatives rebelled against the liberal dictator-president José Santos Zelaya; two U.S. citizens aiding the rebels were executed, causing angry U.S. protests. Zelaya was forced to resign (December 16, 1909), and NICARAGUA was reduced to near anarchy. After a power struggle between conservative and liberal factions, the conservative Adolfo Díaz became provisional president (May 11, 1911), and requested U.S. aid. A treaty, to retire debts through U.S. customs collection and provide loans from New York banks, was rejected by the U.S. Senate. It was, however, enacted by President William Howard TAFT as an executive order. A revolt by Nicaraguan liberals in July 1912 was suppressed with aid from 2,500 U.S. Marines, who supervised elections; Díaz was elected. A U.S. legion guard of 100 remained in Nicaragua for 13 years.

Nicaraguan Civil War of 1925–1933

In 1925 a coalition government was elected; conservative Carlos Solárzano (fl. 1920s) became president, and liberal Juan Bautista Sacasa vice president, allowing U.S. Marines to depart after having been in the country for 13 years. On October 25, 1925, conservatives (General Emiliano Chamorro Vargas and Adolfo Díaz) seized power, ousting liberal Sacasa. Chamorro became president, despite U.S. disapproval, after Solárzano resigned in January 1926. But when liberal rebels under General Augusto Cesar SANDINO seized U.S. property, U.S. forces intervened. Chamorro resigned in October 1926, and Díaz was elected by the Nicaraguan congress, while Sacasa returned to establish a rival liberal government.

The resulting civil war was joined by Sandino when Díaz received the help of 2,000 U.S. Marines. U.S. mediator Henry L. STIMSON induced rival leaders Díaz and liberal general José María Moncada to disarm, while the U.S. supervised elections. Moncada was elected president on November 4, 1928, but Sandino vowed to continue guerrilla warfare until the U.S. Marines departed. When Sacasa was elected president in 1932, he persuaded Sandino to surrender after the marines withdrew (1933), but Sandino was assassinated by national guardsmen in 1934.

Nicholas, Grand Duke (1856–1929) Son of Grand Duke Nicholas and grandson of Czar Nicholas I. An army officer, commissioned in 1872, he introduced major military reforms while serving in the Russo-Turkish War of 1877–78 and as inspector general of the cavalry (1895–1905). In 1905 he was appointed commander of the military district of St. Petersburg and first president of the imperial committee for national defense. He was commander in chief at the beginning of WORLD WAR I and then was sent to the Caucasus as viceroy of NICHOLAS II. He remained there until 1917. He was then reappointed commander in chief by the czar, but Prince Georgy Lvov, head of the provisional government, canceled the appointment. Nicholas then settled in France.

Nicholas II (1868–1918) Last czar of Russia (1894–1917). The eldest son of Alexander III, he assumed the throne in 1894, the same year he married Princess Alix of Hesse (ALEXANDRA FEDOROVNA). Dedicated to maintaining autocratic powers but possessing a limited understanding of the forces at work in his country, Nicholas suppressed all opposition. He refused pleas by moderates for political change in a Russia that was seething with discontent. His aggressive policies in the Far East were met with humiliating defeat in the RUSSO-JAPANESE WAR (1904–05), causing the monarch even greater unpopularity. This, coupled with domestic corruption, resulted in the RUSSIAN REVOLUTION OF 1905. Urged by Count Sergei WITTE, Nicholas agreed to set up a constitutional government and provide an elective DUMA. He soon reneged on his promises (1906), fired Witte and dissolved the Duma. His downfall began with the outbreak of WORLD WAR I. Taking command of the army in 1915, he all but abandoned domestic affairs to the superstitious czarina and her fanatical adviser Gregory RASPUTIN. Severe economic distress, food shortages and war weariness worsened the situation. Strikes and rioting erupted in Petrograd (St. Petersburg) in February 1917, and Nicholas was forced to abdicate in March 1917 (see FEBRUARY REVOLUTION). Exiled first to Siberia and then to the Urals, the czar and his family were executed by the BOLSHEVIKS on July 16, 1918.

Nichols, Mike (Michael Igor Peschowsky) (1931–) American comedian and theatrical and film director. Nichols is one of the leading current-day directors, having achieved triumphs both on the Broadway stage and in Hollywood films. After dropping out of the University of Chicago in the 1950s, Nichols briefly pursued a solo career as a standup comedian in New York City before returning to Chicago to join the renowned *Second City* comedy troupe. There, in 1957, he met fellow comedienne Elaine MAY. They teamed up for the Broadway hit *An Evening with Mike Nichols and Elaine May* (1960). Thereafter, Nichols turned his attention to directing on Broadway, winning Tony Awards for his work on *Barefoot in the Park* (1963) and *The Old Couple* (1965). Other Broadway directorial efforts by Nichols include *The Real Thing* (1984) and a solo show by Whoopi Goldberg (1984). Nichols's films include *The Graduate* (1967), which launched the career of Dustin HOFFMAN; *Catch-22* (1969); *Carnal Knowledge* (1971), which starred Jack NICHOLSON; and *Working Girl* (1988). Nichols received numerous honors in the 1990s, such as his 1994 nomination for the Academy Award for Best Picture for *The Remains of the Day* (1994) and his two Emmy Awards for the Home Box Office (HBO) production, *Wit* (2000). In 2004 he was nominated for a Golden Globe Award for best director for his film, *Closer*. In 2005 he achieved another Broadway success as the producer of *Monty Python's Spamalot*.

Nicholson, Ben (1894–1982) British painter. Nicholson was internationally renowned for his abstract paintings, which were heavily influenced by CUBISM. At the same time, his canvasses reflected the softer tones and representational techniques of the English landscape painting tradition. In the 1930s, Nicholson produced a series of all-white geometric "reliefs" carved out of wood that combined cubist montage techniques with pure abstract shapes. Nicholson, by virtue of both his technical excellence and his eclecticism, has remained a key influence on subsequent generations of British painters.

Nicholson, Jack (1937–) American film actor and director; one of the preeminent actors in HOLLYWOOD,

Jack Nicholson as Frank Chambers in *The Postman Always Rings Twice*, 1981 (PHOTOFEST)

renowned for both the diversity of his roles and the intensity and intelligence that he brings to their portrayal. Raised in New Jersey and California, he took his first job in Hollywood—errand boy at Metro-Goldwyn-Mayer—at age 17. His first screen role came in the Roger CORMAN cheapie *The Cry Baby Killer* (1958). After a decade of B-movie work with Corman and others, Nicholson emerged as a star in the Sixties cult hit *Easy Rider* (1969). Over the following decades, Nicholson consolidated his status as a great actor despite appearing in a fair number of box-office failures. His major successes include *Five Easy Pieces* (1970), *The Last Detail* (1973), *Chinatown* (1974), *One Flew Over the Cuckoo's Nest* (1975), for which he won an ACADEMY AWARD as best actor, *Terms of Endearment* (1983), for which he won a best supporting actor Oscar, *Prizzi's Honor* (1985) and *Batman* (1989). Nicholson also directed *Drive He Said* (1971) and *Goin' South* (1978). *The Two Jakes* (1990), a sequel to *Chinatown* that Nicholson starred in, won mixed reviews. In 1998 Nicholson won another Academy Award for Best Actor for his performance in *As Good As It Gets* (1997).

Nicklaus, Jack William (1940–) U.S. golfer. In 1988 Nicklaus was named "Player of the Century," a title that few would dispute. After winning the U.S. Amateur championship in 1959 and 1961, he turned professional in 1961. He won the U.S. Open in 1962. Five times PGA player of the year, from 1967 to 1976, he was named athlete of the decade for the Seventies.

Golf's all-time money winner, among his 18 international titles are three British Opens, six Australian Opens and six Masters tournaments. Nicklaus has become an active competitor on the PGA Senior Tour, winning the Tradition tournament four times.

Niebuhr, Reinhold (1892–1971)

American theologian, philosopher and social critic. Niebuhr was the foremost American Protestant theologian of the 20th century. He exercised a considerable influence not only in church circles but also in the fields of domestic and foreign governmental policy. Niebuhr earned a degree in divinity from Yale University in 1914 and subsequently spent 13 years as a minister for a Detroit church. During this period, his numerous books and journalistic pieces advocated social activism on the part of the church and a left-wing approach to political issues. From 1928 to 1960, Niebuhr taught at the

Union Theological Seminary in New York and became friends with many of the American political leaders of the era. After WORLD WAR II, Niebuhr became more conservative; during the COLD WAR, he championed an expansion of American power on the grounds of its relative moral superiority to communism. President Jimmy CARTER cited Niebuhr as a major influence on his own thought. Niebuhr's major works include *Moral Man and Immoral Society* (1932) and the two-volume *Nature and Destiny of Man* (1941–43).

Niemoeller, Martin (1892–1984)

German Protestant minister and theologian. After serving as a U-boat commander in WORLD WAR I, Niemoeller became a Lutheran pastor in Berlin. At first sympathetic to Adolf HITLER and National Socialism, he quickly became a leader of the anti-Hitler movement in GERMANY. In 1933 he formed the pastors' Emergency League against Hit-

lerism, a forerunner of the evangelical German Confessing Church. Arrested in 1937, he spent eight years in Nazi CONCENTRATION CAMPS. After his release at the end of the war (1945), he declared that the German people bore collective guilt for the war. He criticized the creation of the NORTH ATLANTIC TREATY ORGANIZATION (NATO) and the rearmament of WEST GERMANY. In 1948 he was one of the founders of the WORLD COUNCIL OF CHURCHES and served as one of its six presidents from 1961 to 1968. A pacifist, Niemoeller actively opposed the VIETNAM WAR and visited HANOI in 1967 to express his opposition to U.S. policies. Several months later he received the USSR's Lenin Peace Prize. In 1971 he was awarded Germany's highest honor, the Grand Cross of Merit.

Niger Country in west-central Africa, landlocked by Libya and Algeria on the north, Benin and Nigeria on the south,

NIGER

1890	French occupy Niger.
1958	Niger becomes an autonomous republic within the French Community.
1960	Niger proclaims its independence as a republic, with Hamani Diori as president.
1973	Drought of unprecedented severity ravages Niger, decimating the national herds and wrecking the economy.
1974	The chief of staff, Lieutenant General Seyni Kountché, seizes power in a bloody coup. Diori is placed under house arrest, the National Assembly is suspended, and all political parties are banned.
1987	Kountche dies and is succeeded by Ali Saibou.
1990	Demonstrators are killed by police. Saibou tries to calm the situation by announcing plans for democratization.
1992	Multiparty elections are held; no clear winner emerges.
1995	The Tuaregs of the Armed Resistance Organization engage in guerrilla activity in the north, seeking autonomy.
1996	A military coup led by Colonel Ibrahim Baré Maïnassara takes control of the government. Maïnassara is elected president in a highly controversial election.
1999	Maïnassara is assassinated by military dissidents. Mamadou Tandja is elected president.
2003	U.S. President George W. Bush claims that Iraq was attempting to buy uranium from Niger, though this report later prove to be false.
2005	Severe drought and a plague of locusts threatens the population with starvation.

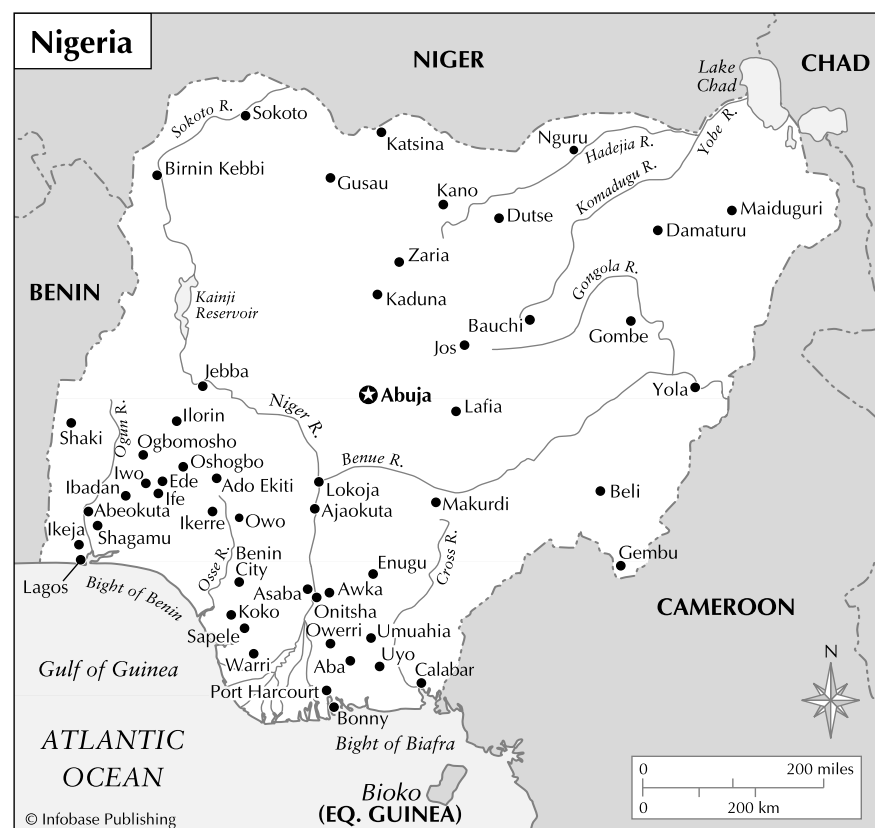

Upper Volta on the southeast, Mali on the west, and Chad on the east. Modern Niger did not become unified politically until late in the 19th century, when FRANCE made it part of its colonial African empire. Previously, the territory had been constantly under siege by warring tribes and rival states who competed for control of the region. Having overcome resistance by the Tuareg Arabs centered around Agadez, the French made Niger a territory in 1900, as part of their holdings in Upper Senegal-Niger.

In 1922 it was made a separate colony of FRENCH WEST AFRICA and remained under colonial rule until the end of WORLD WAR II, after which it was swept up in a great wave of African nationalism. It gained autonomy in 1958, and achieved complete independence under President Hammani DIORI. His leadership endured until the great Sahel drought brought famine and illness to his country from 1968 to 1974. That year, a coup led by Lt. Col. Senyi Kountche toppled the Diori government, and the military took power. Kountche himself survived several coup attempts. After his death in 1987 Army Chief of Staff col. Ali Saibou became president. After several people were killed during protests against austerity measures in 1990, the government was restructured. In 1992 a constitution

was signed, and elections were held in 1994, yet with no clear majority by any party. Several short-lived governments followed, with international mediators

called in 1995 to help settle disputes over the structure of the government. Meanwhile the Tuareg insurgency continued in the northeast of the country, where the government imposed martial law. In 1996 the country experienced yet another military coup when army chief of staff Ibrahim Baré Maïnassara became head of state. In 1999 Mainassara was assassinated by his bodyguards, and a military junta took control of the country. That same year Mamadou Tandja was elected president; he was reelected in the 2004 elections. In 2003 U.S. president George W. BUSH claimed that Iraqi leader Saddam HUSSEIN had attempted to purchase uranium from Niger, a claim that was subsequently demonstrated to be erroneous. In 2005 a food crisis emerged in the wake of drought and a locust plague

Nigeria West African country. The Federal Republic of Nigeria is bordered by Niger and Chad to the north, Cameroon to the east, the Gulf of Guinea to the south and Benin to the west. At the turn of the 20th century, Nigeria consisted of two British protec-

NIGERIA	
1914	British protectorate of Northern Nigeria and British protectorate of Southern Nigeria are joined to form colony of Nigeria.
1960	Independence.
1966	Ibo-led coup overthrows central government and kills regional premiers in the northern and western, non-Ibo regions; Ibo leader General Johnson Aguiyi-Ironsi abolishes federal system, establishes central government with mostly Ibo advisers; northern, Hausa-Fulani, army officers kill Aguiyi-Ironsi and seize government, making army chief of staff Yakuba Gowon head of state.
1967	Gowon divides country into 12 states to dilute power of larger tribes; the eastern Ibo tribal region refuses to be divided and attempts to secede as the independent nation of Biafra; three years of brutal civil war follow.
1985	Major General Ibrahim Babangida comes to power by internal military coup and promises return to civilian rule by 1992.
1989	Babangida overrules registration applications for 50 different political parties and creates a two-party system to dilute regional factionalism as a step toward civilian government.
1990	In advance of talks on reducing Nigeria's huge debt to Western commercial interests, President Babangida calls for reparations from Western countries for slave trade.
1990	Coup attempt fails. Nigeria leads a multinational African peacekeeping force to Liberia.
1991	Nigeria send troops to Sierra Leone, which is fighting rebels from Liberia.
1993	Babangida voids the results of the 1992 elections, which would have placed opposition candidate Moshood Abiola in office. Babangida resigns and his handpicked successor is ousted in a November coup.
1994	The government, led by former defense minister Sani Abacha, continues arresting political opponents.
1998	Abacha dies and is replaced by General Abdulsalami Abubaker.
1999	Military government is replaced as democratically elected president Olusegun Obasanjo is sworn in.
2001	Nigeria, South Africa and Algeria launch the New Partnership for African Development (NEPAD), a plan to revive Africa.
2003	The first legislative elections since the end of military rule: President Obasanjo's People's Democratic Party wins a parliamentary majority; Obasanjo is reelected to a second term; Opposition parties reject the results and international observers say there were serious irregularities in the polling.
2004	UN brokers talks between Nigeria and Cameroon over their disputed border. Religious clashes between Muslims and Christians in central Plateau State.
2005	A national conference to introduce constitutional reform opens in Abuja, opposition boycotts the gathering saying the delegates have too few powers. Paris Club of lenders forgives two-thirds of Nigeria's \$30 billion debt owed to them.

torates: Northern and Southern. The two were joined in 1914 when Nigeria became Britain's largest African colony.

Through the 1920s and '30s many Nigerians sought self-government, and in 1946 the country was divided into

three regions—each with an advisory assembly consisting of Nigerian and British members. In 1954 a new con-

stitution was adopted increasing the powers of the assemblies and making Nigeria a federation. It became a constitutional monarchy within the Commonwealth in 1960, and later an independent republic (1963). Dr. Nnamdi AZIKIWE, formerly governor-general, was its first president; his political rival Abubakar Tafawa Balewa had been prime minister since 1957. In 1966 Tafawa Balewa was assassinated in a military coup led by Ibo officers from the oil-rich eastern region. Major General Johnson Aguiyi-Ironsi took power and attempted to abolish the federal system of government, but he was killed months later in a counter-coup led by Colonel Yakuba GOWON, who assumed command. Following the massacre of thousands of Ibo in northern Nigeria, the military governor of the eastern region, Colonel Chikwuemeka OJUKWU, rejected Gowon's leadership and involved him in a dispute over oil revenues. In 1967 Odumegwu-Ojukwu declared the eastern region a separate Ibo state, BIAFRA, and a bloody civil war broke out. Biafra surrendered three years later.

Extensive reconstruction based on anticipated oil income ran aground, and in 1975, while Gowon was out of the country attending a meeting of the Organization of African Unity, a bloodless coup put Brigadier Murtala Mohammad in to power. He attempted some constitutional reforms and increased the number of states to 19, but he was killed in 1976 during an unsuccessful coup attempt. He was succeeded by General Olusegun OBASANJO, who announced a return to free elections and civilian government. In 1979 Shehu Shagari, leader of the National Party of Nigeria, was elected president, but the falling oil prices of the early 1980s destabilized his government. He was unseated in another bloodless coup and Major General Muhammadu Buhari assumed power. In 1985 Buhari was deposed by yet another nonviolent coup, and Major General Ibrahim Babangida, the army chief of staff, became head of the military government. Babangida quickly thwarted an attempted coup and announced a gradual return to a civilian, democratic government by 1992. Nigeria was ruled by General Sani ABACHA from 1993 until his death in 1998. After an interim government headed by Major-

General Abdulsalami Abubakar, Olusegun Obasanjo won the 1999 national elections and was reelected in 2003. Since 2004 Nigeria has been plagued by religious strife between Christians and Muslims. A group of rich lenders known as the Paris Club forgave Nigeria's foreign debt. That, in addition to record oil prices, allowed Nigeria to be debt-free in 2006.

Nightline Late-night weeknight television news program on the ABC (1980–). In November 1979 during the Iranian hostage crisis, in which personnel stationed at the U.S. embassy in Tehran, Iran, were taken hostage by Islamic fundamentalist followers of the AYATOLLAH KHOMEINI, ABC's news division decided to offer nightly updates of the evolving situation of the Americans in Iran in a program called *America Held Hostage*, anchored by Frank Reynolds. As these late-night broadcasts began to generate a regular audience, ABC News president Rooney Arledge decided to make the improvised program permanent and replaced Reynolds with ABC's diplomatic correspondent Ted KOPPEL. The new program, named *ABC News Nightline* debuted. In addition to covering the standoff between Iran and the U.S., *Nightline* served as an encapsulation of the day's international and national news events, often featuring live interviews with ABC correspondents and dignitaries from around the world through the network's satellite technology. Because of an agreement with the BRITISH BROADCASTING CORPORATION (BBC) to share video recordings of interviews and news segments, *Nightline* regularly aired segments produced by the BBC, thereby amplifying the amount of news media available to its producers. In 1987 the program achieved its highest ratings when Koppel interviewed Christian televangelist Jim Bakker and his wife, Tammy Faye, who at the time were embroiled in sexual and financial scandals relating to his affair with a church secretary and the misuse of funds raised through their television ministry. Koppel retired from *Nightline* in 2005.

Nijinska, Bronislawa (1891–1972) Dancer, choreographer and teacher and sister of Vaslav Nijinsky. She studied at the Imperial Theater School, in St. Pe-

tersburg, and appeared with Nijinsky in the first season of the BALLETS RUSSES. She enjoyed the distinction of being the first woman choreographer and was called "La Nijinska" by DIAGHILEV. The most important ballets in her varied and brilliant career were *Les Noces* (1923), *Les Biches* (1924), *Les Comédiens Jaloux* (1932) and *Pictures from an Exhibition* (1944). Her work as a teacher has been of the greatest significance.

Nijinsky, Vaslav (1890–1950) Ballet dancer and choreographer. Nijinsky trained at the Imperial Ballet School, in St. Petersburg, from 1900. His performance in *Le Pavillon d'Armide* by Fokine in 1907 attracted attention, and from 1909 he was the leading dancer in DIAGHILEV's BALLETS RUSSES in Paris, where he enjoyed enormous popularity, especially in *Le Spectre de la Rose* and *Pétroucha*. Dismissed by Diaghilev, who was angered by Nijinsky's unexpected marriage in 1913, Nijinsky unsuccessfully attempted to form his own company. He continued to perform until 1919, when he suffered a nervous breakdown that permanently ended his career. He spent the remainder of his life in asylums in Switzerland and Britain. His unique powers of dancing earned him the title of *le dieu de la danse*, and he is remembered as one of the greatest male dancers.

Nikisch, Arthur (1855–1922) Hungarian violinist, pianist and conductor. A child prodigy, Nikisch began performing on the violin and the piano at age 8 and entered the Vienna Conservatory at 11. He started to conduct in 1878, later serving as the conductor of the Boston Symphony (1889–93), musical director of the Budapest Opera (1893–95), conductor of the Leipzig Opera (1879–89, 1905–06) and conductor of the Berlin Philharmonic (1895–1922). A frequent guest conductor throughout Europe and the U.S., Nikisch also made many appearances as a piano accompanist of lieder singer Elena Gerhardt. Noted for his superb technique and extraordinary expressive hands, he excelled in interpretations of such German and Austrian masters as Beethoven, Brahms, Schubert and Schumann. In 1913 he made the first complete recording of a symphony (Beethoven's Symphony No. 5).

Nikolayev, Andrian (1929–2004) Soviet cosmonaut. The son of a farmer, Nikolayev attended the Marinsky-Posad Forestry Institute and worked as a lumberjack before being drafted into the Soviet army in 1950. Earning his wings as a pilot, he graduated from the Chernigov Higher Air Force School in 1954. After becoming a cosmonaut in 1960, he set an endurance record, of four days in space aboard *Vostok 3* (August 1962). As commander of the Soyuz 9 mission (June 1970), he set a new record of 18 days in space, along with fellow cosmonaut Vitaly Sevastyanov. Nikolayev, who later married the world's first woman to travel in space, Valentina TERESHKOVA, has written two books, *Meeting in Orbit* (1969) and *Space, A Road without End* (1979).

Niles, John Jacob (1892–1980) American folklorist, folksinger and collector of ballads and carols. His career spanned more than 70 years, from before WORLD WAR I until his death. He composed more than 1,000 ballads and carols and performed throughout the U.S. and Europe. He was credited with contributing to the revival of interest in American folk music.

Nilsson, Birgit (1918–2005) Swedish operatic soprano known for the clarity

and power of her voice and for her brilliant interpretations of the heroines of Richard Wagner. Born on a farm near Malmö, Nilsson studied at Stockholm's Royal Academy of Music, graduating in 1946, the year she made her first operatic appearance. Nilsson sang at the Stockholm Opera from 1947 to 1951, in 1950 undertaking the first of the roles that would make her the most celebrated Wagnerian soprano of her generation. Her first important appearance outside Sweden was at England's GLYNDEBOURNE FESTIVAL in 1951, and she made her debut at the BAYREUTH FESTIVAL in 1954. She was widely acclaimed for her performance as Brunnhilde in Wagner's *Siegfried* at the Florence May Music Festival in 1956 and had a triumphant American debut with the San Francisco Opera as Brunnhilde in *Die Walküre* that same year. Nilsson also became known for her performance of the title role in *Turandot*, a part she first sang at her La Scala debut in 1958. Her first Metropolitan Opera performance was as Isolde in 1959. Nilsson was a guest soloist with many of the world's major opera companies and music festivals.

Nimitz, Chester William (1885–1966) U.S. naval commander. Nimitz graduated from the United States Naval Academy at Annapolis in 1905, and served as chief of staff to the commander of the United States Atlantic submarine force during WORLD WAR I. After the Japanese PEARL HARBOR attack, he was promoted to commander in chief of the Pacific Fleet. He planned the successful battles of Midway and the Coral Sea. The Japanese surrender was signed on his flagship, the USS *MISSOURI*, in Tokyo Bay on September 2, 1945. He was promoted to field admiral. From 1945 to 1947 he was chief of naval operations. After leaving government service he was a consultant on defense matters and edited, with E. B. Potter, *Sea Power, a Naval History* (1960).

Nin, Anais (1903–1977) American author. Nin was born in Paris and became an American citizen in 1914. She later returned to France and was associated with the Villa Seurat group, which included Henry MILLER, when she began writing fiction in the 1930s. She is best known for her many published journals, beginning with *The Diary of Anais Nin, Volume I 1931–1934*

(1966) and ending with the posthumously published Volume VII (1980). Their feminist perspective and search for self-knowledge and freedom caused her to be a much requested lecturer in universities across the U.S. There is much critical dispute about her fiction, although Edmund WILSON was an early champion of it in the U.S. Fictional works include *Winter of Artifice* (1939), *A Spy in the House of Love* (1954) and the erotic short story collection *The Delta of Venus* (1977).

1984 Novel by George ORWELL, written in 1948 and published in 1949. An impassioned warning about the dangers of totalitarianism and dehumanization, it depicts a bleak futuristic society headed by a mysterious and all-knowing dictator called “Big Brother” (believed to be modeled on Josef STALIN). In the world of the book, the state is all-important; all privacy and individual freedom have been abolished and all human activities are directed by the “thought police.” The hero, Winston Smith, is a weak but decent man who yearns for a better existence. He finds brief happiness in a love affair with a young female member of the underground. However, they are discovered and arrested, and Smith is tortured, brainwashed and crushed. The book had an enormous impact on intellectuals around the world, and many of its catchwords—including “Big Brother,” “Newspeak” (the Party's attempt to control thought by manipulating language) and “Doublethink” (the ability to cease to know what the Party has condemned)—became part of the vocabulary of the late 20th century.

Nineteenth Amendment Enacted in 1920, it gave the vote to women in the U.S. Although nonwhites had been given the right to vote by the Fifteenth Amendment (1870), women did not gain that same right until much later. The woman suffrage movement arose in the late 19th century with the goal of universal woman suffrage. Although individual states had earlier allowed women to vote, it was not until 1920 that all states and the federal government were constitutionally required to allow women the vote.

Nirenberg, Marshall Warren (1927–) American biochemist. Niren-

Folksinger and balladeer John Jacob Niles. 1937

COLLECTION, LIBRARY OF CONGRESS, PRINTS AND
PHOTOGRAPHS DIVISION)

berg earned his Ph.D. from the University of Michigan in 1957, after which he began work at the National Institutes of Health in Bethesda, Maryland. Using Severo Ochoa's technique for producing artificial RNA, Nirenberg took a vital step in breaking the "genetic code" when he discovered that a uracil triplet in RNA was the code for the amino acid phenylalanine. For this work, Nirenberg shared the 1968 NOBEL PRIZE in physiology or medicine with Har Gobind Khorana and Robert Holley.

Nisei Term for second-generation Japanese Americans. (See also **internment of JAPANESE AMERICANS**.)

Nishio, Suehiro (1891–1981) Japanese politician, founder of Japan's Democratic Socialist Party (1960). A left-wing activist, he was a labor leader in the early 1920s. In 1938 he was expelled from the Japanese parliament because of his criticisms of the government's militarist policies. After the war he served as a member of the Japan Socialist Party but broke with the party when it opposed the security treaty with the U.S. in 1960.

Nixon, Richard M(ilhous) (1913–1994) Thirty-seventh president of the UNITED STATES (1969–74). Richard Nixon—the only U.S. president to resign from office—is perhaps the most complex and controversial American

political figure of the postwar era. Born into a modest Quaker family in Yorba Linda, California, he developed a reputation as a brilliant debater in high school and was class president. He received a B.A. from Whittier College, graduating second in his class (1934); then earned a law degree from Duke University Law School (1937), where he placed third in his class. He returned to Whittier to start his own practice. At the outset of WORLD WAR II he worked for eight months in the Office of Price Administration (OPA), an experience that left him distrustful of government bureaucracy. From 1942 to 1945 he served as a noncombat navy officer in the South Pacific.

Upon his return he entered REPUBLICAN PARTY politics and in 1946 won election to the House of Representatives from his California district. Nixon gained a national reputation as a strong anticommunist while a member of the HOUSE UN-AMERICAN ACTIVITIES COMMITTEE (HUAC). He was a prominent figure in the HISS-CHAMBERS case (1948–49), accusing State Department official Alger Hiss of having been a communist agent. In 1950 he ran for the Senate against Helen Gahagan DOUGLAS. Portraying Douglas as pro-communist, he defeated her by a 680,000-vote margin. Regarded as a rising star in the Republican Party, Nixon became a national spokesman against the domestic and foreign policies of the TRUMAN administration. After Dwight D. EISENHOWER's presidential nomination, Thomas DEWEY successfully recommended Nixon for the vice presidency. Nixon's youth, his anticommunist reputation and his internationalist outlook were all considered assets. During the fall 1952 campaign, a political fund-raising scandal briefly jeopardized Nixon's fortunes, and some Republicans urged him to step down from the campaign. However, he survived the crisis after making an emotional half-hour appeal on national television—the so-called **Checkers speech**, in which he denied taking any gifts except one, a cocker spaniel named Checkers that had become the family pet. The Checkers speech gave a new boost to Nixon; moreover, it signaled the first significant use of television in national election campaigning. In November the Eisenhower-Nixon ticket won by a landslide.

Nixon was a highly visible vice president. He assumed many of Eisenhower's obligations as leader of the Republican Party and represented the administration in many overseas trips. During a tour of South America in May 1958 he was confronted by left-wing rioters in Lima, Peru, and Caracas, Venezuela. His fortitude and calmness in facing physical danger earned him considerable admiration throughout the Western Hemisphere. Throughout his two terms he advocated a hard-line policy toward communist expansion. In July 1959 Nixon went to Moscow to open the American National Exhibition. The day after his arrival, Nixon and Soviet premier Nikita KHRUSHCHEV engaged in an impromptu debate over the respective merits of capitalism and communism. The discussion took place in the model kitchen of the exhibition and became known as the **kitchen debate**. Many Americans believed that Nixon had bested the Soviet leader.

Nixon was the Republican presidential candidate in 1960, choosing UN ambassador Henry Cabot LODGE as his running mate; their Democratic opponents were Massachusetts senator John F. KENNEDY and Texas senator Lyndon B. JOHNSON. Nixon was better known and hoped to take advantage of his greater experience in national and international affairs. Believing it would be to his advantage, he agreed to debate Kennedy on national television—the first televised presidential debates in history. Four debates were scheduled. However, Nixon failed to come across well in the first debate (September 26, 1960). He appeared haggard—he had recently been ill, and did not wear makeup; Kennedy, by contrast, looked healthy and confident. Television viewers gave Kennedy a clear edge in the debate, while radio listeners believed Nixon had done better. Many people believed that Nixon won the final three debates, but his candidacy had already been damaged. Kennedy's popularity surged, and he defeated Nixon—by only 113,000 votes out of 69 million, the smallest percentage difference in history.

Nixon retired to private life, joining a California law firm and publishing his autobiographical *Six Crises* (1962). Later that year he ran for governor of California but lost to the incumbent, Pat Brown. Following this defeat, Nixon announced his withdrawal from

Richard Nixon, 37th president of the United States
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS
DIVISION)

politics and told reporters “you won’t have Richard Nixon to kick around any more.” He subsequently joined a New York law firm but campaigned for Republican candidates in other elections. Nixon made a triumphant return to politics when he won the 1968 Republican presidential nomination and then defeated Democratic candidate Hubert H. HUMPHREY and third-party candidate George WALLACE. Nixon’s campaign platform called for an honorable end to the VIETNAM WAR and for a return to law and order at home.

His first priority as president was the “Vietnamization” of the war, shifting more responsibility for the ground fighting to the South Vietnamese while stepping up U.S. air bombings of North Vietnam and of Vietcong bases in LAOS and CAMBODIA. From 1969 to 1972 Nixon gradually withdrew 555,000 U.S. soldiers from Vietnam. However, mass protests against the war continued in the U.S. (see ANTIWAR MOVEMENT). Domestically, Nixon instituted “revenue sharing,” a plan whereby the federal government directly transferred revenues to the states and localities. He also dealt with inflation through a multi-phase economic strategy that included wage and price controls. Nixon regarded foreign affairs as his main strength. During his presidency, he pursued a policy of DÉTENTE with the USSR. Nixon’s greatest international triumph was a breakthrough in relations with the People’s Republic of CHINA. His national security advisor, Henry KISSINGER, secretly flew to Beijing in July 1971 to begin negotiations with the Chinese. Nixon himself visited China in Feb. 1972 for an historic meeting with MAO ZEDONG and ZHOU ENLAI that laid the groundwork for formal relations between the two nations. Despite these successes, Nixon was frustrated by his inability to end the Vietnam War. On the eve of the 1972 presidential elections, Kissinger returned from talks with the North Vietnamese in Paris and announced that “peace is at hand.” However, fighting continued until a formal cease-fire was announced on January 23, 1973.

Nixon easily defeated his Democratic rival, George MCGOVERN, and was re-elected in 1972. However, the WATERGATE scandal would cripple Nixon’s administration and force the president

to resign. Nixon and his staff were tied to a June 1972 break-in at the Democratic campaign headquarters in the Watergate apartment complex in Washington. The media and Congress began a highly publicized investigation of the break-in and the White House’s role in a possible coverup. Nixon continued to deny any knowledge of the break-in, despite mounting evidence to the contrary, and his popularity plunged. Facing impeachment and a Senate trial Nixon resigned in disgrace on August 9, 1974. Nixon later acknowledged that he had made mistakes regarding the break-in but continued to deny any wrongdoing.

Nixon has been the subject of much personal and political analysis. His opponents cite what they see as his contempt for the Constitution and the democratic political process. His defenders point to his accomplishments in foreign affairs and claim that he was the victim of political persecution. After a period in relative seclusion, Nixon reemerged as something of an elder statesman. He wrote several volumes of memoirs and political commentary before his death in 1994. (See also Spiro AGNEW.)

NKGB Abbreviation for Norodny Komitet Gosudarstvennoy Bezopasnosti (People’s Commissariat for State Security), which was the Soviet security force from 1943 to 1946. It was mainly concerned with “unreliable elements,” many of whom were deported or sent to corrective labor camps. In 1946 the NKGB was renamed the MGB and, after the death of Stalin, the KGB.

Nkomati Accord An agreement of March 1984 between SOUTH AFRICA and MOZAMBIQUE. South Africa promised not to support the Mozambique’s rebel National Resistance Movement in return for Mozambique’s undertaking not to back the outlawed AFRICAN NATIONAL CONGRESS’s activities in South Africa. By 1986 the agreement had effectively disintegrated with the resistance group Renamo resuming its offensives. In 1992 the signing of a peace accord between Mozambique president Joaquim CHISSANO and Renamo leader Afonso Dhaklama helped revitalize the Nkomati Accord.

Nkomo, Joshua (1917–1999) Zimbabwean nationalist and guerrilla leader. A member of the Kalanga tribe, Nkomo was educated in South Africa. He began as a worker in the Rhodesian Railways and became active in the railroad union. A dedicated nationalist and opponent to white rule of RHODESIA, Nkomo was president of the AFRICAN NATIONAL CONGRESS (ANC) from 1957 to 1959. In exile from 1959 to 1960, he became president of the Zimbabwe African People’s Union (ZAPU) in 1961 and was imprisoned from 1964 to 1974. After failed negotiations with Ian SMITH, Nkomo joined his ZAPU with Robert MUGABE’S ZANU, and the two became joint leaders of the Patriotic Front (PF) in its guerrilla warfare against the Rhodesian government (1976–79). After Zimbabwean independence and ZANU’s victory in the subsequent elections, Nkomo joined Mugabe’s cabinet. He was ousted in 1982 after allegations that he had attempted to lead a coup against the Mugabe regime. In 1987 the two leaders merged ZAPU and ZANU-PF, and the following year Nkomo rejoined Mugabe’s cabinet. Nkomo advanced to vice president of Zimbabwe, a post that he held until his death.

Nkrumah, Kwame (1909–1972) Ghanaian statesman, president (1960–66). Born in what was then the western Gold Coast, he attended Achimota College in Accra, Lincoln University in Pennsylvania and the London School

Ghanaian president Kwame Nkrumah (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

of Economics. A dedicated African nationalist and anticolonialist, he was active in student groups and soon founded (1949) the Convention's People's Party (CPP), which advocated self-government for the colony. Although he was imprisoned by the British from 1950 to 1951, his party won the colony's first general election (1951). Nkrumah then gained his freedom to become a member of parliament (1951) and then prime minister of Gold Coast (1954 to 1957) and of the newly renamed dominion of GHANA (1957 to 1960). When Ghana attained independence as a republic within the British Commonwealth (1960), Nkrumah became its first president. A respected pan-African leader, he opposed direct Western influence on the continent and was a participant (1961) in the Casablanca Conference, which codified African opposition to neocolonialism in the African Charter. He was a supporter of Patrice LUMUMBA in the Congo and an opponent of the government of SOUTH AFRICA. Becoming increasingly dictatorial at home, he quashed dissenters and established a one-party state. This, coupled with economic policies that led to a wild inflationary spiral and financial chaos (1965 to 1966), led to Nkrumah's increased unpopularity and to the military coup that deposed him in 1966. He fled, first to Guinea and then to Romania, where he sought medical treatment in 1972 and died later that year.

NKVD Abbreviation for *Norodny Komitet Vnutrennykh Del* (People's Commissariat of Internal Affairs), which was from 1934 to 1943 the Soviet security service in charge of police and civil registry offices and of the corrective labor camps. It was one of STALIN's main tools during the GREAT PURGE. In 1943 it was divided into two commissariats, the NKVD and the NKGB.

Nobel Prize Established in the will of Alfred Nobel (1833–96), the Swedish chemist who made his fortune in the development of explosives, the yearly Nobel prizes go to individuals who have made outstanding contributions in the fields of physics, chemistry, physiology or medicine, literature and world peace. Nobel had stipulated that the winners in the fields of physics and

chemistry be determined by the Royal Swedish Academy of Sciences; in medicine by the Karolinska Institute in Stockholm; for literature by the Swedish Academy in Stockholm; and for champions of peace by a committee of five elected by the Norwegian Storting (Parliament). He further asked that candidates of all nationalities be considered for the prizes. In 1900 the Nobel Foundation was established to carry out the intent of the will. The first Nobel Prizes were awarded on December 10, 1901. In 1968 the Bank of Sweden made a donation to establish an additional prize in economics. Called the Prize in Economic Sciences in Memory of Alfred Nobel, it was first awarded in 1969 and is presented on the same day as the other awards in a ceremony following their presentation in Oslo. The amount of the prize money has grown over the years, from a relatively small amount in 1901 to \$700,000 in 1990. Apart from the monetary award, the Nobel Prize bestows the highest recognition of intellect and achievement on the recipient and commands worldwide attention and respect. The prize has often been criticized, however, because of the secrecy of the selection committees. In some years, the peace and literature awards have reportedly been influenced by political considerations. By 2003 the Nobel Prize monetary award had risen to over \$1.3 million.

Nobile, Umberto (1885–1978) Italian aviator and aeronautical engineer. General Nobile became the second person to fly over the NORTH POLE when he piloted the dirigible *Norge* over the spot two days after Admiral Richard BYRD made his historic flight (May 9, 1926). Nobile's passengers on this expedition included the Norwegian polar explorer Roald AMUNDSEN and the American explorer Lincoln ELLSWORTH. Two years later, Nobile attempted another such flight in a smaller airship, the *Italia*. However, he crashed in the Arctic. Amundsen quickly organized a rescue attempt, but his plane was lost at sea. Meanwhile, Nobile managed to survive and returned to Italy. The incident caused an international controversy. Nobile was accused of cowardice and recklessness and blamed for the deaths of Amundsen and 17 others, and his military career ended in disgrace. He

spent the 1930s and early 1940s in the U.S. and the USSR. His rank of general was restored in 1945, and he lived to the age of 93.

Noel-Baker, Philip (Philip John Baker) (1889–1982) British diplomat, statesman and pacifist. He was born into a British family from Canada; his parents were Quakers, and his father later became a Liberal member of Parliament (1905). Educated in England and the U.S., he won honors in history (1910) and economics (1912) from King's College, Cambridge, receiving his M.A. in 1913. He was a conscientious objector to WORLD WAR I, but organized and commanded the Friend's Ambulance Corps and won awards for valor while serving in France and Italy. After the war he was an assistant to Robert CECIL at the PARIS PEACE CONFERENCE (1919) and helped draft the covenant of the LEAGUE OF NATIONS. He also worked with Fridtjof NANSEN on behalf of war refugees. In 1926 he published two books, *The League of Nations at Work* and *Disarmament*, which established him as an authority on disarmament. He was elected to Parliament for the LABOUR PARTY in 1929 and became parliamentary private secretary to the foreign secretary, Arthur HENDERSON. Defeated in the general election of 1931, he won another seat in 1936 and held it until his retirement in 1970.

During the 1930s Noel-Baker advocated sanctions against ITALY because of MUSSOLINI's invasion of ETHIOPIA (see ITALO-ETHIOPIAN WAR OF 1935–36). He also joined Winston CHURCHILL in warning of the dangers of NAZISM and militarism in HITLER's Germany. During WORLD WAR II he held posts in Churchill's coalition government. He continued as an influential member of Parliament after the war and helped negotiate the independence of INDIA. He also played an important role in establishing the UNITED NATIONS. He was awarded the 1959 NOBEL PEACE PRIZE for his work in the League of Nations and the United Nations and for his commitment to international disarmament. Not only was Noel-Baker a distinguished statesman, he was also an outstanding athlete, competing in four OLYMPIC GAMES (1912, 1920, 1924, 1928) and winning a silver medal in the 1,500-meter run (1920). He changed his name to Noel-Baker in

1923, adding his wife's family name to his. He was made a life peer as Baron Noel-Baker of Derby in 1977.

No Exit Play (1944) by French author Jean-Paul SARTRE. *No Exit*, written during the German occupation of FRANCE, is a dark portrayal of the limitations of human goodness and the difficulties of collective resistance to evil. The play illustrates the existential outlook of Sartre in the 1940s, as exemplified in more abstract terms in his philosophical magnum opus *BEING AND NOTHINGNESS*. The straightforward plot of *No Exit* concerns a group of randomly chosen persons who find themselves in Hell, which has taken the form of a comfortable room from which exit is impossible. The tortures of Hell are seen to be of these people's own devising, as each in turn seeks futilely to manipulate the others for the sake of selfish personal needs.

Noguchi, Isamu (1904–1988) American sculptor. Born in Los Angeles, he lived in Japan from the age of two to 14. Returning to the U.S., he was a premedical student before studying at New York City art schools and apprenticing with Gutzon BORGLUM. He traveled to Paris on a Guggenheim grant and studied with Constantin BRANCUSI from 1927 to 1929. During the 1940s Noguchi designed a variety of striking sets and costumes for the Martha GRAHAM dance company and developed his sculptural style in various free-standing abstract pieces. He is best known for the sculptures he created from the 1950s on—large abstract works, often in stone, that are designed in conjunction with architecture. Smooth, still and graceful presences, his works are elegant blends of Eastern and Western traditions, many designed for outdoor sculpture gardens and playgrounds. Among his public projects are the Garden of Peace at the UNESCO building, Paris (1956 to 1958), the Billy Rose Art Garden, Jerusalem (1965) and the entrance to the Museum of Modern Art, Tokyo (1969).

Noland, Kenneth (1924–) American painter. Born in Asheville, North Carolina, he studied at Black Mountain College and at the Zadkine School in Paris. Associated with both COLOR-FIELD and HARD-EDGE PAINTING, Noland ex-

perimented with the use of stained colors of equal pictorial value on unprimed canvases. He is particularly noted for his huge images of vividly colored targets and chevrons, painted in the late 1950s and early 1960s. Later works employed large horizontal stripes or plaid designs in a more muted tonal range.

Nolde, Emil (1867–1956) German painter. Born Emile Hansen, he was trained as a furniture craftsman, studied art in Munich, Dachau and Paris and changed his name to Nolde, the town in which he was born. An early exponent of EXPRESSIONISM, he exhibited with DIE BRÜCKE from 1906 to 1907. A solitary and deeply individualistic painter, he soon left the group to pursue his own singular imagery. Nolde is known for expressionistically distorted paintings filled with violent color combinations. He was particularly brilliant in capturing religious images that mingle the demonic with the mystical. Typical of these paintings are *The Last Supper* (1909, Statens Museum, Copenhagen) and *The Prophet* (1912, National Gallery, Washington, D.C.). Nolde also used his expressionist technique to great effect in powerful landscapes, still lifes, figure paintings and portraits. He was also a master of the watercolor and of graphic arts, executing many important etchings, lithographs and woodcuts. Like many other modernists, Nolde was condemned by the Nazis. Forbidden to paint, he retired to his farm and executed a monumental series of watercolors entitled *Unpainted Pictures* (1938 to 1945).

nongovernmental organization (NGO) A national or international organization that represents the concerns of individuals on economic, environmental, military, political, religious and/or social issues, but which is not controlled by any particular government or group of governments. Examples of NGOs include the American Association of Retired Persons (AARP), the environmentalist group Greenpeace and the humanitarian medical organizations International Red Cross/ Red Crescent. NGOs operate by championing particular national and international policies, issues, or developments concerning issues they consider important. They observe the actions of companies,

governments and inter-governmental organizations (IGOs) in order to inform their members and the general public about activities that agree or disagree with interests of the NGOs.

Nono, Luigi (1924–1990) Italian composer. Born in Venice, Nono was a student of Bruno Maderna and learned twelve-tone technique from Hermann SCHERCHEN (see SERIAL MUSIC). Married to the daughter of Arnold SCHOENBERG, whose compositions strongly influenced him, Nono became an important figure in contemporary music during the 1950s. A leader of the Italian Communist Party in Venice, he composed a number of extremely political pieces, such as *Intolerance* (1960) and *A Specter Rises over Europe* (1971). Nono also experimented with taped sounds and electronic music.

Noordung, Hermann Potocnik (1892–1929) Austrian army captain. Writing under the pen name "Hermann Noordung," Captain Potocnik of the Austrian reserve was a graduate engineer. Little else is known about his personal life, but his visionary writings about space, published in 1928, explored the concept of space stations from an engineering perspective in a way no one else had. He envisioned a 164-foot long wheel-shaped craft that would spin on its axis to produce artificial gravity. Noordung inspired many more recent concepts, including Gerard K. O'Neill's wheel-shaped "space colony." The Noordung space station also included a bowl-shaped power station and a cylinder-shaped observatory.

Noriega Morena, Manuel Antonio See PANAMA.

Norman, Jessye (1945–) American opera singer. An impressive interpreter of both soprano and mezzo-soprano roles in the French, German and Italian repertoires, Norman is famous for her rich, powerful voice and precise diction. She made her debut as Elisabeth in Richard Wagner's *Tannhäuser* with the Deutsche Opera in Berlin in 1969. Her New York Metropolitan Opera debut, first as Cassandra then as Dido in Berlioz's *Les Troyens*, was a triumph (1983). Other major roles include Aida and Ariadne in *Ariadne auf Naxos*. In addition, Nor-

man is well known as a *lieder* singer, especially for her interpretations of songs by Wagner and Richard Strauss.

Normandie French ocean liner designed to be the largest, fastest and most beautiful passenger ship in the world. The *Normandie's* maiden voyage in 1935 established a transatlantic speed record but created even more interest through its extraordinary design, both technical and visual, external and internal. The *Normandie* incorporated innovations in turboelectric propulsion machinery and hull design developed by Russian-born architect and engineer Vladimir Yourkevitch. It presented an unusual and striking visual appearance, with streamlined forms for portions of its superstructure and its three giant funnels. It was widely viewed as outstandingly beautiful externally. Internally, the passenger accommodations were a lavish showcase of French ART DECO design of the 1930s. Jean Dupas, René LALIQUE, Emile-Jacques Ruhlmann, Raymond Subes and Louis SUE were among the distinguished artists and designers whose work was represented on the *Normandie*, although many others with lesser-known names also had major roles. Although larger and faster ships were built after the *Normandie*, she captured the imagination of the public in a way that has made her the ultimate example of the ocean liner. Early in 1942 the vessel was at one of New York City's Hudson River piers, being converted into a troopship for World War II duty, when a fire broke out; after burning for several days, the ship capsized when too much water was pumped into the wrong compartments. Years later it was revealed that the fire had been set by Mafia hitman Albert Anastasia in an effort to shake down the U.S. government into appealing for organized crime's aid in keeping Nazi saboteurs out of New York Harbor.

Normandy, invasion of On June 6, 1944, the Allies, directed by supreme Allied commander General Dwight D. EISENHOWER, invaded the European mainland across the English Channel. Thousands of troop ships, amphibious craft and warships transported British, French, American, Canadian and other Allied troops across the stormy English Channel to NORMANDY in northwestern

General Eisenhower talks to American paratroopers before the Allied invasion of Normandy, 1944. (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

France. Before the invasion, the Allied air forces and navies had bombarded strong German fortifications along the French coast. Nonetheless, U.S. forces encountered stiff resistance on Utah and Omaha beaches; to the east, British and Canadian troops fought resolutely for the German-defended port of Caen. The hedgerow terrain of Normandy was fairly easy to defend, and the Germans made the most of it. By the end of July 1944, however, after seven weeks of intense fighting, Allied bridgeheads were established and the invasion had succeeded. The Allied armies were united along the coast. In early August 1944, the U.S. Third Army broke through German lines in the west into Brittany, south to the Loire River, and then east toward Paris. A German attempt to split the American forces failed, and instead a British force driving from the south trapped the German Seventh Army and wiped it out. (See also WORLD WAR II ON THE WESTERN FRONT.)

Norodom Sihanouk (1922–) Prince and later king of CAMBODIA. Son

of the late king Norodom Suramarit and Queen Kossamak Nearireath, Sihanouk has been on-and-off head of the CGDK coalition government of Democratic Kampuchea since it was formed in 1982. He was educated in Saigon and Paris and in 1941 became king. Frustrated at restrictions on the monarchy's power, he abdicated in 1955 and assumed the positions of prime minister and minister of foreign affairs. He was elected head of state after the death of his father in 1960. His conservative government followed a neutralist path throughout the 1960s, seeking to avoid becoming embroiled in the Vietnam conflict. In 1970 Sihanouk was deposed by Marshal LON NOL and took up residence in Beijing, where he formed the FUNC in alliance with the Khmer Rouge. He was restored as head of state when the KHMER ROUGE captured PHNOM PENH in 1975 but resigned a year later and spent four years under house arrest in the capital. In 1982 he became head of the CGDK; known for his volatile personality, he has since resigned several times. Sihanouk's resignation on Janu-

American soldiers land on the Normandy shore, 1944. (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

ary 30, 1988, was interpreted as a ploy to strengthen his position in negotiations with the Phnom Penh government. After the end of the Cambodian civil war in 1991, Sihanouk returned as king with only ceremonial powers. In 2004 he abdicated the throne in favor of his son Norodom Sihamoni.

Norris, George William (1861–1944) U.S. politician. In 1912 Norris began a 30-year career as Republican U.S. senator from Nebraska, and prided himself on his independence from party domination. He supported Franklin D. ROOSEVELT in his four presidential campaigns, and worked tirelessly for the establishment of the TENNESSEE VALLEY AUTHORITY. Norris secured appropriation for a series of dams for conservation and power in the Platte Valley in Nebraska, creating what became known as the “Little TVA.” He led the fight in the Senate for passage of the NORRIS-LAGUARDIA Anti-Injunction Act (1932).

Norris, Kathleen (1878–1966) American novelist. Norris is best known for her more than 80 works of romantic fiction, beginning with *Mother* in 1911, and her numerous short stories originally published in women’s magazines. Norris described her fiction as depicting conventional heroines with simple virtues. Other novels include *Certain People of Importance* (1922), which is considered her best work, and *Family Gathering* (1959). Norris was also a feminist and pacifist dedicated to worldwide disarmament. She spoke at a rally for world peace in Madison Square Garden in 1932.

Norrish, Ronald George Wreyford (1897–1978) British chemist. Norrish was educated at Emmanuel College, Cambridge. His studies were interrupted by WORLD WAR I, in which he served in the Royal Artillery in France. In 1918 he was captured by the Germans and spent a year as a PRISONER OF WAR. He received his undergraduate degree in 1921 and his Ph.D. in 1924. He was later a professor and director of physical chemistry (1937–65) at Cambridge. During WORLD WAR II he headed government research on the suppression of gun flash. From 1949 to 1965 he worked with his former student George Porter on flash photolysis

and kinetic spectroscopy. These methods allowed researchers to observe and investigate very fast chemical reactions for the first time. For this work, Norrish and Porter shared the 1967 NOBEL PRIZE in chemistry with Manfred EIGEN.

Norris-LaGuardia Act Anti-injunction act of 1932 that was a major advance for organized unions in the U.S. During the infancy of the American labor movement, unions were viewed with mistrust—and by the courts as conspiracies and illegal restraints of trade under the Sherman Antitrust Act. Employers could seek an injunction in federal court to ban even peaceful strikes, picketing and boycotts. The anti-injunction act was named after its cosponsors in Congress, Fiorello LA-GUARDIA and George NORRIS. The act restricts federal courts in issuing injunctions against a union that is engaged in a peaceful strike against an employer. It was the first step in establishing organized labor’s right to organize, strike and collectively bargain.

Norstad, General Lauris (1907–1988) American air force officer. A West Point graduate, Norstad was assistant chief of intelligence for the U.S. Army Air Corps during WORLD WAR II. He helped coordinate air support for the Allied landings in North Africa and Sicily; later in the war he helped direct the bombing campaign against Japan, including the dropping of the ATOMIC BOMB ON HIROSHIMA and NAGASAKI. After the war, Norstad helped establish the air force as a separate branch of the U.S. armed forces. Commander of the NORTH ATLANTIC TREATY ORGANIZATION from 1956 to 1963, he headed Allied forces in Europe during the BERLIN crisis of 1961, when East Germany built the BERLIN WALL. As NATO commander, he urged organization members to strengthen conventional forces as a defensive “ground shield” while holding nuclear retaliatory power in reserve. Norstad resigned from the air force in January 1963 over a policy dispute with President John F. KENNEDY.

North African Campaign In North African (1940–43) during WORLD WAR II, the AXIS sought to seize the SUEZ CANAL to control the Mediterranean. Large tank battles occurred along Egyptian and Libyan shores. In Septem-

ber 1940 Italian forces penetrated Egyptian territory but were repulsed and later destroyed. The German Afrika Korps, under General Erwin ROMMEL replaced the Italians in March 1941, forcing the British out of Libya. The British Eighth Army counterattacked in November, driving the Germans westward. In May 1942 Rommel took the offensive, routing the British in the battle of Gazala-Bir Hakim (May 28–June 13, 1942), pushing them 250 miles into Egypt. The British established a defensive line from El Alamein on the coast of the Qattara Depression, which Rommel was unable to breach. On October 23, 1942, the British Eighth Army under General Bernard L. MONTGOMERY attacked, broke through German lines and forced Rommel on a long retreat into Tunisia. The battle of El Alamein was decisive, boosted Allied moral and led to the surrender of Axis forces in North Africa on May 12, 1943.

North American Air Defense Command (NORAD) Coordinator of air defenses of the United States and Canada. NORAD, headquartered deep within Cheyenne Mountain near Colorado Springs, Colorado, controls all American and Canadian air defense forces through a \$65 million combat operations center completed in 1965.

North American Free Trade Agreement (NAFTA) A comprehensive trade agreement among Canada, Mexico and the United States designed to remove all tariffs and other barriers to trade and investment among the three North American countries. Unlike regional organizations, such as the EUROPEAN UNION (EU), NAFTA did not create a supranational political body that could nullify economic policies conducted by each member nation. In 1992 following negotiations among American, Canadian and Mexican trade representatives, the leaders of all three nations signed NAFTA and agreed to seek ratification of the agreement by their national legislatures. Although many Americans, such as Texas billionaire H. Ross Perot, opposed NAFTA on the grounds that it would lead to the closing of American factories and the loss of American jobs to low-wage Mexican workers, the U.S. Senate ratified the agreement in October 1993, and NAFTA went into effect on January 1,

1994. Although NAFTA did not end all barriers to trade among the three nations, such as restrictions on the transportation of certain agricultural goods across international boundaries, it prescribed the gradual elimination of these barriers by 2008.

While the absence of any international authority facilitated NAFTA's rapid acceptance by all three member nations, the resulting economic integration created difficulties in trade and labor matters. In 2001 the U.S. Senate imposed more stringent safety regulations on companies employing Mexican trucking firms to transport goods into the U.S., claiming that many drivers hired by Mexican firms possessed driving skills and qualifications below U.S. standards. Also, as NAFTA did not address the issue of the free exchange of labor among its members, the issue of illegal immigration from Mexico into the U.S., and the U.S.'s continued efforts to prevent this influx has repeatedly generated tensions between the two countries, which has in turn impeded efforts by certain American manufacturing firms to obtain unfettered access to Mexico's consumer market.

North Atlantic Treaty Organization (NATO) Military alliance established under the terms of the North Atlantic Treaty, signed in Washington, D.C., on April 4, 1949, to provide for the mutual defense of member nations—originally, Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the U.K. and the U.S. They were joined by Greece and Turkey in 1952, West Germany in 1955 and Spain in 1982. NATO's principal goal is to develop individual and collective capacity among Atlantic Community nations to resist armed attack and, re-

garding an attack on one as an attack on all, to take whatever action is deemed necessary under Article 51 of the UN Charter. It also aimed at settling disputes by peaceful means and at promoting various kinds of political, social and economic ties among its members. Aimed mainly at protecting Western nations from the Soviet bloc, which came to be represented by the WARSAW PACT, it was the most important Western military organization formed in response to the COLD WAR.

With headquarters in Brussels, Belgium, NATO is run under the auspices of the North Atlantic Council (its policy-making and coordinating body), headed by a secretary general. NATO's military force was formed in 1950 under its first commander, General Dwight D. EISENHOWER; its headquarters, the Supreme Headquarters Allied Powers in Europe (SHAPE), is also located in Brussels. NATO's Military Committee recommends defense actions to the council's military arm, the Defense Planning Committee (DPC). Consisting of military representatives from each member country (except France, which withdrew from the Military Committee in 1966 while remaining a member of the council), the DPC has its headquarters in Washington, D.C. NATO maintains three separate commands: the Atlantic Ocean Command, the European Command and the Channel Command. In addition, North American questions are handled by the Canada-U.S. Regional Planning Group. With the disbanding of NATO's rival organization, the communist WARSAW PACT, in 1991, NATO announced it would halve its forces.

With the end of the cold war and the dissolution of the WARSAW PACT, NATO expanded its membership to include the former Communist states of Poland, Hungary, and the Czech Re-

public. In 2004 Bulgaria, Estonia, Latvia, Lithuania, Romania, Slovakia, and Slovenia were admitted.

Northcliffe, Viscount (Lord Alfred Charles William Harmsworth) (1865–1922) British journalist and newspaper publisher. Born near Dublin, he was raised in London. His journalistic efforts started in boyhood, and by 1880 he had founded *Answers to Correspondents*, a successful weekly magazine featuring information, puzzles and games. In 1894 he and his brother Harold Harmsworth (later Viscount Rothermere), with whom he had collaborated on *Answers*, purchased the London *Evening News*, thus launching his career in newspapers. In 1896 he founded the morning *Daily Mail*, selling it at a halfpenny—half the price of other newspapers—and thus beginning the modern British daily. The *Daily Mirror*, an illustrated tabloid, followed in 1903 and the *Continental Daily Mail* was founded in Paris in 1905. In 1908 he gained control of the failing *Times*, restoring it to journalistic eminence. During WORLD WAR I, he pressed for vigorous leadership in England's conduct of the war, and his support of LLOYD GEORGE in 1916 helped to topple the ASQUITH government. Northcliffe transformed English popular journalism by introducing the blaring headline and the brightly written story and by initiating such features as the gossip column, serial and women's page. In addition, his publicity-seeking led him to finance Arctic exploration, automobile driving and aviation. Through his newspapers, Northcliffe exercised enormous influence on British public opinion and public policy.

Northern Alliance A confederation of MUJAHIDEEN (Islamic fighters) in AFGHANISTAN that regularly fought for control of the country and an offshoot of the United National and Islamic Front for the Salvation of Afghanistan, which ruled the country from 1992 to 1996. Following the withdrawal Soviet military forces from Afghanistan in 1989, the Northern Alliance, which included a diverse ethnic array of Hazaras, Tajiks and Uzbeks, led the opposition to the formerly pro-Soviet regime of Mohammed NAJIBULLAH. In

French, U.S. and British NATO representatives
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

1992 the Northern Alliance toppled Najibullah and took power in Kabul, but it failed to win the support of fervent Islamic militants who advocated ISLAMISM and the rigid application of Islamic law in all aspects of Afghanistan society. Such fundamentalists supported the efforts of the TALIBAN, a political-religious group espousing the cause of Islamism in Afghanistan, to establish an Islamic state. In 1996 the Taliban forced the Alliance to withdraw from Kabul and retreat to the mountainous regions in the northern part of the country (hence the title "northern alliance").

In October 2001, U.S. military forces entered Afghanistan to destroy training camps operated in Taliban-controlled territory by the terrorist organization AL-QAEDA (a mujahideen band allied with the Taliban) to capture al-Qaeda's leader, Osama BIN LADEN, and to overthrow the Taliban regime because of its support of al-Qaeda. Northern Alliance military leaders seized on the opportunity to coordinate operations with U.S. forces and provided American units with translators and guides familiar with the terrain of Afghanistan. Upon the removal of the Taliban from power, officials of the Northern Alliance worked with interim Afghanistan president Hamid KARZAI in an effort to establish a strong unitary government. Several Alliance officials also occupied key posts in the central government that was established in Kabul. However, rivalries and conflicts within the Northern Alliance led to some of its most powerful members to establish control over portions of Afghanistan as their personal fiefdoms and challenge the authority of the national government.

Northern Dancer (1961–1990) Canadian thoroughbred racehorse. Northern Dancer enjoyed an outstanding racing career, posting wins in the Kentucky Derby and the Preakness, and winning 14 of his 18 starts. Northern Dancer's career as an athlete, however, was far overshadowed by his career as one of the greatest sires in thoroughbred history. Three of his colts won the Epsom Derby in England—the most famous being Nijinsky II, who went on to a brilliant career at stud that rivaled that of his sire. A grandson of NATIVE DANCER, Northern Dancer sired 635 offspring who won nearly 500 stakes races—primarily in Europe—by the time of his death at

the age of 29 from colic. Certainly the greatest Canadian-bred horse in history, he was returned to his native land for burial.

Northern Expedition (1926–1928)

To reunify CHINA, Kuomintang (Guomindang) forces under CHIANG KAI-SHEK (Jiang Jieshi) set out northward from their capital, Canton (July 1926). By spring 1927 they controlled all provinces south of the Yangtze River, and Honan north of it. Kuomintang success came in part from having soldiers who were trained not to prey on civilians and in part from propaganda. A widening rift within the movement, however, caused Chiang to resign his command, while dismissing Russian advisers and expelling the communists. Chiang resumed command in the spring of 1928, and the northward push continued. Northern armies were defeated, a sympathetic general captured Beijing, the capital, and China was reunited (June 1928). The capital was then moved south to Nanking (Nanjing).

Northern Ireland A part of the UNITED KINGDOM of Great Britain and Northern Ireland; often called Ulster, it is made up of six of the nine counties of that historic province in northeastern IRELAND: Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone. BELFAST is the capital. In recent years Northern Ireland has been torn by violence between the Protestant majority (wishing to remain a part of the United Kingdom) and the Catholic minority (demanding union with the Republic of Ireland). Thousands of British troops maintain, or attempt to maintain, the public peace, while the Catholics' illegal IRISH REPUBLICAN ARMY (IRA) and the Protestants' Ulster Defence Force both disrupt public order with acts of terrorism.

In the late 19th century proposals were made for Irish self-government via HOME RULE, an early slogan of Irish nationalists. But Northern Ireland feared that this would lead to domination by the island's Catholic majority. Northern Ireland was by then more industrialized than the perennially depressed south and so had more economic ties with England. The threat of civil war simmered for decades, until in 1920 Great Britain enacted the Government of Ireland Act, which gave Home Rule separately to the two

sections and thus officially created Northern Ireland. But the Irish Free State, established in the south in 1922, refused to recognize this partition. Violence began and has continued, off and on, ever since.

In 1968, Bernadette Devlin and others organized a protest movement (modeled on the U.S. CIVIL RIGHTS MOVEMENT) calling for equal rights for Northern Irish Catholics. Protestants responded with violence, and British troops arrived specifically to protect the Catholic minority. However, relations between the British army and the Catholics soon soured. The BLOODY SUNDAY Massacre occurred in January 1972, when British troops killed 13 Catholics demonstrating in Londonderry. This led in March to the suspension of the Protestant-ruled Northern Irish government by the London authorities. A coalition government of Protestants and Catholics was formed in 1973, but it collapsed in May 1974, after a general strike called by Protestant extremists. London once again took direct control. In the late 1970s Mairead CORRIGAN and Betty WILLIAMS attempted to bring about a peaceful solution; they received little more than the 1977 Nobel Peace Prize for their efforts at reconciliation. The 1985 HILLSBOROUGH ACCORD, signed by the U.K. and Ireland, gave the Irish Republic an advisory role in the governing of Northern Ireland. Many viewed the accord as the most promising and constructive step toward peace in Northern Ireland, but extremist unionist leaders (notably Ian PAISLEY) denounced it. In 1998 a joint-governing settlement was reached with Irish Protestant and Catholic political leaders in the Good Friday Accords, brokered in part by British and American officials. However, the government that was created by the accords has been plagued with uncertainties in its leadership (see David TRIMBLE) and British prime minister Tony BLAIR suspended the agreement in October 2002.

North Pole Northernmost end of the Earth's axis, and one of the great conquests of explorers and adventures. American admiral Robert E. PEARY reached it first on April 6, 1909, after a series of unsuccessful attempts in the race to the North Pole. In 1926 Admiral Richard E. BYRD and Floyd BENNETT were the first to reach it by air, and in

1958 the atomic-powered *NAUTILUS* submarine was the first to reach the North Pole underwater. In 1960 another U.S. submarine, the *Skate*, arrived at the surface of the pole following the *Nautilus* route. The first successful foot dogsled expedition crossed over the pole in 1968 and 1969, and in 1971 Italy's Guido Monzino faithfully retraced Peary's footsteps. Naomi Uemura of Japan was the first men ever to reach the North Pole alone by dogsled in 1978, and in 1977 the Soviet icebreaker *Arktika* arrived here, followed in 1979 by a Soviet team on skis. An international expedition led by Will Stegner traveled to the pole in the 1980s.

Northrop, John Howard (1891–1987) American chemist. Between 1930 and 1935, Northrop and several colleagues at the Rockefeller Institute of Medical Research succeeded in isolating a number of enzymes, crystallizing them and revealing their protein nature. These experimental findings confirmed James B. Sumner's 1926 report that the enzyme urease also appeared to be a protein, a theory that had been rejected in favor of the assertion by the influential German chemist Richard Willstätter that enzymes were unlike any known organic compound. Building on Northrop's findings, another Rockefeller Institute colleague, Wendell Stanley, would be the first to isolate a bacterial virus, in 1939. For their preparation of enzymes and virus proteins in pure form, Northrop and Stanley shared the 1946 NOBEL PRIZE in chemistry.

Northrop, John Knudsen (1895–1981) American pioneer aircraft designer, cofounder of the Lockheed Corp. (1927) and founder of the Northrop Corp. (1939). He designed and built the Lockheed Vega (1927), the aircraft used by Amelia EARHART in her historic solo transatlantic flight in 1932. He also designed several important military airplanes. Among these were the A-17 attack plane, early navy dive bombers, the WORLD WAR II P-61 night fighter (known as the Black Widow) and the boomerang-shaped Flying Wing.

North Trial (1989) Trial of Oliver North, a Marine colonel and member of President Ronald REAGAN's National Se-

curity Council who was implicated in the IRAN-CONTRA SCANDAL. The Reagan administration supported a rebel group, dubbed the CONTRAS, who opposed the leftist Sandinista regime in NICARAGUA. When Congress cut off all funding of the contras, individuals in the Reagan administration arranged for the sale of arms to Iran and the diversion of the profits to the contras. At the time the Iranian regime was unpopular because it had seized several hundred U.S. hostages during the fundamentalist revolution that had deposed the shah of IRAN. (See IRAN HOSTAGE CRISIS.)

North was implicated in the arms deal. North became a national celebrity when his secretary revealed that he had shredded numerous incriminating documents during a congressional in-

vestigation of the matter. Although North was convicted on three of 12 criminal counts, two of these were later thrown out. North was viewed by both the jury and a large segment of the public as a scapegoat for high administration officials who may have participated in the arms transfer and subsequent diversion of funds to the contras. North's critics viewed him as a maverick who considered himself above the law; his supporters claimed that North had acted out of patriotism.

Norway Northern European country on the Scandinavian Peninsula, bordered on the north by the Barents Sea, the northeast by Finland and the Soviet Union, the east by Sweden and the west by the Atlantic Ocean. Norway

NORWAY

1901	First Nobel Peace Prize awarded in Christiania.
1905	Norway demands its own foreign service to handle affairs of world's leading merchant fleet; union with Sweden dissolved; Haakon VII is king.
1913	Suffrage for women.
1914	Economic boom as neutral Norway supplies Allies with food and raw materials.
1918	Merchant fleet at half of prewar level due to sinkings by Germany.
1925	Christiania reverts to original name—Oslo.
1928	Prince Olav wins Olympic gold medal in sailing.
1935	Labor government, elected in the face of 25% to 33% unemployment, begins 30-year hold on government; creation of a welfare state.
1940	Germans invade; Haakon VII leads government-in-exile from London; Olav organizes armed resistance.
1945	Vidkun Quisling, leader of puppet government during occupation, is executed; border with USSR created.
1949	Joins NATO but rejects bases and nuclear arms to avoid angering Soviets; Trygve Lie is first secretary-general of UN.
1957	Haakon VII dies; prince crowned Olav V.
1965	Non-socialist coalition assumes control of government.
1970	Norway's second university founded at Bergen.
1972	Voters reject membership in European Economic Community.
1975	North Sea oil and gas fields stimulate economy.
1981	Government-owned computer company implicated in scandal for selling equipment to USSR
1990	Brundtland elected for third time as voters again reject EEC membership.
1991	Kaci five assumes leadership of Conservatives; leaders of three out of four major parties, one-third of Storting (parliament) and one-half of cabinet, are women.
1991	King Olaf V dies; his son succeeds him as King Harald V.
1993	Norwegian government sponsors the Oslo Accords between Israel and the PLO.
1994	Voters again reject membership in the European Union.
1996	Brundtland resigns and is replaced by Thorbjørn Jagland, head of the Labor Party since 1992.
1997	Christian Democratic Party leader Kjell Magne Bondevik becomes prime minister.
2000	Bondevik loses a vote of no confidence in parliament; Jens Stoltenberg of the Labor Party becomes prime minister.
2001	In parliamentary elections, the Labor Party loses more than a third of its seats; Bondevik, leading a center-right coalition, becomes prime minister again.
2003	A proposal to explore for oil and gas in the Barents draws criticism from environmentalists and the fishing industry.
2005	A center-right alliance led by Stoltenberg wins a majority of seats in parliamentary elections.

entered the 20th century under the Swedish Crown, but with its own Storting, or Parliament. In 1905 a peaceable agreement was reached by which Norway would become independent under its own monarch. Prince Carl of DENMARK was elected King Haakon VII, and he ruled until his death in 1957 when he was succeeded by his son, OLAV V. Norway remained neutral during WORLD WAR I and attempted to do so during WORLD WAR II, but it was invaded by Germany in 1940 and occupied until 1945. Norway made its merchant fleet available to the Allies during the war. The experience of the occupation led Norway away from its neutral stance, and it joined NATO in 1949 but refused to allow NATO bases or nuclear weapons on its territory. During the years of the COLD WAR, Norway managed to maintain amicable relations with the USSR without alienating its Western allies. Norway joined the EUROPEAN FREE TRADE ASSOCIATION (EFTA) in 1960 and was accepted into membership of the EUROPEAN COMMUNITY in 1972, but Norwegian voters rejected the referendum. Norway began exploiting North Sea oil fields in the 1970s and has been prosperously producing petroleum and natural gas. In 1993 Norway was responsible for brokering the Oslo Accords between Israel and the **Palestine Liberation Organization** (PLO), which created a timetable for the transfer of authority over the West Bank and Gaza Strip from Israel to the PALESTINIAN AUTHORITY. The following year the country rejected participation in the EUROPEAN UNION (EU) by a margin of 5 percent and has remained out of the union ever since. Since the start of the 21st century the government has been a coalition of several parties, with no clear majority by any one party.

Norway, German invasion of Although Norway had proclaimed its neutrality at the beginning of WORLD WAR II, the Germans invaded on April 9, 1940. Their warships seized control of the major harbors, while the Luftwaffe bombed airfields and radio stations, and troops swiftly occupied the cities—aided by Nazi sympathizers (see Vidkun QUISLING). Norwegians resisted, British submarines sank Nazi warships, a landing force temporarily drove the Germans out of Narvik and

an Anglo-French force aided in fighting Germans around Oslo, Norway's capital. The Germans responded with blitzkrieg tactics. Norway's King Haakon VII (1871–1957) and his cabinet escaped to London, along with many Norwegian ships and Norwegians who later joined the RESISTANCE movement. (See also Lief LARSEN.)

nouveau roman (“new novel”) French literary movement that gained prominence in the 1950s and 1960s. Major writers associates with the Nouveau Roman movement included Michael BUTOR, Alain ROBBE-GRILLET, Nathalie SARRAUTE and Claude SIMON. The major critical text produced by the movement was Robbe-Grillet's *For A New Novel: Essays on Fiction* (1963). Writers in the nouveau roman movement declared that the traditional mainstays of fictional technique—dramatic plotting, moral and psychological analysis of character and elegant style—were out of date and inappropriate for the modern consciousness. Writers, they said, ought not to invent dramatic significance for the events of life but should rather depict them in a matter-of-fact style that reflected their essentially random sequence. Fiction could thus become a means of pointing the reader toward the possibility of freely constructing one's individual life out of the dictates of one's own taste or conscience.

Nouvelle Vague (New Wave) Term for a French film movement inspired by a “new wave” of directors of the late 1950s and early 1960s; now used to characterize any new movement in any national cinema. Given its initial impetus by the film writer for the journal *CAHIERS DU CINÉMA*, the movement generally espoused an admiration for American cinema, a personal style in direction and an informal approach to filmmaking, with a preference for shooting out in the streets or in real houses, often using a hand-held camera. The first important film of the *nouvelle vague* was Claude CHABROL's *Le Beau Serge* (1959). Several critically acclaimed as well as commercially successful new wave films followed, including François TRUFFAUT's *Les quatre cents coups* (*The 400 Blows*, 1959), Alain RESNAIS's *Hiroshima, Mon Amour* (1959) and Jean-Luc GODARD's *À bout de souffle* (*Breathless*, 1960).

Novaes, Guiomar (1896–1979) Brazilian concert pianist. A child prodigy, Novaes gave her first public performance at age eight and later won a scholarship to study in Paris (1909). Her debuts in London (1912) and New York (1915) established her as one of the finest pianists of her generation. She was especially known for her performances of works by Chopin and Schumann. Her final New York appearance was in 1972.

Novaya Zemlya Two USSR islands between the Barents and Kara seas in the Arctic Ocean, north of the Arctic Circle. In the late 1970s these large islands were the site of Soviet thermonuclear testing, and contained scientific stations and other settlements.

Novello, Ivor (David Ivor Davies) (1893–1951) British composer, author and actor. A matinee idol on stage and screen during the 1920s, Novello first gained fame with his 1914 song “Keep the Home Fires Burning” (composed to a poem by Lena Guilbert Ford), which became one of the most popular songs of WORLD WAR I. After that war he appeared in movies and on stage; he turned to writing for the theater in the 1930s and '40s. Among his successful musicals are *Glamorous Night* (1935) and *Perchance to Dream* (1945). In 1955 the Songwriter's Guild for Great Britain initiated the Ivor Novello Awards to honor achievement in popular and light music.

Novotný, Antonín (1904–1975) First secretary, Czechoslovak Communist Party (1953–68) and president of CZECHOSLOVAKIA (1957–68). Novotný joined the Czechoslovak Communist Party shortly after it was formed in 1921. When the communists won key government positions after WORLD WAR II, Novotný organized the communist control of the Czech police. A hard-line Stalinist, he played a key role in crushing opposition to the communist takeover of the government in 1948 (see STALINISM). He took a prominent part in the spy trial and execution of Rudolf SLÁNSKÝ and was made a member of the Politburo. THE SLÁNSKÝ Trial was held in 1952. Novotný was a major ally of Klement GOTTWALD, and after Gottwald's death he became the leader of the Czech communist hardliners and of the party itself. In 1957

he also succeeded the more reform-minded Antonín Zápotocký as president of Czechoslovakia. Thus he held the two top positions in Czechoslovakia until he was deposed during the PRAGUE SPRING (1968) by Alexander DUBČEK and reformers. Novotný failed to regain his prestige even after the SOVIET INVASION OF CZECHOSLOVAKIA ousted the reformers and restored a more orthodox communist regime.

Novy Mir (New world) Monthly literary magazine, first published in January 1925 in Moscow. Many well-known works, such as A. Tolstoy's *Peter the First* (1929–45) and Mikhail SHOLOKHOV's four-volume *The Quiet Don* (1937–40), and numerous sketches by Leonid Leonov, Alexander Tvardovsky, Konstantin Simonov, Konstantin Fedin, Fedor Gladkov and Yury Trifonov have been serialized in *Novy Mir*—as was SOLZHENITSYN'S *One Day in the Life of Ivan Denisovich*.

Noyce, Robert Norton (1927–1990) American inventor. In 1957 he founded the Fairchild Camera and Instruments Corp. in what was to become CALIFORNIA'S Silicon Valley. Two years later, with Jack Kilby, he was awarded a patent for the integrated circuit. In the 1970s and 1980s, the device, also known as the silicon microchip, became the basis for such products as the personal COMPUTER, the pocket calculator and the programmable microwave oven.

Noyes, Alfred (1880–1959) British poet. Noyes firmly resisted MODERNISM, embracing the traditional style in his poetry, which includes *Drake* (1908) and *Tales of the Mermaid Tavern* (1913). Life at sea is a recurring theme in Noyes's work, but in the ambitious *The Torchbearers*, a trilogy appearing between 1922 and 1930, he celebrates men of science. Noyes, who taught at Princeton from 1914 to 1923, also wrote plays, novels and an autobiography, *Two Worlds for Memory* (1953).

nuclear magnetic resonance (NMR) Medical diagnostic technique in which radio waves are passed through a body in an electromagnetic field. First used in 1973 and widely employed since the early 1980s, the test allows researchers to create images of interior organs and to detect and an-

alyze changes in the structure and function of those organs. Since it does not rely on X RAYS, like the CAT SCAN, NMR imaging has been considered a safe procedure for the patient.

Nuclear Non-proliferation Treaty Treaty, signed in 1968 by over 60 nations, that was designed to stop the spread of nuclear weapons. The agreement provided that nuclear-weapons states signing the treaty would act immediately through the United Nations to provide or support immediate assistance to any non-nuclear-weapon signatory of the treaty that came under nuclear attack or threat of nuclear attack. The declared nuclear states that signed the treaty pledged not to help non-nuclear states to develop nuclear weapons, and non-nuclear signatories pledged not to acquire nuclear weapons. In 1994 North Korea agreed to abide by the treaty and cease production of weapons-grade plutonium at its nuclear reactors, provided the U.S. would supply it with oil for its power plants. However, in 2003 North Korean leader KIM JONG IL revealed that he had resumed production of the plutonium and in 2005 announced that his country possessed nuclear weapons. In the meantime, Iran, although a signatory of the treaty, was suspected of conducting a program to develop nuclear weapons in violation of the treaty. Three nations—India, Pakistan and Israel—have declined to sign the treaty. India and Pakistan joined the nuclear club in 1974 and 1998, respectively. Israel is widely suspected of possessing nuclear weapons or at least the capability of producing them on short notice.

Nuclear Test Ban Treaty A U.S., Soviet and British agreement (August 5, 1963) to end nuclear tests in the atmosphere, in space and underwater; concluded after five years of negotiations. Underground testing was permitted to continue. France and China refused to accept the treaty, but over 90 other nations signed in the following two years. The nuclear test ban treaty was the first major international treaty of its kind between the superpowers in the nuclear age.

Nujoma, Sam (1929–) President of Namibia (1990–). Born in 1929 to Namibian farmers in the village of

Etunda in what was then South-West Africa (a former German colony administered by SOUTH AFRICA as a mandate under the League of Nations), Nujoma spent much of his youth herding cattle and cultivating crops for his family. In 1959 Nujoma became involved in the workers movement in the capital city of Windhoek and was elected leader of the Owambo People's Organization (OPO). In 1962 OPO was reorganized as the SOUTH-WEST AFRICA PEOPLE'S ORGANIZATION (SWAPO) to unite all the residents of South-West Africa against continued South African rule. As head of SWAPO Nujoma led the organization in a struggle to terminate South Africa's control of the country and to abolish the practice of APARTHEID there. His high profile in the independence movement made Nujoma a regular target of South African security forces, and prompted him to leave his country throughout much of the 1960s. In 1966 Nujoma arranged for the purchase of weapons from Algeria, which SWAPO used to conduct an insurgent guerrilla campaign against continued South African rule. After 11 years of strife, South African officials finally agreed to meet with Nujoma and representatives from the five permanent members of the UN Security Council in UN sponsored negotiations to end the civil war and bring about South West Africa's independence. In 1978 these negotiations resulted in the passage of UN Security Council Resolution 435, which established a five-stage plan for independence. However, this resolution was not enacted until 1988, when all parties involved in the conflict had implemented a cease-fire. This led to free multiparty democratic elections in late 1989, in which SWAPO candidates won a majority of seats in the national legislature.

In February 1990, following the independence of South-West Africa (which was renamed Namibia), Nujoma became the country's first elected president. He subsequently won reelection to that office in 1994 and 1999. As president of Namibia Nujoma dealt with numerous domestic and international issues in an effort to bring peace, stability and prosperity to his country. In his efforts to reform the distribution of arable farm land, Nujoma arranged the government's confiscation of farmland owned by white residents.

Nujoma has also attempted to educate Namibia's citizens about the threat passed by the transmission of the HIV/AIDS virus. In foreign affairs, Nujoma cooperated with the leaders of UGANDA, MOZAMBIQUE and RWANDA to end the civil war in the Democratic Republic of the CONGO. He retired from the presidency in 2005.

Nuremberg Rallies Series of annual Nazi party meetings held each September from 1933 through 1938 near the Bavarian city of Nuremberg. Organized by Joseph GOEBBELS and other Nazi chiefs, they were highly theatrical PROPAGANDA exercises. Each rally featured athletic events, impressive torchlight processions and inflammatory speeches—and ended with a speech by Adolf HITLER at the Nuremberg stadium designed by Albert SPEER. During the 1935 rally, Hitler announced the so-called **Nuremberg laws**, which deprived JEWS of civic rights, closed professions to them and forbade the marriage of Jews to non-Jews. The German filmmaker Leni RIEFENSTAHL documented the 1934 Nuremberg Rally in her spectacular film *The Triumph of the Will* (1936).

Nuremberg Trials Trials in 1946 of high-ranked Nazi politicians and German military officers following WORLD WAR II. After the Nazi defeat U.S., Soviet, British and provisional French leaders decided to try Nazi leaders for crimes against peace, for planning and waging the war, for war crimes, including needless killing of civilians, the use of slave labor and the destruction of cities, towns and villages, and for crimes against humanity—the deportation and genocide of the Jews and

other groups in Europe. The individual defendants included 24 top Nazis; among them were Hermann GÖRING, Rudolf HESS, Joachim von RIBBENTROP, Albert SPEER, Field Marshal Wilhelm KEITEL and Martin BORMANN, who was tried in absentia. Adolf HITLER, Joseph GOEBBELS and Heinrich HIMMLER were not tried, as they had all committed suicide in the closing days of the war.

The trial judges included Francis Biddle (U.S.), Henri Donnedieu de Vabre (France), General Nikitchenko (USSR) and Lord Justice Lawrence (U.K.). U.S. Supreme Court justice Robert JACKSON was one of the prosecutors. The defendants argued that they were merely following lawful orders. Most but not all of the defendants were found guilty; several, including GÖRING, were sentenced to death. Hess was given life imprisonment and others received lesser terms.

Nureyev, Rudolph (1938–1993) Russian-born dancer, choreographer and ballet director. Internationally acclaimed as the greatest male dancer of the 1960s and early 1970s, Nureyev showed astounding virtuosity and a charismatic stage presence in more than 100 roles in the classical and modern dance repertory. After studying at the Kirov Ballet School in Leningrad, he joined the Kirov Ballet in 1958 and scored a personal triumph during its Paris visit in 1961. He was granted political asylum in 1961 and danced with many companies worldwide. As a guest artist with Britain's ROYAL BALLET (1962 to mid-1970s) he formed a legendary partnership with Margot FONTEYN. He is famous for his interpretation of heroic roles in such ballets as *Petrushka*, *Marguerite and Armand*

and Kenneth MACMILLAN's *Romeo and Juliet*, as well as for creating roles in such modern works as Rudi van DANTZIG's *The Ropes of Time* (1970) and Martha GRAHAM's *Lucifer* (1975). He choreographed and staged many works, including *Nutcracker* (1967) and *Don Quixote* (1966; film version, 1973) and starred in the television film *I Am a Dancer* (1972). He became an Austrian citizen in 1982. In 1983 he became director of the Paris Opera Ballet. He was inducted, as a knight, into the Ordre des Arts et des Lettres, France's most prestigious award for cultural achievement.

Nurmi, Paavo (1897–1973) Finnish athlete. Popularly known as the Flying Finn, Nurmi was one of the greatest track stars of the 20th century. He set 20 world records from 1920 to 1932 and won nine gold and three silver medals in the OLYMPIC GAMES of 1920, '24 and '28. He set records in runs of from 1 to 10 miles and from 1,500 to 20,000 meters. His running career was effectively ended in 1932 when he was barred from the Olympics for accepting expense money and compromising his amateur standing.

Nye, Gerald Prentice (1892–1971) U.S. senator. After a newspaper editing career in Wisconsin and North Dakota, Nye became involved in populist politics. In 1926 he was elected a Republican senator from North Dakota. He served in the U.S. Senate until 1944 where he opposed corruption in politics, monopolies, price-fixing and banking, and worked for farm interests. He generally defended President Franklin D. ROOSEVELT'S NEW DEAL. As the chief spokesman for the Peace Lobby in Congress, his efforts had revealed the profiteering of munitions makers during WORLD WAR I. He was most instrumental in passage of the Neutrality Act of 1935 and in opposing LEND-LEASE.

Nyerere, Julius Kambarage (1922–1999) Tanzanian political leader, president (1964–85). The son of a Butiama chief, he was born at a village on Lake Victoria and attended Makerere University College in Uganda, and Edinburgh University. He taught at various mission schools and founded the Tanganyika African National Union (1954) to promote self-rule. After the party's overwhelming victory in the 1960 election, Nyerere became the colony's chief

The Nuremberg Rallies
(LIBRARY OF CONGRESS,
PRINTS AND PHOTOGRAPHS
DIVISION)

minister and pursued a Christian socialist agenda. When Tanganyika achieved independence in 1961, he became its first prime minister and, after it became a republic the following year, he was elected its first president. Nyerere engineered the union of Tanganyika and Zanzibar into the Republic of TANZANIA

(1964). He won reelection in Tanzania's subsequent presidential elections.

Nyswander, Marl (1919–1986) American psychiatrist. In the 1950s she became one of the first members of her profession to advocate treating drug addiction as a medical problem.

She and Dr. Vincent Dole, whose research group she joined in 1964 and whom she married in 1965, were credited with developing the methadone maintenance method for treating heroin addiction.

Oak Ridge City in Anderson County in the east-central part of Tennessee. Located on a 59,000-acre tract of federal land, it was built to accommodate the WORLD WAR II Atomic Energy Program (the MANHATTAN PROJECT); its personnel reached a wartime high of 70,000. The site was chosen for its seclusion and also because it provided the necessary resources and transportation via the Louisville & Nashville, and Southern Railroads. Government engineers started construction of Oak Ridge (originally named the Clinton Engineer Works) in 1942 and completed it in two-and-a-half years under tight security. In 1944 its plants began to process uranium. By the early 1950s, although activity had been greatly reduced from wartime, Oak Ridge still had processing plants, an atomic energy field office and an atomic laboratory where training and research was carried on. The government began offering its land and homes for private purchase in 1956, and Oak Ridge was incorporated as a city in 1959. Present manufactures include tools, dies, metal fabrication and electroplating. The city is the home of the American Museum of Science and Energy and the Oak Ridge Associated Universities.

O.A.S. (Organisation de l'Armée Secrète) A secret army made up of dissident members of the French army in ALGERIA (1961–62). Led by General Raoul SALAN and supported by French settlers in Algeria, the group launched a terrorist campaign aimed at prevent-

ing DE GAULLE'S Algerian policy, thwarting Algerian independence and, ultimately, bringing down France's Fifth Republic. The O.A.S. engaged in terrorist activities against Algeria's Muslims, and it was unsuccessful in a variety of attempts to assassinate de Gaulle. It ceased to pose a threat after the capture of Salan and other leaders, and the revolt was ended. (See also ALGERIAN WAR OF 1954–62.)

Oates, Joyce Carol (1938–) American novelist. Oates's naturalistic fiction often explores deviance and violence in contemporary American settings. Such works include, *Them* (1969), *Wonderland* (1971) and *Because It Is Bitter and Because It Is My Heart* (1990)—the title of which was taken from a poem by Stephen Crane. An extremely prolific author, Oates has also written several neo-gothic novels, such as *A Bloodsmoor Romance* (1982), and mystery fiction under the pseudonym Rosamond Smith. She has written nonfiction, short stories, and edited the *Ontario Review* with her husband, Raymond J. Smith. Oates continues her prolific publishing activities. Recent titles are: *What I Lived For* (1994), *My Heart Laid Bare* (1998), *Blonde* (2000) and *I'll Take You There* (2002).

Obasanjo, Olusegun (1937–) Officer in the Nigerian army (1958–79), military ruler of Nigeria (1976–79), and president of Nigeria (1999–). Born in Abeokuta in the province of Ogun, Obasanjo was born into the Yoruba ethnic group in Nigeria. After

joining the Nigerian army in 1958, Obasanjo was sent to Great Britain, India and Ghana for advanced military training. He was promoted to the rank of general in 1976 because of his effective service during the Biafran civil war (1967–70) and with the UN peace keeping forces dispatched to the Congo (1960–61). In 1976 following the assassination of General Murtala Muhammad, Obasanjo succeeded him as the ruler of Nigeria. After three years of military rule, Obasanjo oversaw the Nigerian national elections in 1979 that resulted in the election of Shehu Shagari, a civilian from northern Nigeria, as president. Following the transfer of power to civilian control, Obasanjo resigned from the Nigerian army, and returned to Ogun, where he became a poultry and pig farmer. Because of his continued criticism of the Nigerian military junta that had seized power in 1993, Obasanjo was arrested in 1995 on charges of conspiracy to overthrow the government. Although sentenced to life imprisonment, Obasanjo was released in 1998 after the ascension to power of Gen. Abdulsalami Abubakar. In the national elections that were held the following year, Obasanjo won election as the presidential candidate of the People's Democratic Party (PDP), in large part because of his successful efforts (although he was a Christian) to win the support of the Muslim regions in the north of Nigeria.

As president Obasanjo attempted to reduce the violence between Christians and Muslims in Nigeria, to improve the country's infrastructure

Nigerian president Olusegun Obasanjo (NIGERIAN INFORMATION SERVICE)

(particularly in relation to the nation's large oil reserves), to allow greater civil liberties for Nigerian citizens, and to remove authoritarian elements within the ruling elite. The most difficult issue Obasanjo faced was the renewal of tensions between the Muslim north and the Christian south, such as the conflict that broke out when the adoption of *sharia* (Islamic law) by several northern states prompted their Christian residents to flee their homes. In foreign affairs, Obasanjo joined with South African president THABO MBEKI and Algerian president Abdelaziz Bouteflika to create the New Partnership for African Development (NEPAD), a trilateral organization that seeks to promote democratization throughout Africa, to encourage greater economic development, to advance foreign investment in Africa and to reduce barriers to trade. In April 2003, Obasanjo won reelection as Nigerian president with over 60% of the popular vote, although European Union (EU) election observers took note of "serious irregularities" during the voting.

Oberth, Hermann (1894–1989) Hungarian mathematician, rocket theorist and experimenter. Rocket pioneer, Oberth never left as big a mark as his two contemporaries, Konstantin Tsiolkovsky and American Robert Goddard. The son of a physician, he became interested in astronautics while recuperating from wounds suffered while serving in the Austro-Hungarian army during WORLD WAR I. The gov-

ernment wasn't interested in listening to his ideas; and after the war, in 1922, his attempt to obtain his Ph.D. with a dissertation on rocket design was also rejected. Turning to his own greatly limited resources, he published *The Rocket into Interplanetary Space*, partly at his own expense. The book, which also included one of the first detailed discussions of orbiting space stations, was a popular success, and in 1929 he published his major work *The Road to Space Travel*. A theorist rather than a hands-on engineer or inventor, Oberth nevertheless began to build up a following in Germany, and in 1938 he joined the faculty of the Technical University of Vienna and became a German citizen. Although he worked for a while with VON BRAUN and for the Nazis at PEENEMÜNDE, the association was uneasy, as were his later years spent with von Braun in the United States. In 1958, after three years in the U.S., he retired and returned to Germany.

Obote, Milton (1924–2005) Ugandan political leader. Obote was a member of the Uganda National Congress from 1950 to 1962. When UGANDA became independent in 1962, Obote, head of the majority Uganda People's Congress (UPC), became prime minister. He soon suspended the constitution, deposed the president, assumed all executive power himself and used the military to quell opposition. In 1971 military commander Idi AMIN seized control. After a nine-year exile in Tanzania, Obote returned (1980) and, in a disputed election, became president. In 1985 he was deposed by a military coup and exiled to Zambia.

O'Brien, Conor Cruise (1917–) Irish critic, playwright and diplomat. O'Brien's first critical work, *Maria Cross: Imaginative Patterns in a Group of Modern Catholic Writers* (written under the pseudonym Donat O'Donnell, 1952) was much admired by Dag HAMMARSKJÖLD, to whom O'Brien became a special representative. A leading member of the FINE GAEL Party, he also served as IRELAND's representative at the UNITED NATIONS (1955–61) and as minister of posts and telegraphs (1973–77) in the cabinet of Prime Minister Liam Cosgrave. He was also editor of the British Sunday newspaper, the *Observer*. O'Brien has written

widely on politics and the arts. His plays, perhaps best known of which is *Murderous Angels: A Political Tragedy and Comedy in Black and White* (1970), present the world political arena as drama. He addressed issues of international diplomacy in *To Katanga and Back: A UN Case* (1962) and *The United Nations: Sacred Drama* (1968). Among his other varied works are *The Idea of the Modern in Literature and the Arts* (1968), *Literature in Revolution* (1972) and *God Land: Reflections on Religion and Nationalism* (1988). O'Brien remained professionally active throughout the 1990s, releasing *The Great Melody: A Thematic Biography of Edmund Burke* (1993), *On the Eve of the Millennium: The Future of Democracy through an Age of Unreason* (1995), and *The Long Affair: Thomas Jefferson and the French Revolution, 1785–1800* (1996). In 1998 he published his *Memoir: My Life and Themes*.

O'Brien, Edna (1932–) Irish author. Born in the west of Ireland, she attended the Pharmaceutical College in Dublin. After marriage at age 20 and the birth of two sons, she moved to London. *The Country Girls* (1960) is her first novel and the first of a trilogy (completed with) *The Lonely Girls*, 1962, and *Girls in Their Married Bliss*, (1963) that follows the lives of two convent-bred Irish girls, Cathleen Brady and Bridget Brennan, who escape to Dublin and eventually move to London. O'Brien's writing reflects her rejection of the constraints of her Catholic upbringing. Though she is cynical about relations between the sexes, her fiction is exuberantly sensual. Other works include *A Pagan Place* (1971), *Johnny I Hardly Knew You* (1977) and *Tales for the Telling: Irish Folk and Fairy Tales* (1986). O'Brien has also published collections of short stories and has written plays and television scripts. O'Brien remained a prolific writer throughout the 1990s, publishing such fictional works as *Time and Tide* (1992), *House of Splendid Isolation* (1994), *Down by the River* (1997), and a biographical work, *James Joyce* (1999). Her latest books are *Wild December* (2000) and *In the Forest* (2002).

O'Brien, Flann (pen name of Brian Ó Nualláin) (1912–1966) Irish novelist, widely considered one of the

greatest and most original comic writers of the 20th century. Nolan worked for the Irish civil service and wrote a brilliant satirical column in the *Irish Times* for 27 years under the pseudonym Myles na gCopaleen (literally, "Myles of the Little Horses"). His first novel, *At Swim-Two-Birds* (1939), was largely ignored at the time of its publication but has since come to be regarded as a masterpiece. The book shows the influence of James JOYCE, who championed it, and is an innovative pastiche of Irish culture and folklore. *The Third Policeman* (written in 1940 but not published until 1966), in which the central character is dead and in which a policeman's molecules become intermixed with those of his bicycle—so that each takes on some characteristics of the other—is also highly regarded. His other fiction includes *An Beal Bocht* (1941), written in Gaelic and published in English as *The Poor Mouth* (1973); *The Dalkey Archive* (1964); and *The Hard Life* (1962). Few other writers have matched O'Brien's ear for dialogue, his brilliant wordplay, philosophical outlook and sense of the absurd.

O'Brien, Lawrence Francis, Jr. (1917–1990) U.S. political strategist. A Democrat, he directed the successful senatorial and presidential campaigns of John F. KENNEDY. He was Kennedy's liaison to Congress and helped win passage of many of Kennedy's New Frontier programs, such as the CIVIL RIGHTS ACT of 1964 and MEDICARE. He went on to serve as postmaster general (1965–68) and as chairman of the Democratic National Committee (1968–69 and 1970–72). It was his office at the WATERGATE building that was broken into in 1972 by burglars seeking to wiretap his conversations, an event leading to the eventual resignation of President Richard M. NIXON. He left politics to serve as commissioner of the National Basketball Association, overseeing its merger with the American Basketball Association.

O'Casey, Sean (1880–1964) Irish playwright. Born into a lower-middle-class Protestant family, O'Casey described himself as educated in the streets of Dublin. In his early years he held a number of menial jobs, was involved in James Larkin's labor move-

ment and joined the Irish Citizen Army. O'Casey's early dramas realistically portrayed lower-class life in Dublin and the violence that can spring from it; they also explore themes of patriotism. In 1923 his first mature play, *The Shadow of a Gunman*, was staged at the ABBEY THEATRE; it was followed by *Juno and the Paycock* (1924), perhaps his greatest play. *The Plough and the Stars* (1926), set during the EASTER RISING, provoked rioting when it was performed at the Abbey because it portrayed Irish republican revolutionaries as less than noble. He moved to England in 1927. After his antiwar play *The Silver Tassie* (1928) was rejected by W. B. YEATS, O'Casey ended his association with the Abbey. He experimented with EXPRESSIONISM in such later plays as *Within the Gates* (1933) and *The Bishop's Bonfire* (1955). These works were never as well received as his earlier, realistic plays. O'Casey also wrote six acclaimed volumes of autobiography beginning with *I Knock at the Door* (1939); *Sunset and Evening Star* (1954) is the last.

ocean liners The 20th century saw the rise, glory and eventual decline of the great ocean liners. The North Atlantic route between Northern Europe and North America was the most popular and glamorous. But ocean liners also plied other seas and traveled to other destinations. Some ships sailed regularly between Europe and South America, Africa or Australia. For the first part of the century, ocean liners were the only way to travel across oceans. But these ships were not just a means of travel; they were expressions of national pride and prosperity. The industrial nations of Europe vied with one another to build the largest, fastest and most luxurious liners. The British White Star liner *TITANIC* (launched 1912) was to be not only the greatest ship of its time but also the embodiment of a new technological age. When it struck an iceberg and sank on its maiden voyage (April 14–15, 1912) with the loss of some 1,500 lives, it was a stark lesson in the limits of technology. However, the *Titanic* disaster led to new safety regulations and improved designs for ships.

In 1921 new U.S. immigration laws restricted the number of immigrants who could enter the U.S. The new law had a profound effect on the interna-

tional shipping business. Despite their much-publicized luxury, ocean liners had been designed to capitalize on the immigrant trade, carrying huge numbers of European immigrants westward to the U.S. in small, cramped third-class quarters ("steerage"). After the new law came into effect, shipping lines modified their vessels and changed their appeal. Instead of concentrating on transporting immigrants to the U.S., liners began carrying large numbers of well-to-do American tourists to Europe. The 1930s was the heyday of the ocean liner. The two great liners of the day were Cunard's *QUEEN MARY* (launched 1936; 80,774 tons) and CGT's (French Line) *NORMANDIE* (launched 1935; 79,280 tons). Both ships vied for the "Blue Riband," representing the speed record for the fastest voyage across the Atlantic. The *Queen Mary* and the *Normandie* were the first ships able to cross the Atlantic in less than four days.

During WORLD WAR II, many ocean liners (including the *Queen Mary* and her newer sister ship, *Queen Elizabeth* [launched 1940]), were pressed into service as troop ships. Some of these liners survived the war; others were torpedoed or otherwise sunk by the enemy. A few were accidentally destroyed while being converted, either at the beginning of the war or after the war.

Ocean liners remained the primary means of intercontinental travel throughout the 1950s. *Queen Mary*, *Queen Elizabeth* and many smaller ships regularly carried thousands of passengers between Europe and North America, and between these continents and destinations in South America, Africa, Asia and Australia. In 1958, however, transatlantic passenger jet service was introduced, and more and more passengers began to fly rather than take the liners. Regular ocean liner service continued through the 1960s and into the 1970s, and new ships were introduced, but the passenger shipping companies began to feel the pinch of increased competition from the airlines and increased operating costs. By 1990 there was no regular year-round transatlantic passenger ocean liner service. New cruise liners thrived by carrying passengers to the West Indies and other vacation destinations. In the 1990s and until 2004,

the *Queen Elizabeth II* was the lone ship providing frequent transatlantic service. In January 2004 the *Queen Mary II* was launched into transatlantic service to replace Cunard's *Queen Elizabeth II* on that route. The *Queen Mary II* is currently the largest, longest, tallest and widest of the ocean liners.

Ochab, Edward (1906–1989) Polish communist official. He served as party leader for seven months in 1956, a time of intense anti-Soviet feeling. In 1964 he became chairman of the Polish Council of State, the collective presidency of POLAND. He resigned four years later in protest against a communist-led ANTI-SEMITISM campaign that forced some 20,000 Polish Jews to emigrate.

Ochoa, Severo (1905–1993) Spanish-American biochemist. Ochoa was one of the first to demonstrate the role of high-energy phosphates in the storage and release of the body's energy. Of great significance was his isolation of the bacterial enzyme polynucleotide phosphorylase in 1955, while investigating the process of oxidative phosphorylation. He then used this enzyme to catalyze the formation of ribonucleic acid (RNA) from appropriate nucleotides. This procedure was later used in the synthesis of artificial RNA. His pivotal achievement enabled subsequent researchers to decipher the genetic code. In 1959 Ochoa shared the NOBEL PRIZE in physiology or medicine with Arthur Kornberg, who synthesized deoxyribonucleic acid.

O'Connor, Donald (1925–2003) Hollywood actor-dancer. O'Connor was born into a family of circus performers and worked as a child in VAUDEVILLE. He made his film debut at age 11 in *Melody for Two* (1937). Although he made many low-budget musicals during the 1940s, it was a nonmusical role playing opposite a talking mule named Francis that boosted his career and led to a starring role in the classic musical film *Singin' in the Rain* (1952) with Debbie Reynolds and Gene KELLY. During the 1950s O'Connor appeared in the musicals *Call Me Madam* (1953) and *There's No Business Like Show Business* (1954). He also starred in five films and a TV series featuring Francis, the talking

mule. After the 1950s O'Connor made few film and TV appearances.

O'Connor, (Mary) Flannery (1925–1964) American author. After graduating from Georgia College (B.A., 1945), O'Connor went to the University of Iowa Writer's Workshop (M.F.A., 1947). She published her first story, "The Geranium" (1946), and first novel, *Wise Blood* (1953). Despite constant illness, there followed *A Good Man Is Hard to Find and Other Short Stories* (1955), her acclaimed *The Violent Bear It Away* (1959) and other stories, including "Judgment Day" and "Parker's Back." O'Connor's highly polished fiction, often comic and misunderstood, presented characters tortured over the meaning of their lives.

O'Connor, Frank (Michael O'Donovan) (1903–1966) Irish author. O'Connor is perhaps best known for his short stories, which include the collections *Bones of Contention* (1936), *Traveller's Samples* (1951) and *Domestic Relations* (1957), and which present the middle and lower middle classes of IRELAND, often situated in his native County Cork. O'Connor was also a champion of Irish literature and wrote *A Short History of Irish Literature: A Backward Look*, translated many Gaelic works into English and edited the anthology *A Book of Ireland* (1959). Other works include the novel *The Big Fellow* (1937) and the autobiographies *An Only Child* (1961) and *My Father's Son* (1969). In the latter part of his life, O'Connor lived mostly in the U.S. and taught at Harvard and Northwestern universities. His critical works include *The Lonely Voice: A Study of the Short Story* (1962).

O'Connor, Sandra Day (1930–) O'Connor is the first woman to serve on the U.S. Supreme Court. A native of west Texas, she graduated from Stanford University and its law school. Although graduating at the top of her class, O'Connor was rejected by a number of large law firms and first worked as a deputy county attorney in California, and was later in private practice, before becoming an Arizona assistant attorney general. A Republican active in politics, O'Connor was appointed and then elected to the Arizona state senate, eventually rising to the position of majority leader. She was

Supreme Court justice Sandra Day O'Connor
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS
DIVISION)

next elected a local judge and later appointed to the Arizona Court of Appeals. In 1981 O'Connor was a surprise appointment to the Supreme Court by President Ronald REAGAN. On the bench O'Connor was generally a member of the conservative bloc, sometimes voting against legislation favoring women and minorities. She proved a champion of STATES' RIGHTS against the federal government. Throughout the 1990s, however, O'Connor proved part of a swing vote coalition with Justices David Souter and Anthony Kennedy on several cases. In 2005 she retired from her seat on the Court to care for her husband, who suffered from Alzheimer's disease.

October (November) Revolution

After an abortive attempt by the BOLSHEVIKS (a radical Marxist party) to seize power from the Provisional Government in Petrograd, later Leningrad (now Saint Petersburg), in July 1917, Bolshevik leader Vladimir I. LENIN fled to Finland, and Russian socialist Alexander F. KERENSKY succeeded the liberal Prince LVOV as premier (see RUSSIAN REVOLUTION; FEBRUARY REVOLUTION). A reactionary coup attempt failed (see KORNILOV'S REVOLT) but weakened Kerensky's power; support for the Bolsheviks increased as the Russians, exhausted and suffering severe privations from WORLD WAR I, grew suspicious of military and governmental leaders. In

early November 1917 (late October by the Old Style calendar), soviets, or revolutionary councils, throughout RUSSIA voted to form a Soviet government that would end the war and establish citizen-run industries and farms.

Bolshevik leader Leon TROTSKY took over the military revolutionary committee at Petrograd, where the troops voted to obey only the committee's orders. Kerensky demanded rescission of the vote and sent soldiers on November 6, 1917 (October 24, O.S.), to shut down the Bolshevik press in Petrograd. The Bolsheviks, along with sympathetic troops and the workers' Red Guards, marched upon and peacefully took over the government buildings and public utilities. While Kerensky gathered his forces to oust the Bolsheviks, his ministers at the Winter Palace surrendered in the face of Bolshevik armed might. Then Kerensky's troops marched to Gatchina near Petrograd, and there the pro-Kerensky committee of public defense ordered the military-school trainees to arrest the military revolutionary committee and to attack Bolshevik or Soviet-held areas. The Bolsheviks withstood this assault and took charge of the military schools. Trotsky moved to Gatchina, where his troops defeated government forces in two days; Kerensky then fled abroad. Lenin became president of a Council of People's Commissars, the name of the new government, in which Trotsky and Joseph STALIN (1879–1953) were chief commissars. The Bolsheviks soon took Moscow after bloody street fighting, and within a month they controlled the country. In January 1918, Lenin dissolved the freely elected, socialist-dominated national assembly, thereby ending Russia's only attempt at democracy. (See also RUSSIAN CIVIL WAR.)

Octobrists Members of the "Union of October 17," a political party founded in November 1905 with the aim of ensuring the implementation of the promises made in NICHOLAS II's manifesto of 1905, which granted a constitution. The party was led by Alexander Ivanovich GUCHKOV and Michael Vladimirovich RODZYANKO, and the party won 12 seats in the first duma, 32 in the second, 150 in the third and 97 in the fourth. In the third and fourth dumas the Octobrists had an overall majority. They joined the

"progressive bloc" in 1915 and took part in the provisional government of 1917.

Ó Dalaigh, Cearbhall (1911–1978) President of the Republic of IRELAND (1974–76). A noted lawyer, Ó Dalaigh became a judge in 1953, and was chief justice of Ireland's Supreme Court from 1961 to 1973.

Oder-Neisse Line Boundary along the Rivers Oder and Neisse between POLAND and GERMANY; provisionally agreed upon by the U.S., U.K. and USSR at the YALTA and POTSDAM conferences. The new boundary gave Poland a fifth of Germany's 1938 territory and a sixth of its population. WEST GERMANY did not officially recognize the Oder-Neisse line until November 18, 1970, as a part of Chancellor Willy BRANDT's OSTPOLITIK reconciliation policy.

Odets, Clifford (1906–1963) American playwright. Known for his social protest dramas of the 1930s, Odets was born in Philadelphia, became an actor and joined the GROUP THEATER (1931). Turning from acting in plays to writing them, he created the short, working-class drama *Waiting for Lefty* (1935). Immediately acclaimed for his powerful play, Odets followed it with his first full-length drama, *Awake and Sing!* (1935)—a tale of travail and rebellion in an impoverished Jewish family; it is widely considered his best work. His most popular play, *Golden Boy* (1937), tells of a young man who gives up the violin for a more lucrative career in the brutal world of prizefighting. His other plays include *Clash by Night* (1942), *The Big Knife* (1949), *The Country Girl* (1950) and *The Flowering Peach* (1954). Odets spent the latter part of his life as a HOLLYWOOD screenwriter.

O'Donnell, Peadar (1893–1986) Irish author and political activist. He fought for Irish independence with the IRISH REPUBLICAN ARMY and later helped organize the small Irish group that joined the International Brigade to fight in the SPANISH CIVIL WAR. He co-founded *The Bell*, a major literary magazine during WORLD WAR II, with Sean O'FAOLAIN. Early in his career he wrote such acclaimed novels as *Islanders* and *The Knife*, chronicling the lives of Irish

peasants. *The Big Window* (1954) is widely regarded as his finest novel.

Odum, Howard Washington (1884–1954) Sociologist and author. Odum developed regional analysis to reflect the social life of the Southern Negro. At the University of North Carolina (1920) he began pioneer work in social science, founding the departments of public welfare and sociology, establishing the journal *Social Forces* and developing the university's research institute. Under President Herbert HOOVER he prepared the influential report *Recent Social Trends* (1933). Author of many books, including *Rainbow Round My Shoulder* (1928) and *Southern Regions of the United States* (1936), Odum also earned a Master Breeders Award for work with cattle.

Oe, Kenzaburo (1935–) Japanese author and recipient of the 1994 Nobel Prize in literature. Born in the forested regions of the Japanese island of Shikoku, Oe spent much of his childhood hearing the women of his village recite the legends and history of the region. During WORLD WAR II (1939–45), Oe's mother fostered her son's interest in the style and content of literature when she gave him two books: *The Adventures of Huckleberry Finn*, and *The Strange Adventures of Nils Holgersson*. In 1953 Oe enrolled in Tokyo University, where he studied French literature under Professor Kazuo Watanabe, specializing in the symbolism in the works of François Rabelais. Oe also began composing his own fictional narratives, such as the Akutagawa Award-winning short story, *The Catch* (1957), and his first novel, *Bud-Nipping, Lamb Shooting* (1958). In general these works explored the "loss of innocence" among Japanese youths after World War II during the U.S. occupation of Japan. After composing *Hiroshima Notes* (1965), an essay that explored the memories of Japanese victims of the atomic bomb, Oe began to study the history of the island of Okinawa, how it was integrated into Japanese society, how it fared in the U.S. occupation and how its inhabitants remained culturally separate from Japanese society. His experiences in Okinawa led him to write *The Silent City* (1967), in which

he examined the relationship between the culturally different legends of his native village and contemporary Japanese society. In addition to these works on the presence of mythology within Japan, Oe was inspired to write novels that described his experiences with his mentally handicapped son, Hikari, such as *Teach Us to Outgrow Our Madness* (1969), *My Deluged Soul* (1973) and *Rouse Up, O, Young Men of the New Age!* (1983). In 1993 Oe released *Until the 'Savior' Gets Socked*, the first book in *The Flaming Green Tree* trilogy, a series that Oe was inspired to write by the metaphorical poetry of William BUTLER YEATS. In 1994 in recognition of his contribution to the development of literature, Oe was awarded the Nobel Prize in literature.

Oerter, Al (Alfred Adolph) (1936–) American athlete. Oerter won the OLYMPIC gold medal for the discus throw in 1956, 1960, 1964 and 1968. This is an Olympic record—he is the only individual to have won four consecutive titles in the same event. In 1962 he broke the 200-foot barrier by throwing the discus 200 feet 5 inches. He was also national Amateur Athletic Union (AAU) champion six times.

O'Faolain, Sean (1900–1991) Irish novelist and short story writer. O'Faolain was a member of the IRISH REPUBLICAN ARMY and studied at Harvard University prior to the publication of his first collection of short stories, *Midsummer Night Madness and Other Stories* (1932). His fiction affectionately satirizes his Irish characters, and laments the lost cause of Irish nationalism. O'Faolain wrote three novels, *A Nest of Simple Folk* (1934), *Bird Alone* (1936) and *Come Back to Erin* (1940), many biographies, and the nonfiction, *The Irish* (1947). His autobiography, *Vive Moi!* (1964), recounts his experiences in the IRA and contains lyrical descriptions of the Irish countryside. *Collected Stories* was published in 1981.

Office of Strategic Services American intelligence agency during WORLD WAR II; forerunner of the peacetime CIA. On June 13, 1942, President Franklin D. ROOSEVELT replaced the Office of Coordinator of Information with the OSS. William "Wild Bill" DONOVAN

was named head of the new civilian agency, whose mission was to direct intelligence operations and related covert activities. During the war, the OSS proved extremely useful to the Allies. Its activities in North Africa were credited with ensuring the success of the Allied landings there. OSS agents also worked extensively with RESISTANCE groups throughout Europe, fought behind enemy lines and provided Allied planners with a steady stream of invaluable intelligence on enemy troop movements, battle plans and other topics of vital concern. The OSS was disbanded on September 20, 1945; it was succeeded in early 1946 by the Central Intelligence Group, which in July 1947 became the Central Intelligence Agency (CIA).

Ó Fiaich, Cardinal Tomás (1923–1990) Irish religious leader. As Roman Catholic primate of all Ireland since 1977, he headed the Catholic Church both in the Republic of IRELAND and in predominantly Protestant NORTHERN IRELAND. He was an outspoken critic of the IRISH REPUBLICAN ARMY's attempt to end British rule in Northern Ireland and, at times, of Britain's administration there.

O'Flaherty, Liam (1897–1984) Irish author and nationalist. A political influence as well as a literary one, O'Flaherty helped form the Irish Communist Party before writing his first novel, *The Neighbor's Wife* (1923). His fiction often depicts rural life in Ireland and reflects his own political struggles. O'Flaherty's writing generally lacks subtlety. His stories are often overwritten and crudely constructed. Nonetheless, they made a powerful impact. Perhaps his best-known novel is *The Informer* (1925), which was filmed by John FORD in 1935, but critics point to *Famine* (1937) as his most important book. In Ireland he is equally lauded for his short stories, which include *Spring Sowing* (1924) and *Two Lovely Beasts* (1948). He has also written three lively volumes of autobiography, *Two Years* (1930), *I Went to Russia* (1931) and *Shame the Devil* (1934).

Ogaden Region in ETHIOPIA's Harar province, bordering SOMALIA. Claimed by ITALY as a protectorate in 1891, Ogaden was recaptured by Menelik II

in the same year. Coveted by MUSOLINI, he contrived a 1934 dispute at Walwal as a pretext for invading Ethiopia. (See also ITALO-ETHIOPIAN WAR OF 1935–36.) In 1948 Ogaden was restored to Ethiopia and remained the subject of boundary disputes between Somalia and Ethiopia since 1960. After a major Ethiopian offensive with the aid of CUBA and the Soviet Union in 1978, Somali troops were withdrawn, but Ethiopian forces continued to be opposed by the rebels. The territory has remained the scene of various anti-Ethiopian actions by Somali nationalists, prompting some humanitarian organizations, such as MÉDECINS SANS FRONTIÈRES (Doctors Without Borders) to leave the region in 2000.

Ogdon, John (1937–1989) British pianist. A champion of 20th-century and late Romantic-era works, he was praised for his virtuosic technique and his unusual programming. He won the Liszt Prize in BUDAPEST in 1961 and shared first place in the 1962 Tchaikovsky Competition with Vladimir ASHKENAZY. His career was curtailed by acute schizophrenia.

O'Hara, John Henry (1905–1970) American author. O'Hara is best known for his short stories, a great many of which were first published in *The New Yorker* and later published in various collections, including *The Doctor's Son* (1935). O'Hara's tone was tough and sophisticated, and his works were noted for their frank treatment of sexuality. His novels include *Appointment in Samarra* (1934); *Butterfield 8* (1935, filmed 1960); *Pal Joey* (1940), which was adapted into a musical that was filmed in 1957; and *A Rage to Live* (1949). His subsequent works lacked the impact of his early fiction.

O. Henry (William Sydney Porter) (1862–1910) O. Henry was the pen name of the American short story writer William Sydney Porter. Born in Greensboro, North Carolina, he settled in Texas in 1882, working at a number of jobs and becoming the editor of a humor magazine. Accused of embezzling while a teller at an Austin bank, he protested his innocence but fled to Honduras and South America to avoid arrest. Returning in 1897, he was tried

and convicted and served three years in a federal penitentiary. There he began writing and selling his short stories. After his release, he moved to New York City (1902), where he flourished as an author, contributing pieces to many popular magazines. Intricately plotted, his famous stories usually involve everyday people and situations subjected to ironic twists and surprise endings. Often artificial and sentimental, they are nonetheless beautifully drafted, colorful and often deeply felt. Over 700 in number, his stories were collected in such volumes as *Cabbages and Kings* (1904), *The Four Million* (1906), *The Voice of the City* (1908) and *Opinions* (1909).

Ohno, Talichi (1912–1990) Japanese engineer. Ohno developed the just-in-time manufacturing system, which Toyota adopted in the 1950s. The system, in which inventories of parts were kept intentionally low in order to reduce costs and increase flexibility, helped transform the company into the third-largest auto manufacturer in the world. Ohno's system was widely adopted by manufacturers in many other industries around the world.

oil embargo, Arab In October 1973, the Arab oil-producing states imposed an oil embargo against the UNITED STATES because of its support of ISRAEL in the ARAB-ISRAELI WAR OF 1973. LIBYA ordered a complete halt in shipments of crude oil and petroleum products to the U.S. on October 19; SAUDI ARABIA followed suit the following day, and BAHRAIN, Dubai, KUWAIT and QATAR cut off their exports to the U.S. on October 21. U.S. oil companies estimated that by October 26, shipments of oil from the Arab countries had been cut by about 4 million barrels per day, or about 20 percent of the prewar flow. The NETHERLANDS was also targeted by the embargo, and on October 30 imposed a ban on Sunday pleasure driving. Gasoline prices rose significantly in the U.S. The crisis continued into 1974 but was eased as the Arab nations resumed oil shipments. The embargo and its effects showed the danger of U.S. dependence on imported oil and the necessity for conservation. This lesson was reinforced during the energy crisis of 1979 and

again during the PERSIAN GULF WAR (1990–91).

Oistrakh, David (1908–1974) Soviet violinist. A graduate of the Odessa Conservatory (1926), he first won international attention during the 1930s when he won several important competitions and began to make recordings. He began teaching at the Moscow Conservatory in 1934 and from 1937 until his death held the rank of professor. He received the Stalin Prize in 1942. He first performed in the U.S. in 1955 and thereafter appeared frequently there and in Western Europe. Oistrakh was considered not only the finest Soviet violinist of his generation but was also widely regarded as one of the top half-dozen players in the world. He excelled in the violin concertos and sonatas of the great classical and romantic composers and made many recordings.

O. J. Simpson murder trial (*People v. Simpson*) 1995 trial of O(renthal) J(ames) SIMPSON, National Football League legend, for the murders of his ex-wife, Nicole Brown Simpson, and her friend, Ronald Goldman, in June 1994. Beginning on January 24, 1995, the prosecution, led by Marcia Clark and assisted by Christopher Darden, began their efforts to convict Simpson of both murders. In this task they were opposed by the Simpson defense team, which was eventually headed by Johnnie Cochran and included specialists on the legal ramification of evidence drawn from samples of DNA. During the pretrial phase, Simpson's defense team attempted to suppress much of the evidence against him, arguing that the Los Angeles Police Department (LAPD) had attempted to frame Simpson for the two murders. Although the trial judge, Lance Ito, agreed that the LAPD had been reckless in its efforts to obtain a search warrant for Simpson's home, he declared the evidence obtained during the search admissible in the trial. Simpson's defense team then centered its efforts on proving that one of the LAPD's detectives on the case had planted evidence against Simpson because of his racist attitudes toward African Americans, producing witnesses who had heard the detective make anti-African-American state-

ments prior to the two murders. The defense also benefited greatly when, on the witness stand, Simpson proved unable to put on the black gloves he allegedly used when he killed his ex-wife and Goldman, because the gloves themselves fitted his hands too tightly. On October 3, 1995, after nearly 10 months of hearing arguments in the case, the largely African-American jury reached a verdict of not guilty on both counts of murder. The trial was carried live by the major television stations in the United States and became one of the most closely watched trials in American history.

Ojukwu, Chukwuemeka Odumegwu (1933–) President of BIAFRA (1967–70). An army officer who served in the UN peacekeeping force in the Congo in 1962, Ojukwu became military governor of Eastern Nigeria in 1966. The following year he proclaimed the province as the independent Republic of Biafra. He led Biafra's rebellion against federal NIGERIA from 1967 until Biafra's defeat in 1970. He then fled to the Ivory Coast (now CÔTE D'IVOIRE). Ojukwu returned to Nigeria in 1980 after the government pardoned him for his separatist activities. He later founded a political party dedicated to the protection of the predominantly Christian Ibo ethnic group within Nigeria.

O'Keeffe, Georgia (1887–1986) U.S. artist. O'Keeffe was a leading figure in American art for seven decades. Her paintings were noted for their stunning use of color and the subtle eroticism with which she invested such objects as flowers, skyscrapers and animal skulls. Her first major exposure as an artist came in 1916, with a one-woman show mounted by pioneer photographer Alfred STIEGLITZ, whom O'Keeffe married eight years later. He continued to present her work in one-woman shows until his death in 1946. O'Keeffe drew inspiration from New Mexico, which she first visited in 1929 and made her permanent home after her husband's death.

Okinawa Agricultural island in the Ryukyu Islands chain, 350 miles southwest of Kyushu in the north Pacific Ocean. From April 1 to June 21,

1945, U.S. Marines staged a successful amphibious assault to establish air bases here during WORLD WAR II. Close to mainland JAPAN, costly damages were inflicted on U.S. ships by KAMIKAZE air attacks in one of the bloodiest campaigns of the war. In 1972 the U.S. returned Okinawa to Japan but retained several military bases.

Oklahoma! Landmark American musical show by RODGERS and HAMMERSTEIN. It opened at the St. James Theatre on March 31, 1943, and ran for 2,248 performances. It was directed by Rouben MAMOULIAN, choreographed by Agnes DE MILLE, and starred Alfred Drake as Curly. This first collaboration between Rodgers and Hammerstein was not, as has been claimed, the first “serious” musical on Broadway (*Show Boat* achieved that distinction), or the first to feature a ballet (*On Your Toes*, 1936, had the “Slaughter on 10th Avenue” ballet), or the first to achieve literary distinction (*Of Thee I Sing*, 1931, had won a PULITZER PRIZE as a drama); but it was a revolutionary integration of songs, dance and action that signalled, in historian Abe LaFollette’s words, “the change in the whole concept of musical theater.” The source materials were Lynn Riggs’s comedy, *Green Grow the Lilacs* (1931), a folksy play about ranchers and cowboys set in Indian territory (now called Oklahoma) in 1907. When the musical version opened in New Haven it was entitled *Away We Go*. There were predictions of failure: no musical had ever opened so quietly, or had a character killed on stage, or had waited 45 minutes before bringing on the chorus girls, etc. But with some revisions and a new title, *Oklahoma!* (the exclamation point was added during a tryout in Boston), it was a smash on Broadway. Hit songs included “Oh, What a Beautiful Mornin’,” “Surrey with the Fringe on Top,” “People Will Say We’re in Love,” the mournfully satiric “Pore Jud,” and, of course, the title song (which became Oklahoma’s state song in 1953). The motion picture version, starring Gordon McCrae as Curly, was directed in 1955 by Fred Zinneman.

Oklahoma City Bombing 1995 terrorist attack against the Murrah Federal Building in Oklahoma City, Oklahoma. On the morning of April 9, 1995, an enormous explosion occurred in the

on-site parking lot of the Murrah Federal Building, killing 168 men, women, and children. After determining that the explosion was caused by a bomb, the FEDERAL BUREAU OF INVESTIGATION (FBI) centered its investigation on Timothy McVeigh, a discharged sergeant in the U.S. Army, who had been arrested 90 minutes after the explosion for driving without a license plate. On April 21, shortly before he was set to be released from jail, McVeigh was arrested and charged with terrorism, murder and conspiracy to commit murder. Shortly afterward a friend of McVeigh, Terry Nichols, was also arrested and charged by the FBI as an accomplice in the Oklahoma City bombing. In February 1996, a federal judge ruled that McVeigh’s and Nichols’s separate trials would be moved to Denver, Colorado.

On May 29, the jury in McVeigh’s trial began four days in deliberations before finding McVeigh guilty of murder on all counts. Nine days later, the same jury sentenced McVeigh to death by lethal injection. After his appeal was rejected by a federal appellate court, McVeigh announced he would no longer appeal his conviction. On June 11, 2001, he was executed by lethal injection in a federal prison in Terre Haute, Indiana.

Although a jury found Nichols guilty of one count of conspiracy to commit murder and eight counts of involuntary manslaughter on December 24, 1997, a deadlocked jury caused the presiding judge to impose a life sentence on the convicted conspirator.

Olav V (1903–1991) King of NORWAY (1957–91), son of King Haakon VII. Olav was born at the British royal estate in Sandringham, England, and attended the Norwegian Military Academy and Oxford. In 1929 he married Princess Martha of Sweden. When Hitler’s troops invaded Norway in 1940, Crown Prince Olav, the king and parliamentary leaders held out in the Norwegian forests before fleeing to exile in England. He took an active part in the RESISTANCE movement, helping to build and commanding (1944) a free Norwegian army. A national symbol of resistance to Nazi occupation, he aided in the Allied liberation of his country and returned home in triumph in 1945. Olav became regent in 1955 and king in 1957.

He was succeeded by his son, Crown Prince Harald.

Oldenburg, Claes (1929–) American sculptor. Born in Stockholm, he spent his childhood in Chicago, graduated from Yale University (1950) and attended the Chicago Art Institute School (1952–55). In 1956 he settled in N.Y.C. and began to create sculptures of objects from the everyday world in plaster or papier-mâché. A leader of the POP ART movement, Oldenburg is noted for his witty versions of the commonplace in unexpected materials and sizes. He is best known for his soft sculptures, such as *Soft Typewriter* (1963) and *Soft Toilet* (1966), and for his jumbo-sized renditions of common objects, such as the *Lipstick Monument* (1969) at Yale University.

Oldfield, Sir Maurice (1915–1981) British intelligence officer. Oldfield spent four decades in the British intelligence service and worked under Kim PHILBY, the Soviet double agent who betrayed the West’s secrets for 20 years. Known for his reserved manner and dry wit, Oldfield is believed to have been the inspiration for George Smiley in John LE CARRE’s spy novels and also of the spy chief “M” in Ian FLEMING’s James Bond books.

Olduvai Gorge East African ravine 150 miles northwest of TANZANIA’s Mt. Kilimanjaro, where the ancient fossil skull of *Homo habilis*, 1.75 million years old, was discovered by British anthropologist L.S.B. Leakey in 1959. The site of rich fossil beds, discoveries have since been made, and anthropological explorations continue.

Oliver, Joe “King” (1885–1938) Like the best of jazzdom’s first generation of innovators, King Oliver received his first important experiences in various New Orleans brass and dance bands. In 1918, after winning fame as a distinctive Dixieland cornet stylist in his native New Orleans, Oliver moved upriver to Chicago, where he attained even greater success at the helm of King Oliver’s Creole Jazz Band and Dixie Syncopaters. During this productive Chicago period (1920–27), Oliver nurtured the talents of such jazz notables as reedmen Barney Bigard and Albert Nicholas, trombonist Kid ORY, pianist

Lil Harden (Armstrong) and most prominently, fellow cornetist Louis ARMSTRONG, who named Oliver his idol and mentor. Celebrated stints at venues such as the Royal Garden Café and Lincoln Gardens enabled aspiring white musicians to “study” Oliver’s approach firsthand. In 1923 Oliver’s influence was further extended through a series of landmark recordings, the first such series by a black group, regardless of genre. Significant Oliver compositions include “Sugar Foot Stomp” and “West End Blues”; as a cornetist, Oliver’s approach was noted for its wa-wa-effects, mute tricks and clipped, syncopated style.

Olivier, Giorgio Borg (1911–1980) Prime Minister of MALTA (1966–71). He was a dominant figure in Maltese life for more than 30 years. A nationalist, he guided the island to independence from Britain in 1964. Under his government, Malta began a program to change its economy from one based on revenue earned from British military bases to one that relied mostly on manufacturing and tourism.

Olivier, Laurence (1907–1989) British actor, widely considered the most distinguished actor of his generation. Olivier began acting professionally as a teenager and by the 1930s was regarded as one of the foremost classical theater actors of the day, along with John GIELGUD and Ralph RICHARDSON.

British stage and screen actor Laurence Olivier, 1931 (PHOTOFEST)

His appearance in such HOLLYWOOD films as *Wuthering Heights* (1939) and Alfred HITCHCOCK’s *Rebecca* (1940) made him a movie star as well. He also directed and starred in film adaptations of Shakespeare’s *Henry V* (1945), *Hamlet* (1948) and *Richard III* (1956), remarkable for his physical energy and his psychological insight. Returning to the stage, he broke new ground in 1958 by playing the second-rate vaudeville performer Archie Rice in John OSBORNE’s drama *The Entertainer*—a role he re-created on film two years later. As a veteran theater actor-manager, he was the obvious choice to head Britain’s ROYAL NATIONAL THEATRE following its official opening in 1963; he served as artistic director until he was replaced by Sir Peter HALL in 1973. In failing health in his later years, he returned to movie roles and television productions in order to earn money. His later projects included the films *Marathon Man* (1976) and *The Boys from Brazil* (1978), as well as television adaptation of Evelyn WAUGH’s *Brideshead Revisited*. An early marriage (to Jill Esmond) had broken up when he began a widely publicized but scandalous affair with the actress Vivien LEIGH in the late 1930s; the couple married in 1940, but the marriage gradually disintegrated due to Leigh’s advancing mental illness. Olivier later married the actress Joan Plowright. He was knighted in 1947 and elevated to a life peerage in 1970.

Olson, Charles (1910–1970) American poet, essayist and educator. Olson, one of the most influential American poets of the postwar era, was educated at Wesleyan, Yale and Harvard. After working for a time as a government bureaucrat, Olson shifted his energies, in the 1940s, to writing and teaching. He first received literary acclaim for *Call Me Ishmael* (1947), a study of Herman Melville that blended history, geography and economics with more standard forms of literary analysis. As a poetic theorist, Olson was markedly influenced by Ezra POUND. This influence showed in Olson’s essays *Projective Verse* (1950) and *Human Universe* (1951), which called for a spoken, direct language in poetry, with lines to be measured by the natural rhythms of human breathing. Olson was a key founder of the Black Mountain School of poetry, which also included, among others,

Robert CREELEY and Robert DUNCAN. The movement took its name from Black Mountain College in North Carolina, where Olson taught from 1948 to 1956. *The Maximus Poems* (1960) is Olson’s major volume of poetry.

Olympic Games In ancient Greece, the Olympic Games were a celebration of amateur sportsmanship, held from 776 B.C. to A.D. 393. Resumed on an international basis in 1896, the first modern games were held in Athens. A host of events—including archery, equestrian competitions and canoeing—were gradually added to the traditional track and field contests. Women were allowed to compete in the games beginning in 1912, and winter sports were added with the Chamonix games in 1924. Despite the avowed spirit of amateur and individual, not national, competition, the games have always had political overtones. From Nazi objections to the American team’s Jewish and black competitors (particularly Jesse OWENS) in 1936, to the tragedy of Israeli athletes murdered by terrorists in 1972, security—and nationalism—has seemingly increased with each round of games. In the selection process for the 2000 Summer Olympic Games, political considerations, particularly allegation of human rights abuses in China, contributed to the narrow decision to award the games to Sydney, Australia, instead of Beijing, China. In 2004 the Olympic Games returned to Athens, Greece, the birthplace of Olympic competition. (See also MUNCH OLYMPICS MASSACRE.)

Omaha Beach Code name for the west central coastal region of France’s NORMANDY during WORLD WAR II. On D-DAY, June 6, 1944, U.S. troops landed here under intensive air and naval cover, opening a major invasion of Nazi-held Europe. After prolonged and bitter fighting, the Allies eventually gained a foothold on the European continent.

O’Malley, Walter F. (1903–1979) U.S. baseball executive. The colorful O’Malley owned the Brooklyn (and Los Angeles) Dodgers from 1950 until his death, building the team into one of major league baseball’s most successful franchises. During his tenure, the Dodgers won 10 National League pennants and four World Series. However,

the team's New York fans never forgave him for moving the Dodgers from Brooklyn to the West Coast (making it the first major league team in California) in 1958.

Oman (Sultanate of Oman) Oman covers an area of 82,008 square miles on the southeastern coast of the Arabian Peninsula, and includes the islands of Masirah, Kuria Maria, and Daymaruyat plus the tip of the Musandam Peninsula. Though Oman was ostensibly a British protectorate since 1798, power struggles based on the geographical and religious divisions between the coastal region governed by Hindu sultans and the interior ruled by Muslim imams occurred until a 1920 agreement, which ushered in three decades of peaceful coexistence. In the mid-1950s the imam, with support from Saudi Arabia, started a revolt, but was defeated by the British-backed sultan. Sultan Said bin Taimur (ruled 1932–70) was replaced in 1970 during a palace coup by his son, Sultan Qabus, who changed the country's name to the Sultanate of Oman. Rebellion in the

province of Dhofar (1960s–1975) was quelled, resulting in the province being governed as a separate entity. A founding member of the Gulf Cooperation Council (1981), Oman has promoted peace among the Gulf states. In 1997 Sultan Qaboos decreed that women within his country could vote and run for office. Five years later he lowered the voting age to 21.

Omar, Mullah Mohammed (c. 1962–) Leader of the TALIBAN, a political-religious movement that controlled most of AFGHANISTAN from 1996 to 2001. In 1979 Omar joined in the guerrilla campaign of the loosely organized MUJAHIDEEN, or Islamic freedom fighters, to overthrow the pro-Soviet government of Afghanistan and evict the Soviet military forces that kept it in power. It was during this insurgent effort that Omar met and befriended OSAMA BIN LADEN, a young Saudi Islamic militant who had also joined the mujahideen. In 1994 two years after mujahideen factions from the northern part of the country had ousted the Soviet-installed government and taken

power in Kabul, Omar led the Taliban from its base in the southern city of KANDAHAR in an effort to depose the new rules in the capital. After two years of struggle, Taliban forces entered Kabul in 1996, and forced the former rulers to retreat to the northern mountainous regions and regroup as the "NORTHERN ALLIANCE." Omar became the new leader of Afghanistan. Between 1996 and 2001, Omar used his position to ensure a strict application of Islamic law to all aspects of Afghanistan life, such as ending educational opportunities for women, stoning women for adultery, burying homosexuals under brick walls, and amputating thieves' hands. In 2001 Omar also approved the destruction of two ancient and giant carved statues of Buddha in the city of Bamyan, denouncing them as repellant symbols of idolatry.

In the aftermath of the terrorist attacks on SEPTEMBER 11, 2001, when Omar failed to surrender bin Laden (the organizer of the attacks) to U.S. custody, American forces invaded the Taliban-controlled segments of Afghanistan in

OMAN

1951	The Sultanate of Muscat and Oman achieves full independence from Britain. A Treaty of Friendship with Britain is signed.
1955	Imam Ghalib ibn Ali rebels against the sultan of Muscat and Oman, Said bin Taimur.
1956	With the aid of the British-led Muscat and Oman Field Force, the sultan occupies the capital. The imam's brother Talib ibn Ali escapes to Cairo and, with Egyptian and Saudi help, sets up an imamate in exile.
1959	The civil war ends with the complete rout of the rebel imam.
1970	Sultan Said bin Taimur is overthrown in a palace coup led by his son Qabus ibn Said. Tariq ibn Ali is named new prime minister.
1975	The 11-year civil war ends, as the Dhofar insurgents are crushed and their leaders surrender.
1981	Oman becomes a founding member, in addition to six other Middle East states, of the Gulf Cooperation Council.
1997	Law is passed that women can vote and hold political office. Omani elections bring two women to the Consultative Council, an advisory body.
1999	Oman and the United Arab Emirates sign an agreement defining a portion of their common border.
2002	Voting rights are given to all citizens over the age of 21, whereas previously voters were chosen from tribal leaders and businessmen.

October 2001 and toppled Omar's government. U.S. military forces failed to capture Omar or bin Laden, both of whom (it is believed) took refuge among the nomadic communities along the Afghanistan-Pakistan border.

Omega workshops British effort of 1913–21 to re-create in a 20th-century context some of the design-craft philosophy of the arts and crafts movement. Leading spirit Roger FRY drew into it such personalities as Vanessa BELL, Duncan GRANT and Wyndham LEWIS. The workshops produced various items of furniture, pottery, textiles, stained glass and a few complete interiors, but the effort appears to have been handicapped by an amateurish, dilettante level of performance that kept its productions decorative and trivial. Dissension among the participants led to its collapse in the 1920s.

Onassis, Aristotle (1906–1975) Greek shipping magnate. Onassis's early business dealings left him in control of the Allied tanker fleet when WORLD WAR II broke out, thus giving him a golden edge in profits. The closing of the SUEZ CANAL and the SUEZ CRISIS (1956) also proved a bonanza for Onassis, whose fleet of supertankers were most profitable in the longer route around Cape Horn. Onassis gained worldwide attention in 1968 when he married Jacqueline KENNEDY, the widow of President John F. KENNEDY. At the time of his death, Onassis's holdings were valued at \$500 million. He had controlling interest in about 100 interlocking companies in a dozen countries, including 30 shipping concerns. His holdings included hotels, banks, piers, Olympic Airways and real estate—including the island of Scorpios in the Ionian Sea, where he was buried.

Onassis, Jacqueline See **Jacqueline KENNEDY**.

O'Neill, Eugene Gladstone (1888–1953) America's first modern playwright of international stature. Before he began writing in the mid-teens, realism on the American stage was confined to several tentative efforts by such playwrights as James A. Herne, David BELASCO, Clyde FITCH and William Vaughn Moody. Modern European movements in EXPRESSIONISM and Symbolism had yet to make an appearance. With O'Neill, however, they all merged in a unique theatrical aesthetic, which was to become the model for later American playwrights, such as Tennessee WILLIAMS, Arthur MILLER, and Edward ALBEE. O'Neill was born in New York to a theatrical family. His father spent most of his career touring in the lead role of the popular melodrama *The Count of Monte Cristo*. Eugene's early life was restless and dissipated: He prospected for gold in Honduras, worked as a seaman and a journalist and, during a stay in a sanatorium for treatment of tuberculosis began writing his first plays (most of them derivative of the style of melodrama popularized by his father). From 1913 to 1917 he wrote more than 24 plays. Most important in this group were the four short plays collectively entitled *S.S. Glencairn*, produced by the PROVINCETOWN PLAYERS in 1916. With *Beyond the Horizon* (1918) he moved from little theaters in GREENWICH VILLAGE to Broadway and a growing popularity. A remarkably fertile period ensued throughout the decade of the 1920s. *Anna Christie* (1921) won a PULITZER PRIZE. He experimented with Expressionist techniques in *The Emperor Jones* (1920) and *The Hairy Ape* (1921); with the masks and choruses of the Greek Theater in *The Great God Brown* (1928) and *Lazarus Laughed* (1928); and with devices of the stock melodrama, like the aside, in *Strange Interlude* (1928). However, his subsequent work in the 1930s—the trilogy *Mourning Becomes Electra* (1929–31), the nostalgic comedy of *Ah, Wilderness!* (1933), *The Iceman Cometh* (1930) and *Long Day's Journey into Night* (1939)—subsumed experimental techniques, melodrama and realism into a unified vision. Characters and situations were frankly autobiographical, drawing extensively from O'Neill's own family. The

themes of displaced persons, dysfunctional families, dreams as mechanisms for coping with sordid life and alienation from history predominated. He called his method supernaturalism, by which he meant going beyond realism by using symbolism in a realistic way. (He detested what he called the photographic plays of his contemporaries.) Thus, for example, the character of Yank in *The Hairy Ape* is both a man and a representation of mankind; the site of Harry Hope's saloon in *The Iceman Cometh* becomes, in Act 2, an evocation of The Last Supper; and so forth. After a failed production of *A Moon for the Misbegotten* (1943), O'Neill wrote no new plays. He died in 1953 of a lifelong nervous disorder, which brought about a loss of motor control.

O'Neill, Terence Marne (Baron O'Neill of the Maine) (1914–1990) Irish politician. From 1963 to 1969, he served as prime minister of NORTHERN IRELAND. While in office, he worked to improve relations between the Roman Catholic minority and the Protestant majority. He offered important concessions to Catholics, including the establishment of an ombudsman to oversee the fairness of government policies. In 1965 he became the first prime minister of Northern Ireland to meet with a prime minister of the Republic of IRELAND. Their efforts were criticized both by Catholics and his own Unionist Party. He was forced to resign in 1969, and was made a life peer in 1970.

Onizuka, Ellison (1946–1986) U.S. astronaut, one of seven killed in the explosion of the SPACE SHUTTLE *CHALLENGER* on January 28, 1986. The Hawaiian-born aerospace engineer became the first Asian American in space when he flew on a shuttle mission in 1985.

Oparin, Alexander Ivanovich (1894–1976) Soviet biochemist. Oparin studied plant physiology at the Moscow State University, where he later served as professor. He helped found the Bakh Institute of Biochemistry, which the Soviet government established in 1935. Oparin became director of the institute in 1946. As early as 1922, Oparin was speculating on how life first originated; he made the then controversial suggestion that the first

organisms must have been heliotropic—that is, they could not make their own food from inorganic materials but relied upon organic substances. This questioned the prevailing view that life originated with autotrophic organisms that (like present-day plants) could synthesize their food from simple inorganic materials. Oparin's view gradually gained acceptance in many circles. Oparin did much to stimulate research on the origin of life and organized the first international meeting to discuss the problem in Moscow in 1957.

op art (abbreviation for optical art)

Op art was a movement and a style that developed in Europe and the U.S. during the 1960s. Its guiding principle was the exploitation of various phenomena of visual perception in color or black and white. Op art images appear to vibrate with violently contrasting but tonally similar color, move backward and forward from the picture plane in geometric constructs, pulsate in concentric circles or shimmer with moiré patterns. Much op art attempted to re-create the effect of psychodelic trips. Artists who were active in the movement include Victor de Vasarely, Richard Anusiewicz and Bridget Riley.

OPEC See ORGANIZATION OF PETROLEUM EXPORTING COUNTRIES.

Open University An experimental university for adults opened in January of 1971 and located in Milton Keynes, Buckinghamshire, England. Its goal was to provide access to higher education to a broad range of people; there were no academic prerequisites for admission. To extend its reach, courses were conducted by correspondence, supplemented by television, and by seminars and study groups held at various locations across the country.

Operation Barbarossa See BARBAROSSA.

Operation Bootstrap See Luis MUÑOZ MARIN.

Operation Coronet See OPERATION OLYMPIC.

Operation Desert Shield See PERSIAN GULF WAR; H. Norman SCHWARZKOPE.

Operation Desert Storm See Saddam HUSSEIN; PERSIAN GULF WAR; H. Norman SCHWARZKOPE.

Operation Dynamo See Sir John FISHER.

Operation Mincemeat See Ewen MONTAGU.

Operation Olympic Code name for a planned U.S. invasion of JAPAN (at the island of Kyushu) in WORLD WAR II. Operation Olympic was scheduled for November 1945; a second invasion near Tokyo (**Operation Coronet**) on the island of Honshu was planned for March 1946. It was widely reported that U.S. analysts had estimated that perhaps 1 million American lives would be lost in the invasions. Japan's surrender on September 2, 1945, following the destruction of HIROSHIMA (August 6) and NAGASAKI (August 9), made the invasions unnecessary. Later historical research revealed that no U.S. Army estimate ever suggested that 1 million American casualties would result. Instead figures have ranged from 100,000 to 500,000 estimated casualties.

Operation Overlord Code name for the Allied invasion of NORMANDY (June 6, 1944) in WORLD WAR II.

Operation Paperclip U.S. plan that brought German scientists to the United States at the end of WORLD WAR II. Fearing that German military and scientific secrets would fall into the hands of the USSR, the joint chiefs of staff ordered General Dwight D. EISENHOWER to "preserve from destruction and take under your control records, plans, documents, papers, files and scientific, industrial and other information belonging to . . . German organizations engaged in military research." The plan was supervised by U.S. chief of technical intelligence Holger N. TOFTOY. Among the Germans brought to the U.S. in this sensitive and controversial operation were many who had worked on the V-2 rocket at PEENEMÜNDE. American critics were incensed that those who had helped HITLER develop weapons of war used

German scientists brought to the United States under Operation Paperclip, 1945 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

against the Allies were suddenly part of the U.S. scientific establishment. Ironically, these engineers came to play a crucial role in developing the U.S. space program. They included Walter DORNBERGER and Wernher von BRAUN.

Ophüls, Marcel (1927–) German-born film director. Ophüls, who is the son of the renowned film director Max OPHÜLS, accompanied his father to the U.S. in 1941 and ultimately became an American citizen. But in 1950 Ophüls returned to France, where he worked as an assistant to numerous directors, including his father and John HUSTON. After directing features for French television, Ophüls achieved international recognition for *The Sorrow and the Pity* (1969), a powerful documentary on French ANTI-SEMITISM and collaboration with the Nazis during WORLD WAR II. Subsequent political documentaries by Ophüls include *A Sense of Loss* (1972), on NORTHERN IRELAND and *Memory of Justice* (1976)—which portrayed military atrocities in Europe during WORLD WAR II, during the 1950s in ALGERIA, and in VIETNAM.

Ophüls, Max (Max Oppenheimer) (1902–1957) German-born film director. Ophüls was a brilliant and well-traveled director who made films throughout Europe and in HOLLYWOOD. He began his career as a theatrical actor and director in Germany before becoming a French citizen in 1934. After making films in Italy and the Netherlands, Ophüls evaded the Nazis by going to Hollywood in 1941, where his greatest successes were *Letter*

from an Unknown Woman (1948) and *The Reckless Moment* (1949). Ophüls then returned to France, where he made a number of films, including *La Ronde* (1950), *The Earrings of Madame de . . .* (1953) and *Lola Montez* (1955), a sweeping and sentimental historical epic on the life of a 19th-century romantic adventuress that is regarded as Ophüls's masterwork.

Oppenheimer, Frank (1912–1985) U.S. nuclear physicist. During WORLD WAR II he worked on the development of the ATOMIC BOMB in the MANHATTAN

PROJECT, headed by his older brother, J. Robert OPPENHEIMER. At the time, his left-wing views aroused concern in the government that he and his brother were security risks. In 1949 after testifying before the HOUSE UN-AMERICAN ACTIVITIES COMMITTEE that he had been a member of the American Communist Party in the 1930s, he was fired from his teaching position at the University of Minnesota. He later became a cattle rancher in Colorado. In 1969 he founded the Exploratorium, a San Francisco museum with exhibits that help even young children grasp the basic principles of science.

Oppenheimer, J(ulius) Robert (1904–1967) American physicist, best known as the father of the ATOMIC BOMB. Born in New York City, he attended Harvard (B.A., 1925), Cambridge and the University of Göttingen (Ph.D., 1927). Collaborating with Max BORN, he did significant work on the quantum theory of molecules. From 1929 to 1942, Oppenheimer taught theoretical physics at the University of California (Berkeley) and the California Institute of Technology (Pasadena). At both schools, he studied quantum theory and nuclear physics and did experimental research on the positron, while

Leslie Groves (r) and Dr. J. R. Oppenheimer examine an atomic test site, 1945. (NEW YORK WORLD TELEGRAM AND THE SUN NEWSPAPER COLLECTION, LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

winning a reputation as a brilliant and inspirational teacher and acquiring a corps of dedicated assistants. Oppenheimer first became interested in the possibility of an atomic bomb in 1939, and in 1941 he began research into the problems of nuclear fission at the Lawrence Radiation Laboratory, Berkeley. This work was continued during WORLD WAR II, when he acted (1942–45) as director of the top-secret atomic energy research program known as the MANHATTAN PROJECT—at a remote site in LOS ALAMOS, New Mexico. Gathering around him some of the greatest minds in nuclear physics, Oppenheimer and his colleagues worked tirelessly in a successful effort to create the bomb. In 1945 he was one of a panel of scientists who advised its use against Japan. After the bomb was dropped, he became a strong adherent of the international control of atomic energy.

In 1947 Oppenheimer returned to academia as director of the Institute for Advanced Study at Princeton. At the same time, he remained an adviser to the State Department and the Pentagon, and that same year he was appointed chairman of the General Advisory Committee (GAC) to the Atomic Energy Commission (AEC). In this capacity, Oppenheimer at first opposed research on a HYDROGEN BOMB but reversed his position in 1951. However, his early opposition to the fusion bomb, his stand on arms control, his left-wing political connections and his sometimes lofty attitude soon brought him into conflict with the McCARTHYISM of the 1950s. Faced with allegations that the scientist was a security risk, President EISENHOWER suspended Oppenheimer's security clearance in a controversial 1953 decision. After an appeal failed to restore the clearance, Oppenheimer devoted himself to his Princeton activities and to work on the spiritual and intellectual ramifications of nuclear physics. A man of undoubted integrity and loyalty, he was the most notorious scientific victim of McCarthyism. In 1963 Oppenheimer was awarded the government's prestigious Enrico Fermi Award.

Orangemen Members of the **Orange Order**, an Irish society formed in Ulster in 1795 to uphold Protestantism. The name is taken from William III, Prince of Orange, who defeated James II at the Battle of the Boyne in 1690.

The society is bitterly anti-Catholic. It maintains the Ulster Unionist Party and has branches outside NORTHERN IRELAND, particularly in Liverpool and Glasgow. The society organizes annual summer marches—notably the march in Belfast on July 12—to celebrate William's victory at the Boyne and to demonstrate the Protestant and LOYALIST presence in Northern Ireland.

Orbison, Roy (1936–1988) U.S. singer-songwriter. In the early 1960s, Orbison was one of the world's most popular recording artists. He favored an introspective musical style that wedded rockabilly and dramatic ballads. His career first took off in 1960 with a recording of "Only the Lonely." Between 1960 and 1964 he was the top-selling male singer in the world, with such songs as "Running Scared," "Crying," "Blue Bayou" and "Oh, Pretty Woman." The death of his first wife in 1966, followed by the deaths of two of his children in 1968 and by problems with alcohol and drugs, temporarily ended Orbison's performing career. He began a successful comeback effort in 1987, the year he was inducted into the Rock and Roll Hall of Fame.

Oren Affair In 1952, while visiting CZECHOSLOVAKIA, prominent Israeli leftist Mordechai Oren was arrested and summoned to testify against Rudolf SLÁNSKÝ, the Communist Party secretary general who was on trial for treason. Accused of treason himself, Oren was sentenced to 15 years in prison in 1953. He was released in 1956 during Czechoslovakia's de-Stalinization period. (See STALIN; STALINISM.) After returning to ISRAEL, he claimed that he had been forced to confess what never happened. In the 1960s the Czechoslovak government formally cleared Oren.

Orff, Carl (1895–1982) German composer and music educator. Born in Munich, he attended the city's Academy of Music and was cofounder (1924) and teacher at its Güntherschule. Fascinated by the primitive in music and with the combination of music, dance and text, he initiated an influential teaching method that mixed rhythmic games, melodic exercises, chant, gymnastics and dance. Orff's method was outlined in his popular

text *Das Schulwerk*. Extremely interested in early music, he incorporated its lively rhythms and monodic forms into his own compositions. His most popular work is *Carmina Burana* (1937), a vigorous setting of secular medieval texts for choir and vocal soloists. It forms the first part of a trilogy that also includes *Catulli Carmina* (1943) and *Trionfo di Afrodite* (1953). Prior to 1937, Orff composed a variety of orchestral, chamber and vocal music. After that date, he composed exclusively for the theater in such works as the operas *Die Kluge* (1941–42), *Prometheus* (1968) and *Play from the End of Time* (1973). From 1961, he was head of the Orff Institute at the Mozarteum Music Academy in Salzburg.

Organisation de l'Armée Secrète See O.A.S.

Organization for Economic Cooperation and Development (OECD) International organization that succeeded the ORGANIZATION FOR EUROPEAN ECONOMIC COOPERATION (OEEC) in 1960. With headquarters in Paris, it is an attempt by the leading industrial nations to promote high economic growth in member states and to assist in the economic growth of the developing countries. The OECD is an important research organization, studying and debating such international questions as balance of payments, agriculture, energy and technology. Headed by a secretary-general, its organizational structure employs a council and an executive committee.

Organization for European Economic Cooperation (OEEC) International organization established in 1948 as a coordinating group for MARSHALL PLAN aid. It aimed at reconstructing Europe and at achieving a sound European economy through the cooperation of its members. Its original 16 member states were Austria, Belgium, Denmark, France, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Sweden, Switzerland, the U.K. and Turkey. They were joined by West Germany in 1955 and Spain in 1958. The U.S. and Canada later became associate members. This organization provided a framework for the EUROPEAN ECONOMIC

COMMUNITY or Common Market. In 1960 it was superseded by the ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT.

Organization of African Unity An international group of African states founded in Addis Ababa, Ethiopia, in 1963. Its goals included promoting the unity and solidarity of African nations; guaranteeing the independence and territorial integrity of its members; coordinating political, economic, cultural, health, scientific and defense policies among its members and eliminating colonialism. Heads of the member states met on an annual basis, the Council of Ministers met every six months and separate commissions concentrated on varying subjects. The organization was successful in mediating border disputes between Algeria and Morocco (1965) and between Somalia and Ethiopia and Somalia and Kenya (1965–67) but failed in an attempt to settle the Nigeria-Biafra civil war (1968–70). While it had a membership of 50 in the early 1990s, it failed to command the respect it had in its earlier days. On September 9, 1999, the 53 members of the Organization for African Union transformed it into the African Union, a structure dedicated to achieving the same degree of political and economic cooperation as the EUROPEAN UNION (EU).

Organization of American States (OAS) Regional organization of Western Hemisphere states formed to promote peace, justice and solidarity; to strengthen political cooperation among its members; to encourage hemispheric economic development and to defend the sovereignty and independence of its member nations. It was established by treaty at a meeting in Bogotá, Colombia, in April 1948 and was officially founded in 1951. With a membership of 32 countries, it has headquarters in Washington, D.C. The OAS is built on the earlier International Bureau of American Republics, established in 1890, and its successor, the Pan-American Union, founded in 1910, which became the Secretariat of the OAS. It is made up of a General Assembly, which meets annually in member nations, a Permanent Council and a Meeting of Consultation of Ministers of Foreign Affairs. Four other councils consider such issues as

economic and social conditions, education, legal matters and human rights. The organization is overseen by a secretary general, elected by the assembly for a five-year term. The OAS has taken stands against Cuba, which was expelled from active membership in 1962 and boycotted by the OAS from 1964 to 1975. In more recent years, the organization has rebelled against the strong role traditionally played by the U.S. in Latin American affairs. Despite the anti-American stance of some of its members, the OAS has largely supported U.S. efforts to increase hemispheric trade through the proposed Free Trade Act of the Americas (FTAA).

Organization of Petroleum Exporting Countries (OPEC) Organization established in 1960 to coordinate oil policies in member states, all Third World petroleum-producing nations; original members were Iran, Iraq, Kuwait, Saudi Arabia and Venezuela. Qatar joined in 1961, Indonesia and Libya in 1962, Algeria in 1969, Abu Dhabi (now in the U.A.E.) in 1967, Nigeria in 1971 and Ecuador and Gabon in 1973. The original intent of OPEC was to guard against oil price cuts and overproduction by companies in the U.S. and Europe. In the 1970s it pressed for petroleum rate increases and succeeded in raising oil prices by more than 100 percent before the end of the decade, thus creating severe oil shortages. At the beginning of the 1980s, large-scale production of oil by Saudi Arabia and energy-preserving policies initiated by many oil-importing nations caused an oil surplus and led to problems in OPEC. As widely varying prices for oil held sway, the organization strove to maintain a standardized pricing structure.

Original Dixieland Jazz Band The Original Dixieland Jazz Band, often considered the first white jazz band, was formed during WORLD WAR I in New Orleans by cornetist-leader Nick LaRocca, clarinetist Larry Shields, trombonist Eddie Edwards, drummer Tony Sbarbaro and pianist Henry Ragas (later replaced by J. Russell Robinson). Achieving success in Chicago in 1916, the ODJB was brought to New York in 1917 for a sensational stand at Reisenweber's Restaurant, where it successfully capitalized

on the wartime vogue for jazz dancing; the group continued as a major attraction until breaking up in 1925. The ODJB is also significant for being the first jazz band to record phonograph records. As for its historical significance, the ODJB is the subject of still heated controversy. Some experts dismiss it as derivative of black New Orleans music; others, including LaRocca, argue that the ODJB deserves greater credit for its "innovations." The truth, as Gunther Schuller eloquently chronicles in *Early Jazz* (1968), lies at some point between these extremes. What is incontrovertible, however, is the significant role played by the ODJB in popularizing the Dixieland style throughout the U.S. and Europe.

Orkin, Ruth (1921–1985) American photographer. Orkin's work on celebrities and street life regularly appeared in *LIFE*, *Look* and other major magazines during the 1940s, 1950s and 1960s. In the early 1950s, she and her husband Morris Engel made *The Little Fugitive*, a film that was credited with influencing the French NOUVELLE VAGUE (new wave) cinema.

Orlando, Vittorio Emanuele (1860–1952) Italian statesman, premier (1917–19). A law professor in Palermo, he was elected to parliament in 1897 and held several cabinet posts from 1903 to 1917. Appointed premier after Italy's defeat at Caporetto, he helped to rally his nation for ultimate victory in WORLD WAR I. Orlando was one of the "Big Four" (with Georges CLEMENCEAU, David LLOYD GEORGE and Woodrow WILSON) at the 1919 PARIS PEACE CONFERENCE. He quarreled bitterly with Wilson over Italy's territorial demands, dramatically leaving the conference only to return a month later. Failing in his efforts, Orlando resigned the premiership. An opponent of MUSSOLINI's fascist government, he resigned from parliament in 1925. After the defeat of the fascists, he became a leader of the Democratic Union and served as president of the constituent assembly (1946–47) and as a senator from 1948 until his death.

Orlov, Yuri Alexandrovich (1893–1966) Soviet paleontologist and member of the Academy of Sciences from 1960. Having graduated from Petrograd

University in 1917, Orlov taught at Perm, Leningrad (now St. Petersburg) and Moscow. He was named head of Moscow's department of paleontology in 1942. He edited the *Paleontology Journal* (1959–66) and was chief editor of the 15-volume *Basic Paleontology*. He was awarded the Order of Lenin and various other medals.

Ormandy, Eugene (Jeno Blau) (1899–1985) Hungarian-born American conductor. Trained in BUDAPEST as a violinist, Jeno Blau came to the U.S. in 1921 on the liner *Normandie*, from which he took his new name. He played briefly in a theater orchestra before becoming its conductor and made guest appearances with other orchestras. He conducted the Minneapolis Symphony (1932–36). In 1936 he became co-director of the Philadelphia Orchestra with Leopold STOKOWSKI and was named sole musical director in 1938. Under his guidance, the orchestra retained the celebrated richness of sound that Stokowski had done much to cultivate. Over the years, Ormandy led the orchestra on numerous foreign tours, including a historic visit to China in 1973. Between 1936 and 1986 he made almost 600 recordings. When he retired in 1980, he had been head of a single orchestra longer than any other conductor in the 20th century. Although critics sometimes complained that his interpretations were slick, Ormandy was an extremely knowledgeable musician. He had a wide repertoire but was best known for his performances of music of the romantic period.

O'Rorke, Brian (1901–1974) English designer known for his work on boat and airplane interiors. Trained in engineering and architecture, O'Rorke established his own design firm in London in 1929. His most distinguished work was the interior design of the Orient Line passenger vessels *Orion* and *Orcades* of the 1930s. These ships were remarkable for their sensibly functional, handsome interiors at a time when the more excessive ART DECO was the norm for ocean-liner interior design. O'Rorke also worked on railroad and airplane interiors, providing straightforward and appropriate design for a number of transport projects, including the interior of the Vickers Viking airplane of 1946.

Orpen, Sir William (Newenham Montague) (1878–1931) Irish portrait, landscape and genre painter. Born in County Dublin, he studied art at Dublin's Metropolitan School, where he later taught (1902–14), and at London's Slade School. Perhaps the most influential and popular Irish painter of his day, he was knighted in 1918. He is best known for his sketches of everyday life in Ireland, scenes of WORLD WAR I (being an official war artist from 1917–18) and portraits of prominent Irish figures. His works are in major Irish museums as well as such collections as the Tate Gallery, London; Metropolitan Museum, New York City and Carnegie Institute, Pittsburgh.

Orr, Robert Gordon "Bobby" (1948–) Canadian hockey player. In many ways, Orr was the artist who put the finishing touches on the modern game of hockey. While there had been earlier rushing defensemen, Orr orchestrated his team's movements from the blueline when he was not carrying the puck across himself, as he won the league's scoring title three times. The Boston Bruins of the early 1970s became known as the "Big Bad Bruins" as they dominated the league with their explosive scoring and their fists. Plagued throughout his career by bad knees, Orr was an All-Star throughout that career and won the Norris Trophy as best defenseman eight times. He was named to the Hockey Hall of Fame in 1979.

Ortega Saavedra, Daniel (1945–) Nicaraguan guerrilla and political leader, president of NICARAGUA (1981–90, 2007–). Active in various underground resistance movements against the regime of Anastasio SOMOZA, Ortega was a member of the National Directorate of the FSLN (Sandinista Liberation Front), 1966–67, and imprisoned from 1967 to 1974. He resumed his position with the FSLN and became involved in further revolutionary activities. He fought a two-year military offensive that overthrew the Somoza regime in 1979. He was subsequently a member of the Junta of National Reconstruction and became president in 1981. Ortega developed close relations with CUBA. As he became increasingly intolerant of those who did not follow his party line and espoused Marxist revolutionary doctrine, the noncommunist members

of the junta either resigned or were forced out. Many of his onetime associates denounced his rule, and some joined the CONTRAS, who were attempting to overthrow Ortega. Ortega was also denounced by the U.S. REAGAN administration, which gave support to the contras. In the late 1980s Ortega agreed to hold free elections under a plan that called for the contras to lay down their arms. Ortega was predicted to win easily, but he was upset on February 25, 1990, by Violeta CHAMORRO, the candidate of the 14-party National Opposition Union. Ortega remained the leader of the Sandinista Party and served repeatedly as its presidential candidate 1996 and 2001, but lost both times to Liberal Party candidates Arnaldo Alemán (1996) and Enrique Bolanos (2001). He won, however, in 2006.

Ortega y Gasset, José (1883–1955) Spanish philosopher, sociologist, literary critic and politician. Ortega was one of the preeminent Spanish men of letters of the 20th century. He held the chair of metaphysics at the University of Madrid for several decades and served as a member of the Spanish parliament. After the SPANISH CIVIL WAR and the rise of FRANCO's fascist regime in the 1930s, Ortega went into exile, ultimately settling in Portugal. Ortega was known for his ardent defense of classicism and the humanities, as well as for his fear that the working class, in gaining political power, would threaten the ultimate values of Western civilization. His major works include *Meditations on Quixote* (1914), *The Dehumanization of Art and Other Essays* (1925) and *Revolt of the Masses* (1930).

Ortiz, Peter J(uilien) (1913–1988) U.S. military hero. He was a highly decorated U.S. Marine Corps veteran whose exploits were the subject of two films: *13 Rue Madeleine* (1946) and *Operation Secret* (1952).

Orton, Joe (Kingsley Orton) (1933–1967) British playwright and actor. Orton left school to begin acting at 16. His dark comedies, starting with *Entertaining Mr. Sloane* (1964), frequently focused on sexual perversion, corruption and violence and created a sensation based partly on shock value. Other works include *Loot* (1965), *The Ruffian*

on the Stair (1967) and *What the Butler Saw* (1969), which was performed posthumously. Orton was beaten to death by his lover and companion, who then committed suicide.

Orwell, George (pen name of Eric Arthur Blair) (1903–1950) British novelist, essayist and journalist. Born to a middle-class English family in Bengal (then part of Britain's Indian empire), he was educated at Eton and afterward spent five years with the Indian Imperial Police in Burma—an experience that later provided the background for his first novel, *Burmese Days* (1934). During the GREAT DEPRESSION he worked at a variety of jobs, often leading a hand-to-mouth existence. His experiences of this time, which gave him a profound sympathy with the poor and unemployed and intensified his commitment to socialism, are recounted in his nonfiction works *Down and Out in Paris and London* (1933) and *The Road to Wigan Pier* (1937). In 1936 he went to Spain to report on the SPANISH CIVIL WAR; he soon joined the fight against the Fascists (see FASCISM). He described his experience and perceptions in *Homage to Catalonia* (1939), an incisive account of the war that criticized the infighting amongst the various Republican factions. The war confirmed Orwell's hatred of TOTALITARIANISM and increased his distrust of COMMUNISM. These attitudes are apparent in his two most important novels, *ANIMAL FARM* (1945), an allegorical satire of the RUSSIAN REVOLUTION; and *1984* (1949), a warning about the bleak outcome of totalitarianism. These two political works have had an enormous influence on other writers and thinkers and have been subject to much literary and political analysis.

During WORLD WAR II, Orwell served as literary editor for the British LABOUR PARTY journal, *Tribune* (1943–45), and broadcast for the BRITISH BROADCASTING CORPORATION. He wrote numerous essays and articles, many of which can be found in *Collected Essays, Journalism and Letters* (1968). His other, more conventional novels include *A Clergyman's Daughter* (1935), *Keep the Aspidochelone Flying* (1936) and *Coming Up for Air* (1939). A complex and often contradictory figure, Orwell stands as one of the most

original and uncompromising writers of his time—and as a champion of human liberty and decency.

Ory, Edward “Kid” (1886–1973) Kid Ory is the most famous exponent of the New Orleans “tailgate” trombone style, with its roughhewn syntax of growls, glissandi and other “vocalizations,” the latter often achieved with various mutes. Between 1912 and 1919, Ory led one of the most influential bands in New Orleans; among his sidemen were noted trumpeters King OLIVER and Louis ARMSTRONG, as well as clarinetists Johnny Dodds, Sidney Bechet, Jimmie None and George Lewis. Ory was also a key figure in the prolific Chicago jazz scene of the 1920s, where he participated in the landmark “Hot Five” recordings with Louis Armstrong. After retiring to run a successful California chicken ranch in the 1930s, his career was revived due to a 1944 radio broadcast with Orson WELLES. In 1954 his Dixieland standard, “Muskrat Ramble,” attained hit status with newly fitted lyrics; he also had an acting and playing role in *The Benny Goodman Story* (1955). Ory's pioneering style exerted profound influence both in his early years in New Orleans and during the post-World War II traditional jazz revival.

Osborne, John James (1929–1994) British playwright and actor. Osborne, who began his career acting in provincial repertory companies, was best known for the play *Look Back in Anger* (1956). Its domestic realism and its lower-class antihero caused Osborne to be categorized as one of the ANGRY YOUNG MEN. His early work, which also includes *The Entertainer* (1957, filmed 1960), *The World of Paul Slickey* (1959) and *Luther* (1961), is credited with changing the course of British drama. *A Patriot for Me* (1966) was originally censored because of its homosexual theme but was revived successfully in 1983. Many critics felt that Osborne's later works, such as *West of Suez* (1971) and *Watch It Come Down* (1975), were increasingly cranky in tone and lacked the impact of his early plays.

OSS See OFFICE OF STRATEGIC SERVICES.

Ossietzky, Carl von (1889–1938) German author and pacifist. Born in

Hamburg, he was a fledgling poet when distaste for German militarism led him to cofound the German Peace Society in 1912. Service in WORLD WAR I deepened his antiwar sentiments, and in 1920 he became the secretary of the German Peace Society. Settling in Berlin, he became the editor in chief of the antimilitarist weekly *Weltbühne* in 1927. Jailed briefly for publishing an article that criticized the government for allowing the development of paramilitary organizations, he was again imprisoned in 1932 for printing a piece that exposed Germany's secret rearmament. After the REICHSTAG FIRE (1933), Ossietzky was again imprisoned—this time by the Nazis: first in Berlin, then in two CONCENTRATION CAMPS. Suffering from a heart condition and tuberculosis, he was transferred to a prison hospital in 1936—the same year he was awarded the NOBEL PEACE PRIZE. Subsequently, the German government decreed that no citizen could accept a Nobel Prize. Ossietzky died two years later in the prison hospital.

Ostpolitik (German, “eastern policy”) Policy of the German Federal Republic (WEST GERMANY) developed by Willy BRANDT and others as an attempt to normalize relations with communist countries, including the German Democratic Republic (GDR). With the reunification of GERMANY in 1990, West Germany seemed to have far surpassed the original goals of *Ostpolitik*.

Oswald, Lee Harvey (1939–1964) Presumed assassin of U.S. president John F. KENNEDY. Born in New Orleans and raised in poverty, he was by all accounts a loner. He served in the U.S. Marine Corps but received an undesirable discharge (1959). He then lived in the USSR for two and half years, marrying a Soviet woman, Marina Nicholaevna. Apparently disillusioned with the USSR, he returned to the U.S. in June 1962 with his wife and infant daughter and became involved in pro-CASTRO activities. He separated from his wife in 1963 and moved to Dallas, where he found a low-paying job in the **Texas School Book Depository**, from where, as far as can be determined, he fired the shots that killed President Kennedy. Shortly after leaving the building, he also shot and killed a

Dallas police officer, **J. D. Tippitt**, who had stopped him for questioning. Oswald was captured soon thereafter. He met his own death two days later on November 24 as police were taking him through the basement of Dallas's municipal building to be transferred from the city jail to the county jail. As millions watched on television, Jack RUBY, a Dallas nightclub owner, sprang from a crowd of reporters and fired a .38-caliber revolver point blank at Oswald, who died within hours. From the time of his arrest until his own death, Oswald never admitted any connection with the Kennedy assassination; his defiant words upon his arrest were "Mister, I shot nobody." Because of Oswald's death, the evidence against him could not be presented in court. Although the Warren Commission later reported that Oswald acted alone in the assassination, conspiracy theories claiming Cuban and Mafia involvement in the assassination persisted.

Oświęcim See AUSCHWITZ.

Ott, Mel(vin Thomas) (1909–1958) American baseball player. Ott became a regular with the New York Giants at the age of 19, and remained with the club throughout his 22-year career. A perennial All-Star, he was the first player in the National League to reach the 500-home-run plateau. His popularity in New York led to his being named player-manager of the Giants in 1942. He retired from the managerial post in 1948, one year after the end of his playing career. He was named to the Hall of Fame in 1951.

Ottoman Empire The once powerful Ottoman Empire lasted for hundreds of years until it met its fate in the first quarter of the 20th century. By the turn of the 20th century, its size, power, wealth and stability had declined greatly from its height in the 1500s. It was widely regarded as "the sick man of Europe." At this time, its territory had been reduced to present-day TURKEY and regions mainly in the Middle East and on the Arabian Peninsula under Turkish rule. The Sublime Porte was threatened by Russia, by Arab independence movements and by the YOUNG TURKS, who demanded modernization and reform. In 1908 the Young Turks forced Sultan ABDUL HAMID II to

restore constitutional rule. The empire was allied with GERMANY in WORLD WAR I. During the war, the British occupied much of the Ottoman territory in PALESTINE and present-day IRAQ. This occupation, combined with Arab uprisings (assisted by Colonel T. E. LAWRENCE, "Lawrence of Arabia") ended Turkish domination of the region. The Treaty of SEVRES (1920) recognized the independence of the non-Turkish peoples of the Middle East. Meanwhile, the Turkish nationalist Kemal ATATÜRK assumed power (1920), abolished the sultanate (1922) and declared Turkey a republic (1923), thus formally dissolving the Ottoman Empire.

Outerbridge, Paul, Jr. (1891–1959) American photographer whose work ranged from rather sentimentalized commercial images to still lifes with an abstract and documentary quality and powerful design impact. Outerbridge became involved in photography during his military service in WORLD WAR I. In 1921 he entered the school operated by Clarence H. White in New York to learn pictorial and commercial photography. *Collar*, produced on his first commercial assignment in 1922, is a still life showing a man's collar resting on a checkerboard background in a way that makes the image abstract and elegant while still totally realistic. Other work included city scenes, details of mechanical parts, and such common objects as a wine glass or tin box, beautifully contact-printed on platinum paper, making each image an expressive design. His role in the history of modern photography points toward the work of Berenice ABBOTT and Walker EVANS, whose work gave documentary photography a place in both design and art.

Ovando Candia, Alfredo (1918–1982) President of BOLIVIA (1969–70) and co-president (1965–66). Ovando organized the 1967 military offensive against Ernesto "Che" GUEVARA, in which the revolutionary was killed.

Owen, David Anthony Llewellyn, Baron (1938–) British politician. Educated at Cambridge, Owen practiced as a neurologist before entering Parliament as a Labour member in 1966. As foreign secretary (1977–79) in the government of James CALLAGHAN, he was instrumental in negotiating an

agreement with Rhodesian leader Ian SMITH, Bishop Abel MUZOREWA, Robert MUGABE and Joshua NKOMO to bring about the peaceful transfer of power to the black majority (see ZIMBABWE). A leading moderate in the LABOUR PARTY, Owen was one of the GANG OF FOUR who left the party in 1981 to found the SOCIAL DEMOCRATIC PARTY (SDP). In 1983 Owen succeeded Jenkins as party leader. Owen opposed the SDP's decision to merge with the LIBERAL PARTY in 1987 and stepped down from his post. In 1992 Owen worked with former U.S. secretary of state Cyrus Vance to create the VANCE-OWEN PLAN, a proposal that sought in vain to end the Yugoslav conflict over BOSNIA AND HERZEGOVINA. He was made a life peer in 1992 and in 1994 appointed as a Companion of Honour by Queen Elizabeth for his service to government. Owen is the author of *Face the Future* (1981), *Time to Declare* (1992) and *Balkan Odyssey* (1995).

Owen, Wilfred (1893–1918) British poet and military hero. Owen, who was killed in action on the western front one week before the end of WORLD WAR I, is regarded by many critics as the finest poet to have written of that war, as well as one of the greatest elegaic poets in the history of the English language. Educated at the University of London, Owen enlisted in the British army in 1915 despite ill health. Invalided in 1917 and suffering from shattered nerves, Owen met fellow British poet Siegfried SASOON while in a hospital in Scotland. Sassoon, who saw to the publication of Owen's posthumous *Poems* (1920), was a major influence on Owen, as was Robert GRAVES. Owen returned to active service, won the Military Cross for combat bravery in October 1918 and was killed the following month. His notable poems include "Strange Meeting" and "Anthem for Doomed Youth." Owen's *Collected Poems* (1931) featured an introduction by Edmund Blunden.

Owens, Jesse (1913–1980) African-American track and field star. Jesse Owens is considered one of the greatest athletes of the 20th century and ranks as one of the all-time greats in track and field events. When in his early 20s, he had achieved fame as a sprinter, hurdler and longjumper of unsurpassing grace. In his sophomore

American track and field star Jesse Owens (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

year at Ohio State University, he broke five world records and tied a sixth, all within 45 minutes of competition. He was best known for his memorable performance at the 1936 OLYMPIC GAMES in BERLIN, where he won four gold medals (in the 100- and 200-meters dashes, the broad jump and the 400-meter relay). The feat was made more dramatic by the presence of Adolf HITLER in the stadium. Before the games, Hitler had proclaimed Aryan racial superiority and mocked American black athletes as members of an inferior race. Despite his Olympic triumphs, Owens did not receive official U.S. recognition of his feats until 1975, when he was awarded the Presidential Medal of Freedom. After his career as an amateur runner, he became a well-known public speaker and operated his own public relations and marketing firms.

OXFAM (Oxford Committee for Famine Relief) Privately funded British relief agency founded in Oxford, England, in 1942, to feed the children in GREECE during WORLD WAR II. Its scope broadened as it aided

refugees worldwide following the war. In the 1960s OXFAM changed its focus to improving agriculture and food production in developing and THIRD WORLD countries, providing staff, equipment and training to people so that they could control their own production. In the 1970s OXFAM organizations were formed in the U.S., CANADA, BELGIUM and AUSTRALIA. In addition to continued agricultural support, OXFAM provides emergency assistance in areas stricken by natural disasters.

Oxford Group Established at Oxford in the 1920s, the Oxford Group was the British equivalent of Frank BUCHMAN'S MORAL RE-ARMAMENT in the U.S. This evangelical movement aimed at changing social conditions through personal religious action.

Özal, Turgut (1927–1993) Turkish statesman. After graduating in electrical engineering, Özal taught at the Middle East Technical University at ANKARA. A member of the right-wing Motherland Party, Özal was formerly a member of the religious National Salvation Party. In 1967 he became undersecretary of the State Planning Organization. Özal also worked for the WORLD BANK. He served as the minister of state (1980–82) and became prime minister in 1983. With strong background in economic policy, he sponsored TURKEY'S application for membership in the EUROPEAN COMMUNITY in 1987. He survived an assassination attempt in 1988, and a defeat in a March 1989 referendum regarding local elections. He strongly supported the UNITED NATIONS actions against IRAQ after Iraq's 1990 invasion of KUWAIT.

Ozawa, Seiji (1935–) Japanese-born conductor known for his sensitivity to tempo, tone and balance. Ozawa was influenced by his mentors, KARAJAN and BERNSTEIN. He made his Western conducting debut at New York's CARNEGIE HALL in 1961. From 1970 to 1976 he was musical director of the San Francisco Symphony Orchestra. He has appeared at the SALZBURG FESTI-

VAL and at Covent Garden and conducted operas at La Scala and Paris. Since 1968 he has been principal conductor of the New Japan Philharmonic Orchestra, and from 1973 to 2002 he served as musical director of the Boston Symphony Orchestra. In 2002 he was named music director of the Vienna State Opera.

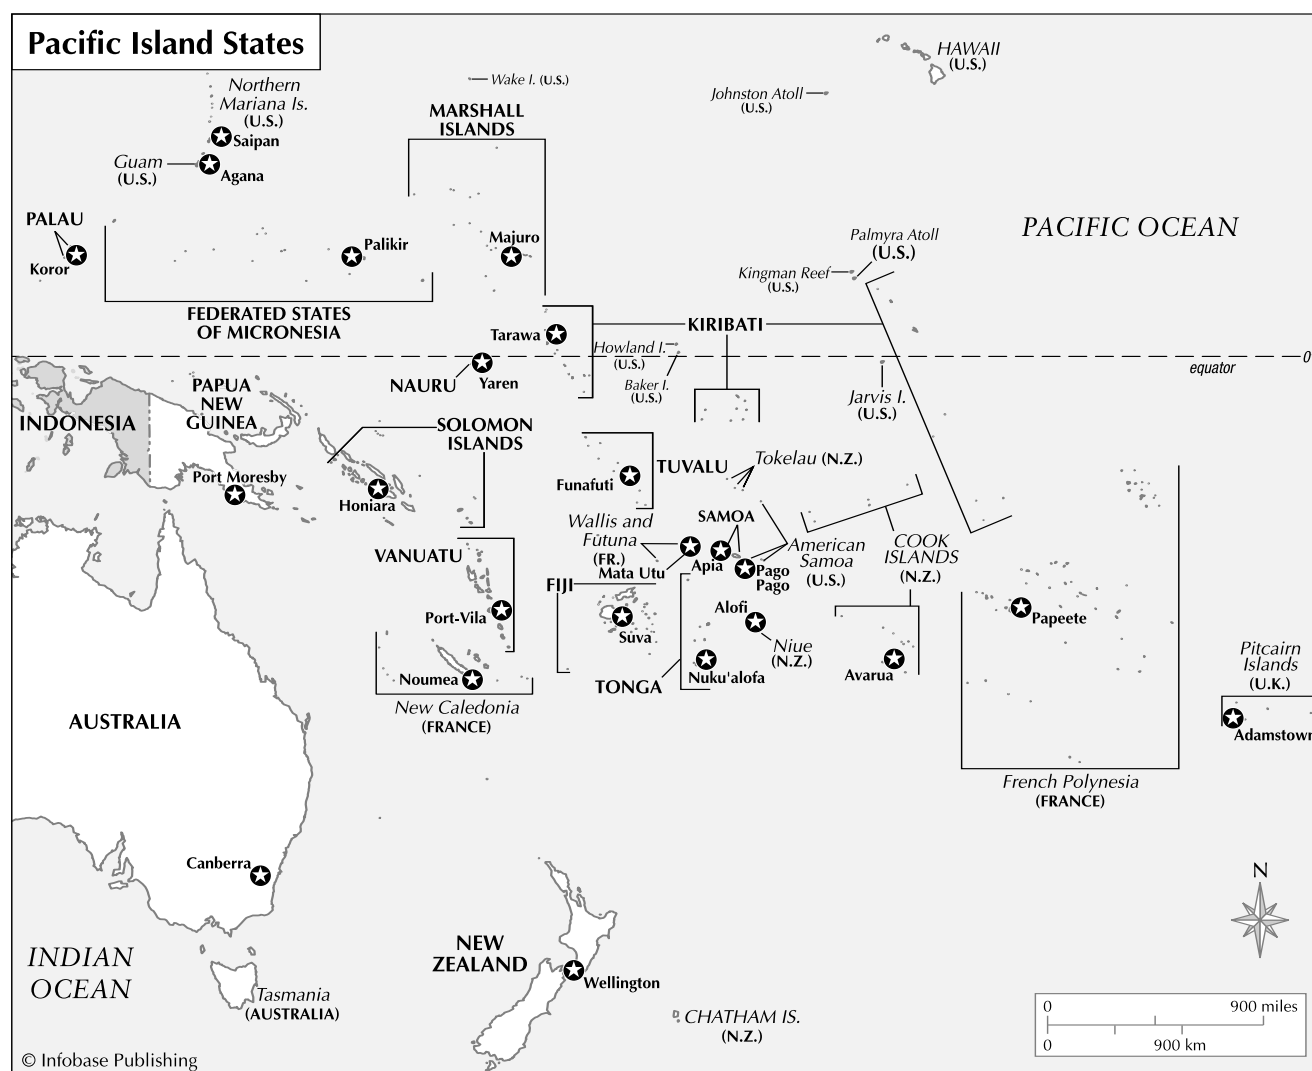

Ozu, Yasujiro (1903–1963) Japanese filmmaker. Ozu is ranked with Kenji MIZOGUCHI and Akira KUROSAWA as the greatest of modern Japanese filmmakers. He has been called “the most Japanese” of all directors. The Tokyo-born filmmaker has won the Japanese equivalent of six ACADEMY AWARDS. By contrast with the more flamboyant work of his famous protégé, Kurosawa, Ozu reveals character primarily through dialogue, not action. His main subject is the strain of contemporary life upon the integrity of the family. He began in the movies as an assistant cameraman for the great Japanese studio, Shochiko Motion Picture Company (with which he was associated for the rest of his life). His “home dramas,” such as *Ochazuke no aji* (*The Flavor of Green Tea over Rice*, 1952), *Tokyo monogatari* (*Tokyo Story*), and *Ukigusa* (*Floating Weeds*), display a fascinating formal design. He places his camera in the *tatami* position, approximately the point-of-view from a kneeling position three feet above the floor. He eschews such transitional devices as fades and dissolves. Dialogue and action are intercut with shots of static views—trees, hallways, windows, street signs, etc. The entire effect is a spare simplicity, serene calm and repose. Yet the emotional charge of those lingering shots through doorways—such as the last view of an old man abandoned by his family in *Samma no aji* (*An Autumn Afternoon*, 1962)—is overwhelming. “What remains after an Ozu film is the feeling that, if only for an hour or two, you have seen the goodness and beauty of everyday things and everyday people,” says biographer Donald Richie. Ozu's tombstone displays the single character for *mu*—a term translated as “nothingness”—which in Zen philosophy also means “everything.”

P

Pacific Islands, Trust Territory of the Several island chains in the western Pacific under U.S. administration; includes the CAROLINES (as well as the

Palau), the MARSHALLS and the MARIANAS (except GUAM), in Micronesia. A Japanese LEAGUE OF NATIONS mandate from 1919 to 1945, in 1944 the islands

were seized by the U.S. during WORLD WAR II; in 1947 they became a trust territory with the approval of the UNITED NATIONS. The trusteeship ended in 1990.

Actor Al Pacino in . . . And Justice for All, 1979
(PHOTOFEST)

Pacino, Al (1940–) American stage and motion picture actor and winner of the Academy Award for Best Actor (1993). Born in New York City, studied acting at the Herbert Berghof Studio under drama coach Charlie Laughton and later at the prestigious Actors Studio in New York City under LEE STRASBERG. Pacino's first important stage performance was in *The Indian Wants the Bronx*, for which he won an Obie Award for Best Actor in 1967. Two years later he won a Tony Award for his supporting role in the play *Does a Tiger Wear a Necktie?* While Pacino's success in the theater led to his motion picture debut in *Me, Natalie* (1969) and to a small role as a junkie in *The Panic in Needle Park* (1971), it was not until he appeared in *The Godfather* (1972) as Michael Corleone that Pacino became a star. After his role in *Godfather*—for which he received an Academy Award nomination for Best Supporting Actor—Pacino generally appeared in independent feature films, such as *Serpico* (1973) and *Dog Day Afternoon* (1975). He also reprised his role as Corleone in *The Godfather, Part II* (1974). After his impressive film career during the 1970s, which resulted in three Academy Award nominations for Best Actor, Pacino's career took a turn for the worse during the 1980s. It was not until 1989 that moviegoers again saw Pacino in the crime drama *Sea of Love* (1989). Although the film did not garner any Academy Award nominations, it reinvigorated Pacino's acting career and led to his appearances in *The Godfather: Part III* (1990), *Dick Tracy* (1990),

Frankie and Johnny (1991) *Glengarry Glen Ross* (1992) and *Scent of a Woman* (1992), for which he won an Academy Award for Best Actor in 1993. Since the resurgence of his career, Pacino has appeared in several blockbuster pictures, such as *Heat* (1995), *The Devil's Advocate* (1997), *Any Given Sunday* (1999), *The Insider* (1999) and *The Recruit* (2002).

Pact of Paris See KELLOGG-BRIAND PACT.

Paderewski, Ignace Jan (1860–1941) Polish pianist, composer and statesman. Born in Kurylowka in Russian Poland, Paderewski began playing the piano at an early age. He entered the Warsaw Conservatory in 1872 and later studied with Theodor Leschetizky. Paderewski debuted in Vienna in 1887, in Paris in 1888 and in the U.S. in 1891. His technical virtuosity and brilliant style soon made him the most celebrated and beloved pianist since Franz Liszt. Also a composer, he wrote orchestral pieces, an opera, a cantata, songs and chamber music, as well as piano pieces, notably the well-known Minuet in G. Touring repeatedly and commanding huge fees, he donated much of his fortune to Poland, mainly in the form of aid to refugees and musicians. Paderewski was a passionate Polish nationalist and patriot. After World War I, when the new Polish state was proclaimed in 1918, he briefly served as its ambassador to Washington and shortly afterward became his country's prime minister. In this capacity, he signed the VERSAILLES Peace Treaty and served until 1920. Retaining an interest in Polish affairs, he later devoted most of his time to music. But in 1940–41 he was head of POLAND's government-in-exile during the Nazi occupation.

Page, Ruth (1899–1991) American dancer, choreographer and ballet director. A dynamic performer who gained international acclaim in solo concerts and with such companies as Anna PAVLOVA's classical ballet and Serge DIAGHILEV's BALLETS RUSSES, Page was one of the first choreographers to create works based on American themes. Her most famous ballet in this vein was *Frankie and Johnny* (1938) in collaboration with Bentley Stone. Some of her most popular ballets were based on operas and operettas, such as *Vilia* (1953),

adapted from *The Merry Widow*. In 1928 she created the role of Terpsichore in the world premiere of Igor STRAVINSKY's *Apollo*, as choreographed by Adolph Bolm. She founded the Chicago Opera Ballet in 1956, which became Ruth Page's International Ballet (1966–69), then the Chicago Ballet (1972–present). Rudolph NUREYEV made his New York City debut with her company in 1962.

Page, Walter Hines (1855–1918) American author, publisher and ambassador. After attending Duke University, Randolph-Macon College and Johns Hopkins University, Page began his literary career in 1880 as a reporter for the *Gazette* in St. Louis. In later years he either reported for or edited the *New York World*, the *Raleigh State Chronicle*, the *New York Evening Post*, the *Forum*, the *Atlantic Monthly* and *World's Work*. In 1900 Page joined Frank N. Doubleday in establishing Doubleday-Page, a publishing company that later became Doubleday and Company. Page became an early and active supporter in Woodrow WILSON's presidential campaign, and when Wilson was elected, he appointed Page ambassador to Great Britain. Throughout most of his tenure as ambassador (1913–18), Page strongly advocated that the U.S. abandon its neutrality in WORLD WAR I and join the side of Great Britain. On this issue Page was at constant odds with President Wilson.

Pagis, Dan (1931–1986) Israeli poet. A scholar of medieval Hebrew literature, Pagis spent three years during WORLD WAR II in a NAZI CONCENTRATION CAMP. He emigrated to ISRAEL in 1946. His poetry was regarded as a significant literary response to the HOLOCAUST.

Pahlavi, Mohammad Reza Shah
See MOHAMMAD REZA SHAH PAHLAVI.

Pahlavi, Reza See REZA SHAH PAHLAVI.

Paige, Leroy "Satchel" (c. 1906–1982) American baseball player. A legendary pitcher, Paige was noted for his fastball and his variety of curveball pitches, as well as his longevity in the sport. Starting in baseball's Negro Leagues in the 1920s, Paige spent his prime playing years there, prior to entering the Major Leagues as a 42-year-old

“rookie” with the Cleveland Indians (1948). Paige was brought to Cleveland a year after the Brooklyn Dodgers broke the color barrier with second baseman Jackie ROBINSON. Despite his late beginning, the 6-foot-3-inch pitcher was a deceptive, powerful addition to the Major Leagues and completed a relatively long career when he retired in 1965, while in his late fifties. The first black pitcher in major league baseball, Paige’s birth records were so obscure that even he was able only to estimate his date of birth. Some authorities have added as much as a decade to his age. Paige was inducted into the Baseball Hall of Fame in 1971.

Paine, Thomas (1921–1992) U.S. space administrator. Best known in later years as the chair of the National Commission on Space and before that as administrator of NASA from 1968 to 1970, Paine had a strong impact on the U.S. space program. Charged in 1985 with setting out the nation’s goals in space, the Paine Commission consisted of more than a dozen space-age luminaries, ranging from Nobel Prize-winning physicist Luis ALVAREZ to X-1 pilot Charles YEAGER. The publication of their report came right on the heels of the January 1986 *CHALLENGER* disaster, giving all the more impact to its bold visions. They called for an ambitious agenda of exploration, development, and eventual settlement of new worlds in the next 50 years, “from the highlands of the Moon to the Plains of Mars.” From October 1968 to September 1970, when Paine served as acting administrator and then as NASA’s third administrator, the first seven manned APOLLO missions were launched. It was a time when the nation was galvanized by the excitement of seeing 21 astronauts orbit the Earth over the span of two years, with 15 of them traveling to the Moon and four of them walking on its surface.

Paisley, Ian Richard Kyle (1926–) Northern Irish politician and Protestant clergyman. A fundamentalist minister, Paisley founded the Free Presbyterian Church of Ulster in 1951 and the Martyrs’ Memorial Free Presbyterian Church in 1969. In both the pulpit and the political arena, he is an outspoken

activist against Catholic dominance in Ulster and against interference in NORTHERN IRELAND from either Britain or Dublin. Paisley entered Parliament as a Protestant Unionist member in 1970. A year later he helped form the Democratic Unionist Party, which has become Northern Ireland’s second largest party. Paisley won a seat in the European Parliament in 1979, to which he was re-elected in 1984, although he consistently opposed British membership in the EUROPEAN ECONOMIC COMMUNITY. He denounced the 1985 HILLSBOROUGH ACCORD designed to foster cooperation from all parties on Northern Ireland. Although ostensibly opposed to violence, Paisley has earned a reputation as a demagogue; he has organized numerous Protestant protests, and his rhetoric is widely seen as a divisive force in the province. In 1988, when Pope JOHN PAUL II visited Northern Ireland, Paisley interrupted him, calling out “antichrist,” and was subsequently ejected from the European Parliament. Paisley and the Democratic Unionist Party were involved in the 1998 Good Friday Agreement that sought to create a joint power-sharing government for Catholic and Protestant leaders in Northern Ireland. However, his party left the negotiations when Sinn Féin entered the talks.

Pakistan Country in south Asia; bordered by Afghanistan on the north and west, China on the northeast, India on the east and southeast, Iran on the southwest and the Arabian Sea on the south. Pakistan, scene of countless invasions over the centuries, is approximately 90 percent Muslim, and its official language is Urdu. From 1857 to independence in 1947 it was a part of British INDIA; in 1956 it became a republic in the British Commonwealth. Formation of the Muslim League in 1906 led to increased demands for Muslim political freedom in the face of India’s dominant Hindu population. By 1930 a national separatist movement had evolved, led by the poet and statesman Muhammad Iqbal, and in 1940 Muhammad Ali JINNAH took over as leader of the Muslim League, later serving as Pakistan’s first head of state in 1947.

The abrupt division of British India into the new nations of Pakistan and India caused bloody riots and warfare among hundreds of thousands of Hindus and Muslims, who uprooted themselves to be among their own people. At independence, West Pakistan (present-day Pakistan) was separated from East Pakistan (now known as BANGLADESH) by approximately 1,000 miles of territory

under India's jurisdiction. Further, in 1947–48 divided Pakistan went to war with India over the mountain provinces of JAMMU and KASHMIR; disputes erupted again in 1965, but in December 1972 a boundary was firmly established.

Growing dissatisfaction in East Pakistan accused the government of favoring the West; although the East won a majority in parliament in December 1970, its legislature was not allowed to convene. In March 1971 East Pakistan declared itself independent as Bangladesh. West Pakistani troops were unsuccessful in their attempts to crush the rebellion, and they were defeated when India entered the war in December (see INDO-PAKISTANI WAR OF 1971). In February 1974, Pakistan was forced to recognize independent Bangladesh. Further tension broke out on the Pakistani border in December 1979, during the Soviet invasion of neighboring AFGHANISTAN. Zulfikar Ali BHUTTO, leader of the Pakistan People's Party, became president in December 1971; with the introduction of a new constitution (1973), he became prime minister. Bhutto followed a policy of Islamic socialism, strengthening relations with other Islamic (mainly Arab) countries and nationalizing key industries. He won reelection in 1977 but was overthrown in a coup led by Gen. Zia al-Haq, who assumed the presidency and declared martial law. Bhutto was executed. Because of his anticommunism, Zia received strong support from the U.S. Zia was killed when his airplane exploded in August 1988. Bhutto's daughter, Benazir BHUTTO, was elected president at the end of the year but faced severe economic and political problems. She was defeated in a 1990 election, and soon after charged with corruption. In 1998 following India's testing of nuclear weapons, Pakistan followed suit by conducting two underground nuclear tests. The United States promptly imposed economic sanctions on the two countries. In 1999 General Pervez MUSHARRAF overthrew the government of Prime Minister Nawaz Sharif and assumed the presidency. Since the start of the U.S. president George W. BUSH's "War on Terror," President Musharraf has attempted to cooperate with U.S. forces

seeking to capture the Saudi-born terrorist Osama BIN LADEN and his top associates in AL-QAEDA, while seeking to avoid angering his own Islamic constituency. In October 2005 a powerful earthquake in Pakistan killed almost 100,000 people and left more than 3 million people homeless as the frigid winter approached.

Pal, George (1908–1980) HOLLYWOOD producer-director of animated and science fiction films. Born in Hungary, he immigrated to the U.S. in 1939. Early in his film career he was primarily a cinema cartoonist. His series of "Puppetoons" for PARAMOUNT in the 1940s won him a special ACADEMY AWARD (1943) for his innovations in "stop-motion" animation techniques. In the 1950s he became one of Hollywood's foremost masters of science fiction and fantasy films. He won eight Academy Awards for the productions of such classics as *Destination Moon* (1950), *When Worlds Collide* (1951), *War of the Worlds* (1953) and *The Seven Faces of Dr. Lao* (1964). Perhaps his greatest achievement was his adaptation of H. G. WELLS's *The Time Machine* (1960), which he also directed and for which he realized many of the cinematic implications embedded in the original book.

Palade, George Emil (1912–) Romanian-American physiologist and cell biologist; educated at Bucharest University, he was a professor of physiology during World War II. Palade immigrated to America in 1946, becoming a naturalized citizen in 1952. He worked at the Rockefeller Institute for Medical Research, New York, becoming professor of cytology there (1958–72). In 1972 he became director of studies in cell biology at Yale University's medical school. Although Palade's work has been primarily concerned with studies of the fine structure of animal cells, he has also investigated the nature of plant chloroplasts. His discovery of small bodies called "microsomes," which function independently of the mitochondria (of which they were previously thought to be a part), showed them to be rich in ribonucleic acid (RNA) and therefore the site of protein manufacture. The microsomes were subsequently renamed ribosomes. For his work in cel-

lular biology, Palade received, with Albert CLAUDE and Christian DE DUVE, the NOBEL PRIZE for physiology or medicine (1974).

Palar, Lambertus N. (1902–1981) Indonesian statesman and diplomat, prominent in INDONESIA's struggle for independence. Palar served as Indonesia's chief delegate to the UNITED NATIONS from 1950 to 1953. Later he was ambassador to India, Canada and the U.S. A leading spokesman for the non-aligned nations of Asia and Africa, he denounced "neocolonialism," called for neutral and nuclear-free zones and advocated strong sanctions against SOUTH AFRICA because of that nation's policy of APARTHEID.

Palau This group of islands is part of the western Caroline Islands located in the western Pacific Ocean. The Palau archipelago is 458 square kilometers and consists of more than 200 islands, many of them coral atolls. Spain ruled the islands in the late 19th century but then sold them to Germany in 1899. At the outbreak of World War I the islands were seized by Japan, which was given a mandate over Palau by the League of Nations in 1920. The Japanese were removed during World War II, and in 1947 Palau became part of the UN Trust Territory of the Pacific Islands administered by the United States. Palau became a self-governing republic in 1981 but suffered from a troubled political history in the 1980s. The republic's first president, Haruo Remeliik, was assassinated in 1985, and the third president, Lazarus E. Salii, committed suicide in 1988 amid allegations of fraud. In 1994 Palau became an independent nation in free association with the United States, which is responsible for its defense, and a member state of the UN. In 2003 Palau signed the Comprehensive Test Ban Treaty.

Palchinsky, Peter Ioakimovich (1875–1929) Russian engineer and politician. During World War I Palchinsky was a leading member of the central war industries committee. Following the 1917 FEBRUARY REVOLUTION he was appointed the provisional government's deputy minister of trade and industry and defended the Winter Palace against the BOLSHEVIKS. A tech-

nical expert of GOSPLAN, he was accused of sabotage and shot at the beginning of the purges. He was said to have founded the underground league of engineering organizations.

Palestine Though there is no official Palestinian state at present, historically the biblical land of Palestine covered the general area of the modern State of ISRAEL and its occupied territories of GAZA and the WEST

BANK. Part of the OTTOMAN EMPIRE, Palestine became a British Mandate after WORLD WAR I until its partition into Arab and Jewish zones by the UNITED NATIONS in 1947. The Palestinians, Arabs who trace their origins to the biblical Palestine, have fought against Jewish settlement of the area, especially after the State of Israel was established in 1948. Feeling dispossessed of their land, thousands left during the Israeli War for Indepen-

dence (see ARAB-ISRAELI WAR OF 1948–49) and are scattered throughout the Middle East, with large numbers in JORDAN and the Israeli-occupied territories. Attempts to settle the problems of Palestinian displacement have failed, and Arab-Israeli tensions have escalated with wars in 1956, 1967, 1973, and 1982. The situation has been exacerbated by the PALESTINE LIBERATION ORGANIZATION (PLO; founded 1964), which has used terrorist attacks to push for Palestine's liberation, and by the INTIFADA, which broke out in the occupied territories in 1987. In 1988 the PLO acceded to a 1967 UN resolution, thereby implicitly recognizing Israel, renouncing terrorism and accepting a two-state solution based on Israeli withdrawal from the occupied territories. Although the PLO also declared the independent state of Palestine (recognized only by Arab states), the problem of a Palestinian homeland remains unresolved. The signing of the Oslo Accords by Israeli prime minister Yitzak RABIN and PLO leader Yasir ARAFAT in 1993 created the PALESTINIAN AUTHORITY (PA), an institution scheduled to receive greater domestic control over the Gaza Strip and the West Bank. In 1994 PA president Yasir Arafat relocated to the West Bank city of Ramallah. In 2000 U.S. president Bill Clinton hosted a meeting at Camp David between Arafat and Israeli prime minister Ehud BARAK which came very close to, but ultimately failed to reach, an agreement on the borders and political status of a proposed Palestinian state. Soon, a second Palestinian uprising (INTIFADA II) began, prompting the new hard-line Israeli prime minister Ariel SHARON to place Arafat under house arrest in Ramallah and break off all negotiations with the PA leader. After Arafat's death in 2004, Sharon reopened talks with the new head of the Palestinian Authority, Mahmond Abbas, on the basis of U.S. president George W. BUSH's "roadmap for peace." Sharon unilaterally withdrew Israeli military forces and settlements from the Gaza Strip in summer 2005, while resuming construction of a barrier separating Israel from the West Bank that incorporated several Jewish settlements along the western fringe of that territory.

PALESTINE

1917	British Balfour Declaration promising a national home for Jews in Palestine encourages Jewish immigration.
1922	Britain is given League of Nations mandate over Palestine.
1948	Britain leaves Palestine; State of Israel proclaimed in Tel Aviv.
1948–49	Israeli war of independence drives 780,000 Palestinians from their homeland.
1964	Palestine National Council (PNC), "a parliament-in-exile," is formed and establishes the Palestine Liberation Organization.
1987	Intifada (uprising) breaks out.
1988	PNC votes to support UN resolution 242 (1967), which recognizes Israel and calls for Israeli withdrawal from the West Bank and Gaza. It also declares the existence of an independent state of Palestine with Jerusalem as its capital; (December) with the PLO's renunciation of terrorism, dialogue is opened with the U.S.
1993	Oslo Accords create Palestinian Authority to govern portions of the West Bank and Gaza.
2000	Meeting of Palestinian Authority president Yasir Arafat and Israeli prime minister Ehud Barak with U.S. president Bill Clinton at Camp David fails to produce agreement on borders and political status of proposed Palestinian state.
2000	Second intifada begins.
2003	Israel reoccupies almost all of the West Bank.
2004	Yasir Arafat dies.
2005	Israel completes a full withdrawal from all settlements in the Gaza Strip.
2006	Hamas wins majority of seats in legislative elections, defeating the ruling Fatah party.

Jewish children on their way to Palestine after being liberated from Buchenwald Concentration Camp, 1945 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Palestine Liberation Organization (PLO) Coordinating organization, including several separate Arab groups, that aims at the “liberation” of PALESTINE from the Israeli regime and the creation of a homeland for Palestinians. It was widely considered the political spokesman and military arm of the Palestinian people. Founded in 1964, it is dominated by the Al Fatah guerrillas led by Yasir ARAFAT, who was named PLO head in 1969. The UNITED NATIONS recognized it as the legitimate Palestinian government in 1974. The group was forced out of Jordan in 1971, moving to BEIRUT, LEBANON, until expelled by the Israeli invasion of 1982. The PLO regrouped at its new headquarters in Tunis, Tunisia. In 1993 the Oslo Accords created the PALESTINIAN AUTHORITY (PA), a quasi-autonomous organization designed to govern increasing portions of the West Bank and Gaza Strip. The group has engaged in many acts of terrorism throughout the world in attempts to further its cause, but claims to have largely abandoned violence in favor of political action. After his death in 2004, Arafat was succeeded by Mahmoud Abbas.

Palestinian Authority (PA) The quasi-autonomous governing body of several predominantly Palestinian Arab

regions in the Israeli-occupied territories of the West Bank and the Gaza Strip. Created in 1993 as part of the Oslo Accords between the PALESTINE LIBERATION ORGANIZATION (PLO) and ISRAEL, the PA was designed to be the successor organization to the PLO, which renounced its historic hostility to the State of Israel and its open and tacit support of terrorist attacks upon Israeli citizens. According to the precepts of the Oslo Accords, the PA would control administrative and security affairs in several urban districts and their rural hinterlands inhabited by Palestinians in the West Bank and Gaza Strip. To facilitate the continued pacification of the territories under PA control, the accords permitted the PA to have a security force of 15,000, which had tripled in size by 2003. PA leader Yasir ARAFAT established his headquarters in the West Bank town of Ramallah, and the PA assumed political control of several West Bank cities and towns. Although the Oslo Accords did not establish a timetable for the creation of a Palestinian state, statements immediately following the Oslo Accords by Israeli prime minister Yitzhak RABIN and Arafat implied that, if the agreement proved successful, the PA would become the official government of a Palestinian state.

Between 1993 and 2003 Arafat functioned as the authority's president and prime minister and hand-picked the cabinetlike structure that oversaw the PA's administrative and security operations. Although Arafat scheduled, administered and won an election for the position of PA president in 1996, he indefinitely suspended future elections following his victory. In response to an outbreak of terrorist attacks on Israelis in 2001 (see INTIFADA II) and Israeli allegations that Arafat used the offices of the PA to mastermind such attacks, international pressure forced Arafat to remove himself from the prime ministry. He chose Mahmoud Abbas to replace him in this office. However, Arafat retained control over the appointment of cabinet officials and regularly limited the degree of influence Abbas exercised within the PA. This led to Abbas's resignation within a few months of his selection. Arafat then nominated Ahmed Qurei, the chief member of the PA's parliament, to replace Abbas in September 2003. After Arafat's death in 2004, Abbas was elected as his successor. In 2006 the militant Islamist Hamas organization won the majority of seats in the legislative election, defeating the ruling Fatah party, causing Qurei and his cabinet to resign.

Paley, William S. (1901–1990) U.S. broadcast entrepreneur. He created the CBS network out of a handful of ailing radio stations he purchased in 1928. The network branched out into television in the 1950s and was the dominant force in U.S. broadcasting into the 1970s. He signed such popular performers as Lucille BALL, Jack BENNY, Jackie GLEASON and Ed SULLIVAN, as well as newsmen Edward R. MURROW, William L. SHIRER, Howard K. Smith and Eric SEVAREID. CBS produced such popular successes as *Guns, Smoke, I Love Lucy*, *The Mary Tyler Moore Show*, *ALL IN THE FAMILY* and *M*A*S*H*. Paley was a noted socialite and art collector, as well as a powerful, and often ruthless, businessman.

Palme, Olof (1927–1986) Swedish premier. Born into an aristocratic family, Palme attended Kenyon College in Ohio and in 1951 earned a law degree at the University of Stockholm. In 1969, after serving in parlia-

ment and as a government minister, Palme became leader of the Social Democratic Party and then premier. For the next two decades he dominated Swedish politics. On the international scene, he was a vocal critic of the U.S. role in VIETNAM as well as of the Soviet invasion of CZECHOSLOVAKIA. On the domestic front, Palme levied high taxes to provide generous medical, educational and recreational programs for Swedish citizens. On February 28, 1986, Palme was assassinated by an unknown gunman as he and his wife were leaving a Stockholm movie theater, shocking Sweden and the world. An unemployed laborer named Carl Gustav Christer Pettersson was convicted of the crime, but his conviction was later overturned by a court of appeals.

Palmer, Arnold (1929–) U.S. golfer. A dominant golfer from the 1950s to the 1980s, he is one of the greatest golfers of all time. In 1981 the PGA championship trophy was renamed the Arnold Palmer Award. As golf became a popular televised sport, viewers watched Palmer's fans, dubbed "Arnie's Army," follow him through every round. His 60 tour victories included four Masters titles and a 1959 U.S. Open. The winner of 19 foreign titles, he played on six Ryder Cup teams and seven World Cup teams. As a member of the Senior PGA Tour, Palmer continued to play well, winning 10 Senior Tour tournaments until illness and age slowed him down after the beginning of the 21st century.

Palmer, Geoffrey (1942–) NEW ZEALAND politician; educated at the Victoria University of Wellington (B.A. in political science, 1964; LL.B., 1965) and the University of Chicago (doctor of laws, 1967). Before entering parliament, Palmer practiced as a solicitor and taught at Victoria University, the University of Iowa and the University of Virginia. He entered the House of Representatives at a by-election in August 1979 and became deputy leader of the LABOUR PARTY in February 1983. Palmer became deputy prime minister in 1988, heading the ministries of justice and the environment as well. He became prime minister in mid-1989. Palmer's tenure as prime minister, and his career as a member of Parliament, ended in Sep-

tember 1990. Following his departure from politics Palmer spent a year teaching political science at the University of Iowa in the U.S. and the Victoria University of Wellington in New Zealand. In 1994 he helped found Chen and Palmer, a legal firm in Wellington, New Zealand.

Palmer, Jim (1945–) American professional baseball player (1965–84, winner of the Cy Young award (1973, 1975, and 1976) and member of the Baseball Hall of Fame. In 1965, Palmer began his 20-year career with the American League (AL) team the Baltimore Orioles. During the 1966 season, he led the Orioles to the American League pennant, with a personal record of 15 wins and 10 losses and helped pitch his team to a World Series championship against the Los Angeles Dodgers. Palmer recorded impressive statistics for the 1970, 1971, 1972 and 1973 seasons, averaging 20 wins per season. He helped the Orioles win another World Series title against the Cincinnati Reds in 1970 and earned the AL earned run average (ERA) title and the Cy Young Award in 1973. Between 1975 and 1977, Palmer led all AL starting pitchers in wins and earned two additional Cy Young Awards in 1975 and 1976. In 1983 he won his third and final World Series with the Orioles, when he helped them defeat the Philadelphia Phillies in five games. During the 1984 seasons, after losing three games Palmer retired from the Orioles, with a career 2.86 ERA average and 2,212 strikeouts. In 1990, Palmer was elected to the Baseball Hall of Fame on the first ballot.

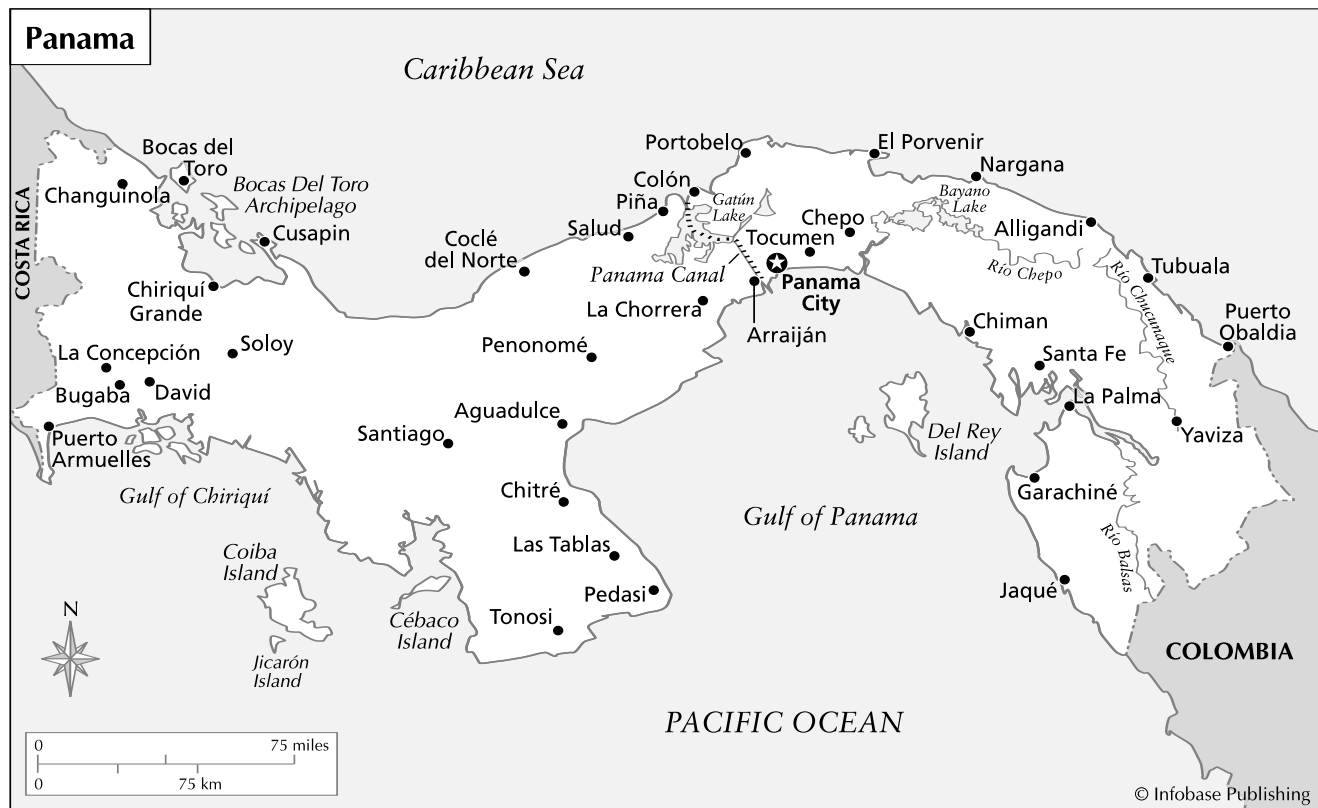

Palmer Raids See RED SCARE.

PAN (National Action Party) Mexican political party. Founded in 1939 by members of the INSTITUTIONAL REVOLUTIONARY PARTY (PRI) who were dissatisfied with their party's domestic policies, PAN has since emerged as a conservative political force in Mexican elections. Its appeal as a party in opposition to the continuously ruling PRI largely stemmed from PAN's pledge to end corruption within the Mexican federal and state governments, which PAN repeatedly accused PRI of tolerating, and in some cases, organizing. On

economic issues, it often exhibited a fiscal conservatism. For instance, PAN regularly called for the sale of certain government-owned and -run businesses, such as Mexican Petroleum (PEMEX), and also favored cutting government expenditures on social welfare programs. Although it competed with the PRI in national, state and local elections, PAN delegates in Mexico's national legislature regularly cooperated with the PRI leadership on some bills on which they have voted, such as the NORTH AMERICAN FREE TRADE AGREEMENT (NAFTA). On July 2, 2000, the PAN candidate for president of Mexico, Vicente Fox, became the first non-PRI candidate elected to that office.

Pan, Hermes (Hermes Panagiopolos) (1910–1990) U.S. choreographer. He created the dances for all but one of the 10 films starring Fred ASTAIRE and Ginger ROGERS in the 1930s and 1940s; among the films were *Flying Down to Rio* (1933), *Top Hat* (1935) and *Swing Time* (1936). He won an ACADEMY AWARD in 1937 for *A Damsel in Distress*. His other films included *Kiss Me Kate* (1953), *Cleopatra* (1963) and *My Fair lady* (1964).

Panama (Republic of Panama) Covering an area of 30,185 square miles, Panama is located on the southern part of the Central American isthmus, which joins North and South America. Much of Panama's history in this century has been dominated by its relationship with the UNITED STATES and the importance of the PANAMA CANAL (completed in 1914). With U.S. support Panama became independent from Colombia in 1903. Opposition to U.S. influence led to revisions of the Canal Treaty (originated in 1903) in 1936 and 1955 revoking U.S. rights of intervention in Panamanian affairs. Anti-U.S. sentiment led to riots in 1959. Politically unstable, Panama had elected governments overthrown in 1941, 1949, 1951 and 1968. Colonel Omar TORRIJOS came to power in 1968, initiating reforms and negotiating new canal treaties with the U.S. that abolished the Canal Zone and paved the way for transition of the canal to Panamanian control by the year 2000. General Manuel Antonio Noriega Morena, who rose to power in

the 1980s, was accused of political fraud and assassination and of ties to drug smuggling. Attempts to remove him from power culminated in the U.S. military invasion in 1989 and the installation of Guillermo Endara as president. Noriega surrendered in 1990 and in a trial in Miami, Florida, in 1992 was found guilty of drug trafficking and sentenced to 40 (later reduced to 30) years in prison. On December 31, 1999, Panama gained full control over the canal zone, and its first female president, Mireya Moscoso, was elected. In 2004 Martin Torrijos, son of Colonel Torrijos, was elected president but faced opposition in 2005 to his reform plans for the pension system.

Panama Canal Canal across the Isthmus of Panama, connecting the Caribbean Sea and the Atlantic Ocean with the Pacific Ocean. Some 50 miles long, the Panama Canal is one of the engineering marvels of the 20th century. It is also of immense strategic and commercial importance. The French attempted to dig a canal across Panama in 1881, but this effort failed because of disease (malaria), poor planning and lack of funds. The U.S.

obtained rights to dig a canal in 1901; when Colombia (of which Panama was then a part) refused permission to continue in 1903, U.S. President Theodore ROOSEVELT encouraged a successful Panamanian independence movement. Under the Hay-Bunau-Varilla Treaty between the U.S. and Panama, the U.S. obtained the 10-mile-wide PANAMA CANAL ZONE in exchange for \$10 million and an annual rent of \$250,000. Meanwhile, U.S. Army doctors Walter REED and William C. GORGAS took measures to eliminate the mosquitos whose transmission of yellow fever and malaria had plagued the earlier French effort. U.S. construction of the canal began in 1904. Because the sea level is not the same on the Atlantic and Pacific ends of the canal, three sets of locks had to be constructed to raise and lower ships as they pass from one ocean to the other. The canal was officially opened on August 15, 1914.

The U.S. ownership of the canal has often been a source of friction between Panama and the U.S. The PANAMA CANAL TREATY (1977) provided for the return of the Canal Zone to Panama; the canal was turned over to Panama in

1999. The U.S. exercised its right to protect the canal when U.S. forces invaded Panama in December 1989 to arrest Panamanian strongman Manuel Noriega. On December 31, 1999, the canal was transferred to Panamanian control. (See also PANAMA.)

Panama Canal Zone A strategically significant ribbon of territory 10 miles wide, stretching along both sides of the PANAMA CANAL. The zone was created in 1903 and assigned to U.S. supervision by treaty, but the surrounding country of PANAMA complained about this arrangement as early as 1926. American control of the zone was a sore point for Panamanian nationalists. In a move that caused controversy in the U.S., President Jimmy CARTER formally transferred the Canal Zone to Panama in 1978. On December 31, 1999, the canal was transferred to Panamanian control.

Panama Canal Zone Treaty Agreement of September 7, 1977, between U.S. president CARTER and Panamanian general Torrijos that the U.S. would evacuate its five-mile-wide zone (on each side of the PANAMA CANAL) on December 31, 1999. On December 31,

PANAMA

1903	Independence from Colombia.
1914	Panama Canal completed; U.S. accorded "sovereign rights" in Canal Treaty.
1925	U.S. troops land to protect U.S. interests during strikes and rent riots.
1936	Canal Treaty revised, rent paid to Panama increased, right of U.S. intervention revoked.
1959	Riots in Panama City protest U.S. flag flying in Canal Zone and not Panama flag.
1972	Brigadier General Omar Torrijos is vested with virtually unlimited power as "Supreme Leader of the Panamanian Revolution."
1977	U.S. promises to turn over canal zone to Panama by the end of 1999.
1980	Former shah of Iran is granted asylum, triggering demonstrations and student violence; shah is persuaded to leave for Egypt.
1988	General Manuel Antonio Noriega, head of Panama Defense Forces, indicted on drug charges in U.S.; President Eric Arturo Delvalle ousted by National Assembly after attempt to dismiss Noriega.
1989	Noriega captured in U.S. invasion of Panama; a Democratic Opposition Alliance candidate who lost election when results were annulled by Noriega, Guillermo Endara, is installed as president with U.S. support.
1992	Noriega is found guilty of drug offenses in a trial in the U.S. and is given a 40-year prison sentence.
1994	Ernesto Pérez Balladares is elected president.
1999	In national elections, Mireya Moscoso, widow of former president Arnulfo Arias and leader of the opposition Arnulfista Party, becomes Panama's first woman president. Panama gains full control of the Panama Canal Zone on December 31.
2004	Martin Torrijos, son of the former dictator Omar Torrijos, wins the presidential election.
2005	President Torrijos seeks to reform the funds-depleted social security system, sparking protests and strikes over proposed increases in pension contributions.

1999, the canal was transferred to Panamanian control.

Panamanian Revolution of 1903
By the Hay-Herrán Treaty, COLOMBIA was to lease the U.S. land across the

isthmus of Panama to build a canal. Colombian president José Manuel Moarroquín favored this action, but the Colombian congress rejected the treaty. Phillippe Jean Bunau-Varilla, who held canal-building rights, organized a revolt in PANAMA against Colombia on November 3–4, 1903. The rebels proclaimed independence, the U.S. cruiser *Nashville* deterred landing of Colombian troops to suppress the uprising and U.S. president Theodore ROOSEVELT recognized Panamanian independence on November 6, 1903, and received Bunau-Varilla as its minister. On November 18, 1903, the U.S. and Panama signed the Hay-Bunau-Varilla Treaty, giving the U.S. a lease in perpetuity of a 10-mile-wide strip of land across the isthmus for payments to Panama of \$10 million, plus \$250,000 annually.

Pan American World Airways (Pan Am) American airline, founded in 1927 by Juan TRIPPE. In the first few decades of its existence, Pan Am established important international air routes and made long-distance passenger air travel an everyday reality. In the late 1950s it was one of the first airlines to introduce jet service, and it was the first airline to have the BOEING 747 jumbo jet in regular service (1970). Following the deregulation of the U.S. airline industry in the 1980s, Pan Am suffered financial losses and ceased operation in 1991. Pan Am later became a regional airline focusing on low-cost flights from the United States to the Caribbean.

Pan Am 103 On December 21, 1988, Pan American flight 103 crashed near the village of Lockerbie, Scotland. All 244 passengers and 15 crew members aboard the 747 jumbo jet were killed in the crash, which also claimed the lives of 11 people on the ground. The flight had originated in Frankfurt, Germany, had stopped over at London's Heathrow Airport and was headed for Kennedy Airport in New York City when the disaster occurred. British and U.S. investigators soon established that the crash was caused by a plastic bomb hidden inside a radio cassette recorder placed in passenger luggage. It was further disclosed that the U.S. government had alerted airlines, airports and embassies in Europe of a threat to bomb

Pan Am planes flying from Frankfurt to the U.S. during this period, but that authorities had not informed the flying public. After the crash, responsibility was claimed by a pro-Iranian group calling itself the Guardians of the Islamic Revolution; investigators later identified a group called the Popular Front for the Liberation of Palestine-General Command as the likely criminals. The disaster provoked a tightening of airline security for U.S. airliners operating abroad. The bombing of Pan Am flight 103 is regarded as one of the most heinous of the many terrorist attacks on innocent civilians in the late 20th century. On May 3, 2000, a specially convened Scottish court began the trial of Abdelbaset Ali Mohamed al-Mergrahi and Al Amin Khalifa Fhimah, who stood trial for their involvement in the terrorist attack. The trial ended on January 31, 2001, with the Scottish judges in attendance convicting al-Mergrahi and sentencing him to life imprisonment. The same judges acquitted Fhimah and allowed him to return to Libya. Al-Mergrahi and his lawyers immediately appealed the verdict, but that appeal was denied in March 2002.

Pandit, Vijaya Lakshmi (1900–1990) Indian diplomat. She was the sister of the first prime minister of INDIA, Jawaharlal NEHRU. When the country gained its independence from Britain in 1947, Nehru appointed her ambassador to the USSR, a post she held from 1947 to 1949. She then served as ambassador to the U.S. from 1949 to 1952. She was the first woman to serve as president of the UNITED NATIONS General Assembly (1953–54). From 1954 to 1961 she was India's high commissioner to Britain. During the 1970s, she became alarmed by the authoritarian character of her niece Indira GANDHI's rule and became a staunch critic of the regime.

Pankhurst, Emmeline Goulden (1858–1928) British suffragist. With her husband, the barrister Richard Pankhurst, she founded the Women's Franchise League in 1889. When the LIBERAL PARTY failed to support women's rights, she formed (1903) the more militant Women's Social and Political Union. Joined in the movement by her daughters Christabel Harriette Pank-

British suffragette and women's rights leader
Emmeline Pankhurst, 1913 (LIBRARY OF CONGRESS,
PRINTS AND PHOTOGRAPHS DIVISION)

hurst (1880–1958) and (Estelle) Sylvia Pankhurst (1882–1960), she and other members engaged in a number of militant actions to further the cause. Repeatedly arrested, she used hunger strikes as a tactic. After the outbreak of WORLD WAR I, she devoted herself to the war effort. She moved to Canada after the war, returning to England in 1926. A revered figure in Great Britain, she died while running for election to Parliament a few weeks after full voting rights had been granted to women.

Panofsky, Erwin (1892–1968) German-American art historian. Born in Germany, he received a Ph.D. from the University of Freiburg and taught at the University of Hamburg from 1921 to 1933. Panofsky fled Germany and emigrated to the U.S., where he became a professor of fine arts at New York University and in 1935 joined the faculty at the Institute for Advanced Study, Princeton, New Jersey. One of the most important art historians of the 20th century, he took an early interest in the Italian Renaissance and gradually turned his attention to northern European art of the 15th and 16th centuries. A rigorous scholar, he was intensely concerned with the iconography of the various periods he studied. Among his many works are *Studies in Iconology* (1939, 2nd ed. 1962), *Albrecht Dürer* (1943,

4th ed. 1955), *Early Netherlandish Painting* (1953) and *Renaissance and Renascences in Western Art* (1960).

Papadopoulos, George (1919–1999) Greek military officer and political leader. A career officer, Papadopoulos attained the rank of colonel and was a member of the military junta that seized control of the Greek government in 1967. Resigning from the army, Papadopoulos became premier later that year and soon established himself as a harsh and dictatorial ruler. He became regent in 1972, abolished the monarchy and created a republic the following year and named himself president. An unpopular ruler, he was ousted by yet another military coup late in 1973.

Papagos, Alexander (1883–1955) Greek military and political leader, prime minister (1952–55). A career officer commissioned in 1906, he was appointed minister of war (1935) and army chief of staff (1936). Commander in chief of the Greek army in WORLD WAR II, he repelled invasion by Italy in 1940, but his forces were defeated by Germany in 1941. After the war he directed the 1949 campaign against communist guerrillas. Again appointed chief of the armed forces in 1950, he resigned to form the conservative Greek Rally Party and became prime minister in 1952. During his term in office, Papagos strengthened Greek ties with the West.

Papal States See the VATICAN.

Papandreou, Andreas (1919–1996) Greek political leader. Son of George PAPANDREOU, who served as GREECE's premier from 1963 to 1967, Papandreou immigrated to the U.S. in 1940, where he served in the navy and taught economics at the University of Minnesota and the University of California until returning to Greece in 1959. After his father became premier he renounced his U.S. citizenship and held several government posts, eventually enduring imprisonment and self-imposed exile when his father was overthrown in 1967. He returned to Greece in 1974 and founded a new political party that espoused controversial socialist ideas and opposed U.S. influence and military presence. He was elected premier in 1981, but lost the 1989 election because of

charges of misconduct and a marital scandal. Papandreou again served as prime minister from 1993 to 1996, when he retired from politics because of failing health.

Papandreou, George (1888–1968)

Greek statesman, three-time premier (1944–45, 1963, 1964–65). Born in Salonika, he became a lawyer and entered political life as an antiroyalist moderate socialist. He served as a member of parliament and was interior minister (1923), was exiled briefly in 1926 and then served in a number of government posts. Again exiled in 1936, he was active in the resistance movement and headed a Greek government-in-exile from 1944 to 1945. Returning to GREECE after WORLD WAR II, he held office in various Social Democratic cabinets from 1946 to 1952. In 1961 he formed the liberal Center Union Party, serving as premier for 55 days in 1963 and again becoming premier the following year. Disputes with King CONSTANTINE II led to his dismissal in 1965. In 1967, after a military coup d'état, Papandreou was arrested and briefly imprisoned. Constantly at odds with the government, he was placed under house arrest a number of times thereafter until his death.

Papen, Franz von (1879–1969)

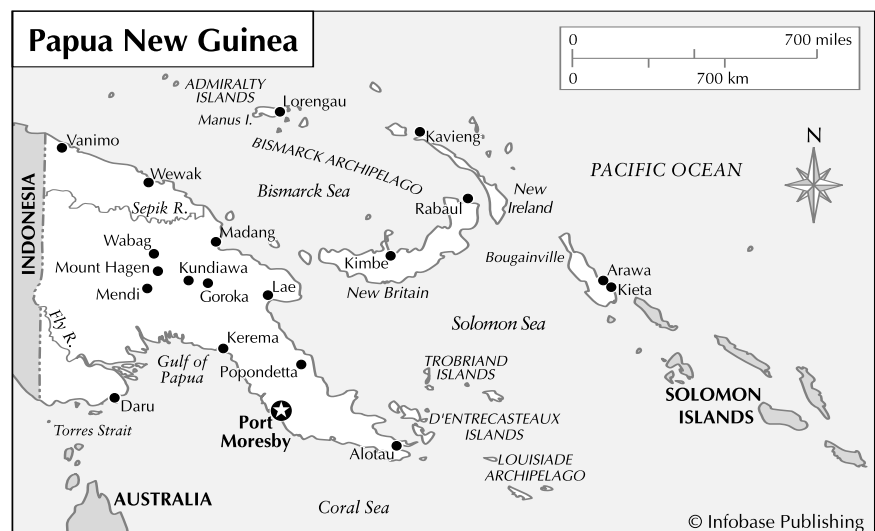

German politician. A military attaché to Washington (1913–15), he was posted to Turkey during World War I, after which he began his political career. A Catholic Center Party member of the Prussian parliament from 1921 to 1932, he was appointed chancellor by Paul von HINDENBURG in 1932 but was soon succeeded by Kurt von Schleicher. Remaining close to Hindenburg, von Papen was instrumental in persuading the aging president to name Adolf HITLER as chancellor in 1933, while Papen himself was appointed vice chancellor. Afterward, he served as German ambassador to Austria (1936–38), helping to prepare for the ANSCHLUSS. For the duration of WORLD WAR II he was ambassador to Turkey. Tried at the NUREMBERG WAR CRIMES TRIALS (1946), von Papen was acquitted, but he was later imprisoned by a German denazification court. He was freed in 1949. Von Papen's memoirs were published in 1952 (Eng. tr., 1953). (See also GERMANY.)

Papp, Joseph (Joseph Papirefsky)

(1921–1991) American theatrical director and producer. Born in New York City, Papp was trained at the Actor's Lab in Los Angeles. Since the 1950s he has been one of the most innovative and influential figures in American theater. In 1954 he founded the New York Shakespeare Festival, and in an attempt to make Shakespearean plays available to the general public he staged a variety of productions in Central Park from 1957 to 1962. In 1967 Papp founded the Public Theater, and in 1973 he was appointed director of the Vivian Beaumont and Mitzi C. Newhouse theaters at Lincoln Center. Papp was responsible for introducing a wide array of new playwrights, directors and actors in Broadway and off-Broadway productions. Among his most memorable plays are *Hair* (1967), a musical version of *Two Gentlemen of Verona* (1971), *That Championship Season* (1972), *A Chorus Line* (1975) and *Pirates of Penzance* (1980).

Papua New Guinea Nation in the southwestern Pacific Ocean, east of Indonesia and north of the northeastern tip of Australia. It occupies the eastern half of the island of New Guinea as well as a number of adjacent islands, including Bougainville in the Solomon Islands and New Britain in the Bismarck Archipelago. Much of this tropical country is mountainous and heavily forested, with exotic fauna and flora. In 1906 British New Guinea became the Territory of Papua, as control was transferred to

newly independent Australia. With the outbreak of WORLD WAR I, Australia also took control of German New Guinea, and in 1920 this became a LEAGUE OF NATIONS Mandated Trust Territory under Australian trusteeship. Following Japanese occupation during WORLD WAR II, the eastern half of New Guinea reverted to Australian control as a single colony, the Territory of Papua and New Guinea. In 1963 INDONESIA took control of Dutch New Guinea and incorporated it into the Indonesian state as the territory of Irian Jaya. Papua New Guinea achieved self-government in 1973 and full independence in 1975, with a parliamentary system of government. The country has been ruled by a series of unstable coalitions composed of political parties based on patronage rather than ideology. At independence Papua New Guinea faced serious secessionist threats. Problems of law and order led to the declaration of states of emergency in PORT MORESBY (the capital) in 1979 and 1985, and in the Highlands (where there was severe ethnic unrest) in 1979. Unrest resurfaced on Bougainville island in late 1988, when local landowners demanded compensation for damage done to their land by the island's giant copper mine. Bougainville separatists continued to struggle for independence despite the national government's agreeing to accept a transitional Bougainville government in 1994. Both sides signed a truce in 1997, and in 2001 promised to hold an islandwide referendum in Bougainville as early as 2011. Over 80 percent of the population of 3,800,000 is Papuan; less

PAPUA NEW GUINEA

1906	Britain transfers its rights to Australia, which renames the lands Papua.
1914	German New Guinea is occupied by Australia at the outbreak of World War I; from the merged territories, Papua New Guinea is formed.
1920–42	Papua New Guinea is held as a League of Nations mandate by Australia.
1942–45	Papua New Guinea is occupied by Japan.
1973	Achieves self-government.
1975	Papua New Guinea achieves full independence as a dominion within the Commonwealth.
1979	Owing to rioting, a state of emergency is declared in Port Moresby and the Highlands.
1988	The secessionists fight for the independence of the island of Bougainville.
1994	Fighting between the secessionists and the government ends when the opposing parties sign a peace agreement.
1997	A truce ends the hostilities.
2001	Both sides agree to hold a referendum in Bougainville by 2011.

than 15 percent is Melanesian, while Polynesian, Chinese and European minorities comprise the remainder.

Paracel Islands A group of 130 islands located in the South China Sea initially controlled by FRANCE (1932–54), then by VIETNAM (1954–74), and later disputed among China, TAIWAN, and Vietnam (1974–). The islands were originally claimed by French troops in Indochina for the construction of an advanced weather station. They were transferred to the control of the interim South Vietnamese government following the 1954 Geneva Conference that ended French control of Indochina. Between 1954 and 1974 the islands were administered by the successive governments of South Vietnam, until military forces from the PEOPLE'S REPUBLIC OF CHINA invaded the islands in 1974 and imprisoned the small South Vietnamese garrison on the archipelago. Since 1974 the island chain has been claimed by

Vietnam, Taiwan, and the People's Republic of China because of its abundant fishing waters and because geological surveys have indicated the presence of major natural gas and oil deposits on the ocean bottom surrounding the islands. The islands themselves have no indigenous inhabitants, although China has maintained small garrisons on the islands since occupying them. In July 2001, at the meeting of the ASEAN REGIONAL FORUM, Vietnam alleged that these military forces and their naval patrol boats were responsible for the illegal seizure of 17 Vietnamese fishing boats and the detaining of their collective crews of 200 men.

In 1997 China announced its plans to transform the island chain into a tourist attraction and has since improved the port facilities on two of the larger islands, Woody Island and Duncan Island. Chinese contractors began construction in the mid-1990s on a military airport to service the island

chain. The airport's construction was completed in 2001.

Parade Landmark French cubist ballet, the collaboration of impresario Serge DIAGHILEV, composer Erik SATIE, designer Pablo PICASSO and choreographer Leonide MASSINE. Begun in 1915, it was premiered by the BALLETS RUSSES at the Théâtre du Châtelet in Paris on May 18, 1917. The stage action depicts the street efforts by a number of circus performers—magicians, acrobats, cowboys and animals—to lure passersby into the show. Even if the pedestrians on stage are ultimately unimpressed by it all, the production itself exploded like a grenade in the face of the ballet world. Subsequent performances were jeered, and Satie almost came to blows with a hostile critic. Singled out for derision were Picasso's nine-foot-tall, wooden Cubist sculpture; costumes that included mobile skyscrapers; and Satie's use of sound effects in the orchestra—typewriters, police sirens and airplane engines. (See also CUBISM.)

Paraguay (Republic of Paraguay)

Located in central South America, Paraguay covers an area of 157,006 square miles. From 1900 to 1935 Paraguay suffered economic chaos and violence from power struggles between two opposing political parties. Paraguay was united only when it defeated Bolivia during the CHACO WAR (1932–35), fought over Bolivia's attempt to control the upper Paraguay River. The untimely death of popular president Marshall José Félix Estigarribia (1939–40) led to the provisional presidency of General Higinio Moringo, which ended in the 1947 revolts, leaving thousands dead. After six presidents in as many years, General Alfredo STROESSNER became dictator in 1954, establishing economic and political stability during his 35-year rule. He was overthrown in 1989, and new elections were held, bringing General Andrés Rodríguez to the presidency. Under a new constitution that was approved in 1992, the National Republican Association (Colorado) Party won the 1993 parliamentary and presidential elections. However, the government has been continually beset by corruption, leading to the resignation of President Raúl Cubas (1998–99), and the near impeachment of President

PARAGUAY

1904	Argentine-backed liberals take control from Brazilian-backed Colorado Party.
1932	Chaco War; Bolivia attempts conquest of huge jungle area with rumored oil reserves and access to navigable rivers; Paraguay holds out against an army three times the size of its own; economy is exhausted.
1935	Treaty with Bolivia; Paraguay gains territory, grants access to rivers.
1936	Army ejects liberals.
1939	War hero General Estigarribia elected; begins building state-dominated society in line with national traditions of authoritarianism.
1940	Estigarribia killed in plane crash.
1944	Paraguay allows wide activity by Axis powers, but still receives massive U.S. military aid.
1945	Declares war on Axis, just prior to end of war.
1947	Liberals revolt; thousands killed.
1954	After six presidents attempt to govern in six years, General Alfredo Stroessner seizes power; establishes brutal dictatorship.
1959	Invasion of exiles from Brazil and Argentina crushed; agreement with Japan brings settlers to forested regions.
1960	Stroessner cements ties with U.S., which aids development projects.
1961	Friendship Bridge completes first direct road link to Atlantic ports.
1973	World's largest hydroelectric project completed at Itaipu, in partnership with Brazil.
1980	Former Nicaraguan dictator Somoza, granted asylum by Stroessner, is assassinated in Asunción; relations with Nicaragua broken off.
1987	Under pressure from Catholic Church and U.S., Stroessner relaxes martial law.
1989	Military coup overthrows Stroessner; free elections put General Rodríguez, coup leader, in power.
1993	National Republican Association (Colorado) Party wins national elections.
1995	President Juan Carlos Wasmosy forcibly retires two senior military officials who question his authority.
1996	President Wasmosy dismisses General Lino César Oviedo for engaging in political activity; Oviedo refuses dismissal and is arrested for insurrection.
1997	General Oviedo wins the Colorado Party nomination for president.
1998	General Oviedo sentenced to 10 years in prison for coup attempt; Oviedo's running mate, Raúl Cubas Grau, is chosen Colorado Party candidate for president; Cubas is elected president and pardons Oviedo.
1999	Congress impeaches Cubas, who resigns and flees the country with Oviedo. Luis González Macchi becomes president.
2000	Julio César Franco of the Liberal Party is elected vice president, breaking the 50-year-old hold on power of the Colorado Party.
2003	Presidential elections won by the Colorado Party and Nicanor Duarte Frutos is sworn in. His predecessor, Luis González Macchi, is put on trial for corruption charges.
2004	Peasants invade landholding demanding redistribution. More than 400 are killed in Asunción shopping center fire.

Luis González Macchi (1999–2003) in 2002. In 2003 Nicanor Duarte Frutos was elected president and, in the same year, Macchi was put on trial for corruption. Disaster struck in 2004 when more than 400 people were killed in a fire at a shopping center in Asunción.

Paramount Pictures One of HOLLYWOOD's "Big Five" production/exhibition motion picture studios (along with METRO-GOLDWYN-MAYER, WARNER BROS., RKO and 20TH CENTURY-FOX). In 1912 Adolph ZUKOR, a furrier turned entrepreneur, incorporated the Famous Players Film Company, which successfully launched a series of prestige movie adaptations of popular stage plays, including *Queen Elizabeth* with Sarah BERNHARDT. In 1916 Famous Players merged with the Jesse L. Lasky Feature Play Company, which boasted a roster of stage and screen talent including David BELASCO, Samuel GOLDWYN and Cecil B. DE MILLE. (The Lasky-De Mille *The Squaw Man* [1913] had been one of the first

feature-length movies made in the Hollywood/Los Angeles area.) The distribution network for Famous Players-Lasky was Paramount, formed in 1914 by W.W. Hodkinson. By 1917 other production companies began releasing through Paramount, including Artcraft, which had two of the biggest movie stars in the world under contract, Mary PICKFORD and Douglas FAIRBANKS. Acquisition of more movie theaters began in the 1920s. Zukor took over the business operations in New York City and Jesse Lasky oversaw the productions in Hollywood. In 1930 the corporate name became the Paramount Publix Corporation. Although Paramount was by now one of the biggest studios in the U.S., GREAT DEPRESSION-related difficulties forced it into bankruptcy in 1933. Lasky was forced out. Zukor became chairman of the board when it was reorganized in 1935 as Paramount Pictures. The 1930s and '40s were Paramount's peak period as the studio continued the policy originated by Famous Players of

utilizing talent developed in other media, radio, recording, vaudeville and the legitimate stage. Top directors included Ernst LUBITSCH, Rouben MAMOULIAN, Josef von STERNBERG and Billy WILDER. Stars included Mae WEST, Jeanette MacDonald, the MARX BROTHERS, W.C. FIELDS, Bing CROSBY, Gary COOPER and Martin and LEWIS. Some of the most successful pictures were Preston STURGES comedies (*The Lady Eve*, 1941), musicals (*Holiday Inn*, 1942) and the Crosby-Hope "Road" pictures (*Road to Zanzibar*, 1943). Later releases included several Alfred HITCHCOCK pictures (*Vertigo*, 1958, and *Psycho*, 1960); the Francis Ford COPPOLA *GODFATHER* series; the *Star Trek* series; and the Indiana Jones series. In 1949, along with other major Hollywood studios, Paramount was forced by government action to divest itself of its theater chains. Gulf and Western Industries acquired the studio in 1966.

Pâris de Bollardière, Jacques-Marie-Roch-André (1907–1986) French pacifist. He was a hero of the French RESISTANCE during WORLD WAR II who became a general in the French army. He caused an uproar in 1957, when he asked to be relieved of his command in ALGERIA to protest the torture of Algerian rebels. In 1961 he retired from active duty and began to emerge as an outspoken pacifist. His participation in a 1973 protest expedition to France's South Pacific nuclear testing site of Mururoa led to his being struck from the French army reserve list.

Parish, Mrs. Henry (Sister) II (1910–1994) Leading American interior decorator best known for the development of an informal or casual style in large and often elaborate residential projects. Parish (widely known by the familiar "Sister," as she was called by her family) began practice in 1933 without formal training, taking on projects for friends and, as her reputation grew, for many wealthy and well-known clients. Her style was eclectic, her rooms comfortably cluttered with a profusion of antiques and accessories. During the 1960s she took on the redecoration of the White House for the KENNEDYS, working toward historic restoration with the use

of appropriate antiques and decorative elements. From 1962, Mrs. Parish continued in practice, with Albert Hadley as a partner, in the firm of Parish-Hadley Associates, Inc.

Paris Peace Accord (1973) A cease-fire agreement intended to end the VIETNAM WAR. The pact was formally signed on January 27, 1973, by representatives of the four parties directly involved in the conflict—the U.S., North Vietnam, South Vietnam and the VIET CONG. The battlefield truce went into effect at 8 A.M., January 28, Saigon time. The pact also called for the withdrawal of all American troops from South Vietnam, the communist release of all U.S. PRISONERS OF WAR and a four-nation commission to police the truce. It did not provide a political solution to the conflict, but allowed North Vietnamese troops to remain in the south and called for an eventual reunification of the country “through peaceful means.” The pact was worked out by U.S. National Security Advisor Henry KISSINGER, North Vietnamese foreign minister LE DUC THO and other negotiators at the Paris peace conference over a number of months. (Kissinger and Le Duc Tho were subsequently awarded the 1973 NOBEL PRIZE for peace. The choice met with much controversy.) Kissinger and Le Duc Tho initialed the plan on January 23. That day, U.S. president Richard M. NIXON announced the end of the war, calling the peace plan “an honorable agreement.” South Vietnamese

president Nguyen Van THIEU simultaneously announced the pact in South Vietnam but expressed doubt about the permanence of the agreement. Many historians believe that the Paris agreement was intended solely to allow an orderly, face-saving U.S. withdrawal from VIETNAM and to create the semblance of a peaceful solution. The last American troops were withdrawn on March 29, 1973. In January 1975 the North Vietnamese launched their final offensive, capturing SAIGON and forcing South Vietnam to surrender (April 30). The North Vietnamese thus achieved the victory they had sought from the beginning of the war.

Paris Peace Conference Multinational post-WORLD WAR I congress held by the victorious countries, 27 in all, led by the “Big Four”—Great Britain’s LLOYD GEORGE, France’s CLEMENCEAU, Italy’s Orlando and the U.S.’s WILSON. It convened on January 18, 1919, and held its last session on January 16, 1920. The results of this often tumultuous and conflict-ridden conference were embodied in a number of treaties that officially terminated the war and fixed postwar settlement terms for each of the defeated nations. They were the VERSAILLES TREATY (Germany), St. Germain (Austria), Neuilly (Bulgaria), Trianon (Hungary) and SEVRES (Turkey). The most significant of these, the Versailles Treaty of May 1919, forced Germany to admit its guilt in the war; severely limited German rearmament; ceded territory (Alsace and Lorraine restored to France, Prussian Poland and a majority of West Prussia to Poland); provided for many of the reparations demanded by France; placed the Saar and the Rhineland under allied occupation and called for a number of plebiscites in freed territories. The Paris Peace Conference largely rejected Woodrow Wilson’s FOURTEEN POINTS, but it did accept his proposed LEAGUE OF NATIONS, which was officially approved in April 1919. The conference was marred by the squabbling of countries that sought their own national goals rather than a reasoned consensus and by the forced lack of participation of the defeated powers, who came to bitterly resent terms that were not agreed upon by

all the parties but dictated by the victors to the vanquished.

Paris Peace Treaties Post-WORLD WAR II treaties signed in Paris on February 10, 1947, between the Allies and the principal European supporters of Germany. They were the result of a 21-nation Allied conference that began in July 1946. In separate documents, treaties were signed between the Allies and Italy, Romania, Hungary, Bulgaria and Finland. Terms of the treaties included the ceding of some territory by Italy, Finland and Hungary, colonial losses by Italy, the creation of Trieste as a free city and various border agreements. These terms were not harsh, largely because the nations involved had made separate peace agreements with the Allies and had opposed Germany by the time WORLD WAR II ended.

Paris student demonstrations Protest demonstrations held by French students in the spring of 1968 to protest the government’s large expenditure on the military and lack of funding for education and social programs and to demand curriculum reform. A massed group of students demonstrated on the Left Bank on May 2 and was attacked by police. Rioting ensued, with the students supported by workers, who staged the longest general strike in French history. The ferment did not cease until late June and almost destroyed the Gaullist government and the Fifth Republic. As a result of the demonstrations, the students were promised reforms and the workers were given a large pay increase.

Park Chung Hee (1917–1979) Korean general and politician; president of SOUTH KOREA (1963–79). Park began his military career in the Japanese army in WORLD WAR II. At the war’s end he joined the South Korean army. Rising to major general, in 1961 he led a coup that deposed the South Korean government. Park was elected president in 1963 and pursued a successful policy of economic modernization. However, intolerant of any dissent, he declared martial law in 1971 and imprisoned opposition leaders. A failed assassination attempt in 1974 killed his wife. In 1979 he was assassinated by the head of the Korean Central Intelligence Agency during a meeting.

U.S. Secretary of State William P. Rogers signs the agreement to end the Vietnam War, 1973. (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Parker, Bonnie See BONNIE AND CLYDE.

Parker, Charlie “Bird” (1920–1955) American alto saxophonist. Charlie Parker is a prime exemplar of the archetypal and inspired jazz virtuoso. His advanced technique, soaring sound and constant quest for extending jazzdom’s basic theme-and-variation approach led him to the sophisticated, post–World War II style best known as BEBOP. Parker’s musical roots were in Kansas City, whose easygoing, bluesy swing was based on slightly altered repetitions of “riffs,” or motifs. His unique contribution came with his capacity to invent ever new and complex motivic variations at innovatively brisk tempos; also significant was his ability to swing with a free-flowing yet insistent momentum. Indeed, throughout the 1950s, Parker’s transcendent solo style became the benchmark against which other improvisors were measured.

Historically, Parker and his fellow boppers are pivotal because of their role in transforming jazz from an essentially popular, big band dance music to a small group affair in which inspired, sound-of-surprise virtuosity became the prime value. Parker also contributed to the repertory of jazz standards with “Ornithology,” “Now’s the Time” and “Scrapple from the Apple.” In the conformist postwar period of the late 1940s–50s, Parker became a major cult figure, a larger-than-life icon whose genius was seen as expressed not only in his music, but also in an unorthodox and tragic lifestyle influenced by drug and alcohol addiction. Parker’s story is the subject of two important films, the documentary *Celebrating Bird* (1987) by Gary Giddins, and Clint EASTWOOD’s docu-drama feature, *Bird* (1988).

Parker, Dorothy (Dorothy Rothschild) (1893–1967) American poet, short story writer and one of the outstanding satirists and wits of her generation. While working as the drama critic for *Vanity Fair* magazine (1917–20) and theater critic/book reviewer for *The NEW YORKER* (1927–33), she became a legendary figure in the New York literary scene, noted for her acid quips and wry comebacks. A member of the famous Round Table of wits at the Algonquin Hotel during the 1920s and ’30s, she soon established a reputation for plangent lyrics and ironic short

stories, all beautifully crafted literary miniatures. Among her poetry collections are *Enough Rope* (1926), *Death and Taxes* (1931) and *Deep as a Well* (1936). Her short story collections include *Laments for the Living* (1930) and *After Such Pleasures* (1933), which contains “Big Blonde,” her single most famous story. Parker was also a playwright, screenwriter and correspondent. Her *Collected Stories* were published in 1942, the *Collected Poetry* in 1944.

Parks, Gordon (1912–2006) American photographer and filmmaker. After working as a photographer for the Farm Security Administration and for Standard Oil, Parks worked as a staff photographer for *Life* magazine from 1948 to 1968. In 1969 he directed the film based on his novel *The Learning Tree*, and in 1971 he began making his *Shaft* detective films, making him the first black director of major Hollywood releases.

Parks, Rosa (Rosa Louise McCauley Parks) (1913–2005) American Civil Rights heroine. Born in Tuskegee, Alabama, Rosa Louise McCauley attended the Montgomery Industrial School for girls and Alabama State Teachers College before marrying Raymond Parks and becoming an activist in the local chapter of the NATIONAL ASSOCIATION FOR THE ADVANCEMENT OF COLORED PEOPLE in Montgomery, Alabama. On December 1, 1955, she was arrested and fined for refusing to give up her seat to a white man on a municipal bus in the rigidly segregated city. The young pastor of the Dexter Avenue Baptist Church, Dr. MARTIN LUTHER KING, JR., organized a boycott of the city-owned bus company that dramatized the plight of black people in the Deep South and led to a Supreme Court decision that reversed her conviction and outlawed racial segregation in public transportation. The MONTGOMERY BUS BOYCOTT is regarded by most historians as the beginning of the modern Civil Rights movement in the United States. In later life Rosa Parks became a symbol of the opposition to racial discrimination in America. She was awarded the Presidential Medal of Freedom by President Bill CLINTON in 1996 and a Congressional Gold Medal in 1999. After her death in Detroit in 2005, her casket lay in

state in the rotunda of the United States Capitol, as thousands of admirers of her courageous act 50 years earlier paid their last respects to this early pioneer of the American Civil Rights movement.

Parra, Nicanor (1914–) Chilean poet. Educated at the University of Chile, Brown and Oxford, Parra has had a career as a teacher of mathematics and physics. His first book was *Cancionero sin nombre* (1937), but he achieved his fame with *Poemas y antipoemas* (1954), which has been translated both as *Antipoems* (1960) and *Poems and Antipoems* (1967). As an “antipoet”—a freewheeling iconoclast who seeks to deflate the intellectual pretensions of poetry as a form—Parra’s influence and stature in Chilean letters are second only to Pablo NERUDA, his collaborator for the prose work *Discursos* (1962). His *Obra gruesa* (1969) has also been translated as *Emergency Poems* (1972).

Parri, Ferruccio (1889–1981) Italian politician. During the 1930s Parri played a leading role in the underground opposition to Benito MUS-SOLINI. He later led the largest Italian partisan group in the guerrilla war against German occupation at the end of WORLD WAR II. He founded the short-lived Action Party and was named premier of ITALY in June 1945. His six-party coalition lasted only five months before two of the groups withdrew in protest over his plan to dismantle some large corporations. He was later a founding member of the Italian Republican Party. In 1963, as an independent leftist, he was appointed senator for life.

Parrish, Frederick Maxfield (1870–1966) American painter known for his murals and commercial illustrations. “The work of no American artist,” writes Coy Ludwig, “was . . . more familiar in the United States during the first three decades of this century than that of Maxfield Parrish.” Born in Philadelphia, Parrish traveled widely during his youth and received artistic encouragement from his father, entering the Pennsylvania Academy of Fine Arts in 1892. From his studio, “The Oaks,” in New Hampshire he took advantage of the flourishing print media

of the day. Around the turn of the 20th century he began producing the numerous book illustrations, calendars and posters that quickly established him as one of America's most prominent illustrators. His most famous book illustrations include those for Kenneth Grahame's *Dream Days* (1900), Eugene Field's *Poems of Childhood* (1904) and *The Arabian Nights* (1907). He regularly worked for such major magazines as *Harper's Weekly*, *Scribner's Magazine* and *Collier's*. His elegant whimsies contributed to the advertising of products such as Jello-O, Fisk tires and General Electric Mazda Lamps.

Parrish also dominated the art-print market. *Garden of Allah* (1918) and *Daybreak* (1922), for example, made him, as reported by *TIME* magazine in 1936, one of the three most popular artists in the world (with Van Gogh and Cézanne). His extraordinary murals, including the 18 panels he painted for the Curtis Publishing Company in Philadelphia, are among his most significant achievements. His work is distinguished by monumental, draped figures, Greco-Roman architectural elements—particularly pillars—luminous light (particularly the color blue) and a determined theatricality that balances the graceful with the grotesque. "My theory is that you should use all the objects of nature . . . as stage properties on which to hang your idea." He worked until his 91st year, when arthritis forced him to lay aside his brushes.

Parsons, Talcott (1902–1979) American sociologist and social theorist. Parsons's 46-year teaching career at Harvard University (1927–73) helped to mold three generations of sociologists. His theory of human behavior, once described as "vast and tangled, a veritable jungle of fine distinctions and intertwining classifications," was not fully understood by many sociologists.

Parti Québécois (Canada) Separatist political party in the province of Quebec, CANADA. The Parti Québécois (or PQ) rose to power in Quebec in the 1970s behind its energetic leader, René LEVESQUE. The separatist movement had gained momentum and some credibility when Charles de Gaulle, president of France, announced "Vive le Québec libre" during

a visit to Montreal. However, once in power the party's referenda to begin negotiations to secede from Canada were twice rejected by provincial voters, and the party lost the next election to the Liberals. A newer generation of PQ separatists tried to prevail where the older generation failed, in light of voter disappointment with the rejection of the so-called Meach Lake agreement that would have given Quebec a special status within the Canadian confederation. The Parti campaigned vigorously during a 1995 referendum on independence; however, the measure lost narrowly, with 50.58% voting to remain with Canada.

Partisan Review American literary quarterly, founded in 1934. The *Partisan Review* has long been one of the leading "little magazines" of America, but it exercised an especially great influence from the 1930s to the 1950s, when its liberal-to-left political viewpoints and its combination of sociological analysis and literary criticism made it an intellectual focal point. Coedited by Philip Rahv for over 30 years, its leading writers included critic Lionel TRILLING, poets Randall JARRELL and Delmore SCHWARTZ and fiction writer Saul BELLOW. In 2003 the *Partisan Review* created a controversy when it published "Tolerating Intolerance: The Challenge of Fundamentalist Islam in western Europe," which suggested that the presence of a large Islamic minority in western European nations was a potential future threat to the security of Western societies.

Partnership for Peace An intergovernmental organization created in January 1994 by members of NORTH ATLANTIC TREATY ORGANIZATION (NATO) to preserve and improve Europe's security and political and economic stability, both within the alliance and between NATO nations and the formerly communist states of eastern Europe. By 1997 the Partnership for Peace encompassed 27 states in eastern, central and western Europe. The partnership was originally designed to assuage Russian security concerns about the repercussions for Russian security interests of the admission of former WARSAW PACT members to NATO; it also provided for greater po-

litical and military cooperation between NATO forces and those former nations intent on preserving their independence from Russia. The partnership was put under strain by NATO's decision in 1997 to admit POLAND, the CZECH REPUBLIC and HUNGARY—three former Warsaw Pact members—to membership. Since then, the Partnership for Peace has helped reduce the animus between RUSSIA and NATO. The U.S., which strongly supported the addition of eastern European states in 1997, arranged for Russia's designation as a consultative member of NATO.

Partsalides, Dimitrios (1901–1980) Greek politician. Born in the Turkish port of Trabzon, Partsalides went to GREECE as a refugee after the GRECO-TURKISH WAR OF 1921–22. He became involved in the Greek communist movement in the 1930s. During the GREEK CIVIL WAR (1946–49) he was designated prime minister by the communist insurgent movement but never actually held the post.

Pascin, Jules (Julius Pincas) (1885–1930) American painter. Born in Vidin, Bulgaria, Pascin first became known for the sketches he did around 1903 for Munich's satirical newspaper *Simplicissimus*. He moved to Paris in 1905, settled in the U.S. and became a citizen in 1914. Pascin traveled widely and was a well-known bohemian figure in Paris, where he again settled in 1922 and where he committed suicide eight years later. He was a splendid draftsman, and his sensuous paintings have an elegant line and pastel tonality. Among his characteristic works are *Young Woman in Red* (1924, Musée d'Art Moderne, Paris) and *Ginette and Mireille* (1929, Petit Palais, Paris). Pascin was also a talented printmaker and book illustrator.

Pashtun A Pashto-speaking ethnic group in Pakistan and Afghanistan that assumed great political and diplomatic importance during the reign of the Taliban-controlled government of Afghanistan (1996–2001) and after the TALIBAN's overthrow (2001–). In Afghanistan, Pashtuns make up approximately 45 percent of the nation's population (and 11 percent of the population in Pakistan), making them the

most important constituency from which any government in AFGHANISTAN must derive support. During the civil war in Afghanistan between the Soviet-supported People's Democratic Party (PDP) and the various factions of the MUJAHIDEEN (1979–91), both sides were in large part dominated by Pashtuns. Between 1994 and 2001, key Pashtun elements lent their support to the Taliban, a political-religious movement that began in KANDAHAR and espoused ISLAMISM, which called for strict Islamic law throughout the country. Following the overthrow of the Taliban by American military forces in 2001, one of the key international concerns of American officials was to ensure that the successor government would obtain and retain the support of the Pashtuns. In an effort to curry favor among Pashtun communities, the U.S. supported the selection of HAMID KARZAI, an ethnic Pashtun living in exile among the Pashtun community of PAKISTAN, as the interim leader of the Afghanistan state.

Pašić, Nikola (1845–1926) Serbian statesman. He was trained as an engineer but soon turned to politics and was elected to the Serbian parliament in 1878. That year he formed the Serbian Radical Party, a group dedicated to the creation of a greater Serbia, which he headed for the rest of his life. Exiled from 1883 to 1889, he returned and became premier of Serbia in 1891, the first of many times he was to serve in that office. He was extremely powerful in Serbia during the years preceding WORLD WAR I and led the country throughout it. After the 1917 overthrow of the Russian monarchy, which he had supported, Pašić negotiated the formation of the Kingdom of the Serbs, Croats and Slovenes (later YUGOSLAVIA). A delegate at the PARIS PEACE CONFERENCE, he was the increasingly conservative premier of Yugoslavia during most of the years from 1921 until his death.

Pasolini, Pier Paolo (1922–1975) Italian director and writer. Often controversial, Pasolini was a gifted film director and writer who focused on the seamier side of life and used non-professionals to play his characters. He published his first novel, *Ragazzi di vita* (*Children of Light*), in 1954 and

wrote his first screenplay, for *Woman of the River*, in 1955. In 1961 he directed his first film, *Accattone*. International acclaim came with his award-winning film *The Gospel According to St. Matthew* (1964). Pasolini's evocation of the sensuality and richness of the medieval world was seen in *The Decameron* (1971), *The Canterbury Tales* (1972) and *The Arabian Nights* (1974). He was murdered in 1975.

Pass Laws Legislation in SOUTH AFRICA requiring black South Africans to carry passbooks (internal passports) at all times. Instituted in the 1950s, the laws severely restricted blacks' freedom of movement and were a source of black discontent. The pass laws were repealed in 1986.

Pasternak, Boris (1890–1960) Russian poet and novelist widely acknowledged as one of the greatest Russian writers of the 20th century. The son of the noted portrait painter Leonid Pasternak and his wife, pianist Rosa Pasternak, Pasternak grew up in a comfortable Moscow household. His parents entertained such famous figures as Leo Tolstoy, Rainer Maria RILKE and Aleksandr SCRIBIN, who made a lasting impression on the young Pasternak. Educated in Russia and at Heidelberg, he studied art, music and philosophy be-

Russian author Boris Pasternak (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

fore turning to literature. His first collection of poetry was *A Twin in the Clouds* (1914), but it was his third volume, *Sister, My Life* (1922), that established his reputation, which he was to maintain with many subsequent poetic works. Pasternak experienced the RUSSIAN REVOLUTION as an observer rather than as a participant, and for most of his life he remained as apolitical as he was prudent. During the 1920s and into the early '30s he received official approval to go with his critical acclaim. However, following differences with Joseph STALIN in the mid-1930s, Pasternak was unable to publish his own work for several years. (Stalin's apparent respect for and fear of Pasternak, whom he could have easily destroyed, remains one of the fascinating mysteries of the Soviet dictator's behavior.) During this time he occupied himself with translating the works of Shakespeare, Shelley and others into Russian. Sometime after WORLD WAR II Pasternak began writing the work for which he is best known in the West, the novel *DOCTOR ZHIVAGO*. The manuscript was smuggled into Italy for publication in 1957. Awarded the NOBEL PRIZE for literature in 1958, Pasternak was denounced by the Soviet government and forced to refuse the award. *Doctor Zhivago* remained unpublished in the USSR until 1987. Yevgeny Pasternak, the author's son, accepted his father's Nobel Prize medal at a ceremony in Stockholm on December 10, 1989. Among Pasternak's other books is *Safe Conduct* (1931).

Pastrana, Andrés (1958–) Conservative Colombian politician and president of COLOMBIA (1998–2002). After winning election to the Colombian Senate in 1991, Pastrana was defeated for the presidency of the country by Ernesto Samper in 1994. In 1998 he won election to the presidency based in part on his campaign promise that, if elected, he would meet with leaders from the Colombian leftist guerrilla group FARC, in an effort to end the ongoing civil war between the rebels and the government.

Pastrana and his subordinates repeatedly met with FARC representatives, and in November 1998 he agreed to give FARC a safe haven within Colombia roughly the size of Switzerland that would be completely free of

government interference. Although Pastrana's policies initially resulted in better relations between the government and FARC, by February 2002 FARC had resumed its insurgency, kidnapping high-level politicians. Pastrana responded with military strikes on FARC strongholds. Pastrana's valiant efforts to negotiate with the leftist guerrillas both improved Colombia's standing in the international community, and resulted in increased financial aid from the U.S., as President George W. BUSH proclaimed Colombia an ally in the "War on Terrorism." Barred constitutionally from seeking reelection, Pastrana was succeeded in the presidency by independent candidate Álvaro Uribe Vélez in 2002.

Pastrone, Giovanni (1883–1959) Italian motion picture pioneer, director and producer at the turn of the 20th century. Born in Montechiaro d'Asti, he began his film career in one of Italy's first studios, Rossi (later *ITALA FILMS*), in Turin. Quickly he distinguished himself as both a studio manager and a filmmaker. He created a chain of movie theaters throughout Italy to show the Itala product and with his one-reel *La caduta di Troia* (*The Fall of Troy*) displayed the traits that would make him world famous—a flair for spectacle and skill at handling crowds. His most important film was the feature-length *Cabiria* (1914), a landmark mixture of historical spectacle and revolutionary camera work that had an enormous impact upon the epic ambitions of American director D.W. GRIFFITH. Made under the nominal imprimatur of esteemed Italian playwright Gabriele D'ANNUNZIO, it established Italy as the dominant country in film production at the time. Its central character, the strongman "Maciste" (Bartolomei Pagano), starred in several subsequent Pastrone-directed vehicles. Under the pseudonym "Piero Fosco" he also directed several intimate chamber dramas, including *Hedda Gabler* (1919). He was Italy's first great impresario/filmmaker. Today he is less well-known for his technical innovations, which included camera supports and projection lamps. He left Itala Films in 1919 and retired from the business, devoting the rest of his life to medical research.

Patasse, Ange (1937–) Prime minister (1976–78) of the Central African Empire under Emperor BOKASSA. Patasse held a variety of cabinet posts from 1965 until he became prime minister in 1976. Ousted in July 1978, he formed an opposition council in exile in Paris. He later opposed President Kolinba and was again forced into exile. (See also *CENTRAL AFRICAN REPUBLIC*.)

Pathet Lao Communist guerrilla movement in LAOS. From 1954 to 1973 the Pathet Lao were involved in a civil war against pro-American, royalist army officers. Following the ceasefire of 1973 a royalist-communist coalition government held office until the communist victory in VIETNAM (1975) led to a complete communist takeover of Laos.

Paton, Alan Stewart (1903–1988) South African author. Paton was educated as a physicist and mathematician at the University of Natal and subsequently taught at various South African institutions. Paton established his reputation with his first and best-known novel, *CRY, THE BELOVED COUNTRY* (1948; filmed 1951), which was an early and eloquent plea for racial equality in SOUTH AFRICA. This was followed by *Too Late the Phalarope* (1953, adapted as a play, 1965), another successful social commentary in which a young, white South African is imprisoned because of his love affair with a black woman. Paton wrote many works of nonfiction, including *The Land and People of South Africa* (1955) and the autobiography *Towards the Mountain* (1980), before his next novel, *Ah, But Your Land Is Beautiful*, appeared in 1981. The novel, which depicts the beginning of the anti-apartheid movement, includes details about the Liberal Party of South Africa, of which Paton was founder and president from 1958 to 1968, when it was banned. A second volume of autobiography, *Journey Continued*, was published in 1988.

Patterson, Floyd (1935–2006) American boxer. In 1952 Patterson won an Olympic gold medal as a heavyweight. He then turned professional and began the three-year climb that would lead to a shot at the title left open by Rocky MARCIANO's retirement. He took the title in 1956 and successfully defended it until a 1959 loss to Ingemar Johans-

son of Sweden. The following year, Patterson became the first man ever to retake the title as he defeated Johansson in a rematch. He lost the title for the last time to Sonny Liston in 1962 but continued to fight until he was defeated by Muhammad ALI in 1972.

Patterson, William A. (1899–1980) American pioneer in the commercial aviation industry. Patterson was the first president of United Airlines (1934–66) and helped build the company into what at the time was the world's largest private airline. He introduced a number of major innovations that transformed passenger flying from a hazardous adventure into a routine occurrence. In the 1930s he introduced the use of female flight attendants and guaranteed monthly pay for pilots. In the 1950s he made United the first airline to commit itself to the jet aircraft.

Patton, George S(mith), Jr. (1885–1945) American general noted for his exploits during WORLD WAR II. Born into a distinguished military family in San Gabriel, California, he attended West Point, was commissioned in 1909 and commanded a tank brigade in France during WORLD WAR I. A swash-buckling figure and daring tactician, he became a master of armored warfare. During World War II he was a corps commander (1942–43) in the invasions of North Africa and Sicily. As commander of the 3rd Army (1944–45) after the invasion of NORMANDY, Patton spearheaded the brilliant sweep of American troops from Normandy, through France and into Germany. He was instrumental in stopping the

U.S. general George Patton (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

German offensive in the battle of the BULGE (December 1944–January 1945) and relieving the besieged American troops at BASTOGNE. He later sped across the Rhine, through Germany and into Czechoslovakia. Briefly military governor of Bavaria at the end of the war, he headed the 15th Army in 1945 but was fatally injured in an automobile accident soon after his appointment. Patton's brilliant record was somewhat marred by a much-publicized incident in which he slapped a combat-weary soldier during a hospital visit, an incident for which he later apologized. His unfavorable views on the USSR, then a U.S. ally, were also outspoken and controversial. Patton's memoirs, *War as I Knew It*, were published posthumously in 1947; his wartime service was later the basis of the motion picture *Patton* (1970).

Paul VI (Giovanni Montini) (1897–1978) Supreme pontiff of the Roman Catholic Church. Montini was born in Concesio, Italy, the son of a member of the Italian parliament who also edited a Catholic newspaper. Ordained as a priest in 1920, he was papal secretary of state from 1924 to 1954 and was subsequently named archbishop of Milan. In 1958 he became a cardinal. Montini—taking the name Paul VI—succeeded Pope JOHN XXIII in June 1963 and oversaw the final work of the ecumenical SECOND VATICAN COUNCIL that had been initiated by his papal predecessor. Paul VI broke with historical tradition by becoming the first pope to travel to non-European nations—including visits to Israel and India in 1964, the UNITED NATIONS headquarters in New York City in 1965, a tour of Latin America in 1968 and missions to Uganda in 1969 and Australia and the Philippines in 1970. As to matters of dogma, Paul VI was conservative on the controversial issue of birth control but advocated a liberalized usage of the vernacular in church ritual. He died of a heart attack in 1978.

Paul, Robert William (1869–1943) Pioneering British motion picture director, producer and inventor at the turn of the century. Born in Highbury, England, he studied engineering. Learning about the Edison recording and peep-show devices (the Kinetoscope and Kinetograph) used in America, he devised similar machines himself—

the first such machines in England. A year later, in collaboration with Great Britain's first cameraman, Birt Acres, he began experimenting and filming actualities and music hall acts. The effects of fast, slow and reverse motion, he claimed, were inspired in part from a novel by his friend H.G. WELLS, *The Time Machine*. By 1895 Paul was making short films in the first British film studio, located in North London, and projecting them in music halls with his own patented Theatrographe (later renamed the Animatographe). *The Twins' Tea Party* (1897) contains an early use of the closeup. A trick film called *The Motorist* (1905) has a simple plot where, in Paul's words, a motorcar eludes a pursuing policeman by climbing up the side of a house and "goes motoring right across the clouds, makes a friendly call on the sun . . . then resumes its cloudy journey, and reaches the planet Saturn." He made his last film, *The Butterfly*, in 1910 and then, disinterested in the growing sophistication of story films, retired from the business and spent his remaining years in instrument making.

Pauli, Wolfgang (1900–1958) Austrian-Swiss physicist; educated at the University of Munich, where he obtained his Ph.D. in 1922. After further study in Copenhagen with Niels BOHR and at Göttingen with Max BORN, Pauli taught at Heidelberg before accepting the professorship of physics at the Federal Institute of Technology, Zurich. Apart from the war years, which he spent in the U.S. at the Institute of Advanced Studies, Princeton, Pauli remained at Zurich until his death and was respected for his deep insight into the newly emerging quantum theory. His initial reputation was made in relativity theory with his publication in 1921 of his *Relativitätstheorie*. His name is mainly linked with two substantial achievements. The first, formulated in 1924, is known as the "Pauli exclusion principle." It follows from this that as an electron can spin in only two ways, each quantum orbit can hold no more than two electrons. Once both vacancies are full, further electrons can fit only into other orbits. With this principle the distribution of orbital electrons at last became clear, that is, it could be explained and predicted in purely quantum terms. For his introduction of the exclusion

principle, Pauli was awarded the 1945 NOBEL PRIZE for physics. Pauli's second great insight was in resolving a problem in beta decay—a type of radioactivity in which electrons are emitted by the atomic nucleus.

Pauling, Linus Carl (1901–1994) American chemist. Born in Portland, Oregon, he attended Oregon State Agricultural College and received a Ph.D. from the California Institute of Technology in 1925, teaching there until 1964. His early research dealt with the nature of chemical bonding and molecular structure, as he applied the quantum theory to chemistry. His ideas were published in the landmark scientific study *The Nature of the Chemical Bond* (1939). Pauling also conducted research on biological molecules. In 1940 he and Max DELBRÜCK introduced a molecular-based theory of antibody-antigen reactions, and later that decade he did extensive studies of sickle cell anemia. Using magnetic measurements, he studied the hemoglobin molecule, work that later led to extensive explorations of the helical structure of proteins conducted with R. B. COREY. In 1954 Pauling was awarded the NOBEL PRIZE for chemistry in recognition of his work on chemical bonding. After WORLD WAR II, he became increasingly concerned with the dangers of radioactivity and nuclear testing and actively campaigned against the U.S. testing program. He has also been a committed and vocal proponent of world disarmament and international peace, concerns he expressed in *No More War* (1958). He became one of the few individuals to win two Nobel Prizes when he was awarded the Nobel Prize for peace in 1962. In the 1960s Pauling developed an interest in the biological effects of large doses of vitamin C, advocating its use in preventing the common cold. He continued to conduct research on vitamin theory throughout the 1970s.

Pavarotti, Luciano (1935–) Italian tenor; one of the greatest bel canto singers of this century and perhaps the most popular tenor since Enrico CARUSO. Pavarotti was born in Modena and was originally a school teacher. After winning the first prize in the Concorso Internazionale in Reggio Emilia, Pavarotti debuted in that city as Rodolfo in PUCCINI's *La Bohème*, a role that is one

of his finest. He made his first appearance at Covent Garden in the same part in 1963 and at the Metropolitan Opera in 1968. His performances in the 1960s and '70s opposite soprano Joan SUTHERLAND were especially memorable. Specializing in the great lyric tenor roles, he was a featured singer at the Met, at La Scala and at many other major opera houses throughout the world. Among his other notable roles are Edgardo in *Lucia di Lammermoor*, Nemorino in *L'Elisir d'Amore*, Tonio in *The Daughter of the Regiment*, the duke in *Rigoletto* and Riccardo in *Un Ballo in Maschera*. A romantic leading man despite his considerable bulk and his wooden acting, Pavarotti is known as "the King of the High Cs." He is an enormously popular figure, with legions of loyal fans even among the non-opera-going public, and has starred in numerous television specials. In addition to singing in many opera recordings, he has also made solo albums featuring operatic selections, Neapolitan songs and Christmas music. Some critics have questioned his taste and dismissed his many galas and television extravaganzas as contrived media events. Nonetheless, Pavarotti has been almost universally acclaimed for the lyrical purity of his voice and the stylistic verve of his performances. In the mid-1990s Pavarotti collaborated with fellow tenors Plácido Domingo and José Carreras in releasing a series of recordings of all three men called *The Three Tenors*. In 2004 Pavarotti made his last appearance at the Metropolitan Opera in New York City. His vocal powers had been in decline for a number of years, and he had suffered from numerous health problems.

Pavese, Cesare (1908–1950) Italian novelist, poet, translator, and editor. Pavese was educated in Turin; he graduated in 1930 with a thesis on Walt Whitman, whose influence was evident in *Lavorare stanca* (1936, *Hard Labor*). After 1933 he was an editor and reader for a publishing house. In 1935 he was imprisoned by the fascists; confinement and solitude were prominent themes in his work. His first novel, *Paesi tuoi* (1941, *Your Country*) portrayed Piedmontese peasants, whereas his second, *La spiaggia* (1942, *The Beach*), was a portrait of the bourgeois Italian Riviera reminiscent of F. Scott FITZGERALD. His best novel was *La luna*

e ifalo (1950, *The Moon and the Bonfires*). His work reflects a transitional age as the rural Italian countryside gives way to modern technological urbanism. He translated his favorite book, *Moby-Dick*, as well as works by John STEINBECK, James JOYCE and Gertrude STEIN. Not long after his receipt of the prestigious Strega Prize, he committed suicide in a Turin hotel room. Many of his writings were published posthumously.

Pavlov, Ivan Petrovich (1849–1936) Russian physiologist; discoverer of the conditioned reflex. In 1870, Pavlov entered the University of St. Petersburg, where he studied chemistry and animal physiology. In 1883 he received his M.D. from the Medico-Chirurgical Academy, where he continued to work for virtually the rest of his life. Until 1902, Pavlov studied blood pressure and respiration in dogs and the animal's digestive system; for the latter work he received the 1904 NOBEL PRIZE for medicine or physiology. From 1902 until his death, Pavlov conducted his famous research on conditioned reflexes, a term he coined. Working again with dogs, Pavlov demonstrated that the animals had learned to associate certain stimuli (such as their attendant) with their feedings and had come to exhibit the same physiological responses to these stimuli as to the food itself. That is, the dogs demonstrated a learned, or conditioned, reflex in addition to their store of innate, or unconditioned, reflexes. Through these experiments, Pavlov believed he had established the fundamentally physiological nature of psychological phenomena, although he was never able to adequately explain the exact mechanism of the connection.

Pavlova, Anna Pavlovna (1881–1931) Russian prima ballerina. Having trained under Per Christian Johansson and Paul Gerdt at the Imperial Theater School, Pavlova danced with the Maryinsky Theater in 1899 and was made prima ballerina in 1906. In 1909 she joined DIAGHILEV'S BALLETS RUSSES, but in 1911 she left the company after becoming a traditionalist and rejecting the innovations of Diaghilev. She settled in London, formed her own company and toured extensively with it. She is considered one of the greatest prima ballerinas of all time.

Payne, Melvin Monroe (1911–1990) U.S. scientific research director. He served as an executive director and scientific research director with the NATIONAL GEOGRAPHIC SOCIETY for 55 years and was also the society's president (1967–76) and chairman (1976–87). He was chairman of the society's committee for research and exploration (1975–89), in which he supported such research as the underwater expeditions of Jacques-Yves COUSTEAU, Louis LEAKEY's search for early man in East Africa and Jane GOODALL's study of wild chimpanzees.

Payton, Walter Jerry (1954–1999) American football player. One of the greatest running backs of all time, Payton initially planned on a career in music, taking up football late in high school. During his college career at Jackson State University, he scored a record 464 points in an abbreviated three-and-a-half-year career. In 1975, he was drafted by the Chicago Bears, who went on to compile their first winning record in a decade. Two years later, Payton set a single-game rushing record with 275 yards, and later that year was named the league's most valuable player. He was near or at the top in all rushing categories, including touchdowns scored. Payton died in 1999 because his contraction of bile duct cancer made it impossible for him to receive a liver transplant. His NFL rushing record was broken in 2002 by Dallas Cowboys' running back Emmitt Smith.

Paz, Octavio (1914–1998) Mexican poet, critic, essayist, diplomat. Although Paz was born and educated in Mexico City, his world travels immersed him in many different cultural traditions. He published his first poems at the age of 17. In 1937 he visited Spain and was strongly affected by the SPANISH CIVIL WAR. In 1943–45 he traveled in the U.S. on a Guggenheim fellowship. In 1945 he met André BRETON and the surrealists in Paris (see SURREALISM). He entered the diplomatic service and was posted to San Francisco, New York, Paris, Tokyo, Geneva and Delhi. In the early 1970s he taught at Cambridge and Harvard. *Sun Stone* (1957) and *Blanco* (1966) are recognized as his finest poetry. His many influential prose works include *The Labyrinth of Solitude* (1950; revised

1959), *The Bow and the Lyre* (1956), *Quadrivium* (1965), *Alternating Current* (1967) and *Conjunctions and Disjunctions* (1969). Although he had left-wing sympathies, Paz was extremely critical of the USSR and Cuba. Paz was awarded the NOBEL PRIZE in literature in 1990.

Peace Corps Independent agency of the U.S. government, established by President John F. KENNEDY in 1961. The Peace Corps sends American volunteers to developing countries that request its services. These volunteers teach basic skills and give advice about such subjects as agriculture, engineering and nutrition. Often, volunteers directly participate in construction projects, planting and harvesting, or in the provision of medical care. Since it was founded, more than 170,000 Americans—many of them recent college graduates—have served two-year terms in the Peace Corps.

peaceful coexistence Term referring to the state of relations between socialist and capitalist countries. At the Allied Supreme Council at Cannes in 1922 the Allies endorsed Georgy Chicherin's co-existence thesis, stating that each nation should choose its own system of government and economy. KHRUSHCHEV pursued a foreign policy of so-called peaceful coexistence, acknowledging the existence of noncommunist social systems but believing that communism would ultimately triumph.

Peacock, Andrew (1939–) Australian politician. Educated at Melbourne University, Peacock entered the house of representatives in 1966 as the Liberal member for Kooyong. He held ministerial office in the closing years of Liberal domination in the late 1960s and early 1970s and again when the LIBERAL PARTY regained power in 1975. Between 1975 and 1980 he was minister of foreign affairs. When the Liberals lost power in 1983, Peacock succeeded Malcolm FRASER as Liberal leader; in 1985 he was removed by John Howard, after a bitter party feud, but in May 1989 returned to leadership of the Liberal Party. In 1996, when the Liberal and National Parties formed a coalition government, Peacock became the minister for foreign affairs. (See also AUSTRALIA.)

Peake, Mervyn Laurence (1911–1968) British writer, poet and artist. Peake remains best known as a writer of Gothic fantasy literature. His most famous work is the Gormenghast trilogy—*Titus Groan* (1946), *Gormenghast* (1950) and *Titus Alone* (1959)—which recounts the memories of Titus, the aging 77th earl of Groan, as he sits in his slowly crumbling ancestral castle. Critics have rated the Gormenghast trilogy as the only serious rival, in fantasy literature, to the Lord of the Rings trilogy of J.R.R. TOLKIEN. Peake was born in China, the son of a British medical missionary. He was educated at Oxford. In addition to his fantasy fiction, Peake was a poet whose volumes include *The Glassblowers* (1950) and *The Rhyme of the Flying Bomb* (1962). He was also a renowned book illustrator who illustrated his own works and produced illustrated editions of *The Rime of the Ancient Mariner* by Samuel Taylor Coleridge (1943) and *Treasure Island* by Robert Louis Stevenson (1949).

Pearl Harbor, Japanese attack on (December 7, 1941) At 7:55 A.M. on Sunday, December 7, 1941, a swarm of Japanese aircraft swooped out of the sky and attacked the U.S. naval and air bases at Pearl Harbor on Oahu Island, HAWAII. This attack was a complete surprise, although tensions between the U.S. and Japan had been building

The USS Arizona shown after the Japanese attack on Pearl harbor, 1941 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

up for some time (see WORLD WAR II). No one was prepared to do battle early on a Sunday morning in Hawaii, and for two hours the Japanese planes, aided by SUBMARINES and midget submarines, wreaked havoc on the U.S. fleet. Of the eight battleships present, three were sunk, another capsized and the remainder badly damaged; three cruisers, three destroyers and five other vessels were sunk or seriously damaged; and 247 planes, 175 of which were destroyed on the ground, were lost. Only 29 of the 360 Japanese planes were shot down before the rest returned to their distant aircraft carriers. About 4,500 persons were killed or wounded, including 2,300 U.S. military personnel. The next day the U.S. Congress declared war against Japan; U.S. president Franklin D. ROOSEVELT declared that December 7, 1941, was a "day that shall live in infamy." (See also WORLD WAR II IN THE PACIFIC.)

Pears, Sir Peter (1910–1986) British tenor. Pears was a founder member of the English Opera Group and an active director of the Aldeburgh Festival, which he cofounded with Benjamin BRITTEN and Eric Crozier in 1948. Britten created some of Pears's most notable roles, in such works as *Peter Grimes*, *Billy Budd* and *Death in Venice*. They were professional partners from the 1930s until the composer's death in 1976. Pears also participated in the premiers of such major nonoperatic works by Britten as the *Serenade for Tenor, Horn and Strings*, and the *War Requiem*. He was also an outstanding interpreter of music by other 20th-century British composers and of music by classical masters ranging from Heinrich Schuetz to Franz Schubert.

Pearse, Patrick Henry (Padraig Pearse) (1879–1916) Irish nationalist and revolutionary. Born in Dublin, Pearse was the son of an Englishman and an Irish woman. He was educated in law but became interested in Irish language and culture, which had been suppressed by the British. He became a schoolteacher and also edited *An Claidheamh Soluis*, the journal of the Gaelic League. In his writings, Pearse developed the idea of blood sacrifice, calling for the Irish to shed their blood in order to achieve independence from the British. In 1913 Pearse became ac-

tive in the paramilitary Irish Volunteers. He directed the group during the 1916 EASTER RISING against British rule and proclaimed IRELAND's independence from the steps of the General Post Office in Dublin. After the rebellion was put down he was tried by a military court and executed. Pearse is considered a martyr and national hero by many Irish, but his romantic ideas about the necessity of violence have been widely blamed for contributing to the allure of the IRISH REPUBLICAN ARMY and for impeding a peaceful solution to the troubles of NORTHERN IRELAND.

Pearson, Drew (Andrew Russell Pearson) (1896–1969) American journalist. As a staff member of the *Baltimore Sun*, Pearson became known in 1931 for his article “The Washington Merry-Go-Round,” on which he collaborated with Robert Allen. In 1932 the two started a column of the same name that specialized in exposing the private lives of public figures and unearthing government corruption. The enormously popular but not always completely accurate column was syndicated in 350 newspapers by 1942. Pearson conducted an exclusive interview with Soviet premier Nikita KHRUSHCHEV in 1961, and Pearson's influence was manifest when his exposure of the financial misconduct of Senator Thomas DODD led to Senate hearings and Dodd's eventual censure. When Pearson died in 1969, his column was the most widely read in the U.S. He was succeeded by columnist Jack ANDERSON.

Pearson, Lester Bowles (1897–1972) Canadian diplomat and statesman, prime minister of CANADA (1963–68). Born in Ontario, he attended the University of Toronto and Oxford. Entering the diplomatic service, he held a variety of posts and served as ambassador to Washington (1944–46). During his tenure in the U.S., he was Canada's adviser at the conferences at DUMBARTON OAKS (1944) and San Francisco (1945), playing an important part in the establishment of the UNITED NATIONS and leading Canada's UN delegation from 1946 to 1956. Also serving as Canada's secretary of state for external affairs from 1948 to 1957, he became the first Canadian to win the NOBEL PRIZE for peace (1957) in recognition

of his efforts in mediating the SUEZ CRISIS of 1956. An important figure in the COMMONWEALTH OF NATIONS, Pearson was also important in the formation of the NORTH ATLANTIC TREATY ORGANIZATION (NATO). He led the opposition in the Canadian parliament from 1958 to 1963 and after the Liberal victory in 1963 became prime minister, serving in that office until 1968. His books include *Democracy in World Politics* (1955), *Words and Occasions* (1970) and three volumes of memoirs (1972–75).

Peary, Robert Edwin (1856–1920) American explorer. Peary is famous for his discovery of the North Pole in 1909. A civil engineer in the U.S. Navy by profession, Peary made his first expedition to Greenland in 1891 accompanied by Matthew Henson, who was his assistant on all his Arctic expeditions. He discovered new land and proved that Greenland is an island. He failed twice to reach the North Pole (1898–1902; 1905–06) before achieving his goal in 1909. He led 24 men who guided 19 sledges pulled by 133 dogs over 400 miles of drifting ice floes. Finally on April 6, Peary, Henson and four Eskimos reached the Pole. A later controversy over whether Frederick A. COOK had reached the Pole first was settled in Peary's favor.

Pechstein, Max (1881–1955) German painter. He began his career as an apprentice to a decorative artist in 1896 and later taught art in Dresden. An expressionist, he joined DIE BRÜCKE in 1906. An interest in the exotic in art prompted him to visit the South Seas in 1913–14. A member of the Prussian Academy of Arts from 1922 to 1933, he was expelled by the Nazis, who condemned him as a “degenerate” artist and forbade exhibition of his work. Pechstein taught at the Berlin School of Fine Arts from 1945 until his death. His work is bold in color and composition, but less dramatic and more decorative than that of his fellow German expressionists. He is also well-known for his graphics and for the stained glass and mosaics that he executed late in his career. (See also EXPRESSIONISM.)

Pedersen, William (1938–) American architect. Educated at the Univer-

sity of Minnesota and the Massachusetts Institute of Technology and a winner of the Rome Prize in Architecture, he is the chief design architect at Kohn Pedersen Fox in New York City. He is known for contextual buildings that relate strikingly to their environments, relating them to their setting and their streets, and emphasizing human and social elements in their designs. He is best known for two office high-rise buildings on Wacker Drive in Chicago and for the Cincinnati headquarters for Proctor & Gamble. In 1998 Pederson received the National Architectural Honor Society's Gold Medal in recognition of his lifetime achievements in architecture.

Peerce, Jan (Jacob Pincus Perelmuth) (1904–1984) American operatic tenor and concert performer. Born in New York City, Peerce gained his earliest musical experience singing in a synagogue choir; he also studied violin and became an accomplished performer during his teens. However, his fame came as a principal singer at RADIO CITY MUSIC HALL (1932–40) and as a singer on the radio. In 1938 he made the first of many appearances with conductor Arturo TOSCANINI when he sang the tenor solo in Beethoven's *Ninth Symphony* with the New York Philharmonic. He made his opera debut as the Duke in *Rigoletto* with the Columbia Opera Company in 1938 and his Metropolitan Opera debut as Alfredo in *La Traviata* in 1941. For the next 26 years he sang with the Met and was guest artist with major opera companies in Europe, appearing in such roles as Edgardo in *Lucia di Lammermoor* and Rodolfo in *La Bohème*. He also appeared in films, including *Carnegie Hall* (1947) and on Broadway as Tevye in the musical *Fiddler on the Roof* (1971).

Pegler, (James) Westbrook (1894–1969) American newspaper columnist. Born in Minneapolis, Minnesota, Pegler was a working journalist by the age of 16. He wrote for the United Press for many years, then, in 1933, began writing his *New York World-Telegram* column “Fair Enough,” in which he caustically attacked public figures. Ultraconservative, Pegler lambasted Franklin D. ROOSEVELT and his NEW DEAL policies; yet he also showed his hatred for European fascists. In 1941

Pegler won a PULITZER PRIZE for his exposure of racketeering in labor unions. From 1944 to 1962 he wrote for King Features Syndicate and from 1962 to 1964 for the JOHN BIRCH SOCIETY publication *American Opinion*. In 1954, he lost a highly publicized libel case to writer Quentin Reynolds.

Péguy, Charles Pierre (1873–1914) French poet. Péguy, a Roman Catholic, was one of the major French poets of the first decades of the 20th century. Raised in abject poverty, Péguy succeeded in winning academic scholarships and thereby educating himself to take a major role in French literary life. In 1900 he founded the journal *Cahiers de la Quinzane*, which became the leading French literary quarterly of its era. An ardent patriot, Péguy wrote several lengthy prose poems that combined nationalistic fervor and Catholic piety. Some of these were translated into English as *Basic Virtues* (1943) and *Men and Saints* (1944). Péguy was killed during WORLD WAR I at the Battle of the MARNE.

Pei, I(eoh) M(ing) (1917–) Chinese-American architect. Born in Canton, he emigrated to the U.S. in 1935, studied at the Massachusetts Institute of Technology and Harvard University, where he taught from 1945 to 1948, and became an American citizen in 1954. In 1948 he moved to New York City, where he executed a number of major projects for Webb and Knapp. In 1955 he opened his own firm. His influential works, in which buildings are sensitively integrated into their surroundings, include Mile High Center, Denver (1956); Place Ville Marie, Montreal (1963); and Kips Bay Plaza apartments, New York City (1960–65). Noted for their monumentality, simplicity and beauty, Pei's other commissions include the National Center for Atmospheric Research, Boulder (1967); two buildings at M.I.T. (1964; 1970); the Everson Museum of Art, Syracuse, New York (1968); the East Building at the National Gallery of Art, Washington, D.C. (1978); the Bank of China Building, Hong Kong; and the Fragrant Hill Hotel, Beijing. One of his best known and most controversial structures is Le Grand Louvre in Paris (1989). This set of three glass and steel pyramids, one large and two subsidiary, covers an un-

derground visitors' center, stores and other facilities in the courtyard of the world-renowned Louvre Museum.

Pei, Mario (1901–1978) Italian-born linguist and educator. Pei, who was born in Rome, came to the U.S. as a youth and was educated at the City College of New York. A facility for languages led Pei to make the study of the history of human languages his special scholarly province. His major works include *The Story of Language* (1949), a widely read general survey, and *Words in Sheep's Clothing* (1969). Pei taught at Columbia University for over three decades and also served as a special adviser on language training for U.S. Army personnel.

Pei, Wenzhong (1904–1982) Chinese archaeologist. In 1929 he discovered the skull of Peking Man, estimated to be half a million years old. The discovery furnished the first strong evidence of man's evolution from less-advanced life forms.

Pele (Edson Arantes do Nascimento) (1940–) Brazilian soccer player. Considered to be the greatest soccer player ever, Pele is the only person to have played on three World Cup-winning teams (1958, 1962 and 1970). Discovered by Brito, a former Brazilian international player, Pele joined the Santos club in 1956 at 16. The following year he starred in Brazil's first World Cup triumph, scoring two goals in the final. During his career with Santos and Brazil (1956–74), he scored 1,216 goals in 1,254 games, the highest goal scoring rate in soccer history; his 1,000th goal was scored on November 19, 1969. Pele first played for Brazil in 1957; he retired from international play following the 1970 World Cup victory having scored a record 97 goals for Brazil. He played his final club game for Santos on October 2, 1974, but came out of retirement in 1975 to play for the New York Cosmos of the North American Soccer League. Pele retired on October 1, 1977, having scored 1,281 goals in 1,363 games. In 1999 the National Olympic Committees of the world voted Pele the premier athlete of the 20th century.

Pelée, Mount Volcano on island of MARTINIQUE in the West Indies. Mount Pelée erupted in 1902 and 1929. The

1902 eruption destroyed the entire town of Saint Pierre, along with all of its 40,000 inhabitant—except for one, a prisoner in the local jail.

Pelli, Cesar Antonio (1926–) American architect. Born in Argentina, he studied at the University of Illinois. He has devoted himself to a public architecture that “celebrates life,” creating large buildings that have a feeling of great lightness and an inherent humanity. From 1968 to 1976 he headed the architectural design division of Gruen Associates in California. Among the outstanding works of this period are the 1967 headquarters of Comsat in Clarksburg, Virginia, and of Tele-dyne in Northridge, California. In 1977 he opened his own office in New Haven, Connecticut, and became the chairman of the department of architecture at Yale. Among his notable later buildings are the World Financial Center, New York City, the Northwest Center, Minneapolis and the Pacific Design Center, Los Angeles.

Penderecki, Krzysztof (1933–) Polish composer. Associated with the avant-garde movement, Penderecki developed a highly individual style of composition in which he utilizes all resources of sound, such as shouting and striking the piano strings with mallets. He developed his own system of optical notation, using symbolic ideograms to indicate the desired sound. He has taught at the Superior School of Music in Cracow (1958–66), the Folkwang Hochschule für Musik in Essen, Germany (1966–68), and part-time at Yale University (since 1973). His best-known work is *Threnody in Memory of the Victims of Hiroshima* (1959–60). Other important works include the choral-orchestral piece *The Resurrection of Christ* (1971). Penderecki received several international honors throughout the 1990s, including the Great Cross of Merit from Germany (1999), and the United Nations Educational Scientific and Cultural Organization (UNESCO) International Music Council Award (1993).

Pendergast, Thomas Joseph (1872–1945) American politician and Democratic Party leader. He rose to power as a political boss in the Missouri Democratic Party after serving in various state po-

sitions. He aided in Harry TRUMAN'S U.S. Senate victory (1934), but was imprisoned in 1939 after being convicted for income tax violations; his political machine collapsed.

Pendray, G. Edward (1901–1987)

One of the founders of the American Interplanetary Society (later called the American Rocket Society). A science reporter for the *New York Herald Tribune*, Pendray was also a fellow member of the British Interplanetary Society, elected a few months after the society was formed in 1933. After visiting Europe in 1931 and observing the work of the German Rocket Society a month after it had successfully launched its first liquid-propellant rocket, Pendray urged the AIS to follow suit. The American Interplanetary Society launched its first liquid-propellant rocket May 14, 1933. The rocket cost a grand total of \$30.60 with an additional cost of \$28.80 for launch expenses. But Robert GODDARD, working independently, had already beaten the AIS to the punch and, by the time of the AIS launch, was already working on more advanced models of the liquid-propellant rocket.

penicillin Generic term for a group of antibiotic agents that were the first to be used in the treatment of bacterial infections in human beings. The effect of penicillin on bacteria was first observed by Sir Alexander FLEMING in 1929, but the substance did not become widely useful in clinical treatment until after it had been purified by various biologists, notably H.W. FLOREY and E.B. CHAIN, in 1941. Penicillin was first obtained from the *Penicillium notatum* molds observed by Fleming but is now more frequently produced from large, aerated fermentation vats of *P. chrysogenum*. Penicillin works by breaking down the walls of bacterial cells and is effective against many gram-positive bacteria. Penicillin has been used to treat syphilis, meningococcal meningitis, gas gangrene and pneumococcal pneumonia, as well as many staph and strep infections. Although some gram-negative bacteria, such as those causing gonorrhea, are susceptible to penicillin, most gram-negative infections cannot be treated by the antibiotic. However, such synthetic versions of the antibiotic as

ampicillin, methicillin and oxacillin have been used against both kinds of bacteria. The use of penicillin is limited by its tendency to cause allergic reactions in some people and by the ability of a number of microorganisms to become penicillin-resistant.

Penkovsky, Oleg (1919–1963) Soviet double agent. After serving in World War II, Penkovsky went to work for Soviet military intelligence. In 1961, he became a double agent for the West and began to pass top-secret information concerning Soviet military strategy and preparedness. His activities exposed in 1963, Penkovsky was tried by Soviet officials and sentenced to death. The information he provided is credited with helping to determine American responses to Soviet actions during the BERLIN WALL and the CUBAN MISSILE crises in the early 1960s.

Penn, Irving (1917–) American photographer. Born in Plainfield, New Jersey, Penn attended the School of Industrial Art in Philadelphia from 1934 to 1938. On the staff of *Vogue* magazine since 1943, he is best known for his dramatically stylish high-fashion photography. His work has been exhibited at a number of leading museums, notably the Metropolitan Museum of Art and the Museum of Modern Art, New York City.

Penney, J(ames) C(ash) (1875–1971) American department store tycoon. Penney founded J.C. Penney Company, Inc., in 1902. The company eventually operated more than 2,000 domestic and foreign retail outlets, including 1,700 stores in the U.S.

Penney, William George (1909–1991) Creator of the British ATOMIC BOMB. A mathematician and physicist who specialized in measuring the force of explosions, Penney was sent by the British to work with the U.S. team that was assembling the world's first atomic bomb in LOS ALAMOS, New Mexico, in 1944. Following its use of two atomic bombs against Japan in 1945, the U.S. ended its atomic weapons research collaboration with the British in 1946. Penney returned to England, where he began from scratch to design the first British atomic bomb, successfully tested in 1952. He later became direc-

tor of the British government's Atomic Weapons Research Establishment. He was made a life peer in 1967.

Pentagon Papers See *NEW YORK TIMES v. UNITED STATES*.

People v. Simpson See O.J. SIMPSON MURDER TRIAL.

Pepper, Claude Denson (1900–1989) American politician. A liberal Democrat from Florida, Pepper's congressional career began in the Senate, where he served from 1937 until 1951. During his Senate years, he was a close ally of President Franklin D. ROOSEVELT and a passionate advocate of such NEW DEAL programs as Social Security, health care insurance and minimum wage legislation. In 1951 he lost a bitter Democratic primary contest to a former protege who branded him "Red Pepper" for his supposedly pro-Soviet attitudes. Pepper returned to Congress in 1962, serving in the House of Representatives. In his later years he was a champion of legislation on behalf of the elderly. Shortly before his death, President George BUSH awarded him the U.S. Medal of Freedom, the nation's highest civilian award. At the time of his death he was the oldest member of the U.S. Congress. Congress voted to have his body lie in state in the Capitol Rotunda, an honor usually granted only to U.S. presidents and national heroes.

Percy, Walker (1916–1990) American author. Percy's novels portrayed the spiritual despair of upper-middle-class life in the post-World War II American South. Trained as physician and psychiatrist, he published his first book in 1961. That book, *The Moviegoer*, won him a National Book Award for Fiction. His later works included *The Thanatos Syndrome* (1987), *Love in the Ruins* (1971), *The Last Gentleman* (1966) and *The Second Coming* (1980).

Perelman, S(idney) J(oseph) (1904–1979) American humorist, author and scriptwriter. Perelman's brilliant talent for wordplay, spoofs and madcap comedy helped shape American humor in the 20th century. He wrote parts of the early MARX BROTHERS movies *Monkey Business* (1931) and *Horse Feathers* (1932). Among his

other credits were numerous essays, books, and plays. He wrote the book for the 1943 Broadway musical hit *One Touch of Venus* as well as the script for the ACADEMY AWARD-winning film *Around the World in Eighty Days* (1956). He also contributed short humor pieces to *THE NEW YORKER* magazine.

Peres, Shimon (1923–) Israeli political leader and prime minister (1984–86). Peres was born in Poland and immigrated to Palestine in 1934. He was educated at a youth village and at Tel Aviv University. During the 1948 war he was put in charge of naval supplies and then of major arms purchases. In 1965 Peres followed his mentor, David BEN-GURION, into the breakaway Rafi Party but later rejoined Labor and served as minister of communications and transport (1970–74). He was minister of defense from 1974 until Labor's 1977 election defeat. In 1984 he became prime minister in the government of national unity but handed over the post to Yitzhak SHAMIR in late 1986. An organization man with a flair for international public relations, Peres is renowned for his vision of ISRAEL as a technological power. He was the driving force behind the establishment of Israel's aircraft industry and its nuclear reactor in Dimona, and he is committed to the development of the country's electronics industry. Peres speaks fluent French and was the architect of the "French connection," leading to the secret pact with France and Britain before the Suez War and to Israel's acquisition of an unprecedented military arsenal. Peres became Israeli foreign minister following the July 1992 victory of the Labor Party in national elections. He helped negotiate the 1993 Oslo Accords, which allowed for limited Palestinian self-government in the West Bank and Gaza Strip. In recognition of his involvement in the Palestinian-Israeli peace process, Peres shared the 1994 Nobel Peace Prize with Israeli prime minister Yitzhak RABIN and PALESTINIAN LIBERATION ORGANIZATION (PLO) leader Yasir ARAFAT. Peres became prime minister following the November 5, 1995, assassination of Rabin and held that post until losing to Likud Party candidate Benjamin NETANYAHU in 1996. Peres began a two-year term as foreign minister in a government of national unity with

Likud prime minister Ariel Sharon. In 2003 he resigned his position to protest Sharon's support for the expansion of Jewish settlements in the occupied territories. In 2005 Peres was defeated for the leadership of the Labor Party by Amir Peretz. Peres later joined Prime Minister Sharon's new party, Kadima.

perestroika (Russian for "restructuring") Shortly after he came to power in 1985, Soviet leader Mikhail GORBACHEV acknowledged that the USSR faced grave economic problems. Under its traditional Marxist-Leninist policies, which emphasized central planning and control of all phases of production and distribution, the Soviet economy had stagnated. The country was burdened by a lethargic bureaucracy, inefficient state-run industries, poor quality of manufactured goods, lack of consumer products, food shortages and a generally low standard of living. Gorbachev stressed the need for wide-ranging economic reforms, some of which ran counter to the accepted Marxist-Leninist economic doctrine. These included opening the economy to market forces, allowing competition and a limited amount of private ownership. Gorbachev's program of perestroika was hailed in the West as a sign of movement away from the USSR's hard-line communist past, although Gorbachev seemed reluctant to abandon Marxist principles altogether. Given the continuing decline of the Soviet economy and the possibility of economic and political upheaval, many economists wondered whether Gorbachev's reforms would be too little and too late to revive the nation's economy. Boris YELTSIN and other reformers claimed that Gorbachev's approach was too cautious; they pushed for more radical reforms. As of early 1991, the fate of perestroika was uncertain.

Pérez Alfonzo, Juan Pablo (1904–1979) Oil minister of VENEZUELA and cofounder of the ORGANIZATION OF PETROLEUM EXPORTING COUNTRIES (OPEC). Pérez drafted the revolutionary policies that led to the nationalization of the Venezuelan oil industry in 1976.

Pérez de Cuéllar, Javier (1920–) Peruvian diplomat, UN secretary-general (1982–). Pérez de Cuéllar held various posts from 1944 to 1978. He

represented Peru at the UNITED NATIONS from 1971 to 1975 and was president of the Security Council in 1974. He served as undersecretary-general for special political affairs from 1979 to 1981. As secretary-general, in August 1988 he succeeded in negotiating a cease-fire between Iran and Iraq, ending the bloody IRAN-IRAQ WAR OF 1980–88. In January 1991 he went to Baghdad in a last-ditch effort to persuade Iraqi leader Saddam HUSSEIN to withdraw Iraqi forces from Kuwait by the UN deadline of January 15, 1991. Hussein rebuffed Pérez, and UN coalition forces led by the U.S. subsequently initiated OPERATION DESERT STORM against Iraq. His term as secretary-general expired in December 1991. He was succeeded by Boutros BOUTROSGHALI. He received the Presidential Medal of Freedom from President George H. W. Bush in 1991. In 1995 he failed to unseat Peruvian president Alberto FUJIMORI.

performance art Art form utilizing live performance as a medium. While the term *performance art* first came to prominence in the 1960s, the cabaret performances of DADA artists in the World War I era constitute the real beginning of performance art as an accepted cultural form. Performance art views itself as a form of visual art that uses human movement and theatrical effects, as well as spoken lines and music. In the 1960s, performance art played a key role in the HAPPENINGS of the era. Performance art is often a vehicle for social protest.

Perkins, Frances (1882–1965) American public official and U.S. secretary of labor. As part of his NEW DEAL reform program aimed at pulling the U.S. out of the GREAT DEPRESSION, President Franklin D. ROOSEVELT envisioned a stronger role for organized labor. The president shocked many by appointing Frances Perkins as secretary of labor in 1933, the first woman to be appointed to a cabinet post. Perkins had previously served as New York state's industrial commissioner under then-governor Roosevelt. In her influential post Perkins lobbied for strong labor legislation and oversaw the revitalization of the Department of Labor to enforce the new statutes. She served for the duration of the Roosevelt administration.

Perkins, Maxwell (1884–1947) Legendary American book editor. Born in New York City, he was educated at Harvard University and worked as a reporter for *The New York Times* before becoming an editor at Charles Scribner's Sons in 1910. There he became famous as an advocate of contemporary U.S. fiction. A sensitive reader with a superb ear for language and an uncanny ability to shape a brilliant but undisciplined manuscript into literature, he was important in editing and publishing the works of such eminent American writers as F. Scott FITZGERALD, Ernest HEMINGWAY, J.P. MARQUAND and Thomas WOLEE.

Perlman, Itzhak (1945–) Israeli-born concert violinist. Left permanently crippled from poliomyelitis at the age of four, Perlman overcame his handicap to become probably the best known violin virtuoso of his generation. After appearances on the *Ed SULLIVAN Show* (1959) and winning the Leventritt competition at CARNEGIE HALL in 1964, he performed with several orchestras, including the New York Philharmonic. Perlman toured the United States in 1965–66 and Europe in 1966–67. He has made many acclaimed recordings, often in collaboration with pianist Vladimir ASHKENAZY, violinists Isaac STERN and Pinchas Zukerman and conductor Zubin Mehta. He received a Grammy in 1978 for his album of Vivaldi's *The Four Seasons*. In addition, Perlman has taught and performed at the Aspen Music Festival in Colorado and has served on the faculty of Brooklyn College School of the Performing Arts (since 1975). He has been featured in numerous television specials. Perlman received the National Medal of Arts in 2000 from President Bill Clinton.

Perls, Frederick Solomon and Laura Posner Married couple, both German-born, who were the key founders of the psychological school of GESTALT psychotherapy. Fritz (c. 1894–1970) and Laura Perls (1905–90) met as university students in Frankfurt in 1930. They left Germany in 1933 to escape the emergent Nazi rule and, after a stay in South Africa, went to the U.S. in 1948. In the late 1940s and 1950s, they combined to produce a number of writings (sometimes published with only Fritz listed as the author) that es-

tablished gestalt psychotherapy as a leading influence on therapeutic practice in America and Europe. They also founded the New York Institute for Gestalt Therapy in 1952. The gestalt approach rejected the psychoanalytic emphasis on early childhood trauma to focus instead on the present-time patterns of perception and emotional attachments of patients. The Perls borrowed from the gestalt perception researches of German psychologist Kurt Goldstein as well as from EXISTENTIALISM and the theatrical acting-out techniques of psychodrama. Fritz became a widely known figure in the 1960s for his teaching work at the Esalen Institute in California.

Perón, Eva (Duarte de) ("Evita") (1919–1952) Argentinian political figure. Born Eva Duarte, she was a well-known actress before marrying Juan PERÓN in 1945. After Perón was elected president in 1946, the glamorous Evita, a superb public speaker, became the virtual coruler of ARGENTINA. The unofficial minister of health and labor and founder of the Eva Perón Social Aid Foundation, she was influential in securing voting rights for women and in providing educational and social reforms. She was particularly popular with Argentina's poor, many of whom regarded her as a near saint. Opposed by the military, she failed in an attempt to become vice president in 1951. Her death from cancer a year later was an enormous blow to Perón's first regime. Eva Perón's legend was perpetuated in the musical *Evita* (1976) by Tim RICE and Andrew LLOYD WEBBER. *Evita* was later adapted for a 1996 motion picture of the same name in which pop music star MADONNA played the title role, for which she received a Best Actress Golden Globe Award.

Perón, Juan Domingo (1895–1974) Two-time president of ARGENTINA (1946–55, 1973–74). Born in Buenos Aires, Perón became a professional military officer and, in travels to Germany and Italy, was impressed by the fascist regimes there. In 1943 he was an important figure in the right-wing coup that toppled President Ramón S. Castillo. After the installation of Edelmiro Farrell as president, Perón first became secretary of labor and social welfare, then minister of war and

vice president, thereby assuming the most powerful position in the ruling military junta. His support of labor unions and social reform won him widespread, almost fanatical, support among Argentina's workers. When the leaders of a 1945 coup imprisoned him, mass demonstrations by the *descamisados* ("shirtless ones") organized by his second wife, Eva Duarte PERÓN, won his release. He was subsequently elected president in the 1946 landslide. Perón's massive reform program, known as *PERONISMO*, was a mixture of strong nationalism and a fascist-influenced TOTALITARIANISM in which all opposition was quashed. His attempt to provide economic stability and self-sufficiency to the nation lost momentum in the late 1940s and early '50s, as demand for Argentinian wheat and beef waned and the economy lagged. The death of the enormously popular Eva in 1952 further weakened his position, disputes with the Roman Catholic Church led to his excommunication in 1955 and that same year he was deposed by a military coup. Fleeing the country, he settled in Spain in 1960. The hold of *peronismo*, which had united workers, nationalists, industrialists and the military, remained strong, and Perón continued to direct it from exile. In 1971 he returned to Argentina, and two years later he was again elected president. He died in office nine months later and was succeeded by his vice president, his third wife, Isabel Martínez de Perón. She was overthrown in a military coup in 1976.

peronismo (also called justicialismo) Political, economic and social program pursued by Argentinian dictator Juan PERÓN between 1946 and 1955. In some ways similar to FASCISM, it involved a five-year economic plan, extensive government control of economy and society and an end of British influence on the economy.

Perret, Auguste (1874–1954) French architect and engineer whose work moved French architecture toward MODERNISM early in the 20th century. Perret was born in Brussels and joined his father and brothers in the family construction firm. He was a student at the Ecole des BEAUX-ARTS in Paris and first became known for his 1903 apartment house at Paris' 25 bis, rue Franklin, a building that expresses its

reinforced concrete frame externally, while incorporating decorative tile ornament of an ART NOUVEAU character. The Théâtre des Champs Élysées of 1911–13 was completed by Perret with visible concrete framing. The emphasis on structure in these works places them in a historical line that leads directly to modernism. The church of Notre Dame du Raincy (1922–23) uses concrete framing with walls largely filled by modern stained glass—a striking and much imitated approach to a modern form of ecclesiastical architecture. His plans for the postwar rebuilding of Le Havre (1949–56) were among his last works. Perret's strong influence was extended by his role as a teacher in several ateliers and schools, including, in 1940, at the Ecole des Beaux-Arts.

Perry, Frederick John (1909–1992) British tennis player. A world-renowned player during the 1930s, Perry was the first player to win all four grand slam tournaments (although not in the same year)—he won Wimbledon (1934–36), the U.S. Open (1933–34), the French Open (1935) and the Australian Open (1934). He was the first non-American to win the U.S. Open and the first Britisher to win the French and Australian Opens.

Perse, Saint-John (Marie-René-Auguste-Alexis Saint-Léger Léger) (1887–1975) French poet and diplomat. Born in the West Indies, he and his family moved to France in 1899. A career diplomat, he was posted to the French embassy in Beijing, served at the 1921 arms limitation talks in Washington, D.C., and was secretary general of the French Ministry of Foreign Affairs from 1933 to 1940. A staunch opponent of FASCISM, he went into self-imposed exile in the U.S. from 1940 until the end of WORLD WAR II. His poetry is at once arcane and lyrical, difficult and evocative. Perse published his first poem in 1909. It was followed by the volumes *Eloges* (1911, tr. 1944) and *Amitié du Prince* (1921). He attracted his first significant critical attention with the publication of *Anabase* (1924), a symbolic history of humanity that was translated as *Anabasis* by T. S. ELIOT in 1930. His other volumes of verse include *Exil* (1944, tr. 1949), *Vents* (1946; *Winds*, 1953) and *Amers* (1957; *Seamarks*, 1958). Widely considered one of the most original

poets of the 20th century, he was awarded the NOBEL PRIZE in literature in 1960.

Pershing, John Joseph “Black Jack” (1860–1948) American general, commander in chief of the American Expeditionary Force in WORLD WAR I. A graduate of the Military Academy at West Point (1886), Pershing served in several Indian wars and in the Spanish-American War. He was adjutant general in the Philippine Islands (1906–13) and defeated the Philippine Moros in 1913. In 1916–17 he commanded the U.S. raid into Mexico against Pancho VILLA (see VILLA'S RAIDS). In 1917 President Woodrow WILSON chose Pershing to command the American forces in Europe. His army was never totally self-sufficient, but the Americans distinguished themselves in several major engagements, and Pershing returned to a hero's welcome in the U.S. in 1919. That year he was named General of the Armies, the first American general to hold that rank. Pershing later served as army chief of staff (1921–24). He won the PULITZER PRIZE for his memoirs, *My Experiences in the World War* (1931).

Persia See IRAN.

Persian Gulf (Arabian Gulf) During the 20th century the Persian Gulf region has gradually become one of the most sensitive parts of the world, both economically and militarily. The gulf itself is an arm of the Arabian Sea, extending some 600 miles from the Shatt el-Arab delta to the Strait of Hormuz.

General John Pershing, 1918 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Its maximum width is approximately 200 miles. The oil-rich nations of BAHRAIN, QATAR, the UNITED ARAB EMIRATES, SAUDI ARABIA, KUWAIT, IRAQ and IRAN all have some coastline on the gulf. Much of the oil exported from these countries is transported by tankers through the gulf. At the turn of the century, Britain was a dominant force in the region. An international agreement in 1907 formally recognized the gulf as part of the British sphere of influence. The realization in the 1930s that the gulf region contained the largest petroleum reserves in the world made the Persian Gulf a vital shipping lane. Regional conflicts in the last quarter of the century made the gulf a center of worldwide attention. The Islamic revolution in Iran (1979), the Soviet invasion of AFGHANISTAN (1979), the IRAN-IRAQ WAR OF 1980–88 and Iraq's invasion of Kuwait (1990) and the subsequent PERSIAN GULF WAR (1991) all emphasized Western and Japanese dependence on imported oil and underlined the strategic importance of the Persian Gulf.

Persian Gulf War Conflict (1990–91) between IRAQ and an allied coalition sponsored by the UNITED NATIONS and largely directed by the UNITED STATES. On August 2, 1990, on the orders of its dictator, Saddam HUSSEIN, Iraq launched a surprise invasion of the small neighboring country of KUWAIT. Kuwait was quickly overwhelmed and occupied, and Iraq announced that Kuwait was no longer an independent country but a province of Iraq. The occupying Iraqis systematically plundered the country. A number of nations, including the U.S., denounced the invasion and called for Iraqi troops to withdraw. The U.S. swiftly sent armed forces to SAUDI ARABIA to deter an Iraqi attack on that country; the U.S. operation, involving some 250,000 troops, was dubbed **Operation Desert Shield**. Other nations in the coalition who sent troops to the region included the UNITED KINGDOM, FRANCE, EGYPT and SYRIA; Saudi Arabia, as the host country for the coalition forces, also provided major facilities and manpower. The coalition forces were under the command of U.S. general Norman SCHWARZKOPF. In the following months, the UN passed a series of resolutions calling for Iraq's total withdrawal from Kuwait and imposing sanctions on that

country. In November 1990, President BUSH ordered more U.S. forces to the region, bringing the total of U.S. troops in Operation Desert Shield to some 500,000.

Bush also won international support for a UN resolution imposing a deadline of January 15, 1991, for the withdrawal of all Iraqi forces from Kuwait. If the Iraqis did not comply, the resolution authorized the U.S. and its allies to use force to remove them. After debate, the U.S. Congress also authorized the president to use force if necessary. Despite negotiations, including last-minute diplomatic moves by the USSR (which supported the resolution) to persuade Iraq to withdraw, Hussein refused to budge. Hussein warned that there would be dire consequences if his forces were attacked, implying the use of chemical weapons. Less than 17 hours after the UN Security Council's deadline expired, the U.S. and its allies—notably Britain and France—launched a massive air and missile assault on Iraq (January 16, 1991).

This attack was code-named **Operation Desert Storm**. Using high-technology equipment in combat for the first time—CRUISE MISSILES, laser-guided “smart” bombs and other ordnance—the Allies achieved rapid air superiority and scored hits against key military targets in Iraq. Although the Iraqis shot down several Allied aircraft, they otherwise put up little resistance; much of the Iraqi air force fled to Iran or to bases in the north. Hoping to bring ISRAEL into the conflict and split the Western-Arab coalition, Iraq also intermittently launched Soviet-built Scud missiles against Israel (as well as against Saudi Arabia). However, these did not cause any military damage, and the U.S. successfully persuaded Israel not to counterattack.

After six weeks of round-the-clock bombardment, the Allies launched a multipronged ground offensive against Iraqi forces in Kuwait and in Iraq (February 24). The Allies swiftly outflanked and overwhelmed the Iraqis; by the third day of the invasion, more than 50,000 Iraqis had surrendered. Hussein's much-vaunted Republican Guards—the elite Iraqi forces—failed to slow the Allied advance. However, the Iraqis did set fire to hundreds of oil wells in Kuwait and (earlier) also

dumped millions of gallons of crude oil into the Persian Gulf. These acts served no military purpose but caused the worst environmental contamination in history. Kuwait was liberated on February 27, and a cease-fire took effect on February 27–28. The destruction of Kuwaiti oil wells and Iraq's plundering of the country left Kuwait's infrastructure severely damaged. In the aftermath of the war, meanwhile, various rebel groups in Iraq attempted to overthrow Saddam Hussein, but by the end of 1991 Hussein had gained the upper hand against opponents of his regime.

Persian Revolution of 1906–09

Persia was in financial straits when the ailing shah succumbed to popular pressure for a constitution, signing the Fundamental Law in 1906, establishing a constitutional monarchy. He died soon after, succeeded by his son, Muhammed Ali (1872–1925). Using a Persian Cossack brigade formed with Russian help, Ali prorogued the assembly. A second assembly developed an absolutist constitution, without abrogating the previous one. Ali's reactionary prime minister was murdered, however, and a liberal prime minister upheld the 1906 document until his arrest in December 1907. The assembly was dispersed by Cossacks in June 1908. A third assembly abolished the 1906 constitution, after which Muhammed Ali attempted to rule absolutely. Rebellions erupted in Tabriz (1908), Rasht and Isfahan (1909), and despite Russian aid, Bakhtiari tribesmen and troops from Rasht captured Tehran in July 1909, forcing Ali's abdication in favor of his 12-year-old son, Ahmed Mirza (1898–1930).

Persian Revolution of 1921

Persia was on the verge of collapse, its ruler corrupt, when Reza Khan PAHLEVI (1877–1944), an army officer, led Cossacks in a coup d'état on February 21, 1921. Pahlevi made himself minister of war and commander in chief and gained control of the country. He introduced reforms, remodeled the army, induced the Russians to withdraw their troops (1921) and Britain as well (1923), became prime minister (1923) and, after gaining dictatorial powers, had the shah deposed (1925). In late 1925 he changed his name to Reza

Shah Pahlevi and founded the Pahlevi dynasty.

Person to Person Innovative American television interview program of the 1950s. Edward R. MURROW hosted the first six years of the show, from October 1953 to June 1959, and Charles Collingwood took over until the show's demise in September 1961. By contrast to Murrow's news-oriented *SEE IT NOW* program, *Person to Person* was a relaxed, informal visit via live television into the homes of celebrities. Wreathed in cigarette smoke, Murrow would sit in the studio before a wall screen and converse with celebrities conducting tours of their homes. The range of guests was amazing—politicians and world leaders like Fidel CASTRO and then-senator John F. KENNEDY, scientists like Margaret MEAD, authors like John STEINBECK, and entertainers like Marilyn MONROE. For all its avowed informality, the complexities of the live transmissions were enormous, and Murrow frequently seemed ill at ease. Purportedly, he did the show to ensure that *See It Now* could remain on the air. “To do the show I want to do,” he once said, “I have to do the show I don't want to do.” The series was seldom controversial, concludes historian Erik Barnouw, and depended upon “a *Vogue* and *House Beautiful* appeal, along with a voyeuristic element.” Needless to say, its ratings were always much higher than those of *See It Now*.

Pertini, Alessandro “Sandro”

(1896–1990) Italian politician, president of ITALY (1978–85). A hero of WORLD WAR II, Pertini was a founder of the Italian Socialist Party. As president of Italy, he was widely hailed for restoring credibility to the Italian government following a period marked by urban terrorism, economic troubles and corruption.

Peru Western South American nation, bordered by ECUADOR and COLOMBIA on the north, BRAZIL and BOLIVIA on the east, CHILE on the south, and the Pacific Ocean on the west. Its capital is Lima. Peru emerged from the 19th century involved in border disputes with its neighbors. In the early 1900s its politics were dominated by Augusto B. Leguía, who was president from 1908 to 1912 and again from 1919 to

1930. A virtual dictator, Leguía courted U.S. investments, with little regard for the economic welfare of the Peruvian people. During the 1920s a new political party, APRA (American Popular Revolutionary Alliance), was formed to fight imperialism and to better the treatment of the Indian population. By the 1940s it had taken hold, and in 1945 a free election was held. The elected government was toppled in 1948 in a military coup led by General Manuel Odria. APRA was temporarily banned, and Odria served as president from 1950 to 1956, when Manuel Prado, who had served as president from 1939 to 1945, was re-elected. The moderate Fernando Belaúnde Terry was elected in 1963

but was overthrown in a coup led by General Juan Velasco Alvarado in 1968. Velasco installed a military junta that was deposed in a bloodless coup in 1975 by his premier, General Francisco Morales Bermúdez, who promised a gradual return to civilian government. In 1980 elections were held, and Belaúnde Terry was re-elected. His government faced increasingly dire economic conditions and threats of a border war with Ecuador, but he managed to last out his term. In 1985 Alán García Pérez became president. A young Social Democrat, García Pérez set out to clean up the government and boost the economy by limiting its payment of foreign debt and price controls. In 1987 he announced

his intention to nationalize Peru's banks. García Pérez voiced support for the Sandinistas and was critical of U.S. policy in Central America. Peru continued to struggle with its economy—in 1987 and '88 there were widespread workers' strikes—and with Maoist insurgents such as the Sendero Luminoso (Shining Path) guerrillas. Peru is also a major grower of coca, which is used to produce COCAINE. In 1990 García Pérez was succeeded by Alberto Fujimori, who refused U.S. military aid and attempted to replace coca crops with other agricultural production. Fujimori cracked down on the insurgents and established an authoritarian regime, but his tenure in office ended prematurely in 2000 amid corruption scandals. He fled to Japan to a life of self-imposed exile in Tokyo. The government of Peru tried to extradite him from Japan, where he had become a citizen, to face charges of murder and kidnapping supposedly perpetrated during his days in power. In 2001 Alejandro Toledo is elected as Peru's first president of native Indian origin. A commission set up to investigate the 20-year war against the Shining Path rebels issued a report in 2003 claiming that over 69,000 people were killed in that time. Toledo was found guilty of electoral fraud in 2004, but was allowed to remain in office until his term expired in 2006.

Perutz, Max Ferdinand (1914–2002) Austrian-British biochemist. In 1937 Perutz began investigating the structure of hemoglobin, the oxygen-carrying protein of the blood. He set up the molecular biology laboratory at Cambridge University in 1946; seven years later, Perutz was still hard at work trying to find an underlying regularity in the structure of protein molecules. In 1953 he seized upon a solution by applying the isomorphous replacement technique, which alters the diffraction patterns of a molecule, making it easier to compute the positions of atoms. This technique allowed him to determine the structure of hemoglobin, which contains some 12,000 atoms. In 1962 he was awarded the NOBEL PRIZE in chemistry, along with his colleague John C. Kendrew, who conducted X-ray studies of the muscle protein myoglobin. After receiving the Nobel Prize, Perutz further refined his model of the

PERU

- | | |
|------|--|
| 1919 | Augusto Leguía becomes president and gives U.S. companies extensive rights to exploit Peruvian mineral and oil deposits. |
| 1924 | The American Revolutionary Popular Alliance is formed (APRA). |
| 1931 | Military junta led by Colonel Luis Sánchez Cerro takes over the country. |
| 1956 | Former president Manuel Prado (1939–45) becomes president and through austerity measures helps create economic stability. |
| 1968 | General Juan Velasco Alvarado in a self-styled military junta seizes power and institutes land reforms and nationalizes U.S. assets. |
| 1975 | General Francisco Morales Bermúdez takes over the country and institutes austerity measures in hopes of obtaining aid from the International Monetary Fund. |
| 1985 | Alán García, head of APRA, is elected president. As triple-digit inflation devastates wages and civil war is threatened, García declares a state of emergency. |
| 1990 | Alberto Fujimori, an agricultural engineer of Japanese descent who had no previous political experience, defeats novelist Mario Vargas Llosa, also a political novice, for the presidency. |
| 1995 | President Fujimori wins a second term. |
| 1996 | Fourteen rebels of Tupac Amaru Revolutionary Movement invade the Japanese ambassador's residence in Lima, taking hundreds of hostages. |
| 1997 | A commando attack ends the four-month embassy siege, killing all the rebels and rescuing alive 72 remaining hostages. |
| 1999 | Presidents Fujimori and Jamil Mahuad of Ecuador sign an agreement fixing a new border. Oscar Ramírez Duránd, the sole remaining commander of Shining Path, is captured. |
| 2000 | Fujimori is elected to a third term as president; while Fujimori is in Japan, opposition parties take control of congress; Fujimori resigns. |
| 2001 | In presidential elections, Alejandro Toledo is elected. |
| 2003 | A Truth and Reconciliation Commission report on atrocities during the 20-year war of the government against the Shining Path rebels affirms that approximately 69,280 people were killed. |
| 2005 | A four-day uprising by nationalist army reservists in the south fails. A congressional commission finds President Toledo guilty of fraud; Congress votes not to impeach. |

hemoglobin molecule, depicting how oxygen is transported in the blood.

Pessoa, Fernando (1888–1935) Portuguese poet and literary critic. Pessoa stands as the major Portuguese literary figure to emerge in the modern era. Relatively little of his work was published in his lifetime, and his critical reputation has grown slowly but steadily. Born in Lisbon, Pessoa was educated in South Africa after the death of his father. While there Pessoa became fluent in English. He wrote noteworthy verse in both Portuguese and English. A poetical technique for which Pessoa is especially noted is the use of heteronyms, or alternative authorial personalities, resembling the verse personae of Ezra POUND. As a literary critic, Pessoa was influenced by the tenets of FUTURISM. His books of verse include *Antinous* (1918), *Inscriptions* (1920) and *Mensagem* (1935).

Pétain, Henri-Philippe (1856–1951) French army officer and head of France's VICHY government during WORLD WAR II. A graduate of the military academy at St. Cyr, he was commissioned in the infantry in 1878 and subsequently taught at the Ecole de Guerre. In WORLD WAR I he became a military hero, stopping German advances at the battle of VERDUN (1916). Appointed commander in chief of the French forces in 1917, he was promoted to the rank of marshal the following year. After the war he was posted to MOROCCO, where he joined Spain in the campaign against ABD EL-KRIM (1926). After the fall of FRANCE in 1940, Pétain was recalled from his post as ambassador to Spain and made vice premier. Succeeding Paul REYNAUD as premier, he concluded an armistice with GERMANY and assumed the title of chief of state in the new Vichy government of occupied France. Pétain sought an "honorable" collaboration with Germany in order to protect French citizens and prisoners, but his status as hero crumbled as harsh fascist policies were brought to bear. At the end of 1941 he dismissed Prime Minister Pierre LAVAL, who urged total collaboration with the Nazis. However, the following year, at the Germans' insistence, he was forced to recall Laval to office. Laval assumed the bulk of power, and Pétain became a virtual figurehead. After the defeat of Germany

in 1945, Pétain was tried for treason, found guilty and sentenced to death. That penalty was commuted to life imprisonment by Charles DE GAULLE, and Pétain died in prison.

Peter II (1923–1970) King of YUGOSLAVIA (1934–45). Yugoslavia's second and last king, he succeeded to the throne under the regency of his cousin, Prince Paul, after the assassination of his father, King Alexander. Peter assumed power in 1941 after a coup d'état overthrew the regency. Weeks later he was forced to flee his country for England when GERMANY invaded Yugoslavia (see WORLD WAR II IN THE BALKANS). After the war, in 1945 TITO's communist regime abolished the monarchy and deposed Peter. The ex-king settled in the U.S., where his autobiography, *A King's Heritage*, was published in 1955. He died in the U.S. 15 years later.

Peter, Paul & Mary American folk group. Comprised of Peter Yarrow, Paul Stookey and Mary Travers, the group's roots are in the protest movement of the 1960s, even as their political activism continues today. Their early albums, such as *Peter, Paul & Mary* (1962) and *In the Wind* (1963), influenced such artists as Bob DYLAN. Among their hit singles in the early 1960s were such songs as "If I Had a Hammer" and "Puff the Magic Dragon," a perennial children's favorite. They had an unexpected number-one hit in 1969 with the romantic ballad "Leaving on a Jet Plane."

Peter Pan Long-running fantasy play by Sir James BARRIE about a boy who refused to grow up and ran away to a life of adventure in the Never, Never Land. The play has been an international success since its first English production on December 27, 1904, with Nina Boucicault in the title role. The first American production quickly followed on November 6, 1905, with Maude ADAMS. It has been estimated that in its first 50 years in England alone the play was presented over 10,000 times. The genesis of the play is long and complex. It contains scenes and characters from Barrie's boyhood in Kirriemuir and Dumfries, Scotland. Peter himself was a composite of the four children of Arthur and Sylvia Davies, whom Barrie

had met in Kensington Gardens in 1898 and with whom Barrie remained closely associated the rest of his life. The character first appears by name in Barrie's novel for adults, *The Little White Bird* (1901), and was later developed in 1903 under the title *The Great White Father*. The title was changed from the 1904 premiere.

The central roles of Pan and Captain Hook have attracted numerous stage and screen luminaries over the years. Traditionally, Peter has been played by an actress, and the list includes Maude Adams, Margaret Lockwood, Jean Arthur, Mary MARTIN and gymnast Cathy Rigby. Since Gerald Du Maurier first played Hook, the role has been taken on by the likes of Charles LAUGHTON, Alastair Sim, Boris KARLOFF and Cyril Ritchard. Barrie rewrote the play in novel form in *Peter and Wendy* in 1911. In America producer Herbert Brenon adapted it for the movies in 1924 with Betty Bronson in the title role. Subsequent versions include a musical version by Leonard BERNSTEIN in 1950, the Walt DISNEY animated film in 1953 and the Mary Martin television/stage musical in 1954, which has undergone several revivals with other actresses.

"Peter Principle" A rule that states that every employee tends to rise to his or her level of incompetence, then remain there. The principle was set forth and popularized in the satirical best-selling book *The Peter Principle: Why Things Always Go Wrong* (1969) by Canadian educator and psychologist Peter J. Laurence. The book explained that if an employee does a good job, he or she is repeatedly promoted until he or she eventually reaches a level where he or she cannot do the work—and there he or she remains. Although the "Peter Principle" was conceived tongue-in-cheek, it undoubtedly has a large element of truth.

Peters, Roberta (Roberta Peterman) (1930–) American coloratura soprano. Born in New York City, Peters spent her teenage years studying voice, languages, dancing and drama. By age 19 she had learned 20 opera roles. Her first professional appearance and Metropolitan Opera debut came unexpectedly when, with six hours notice, she sang the role of Zerlina in *Don*

Giovanni (1950). Over the next quarter century Peters excelled in the bel canto repertory at the Met. Her most distinguished and often-sung roles (in addition to Zerlina) included Gilda in *Rigoletto*, Queen of the Night in *The Magic Flute* and Despina in *Così fan tutte*. Peters has also won the Bolshoi medal (usually given to Russian artists only), sung at the White House six times, been a highly successful recitalist and made numerous recordings and TV appearances. Since her two-year term as a member of the National Council on the Arts (1991–93) Peters has received several honors, including the National Medal of Arts presented to her by William Jefferson CLINTON in 1998 and New York City's Handel Medallion presented to her in 2000 by New York City Mayor Rudolph GIULIANI in recognition of her cultural contributions to the city.

Peterson, Forrest (1922–1990) U.S. test pilot. Peterson flew the X-15 in five flights between 1960 and 1962 to a top altitude of 101,800 feet and was the only Navy pilot to fly the experimental rocket plane. Having spent four years in the program, Peterson left in 1962 to pursue what became a highly successful career in naval aviation, during which he served as captain of the aircraft carrier USS *Enterprise*, commander of the Sixth Fleet's Carrier Group Two and vice chief of naval operations for air at the Pentagon. He retired in 1980.

Petlyura, Semyon Vasilyevich (1879–1926) Ukrainian patriot who worked tirelessly to gain independence for the UKRAINE. In 1905 Petlyura helped found the Ukrainian Social Democratic Workers' Party. Having served in the Russian army in World War I, in 1917 he joined the Ukrainian central council, and was minister of defense in the first Ukrainian government. In 1920 he fought not only the Red Army in the north but also the anti-Soviet forces of General Anton Ivanovich DENIKIN. He spent some months in Warsaw, but after the peace of Riga he moved his government to Paris and was assassinated by a communist agent.

Petri, Elio (1929–1982) Italian film director and a leader of the neorealist movement in cinema. His 10 films sat-

irized Italian society and challenged the established political order. Among his best-known films were *The Working Class Goes to Heaven*, which shared the Grand Prize at the 1972 CANNES FILM FESTIVAL, and *Investigation of a Citizen Above Suspicion*, which won the 1970 ACADEMY AWARD for best foreign film.

Pevsner, Anton (1886–1962) Russian constructivist artist. Having spent a year at the St. Petersburg Academy of Art in 1910, Pevsner went to Paris and then Norway, where he painted in the cubist style. In the early 1920s Pevsner began working on constructions and, together with his brother Naum GABO, joined the antiproductionist group Inkhuk.

Pevsner, Nikolaus Bernhard (1902–1983) German-born British architectural historian and critic. He established his career at the University of Göttingen. When Adolf HITLER became chancellor in 1933, Pevsner escaped from NAZI GERMANY to England, where he lectured at Cambridge and Oxford Universities and at the University of London. He was best known for editing the monumental 46-volume series *The Buildings of England* (1951–74).

P-40 See FLYING TIGERS.

Pham Van Dong (1906–2000) North Vietnamese official. Born in the French protectorate of Annam, which later became part of North Vietnam, Pham Van Dong was a close associate of HO CHI MINH both before and after the FRENCH INDOCHINA WAR OF 1946–54. During the VIETNAM WAR, he served as minister of foreign affairs and later as prime minister of North Vietnam. In July 1976 he was named prime minister of the newly unified Socialist Republic of VIETNAM.

Phantom of the Opera British and American musical stage production (1986–). On October 9, 1986, Andrew Lloyd Webber premiered *Phantom of the Opera* at Her Majesty's Theater in London. An adaptation of a novel by Gaston Leroux, *Phantom* chronicled the obsession of a disfigured opera connoisseur in 1861 who lived in the catacombs of the Paris Opera House, became obsessed with a young singer and understudy named

Christine and endeavored to advance her career through a variety of underhanded methods. In January 1987 *Phantom* opened on Broadway in New York City and proceeded to win seven Tony Awards, including Best Musical, at the 1987 ceremonies. It continued a long run on Broadway, and with the closing of *Cats* in 2002, it holds the distinction of being the current longest-running Broadway show in New York City. Since its debut, it is estimated that over 52 million people have seen *Phantom* in New York and London, as well as performances by touring companies throughout the world. Additionally, *Phantom's* total box office sales have exceeded \$3 billion, making it the most profitable musical in history.

Phao Sriyanond (1910–1960) Thai army leader of the 1947 coup that restored Field Marshal Pibul Songgram to power in THAILAND. He served as chief of the Thai national police from 1947 to 1957. In 1957 he was exiled by Field Marshal Thanarat for alleged secret dealings with the government of communist CHINA. He spent the remainder of his life in Switzerland.

Phat Huynh Tan (1913–1989) Vietnamese communist leader. He was the chief theoretician of the VIETCONG, the communist-led political movement in South Vietnam that was backed by North Vietnam during the VIETNAM WAR. Following the communist victory in South Vietnam (1975), he became one of the few South Vietnamese to hold a leadership position in the HANOI government.

phenomenology School of philosophical thought that emerged in the early 1900s. Phenomenology—literally, the study of phenomena—has had a tremendous influence on psychology, sociology, theology, historical analysis and literary criticism in the 20th century. The key figures behind its formulation in the first decades of the century were three Germans—historian Wilhelm Dilthey, philosopher Edmund HUSSERL and sociologist Max Scheler. Phenomenology borrowed from 18th-century philosopher Immanuel Kant the notion of phenomena (perceived and experienced reality) as being distinct from noumena (ultimate

reality). Phenomena alone may be comprehended by human observers. The method of phenomenology emphasized that the task of an intellectual observer was to achieve a reconstructive identification with the phenomena under study, with the understanding that perfect objectivity was impossible while blatant bias was to be shunned. Phenomenology had a major influence on EXISTENTIALISM.

Philby, H(arold) A(drian) R(us-sell) “Kim” (1912–1988) British-born Soviet spy, considered the most notorious double agent of the COLD WAR, if not of the 20th century. Philby was educated at Cambridge University in the early 1930s and recruited there as a Soviet KGB agent in 1933. He joined the British intelligence agency MI6 at the outbreak of World War II, becoming head of the service's anti-Soviet section in 1944. This key post enabled him to pass top secret information to Moscow. In the late 1940s Philby betrayed a secret Anglo-American plan to overthrow the communist government of ALBANIA. In 1949, he became MI6's liaison officer with the U.S. CENTRAL INTELLIGENCE AGENCY and was thus in an ideal position to compromise every MI6/CIA operation against the Soviet Union. In 1951 he warned fellow Cambridge graduates and Soviet spies Guy BURGESS and Donald MACLEAN that they were under suspicion, giving them time to defect to the Soviet Union. The CIA believed that Philby was the “third man” in the spy ring, but MI5, the British counter-intelligence unit, was unable to prove any connection. Philby's activities were not fully exposed until he himself defected to the Soviet Union in 1963 just before his planned arrest. In Moscow, Philby continued his life as a KGB general; he never expressed regret for his treason.

Philippine election of 1986 Historic election that led to the fall of the regime of President Ferdinand MARCOS. Marcos had made an apparently impromptu announcement of upcoming elections while being questioned on an American news program. The election was held as promised, amid allegations of widespread fraud, with Corazon AQUINO, the widow of assassinated opposition leader Benigno

Aquino, as Marcos's main challenger. Both Marcos and Aquino claimed victory, but independent observers declared that Aquino had actually won the election. Less than three weeks later, U.S. president Ronald REAGAN called on Marcos to resign and offered him a haven in the U.S. On February 25 Marcos and Aquino each held their own inauguration ceremonies. Several hours later, Marcos went into exile. His 20-year reign as president was brought to an end after two leading military allies resigned from their posts—Lieutenant General Fidel RAMOS and Defense Minister Juan Ponce Enrile. The departure of Marcos, his wife **Imelda Marcos** and their entourage was widely hailed by Filipinos who felt that the Marcos regime had been thoroughly corrupt.

Philippine Insurrection of 1899–1902. The Philippines led by Emilio Aguinaldo had declared independence from Spain on June 12, 1898, but Spain ceded the islands to the U.S. by the treaty of Paris. Aguinaldo refused U.S. control, establishing an independent government under the Malolos constitution. Hostilities against American rule began February 4, 1899. After several battles, American forces pushed the Filipinos back from Manila, capturing their capital at Malolos. Aguinaldo carried on guerrilla war until captured on March 23, 1901. The guerrilla war continued until May 6, 1902, when civil government was established under American control with William Howard TAFT as the first governor.

Philippines (Republic of the Philippines) The Philippines consist of 7,100 islands that cover a total land area of approximately 115,800 square miles in the west Pacific Ocean about 497 miles off the southeast Asian coast. Formally ceded to the United States under terms of the Treaty of Paris, which ended the Spanish-American War, the country became the Commonwealth of the Philippines in 1935. JAPAN invaded the country in 1941, exploiting and brutalizing the people until U.S. forces liberated the country in 1944. The Republic of the Philippines was declared in 1946. After two decades of one-term presidents, Ferdinand MARCOS became president in 1965. During the next 20 years he

crushed all opposition and quelled insurrections by communist and Muslim guerrilla groups. He was ousted in 1986 with the election of Corazon AQUINO, widow of opposition leader Benigno Aquino, who had been murdered on his return to the country in 1983. A new constitution was approved in 1987. The Aquino government continued to battle guerrilla groups and survived several attempted coups, the most serious of which occurred in 1989. Although the Philippines remained free from autocratic rule with the elections of Fidel Ramos (1992–98) and Joseph Estrada (1998–

2001) and the inauguration of Gloria Macapagal-Arroyo (2001–), the country has been plagued by an insurrection by the Islamic separatist movement since 1994. In 2006 President Arroyo declared a state of emergency after a coup attempt was discovered.

Phillips, Rev. Channing E. (1928–1987) American CIVIL RIGHTS activist. A United Church of Christ clergyman, he was Washington, D.C., Democratic national committeeman from 1968 to 1972. He became the first black nominated for president by a major political party when the Washington delegation

PHILIPPINES

1898	Philippines ceded to U.S. after Spanish-American War.
1899	Philippine nationalists who fought with Americans against Spanish in the Spanish-American conflict now fight U.S. domination in the Philippine-American War.
1941–45	Japan invades and subjects Philippines to brutal occupation.
1945	U.S. forces invade Philippines and liberate Manila.
1946	Republic of Philippines proclaimed independent sovereign state.
1965	Ferdinand Marcos wins presidency; attendant economic stagnation, rampant inflation and endemic corruption fuel popular opposition to his administration.
1972	Marcos imposes martial law.
1983	Prominent opposition leader Benigno Aquino returns from exile and is shot dead in the airport terminal as he disembarks plane.
1986	Under U.S. pressure, Marcos calls election, is defeated by Corazon Aquino, widow of Benigno; Aquino vows to recover national assets looted by Marcos and his allies, wipe out corruption and affirm civilian supremacy over military.
1987	One hundred thousand people visit Malacañang Palace to view luxury goods abandoned by Marcos family, among which are 1,060 pairs of Imelda Marcos's shoes.
1989	Ferdinand Marcos dies in exile in Hawaii.
1990	Earthquake on island of Luzon kills 1,621 people; President Aquino asks U.S. Congress for aid; Imelda Marcos charged with stealing \$200 million from Philippine treasury, is acquitted in U.S. federal court for lack of evidence.
1994	Islamic separatist movement launches insurrection.
1998	President Ramos does not run for reelection; Joseph Estrada, a well-known actor, is elected president.
2001	Estrada is ousted amid charges of corruption; Vice President Gloria Macapagal-Arroyo is sworn in as president.
2003	A cease-fire between the government and the Moro Islamic Liberation Front (MILF) breaks down (February) and resumes (July).
2004	Arroyo wins the presidential elections.
2005	The cease-fire ends as heavy fighting resumes between government troops and MILF rebels. President Arroyo comes under fire to resign over allegations of vote rigging.
2006	President Arroyo declares state of emergency after a failed coup attempt.

to the 1968 Democratic National Convention nominated him as its favorite son candidate in place of the slain Robert F. KENNEDY.

Phony War (German: Sitzkrieg)

Term given to a brief period in WORLD WAR II that followed Germany's BLITZ-KRIEG attack on Poland. Lasting from late 1939 until early 1940, the Phony War (also known as the "Sitzkrieg") was a time of inaction during which the French and British maintained a defensive position behind the MAGINOT LINE and the USSR turned its attention to the RUSSO-FINNISH WAR. Given over to strategizing, this period of military malaise was ended by Adolf HITLER's invasion of NORWAY on April 9, 1940, and the subsequent replacement of Neville CHAMBERLAIN with Winston CHURCHILL as British prime minister on May 10.

photojournalism Technique of journalistic reporting that relies heavily on incisive and exemplary photographic images. While photography has served as a component of journalism since the mid-19th century, it stepped to the forefront only in the 20th century. The first key development of the modern era was German inventor Alfred Korn's 1907 technique of sending photographic images by wire. By the 1920s, German magazines such as the *Münchener Illustrierte Presse* (MIP) had won an audience by letting photographs do much of the narrative work in their articles. In the U.S., this approach was successfully emulated by two magazines founded in the mid-1930s, *LIFE* and *Look*. Photojournalists who have won renown for their work since the 1930s include Margaret BOURKE-WHITE, Robert CAPA, Walker EVANS and W. Eugene Smith.

Photo-Secession A loose-knit group of American photographers formed at the beginning of the 20th century by Alfred STIEGLITZ. As propounded in 1902 in its journal *Camera Work*, the general mandate was the promotion of the higher forms of photography as a fine art. At the time, argues historian William Innes Homer, American photography was "embarrassingly awkward," a collection of stereotypical studio portraits and "superficial imitations of the conventions of painting."

Photo-Secession's original members included Edward STEICHEN, Gertrude Kasebier, Clarence H. White, Joseph T. Keiley, Frank Eugene and Alvin Langdon COBURN. There were many exhibitions over the next few years, notably in "291," Stieglitz's famous exhibition space on Fifth Avenue. Dissension soon eroded the ranks of the society. Stieglitz grew increasingly dissatisfied at those members whose pictorial effects imitated with soft-focus lenses the hazy effects of Impressionist paintings. He demanded that photography pursue the course of a "straight," unmediated expression. Other members were disgruntled at Stieglitz's increasing use of the exhibition space for contemporary painters. By the time the group sponsored the International Exhibition of Pictorial Photography in Buffalo in 1910, a schism with Stieglitz was imminent. After his withdrawal, the Photo-Secessionists organized a "second" Secession, the Pictorial Photographers of America, in 1916. Its gradual dissolution came, writes Homer, from a preponderance of "bland, soft-focus pictorialism."

Piaf, Edith (Giovanna Gassion) (1915–1963) French singer. *Piaf* is the French word for sparrow, and this adopted name became the symbol of Edith Piaf's immense popularity with the French people. She was known as The Little Sparrow because of her slight build and plaintive singing style that could wring the heights of emotion from the ballads that dominated her musical repertoire. In the 1940s and '50s, at the height of her fame, Piaf was a familiar figure not only in her native land but also in England and the U.S. She was admired not only by her fans but by literati such as Jean COCTEAU. Her life was in many ways a tragic one, marred by failed marriages and drug abuse. The hit Broadway play *Piaf* (1980), written by Pam Gens and starring Jane Lapotaire, was a musical re-creation of her legend.

Piaget, Jean (1896–1980) Swiss psychologist, renowned for his groundbreaking studies of child development and theories of human intelligence. Piaget was initially interested in the natural sciences, and received his doctorate in science in 1918. However, he became increasingly fascinated by the

question of how children learn and by the 1920s had shifted his energy to this as-yet undeveloped field. He theorized that all children learned by passing through a series of distinct intellectual stages and that each child was a significant agent in that process. He also proposed that children, starting from birth, were constantly constructing and reconstructing their own model of reality, revising their conceptions of the world around them through their own self-discoveries. Piaget was active in research for more than 60 years; during this time he exercised a profound influence on the field of child psychology in Europe and the U.S. He wrote more than 50 books and monographs and received honorary degrees from more than 30 universities. He worked at the Universities of Geneva (1929–54), Lausanne (1938–51) and the Sorbonne (1952–63).

Piano, Renzo (1937–) Italian-born architect and winner of the Pritzker Prize for architecture (1998). Born in Genoa, Piano studied architecture at the Milan Polytechnic under renowned Italian architect Franco Albini. In 1964 Piano graduated from Milan Polytechnic, and began to work as an architect with Louis Khan in Philadelphia and A. S. Makowsky in London. In 1971 Piano joined with Richard Rogers to form Piano & Rogers, an architectural studio that, between 1971 and 1977, was in charge of designing and overseeing the construction of the Centre Georges Pompidou, a modern art museum in Paris. In 1977 he ended his collaboration with Rogers to start Piano & Rice, an architectural firm with engineer Peter Rice, which from 1978 to 1982 was primarily known for its construction of a residential complex in Corciano, Italy. In 1981 Piano formed his own independent architectural agency, the Renzo Piano Building Workshop in Genoa, with the goals of producing more innovative architectural designs and of serving as a mentor to aspiring Italian architects. He later established branches of his workshops in Paris (1987) and Osaka (1989). Throughout his career, Piano has been responsible for designing and overseeing the construction of a variety of projects ranging from Genoa subway stations (1983) to the San Nicola Stadium in Bari, Italy (1987) to the Kansai International Air-

port terminal in Osaka, Japan (1988) to the London Bridge Tower in London, England (2000). In 1998, in recognition of his contributions to the field of architecture, Piano received the Pritzker Prize, the highest honor in the architectural field.

Picasso, Pablo (1881–1973) Spanish-born painter, sculptor and potter, widely regarded as the greatest visual artist of the 20th century. Trained at an early age by his Spanish painter father, Picasso moved to PARIS as a young man and spent most of his life there and in the Midi region of France. In the early 1900s, Picasso produced noteworthy portraits during what are known as his Blue and Rose Periods. With fellow painter Georges BRAQUE, Picasso founded the highly influential artistic movement known as CUBISM in the late 1900s. His famous painting *Les Femmes d'Alger* (1907)—which depicts five women in diverse geometric poses and incorporates the influence of African art—is regarded as the first true cubist painting. Picasso's painting styles continued to evolve throughout his career, ranging from strong realism to extreme abstraction. In the 1940s he produced a series of "found object" sculptures. In the 1950s and after, he devoted considerable energy to his pottery works in the Midi.

Piccard, Auguste (1884–1962) Swiss physicist. A pioneer in the exploration of the atmosphere and the ocean floor, Piccard taught in the U.S. and Switzerland before becoming professor of physics at Brussels Polytechnic (1922–56). To explore the atmosphere he developed a pressurized cabin attached to a balloon; he successfully tested it in 1931, ascending approximately 11 miles into the atmosphere. Next he designed a maneuverable craft to explore the ocean depths, which reached a depth of about a mile when tested in 1948. A second craft descended to 2.5 miles in the Mediterranean. It was later sold to the U.S. Navy and used to plumb the Marianas trench in the Pacific (seven miles deep) in 1960.

Piccolo, Lucio (1903–1969) Italian poet. A native son of Palermo, Piccolo led a relatively isolated life at his home in Sicily and often focused on

Sicilian subjects. *Nove liriche* (*Nine Poems*) was privately printed in 1954. He owes his critical discovery to Eugenio MONTALE's praise of his 1956 *Canti barocchi* (*Baroque Songs*). Other works include *Gioco a nascondere* (1960, *Hide and Seek*) and *Plumela* (1967). His poems are filled with rich and exotic imagery and attempt to achieve a sense of timelessness.

Pickford, Mary (1893–1979) The most popular motion picture star in screen history. She was a rare combination of dramatic actress, comedienne, entrepreneur and businessperson. Born Gladys Smith in Toronto, she toured with various theater road companies as “Baby Gladys,” the primary breadwinner in her family. By the age of 16 she had not only conquered the Broadway stage (winning over producer David BELASCO to star in his *The Warrens of Virginia*) but had begun appearing in short films directed by D. W. GRIFFITH for the BIOGRAPH company. The next seven years consolidated her position as the number-one box-office star and highest-paid contract player in the business. “The Little Girl with the Curls,” as her fans dubbed her, became “The Girl with the Cash-Register Brain,” as her boss at Famous Players, Adolph ZUKOR, described her. She went from \$40 a week at Biograph to \$10,000 a week in 1916. With the creation that year of the Pickford Film Corporation, she became the first star to produce her own pictures and win a degree of control over her work. These

Silent film star and founding member of United Artists Mary Pickford (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

were the years of her quintessential image, a radiant, sprightly little girl with plenty of courage and daring. With her favorite directors, Marshall Neilan and Maurice Tourneur, she made many classics, including *Poor Little Rich Girl* (1917), *Pride of the Clan* (1916) and *Daddy Long Legs* (1919); and some genuine masterpieces such as *Rebecca of Sunnybrook Farm* (1917) and *Stella Maris* (1918). After her marriage to Douglas FAIRBANKS Sr. in 1920 and her involvement in the founding of UNITED ARTISTS, her work began to change. Bigger budgets and more mature roles produced *Dorothy Vernon of Haddon Hall* (1925), *The Taming of the Shrew* (1929) and *Coquette*, for which she won an ACADEMY AWARD as best actress in 1929. Her famous curls were cut off for that role, creating a sensation with the press and the public. After making *Secrets* in 1933, she retired from acting and devoted the rest of her life to business affairs, charitable activities, a book of memoirs (*Sunshine and Shadow*, 1955) and presiding over Beverly Hills society at her home, Pickfair, with her third husband, Charles “Buddy” Rogers. Before her death in 1979 she donated more than 50 of her Biograph-period films to the American Film Institute and received a special Academy Award in 1975 in recognition of her contributions to American film.

Piggott, Lester (1935–) British jockey. Piggott is widely regarded as the leading British jockey of the 20th century. Born to a father who was a steeplechase rider and a mother from a racing family, Piggott scored the first of his record seven Epsom Derby wins in 1954 when he was only 19. He was the British champion jockey in 1960, and continuously from 1964 to 1971. His best year was 1966 when he booted home 191 wins. Always popular with racing fans for his intense style, his rough riding tactics rendered him less so with his fellow jockeys. His 3,000 wins over 25 years included victories in the Irish Sweepstakes, the Arc de Triomphe and the Washington International. In the 1980s, Piggott ran afoul of the law and served a prison term for tax evasion. However, he made a spectacular comeback when he won a major race in the 1990 Breeders' Cup at Belmont at age 55. Piggott retired in 1995.

“Pig War” (1905–1909) SERBIA, in an attempt to reduce dependence on Austria-Hungary, imported French (instead of Austrian) munitions and established a customs union with BULGARIA, making Austrian goods uncompetitive. AUSTRIA responded by closing off Serbian pork imports. Serbia refused to bow, pressuring for a trade outlet on the Adriatic Sea through Austrian administered BOSNIA-HERZEGOVINA, and was supported by Russia. War between RUSSIA and Austria was averted by a German ultimatum (1909) demanding cessation of Russian aid to Serbia. Austria and Serbia developed a new commercial treaty, but Serbia covertly agitated among Slavs in newly Austrian annexed Bosnia-Herzegovina, contributing to the start of WORLD WAR I.

pill, the Method of oral contraception that became widely available in 1961. Early forms of the pill contained artificial forms of the female hormones estrogen and progesterone. Taken for 21 days during a menstrual cycle, they suppress the production of the pituitary hormones that normally cause ovulation. The lack of ovulation prevents the possibility of pregnancy. More recent versions of the pill have contained only the progesterone-like hormone. It does not prevent ovulation but does prevent fertilization. The contraceptive pill is extremely popular because of its ease of use and comparative safety. However, it has been shown to cause some health risks, including cardiac or cardiovascular problems, and blood clots in some women who smoke, are overweight or are above the age of 35. Among the less serious side effects that the pill may produce are nausea, headache and weight gain.

Pilnyak, Boris (B. A. Vogaul) (1894–1937) Russian writer. Pilnyak's novel *The Naked Year* (1922) was the first novel to deal with the revolution and its effects on Russian life. Pilnyak became disillusioned with the regime, and the publication of *Mahogany* (1929) caused him to be expelled from the author association. His novel about the FIVE-YEAR PLAN, *The Volga Flows into the Caspian Sea*, was an attempt to reinstate himself in official favor. He survived the purges by publicly denouncing his “antirevolutionary” writings.

Piłsudski, Józef (1867–1935) Polish soldier and nationalist leader. Piłsudski began his political career agitating against Russian rule of POLAND. At age 20 he was sent to Siberia for several years as punishment for his anti-Russian activities. Returning to Poland (1892), he founded and edited a socialist-nationalist newspaper. During the RUSSO-JAPANESE WAR (1904–05) he went to Tokyo to appeal for Japanese aid for a Polish revolt against RUSSIA, but this mission failed. At the start of WORLD WAR I he organized a force of some 10,000 Polish volunteers to fight alongside the Austrians against Russia. However, he earned the mistrust of the Germans, who interned him in 1917. He returned to newly independent POLAND at the end of the war (1918). With the title of marshal he assumed command of all Polish troops and was made provisional head of state. He successfully defended Poland against a Soviet invasion (1919–20). He retired as head of the army in 1923 but led a military coup three years later (May 12–15, 1926) after a breakdown of the democratic government. He was officially prime minister from 1926 to 1928 and again briefly in 1930; but as minister of war from 1926 on, he remained the virtual dictator of Poland until his death. Piłsudski was one of the first European leaders to recognize the dangers of NAZISM, but his warnings went largely unheeded.

Pinheiro de Azevedo, José Baptista (1917–1983) Portuguese naval officer and politician. He was a member of the ruling **Junta of National Salvation**, a coalition of leaders who governed PORTUGAL following a military coup in April 1974 that ousted the authoritarian government of Premier Marcelo Caetano. Pinheiro de Azevedo served as premier in a provisional government from September 1975 until June 1976, when he oversaw the country's first democratic elections in 48 years.

Pink Floyd British ROCK and roll band. Pink Floyd, which achieved great commercial success in the 1970s, was founded in London in 1966. Featuring a psychedelic style, the original lineup of musicians included Syd Barrett, vocals and guitar; Roger Waters, bass; Richard Wright,

keyboards; and Nick Mason, drums. Pink Floyd enjoyed its first British hit with the single “Arnold Layne” (1967). In 1968 David Gilmour joined the band as a replacement for Barrett. Pink Floyd became known for its dramatic and inventive use of large-scale sound systems, electronic music and vocal choruses. Its album *The Dark Side of the Moon* (1973) remained on the American album charts for over a decade—the longest run in recording history. Its 1979 album *The Wall* featured the hit single “Another Brick in the Wall.” In 1995 Pink Floyd was inducted into the Rock and Roll Hall of Fame.

Pinochet, Augusto (1915–) A career Chilean army officer, Pinochet rose to general and was commander in chief of CHILE's armed forces from 1973 to 1980. He led the right-wing coup that deposed President Salvador ALLENDE in 1973. President of the Government Council of Chile (1973–74), he subsequently became president of Chile in 1974. An authoritarian though not totalitarian leader, he followed a strict policy of repression against opponents of his regime. In October 1988 a referendum calling for new elections was adopted by popular vote; Pinochet agreed to abide by the result. A democratic civilian government was elected in 1989, and Pinochet stepped down upon the inauguration of the new president, although he remained as commander in chief of the army. In October 1998 Pinochet traveled to Britain to receive medical treatment, but was taken into custody for extradition to Spain, where he was scheduled to stand trial on charges that he committed atrocities against Spanish citizens. However, in 2000, a British court ruled that he was not physically and mentally fit to stand trial, and Pinochet was sent back to Chile. In 2005 a court in Chile placed Pinochet under indictment and house arrest in connection with the slaying of 119 dissidents in 1975.

Pinter, Harold (Harold Da Pinta) (1930–) British playwright, screenplay writer and theatrical director. Pinter is the leading British playwright of the postwar era, with a unique gift—for which admiring critics coined the term “Pinteresque”—for portraying

psychological anguish through subtly revelatory dialogue. His first success, the one-act play *The Room* (1957), was followed by several acclaimed full-length plays including *The Birthday Party* (1958), *The Dumb Waiter* (1958) and *The Caretaker* (1960), which was adapted into an acclaimed British film, titled *The Guest* (1964), featuring Alan Bates, Donald Pleasance and Robert Shaw. A more recent play, *Betrayal* (1978), was adapted by Pinter himself into screenplay form for the film *Betrayal* (1982), starring Jeremy Irons, Ben Kingsley and Patricia Hodge and concerning a tortured love triangle. Pinter has written frequently for films—including the screenplay for *The French Lieutenant's Woman* (1981)—while continuing his involvement with the theater. Pinter continued to produce plays throughout the 1990s, including *Moonlight* (1993), *Ashes to Ashes* (1996) and *Celebration* (1999). He is married to the British writer Lady Antonia Fraser.

Pinza, Ezio (1892–1957) Italian bass opera singer and actor. Pinza was considered one of the greatest bass voices of the opera stage from the 1920s to the 1940s. He was a regular performer with the Metropolitan Opera in New York, although he toured regularly in Europe and South America as well. Pinza appeared often in Verdi basso roles and also triumphed in the lead role of Mozart's *Don Giovanni*. Late in his career, Pinza turned to less demanding vocal roles in Broadway musicals and enjoyed great success in Richard RODGERS and Oscar HAMMERSTEIN II's *South Pacific* (1949). He thereafter enjoyed a brief HOLLYWOOD career in films such as *Tonight We Sing* (1953).

Pioneer Early U.S. spacecraft and program, developed in response to the Soviet Luna missions, which had orbited and photographed the moon at close range. *Pioneer 1*, which attained an altitude of 70,171 miles, was launched on October 11, 1958. A month later, the launch of *Pioneer 2* failed; *Pioneer 3*, launched on December 6, reached an altitude of 63,580 miles. *Pioneer 4*, launched March 3, 1959, completed the first lunar fly-by at a distance of 37,300 miles from the moon. The Pioneers were succeeded

by the RANGER missions, but continued to be used into the '70s for long-range probes to Jupiter, Saturn and beyond.

Pioneers Group for young Soviets between the ages of 10 and 14 to 15 years, founded as an auxiliary to the KOMSOMOL in 1922. The aim of the movement was outlined in the Komsomol statute: It should make its members "convinced fighters for the Communist Party cause, inculcate in them the love of labor and knowledge, and assist the formation of the younger generation in the spirit of communist consciousness and morality." Regular meetings were held; visits were arranged to places of revolutionary interest; and Pioneers paraded and took part in summer camps. Pioneer activities often provided a useful addition to the school curriculum. Those wishing to join had to take the Pioneer oath and undertake to obey the Pioneer laws. Nearly all children in this age range were Pioneers.

Piotrovsky, Boris B. (1908–1990) Russian archaeologist and museum director. Piotrovsky was one of the leading archaeologists of the 20th century. His most famous project was the discovery, in 1939, of remains of the ancient civilization of Urartu in what is now Armenia. Through his excavations in Karmir Blur in Armenia, Piotrovsky unearthed an Urartu fortress and town. During his career, he published over 200 scholarly works. In 1964 he was named director of the Hermitage, the famous St. Petersburg museum that houses one of the world's great collections of art and archaeological artifacts. Piotrovsky was an honorary member of numerous Western academies of science, including those of France and England.

Pirandello, Luigi (1867–1936) Italian playwright, actor, story writer, novelist and literary critic. Pirandello, who won the NOBEL PRIZE for literature in 1934, was a prolific and versatile writer who remains best known for his works for the stage. An important precursor of the Theater of the ABSURD movement, Pirandello was a theatrical pioneer in dealing with existential themes including the tenuous nature of sanity, the loss of secure personal identity in modern society and the absurd cruelties occasioned by political ambition. He was

also influential by virtue of his discarding of standard dramatic plot structure. Pirandello's first success came with the play *Right You Are (If You Think So)* (1917). His major theatrical works include *Enrico IV* (1922), *The Man with a Flower in His Mouth* (1923), *Lazarus* (1929) and the trilogy of *Six Characters in Search of an Author* (1922), *Each in His Own Way* (1924) and *Tonight We Improvise* (1929).

Pire, Jules-Joseph (1878–1953) Belgian general and WORLD WAR II RESISTANCE leader. At the time of the Nazi invasion of BELGIUM in May 1940, Pire was an infantry commander. Joining the forces resisting Germany, Pire entered the Belgian Legion in 1941 and was widely known by the code name "Pygmalion." In collaboration with other Resistance groups, he executed a number of important sabotage raids in 1944. Leading the underground Belgian army, he aided British and American troops in the liberation of Belgium in September 1944, preventing the retreating German army from destroying such key installations as the port facilities at Antwerp and protecting Belgian armored divisions that were actively supporting Allied activities.

Piro, Frank "Killer Joe" (1920–1989) American dancer and dance instructor who taught popular dance steps to scores of high-society figures. Among Piro's students were the Duke and Duchess of WINDSOR (see EDWARD VIII), Luci Baines Johnson (daughter of Lyndon Baines JOHNSON), and Dame Margot FONTEYN. He also helped popularize many of the discotheque-style dances of the 1960s and '70s. He was known as "Killer Joe" for his ability to outlast any partner of the dance floor.

Piston, Walter (1894–1976) American composer and teacher. As a composer, Piston is noted for his sophisticated, balanced, neoclassical style and his use of harmony and counterpoint. As a teacher, he was admired for his musical knowledge and ability to inspire such students as Leonard BERNSTEIN. He taught music at Harvard University from 1926 until he retired in 1960. His most famous compositions include *Symphony No. 3* (1947) and *Symphony No. 7* (1960), for which he received PULITZER PRIZES, and a *Viola Concerto* (1957) and *String Quartet*

No. 5 (1962), for which he received New York Music Critics Circle Awards.

Pius X (Giuseppe Melchiorre Sarto) (1835–1914) Supreme pontiff of the Roman Catholic Church. Born Giuseppe Sarto in Riese, Italy, Pius X reigned from 1903 to 1914. As pope, he condemned religious modernism, reformed the church's system of religious instruction, opposed anticlerical laws in Italy and France and began the process of recodifying canon law and retranslating the Bible. Renowned for his concern for the poor, Pius X was canonized a saint in 1954 by Pope Pius XII.

Pius XI (Ambrogio Damiano Achille Ratti) (1857–1939) Supreme pontiff of the Roman Catholic Church. Achille Ratti, born in Desio, Italy, reigned as pope from February 6, 1922, to February 10, 1939. As pope, Pius XI promoted missionary activities, criticized laissez-faire capitalism and denounced MUSSOLINI and HITLER. In 1929, he signed with Italy the Lateran Agreement, which granted independent status to Vatican City and recognized Catholicism as Italy's official religion.

Pius XII (Eugenio Pacelli) (1876–1958) Supreme pontiff of the Roman Catholic Church (1939–58). Born in Rome, Pacelli was ordained a Roman Catholic priest in 1899 and entered the papal diplomatic service in 1901, serving in various capacities therein for 38 years. He became both a cardinal and a papal secretary of state in 1930. Pacelli became acquainted with German politics as a nuncio to the WEIMAR REPUBLIC during the 1920s, and in 1933 he negotiated a diplomatic agreement between the Vatican and the newly formed Nazi government. In 1939 he was elected as pope and took the name Pius XII. During WORLD WAR II Pius XII failed to make any public protest against the Nazi genocide efforts against the Jews, thereby earning a great deal of public criticism. After the war Pius XII condemned the new communist regimes in Poland, Romania, Hungary and Yugoslavia.

Plague, The Novel (1947) by French NOBEL PRIZE-winning author Albert CAMUS, widely regarded as one of the great novels of the 20th century. Written in post-WORLD WAR II France, it shows the influence of the painful occupation of France by the Nazis, during which

time Camus was active in the French RESISTANCE. The story is set in the Algerian city of Oran, in which a plague (interpreted by many critics as symbolizing the invading Nazi forces) has broken out. As the city is cordoned off and dwindles in population and resources, the inner resources of each resident are tested. Some, such as heroic Dr. Bernard Rieux, give themselves over to helping their fellow humans and succeed in spiritually transcending their formerly shallow lives to become, in the terms of Camus's existential philosophy, saints without a God. Other persons retreat into selfishness and are likened unto the rats that scamper in the plague-ridden streets. (See also EXISTENTIALISM.)

Plaid Cymru Welsh name for the Party of Wales, or Welsh Nationalist Party, formed by intellectuals who merged several small groups in August 1925. Its program favors Welsh language and culture. It gained publicity with involvement in the terrorist bombings of a Royal Air Force (RAF) base in 1938. In 1966 disillusionment with the LABOUR PARTY gained Plaid Cymru its first House of Commons seat, which increased to three by 1974. The party is also represented in local governments and councils. After the defeat of Welsh autonomy in the 1979 referendum, the party lost ground, but managed to retain two seats in Parliament in that year's election. Its members are mostly from the middle class, favoring a moderate economic program and opposing English-language signs and migration to Wales by wealthy English people.

Planchon, Roger (1931–) French stage director, actor and playwright. Planchon is best known as an innovative theatrical visionary who succeeded, in his native land, in drawing substantial popular and critical attention to productions staged outside of Paris. His own theater, first founded in Lyon in 1950 and subsequently located in Villeurbanne as the Théâtre National Populaire, has become one of the leading centers of French drama. Influenced by Antonin ARTAUD and Bertolt BRECHT, Planchon has tended to avoid the classic French theater repertoire in favor of innovative stagings of modern European playwrights as well as iconoclastic reinterpretations of Shakespeare. His

own plays include *Bleus, blancs, rouges* (1967), *Le Cochon noir* (1974) and *Gilles de Rais* (1976). In 1998 Planchon helped produce *Lautrec*, a film depicting the Parisian life of the artist Henri de Toulouse-Lautrec.

Planck, Max Karl Ernst Ludwig (1858–1947) German physicist. Planck is the originator of quantum theory and therefore the father of 20th-century physics. He received his Ph.D. in 1879 from the University of Munich, and from 1889 to his retirement in 1928, he was affiliated with the University of Berlin. In 1900, while investigating the radiation given off by hot bodies, Planck discovered that the radiation was not emitted consistently over all wave lengths, as predicted by classical physics, but in “jumps”; this led him to suggest that energy was released in small packets, or quanta. Planck's revolutionary theory was soon put to the test by other researchers, including Albert EINSTEIN, who used the quantum theory to explain the photoelectric effect in 1905; Niels BOHR, who based his model of the hydrogen atom on the principle in 1913; and Arthur COMPTON, who used it to investigate X-ray scattering in 1923. In 1918 Planck won the NOBEL PRIZE for physics.

Plante, Joseph Jacques Omer (1929–1986) French-Canadian athlete. He was one of the greatest goaltenders in the history of the National Hockey League. During his 17-year career he played with five teams but was best known as the goalie of the Montreal Canadiens in the 1950s, when the team won five successive Stanley Cups. His career goals against average was 2.37, with 82 shutouts. He won the Vezina Trophy seven times for the lowest goals against average. He emerged from a three-year retirement in 1968, lending credibility to the expansionist St. Louis Blues. He was the first modern goaltender to wear a face mask and was one of the first to establish the modern style of roaming beyond the goal crease.

plastics Plastics are synthetic materials that can be turned into a variety of usable products through such processes as heating and molding. As a result of their molecular structure (plastic molecules are called poly-

mers), plastics soften when heated but become rigid when cooled, and are tough and lightweight. The term *plastic* is derived from the Greek *plastikos*, meaning “to form.” In 1910 American chemist Leo H. Baekeland made the first completely synthetic plastic, called BAKELITE. The plastics industry exploded after 1920 with the growth of the chemical industry and development of necessary equipment for its manufacture. Such raw materials as cellulose, coal and petroleum products are combined with a variety of chemicals and additives to make durable plastic. Plastics can be made by molding, extrusion, lamination, casting and foaming, and are used in everything from rigid foam for refrigerator insulation and flexible foam for clothing to nylon films for medical use.

Plate, Battle of the River Naval engagement between the British and Germans that took place on December 13, 1939, in the early part of WORLD WAR II. The German pocket battleship *Graf Spee*, which had already sunk nine Allied ships, was sighted in the South Atlantic by a British cruiser squadron under the command of Commodore Henry Harwood (later admiral). The three-ship squadron inflicted considerable damage on the German vessel, which was forced into Montevideo for repairs. Meanwhile, a large naval force gathered at the Plate estuary. The Germans were forced to scuttle the *Graf Spee* off the coast of Uruguay on December 17, rather than face the British ships. The Battle of the River Plate was the first direct encounter between British and German forces during the war, and was an important naval victory and morale-booster for the British.

Plath, Sylvia (1932–1963) American poet. The daughter of an elderly German-American entomologist who died when she was eight and of an ambitious mother, Plath was a star student in high school. In the summer of 1954, along with Anne SEXTON, she studied with Robert LOWELL at Boston University. Plath's autobiographical novel, *The Bell Jar* (1961), describes her years at Smith College (B.A., 1955), an unhappy stint as a guest editor for *Mademoiselle* in 1953 and her hospitalization after her first suicide attempt. She attended Newnham Col-

lege, Cambridge, where she married the poet Ted HUGHES in 1956. In 1959 she settled in England. She published only two books before her suicide at the age of 31, but her posthumous *Ariel* (1965) stunned the literary world with its starkly powerful and horrific imagery. Her poetry continued to appear for a decade while her reputation and influence burgeoned, particularly among feminists (see FEMINISM). Plath is considered among the strongest and most original of the CONFESSIONAL POETS, although her work continues to stir controversy.

Playboy of the Western World, The Play (1907) by the Irish playwright John Millington SYNGE. Though it is now acknowledged as a classic, *The Playboy of the Western World* was a highly controversial play when it was first performed, sparking riots by audiences in Dublin in 1907 and in New York City upon its American premiere in 1911. What aroused the audience so was the bold portrayal of its protagonist, the randy and charismatic Christy Mahon, who wins the heart of the lovely Pegeen Mike and the esteem of an entire Irish village due to his false bragging as to how he murdered his tyrant of a father. When Christy's father—still alive and healthy—arrives in search of his son, Christy feels compelled to try to kill him to save his honor. But a murder attempt pursued in their own environs leads the once-admiring villagers to call for Christy's death. Christy's father begs for clemency, however, and he and his son depart from the village reunited in spirit. The central theme of *Playboy* is the ease by which people are swayed by superficial appearances and assumptions.

Player, Gary Jim (1935–) South African golfer. Arnold PALMER, Jack NICKLAUS and Gary Player had a virtual lock on tournament play during the 1960s. In 1959, at the age of 23, Player became the youngest player ever to win the modern British Open, an event he was to capture again in 1968 and 1972. He twice won the U.S. Masters at Augusta: first, in a thrilling one-stroke victory over Arnold Palmer and again 13 years later. Despite his preference for playing in Europe, Asia and Africa, Player finished his career sixth on the American career earnings list.

Plekhanov, Georgi Valentinovich (1857–1919) Russian politician. When the organization Zemlya i Volya, of which Plekhanov was a member, split into violent and nonviolent factions, Plekhanov became leader of the new, nonviolent Cherny Peredel (Black Repartition). Having become a Marxist in Western Europe, in 1883 he founded the Liberation of Labor group. Collaborating with LENIN, Plekhanov at first supported the BOLSHEVIKS, but in 1903 joined the MENSHEVIKS, and in 1910 he established the faction of “party-minded” Mensheviks. He played a unique part in converting the Russian intelligentsia to Marxism. After the FEBRUARY REVOLUTION of 1917, Plekhanov set up the right-wing Social Democratic organization Unity, but died shortly after the Bolshevik seizure of power.

Plisetskaya, Maya (1925–) Russian ballerina. Having studied at the Bolshoi School, Plisetskaya was considered one of the greatest ballerinas of her time. She is noted particularly for her interpretation of the role of Odette-Odile in *Swan Lake*.

Plomley, Roy (1914–1985) British radio personality who created and hosted what was believed to be the world's longest-running radio series, *Desert Island Discs*, broadcast on the BBC since 1942. Each week, he asked his guest celebrities to choose eight records, one book and one luxury item they would like to have with them if marooned on a desert island. He would then chat with them about their lives and intersperse the conversation with recordings of their musical selections. Over the years he had close to 1,800 guests on the show, including Princess Margaret and Prime Minister Margaret Thatcher.

PM See Ralph McAllister INGERSOLL.

Pocket Book American publishing company, founded in 1939 by Robert F. de Graff (1895–1981). It was the first U.S. publisher to specialize in paperback editions. Beginning with 10 inexpensive reprints, it marketed these books by selling them at newsstands, in grocery stores and in drugstores for 25 cents apiece. Pocket Book revolutionized the U.S. publishing industry and opened the way for what became a

standard practice in the publishing and book-selling industry. By the time de Graff retired in 1957, Pocket Book's annual sales totaled \$15 million.

Podhoretz, Norman See COMMENTARY.

Podoloff, Maurice (1890–1985) American sports executive. Podoloff was president of the Basketball Association of America (BAA) from 1946 to 1949 and, from 1949 until his retirement in 1963, first president of the National Basketball Association (NBA). That league was created through a merger of the BAA and the old National Basketball League. Only 5 feet 2 inches tall himself, he never played basketball but was one of the game's great innovators. He invented the 24-second clock and the six-foul rule and implemented the use of professional referees. He was responsible for the NBA landing its first TV contract in 1954.

Podvoysky, Nicholas Ilich (1880–1948) Soviet politician. Having joined the Social Democratic Labor Party in 1901, Podvoysky later adhered to its BOLSHEVIK faction. He was the owner of a publishing house specializing in Social Democratic literature before World War I. Following the FEBRUARY REVOLUTION of 1917, he was a member of the executive branch of the first legal Bolshevik St. Petersburg committee and chairman of the military commission of the central committee and of the military revolutionary committee of the Petrograd Soviet. After the seizure of power, Podvoysky set about the task of organizing the Red Army. In spite of the fact that he served as a commissar in the RUSSIAN CIVIL WAR, he fell out of favor and from the 1930s was relegated to serving on the staff of the Marx-Engels-Lenin Institute.

pogrom (devastation) An attack on JEWS and Jewish property, especially in the Russian Empire. Russian pogroms, which were condoned by the government, were particularly common in the years immediately after the assassination of Alexander II in 1881 and again from 1903 to 1906, although mob persecution of Jews continued until the 1917 Russian Revolution.

Poincaré, Raymond (1860–1934) French statesman, president of FRANCE (1913–20). A Parisian lawyer, he was a member of the Chamber of Deputies from 1887 to 1912, holding various cabinet posts, and served as a senator from 1903 to 1913. He became premier and foreign minister in 1912. Perceiving the threat of war from Germany, he strengthened ententes between France and both Russia and England, while attempting to prepare his nation for hostilities. Becoming president in 1913, he extended service in the military to three years. During WORLD WAR I he supported a personal and political foe, Georges CLEMENCEAU, as head of the government in order to secure French unity. After the war Poincaré called for stringent punishment of Germany and felt that the terms of the TREATY OF VERSAILLES were overly lenient. Leaving the presidency, he once more served as a senator from 1920 to 1929. Again named premier and foreign minister in 1922, he attempted to force continued German reparations by sending French troops into the RUHR in 1923. Forced out of office in 1924, he returned in 1926 during a period of financial crisis and carried out policies that stabilized the franc. He retired in 1929.

Poitier, Sidney (1924–) American actor and director. Known for his subtle and powerful performances, Poitier was the first black American to become a major HOLLYWOOD star. Born in Florida of Bahamian parents, he received his training at the American Negro Theater in New York in the late 1940s. Poitier broke into film in the 1950s, starring in several important pictures dealing with racism: *Cry, the Beloved Country* (1952, based on the novel by Alan PATON), *The Blackboard Jungle* (1955) and *The Defiant Ones* (1958), which earned him an ACADEMY AWARD nomination as best actor. He won the best actor award for his performance in *Lilies of the Field* (1963). In 1967 he played leading roles in three hits: a schoolteacher in inner-city London in *To Sir, with Love*; a black detective from the North investigating a murder in the deep South in *In the Heat of the Night*; and a man about to enter an interracial marriage in *Guess Who's Coming to Dinner*. In the 1970s he directed and costarred in several films with Bill COSBY. After an absence from

the screen, he reemerged in 1988, directing and starring in the chase thriller *Shoot to Kill*. Poitier received a lifetime achievement award from the Academy of Motion Picture Arts and Sciences in 2002.

Poland Eastern European nation bordered on the north by the Baltic Sea; the east by Russia (Kaliningrad), Lithuania, Belarus and Ukraine; the south by Slovakia and the Czech Republic; and the west by GERMANY. Divided among Russia, Prussia and AUSTRIA after 1795, Poland did not gain independence until 1918 under the leadership of Józef PIŁSUDSKI, who had led Polish forces in WORLD WAR I for Austria against Russia. In 1920, taking advantage of Russia's internal upheaval, Poland fought for and regained additional territory, which was ceded in a 1921 treaty. In August of 1939 NAZI Germany and the USSR signed a treaty containing a covert agreement to divide Poland between them. In September the German inva-

sion of Poland was quickly followed by a Soviet invasion from the east. Poland fell and WORLD WAR II began. Władysław Raczkiewicz formed an exile government in Paris, which moved to London when France was occupied in 1940. In 1941 Germany attacked the USSR and took all of Poland. Polish communists fought alongside the Soviets. The Poles formed an alternate government in 1944, the Polish Committee of National Liberation, which the Soviets recognized. Declaring itself the Provisional Government of Poland, it moved to Lublin, where it was joined by some of the exiled government from London. The Allies recognized it at the YALTA CONFERENCE in 1945. A 1944 treaty between Poland and the USSR established their border at the CURZON LINE, but Poland gained territory from Germany to the west in an Allied agreement after the war, so the country was effectively shifted westward and millions of Poles resettled. Elections in 1947 established a "people's republic" in

POLAND

1918	An independent Polish republic is established after World War I, with Marshal Józef Piłsudski elected president
1919–21	Poland mounts an advance into Lithuania and Ukraine. Treaty of Riga ends the war, and Poland regains much territory.
1939	Russia and Germany agree to share Poland. Poland is invaded by Germany from the west and Russia from the east.
1940	An exile government is based in Paris and then moved to London.
1941	Germany attacks the Soviet Union and takes all of Poland.
1944–45	Poland is liberated from Nazi rule by the Soviet Union's Red Army; boundaries are redrawn westwards at the Potsdam Conference. One half of "old Poland," 70,000 square miles in the east, is lost to the USSR; 40,000 square miles of ex-German territory in Silesia, along the Oder and Neisse Rivers, is added, shifting the state 150 miles westwards.
1945	Provisional Government of National Unity is installed.
1947	In forged elections, held under strict police and army control and terror, Communist regime wins 80% of the vote.
1952	New constitution is promulgated.
1953	Stefan Cardinal Wyszyński, Poland's primate, is jailed.
1956	Riots break out in Poznań in June. Gomułka is restored as first secretary in fall.
1970	Bloody riots in Gdańsk bring Gomułka down. Gierek replaces Gomułka.
1979	Pope John Paul II arrives in the first of three visits to Poland.
1980	Unrest sparked by rising prices and falling wages leads to wave of strikes, in particular at the Lenin Shipyard in Gdańsk. Workers form a decentralized independent trade union, Solidarity, led by a 38-year-old electrician, Lech Wałęsa.
1981	As the political and economic crisis deepens, Gen. Wojciech Jaruzelski proclaims martial law. Solidarity is outlawed, thousands of activists are interned, including Wałęsa.
1982	Wałęsa is released from prison and suspends martial law.
1983	Following another visit by Pope John Paul II, the government formally ends martial law and amnesty is granted to political prisoners.
1984	Another general amnesty is declared, and two years later nearly all the political prisoners are set free.
1989	After the previous year's strikes the government is forced to recognize Solidarity and allow it to participate in elections. Solidarity sweeps the polls.
1990	Wałęsa wins the first general presidential election.
1995	Lech Wałęsa loses a close presidential race.
1999	Poland joins NATO.
2004	Poland gains admission into the EU.

Poland, and in 1952 a new constitution was adopted, thus beginning a repressive, STALINIST government with close ties to the USSR Poland's government

also sought to abolish the Roman Catholic Church. In 1956, following strikes and riots over food shortages and Soviet control, Władysław Gomułka

was elected leader of the United Workers Party. Gomułka eased restrictions on private farming and released Cardinal Stefan Wyszyński, who had been

imprisoned in 1953. Strikes again broke out in 1970, and Gomułka was succeeded by Edward GIEREK. Opposition to his government mounted through the decade and peaked in 1979 after the first of three visits by Polish-born pope JOHN PAUL II. In 1980 a strike that started in the Gdańsk shipyards spread to all industries, and the government conceded workers' the right to strike. Lech WAŁĘSA formed the SOLIDARITY (Solidarność) union. It sought workers' rights and liberties. In 1981, following a national strike for a five-day work week, Premier Pinkowski was replaced by General Wojciech JARUZELSKI. Martial law was imposed, Solidarity banned and its leaders arrested. The U.S. responded by initiating economic sanctions. In 1982 curfews were eased and further rioting occurred. Lech Wałęsa was released from prison and martial law suspended. Following another conciliatory visit by the pope in 1983, the government granted amnesty to political prisoners, releasing 35,000 of them in 1984 on the 40th anniversary of the People's Republic; the remainder were released in 1986. The U.S. loosened its sanctions, which were lifted in 1987. Martial law ended in 1984, but many restrictions were still in force. Food shortages continued, and opposition to the government grew. Following widespread strikes in 1988, the government was forced to recognize Solidarity and allow it to participate in elections in 1989, when Solidarity-backed candidates won overwhelmingly in parliament. The Polish government, still facing shortages, has announced programs to restructure the economy, including plans to privatize industries. Wałęsa was elected president in 1990 but was defeated in a reelection bid five years later. Poland joined NATO in 1999 and gained admission to the EUROPEAN UNION (EU) in 2004.

Polanski, Roman (1933–) Polish actor and director. Polanski is widely considered one of the most original and disturbing film directors of his generation; both his movies and his personal life have generated much controversy. Born in Paris, Polanski grew up in Kraków, Poland. A survivor of the HOLOCAUST, he later attended the Polish Film School at Łódź (1954). During the late 1950s he wrote, directed or acted in several short films. His first feature,

Knife in the Water (1962), brought Polanski international notice. He subsequently moved to England, where he directed *Repulsion* (1965) and *Cul de Sac* (1966). His first HOLLYWOOD film was *The Fearless Vampire Killers* (1967), a horror film spoof. It was followed by *Rosemary's Baby* (1968), a suspense thriller about witchcraft in New York City that became a popular hit and is regarded as a classic of its genre. The following year Polanski's wife, actress Sharon Tate, was murdered by Charles MANSON. The sensationalism and publicity surrounding the case drove Polanski to seek refuge in England, where he directed a controversial adaptation of Shakespeare's *Macbeth* (1971). Polanski's *Chinatown* (1974), starring Jack NICHOLSON, was an acclaimed mystery in the FILM NOIR style. *The Tenant* (1976), in which Polanski also acted, was a morbid psychological drama. Shortly thereafter Polanski was arrested in California for statutory rape. While awaiting trial he jumped bail, fled the U.S. and settled in France. His subsequent relationship with actress Nastassia Kinski, whom he directed in *Tess* (1981, an adaptation of Thomas HARDY's *Tess of the D'Urbervilles*) also caused considerable comment. His later films include *Pirates* (1986) and *Frantic* (1988). In 2003 Polanski received an Academy Award in absentia for his work on *The Pianist* (2002).

Police, The U.K. rock group; formed in 1976 by bassist Sting (Gordon Sumner), guitarist Andy Summers and drummer Stewart Copeland. They stirred little interest in the then punk-dominated music scene until all three dyed their hair blond. Their music was more cerebral than that of their peers, with a pronounced THIRD WORLD influence. Their breakthrough album, *Outlandos d'Amour*, included the hit "Can't Stand Losing You." Although they claim to still exist as a group, all have pursued solo careers since the early 1980s. Their last number-one hit as a group was "Every Breath You Take" in 1983. Sting's solo career included a critically dismissed Broadway appearance in *Threepenny Opera* and film work in *Dune* and *The Bride*. He has made many concert appearances on behalf of Amnesty International, as well as ecological causes.

Polisario (Popular Front for the Liberation of Saguia el Hamra and Río de Oro) Liberation group formed in 1973 for the purpose of liberating the Spanish- and later Moroccan-controlled territory of Western Sahara, also called the SAHARAWI REPUBLIC. Established by the indigenous peoples of Western Sahara, Polisario initially operated out of nearby Mauritania as a nomadic insurgent group. However, when in 1975 Spain granted independence to what had been called the Spanish Sahara, MOROCCO claimed the territory and dispatched troops to occupy it. In response, Polisario transferred its operations to western Algeria, to wage a guerrilla war against the Moroccan royal government with the help of its sympathizers in Western Sahara. Between 1975 and 1991, this insurgent conflict continued until both sides concluded a cease-fire in 1991 and permitted the dispatch of a UN peace-keeping force to supervise the truce. The Polisario-Morocco agreement called for an internationally supervised referendum to be held in Western Sahara six months following the establishment of the cease-fire, which would then determine the future status of the region. However, this timetable has yet to be implemented. In July 2003 Polisario officials gave their support to a new UN plan that would offer Western Sahara a limited degree of autonomy from Morocco, during which the UN would oversee preparations for a new referendum giving the region's inhabitants the choice of independence or annexation by Morocco. It remains uncertain whether this plan will be implemented, as both the Moroccan government and more radical elements within Polisario have voiced dissatisfaction with the accord.

political correctness ("pc") A controversial concept, and the term used to describe it, that surfaced in many American universities in the late 1980s and early 1990s. "Political correctness" or "pc" was especially prominent in humanities departments at Duke and Stanford Universities, among other institutions. Faculty members who advocated political correctness generally saw the classroom as a forum for instilling "progressive" or "correct" political ideals in their students. PC advocates criticized traditional courses

in Western literature and civilization as biased, and instead favored a “multicultural” approach to history and literature. Political correctness aimed at a larger criticism of Western society, which was viewed as controlled by white males at the expense of women and minorities. On some campuses, faculty members whose courses did not conform to so-called politically correct ideologies were denounced as racist or sexist and were often denied tenure. Critics of political correctness viewed it as a latter-day left-wing version of McCarthyism. The term was used derisively by those who saw it as an extremist attempt to rewrite history and stifle intellectual debate.

Pollard, Fritz (Frederick Douglas) (1894–1986) American athlete and coach. In 1916, after a sensational season as a halfback for Brown University, Pollard became the first black to be named to an all-American college football team. He was the only black head coach of an NFL team until Art Snell was named a head coach in 1989.

Pollock, Jackson (1912–1956) American painter. After finishing school in the West, Pollock moved to New York City and enrolled in the Art Students League (1930–33). Pollock was interested in abstract art. His paintings became splotches and splashes and drippings and textures, said by some critics to be thoroughly controlled. His paintings started the art movement that later became known as the “action school.” Beginning in 1973 his paintings brought the highest prices ever paid for contemporary art. His *The Search* was sold in 1988 for \$4,840,000.

Pol Pot (Saloth Sari) (1928–1998) The notorious leader of the Cambodian KHMER ROUGE was born in Kompong Thom Province, the youngest of seven children in a family that could be classified as “rich peasants.” He attended a Catholic primary school in Phnom Penh and Norodom Sihanouk High School in Kompong Cham City. In 1949 he received a scholarship for a two-year technician’s course at the Ecole Française de Radioélectricité in Paris. There Pol Pot joined a small group of Cambodian students in the “Marxist Circle.” He returned to Phnom Penh in 1953 and later joined the Vietnamese-

Khmer UIF cell in the eastern zone. In 1955 he returned to Phnom Penh and became involved with the Khmer People’s Revolutionary Party or KPRP. Throughout the 1950s he gained increasing control over party activities in the city. After the murder of party leader Tou Samouth in 1962 (perhaps by the Pol Pot faction), he became acting secretary general of the party. The struggle then returned to the countryside to garner strength for the eventual takeover of the country in April 1975. Pol Pot became prime minister in 1976, and his faction orchestrated policies of execution and forced labor from 1975 to 1979. He retreated in 1979 to the Thai border with an estimated 35,000 remaining Khmer Rouge troops. He and his forces remained the major threat to stability in CAMBODIA until the movement disintegrated, and he died in 1998.

Polya, George (1887–1985) American mathematician. As professor emeritus of mathematics at Stanford University, Polya was one of the leading research mathematicians of his time. Among his most important contributions to modern mathematics were the elaboration of the concept of “random walk” in probability theory and the formulation of a crucial theorem in combinatorial analysis that came to be known as the Polya enumeration theorem. He was also the author of one of the all-time mathematical best sellers, *How to Solve It*, a book that presented practical approaches to effective problem solving.

Pompidou, Georges (1911–1974) French political leader and president of FRANCE (1969–74). Originally a teacher, Pompidou served in WORLD WAR II until the fall of France (1940), when he returned to teaching. A member of the RESISTANCE, he joined Charles DE GAULLE’s staff in 1944. He became affiliated with the Rothschild bank in 1954, serving as its director. A trusted aide to de Gaulle, he became the principal adviser to the new president of the Fifth Republic in 1958 and was appointed premier in 1962. Pompidou played a strong role in settling the strikes and strife of 1968. However, de Gaulle did not reappoint him as premier in July of that year. After de Gaulle resigned in 1969, Pompidou was elected president.

During his five-year tenure in office, he attempted to deal with France’s economic problems by initiating such stern measures as a price freeze and devaluation of the franc. In foreign policy, he drew closer to other European nations and rejected de Gaulle’s opposition to Great Britain’s entry into the EUROPEAN ECONOMIC COMMUNITY.

Pompidou Center The popular name of the Centre National d’Art et de Culture Georges Pompidou; also known as Beaubourg for the Paris district in which it is located. Originally suggested by President Georges POMPIDOU in 1969 and named in his honor, the structure was completed in 1978. Designed by the Italian-British architectural team of Renzo Piano and Richard Rogers, the building caused a sensation during its first years due to its bold industrial design, which exposes its tubular steel framework and sports enormous, brightly painted utility pipes, brilliant red elevators and escalators in clear plastic tunnels. The center eventually became a Parisian landmark and now houses a museum of modern art, a reference library and research centers for music and industrial design.

Ponge, Francis (1899–1988) French poet; considered the last of the original generation of French surrealist poets, he was a precursor of French novelists such as Michel BUTOR and Alain ROBBE-GRILLET. Ponge was known for his “thing-poetry”—lengthy, detailed descriptions of objects, directed toward a restoration of the power and purity of language. His works included *Les parti pris des choses* (The defense of things) and *Le Savon* (Soap), an exhaustive prose poem on the subject of “soap.” SARTRE described Ponge’s poems as among “the most curious and perhaps the most important of the age.” A visiting professor at Columbia University, New York, in 1967, he was a recluse for the last 20 years of his life.

Ponnelle, Jean-Pierre (1932–1988) Opera director and designer. In New York Ponnelle’s work was generally received unsympathetically, particularly his versions of Wagner’s *Flying Dutchman* in 1979 and Massenet’s *Manon* in 1986. His productions have been seen in nearly every important opera house

in the world, as well as at the BAYREUTH and SALZBURG FESTIVALS.

Ponselle, Rosa (Rosa Ponzillo) (1897–1981) American opera singer famous for her broad musical range, impeccable technique and pure, welling voice. A dramatic soprano, she was arguably the greatest interpreter of Verdi heroines in this century. She made her debut at the Metropolitan Opera in New York in 1918, singing Leonora in *La Forza del Destino* opposite her mentor, Enrico CARUSO. The first American-trained singer to star at the Met, she sang 22 roles there until her retirement from the stage in 1937. In addition to such Verdian roles as Leonora, Violetta (*La Traviata*) and the title role in *Aida*, she also was noted for her performances as Bellini's *Norma* and Ponchielli's *Gioconda*. After her retirement, she served as artistic director of the Baltimore Opera and was also a vocal coach.

Pontecorvo, Gillo (1919–) Italian-born filmmaker. After working as a foreign correspondent in Paris, Pontecorvo soon demonstrated an interest in filmmaking. In 1956 he released a short-length production called *Giovanna*, which was one of several small vignettes that premiered along with similar pieces in the collaborative film *La rosa dei venti*. The following year, he garnered acclaim for his first full-length feature film, *La grand strada azzurra* (1957), for which Pontecorvo received a prize at the Karlovy Vary Festival. In 1960 Pontecorvo was nominated for an Academy Award for Best Foreign Language Film for *Kapo*, a dark drama of life in a World War II concentration camp. In 1966 Pontecorvo released *The Battle of Algiers*, the film for which he is best known. Depicting the urban guerrilla campaign of the National Liberation Front (FLN) for the independence of Algeria from French rule, *Algiers* earned Pontecorvo another Academy Award nomination in 1969 for Best Foreign Language Film, as well as nominations for Best Director and Best Original Screenplay. Following *Algiers*, Pontecorvo shot two additional feature-length films—*Burn!/Queimada!* a 1969 piece starring MARLON BRANDO that proved critical of French 19th-century colonial practices in the Antilles, and *Operation Ogre* (1979), a picture that examined terrorism in Spain during

the final months of Francisco Franco's dictatorship. He thereupon abandoned full-length movies to concentrate on producing short feature films throughout the 1980s and 1990s. In 1992 Pontecorvo returned to his documentary roots and filmed *Return to Algiers*, a piece that examined the accomplishments and challenges that had faced the Algerian government following its independence from French rule.

Pontoppidan, Henrik (1857–1943) Danish novelist. Pontoppidan's realistic novels depict the social fabric of Denmark in his time and reflect his advocacy of a more democratic society. His three major works are the trilogy *Det Forjaettede Land* (*The Promised Land*, published between 1891 and 1895), the octateuch *Lykke-Per* (*Lucky Peter*, published between 1898 and 1904) and the pentateuch *De Dødes Rige* (*The Kingdom of the Dead*, published between 1912 and 1916). With Karl GJELLERUP, Pontoppidan received the 1917 NOBEL PRIZE in literature. Pontoppidan also published five volumes of memoirs, *Drengenaar* (Boyhood Years, 1933), *Hamskifte* (Sloughing, 1936), *Arv og Goeld* (Inheritance and Debt, 1938), *Familieliv* (Family Life, 1940) and *Undervejs til mig selv* (On the Way to Myself, 1943).

Pool, Ithiel de Sola (1917–1984) Communications theorist and political scientist. A professor at the Massachusetts Institute of Technology, Pool was one of the first social scientists to use computer models extensively in research on human behavior. He explored the effects of various modes of communication on society and politics. His book *Candidates, Issues and Strategies* discussed computer simulations of voting behavior used in John F. KENNEDY's 1960 presidential campaign. His *American Business and Public Policy* was considered the standard reference work in the field of social communication. Pool was a fellow of the American Academy of Arts and Sciences.

pop art Term coined in the 1950s by the British critic Lawrence Alloway. It came to define a movement beginning in the late 1950s and flourishing in the '60s, largely in the U.S., that reacted against the sometimes pretentiously serious ABSTRACT EXPRESSIONISM by por-

traying objects from the everyday world in flat, colorful and impersonal images. Pop artists found their subjects in commercial products such as soup cans and soda bottles, comic strips, advertising art and food. They exalted the surface of things, eschewing the plumbing of artistic depths to celebrate the transitory objects of ordinary life with flashy immediacy. The fusion of high and popular culture that pop art represented had enormous influence on the arts and attitudes of the later 20th century. Among the important figures of the pop art movement are Roy LICHTENSTEIN, Claes OLDENBURG, James Rosenquist and Andy WARHOL.

Popeye The creation of E.C. Segar, Popeye the sailor made his first appearance on January 17, 1929, in the King Features syndicated comic strip *Thimble Theater*; he has been syndicated continuously ever since. Popeye appeared in his first animated cartoon in 1933, and more than 450 of these were made, most of them by Max Fleischer. In both the comic strip and the cartoons, Popeye has only average powers until he eats spinach, which gives him extraordinary strength; he uses his powers mostly to battle his archenemies Brutus (also known as Bluto), the Sea Hag and Alice the Goon. Other notable characters include Olive Oyl, Popeye's girlfriend; Swee'pea, his adoptive son; and Wimpy, the perennial moocher. The live-action motion picture *Popeye* was released in 1980, starring Robin Williams in the title role.

Popov, Dusko (1912–1981) Yugoslav-born double agent for Britain during WORLD WAR II, code-named "Tricycle." He passed Nazi secrets to London and gave false information to Berlin. In 1941 he gave an unheeded warning to the U.S. about Japanese plans to bomb the U.S. Navy base at PEARL HARBOR. In 1944 he helped divert German troops from the site of the Allied landing in NORMANDY. The author of a book of memoirs, *Spy, Counter Spy*, he was also thought to be one of the models for Ian FLEMING's fictional spy hero, JAMES BOND.

Popper, Hans (1903–1988) Viennese-born pathologist. As a young physician in Austria, Popper conducted pioneering biochemical research. After immigrating to the U.S. in 1938, he was based in Chicago for two

decades before moving to New York City. He was known internationally as the founder of hepatology, the study of the liver and its diseases.

Popper, Sir Karl Raimund (1902–1994) Austrian-British philosopher. While a professor of logic and scientific method at the London School of Economics from 1949 to 1969, Popper's insight into the basic procedure of science was fully formulated. His view was that science begins not with observation, but with problems. The problems are then addressed by developing hypotheses, or "conjectures," as Popper called them, which can hold up to repeated attempts to prove them false. Popper's belief, which has found significant support among working scientists, is that it is impossible to select among competing conjectures the one that is "true," but that science consists of ardent attempts at refutation and accepts only those conjectures that survive these attempts.

Popular Front Coalition governments made up of leftist and centrist elements that arose in the mid-1930s. In FRANCE, a Popular Front of socialists, communists and radical socialists led by Léon BLUM governed from 1936 to 1938. Created to preserve the Third Republic against the incursions of FASCISM, the Popular Front enacted a variety of social, labor and economic reforms. It was ultimately overturned by conservatives. In SPAIN, a Popular Front coalition of republicans, socialists, communists and syndicalists won the national elections of 1936. This government formed the republican core during the SPANISH CIVIL WAR (1936–39). A democratic-leftist Popular Front government also led CHILE from 1938 to 1946, instituting many important social reforms.

Porgy and Bess Musical show by American composer George GERSHWIN that blended the idioms of black folk music and the forms of traditional grand opera. Dubose Heyward's novel, *Porgy* (1925), and the subsequent THEATRE GUILD stage version (1927) told the story of the ill-starred love between the lame Porgy and the faithless Bess, set against the background of Catfish Row (based on Cabbage Row in Charleston, South Carolina). Intrigued by the story's musical possibilities,

composer George Gershwin collaborated with librettist Ira GERSHWIN and Heyward, spending many weeks living and researching the life and music of the blacks on Folly Island, near Charleston. The opera, directed by Rouben MAMOULIAN, premiered at the Theatre Guild's Alvin Theatre on October 10, 1935, with a mostly black cast, including Todd Duncan as Porgy, Anne Brown as Bess and John Bubbles as Sportin' Life. The initial critical reception was mixed. Black composer Duke ELLINGTON deplored Gershwin's "lamp-black Negroisms;" and other critics like Virgil THOMSON attacked its presumed white chauvinism. With the 1942 revival (five years after Gershwin's death) the opera began its real success. In the 1950s it toured Europe, the Near East, the Soviet Union and Latin America. Producer Samuel Goldwyn made a movie version in technicolor in 1959. And since 1970 it has entered the repertoires of many opera companies, including the Metropolitan Opera. In the concert hall arranger Robert Russell Bennett's symphonic suite (composed for conductor Fritz REINER in 1941) has been a popular staple. According to biographer David Ewen, Gershwin did not directly quote Negro melodies but assimilated folk idioms into his own musical expression, claiming to bring this musical tradition for the first time to the legitimate stage. Many blacks today continue to question the validity and the success of that assertion. The lyrics to the show's standards, like "It Ain't Necessarily So," "Summertime," and "I Got Plenty o' Nuttin'," were the results of a close collaboration between Ira Gershwin and Dubose Heyward.

Pork Chop Hill, Battle of Colloquial name for Hill 255, situated on the eastern side of the Iron Triangle along the Yokkokchon River in Korea; site of fighting during the KOREAN WAR. Pork Chop Hill was successfully held by UN forces against attacks from the Chinese army in November 1952 and March and April 1953. On July 6, 1953, Chinese forces attacked again and gained a foothold on the hill, which UN counterattacks on July 7, 8 and 9 failed to dislodge. General Maxwell TAYLOR decided that Pork Chop Hill's tactical value did not justify additional casualties, and on July 10–11, the UN forces evacuated. Two

weeks later, the war ended, and Pork Chop Hill became part of the Demilitarized Zone separating North from South Korea.

pornography and obscenity "Pornography" is sexually explicit written or visual material. "Obscenity" refers to something that is offensive to modesty or decency. The U.S. legal system has devoted considerable attention to defining these terms and determining the extent to which governments can control material with sexually explicit content. On the one hand, the U.S. Constitution's First Amendment unequivocally provides that "no law" may abridge freedom of speech. However, legislatures and the courts have attempted to balance First Amendment rights against majority sensibilities. Generally, U.S. courts upheld state and federal laws banning obscene materials—the courtroom test for obscenity being whether the material tended to deprave and corrupt. By 1957 the Supreme Court had adopted a standard that a work was obscene and not constitutionally protected if an average person using community standards found the dominant theme appealed to the prurient interest. In 1973 the Court refined this test. Material could be banned as obscene only if it was totally without redeeming value, and taken as a whole lacked serious literary, artistic, political or scientific value.

Porsche, Ferdinand (1875–1951) Automotive engineer, designer and manufacturer known for his development of the original VOLKSWAGEN and the sequence of sports cars that carry the Porsche name. Responsible for many automotive designs of the 1920s when he was employed by Daimler-Benz, Porsche established his own firm with his son Ferdinand ("Ferry") Porsche II in Stuttgart, where he worked on the Volkswagen design in the 1930s. The first Porsche car was produced in 1949 by a factory in Austria, with a body designed by Erwin KOMENDA using elements of the regular Volkswagen. It was marketed in 1952 as the Porsche 356 and quickly became a classic, although its bulbous, aerodynamic design was sometimes criticized as clumsy. The Type 911 was introduced in 1964 with a somewhat modified body design. Successive designs for Type 912, the Targa, and the mid-engined 914 built the reputation

of the Porsche as a prestigious status symbol as well as a sports car of outstanding performance.

Port Arthur (Lüshun) City in north-eastern CHINA, at the southern end of the Liao-tung Peninsula. In 1898 Russia obtained a lease on the peninsula. Port Arthur subsequently figured prominently in the RUSSO-JAPANESE WAR (1904–05). A Japanese surprise attack on Port Arthur (February 8, 1904) trapped Russia's Pacific fleet here. The Japanese laid siege to Port Arthur and captured it on January 2, 1905. The city remained under Japanese control until the end of WORLD WAR II, when it became the headquarters of a joint Sino-Soviet administration. It was turned over to China 10 years later.

Porter, Cole (1891–1964) Celebrated American lyricist and song writer. Porter came from a wealthy Indiana family, studied law at Yale, served in the French Foreign Legion, studied music under Vincent D'INDY at the Schola Cantorum in Paris and, in general, lived the life of a playboy-dilettante. By the late 1920s, he had turned increasingly to show music. Early works, like "You Do Something to Me" (from *Fifty Million Frenchmen*, 1929), "What Is This Thing Called Love?" (from *Wake Up and Dream*, 1929) and "Night and Day" (from *Gay Divorce*, 1932), displayed Porter's trademarks: unexpected chromatics, intricate rhythms and ingeniously naughty lyrics. He wrote the scores to more than 20 shows, including *Anything Goes* (1934) and *Kiss Me Kate* (1948); six motion pictures, including *Born to Dance* (1936) and *The Pirate* (1948); and one television musical, *Aladdin* (1958). Cary GRANT portrayed him in the movie *Night and Day* (1947), which failed to come to terms with the facts of his life and the quirky, mercurial, sometimes hedonistic, aspects of his temperament. A 1937 horseback riding accident left Porter with two crushed legs and damage to his nervous system, necessitating 30 operations over the next 20 years. After a leg was amputated in 1958 he no longer wrote songs, living as a virtual recluse until his death.

Porter, Katherine Anne (1890–1980) American novelist and short

story writer. Porter's elegantly crafted writing won critical acclaim for more than 40 years. Her literary work, which bore the influence of her Deep South upbringing in Texas and Louisiana, often evoked dark, brooding themes: the sense of the past, the collusion between good and evil and the reality of self-betrayal. Her most famous work was the bestselling 1962 novel *Ship of Fools*, which was made into a film. She won the PULITZER PRIZE and the National Book Award in 1966 for her short fiction *The Collected Stories of Katherine Anne Porter*; among her other works were *Noon Wine*, *The Old Order*, *Flowering Judas*, *Pale Horse*, *Pale Rider*, *Maria Concepcion* and *Hacienda*.

Porter, William Sydney See O. HENRY.

Portsmouth, Treaty of Treaty negotiated September 5, 1905, at Portsmouth, New Hampshire, ending the RUSSO-JAPANESE WAR. It was mediated by U.S. president Theodore ROOSEVELT. MANCHURIA was evacuated by both countries and was returned to CHINA. The defeated Russians turned over south SAKHALIN ISLAND and their leases over PORT ARTHUR and the Liaotung Peninsula to JAPAN. Japan superseded RUSSIA as the leading power in KOREA and adjacent areas. President Roosevelt's mediation confirmed the status of the U.S. as a world power.

Portugal Portugal covers an area of 34,308 square miles along the Atlantic coast of the Iberian Peninsula in southwest Europe and includes the semi-autonomous Azores and Madeira

PORTUGAL

1908	King Carlos I is assassinated.
1910	Republic of Portugal declared.
1911	Manuel de Arriagas is elected Portugal's first president.
1916	Germany declares war on Portugal.
1932	António de Oliveira Salazar becomes prime minister and suppresses opposition parties.
1949	Becomes founding member of NATO.
1968	Salazar vacates the premiership and is succeeded by Marcello Caetano.
1974	Leftist army officers seize power in a coup and Antonio de Spínola is named president.
1974–75	Portugal grants independence to its colonies, Guinea-Bissau, Mozambique, Cape Verde, São Tomé and Príncipe and Angola.
1976	In assembly elections General António Ramalho Eanes becomes president and Mário Soares becomes prime minister.
1982	Full civilian government restored.
1986	Soares becomes first civilian president in 60 years, succeeding Eanes; Portugal joins the EC.
1987	Aníbal Cavaco Silva is the first president elected with an overall assembly majority since the 1974 revolution.
1989	Fire destroys the old Chiado district in Lisbon.
1991	Soares is reelected president, and the PSD retains its majority in parliamentary elections.
1995	Cavaco Silva resigns as prime minister; the Socialist Party is installed as a minority government under Prime Minister António Guterres.
1996	Jorge Sampaio, a Socialist, wins the presidency.
1999	Portugal returns Macao to China.
2001	Sampaio is reelected president.
2002	Following general elections, José Manuel Durão Barroso, leader of the Social Democrats, forms a center-right coalition government. The euro enters into circulation as the new currency.
2003	Forest fires destroy vast areas of the country.
2004	Prime Minister Barroso resigns; Pedro Santana Lopes, his successor as leader of the Social Democrats, forms a government.
2005	The Socialists win the general elections. Wildfires sweep across the country and the government asks for outside assistance.

Islands. King Carlos's assassination in 1908 led to instability, insurrection and the declaration of a republic in 1910. Heavy losses during WORLD WAR I brought renewed turmoil, which only stabilized when a popular military coup made General Antonio Carmona president in 1926. Under prime minister Antonio de Oliveira SALAZAR (1932–

68) Portugal stayed out of WORLD WAR II, became a founding member of NATO (1949), joined the UNITED NATIONS (1955), witnessed social reforms, and engaged in costly wars to retain its African colonies (see ANGOLAN WAR OF INDEPENDENCE). A bloodless coup in 1974 toppled Salazar's successor, Marcello CAETANO, and brought General

António Ramalho Eanes to the presidency. His government recognized the independence of former Portuguese colonies, and restored full civilian government by 1982. In the 1986 election Mário Soares became Portugal's first civilian president in 60 years. From 1996 to 2002 the Socialist Party candidate Jorge Sampaio held the presidency.

Portugal returned Macau, its last overseas territory, to China in 1999. In 2002 Portugal adopted the euro as its national currency. Severe forest fires have plagued the country from 2003 to 2005.

Pospelov, Pyotr N. (1898–1979) Soviet propagandist, principal theoretician of the COMMUNIST PARTY of the Soviet Union, and editor of PRAVDA. He was one of the most durable figures in the Kremlin. He survived the Stalinist PURGES of 1936–37, de-Stalinization and KHRUSHCHEV's own downfall.

Post, Wiley (1899–1935) American aviator. Post began flying in 1924 by investing money received from insurance for the loss of an eye in an accident. He won the Chicago-Los Angeles Air Derby in 1930 flying the *Winnie Mae*. From his home in Oklahoma City, he served as an aerial navigation instructor and adviser for the U.S. Army. Post set many records in his career. He made the first around-the-world flight between June 23 and July 1, 1931, with Harold Gatty as navigator. He and Gatty wrote about their experience in *Around the World in Eight Days* (1931). Post and his passenger, humorist Will ROGERS, were killed when their plane crashed near Point Barrow, Alaska.

postimpressionism Term coined in 1910 by the British art critic Roger FRY to refer to the work of various French painters who worked from about 1880 to 1910. While differing widely in stylistic approach and technique, the postimpressionist artists were united in their rejection of the aesthetics of Impressionism. Major figures in the group include Cezanne, Gauguin, Toulouse-Lautrec and Van Gogh. The term has also been used to describe the neoimpressionist work of Seurat and Signac.

postmodernism Ill-defined term that refers to the fragmented philosophical and aesthetic influences from the past that continued to influence—often in unexpected and bizarre ways—much of late-20th-century culture. The central idea behind postmodernism is that art and philosophy have, over the past two millennia, already explored all the major creative possibilities open to them. Postmodern cul-

ture, which is generally held to have come to the forefront in the 1950s and '60s, merely reassembles past ideas into old-new juxtapositions that pay homage to those ideas but also place them in an ironic or absurdist light. The artist and philosopher Marcel DUCHAMP anticipated many of the key insights of postmodern aesthetics. Postmodernism has found expression in virtually all the creative arts as well as in architecture and design.

Potemkin mutiny Mutiny that occurred on the Russian battleship *Potemkin* in the Black Sea while anchored off Odessa on June 14, 1905. The mistreated sailors killed the captain and most of the officers, then put the ship out to sea but eventually surrendered. The mutiny and the brutal reprisals that ended the incident are best known as the subject of the classic film *The Battleship Potemkin* (1925) by the pioneering Soviet filmmaker Sergei EISENSTEIN.

Potsdam Conference The last great Allied summit meeting of WORLD WAR II, held from July 17 to August 2, 1945, at Potsdam, Germany. The U.S. delegation was led by President TRUMAN, the USSR by Premier STALIN and the British by Prime Minister CHURCHILL (replaced by his successor, Clement ATTLEE). The conference reaffirmed and clarified agreements already reached at the YALTA CONFERENCE regarding a defeated GERMANY. It stipulated that Germany would not have a

central government but would be administered in four Allied zones: American, British, Russian and French. It decentralized the German economy, agreed upon German disarmament and settled on the punishment of Nazi war criminals. The conference also established a council of foreign ministers to pass on matters of peace settlements and draft peace treaties. The POTSDAM DECLARATION of July 26 also issued an ultimatum to JAPAN, promising destruction of the nation if unconditional surrender was not forthcoming. Disagreements at Potsdam between the Soviets and the Western allies over German reparations, boundaries and unification and over the nature of eastern Europe and the Mediterranean region were portents of the coming COLD WAR.

Potsdam Declaration Ultimatum to Japan issued on July 26, 1945, as a part of the WORLD WAR II POTSDAM CONFERENCE. In it the U.S., Great Britain and China demanded JAPAN's unconditional surrender and, without mentioning the existence of an ATOMIC BOMB, threatened the complete destruction of Japan if the declaration was not acceded to. It also explained Allied intentions in postwar Japan, including the dissolution of the Japanese Empire, the demobilization of the nation's military forces, the prosecution of war criminals, the occupation of the country and the creation of a democratic form of government. Japan did not accept the declaration

Joseph Stalin, Harry Truman and Winston Churchill at the Potsdam Conference (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

until the USSR joined the Allies in the Asian war. HIROSHIMA and NAGASAKI were destroyed by U.S. nuclear attacks, and Emperor HIROHITO called for surrender.

Potter, (Helen) Beatrix (1866–1943) British illustrator and author. Throughout a lonely childhood, Potter amused herself by sketching nature. Her talent was brought to bear in a series of children's books beginning with *The Tale of Peter Rabbit* (1901), which she had published herself. Her third book, *Squirrel Nutkin* (1903), was professionally published and brought her great success. The delicately illustrated books, which include also *The Tailor of Gloucester* (1902) and *Johnny Town-Mouse* (1918), continue to be enormously popular with children and adults worldwide. Potter kept a journal in an elaborate code, which was finally deciphered and published as *The Journal of Beatrix Potter* in 1964. Her home at Sawrey in the Lake District is open to the public.

Poujadists Followers of Pierre Poujade, founder of a right-wing political movement (Union de Défense des Commerçants et Artisans) violently active in FRANCE between 1954 and 1958. The movement's membership was petit-bourgeois and its ideology antisocialist, anti-intellectual and anti-European. It won 52 seats in the National Assembly in 1956 but declined after Charles DE GAULLE returned to politics and the Fifth Republic was founded.

Poulenc, Francis (1899–1963) French composer and pianist. Born in Paris of a well-to-do musical family, he began to study the piano as a small child. Influenced by the style and the aesthetics of Eric SATIE and the poetry of Jean COCTEAU, Poulenc was a member of the postimpressionist musical group Les six. His music combines wit, clarity, directness and lyricism. Many of his finest works are intimate piano pieces and songs. From 1936 on he composed sacred music, and in 1944 he began writing operas. Among his best known religious music is the *Mass in G* (1937). His most celebrated opera is *Dialogue of the Carmelites* (1957). Poulenc also wrote ballet music, concertos, chamber pieces and choral works.

Poulter, Thomas C. (1897–1978) American scientist, inventor and explorer. Poulter was second in command on Admiral Richard BYRD's second expedition to the Antarctic (1933–35). He led the expedition that saved Byrd's life after Byrd had spent part of the winter alone. As an inventor, Poulter held more than 75 patents, including ones for antisubmarine devices and for seismic methods of discovering oil. He was later a research consultant for Stanford Research International in California and established its laboratory for the study of biological sonar and its application to the blind.

Pound, Ezra (Loomis) (1885–1972) American poet, critic and translator. Born in Hailey, Idaho, Pound was educated at Hamilton College and the University of Pennsylvania, where he met W. C. WILLIAMS and Hilda Doolittle (HD). In 1907 he went to Europe, settling first in England, where he was briefly an informal secretary to YEATS; then in Paris, where he knew Gertrude STEIN and HEMINGWAY; and finally in 1925 in Italy. Pound was a charismatic literary entrepreneur whose grand vision and generous support of major writers such as JOYCE, ELIOT and Marianne MOORE placed him at the forefront of literary MODERNISM. He created both Vorticism and IMAGISM. *A lume spento* (1908), *Personae* (1909), *Lustra* (1916) and especially *Hugh Selwyn Mauberly* (1920) broke the static mold of GEORGIAN verse

American poet and translator Ezra Pound (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

with a voice both shockingly modern and classically serene. In 1925 he began publishing his most important and controversial work, the *CANTOS*, on which he continued to work until his last years. A scholar of wide, if sometimes sketchy, erudition, Pound drew on Anglo-Saxon, Oriental, French Provençal and Italian Renaissance traditions.

Increasing megalomania led to an obsession with the economic theory of SOCIAL CREDIT and to ANTI-SEMITISM. An admirer of MUSSOLINI and FASCISM, during WORLD WAR II Pound made radio broadcasts for the Fascists in Italy. Indicted for treason in absentia in 1942, he was arrested by U.S. forces toward the end of the war and committed to St. Elizabeth's Hospital in Washington in 1946. In 1949 a violent controversy erupted over his receipt of the BOLLINGEN PRIZE. After his release in 1958, he returned to Italy and entered on a period of bitter, self-enforced silence. To this day the great poet who was also a traitor to his country arouses mixed emotions.

Poveda Burbano, Admiral Alfredo (1925–1990) Ecuadoran politician. In 1976 he headed a military junta that seized control of ECUADOR from another military dictator, General Guillermo Rodríguez Lara. The country's last military dictator, his government wrote a constitution in 1978. The government gave up power the following year to elected president Jaime Roldos.

Powell, Adam Clayton (1908–1972) Black American congressman and CIVIL RIGHTS activist. The son of a clergyman, the flamboyant Powell was one of the most outspoken and controversial figures in the American Civil Rights movement. He was widely admired for his fiery oratory on behalf of civil rights causes, but many critics considered him a demagogue (see DEMAGOGUES). A Democrat, he represented New York's Harlem district in the House of Representatives from 1945 to 1969. He served as chairman of the House Committee on Education and Labor (1960–67). In 1960 he was involved in a widely publicized lawsuit by a woman he accused of being a "bag woman" for police graft. Thereafter he maintained a home on the island of Bimini in the Bahamas. In 1967 a House committee unseated him on charges of

Congressman and civil rights activist Adam Clayton Powell (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

misusing public funds, but he was re-elected in a special election. He returned to Congress in 1969 but was fined \$25,000 and deprived of his seniority. That year the Supreme Court overturned his expulsion from the House of Representatives. He was defeated for reelection in 1970.

Powell, Anthony (1905–2000) British novelist, essayist and memoirist. With his contemporaries Graham GREENE and Evelyn WAUGH, Powell was one of the most acclaimed and widely read of modern British novelists. He was an influential figure in British letters both as a novelist and by virtue of his work as an editor and literary critic. During the 1930s Powell worked in publishing in London and was briefly a scriptwriter in HOLLYWOOD. During this time he wrote several interesting but minor novels. He served in WORLD WAR II. His magnum opus is the 12-volume novel sequence, *A DANCE TO THE MUSIC OF TIME*, whose individual volumes appeared from the early 1950s through the mid-1970s. In addition, Powell published a four-volume autobiography—*Infants of the Spring* (1976), *Messengers of the Day* (1978), *Faces in My Time* (1980) and *The Strangers All Are Gone* (1982). Conservative in outlook, Powell's writings focus on the transformations in the political and social fabric in Britain from the 1920s to the modern era.

Powell, Colin L. (1937–) American soldier and public official, chairman of the Joint Chiefs of Staff during the PERSIAN GULF WAR. Born in the HARLEM district of New York to parents who had emigrated from Jamaica, Powell was educated at public schools in Harlem and the Bronx. He attended City College, where he was a member of the Reserve Officers Training Corps and was graduated at the top of his ROTC class as a cadet colonel. In 1962 he was sent to VIETNAM, where he saw a tour of duty as a military adviser. Later, while maintaining his military affiliation and rising through the ranks, Powell held a series of sensitive posts in the administrations of Jimmy CARTER and Ronald REAGAN. He was an assistant to Defense Secretary Caspar Weinberger; in 1986 he was appointed deputy national security advisor, becoming national security advisor the following year. In 1988 he was promoted to four-star general and assigned to head the U.S. Army Forces Command. In 1989, he was named chairman of the Joint Chiefs of Staff, thus becoming the first black to hold the highest post in the U.S. military. In this capacity, he came to international prominence as a key adviser to President George H. W. BUSH during the PERSIAN GULF WAR. Powell was named secretary of state by President George W. BUSH. He played a major role in defending the Bush administration's policy toward Iraq prior to the U.S. invasion that toppled the regime of Saddam HUSSEIN in 2003. Following the 2004 presidential election, Powell resigned his post as secretary of state.

Powell, (John) Enoch (1915–1998) British politician. Powell was educated at Trinity College, Cambridge, and served there as a classics don from 1934 to 1938. After serving as a professor of Greek at the University of Sydney, Australia, he joined the army and rose to the rank of brigadier by the end of WORLD WAR II. A member of the CONSERVATIVE PARTY, Powell was elected to the House of Commons in 1950 and subsequently served as parliamentary secretary to the minister of Housing and Local Government in 1955, financial secretary to the Treasury from 1957 to 1958, and minister for health from 1960 to 1963 under Harold MACMILLAN. Powell opposed Britain's entry into

the EUROPEAN ECONOMIC COMMUNITY. His highly publicized views, including a call for Britain to curtail nonwhite immigration, caused much controversy. Powell left the Conservative Party in 1974 but returned to Parliament as an Ulster Unionist. He was reelected in 1979 and 1983. Powell, who was also a poet, published *Collected Poems* in 1990.

Powell, Lewis Franklin Jr. (1907–1998) U.S. Supreme Court associate justice. Powell was born in Suffolk, Virginia, and received both his B.A. and his law degree from Washington and Lee University, the latter in 1931. President Richard NIXON appointed Powell to the Supreme Court in 1971, to replace Hugo BLACK. A pragmatist who shunned extreme positions, Powell generally sided with the Court's conservatives on business and criminal law issues and with the liberals on social issues such as ABORTION, civil liberties and separation of church and state. In June 1987 Powell retired from the Court, sparking a furor over who would be his successor. On July 1, President Ronald REAGAN nominated Robert BORK to the Court, but after an acrimonious battle, the Senate refused to confirm Bork. Reagan's second choice, Douglas Ginsburg, withdrew his name from nomination after it was reported that he had experimented with marijuana. Finally, in February 1988, Anthony KENNEDY took Powell's seat on the High Court.

Powers, John A. "Shorty" (1922–1980) American Air Force officer. Powers became widely known in the early 1960s as "the voice of Mission Control" who described the early U.S. spaceflights over radio and television and coined the popular phrase, "everything is A-OK." Because of his close association in the public mind with the MERCURY project astronauts, the public came to regard him as the "eighth astronaut."

Powys, John Cowper (1872–1963) British author. Although he also wrote poetry and essays on a variety of topics, Powys is best known for his idiosyncratic historical novels, which frequently evoke the Dorset countryside where he was raised. His first novel was *Wood and Stone* (1915), but

his first major success came with *Wolf Solent* (1929). His best known work is *A Glastonbury Romance* (1932), an ambitious historical novel influenced by myth and legend. He also produced a notable *Autobiography* (1934). Later works include *Porius* (1951) and *The Brazen Head* (1956). There are conflicting critical assessments of Powys's ability as a writer. Powys's two brothers were also men of letters. **Llewelyn Powys** (1884–1939) was an essayist and novelist whose work includes *The Pathetic Fallacy* (1928). **Theodore Francis Powys** (1875–1953) was the author of *Mr. Weston's Good Wine* (1927).

pragmatism See William JAMES.

Prague Spring Term used to characterize a series of economic and political reforms in CZECHOSLOVAKIA, and the period during which they occurred. The Prague Spring developed under the guidance of Alexander DUBČEK, who had been named first secretary of Czechoslovakia's Communist Party on January 5, 1968. It also coincided with the ouster of hard-line communist president Antonín NOVOTNÝ (March 22, 1968), who had long kept Czechoslovakia in the grip of STALINISM. At a conference in Brno (March 16, 1968), Dubček promised the "widest possible democratization" for the country, including the relaxation of censorship. He promised to build "socialism with a human face" and to "bring in new people who can carry out the new policies." The Prague Spring reforms also included greater independence for the government, the courts, trade unions and economic enterprises. On April 5, 1968, the Communist Party leadership adopted a plan of liberal economic reforms. In a speech to the Czechoslovakian parliament on April 24, 1968, Premier Oldřich ČERNÍK announced that noncommunists would be allowed to participate in the government. That same day, Dubček announced that "we cannot go back and we cannot go halfway," and warned that "moving along unexplored paths . . . requires caution and courage." At the same time, he assured the Soviet Union that Czechoslovakia would remain its ally in the WARSAW PACT. A wave of hope swept through Czechoslovakia. However, the sudden SOVIET INVASION

OF CZECHOSLOVAKIA (August 20–21) brought the Prague Spring to an abrupt end. Despite the reimposition of a hard-line communist government, the promises of the Prague Spring remained alive during the next 20 years and were realized in December 1989, when the communists were finally swept out of power.

Prairie School Group of architects who developed an early form of MODERNISM in the American Midwest between 1890 and 1914. The early works of Frank Lloyd WRIGHT (who called his residential designs "Prairie Houses") are the best-known examples of the style, but it also includes the designs of Louis Sullivan and a number of associates and followers of Sullivan and Wright—a body of work with its own distinctive character, quite different from European modernism. Like modernism, the Prairie School is nontraditional and strives for an organic union of strong, simple forms. But unlike orthodox modernism, it makes considerable use of ornament, often based on naturalistic forms suggestive of ART NOUVEAU and earlier Victorian styles. The best known Prairie School figures (aside from Sullivan and Wright) are George G. Elmslie, George W. Maher, Walter Burley Griffin and Marion Mahoney, who was the wife of Griffin.

Pravda The official organ of the Communist Party Central Committee in the former Soviet Union. Founded in opposition to the establishment by the BOLSHEVIKS in 1912, *Pravda* ("truth") had a circulation of about 12 million and was read daily by more than 90 percent of COMMUNIST PARTY members. The paper's value in informing the Soviet public was secondary to its role in shaping the "new Soviet man" and providing the most authoritative Kremlin interpretation of current events. It followed a rigid format from its inception, with reports of worker productivity, official speeches, party proceedings and economic news appearing on the front page, while domestic and international news was found in the back. In the era of GLASNOST, *Pravda* addressed such previously off-limit topics as high-level corruption, the Soviet presence in AFGHANISTAN, the nuclear disaster at CHERNOBYL, drug problems and other

social ills, though disinformation continued. The paper was governed by an "Index of Information Not to Be Published in the Open Press," and was censored once before printing and once before distribution (the censor's number appeared at the foot of the back page of every edition). After the disintegration of the USSR in December 1991, *Pravda* became a private leftist publication within the Russian Federation.

Prebisch, Raúl (1901–1986) Argentine economist. He helped shape economic development throughout the developing world. In the 1950s he headed the United Nations Economic Commission for Latin America. As director of the UN Conference on Trade and Development in the 1960s, he won important trade preferences for THIRD WORLD countries and helped obtain increased funding for various regional development banks. Most recently he had been an economic adviser to Argentine president Raúl ALFONSÍN.

prefrontal lobotomy See Egas MONIZ.

Prem, Tinsulanonda (1920–) Prem was a career military man before serving as prime minister of THAILAND from 1980 to 1988. He was educated at Chulachomklao Royal Military Academy in Bangkok and began his military career as a sublieutenant in 1941. He became the commander of cavalry headquarters in 1968, then assistant commander in chief of the Royal Thai Army in 1977. In 1977 he was appointed minister of the interior and in 1979 minister of defense. Prem began his tenure as prime minister in 1980 and served the longest of any civilian prime minister before he declined to accept a fourth term after general elections in July 1988. He retired from the army before heading the government, thus acting as a civilian, nonpartisan leader. The balance he struck between the political parties and the military enabled him to sustain a fragile democracy throughout his tenure. He thwarted two coup attempts (1981, 1985), thus diluting the military's influence on mainstream politics.

Preminger, Otto (1906–1986) Austrian-born movie producer and director. He achieved great success in the U.S. film industry, despite his tempestuous

temper and his choosing to work outside the HOLLYWOOD studio system. He emigrated to the U.S. from Vienna in 1935 and achieved a measure of success on Broadway before making his first American film, the murder mystery *Laura* (1944). He challenged the industry's Production Code Office and the Roman Catholic Church when he produced *The Moon Is Blue*, a 1953 adaptation of a mild Broadway sex comedy. The U.S. Supreme Court ultimately ruled that local censorship boards could not block the showing of the film. Other notable Preminger films were *Carmen Jones* (1954), *The Man with the Golden Arm* (1955), *Anatomy of a Murder* (1959), *Exodus* (1962) and *Advise and Consent* (1962).

Prendergast, Maurice (1859–1924)

American painter. Born in St. John's, Newfoundland, Canada, he spent his youth in Boston. He traveled to Europe in 1886, studying art in Paris (1891–94) and coming under the influence of such modernist movements as neoimpressionism and symbolism. Throughout his life Prendergast made frequent visits to Europe, traveling to various countries then returning to New York City. He joined with other artists in the formation of the EIGHT in 1908 and was an organizer of the ARMORY SHOW in 1913. Working in oil and watercolor, Prendergast evolved a tapestry-like postimpressionist style that employed lively brushstrokes and rich color in capturing landscapes and figures. He was particularly adept at portraying open-air promenades, as in his *Central Park* (1901) in the collection of the Whitney Museum of American Art, New York City.

Presley, Elvis (Aaron) (1935–1977)

American singer, performer and film star. One of the most popular entertainment figures of the 20th century, Presley helped establish ROCK and roll as a dominant musical force. Born in Tupelo, Mississippi, as a child he sang gospel tunes in his neighborhood church. In 1953, while working as a truck driver in Memphis, Tennessee, he recorded two songs for his mother. These recordings led to his discovery by Memphis-based Sun Records, which launched Presley's career as a white singer who could blend country, gospel and black rhythm and blues. "Heartbreak Hotel" (1956) was the first Presley song to reach num-

American rock and roll pioneer Elvis Presley, 1957 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

ber one on the musical charts. Over the next two decades, he recorded numerous hits, including "Don't Be Cruel," "Hound Dog," "Jailhouse Rock," "Love Me Tender" and "Are You Lonesome Tonight." He also starred in over 20 films and in several television specials. The victim of his own spectacular success, Presley was plagued by personal problems, including drug addiction, and he died at age 42. His phenomenal popularity, however, continued after his death.

Pressburger, Emeric (1902–1988)

Hungarian-born British screenwriter. His widely acclaimed films made in collaboration with director Michael POWELL included *A Canterbury Tale* (1944), *Black Narcissus* (1947) and their most famous effort, *The Red Shoes* (1948). Pressburger won an ACADEMY AWARD for best original story for *49th Parallel* (1941), considered one of the most effective Allied PROPAGANDA films of WORLD WAR II.

Presser, Jackie (1926–1988) U.S. union leader. Presser was president of the International Brotherhood of Teamsters from 1983 until his death;

his predecessor, Roy WILLIAMS, was convicted of conspiring to bribe a U.S. senator. Presser faced federal charges of using union funds to pay organized-crime figures for work they had not performed. The Justice Department filed suit asking that the union's leaders be replaced by a court-appointed trustee. In 1986, the White House Commission on Organized Crime concluded that neither Williams nor Presser would have become president without the help of Anthony "Fat Tony" Salerno, reputed head of the New York-based Genovese crime family. Salerno was later acquitted on charges of rigging union elections.

Prevert, Jacques (1900–1977) French poet and screenwriter. Prevert was the most popular poet of his time in France. He is noted for his precise use of language, his gruesome images and the use of humor to underscore his social and political ideas. Initially influenced by the surrealists, he was first published in the surrealist monthly *Commerce*. Major poetry collections include the immensely popular *Paroles* (1946), *Lumière d'homme* (1955) and *Imaginaires* (1970). In addition, Prevert wrote many

screenplays, such as the acclaimed *Le Crime de Monsieur Lange* (1935) and *Les Enfants du paradis* (1944).

Previn, André (Ludwig Andreas Priwin) (1929–) American conductor, pianist and composer. Born in Berlin, he began studying music at the age of six, and by the age of eight he was an accomplished pianist. He and his family fled Hitler's Germany for Paris, where young Previn studied at the Paris Conservatory for a year, and emigrated to the U.S. in 1939, settling in Los Angeles. He studied with Mario CASTELNUOVO-TEDESCO, composed film music, played the piano and conducted a youth orchestra while still a teenager. Previn became a U.S. citizen in 1943. His first celebrity was as a JAZZ pianist, and in 1945 he began a series of popular jazz recordings. He also achieved success as a composer and arranger of film music, winning ACADEMY AWARDS for the arrangements for *Gigi* (1958), *Porgy and Bess* (1959), *Irma La Douce* (1963) and *My Fair Lady* (1964). During the 1960s Previn's interest turned mainly to classical music. He became the permanent conductor of the Houston Symphony Orchestra (1967–69), the London Symphony Orchestra (1969–79), the Pittsburgh Symphony Orchestra (1976–84) and the Los Angeles Philharmonic (1984–89). In 1993 Previn accepted an appointment as the conductor-laureate of the London Symphony Orchestra. His subsequent honors have included a knighthood (KBE) by Queen Elizabeth II (1996) and Kennedy Center Honors in the U.S. (1998) in recognition of his musical accomplishments.

Price, Florence Beatrice Smith (1888–1953) Composer. Graduating from the New England Conservatory in 1906, Price taught at Shorter College (1906–10) and at Clark University (1910–12). After further study at Chicago Musical College and the American Conservatory, she won several competitions, including the Wanamaker Prize (1931–32), and in 1933 premiered her *Symphony in E Minor* with the CHICAGO SYMPHONY, the first by a black woman with a major orchestra. Price's works drew on black spirituals and other tunes, avoided jazz and kept in the mainstream of late European romanticism. Her songs were

popularized by Marian ANDERSON and others.

Price, (Mary Violet) Leontyne Price (1927–) American singer. Acclaimed for her passionate artistry and the remarkable range of her rich soprano voice, Price first gained recognition for the role of Bess in George GERSHWIN'S *PORGY AND BESS*, when it toured the U.S. and Europe in 1952–55. She made her Metropolitan Opera debut as Leonora in Verdi's *Il Trovatore* (1961) and became a leading prima donna of the company until her retirement in 1985. Price was particularly admired for her interpretation of Verdi heroines, especially Aida, and she created the role of Cleopatra in Samuel BARBER'S *Antony and Cleopatra*, which opened the new Metropolitan Opera House at Lincoln Center in 1966. In addition, she was the first black woman to sing with La Scala Opera Company in Milan (1959). Following the terrorist attacks of September 11, 2001, Price was one of several performers, including renowned cellist YO-YO MA, who performed at a "Concert of Remembrance" held in Carnegie Hall to honor those who died in the terrorist attacks on New York City and Washington, D.C.

Price, T. Rowe (1898–1983) American investment expert. A pioneer in the field of investment counseling, research and analysis, Price was largely responsible for popularizing the "growth stock" concept of investment that advocated making long-term investments in small, well-managed companies. He founded his own investment counseling firm, T. Rowe Price Associates, in 1937. From the early 1950s through the 1960s his name was synonymous with growth stock mutual funds.

Pride, Admiral Alfred Melville (1897–1988) American aviator. A pioneer of naval aviation, Pride served on the original crew of the U.S. Navy's first aircraft carrier. During WORLD WAR II he played a major role planning the invasion of OKINAWA and the Japanese home islands (the latter superseded by the dropping of the ATOMIC BOMB on Japan). From 1947 to 1951, he was chief of the navy's bureau of aeronautics.

Priestley, J(ohn) B(oynton) (1894–1984) British novelist, dramatist, essayist, broadcaster and critic. "JBP" was considered the last of a line of distinguished "men of letters" in England that extended back through G.K. CHESTERTON to such 19th-century luminaries as Charles Dickens and George Meredith. Priestley was born at Bradford, Yorkshire—a region in which many of his stories are located—and educated at Trinity Hall, Cambridge. His first book was a volume of verse, *The Chapman of Rhymes* (1918), written during his wartime service. After working as a journalist and commentator throughout the 1920s, he achieved his first spectacular success with *The Good Companions* (1929), an enormous novel about a picturesque troupe of traveling performers. He wrote many stage plays and travel books in the next decade, including two brilliant chronicles of travel throughout his own country and the American Southwest—respectively, *English Journey* (1934) and *Midnight on the Desert* (1937). During WORLD WAR II he was a tireless supporter of the Allied cause in his writings and BBC broadcasts and for many years thereafter continued to write works of fiction, cultural history, belles-lettres and philosophy. The image he affected of a rather crusty, pipe-smoking sage celebrating the vanished values of Merrie Olde England is misleading. In truth Priestley was something of a pessimist and a mystic. What he called "the muddle of life" and "the density of evil" haunt his best books such as the tragic *Angel Pavement* (1930) and the grim account of war-torn England, *Black-Out in Gretley* (1942). A dark, bittersweet tang flavors the adventurous *Faraway* (1932) and the nostalgic *Lost Empires* (1965). His preoccupations with precognition, time travel and the supernatural surface in such plays as *I Have Never Been Here Before* (1937). As for his alleged hearty patriotism, it was really qualified by a sense of rootlessness: "I am too restless to develop any loyalty even to a place I really enjoy," he wrote in *Midnight on the Desert*. Elsewhere, he observed that most Englishmen "stagger under their inheritance." And yet he always retained a youthful, wide-eyed wonder about the world around him—his most endearing trait. On his 79th birthday he said he felt like a youth who had been kidnapped off the street and "rushed into a theater and made to don the grey hair, the

wrinkles and the other attributes of age, then wheeled on stage. Behind the appearance of age I am the same person, with the same thoughts, as when I was younger."

Prigogine, Ilya (1917–2003) Belgian chemist. In 1955 Prigogine produced a seminal work, *Thermodynamics of Irreversible Processes*, in which he argued that a true thermodynamic equilibrium is rarely attained and that a serious limitation in classical thermodynamics is that it is restricted to equilibrium states and reversible processes. Prigogine was most interested in the thermodynamics of non-equilibrium systems, a subject that had been approached somewhat by Lars Onsager. In a radical departure, Prigogine developed the equipment to deal with these states, which he called "dissipative structures." This led to his exploration of such structures in biological processes in 1975. In 1977 he was awarded the NOBEL PRIZE for chemistry for his work in this area.

Prima, Louis (1911–1978) American JAZZ trumpeter and bandleader. In 1940 Prima composed the jazz classic *Sing Sing Sing*, which became a standard of Benny GOODMAN. With Keely Smith, his wife and nightclub partner for eight years, he recorded *That Old Black Magic*, which hit the top of the record charts in 1961.

Primakov, Yevgeny (1929–) Soviet and Russian politician and government official and Russian prime minister (1998–99). Born in Kiev, Primakov joined the Soviet Communist Party in 1959. He worked for the Soviet daily newspaper *PRAVDA* throughout the 1950s and 1960s as its Middle

East correspondent. In 1989 Primakov was appointed to the Central Committee of the Communist Party, where he helped shape Soviet president MIKHAIL GORBACHEV's policies toward the Eastern European states' bid for full independence from Moscow. In 1991, following the Soviet hard-liners' abortive coup against Gorbachev, the Soviet president appointed him head of the Central Intelligence Service, the foreign intelligence branch of the KGB. When the Soviet Union disintegrated on December 25, 1991, Russian president Boris YELTSIN allowed Primakov to retain that position in the FSB, the Russian successor organization to the KGB. In 1996 Primakov left the Central Intelligence Service when Yeltsin appointed him Russian foreign minister, a post he held for two years.

In 1998, Yeltsin appointed—and the Russian Duma (lower house) approved—Primakov as Russian prime minister. However, his tenure ended in May 1999 when Yeltsin dismissed him for failing to purge his coalition government of members of the Communist Party, which then were masterminding an attempt to impeach the Russian president.

Primo de Rivera, Miguel (1870–1930) Spanish general, prime minister of SPAIN (1923–30). A career army officer, Primo de Rivera served in Cuba and the Philippines during the Spanish-American War, just before the turn of the 20th century, and later in Spanish Morocco. He rose to major general (1910) and then lieutenant general (1919), becoming a leading public figure. During a period of political turmoil, King ALFONSO XIII called on Primo to establish a military government (1923). Under the slogan "Country, Religion and Monarchy" Primo

suspended the parliament, declared martial law and assumed dictatorial powers. He resigned office in 1930, shortly before his death. His son **José Antonio Primo de Rivera** (1903–36) founded the FALANGE, based on Miguel Primo de Rivera's ideas.

Primrose, William (1903–1982) Scottish-born violist. He was a member of the London String Quartet (1935–37), then moved to the U.S. where he joined the NBC Symphony, playing first viola (1937–42). Thereafter he concentrated on a solo career. He taught at several universities and conservatories. Widely considered the greatest violist of his time, Primrose was renowned for his consummate musicianship and sweetness of tone.

Prince, Harold (Hal) (1928–) American director and producer. One of America's foremost directors, Prince has directed and/or produced 46 musicals, plays and operas in the U.S. and Britain since he first produced *The Pajama Game* in 1954. He has won 16 Tony Awards for the directing of *Cabaret* (1966), *Sweeney Todd* (1979), *Evita* (1980) and *The Phantom of the Opera* (1987), among others. He has directed and produced several Stephen SONDHEIM musicals, including *A Little Night Music* (1973) and *Pacific Overtures* (1976). He also produced such shows as *Damn Yankees* (1955) and *Fiddler on the Roof* (1964), directed revivals of plays by Eugene O'NEILL and others and served on the National Council for the Arts. In 1994 Prince received the Kennedy Center Honors in recognition of his contributions to American music.

prisoners of war Also known as POWs, they are members of a military

German POWs in a French camp during World War I (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

force captured by the enemy during war. Prisoners may be taken by surrender or be captured during battle. Until the 19th century, prisoners of war were considered booty, and many were enslaved, ransomed or killed. However, through humane regulations promulgated in the late 19th and the 20th centuries, POWs are protected from mistreatment by a number of international agreements, most importantly the Hague Conventions and the GENEVA CONVENTIONS. A POW is required only to inform his captors of his name, rank, serial number and birthdate. POWs are entitled to living quarters in safe and inspected camps, to receive adequate food and medical care, to be paid for work and to receive and send mail. These and other rules are regulated and ensured by the international RED CROSS. Despite the elaborate precautions enacted to protect prisoners of war, harsh treatment has been prevalent in many modern conflicts, particularly WORLD WAR II, the KOREAN WAR and the VIETNAM WAR.

Pritchard, Sir John Michael (1921–1989) British conductor. Among other posts, he was musical director of the London Philharmonic Orchestra (1962–66) and chief conductor of the BRITISH BROADCASTING CORPORATION (BBC) Symphony Orchestra (1982–89). He specialized in the operas of Mozart and Donizetti.

Pritchett, Sir Victor Sawdon (1900–1997) British author and critic. An accomplished novelist and short story writer, Pritchett was probably best known for his literary criticism. He was a newspaper correspondent before achieving recognition as a writer with such works as *Claire Drummer* (1929), *Elopement into Exile* (1932) and *Mr. Beluncle* (1951). His fiction is peopled with eccentric characters; his style is witty and ironic. His critical works include *The Living Novel* (1947) and *The Myth Makers* (1979). He also contributed to the *New Statesman* and the *New York Review of Books* and lectured widely.

Pritikin, Nathan (1915–1985) American nutritionist. Self-taught and with no medical credentials, Pritikin developed a diet that he claimed could, together with proper exercise, prevent and even

reverse heart disease and other ailments. He developed his diet after having been diagnosed a heart disease victim in 1957. In addition to being low in fat and cholesterol, the diet prohibited salt, sugar, alcohol and caffeine. Pritikin promoted the controversial diet through several best-selling books and at three “longevity centers,” which attracted thousands of high-paying clients.

privatization Selling of nationalized industries and other parts of the public sector to private businesses and individuals. Privatization was a hallmark of the THATCHER government in Britain during the 1980s and of France under CHIRAC beginning in 1986.

Prodi, Romano (1939–) Italian and European statesman, prime minister of Italy (1996–1998, 2006–) and president of the European Commission (1994–2004). After a distinguished career as a professor of law at the University of Bologna, Prodi entered politics as a progressive member of the Christian Democratic Party. He was appointed minister of industry in 1978 and later served as chairman of the state-owned industrial holding company IRI. Accusations of corruption led to lengthy investigations of his tenure at IRI, but he was acquitted of all charges. He later broke with the Christian Democrats and moved to the left. In 1996 he became prime minister of the first genuinely left-wing coalition to govern Italy since the end of World War II but was overthrown two years later when the Communist Refoundation Party pulled out. After losing office, he served as a very active and influential president to the European Commission from 1999 to 2004. He then returned to Italian politics, forming a center-left coalition opposed to the center-right government of Prime Minister Silvio BERLUSCONI. In elections of April 2006, Prodi's group defeated Berlusconi's group by a such a razor-thin margin that Berlusconi demanded a recount.

Production Code, the Written by Father Daniel Lord, S.J., and adopted by the MPPDA in 1930 as a guideline (HAYS CODE) for the producers of the U.S. motion picture industry, the code controlled the content of U.S. films for more than three decades. Part of the

Hays Office (MPPDA) system of self-regulation, the code assumed that movies could “uplift” or “degrade” audiences. Therefore, a basic premise of the code was that films uphold, not question or challenge, the basic values of society. The sanctity of home, marriage and church was to be upheld. Law was not to be belittled or ridiculed. From 1930 to 1933 the code was enforced but not with the severity that industry critics demanded.

In 1934, under pressure from the Catholic LEGION OF DECENCY, a new Production Code Administration was created, and a Catholic censor, Joseph I. Breen, was appointed director by Will Hays. No film could be produced or shown in the U.S. without the approval of Breen and his PCA staff. Studios had to submit scripts to Breen, who rigidly enforced the code. For example, he banned Mae WEST's early films from the screen and so censored her after 1934 that her screen appeal was greatly diminished. Breen demanded that films stress moral values and conservative politics. In U.S. movies adultery was punished, divorce shown as wrong and actresses clothed from head to toe. The code was also used to limit social and political commentary. Breen refused an MGM request to film the Sinclair LEWIS novel *It Can't Happen Here* in 1937 and used his authority to alter films that dealt with sensitive topics like unemployment, housing, racism and drug addiction.

In the late 1940s Breen used the Production Code to fight a new openness in cinema that emerged after the war. He tried to ban *The Bicycle Thief* (1948) because it showed a young boy urinating and contained a scene in a brothel. He refused a PCA seal for Otto PREMINGER's *The Moon Is Blue* because of its cavalier attitude toward sexual relationships. But Breen's dominance was now limited by changing public attitudes, the deregulation of the industry by the federal government, the rise of television and the determination of independent producers to challenge Breen's authority. Breen retired in 1954 and was replaced by his assistant Geoffrey Shurlock. By the late 1960s the industry moved from the self-censorship imposed under the Production Code to an industry rating system—G, for general audiences; M,

for mature fans; R, restricted to over 16; and X for adults—that allowed audiences to choose the type of movies they wanted.

Profumo affair Sensational British political scandal. In 1963 it came out that the Conservative war minister John Profumo had been involved with a prostitute, Christine Keeler, who had also associated with a Soviet naval attaché. Profumo initially denied the allegations, but later admitted that he had lied and resigned from the ministry, the Privy Council, and Parliament. Following a government investigation, it was announced that there had been no breach of national security from the affair, but the highly publicized scandal contributed to the CONSERVATIVE PARTY'S defeat in the 1964 elections.

Progressive Conservative Party (Canada) One of the four major Canadian political parties, the Progressive Conservative Party (formerly known as the Conservative Party) dominated in the early years after confederation in 1867. The party advocated strong ties to Britain and a wariness of the U.S. The party also appealed to conservatives in French-speaking Quebec. It became the Progressive Conservative Party when it merged with the Progressive Party, which had broad support in the prairie provinces. World War I created a crisis for the party because French-Canadians objected to conscription. The party never regained its support in Quebec, which has remained a Liberal Party stronghold. Although LIBERAL PARTY prime ministers were in power for most of the latter half of the century, Brian MULRONEY, a PC from Quebec, became prime minister in 1986. Because of the party's minority status in Parliament throughout the 1990s, it merged with the Alliance Party in October 2003 to form the Conservative Party of Canada.

progressive movement Movement that advocated political and social reforms in the UNITED STATES in the early 1900s. The progressive movement was largely a reaction to urban corruption and to abuses by business monopolies. Theodore ROOSEVELT, a Republican and U.S. president from 1901 to 1909, was a leading progressive. In 1912, disap-

pointed with the conservative policies of his successor, William Howard TAFT, Roosevelt unsuccessfully ran for the presidency as candidate of the newly formed, progressive **Bull Moose Party**. Another Progressive Party, centered in the American Midwest and favoring farmers and workers, formed in 1924. Its presidential candidate, the fiery U.S. senator Robert LA FOLLETTE, waged a credible campaign but carried only Wisconsin, his home state.

Prohibition Period between 1919 and 1933 when the manufacture, sale or transport of alcoholic drinks was prohibited in the U.S. Public drunkenness had always been a problem in the U.S., and by 1920 an active temperance movement led by the Anti-Saloon League had succeeded in banning al-

coholic drinks in a number of states. Following World War I, the movement received a boost when the idea was promoted that drinking alcohol was unpatriotic because many German-Americans were involved in the trade. The Eighteenth Amendment to the U.S. Constitution banned the manufacture and sale of alcoholic drinks, including beer and wine. But bootleggers began to manufacture and distribute illegal alcoholic beverages, which were dispensed in speakeasies. Many otherwise law-abiding citizens simply ignored the ban. Distribution was soon taken over by organized crime figures such as Al CAPONE, and gang warfare broke out. The DEMOCRATIC PARTY platform in the election year of 1932 proposed to repeal the "Great Experiment"; ROOSEVELT won and in 1933 the Twenty-first Amendment made the sale of alcoholic beverages once again legal in most of the U.S.

Federal agents destroying liquor barrels during Prohibition (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Prokofiev, Serge (Sergei Sergeyevich Prokofiev) (1891–1953) Soviet composer. Born in the Ukraine, Prokofiev began composing at age five and later studied with Reinhold GLIERE and at the Saint Petersburg Conservatory with Rimsky-Korsakov. A brilliant pianist and conductor, he left the USSR in 1918, shortly after the RUSSIAN REVOLUTION. He toured the world and settled in Paris during the 1920s, only returning permanently to the USSR in 1936. Although he generally enjoyed the approval of the Soviet authorities, in 1948 Prokofiev (along with Dmitri SHOSTAKOVICH and Aram KHACHATURIAN) was accused of "formalism" and personally reprimanded by Joseph STALIN. Prokofiev's early works are innovative and restrained, combining lyricism with dissonance, melodic beauty with abrupt rhythmic effects. His later pieces are more simplified and accessible. All his compositions, however, are very distinctive in style, often treating Russian themes. Among Prokofiev's works are seven symphonies—most notably the First (the *Classical Symphony*, 1916–17) and the Fifth (1944), two violin concertos, five piano concertos, various piano pieces and numerous chamber works. His vocal compositions include the operas *The Gambler* (1915–16), *The Love for Three Oranges* (1921) and *War and Peace* (1953). His dramatic cantata

Alexander Nevsky (1939) was used as the score for Sergei EISENSTEIN's film of the same name. Also a superb composer for the ballet, Prokofiev's works in this genre include *L'enfant Prodigue* (1929), one of several ballets he created for DIAGHILEV's BALLETS RUSSES, and *Romeo and Juliet* (1938). Among his best known works is the symphonic fairy tale *Peter and the Wolf* (1936).

Prokosch, Frederic (1908–1989) American author. His best selling first novel, *The Asiatics* (1935), won wide acclaim for its profile of a young American making his way from Beirut, Lebanon, to China. His other works included *The Seven Sisters* (1962), *The Missolonghi Manuscript* (1968) and *Voices* (1983), a memoir of his encounters with such figures as T. S. ELIOT, James JOYCE, and Gertrude STEIN.

propaganda Manipulation of public opinion and behavior in favor of or in opposition to an idea or cause through a number of means, from the use of rhetoric and symbols to written or

broadcast messages. The term is generally used in a negative fashion. The word is derived from the Congregatio de propaganda fide (Congregation for the Propagation of the Faith), a Roman Catholic missionary agency established in 1622. With the growth of means for disseminating information after the Industrial Revolution, propaganda assumed a great deal of importance and was an influential part of life in the 20th century. Propaganda differs from education in its deliberately one-sided view of a given issue; only that information is disseminated that will support the propagandists' argument and denigrate the opinions of their opponents. Propaganda was used with considerable success in the BOLSHEVIK movement of the early 20th century, and it is evident in V. I. LENIN's *What Is to Be Done?* (1902), in which he stressed "agitprop," a combination of agitation and propaganda in support of communist revolution. Later in the century propaganda was an important tool of the fascist movements of Adolf HITLER, whose information minister Joseph GOEBBELS was a master propa-

gandist, and of Benito MUSSOLINI. During WORLD WAR II propaganda was an important weapon for both sides of the conflict, and it was extensively used by both the Axis and the Allies, the latter producing material under the auspices of the Office of War Information. In the contemporary era propaganda in printed communications, on the radio and particularly on television has been used for many purposes, from promoting systems of government, to attempting to elect candidates, to selling commercial products through advertising. Moreover, the effectiveness of propaganda campaigns has been increasingly quantified through the use of public opinion surveys. At the same time, a more sophisticated audience seems somewhat better able to distinguish between the efforts of propagandists and those with honestly differing opinions.

protectionism Government economic policy that seeks high tariffs on imported goods in an effort to reduce foreign imports and protect domestic producers and manufacturers. The issue of protectionism has stirred much political debate in the 20th century. Advocates of protectionism (generally supporters of the labor movement) say that protectionist policies protect domestic jobs and help prevent a trade deficit. Opponents say that imposing high tariffs only causes foreign countries to impose similar restrictions on imports, thereby slowing the economy and hurting the very workers the tariffs are meant to help. The HAWLEY-SMOOT TARIFF ACT (1930), enacted at the beginning of the GREAT DEPRESSION, raised U.S. tariffs to their highest levels ever; foreign governments retaliated with similar tariffs, thus damaging world trade and deepening the Depression. In the 1980s some U.S. politicians called for protectionist tariffs to stem the flow of imports from Japan.

Proton booster Soviet "D-Class" launch vehicle, designed to lift heavy loads such as the Salyut and Mir space stations. It was the first Soviet booster not developed directly from a military rocket. Introduced in July 1965, it is an enlarged version of the smaller "A-class" booster used to launch all three SPUTNIK satellites, as well as VOSTOK, VOSKHOD, SOYUZ, and Progress missions. In the

Allied propaganda poster during World War II told civilians about the Nazi enemy.
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

late 1980s the USSR began promoting the Proton launcher for use by the rest of the world as a commercial launch vehicle.

Protopopovs, the Soviet skaters, Lyudmilla Belousova and Oleg Protopopov. This husband and wife ice skating team won two Olympic gold medals for pairs figure skating: at Innsbruck in 1964 and at Grenoble in 1968. Known for their elegant and sophisticated style, the Protopopovs also won several European championships.

Proulx, E. Annie (1935–) American author and winner of the Pulitzer Prize and the National Book Award for *The Shipping News* (1994). Born in Norwich, Connecticut, Proulx originally worked as a journalist and authored several “how-to” books before starting to write fictional works in the mid-1980s. In 1988 she published *Heartsongs and Other Stories*, a two-volume collection of short stories. Following the critical success of *Heartsongs*, Proulx began work on three novels—*Postcards* (1992), *The Shipping News* (1993), and *Accordion Crimes* (1996). She has also published *Close Range* (1999), a collection of short stories about the American West, a novella named *Brokeback Mountain* (1998), and *That Old Ace in the Hole* (2002) about life in the southwestern United States. *The Shipping News*, which won the Pulitzer Prize and the National Book Award, was turned into a full-length feature film in 2001. The book and film established Proulx’s reputation as one of America’s most respected writers of fiction. *Brokeback Mountain* was made into an acclaimed film in 2005.

Proust, Marcel (1871–1922) French novelist, story writer and essayist. Proust is generally recognized as the greatest French novelist of the 20th century on the strength of his sequence of seven novels, *REMEMBRANCE OF THINGS PAST*. Born to a Catholic father and a Jewish mother, Proust suffered from poor health as a child and was a near invalid during his early teens. Nonetheless, he went on to graduate from the Sorbonne and to serve in the French army. In the Parisian society of the 1890s Belle Époque, Proust established a reputation for himself as a dandy. His first volume of stories, *Pleasures and Days* (1896),

won him only a small readership. In the 1900s Proust published a great deal of literary criticism. He was very close to his mother, and her death in 1905 spurred him, the following year, to retire from society and devote himself to literature. Dogged by failing health, Proust devoted the final 15 years of his life to *Remembrance of Things Past*, writing in a cork-lined room to keep out the noises of the Parisian streets.

Prouvé, Jean (1901–1984) French designer and architect. Educated in Nancy, Prouvé began executing design commissions in 1918, becoming known for his modernist metal furniture. Associated with LE CORBUSIER in the late 1920s, he was a founder of the Union des Artistes Modernes. He stopped designing in 1950, devoting himself thereafter to architecture. As an architect, he was best known for a series of public buildings in the modern idiom notable for their sophisticated engineering.

Provincetown Players (1916–1921) American theatrical ensemble of playwrights and actors. The Provincetown Players were well known for their willingness to premiere socially controversial works by new and experimental playwrights. The most famous figure to emerge from the Provincetown Players milieu was Eugene O’NEILL, whose classic play *Desire Under the Elms* was first produced by an offshoot of the players—the Playwrights’ Theatre—in 1924. While the players first appeared at the Wharf Theater in Providence, Rhode Island, the ensemble moved to GREENWICH VILLAGE before resettling in the Provincetown Playhouse in 1918. The Provincetown Players disbanded in 1921.

Provisional Government Government formed by Russia’s DUMA in February 1917 in Petrograd upon the collapse of the autocracy. The provisional government promised to form a constitutional assembly and to hold free elections. It abolished the secret police and granted religious freedom. Many of its leaders were of a conservative outlook, although KERENSKY was a moderate socialist. Because of the war effort grave problems, such as redistribution of land and the rights of non-Russian people to self-government, could not be resolved. As a result, dis-

content continued to grow. At the same time as the provisional government, the Soviet of workers’ deputies had been established; this had the support of industrial workers and socialists, and in October 1917 they overthrew the Provisional Government.

Prusiner, Stanley (1942–) American neurologist and winner of the 1997 Nobel Prize in medicine. Born in Des Moines, Iowa, Prusiner obtained his primary and secondary education in Cincinnati, Ohio, before attending the University of Pennsylvania to study chemistry. While at the University of Pennsylvania, he worked under the guidance of Sidney Wolfson, a member of the university’s Department of Surgery, and helped develop a research project that examined the effects of hypothermia on surgery. When Prusiner graduated from the university in 1964, he enrolled in that institution’s medical school to continue studying under Wolfson. In 1967 Prusiner obtained an internship with the NATIONAL INSTITUTES OF HEALTH (NIH) that required him to work at the University of California-San Francisco (UCSF), where he studied E. Coli bacteria under the guidance of Earl Stadtman. In 1972 Prusiner began his residency in the university’s Department of Neurology. It was during his residency that Prusiner began to research the causes of a “slow virus” infection termed Creutzfeldt-Jakob disease (CJD) that caused increasing loss of memory and muscular control. Two years later, Prusiner accepted an assistant professorship at UCSF to study CJD through experimentation on mice possessing “scrapie,” a disease similar to CJD found in mice and sheep. During Prusiner’s research, he found the amino acid sequence responsible for incubating scrapie in mice, which allowed him to discover a similar-acting antibody for possible use in individuals seeking to combat CJD. For his work in the field of medicine, Prusiner won the 1997 Nobel Prize in medicine.

PSFS Building Headquarters of the Philadelphia Savings Fund Society, built in 1932 and generally regarded as the first truly modern skyscraper office building; among the first large buildings in the INTERNATIONAL STYLE to be built in the U.S. It was designed by William LesCaze and George Howe

and is remarkable for the consistency and excellence of its overall concept and details. The black granite base contains an austere geometric banking room with a windowed, rounded corner. Above is a 28-story tower office block with columns exposed along the sides and front, cantilevered forward. A highly successful building, it remains in fine condition and in regular use for its intended purposes.

Public Works Administration (PWA) U.S. government agency, established in 1933 during the first HUNDRED DAYS of President Franklin D. ROOSEVELT's administration. Part of the NEW DEAL, the PWA was one of the most visible government programs during the GREAT DEPRESSION. As its name suggests, the PWA was responsible for public works. It put thousands of people to work on construction projects throughout the U.S. Numerous public buildings, including many post offices, schools, courthouses and other government facilities were built by the PWA; many of these buildings remained in use toward the end of the century. (See also WORKS PROGRESS ADMINISTRATION.)

Puccini, Giacomo (1858–1924) Italian composer and one of the most popular operatic composers of the late 19th and early 20th centuries; born in Lucca, Italy, of a distinguished musical family. A precocious musician, Puccini began his musical studies as a child, attending the Istituto Musicale and later studying (1880–83) at the Milan Conservatory. His first opera, the one-act *Le Villi* (1884), met with some success, but it was not until the production of his third work, *Manon Lescaut* (1893), that Puccini became a celebrated and successful composer. His finest works are generally acknowledged to be *La Bohème* (1896), *Tosca* (1900), *Madama Butterfly* (1904) and *Turandot*, which was not quite finished at the composer's death and which premiered at La Scala in 1926. Lesser works include *La Fanciulla del West* (1910) and *Il Trittico* (1918). In his operas, Puccini combined such traditional features of Italian opera as arias and love duets with such Wagnerian innovations as leitmotifs and complex dramatic characterizations. To this mixture he added superb melodies, lush orchestration, exotic settings and erotic tension mingled with sentimentality.

Pudovkin, Vsevelod Illarionovitch (1893–1953) Soviet filmmaker and theoretician. With colleagues Lev KULESHOV, Sergei EISENSTEIN and Dziga VERTOV, he stood at the center of the great decade of Soviet filmmaking in the 1920s. He was born in Penza and educated in physics and chemistry at Moscow University. In 1920 he entered the State Film School and two years later worked with Kuleshov in the famous "Kuleshov Workshop." Pudovkin's most important films were made in the second half of the decade, *Mat (Mother)* in 1926, *Konyets Sankt-Peterburga (The End of St. Petersburg)* in 1927 and *Potomak Chingis-khan (The Heir to Genghis Khan, or, Storm over Asia)* in 1928. Nominally, like Eisenstein's films, they are all concerned with issues of Soviet revolution, but, again like Eisenstein, their chief distinction lies in their applications of film shots to make "the all-inclusive discovery and explanation of the interrelationships of the phenomena of real life." The "linkage" of shots, Pudovkin argued, is the foundation of film art, the building from raw pieces of celluloid a "filmic space and time." The art of film acting, as a consequence, must differ radically from stage technique. The actor must work in brief time-space fragments, becoming a "material" of "equal and undifferentiated value" with other components of cinema, and subject to the same manipulations. Despite these theoretical formulations, however, Pudovkin's films display more compassion, poetic sensibility and interest in individual personalities than do Eisenstein's. After sustaining injuries in a car wreck in 1935, Pudovkin returned to cinema, directing a number of historical films and appearing in others such as Eisenstein's *Ivan Groznyi (Ivan the Terrible)* in 1944. His major theoretical works, *Film Technique* and *Film-Acting* (1926), first appeared in translation in 1933.

Pueblo incident Capture of the USS *Pueblo*, a navy electronic and radio intelligence-gathering ship, off the eastern coast of NORTH KOREA on January 23, 1968, and its aftermath. The vessel, under Commander Lloyd M. Bucher, was fired on, boarded and seized by ships from the North Korean navy and removed to the port of Wonsan. The U.S. demanded release of the ship and its crew together with an apology, main-

taining that it had been in international waters at the time of its capture. The North Korean government held the ship and men hostage for 11 months. The U.S. finally acceded to North Korean demands, and in December 1968 it signed an admission of intrusion into North Korean waters, which it disavowed before the signing, and an apology. With this and the promise not to engage in further spying, the ship and crew were released. Afterward, Bucher and others on the *Pueblo* charged that they had been tortured and forced to sign false confessions. The ship's captain gave his version of the events in *Bucher: My Story* (1970).

Puente, Tito (Ernesto Antonio Puente, Jr.) (1923–2000) American musician, bandleader, composer and producer. A virtuoso timbales player, Puente also played the vibes, sax, piano, bongos and conga. His first band, the Piccadilly Boys, formed in 1947 and soon became the Tito Puente Orchestra. He was a leader of the big band mambo and chachacha styles of the 1950s. As a member or leader of other groups specializing in Latin rhythms, he toured Europe, produced many records and won two Grammy Awards, for *Tito Puente and His Latin Ensemble on Broadway* (1983) and *Mambo Diablo* (1985). His many compositions include the hit "Oye Como Va."

Puerto Rico The Commonwealth of Puerto Rico is an island covering 3,514 square miles in the Caribbean Sea. The terrain is mostly mountainous, with a coastal plain in the north. The capital is San Juan. American troops invaded the centuries-old Spanish island in May 1898, and in December the island was ceded to the U.S. It became an unincorporated U.S. territory, and U.S. citizenship was granted to Puerto Ricans in 1917. Many islanders, however, wanted greater internal self-government and economic and social reforms, a policy advocated by the Partido Popular Democrático (PPD). The PPD gained a majority in the Senate in elections in 1940, and the first elections to the post of governor in 1947 were won by the PPD's leader, Luis MUÑOZ MARÍN. Puerto Rico was granted a new constitution in 1952 when it became a commonwealth in association with the U.S. Under the PPD administration a program of investment

and industrialization developed the island's economy and improved social conditions. In 1967 a plebiscite produced a majority in favor of commonwealth status, rather than statehood, with only a very small minority in favor of independence.

The PPD remained in power until 1968 when it was defeated by the Partido Nuevo Progresista (PNP), which favors statehood. Luis A. Ferré became governor. In 1972 the PPD was returned to power with Rafael Hernández Colón elected governor. The PNP's candidate for governor, Carlos Romero Barcelo, won in the 1976 elections, but in 1980 the PNP lost its majority in both houses of the Legislative Assembly, although Romero Barcelo retained the governorship. Internal factionalism within the PNP led to divisions in the party over Romero Barcelo's leadership. In 1984 Romero Barcelo was defeated by Hernández Colón for the governorship, and the PPD maintained its majority in the assembly. Hernández Colón retained the governorship in the election held in November 1988, defeating Baltasar Corrada del Río of the PNP by a narrow margin. In a 1998 referendum Puerto Ricans again rejected statehood within the U.S. and instead chose to remain a commonwealth. Two years after the referendum, Puerto Rico elected its first female governor, Sila Calderón, of the Popular Democratic Party, for a four-year term. In May 2003 Calderón helped negotiate an end to the U.S. Navy's munitions testing on the offshore island of Vieques. In 2006 the Puerto Rican government ran out of money, forcing the closure of schools and all government agencies.

Pugwash Conferences A series of international conferences begun with the goal of bringing together academics with leading national and international figures in the pursuit of increasing international cooperation and reducing conflict throughout the world. Started in 1957, the first conference was organized by the American philanthropist Cyrus Stephen EATON and the Polish-born British physicist Joseph ROTBLAT. Eaton hoped to use the meeting, held in Pugwash, a small village in Nova Scotia, Canada, to gather scientists from around the world and from both sides in the cold war, and have these individuals discuss the consequences of

the nuclear arms race on humanity. To facilitate similar conversations on issues of equal international concern, Eaton founded the Pugwash Organization—a somewhat decentralized organization that would oversee the scheduling, coordination and financing of these meetings—to select the individuals who would meet independently of their governments to discuss world problems and try to reach a consensus on their solutions. Since its inception, there have been over 275 Pugwash conferences, symposia and workshops held throughout the world, in which over 10,000 men and women have met to discuss issues of international concern. In 1995 the Pugwash Organization received the Nobel Peace Prize for its Conferences on Science and World Affairs that helped to reduce the nuclear arms race and the role of nuclear weapons in international politics.

Puig, Manuel (1932–1990) Argentinian novelist. Puig, who was best known for his novel *The Kiss of the Spider Woman* (1979), which was adapted into a highly successful HOLLYWOOD film starring William Hurt and Raul Julia, grew up highly enamored of the film medium that would spread his fame. As a young boy living in a remote region of the Argentine pampas, Puig used films to escape from his culturally narrow environment. After studying philosophy at the University of Buenos Aires, Puig went to Rome in 1955 where he studied film technique. His first novel, *Betrayed by Rita Hayworth* (1971), portrayed the commingling of Hollywood fantasy and the bleak realities of Argentine life. In *The Kiss of the Spider Woman*, two prisoners—one a political radical, the other a homosexual—bide their prison sentence time and reveal their souls through retelling the romantic plots of old movies. Other novels by Puig include *Heartbreak Tango: A Serial* (1973) and *Eternal Curse on the Reader of These Pages* (1985).

Pulitzer Prize American award for journalism, letters and music. The annual Pulitzer Prizes were established in 1915 in the will of the Hungarian-American newspaper publisher Joseph Pulitzer, who also established the Columbia University School of Journalism, which confers the prizes. The

prizes are bestowed on American citizens who distinguish themselves in the field of letters (including history, biography, poetry, drama and fiction), music and journalism (including reporting, photography and criticism). The prizes, originally \$1,000, are now \$10,000 except for public service in journalism, which is given a gold medal. The first Pulitzer Prizes were awarded in 1917. The Pulitzer Prize is widely regarded as the most prestigious American award in these fields.

punk rock Hard-edged musical style that constitutes a performing subgenre of ROCK and roll. Punk rock first came to attention in both Britain and America in the mid-1970s. The first major punk rock song is generally considered to be “God Save the Queen” (1977) by the British-based group the Sex Pistols, which featured scathingly raw and sneering vocals by lead singer Johnny Rotten and unsophisticated but intensely hard-driving guitar and percussion work. Other major bands that influenced the punk rock style include the Buzzcocks, the Ramones and James White and the Blacks. While punk rock's musical creativity dwindled by the early 1980s, the basic punk rock style continued to hold its popularity with a new generation of rock audiences. Although punk rock subsided as a genre of rock and roll music in the 1990s, it reemerged in the 2000s with groups such as Sum 41 and Simple Plan that have been influenced by the punk rock style.

“Purple Code” See Elizabeth S. FRIEDMAN.

Purser, Sarah (1848–1943) Irish painter, designer and stained-glass artist. She studied in Ireland, France and Italy, returning to Dublin in 1878. In addition to creating her own works, she was also an important force in the promotion of native Irish art. In 1924 she founded the Friends of the National Collections of Ireland, and in 1930 she secured from the government sumptuous Dublin quarters to house the Lane Collection and the Modern Art Gallery.

Purvis, Melvin (1903–1960) American law enforcement officer. Born in South Carolina, Purvis became a lawyer

and joined the FBI in 1927. He was appointed to the FBI's Chicago office in 1932, and for the next three years he presided over the hunt for and apprehension of such public enemy criminals as "Pretty Boy" FLOYD, "Baby Face" NELSON and, most notably, John DILLINGER, whom he and his agents gunned down in 1934. Apparently in conflict with FBI director J. Edgar HOOVER, Purvis resigned from the bureau in 1935. During WORLD WAR II he worked for the U.S. Army War Crimes Office and after the war returned to the practice of law.

Puskas, Ferenc (1926–) Hungarian-born soccer player. Puskas was the dominant player on the outstanding Hungarian national team of the early 1950s. A natural goalscorer, Puskas won his first cap at age 18 in August 1945. He was captain of the Hungary team that won the 1952 Olympic gold medal. Puskas's most memorable performance came at Wembley Stadium, England, in 1953 when he scored two goals in Hungary's 6-3 thrashing of England, their first-ever home loss. In a return match in 1964 in Budapest, Hungary won 7-1; Puskas scored two again and established himself as the world's best player. This was the pinnacle of Puskas's career. In the 1954 World Cup in Switzerland, Puskas was injured and Hungary lost to West Germany 3-2 in the final. During the 1956 HUNGARIAN UPRISING, Puskas was touring with his team, Honved, and decided not to return home. He eventually settled in Spain, and joined the European Champions, Real Madrid. He joined forces with the legendary Alfredo di Stefano and led Real to its fifth European Championship in 1960. Puskas played for Spain in the 1962 World Cup and retired in 1966. In 1993 Puskas was allowed to return to Hungary to manage the Hungarian national team in a qualifying match for the World Cup.

Putin, Vladimir (1952–) Soviet KGB agent (1975–91), professor of international affairs (1989–91), deputy mayor of St. Petersburg (1994–96), prime minister of Russia (1999), and president of Russia (2000–). Born in Leningrad, Putin attended one of the city's top high schools, where he developed interests in both literature and science, as well as the ambition to join

Russian president Vladimir Putin (NORTH ATLANTIC TREATY ORGANIZATION)

the KGB, the Soviet intelligence agency. In 1970, after being told by a KGB official that the best way to become an agent was to obtain a law degree, Putin enrolled in Leningrad State University's elite law school. Five years later, Putin obtained his law degree and was offered a job by the KGB as a counter-intelligence and later a foreign intelligence agent. In 1985 Putin's superiors, impressed with his work, made him a political intelligence agent in East Germany. In 1990, following the end of communist rule in East Germany, Putin returned to Leningrad (later renamed St. Petersburg) and found work at Leningrad State University as a professor in the International Affairs Department, where he continued to function as a KGB agent. When Putin's good friend and law school mentor Anatoly Sobchak was elected mayor of Saint Petersburg in 1991, he appointed Putin as an aide charged with enticing foreign and domestic firms to invest in the city. By 1994 Putin had done so well in this post that he was chosen as the city's deputy mayor. In 1996 after Sobchak lost his bid for reelection, Putin resigned and soon found work as an aide to Pavel Borodin, the minister of Russia's property administration. Two years later Russian president Boris YELTSIN named Putin as the chief of his Security Council and as the head of the Federal Security Bureau (FSB), the successor organization to the KGB. In August 1999 Yeltsin appointed Putin prime minister following the dismissal of Sergei Stepashin. Four months later, Yeltsin designated Putin as his successor when he resigned from the Russian presidency on December 31. In March 2000 Putin easily won election to the presidency, and was reelected president in 2003.

As president, Putin has sought to enhance Russia's image abroad while

consolidating his control of the Russian political system. In particular, Putin continued Russian military efforts to end the separatist insurgency in Chechnya. He refused to negotiate with Chechnyan guerrillas who in October 2002 seized control of a Moscow opera house, instead ordering a special forces strike on the building that killed the terrorists and some of their hostages. Putin has also sought to establish better relations with the states of the EUROPEAN UNION, China, and the U.S., by gaining Russia's admission as a consultative member of NATO, by renewing the strategic partnership between Russia and China and by permitting the U.S. to abrogate the 1972 Anti-Ballistic Missile Treaty.

Pu-yi, Henry (Aisin-Gioro, Yuan-tong [Hsuan-t'ung]) Emperor (1906–1967) Last emperor of CHINA (1908–12), who reigned under the name Xuantong (Hsuan-t'ung). Born in Beijing, a grand-nephew of the dowager empress, he succeeded to the throne as a small child. The republican revolution forced his abdication in 1912, and he remained in the Forbidden City under government support and warlord influence until 1924. In 1925 he fled to the Japanese concession in Tientsin, living there until 1931. He became the figurehead (as the Kangde Emperor) of the Japanese puppet state of MANCHUKUO (Manchuria) in 1934. Captured by Soviet troops in 1945, he was imprisoned in Siberia for five years, testifying at the war crimes trial in Tokyo in 1946. Turned over to the People's Republic of China in 1950, he remained in prison until granted amnesty in 1959. After political "reeducation," he became a private citizen in Beijing. His life was the subject of Bernardo BERTOLUCCI's ACADEMY AWARD-winning 1987 film *The Last Emperor*.

PWA See PUBLIC WORKS ADMINISTRATION.

Pyatakov, Grigory L. (1890–1937) Politician and leader of the left wing of the Ukrainian Communist Party. In December 1918 Moscow ordered that a concealed Soviet government be set up in Kursk under Pyatakov. Pyatakov accordingly set up a Soviet regime and invaded the UKRAINE with Red troops. In 1937, however, he was tried at the "anti-Soviet Trotskyite Center" trial.

Pyle, Ernie (1900–1945) American journalist. Pyle held a variety of newspaper posts in New York and Washington, D.C., during the 1920s and 1930s. In 1935 he became a syndicated columnist and roving reporter. However, his career reached its zenith during WORLD WAR II, when he became perhaps the best-known and most widely read war correspondent. He accompanied American troops on the front lines, covering the war in North Africa, Europe and the Pacific in his regular column. Pyle did not report the course of the war in strategic terms but, rather, chronicled the day-to-day existence of ordinary GIs. He won the 1944 PULITZER PRIZE for his reporting. Pyle was killed by Japanese machine gun fire on April 18, 1945, on the island of Iishima, near OKINAWA.

Pym, Barbara (Mary Crampton) (1913–1980) British novelist. Born in

Shropshire and educated at Oxford, Pym worked for a time at the International African Institute in London. Her keenly observed satirical novels of provincial English life, including *Excellent Women* (1952), *Less Than Angels* (1955), *Quartet in Autumn* (1977) and *A Few Green Leaves* (1980), are reminiscent of the work of Jane Austen. Pym enjoyed modest success during the 1950s, but in 1961 her publishers dropped her from their list. Her reputation rose again in the late 1970s when Lord David CECIL and Philip LARKIN both cited her as one of the most underrated writers of the 20th century.

Pynchon, Thomas (1937–) American novelist. Pynchon is highly reclusive, and few facts concerning the last 30 years of his life are known. In his youth he served in the U.S. Navy, graduated from Cornell University

and worked for a brief time as a technical writer for Boeing Aircraft. Since the publication of his acclaimed first novel, *V* (1963), Pynchon has been regarded as one of the most dazzling and difficult fiction writers of modern times. He possesses a detailed knowledge of both literature and modern technology and combines the vocabulary and insights of both fields to create a richly woven verbal tapestry filled with baroque allusions and imagery. Two of his central themes are the elusive nature of paranoia and the pervasive presence of entropic forces in a world that is losing its structured coherence. Pynchon has written only four other novels,—*The Crying of Lot 49* (1966), *Gravity's Rainbow* (1973), which won the National Book Award, *Vineland* (1990) and *Mason & Dixon* (1997)—but his work is meticulously conceived and forms a monumental whole.

Qaddafi, Muammer al- (1942–) Libyan nationalist and revolutionary leader. A bedouin Arab, Qaddafi received a traditional Koranic education, then attended high school, from which he was expelled for nationalist political activity. He subsequently studied history at the University of Benghazi (1962–63), then attended the Libyan Military Academy and the British Royal Signal Corps School at Beaconsfield, England. In 1965 he was commissioned as a signal corps officer in the Royal Libyan Army. He led the 1969 revolution and was promoted by 11 fellow members of the Revolutionary Command Council to be commander in chief, with the rank of colonel. He served as prime minister and defense minister from January 1970 until 1972, when he relinquished the former post. In 1976 he chaired the first General People's Congress (GPC) and was elected general secretary of the GPC secretariat in 1977. His *Green Book* (1976) called for revolutionary Arab socialism. Qaddafi has sought to project himself as the champion of the Arab people but was condemned by the REAGAN administration as a sponsor of international terrorism; the U.S. raid on LIBYA in April 1986 was in retaliation for Qaddafi's previous terrorist actions, as well as a warning to deter him from further terrorism. Following the terrorist attacks on New York City and Washington, D.C., of September 11, 2001, Qaddafi improved his relations with the U.S. and emerged as a voice in the Islamic and Arabic world calling for increasing opposition to terrorist groups

such as al-Qaeda. In late 2003, following the overthrow of the Iraqi government of Saddam Hussein by U.S. military forces, Qaddafi announced plans to dismantle Libya's nuclear weapons program and allow international inspections of its weapons sites.

al-Qaeda Meaning "military base" in Arabic, this group was founded in 1988 by Osama BIN LADEN and Muhammad Atef. Originally operating in Peshawar, PAKISTAN, between 1989 and 1991, al-Qaeda served as an umbrella organization in which the various MUJAHIDEEN cooperated in their fight against the Soviet and Soviet-supported forces in AFGHANISTAN. The larger goal of these movements was opposition to non-Islamic governments through any means, including force and terrorist acts. A facet of this larger aim included the expulsion of U.S. forces from SAUDI ARABIA, where they had been stationed since the Gulf War of 1991. From 1991 to 1996, al-Qaeda used its headquarters in Khartoum, SUDAN, to direct the training of its personnel in camps throughout Afghanistan, Pakistan, SOMALIA and KENYA for attacks on a variety of targets. After 1996, it moved its headquarters and principal training camps to Afghanistan, where its leaders established close relations with the TALIBAN, the principal Afghani authority. In its efforts, al-Qaeda repeatedly cooperated with other terrorist organizations, such as the Islamic Jihad in EGYPT (with which it merged in 1998), the Islamic Group, the National Islamic Front in Sudan and HEZBOLLAH in Lebanon

(which it has provided with weaponry and access to its training facilities). Additionally, U.S. officials demonstrated financial links between al-Qaeda and several Islamic charities, which served to funnel funds to al-Qaeda operatives. Individuals trained at al-Qaeda bases are believed to have participated in the October 1993 attack on U.S. forces in Somalia that killed 18 army rangers. Other terrorist attacks attributed to al-Qaeda include the August 7, 1998, bombings of the U.S. embassies in Kenya and Tanzania, the attack on the USS *Cole* in October of 2000 and the terrorist assaults on the WORLD TRADE CENTER and the Pentagon on SEPTEMBER 11, 2001.

The international response to al-Qaeda has grown from a wholly U.S. operation to a multinational one. On August 20, 1998, U.S. president Bill CLINTON ordered a CRUISE MISSILE strike on the most extensive al-Qaeda training complex in Afghanistan. By late 2001, in large part because of the attacks on American soil, intelligence cooperation among the nations of France, Britain, Germany, Morocco, and Saudi Arabia resulted in the capture of numerous individuals linked to al-Qaeda. Additionally, a U.S. force entered Afghanistan in a successful effort to remove the Taliban from power and destroy all remaining al-Qaeda bases in that country. However, because of the nebulous nature of al-Qaeda and the wide autonomy allegedly offered to its agents, the capture of its entire hierarchy remained an elusive goal.

Qatar (State of Qater) On the eastern coast of the Arabian Peninsula, the state is comprised of the Qatar Peninsula and several offshore islands; Bahrain lies to the northwest. Qatar came under British influence in 1869, and under a treaty signed in 1916 Britain gained effective control over Qatar's foreign relations, together with responsibility for security and commercial privileges. This protectorate status continued until Qatar gained independence in 1971. In 1972 a palace coup occurred when Shaikh Khalifa ibn Hamad al-Thani ousted his cousin, Shaikh Ahmad. A year before independence, Qatar promulgated a written constitution that provided for a council of ministers and an advisory council. It stipulated that the former was to be appointed by the ruler and that a majority of the advisory council be elected by the general population. To date no elections have been held and, the council of ministers has become little more than a recommendatory authority. In 1995 Sheikh Khalifa was deposed by his son Hamad in a bloodless coup.

The al-Thanis constitute the largest ruling family in the region, and mem-

bers hold 10 of the 15 cabinet portfolios, including defense, finance and foreign affairs. There are no political parties. Prior to the production of oil in 1949, the population (largely Sunni Muslims) was one of the poorest in the region, with most livelihoods dependent upon fishing and pearling. Petroleum production and export together with the nationalization of both major oil producers, Qatar Petroleum Company and Shell Oil of Qatar, have led to the government providing considerable investment for infrastructural development. Qatar has been a member of the Gulf Cooperation Council since its inception in 1981 and is a member of the Organization of Arab Petroleum Exporting Countries and OPEC. The historic territorial dispute with Bahrain over the Hawar Islands flared up in 1986 when Qatari troops briefly occupied Fasht al-Dibal, a coral reef that was being reclaimed from the sea by Bahrain. It was later destroyed by agreement of both parties. After the 1990 Iraqi invasion of Kuwait, Qatar permitted the stationing of troops from the U.S.-led expeditionary force on its soil, and later supported the U.S.-led liberation of Kuwait

code-named OPERATION DESERT STORM. Five years after the end of Desert Storm, an Arabic news network, AL-JAZEERA, was launched in Qatar with heavy funding from the ruling family. The news service became critical of the government of Qatar's decision to permit the U.S. to use its forward bases as the command center for the March 2003 U.S.-led invasion of Iraq code-named Operation Iraqi Freedom. In 2005 Qatar's first written constitution came into effect, providing for some democratic reforms.

Qiao Guanhua (Chaio Kuan Hua, Chiao Kuan-hua) (1908–1983) Chinese communist political leader. During the early 1970s he played a key role in the normalization of relations between the PEOPLE'S REPUBLIC OF CHINA and the U.S. He headed China's first delegation to the UNITED NATIONS. With Henry KISSINGER, Qiao drafted the **Shanghai communiqué** during U.S. president Richard NIXON's 1972 visit to China. He was foreign minister from 1974 until 1976, when he was dismissed following the arrest of the GANG OF FOUR. He then played no public role for several years, but shortly before his

QATAR

1916	Qatar becomes a British protectorate after a treaty is signed with Sheikh Adbullah al-Thani.
1949	Oil production begins at the onshore Dukhan field in the west.
1971	Qatar declares independence, as the United Kingdom withdraws from the Persian Gulf region.
1972	In a bloodless coup, Emir Sheikh Ahmad bin Ali bin Abdullah al-Thani is overthrown by his cousin and prime minister, Sheikh Khalifa bin Hamad al-Thani.
1981	Qatar joins the Gulf Cooperation Council.
1986	A territorial dispute with Bahrain nearly escalates to war.
1990	Emir agrees to the deployment of Arab and Western forces on Qatar soil following the Iraqi invasion of Kuwait.
1991	Qatar sends ground troops to Saudi Arabia to back the U.S.-led UN forces there during the Persian Gulf War.
1995	Sheikh Khalifa is deposed in a bloodless coup by his son Hamad.
1996	The Arabic news network Al-Jazeera begins operations in Qatar.
2003	Qatar allows the United States military to set up its command center for the military campaign against Iraq.
2005	Qatar's first constitution provides some limited democratic reform.

death in 1983 he was appointed adviser to the People's Association for Friendship with Foreign Countries.

Quango (Quasi-Autonomous Non-Governmental Organisation) A body in Britain that has the power to spend public money but is not under direct governmental control.

Quant, Mary (1934–) British fashion designer and retailer, a key figure in the rise of British fashion in the 1950s and 1960s. Quant studied art at Goldsmith's College in London, where she met Alexander Greene, who became her partner in 1955. (They were married two years later.) The first Quant shop, Bazaar, opened in London in 1955 on the King's Road; it introduced a modern

youth-oriented concept in display and marketing as well as in the actual garments offered for sale. Quant helped Britain rise to a position of leadership in the fashion world with the introduction of the miniskirt in 1964.

quantum mechanics Branch of physics that deals with matter and energy on an atomic and subatomic level. The quantum theory was first formulated in 1900 by Max PLANCK. According to this theory, energy (light, for example) does not travel in a continuous wave, as was previously thought, but is formed by infinitely small bits ("quanta") pulsing in rapid succession. Albert EINSTEIN (1905), Niels BOHR (1913) and (all in the mid-1920s) Max BORN, Werner HEISENBERG, Paul DIRAC,

Pascal Jordan, Erwin SCHRODINGER and Louis DE BROGLIE all made important contributions to the field of quantum mechanics; Heisenberg introduced the **uncertainty principle** as a fundamental law of quantum mechanics. This 20th-century branch of science has revolutionized human knowledge of matter and energy.

quark Subatomic particle, believed to be the smallest elementary particle—1,000 times smaller than a proton. Physicists believe that quarks are the basis of protons and neutrons. The existence of quarks was first suggested by Murray GELL-MANN and George Zweig in 1964. The name is taken from a word coined by James JOYCE in *Finnegans Wake* (1939). Quarks can be classified as "charmed" or "strange," among other terms.

Quasimodo, Salvatore (1901–1968) Italian poet, critic and translator who won the NOBEL PRIZE for literature in 1959. After completing his studies to become an engineer, Quasimodo joined the Ministry of Public Works in 1928. His first collection, *Acque e terra* (1930, *Waters and Land*), recalled his Sicilian childhood. In 1938 he abandoned his technical trade, and in 1941 he became a professor of literature. Though his early poems showed the influence of symbolism and Hermeticism, over the years his language became simpler and his themes more public and socially committed. Of particular note are *Giorno doppio giorno* (1947, *Day after Day*), *La vita non è sogno* (1949, *Life Is Not Dream*), *La terra impareggiabile* (1958, *The Incomparable Land*) and *Dare e avere* (1966, *To Give and to Have*). He also translated ancient Greek and Latin poetry, Shakespeare, Molière, NERUDA and CUMMINGS.

Quayle, Sir John Anthony (1913–1989) British theater, film and television actor. Noted for the wide range of his work—from classical drama to Shakespeare to war movies—he began acting with the Old Vic Company in London but left the theater to enlist in the military in WORLD WAR II. After the war he joined the Shakespeare Memorial Theatre Company (now the ROYAL SHAKESPEARE COMPANY) in Stratford-upon-Avon and served both as an actor

and as the group's director (1948–56). He also founded the touring Compass group in 1984. Among his best known films were *The Wrong Man* (1957), *The Guns of Navarone* (1961) and *Lawrence of Arabia* (1963). He was nominated for an ACADEMY AWARD in 1970 for his portrayal of Cardinal Wolsey in *Anne of a Thousand Days*, a historical film about Henry VIII and Anne Boleyn. He was knighted in 1985.

Quebec (Québec) Province of eastern CANADA and one of the four founding provinces of the dominion (1867). Although French authority ended in 1763, French culture has remained dominant; in 1974 French was made the sole official language in the province. A group advocating independence arose in the 1960s, but in a referendum in May 1980 Quebec voted against secession. The secession movement revived in the late 1980s. (See also PARTI QUÉBÉCOIS, RENÉ LEVESQUE.)

Quebec Conferences Two talks held in Quebec during WORLD WAR II between U.S. president Franklin D. ROOSEVELT and British prime minister Winston CHURCHILL, with the participation of their military staffs. The first, code-named “Quadrant,” was held in August 1943 and involved plans for

the NORMANDY landings, Southeast Asia campaigns and the war in Italy. The second, code-named “Octagon” and held in September 1944, concerned the naval war in the Pacific, the Allied advance into Germany, operations in the Philippines and the MORGENTHAU PLAN.

Queen, Ellery (pen name of **Fred-eric Dannay and Manfred B. Lee**)

Both the author and his celebrated American detective creation, “Queen,” was an amateur sleuth, radio-TV-film star, magazine editor, anthologist and chronicler of the history of detective fiction. From *The Roman Hat Mystery* (1929) to *A Fine and Private Place* (1971), his 35 novels and numerous short stories ranged from exercises in pure deduction (*The Chinese Orange Mystery*) to complex psychological dramas (the justly famed “Wrightsville” cases, including *Calamity Town* and *Ten Days Wonder*). Queen himself changed from a snobbish, intellectual dandy to a probing and vulnerable observer of human truths and foibles. He has been portrayed in the movies, radio and television by Lew Ayres, Ralph Bellamy, William Gargan and George Nader. As editor and anthologist, he is without peer. *Ellery Queen's Mystery Magazine* began in 1941 and to date has pub-

lished the work of virtually every luminary in the field. After the deaths of Lee in 1971 and Dannay a decade later, the magazine continued in other hands. In 1941 Queen published the finest anthology of crime fiction extant, *101 Years' Entertainment: The Great Detective Stories of 1841–1941*.

Queen Mary British-flag OCEAN LINER, considered by many to have been the greatest passenger ship of the 20th century. In 1926 the board of directors of the Cunard Steamship Company ordered a new flagship. The *Queen Mary* was to be the largest, fastest and most glamorous passenger ship in the world. Work on the liner began on December 1, 1930, at the John Brown shipyard at Clydesbank, Scotland. After the project had been delayed for two years because of the GREAT DEPRESSION, the *Queen Mary* was christened and launched on September 26, 1934; further outfitting was required before the ship departed on her maiden voyage from Southampton, England, to New York on May 27, 1936. Her main rival on the transatlantic route was the elegant French liner *NORMANDIE*. Cunard launched a slightly larger sister ship, the *Queen Elizabeth*, in 1938. At the outbreak of WORLD WAR II, the *Queen Mary* was refitted as a troop ship. During the

The Queen Mary arrives in New York City, 1945. (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

war, she sailed 600,000 miles and carried nearly 900,000 Allied personnel. On one voyage she carried 15,000 soldiers—the largest number of passengers ever carried on any ship. British prime minister Winston CHURCHILL made three secret wartime transatlantic crossings on the *Queen* to attend Allied conferences in North America. Adolf HITLER ordered her sunk, but her top speed of more than 31 knots allowed her to elude enemy U-boats.

The *Queen* returned to transatlantic passenger service in 1947. Competition from passenger jetliners and rising operating costs forced Cunard to withdraw the *Queen Mary* from service in 1967. She was sold to the city of Long Beach, California, where she was permanently berthed and converted into a luxury hotel and museum. The *Queen Mary* weighs 81,237 tons, measures 1,019.5 feet long and had a cruising speed of 28.5 knots per hour. During her heyday, her passengers included many of the most prominent statesmen, authors, musicians, industrialists and film stars of the 20th century. On January 12, 2004, Cunard launched a newer, more modern transatlantic luxury liner, the *Queen Mary II*. With a length of 1,132 feet and a weight of approximately 151,400 gross tons, it has become the world's largest, longest, widest and tallest ocean liner.

Queen Maud Mountains Mountain range in ANTARCTICA south of the Ross Ice Shelf. Discovered in 1911 by Norwegian explorer Roald AMUNDSEN, the range boasts three of the world's great glaciers: Amundsen, Liv and Thorne.

Quemoy incident Quemoy, a Nationalist Chinese-held island six miles off the Red Chinese mainland, was a base for Nationalist raids against the communist mainland from 1953

to 1958. In August–September 1958 it was bombarded and threatened with invasion by the communists. A U.S. fleet moved in with supplies and a guarantee of military assistance.

queremistas (Port., *queremos Getúlio*, “we want Getúlio”) Supporters of Getúlio Vargas in the 1945 Brazilian presidential election. Vargas was dictator from 1937 to 1945 and from 1951 to 1954, when he committed suicide.

Quick, Armand J. (1894–1978) American pathologist. An authority on blood clotting, Quick was considered one of the 20th century's leading specialists on blood diseases. In 1932 he developed the prothrombin time test, also known as the Quick test, which was used to regulate the dosage of blood-thinning drugs and in diagnosing liver diseases.

Quisling, Vidkun (1887–1945) Norwegian politician, infamous as a traitor and Nazi collaborator during WORLD WAR II. Graduated from the Norwegian military academy with the highest honors ever awarded up to that time, he was a military attaché in Finland and Russia (1918–21), and later in the 1920s worked with Fridtjof NANSEN on famine relief in the UKRAINE. A fervent anticommunist, he served as NORWAY's minister of defense (1931–33); shortly thereafter, he founded the fascist National Unity (Nasjonal Samling) Party, which failed to win popular support. In the late 1930s he formed close ties with German Nazi leaders. He proclaimed himself prime minister after the German invasion of Norway (1940), and was officially recognized as such by the Germans in 1942. He formally allied Norway with Germany in 1943, but the Norwegian population remained firmly anti-Nazi. After the war he was tried for high treason by a Norwegian

tribunal, found guilty and executed. The name “Quisling” has entered the 20th-century vocabulary as an eponym for “traitor.”

quiz show scandal Television scandal that revealed in 1959 that many TV quiz shows were actually rigged. During the 1950s, quiz programs had emerged as one of the most popular types of television show. The \$64,000 *Question* competed with *Twenty-One* as contestants attempted to turn their knowledge into an instant fortune. The industry's image was tarnished when revelations emerged that many of the big winners were provided with the answers in advance. Producers and sponsors manipulated the shows to boost their ratings and sales. Perhaps the best-known casualty of the scandal was Professor Charles Van Doren of Columbia University, who not only was publicly humiliated but also lost his university post when his complicity in the scheme was exposed. Adding to the air of corruption at the time was the “payola” scandal in which disc jockeys at a number of radio stations were bribed by record companies to promote certain recording artists.

Qumran Village in PALESTINE; on the northwestern shore of the Dead Sea. Qumran, in the WEST BANK region, was part of JORDAN until it was occupied by ISRAEL in 1967. The village was inhabited by a group of religious Jews, probably Essenes, from the second century B.C. until the Romans destroyed it in 68 A.D. In 1947 a shepherd discovered a group of ancient manuscripts in a nearby cave. Archaeologists subsequently uncovered more manuscripts of the same origin. These turned out to have been written by the sect and came to be known as the **Dead Sea Scrolls**—one of the major archaeological finds of the 20th century.

R

Rabbani, Burhanuddin (1940–) Political leader of the United National and Islamic Front for the Salvation of Afghanistan (UNIFSA), also known as the Islamic Council of Mujahideen (ICM). Born in Badakhshan, Rabbani studied at the Kabul religious academy of Darul-uloom-e-Sharia and Kabul University, where he studied Islamic law and theology and joined the faculty in 1963. While in exile in Pakistan for his radical Islamic activities, Rabbani began to utilize his contacts among his former students and within the Jamiat-i-Islami to form a band of MUJAHIDEEN, or Islamic freedom fighters, who mounted an insurgency against the Soviet occupation of Afghanistan that began in 1979.

In 1992 three years after Soviet president Mikhail GORBACHEV had withdrawn Soviet military forces from Afghanistan, the insurgents defeated the remnants of the pro-Soviet government, and established a government in Kabul. Rabbani was elected president and began administering those portions of Afghanistan under government control. Four years later forces loyal to the Taliban, an alliance of Islamic clerics and Mujahideen espousing a form of ISLAMISM, took control of Kabul and forced Rabbani and his government to retreat into the mountainous north-western regions of Afghanistan. Shortly after its expulsion from Kabul, Rabbani's movement became known as the NORTHERN ALLIANCE, and continued to resist the Taliban's efforts to establish control over all of Afghanistan. The UN continued to recognize Rabbani as

the president of Afghanistan until Hamid KARZAI won election as the interim president of Afghanistan following the U.S. invasion of that country that toppled the TALIBAN regime in October 2001. Rabbani, who made a determined but failed bid to assume power after the fall of the Taliban, faded into obscurity.

Rabi, I(sidor) I(saac) (1898–1988) American physicist. Born in Rymanow in the Austro-Hungarian Empire, Rabi immigrated to the U.S. with his family shortly after his birth. He grew up on New York City's Lower East Side and in Brooklyn. Rabi studied electrical engineering, chemistry and physics, receiving his B.S. in chemistry from Cornell University (1919) and his Ph.D. in physics from Columbia (1927). A postgraduate fellowship enabled him to work with Niels BOHR, Werner HEISENBERG, Wolfgang PAULI, Erwin SCHRÖDINGER and Otto Stern in Denmark and Germany in the late 1920s. Rabi was particularly interested in the new field of quantum mechanics, which explained many phenomena not explained by classical physics. He returned to Columbia in 1929 and was associated with the university for the remainder of his career. During World War II he played a major role in the development of RADAR. He received the 1944 NOBEL PRIZE for physics for his discovery and measurement of the radio-frequency spectrum of atomic nuclei whose magnetic spin had been disturbed. This work eventually led to the development of extremely precise

atomic clocks and of nuclear magnetic resonance imaging for medical diagnosis. After the war Rabi became an advocate for nuclear arms control. From 1952 to 1956 he was chairman of the general advisory committee to the Atomic Energy Commission. He later headed President EISENHOWER's science advisory council, served on the U.S. delegation to UNESCO and worked for the establishment of an international physics laboratory, CERN, in Geneva.

Rabin, Yitzhak (1922–1995) Israeli politician, prime minister (1974–77). Born in Jerusalem, Rabin attended agricultural college (1936–40) before taking part in the Allied invasion of Syria in 1941. He was a member of the HAGANAH and an Israeli Defense Force (IDF) commander in the 1948 war. He was the head of the IDF's Tactical Operations Branch (1950–52) and, after graduating from the British Staff College, served successively as head of the IDF's training department (1954–56), head of the Northern Command (1956–59), deputy chief of staff (1960–64) and chief of staff (1964–68). The IDF's victory in the 1967 war brought him international acclaim, and he left to become ISRAEL's ambassador to Washington in 1968. Upon returning to Israel in 1973 he joined the Labor Party and served as its leader from 1974 to 1977; he was appointed prime minister after its 1974 election victory. He resigned in 1977 after being implicated in a minor infringement of foreign currency regulations, but remained active in politics and was appointed minister of defense by the

Labor-led government of national unity in 1984. He gained immediate popularity by his skillful withdrawal of the IDF from LEBANON, but was criticized by dovish Israelis for continuing his predecessor Ariel SHARON's strong-arm policy against WEST BANK Palestinians. In March 1986 Rabin publicly berated Prime Minister Shimon PERES for advocating unilateral West Bank autonomy. Condemning the proposal as "excessive talk about a concept which nobody can define," he provoked a major crisis within the Labor leadership, which exposed the long rivalry between the two men. Rabin became prime minister following the July 1992 victory of the Labor Party and helped draft the 1993 Oslo Accords with Yasir ARAFAT, which established the PALESTINIAN AUTHORITY (PA) as a quasi-political organization assigned to govern the increasing portions of the West Bank and Gaza Strip. Rabin and Arafat received the Nobel Peace Prize in 1994 for their efforts. On November 4, 1995, Rabin was assassinated by an Israeli student opposed to the accords.

Rachmaninoff, Sergei Vasilyevich (1873–1943) Russian composer and pianist. From an aristocratic family, Rachmaninoff studied at the Moscow Conservatory (1885–92) and quickly established a career as a virtuoso pianist and composer. Touring Scandinavia during the 1917 RUSSIAN

Russian pianist and composer Sergei Rachmaninoff
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

REVOLUTION, he never returned to his homeland but settled first in Switzerland and then in the United States, where he supported himself by extensive concertizing. One of the greatest pianists of the 20th century, Rachmaninoff also won popular acclaim for his romantic compositions, which are marked by sensuous tonality, rich melody and a melancholic mood. His work includes three symphonies, four piano concertos, the *Rhapsody on a Theme of Paganini* for piano and orchestra, and numerous works for solo piano as well as songs, operas and choral pieces. Rachmaninoff's music has been performed and recorded widely in the West and in Russia.

radar A system for locating a distant object by bouncing radio waves off its surface; the name is an acronym for "radio detection and ranging." Developed independently in several countries during the 1930s, it was first put into practical operation by Sir Robert Watson-Watt. Radar sends electromagnetic wave pulses toward an object by means of a transmitter; the waves reflect off the target and the returning waves are picked up by a receiver, amplified and converted into images displayed on a cathode-ray tube. Usually used to detect aircraft, radar gives information on a target's position, distance, direction, movement and shape. Radar employing long waves was first used in England early in WORLD WAR II. However, these wide beams proved inaccurate and were soon replaced by the accuracy of narrow microwaves produced by a cavity magnetron, a generating device invented (1940) by Sir John T. Randal and Henry A. Boot. By 1940 the British coast bristled with radar installations whose antennae were directed toward enemy countries. Radar was an enormously important defensive and offensive tool for Allied land and naval forces in World War II and was also used by the Germans after 1942 to target anti-aircraft guns. Systems were greatly improved and refined after the war. Today, radar continues to be used in many weapons systems and in defensive early warning installations, but is also widely employed in peacetime applications. It is routinely used by commercial airliners and traffic controllers, by weather forecasting systems, in surveying and navigating, and as a

guidance tool for rockets and satellites. Radar technology is also the basis for radio astronomy.

Radek, Karl Bernardovich (Karl Sobelsohn) (1885–1940?) Russian author and politician. Born in Poland of Jewish ancestry, he became a journalist and supported the German Social Democratic Party from 1904. He was imprisoned several times, fought in the RUSSIAN REVOLUTION (1917) and tried to organize a communist revolution in Germany (1918–19). He was a member of the presidium of the Communist International (1919–23), but his influence declined when the Comintern proved ineffective. He became head of the Sun Yat-sen Communist University for Chinese students in Moscow (1923–27) until he was expelled from the Communist Party (1927) on a charge of having supported TROTSKY, and was banished to the Urals. He was rehabilitated and wrote for *Izvestiya*. He also helped draft the 1936 constitution. In 1937 he was sentenced to 10 years' imprisonment for treason and is thought to have died in prison.

radio Radio is the transmission of electromagnetic waves from a source to a receiver. In 1901 MARCONI transmitted the letter "S" across the Atlantic; in 1904 John A. Fleming developed the vacuum electron tube; and in 1913 Edwin Armstrong patented the circuit that made long-range reception possible. By 1910 ship-to-shore radio communication was commonplace. The German army first used radio for entertainment during WORLD WAR I. The first commercial station in the U.S., KDKA, was established in Pittsburgh, Pennsylvania, in 1920. During the 1920s the number of radio stations, broadcasts and receivers increased dramatically. A new news and entertainment medium came into being. In 1932 radio transmissions were received from the Milky Way Galaxy. During WORLD WAR II radio technology was used in the development of RADAR. Radio changed every aspect of 20th-century life—industry, science, sports and entertainment.

Radio City Music Hall Theater forming a part of New York City's ROCKEFELLER CENTER complex of office

buildings; regarded as one of the major masterpieces of the ART DECO style. The original architects were Reinhard & Hofmeister; Corbett, Harrison & MacMurray; and Hood & Foulhoux, with the last team responsible for the overall original design of Rockefeller Center (1931–33). The Music Hall is discreetly imbedded within the RKO Building in such a way that it has no clear external identity, except for its corner entrance and marquee; but the interiors, designed with Donald DESKEY in charge of decoration, are a finely preserved showcase of 1930s design. The main auditorium is a vast space seating 6,250, with stage and orchestra pit elaborately equipped with elevators, turntables and other mechanical devices. The lobbies, grand stairway and many lounges and smoking rooms are distinguished examples of Art Deco idiom. The Music Hall has been a popular success and tourist attraction since its opening, as much for its design as for the films and stage shows offered there. The popular Rockettes chorus line has been a fixture at Rockefeller Center for many years.

Radio Station WHA Claimed as the world's oldest, the station was developed in the laboratories of the department of physics of the University of Wisconsin at Madison. When the station started a broadcasting service in 1915, clear broadcasting signals were received as far away as the Great Lakes Naval Station in northern Illinois. In 1922 WHA received a federal license to broadcast and is considered to be the world's oldest continuously operated radio station. When it first went on the air its tubes were hand-blown by local glassmakers and fitted for broadcast by local craftsmen. The station was the first educational radio station and broadcast the first music appreciation program to be sent across the airwaves.

Raft, George (1895–1980) American film actor. He was best known for his portrayal of cool, tough-guy characters in HOLLYWOOD gangster films of the 1930s and '40s. Between 1929 and 1967 he appeared in 105 movies, many of which were low-budget melodramas such as *Scarface*, *They Drive by Night*, *Each Dawn I Die* and *Souls at Sea*. In his heyday he was one of Hollywood's

highest-paid stars. However, he turned down the leading roles in *High Sierra*, *The Maltese Falcon* and *Casablanca*—roles that were subsequently played with great success by Humphrey BOGART, who soon eclipsed Raft as Hollywood's leading romantic tough guy. A frequenter of gambling casinos, Raft was rumored to be involved in organized crime; in 1965 he was convicted of tax evasion.

ragtime Popular American musical form originating in the 19th century; characterized by a syncopated melody set against a rhythmically foursquare bass. Its greatest vogue occurred between 1890 and 1914. Ragtime began in the Midwest, probably the result of improvisations by black pianists and banjo players playing in saloons and sporting houses. It was influenced by dance music, marching band music and ballads combined with African, Caribbean and American rhythms. Sedalia and St. Louis, Missouri, were two important early centers of ragtime. The ragtime written in these cities came to be known as the Missouri style, characterized by lyrical melodies and easy tempos. For years the form was transmitted aurally. The first published rag—"Mississippi Rag" by William H. Krell, a white bandmaster—appeared in 1897. The great popularity of ragtime was partly due to the fact that music in printed form and on piano rolls was widely available. For example, the "Maple Leaf Rag" by Scott JOPLIN, one of the most successful ragtime composers, sold over a million copies shortly after it was published in 1899. Besides Joplin, other composers in the Missouri style were New Jersey-born Joseph E. Lamb (1887–1960) and James Scott (1886–1938), who was based in Kansas City. As the popularity of the form spread, other ragtime styles emerged in other parts of the country. While ragtime was eclipsed by JAZZ about 1914, it enjoyed a revival in the late 1960s and 1970s with the rediscovery of the music of Scott Joplin and other ragtime composers.

Rahman, Sheikh Mujibur (1920–1975) Prime minister of BANGLADESH (1972–75). Leader of the Awami League, he campaigned for the independence of East Bengal from PAKISTAN. Arrested several times and

charged with treason in 1971, he was released upon Indian military intervention against Pakistan (see INDO-PAKISTANI WAR OF 1971). He returned to a hero's welcome on the establishment of the independent republic of Bangladesh at the end of 1971. As prime minister, the problems of creating a socialist state and parliamentary democracy in a desperately poor country proved too much, and Rahman assumed dictatorial powers in 1975. Later that year the army staged a coup, and he was murdered.

Rahman, Tunku Abdul (1903–1990) Malaysian statesman. The son of a sultan, he was educated at Cambridge and became a barrister (lawyer). He entered the Kedah state civil service in 1931 and was a cofounder of the nationalist United Malay National Organization in 1945. Named chief minister of Malaya in 1955, he was elected prime minister of an independent Malaya in 1957 and became prime minister of the newly created Federation of MALAYSIA in 1963. Fiercely anti-communist, he was adept at mediating among the various peoples of Malaysia to create a national consensus. Stresses on the system led to ethnic riots in 1969, and Rahman retired the following year. He later became a revered elder statesman and spoke out against the repressive regime of Prime Minister Mahathir bin Mohamad.

Rahner, Karl (1904–1984) German-born theologian. One of the most prominent Roman Catholic theologians of the 20th century, Rahner played a key role in the reforms of the SECOND VATICAN COUNCIL during the early 1960s. A member of the Jesuit order, he was regarded as progressive on most church issues. He developed a transcendental theological philosophy aimed at lessening the rigidity of the traditional Christian faith. Strongly influenced by the German existentialist philosopher Martin HEIDEGGER, Rahner published more than 4,000 works, including 30 books.

Raid on Entebbe See ENTEBBE, RAID ON.

Raid on Tokyo Bombing raid conducted by U.S. Army planes commanded by James DOOLITTLE on April

18, 1942. It was carried out by 16 B-25 Mitchell bombers launched from the aircraft carrier USS *Hornet*. Although the strike had to be carried on during daytime instead of at night, as originally planned, Doolittle and Admiral William HALSEY decided to go ahead. Thirteen bombers hit Tokyo and three others bombed Nagoya, Osaka and Kobe. Because of the distances involved, none of the planes could reach friendly airfields. One landed in the USSR and the others crash-landed or bailed out over China. In the process five U.S. airmen were killed and eight were captured by the Japanese. While the raid caused little serious physical damage to its targets, it was an enormous propaganda success in the U.S., boosting morale that had been depressed by the Japanese attack on PEARL HARBOR the previous December.

rain forests In the late 20th century, the fate of Earth's rain forests became a matter of grave concern. The human development of rain forest areas in economically depressed THIRD WORLD countries threatens one of Earth's largest, most important natural habitats. The South American rain forests alone may contain half of all living species. Using slash-and-burn methods, settlers are clearing huge areas of forest in a futile effort to make the land suitable for farming; in other areas, indiscriminate logging has taken its toll: In Brazil alone, some 4 million acres of forest vanishes every year. Consequently, thousands of species are being lost, while soil erosion threatens to create new desert. Massive forest fires spew carbon dioxide into the atmosphere, contributing to the GREENHOUSE EFFECT.

Rains, Claude (1889–1967) Anglo-American film actor, best known for his portrayals of suave villains. Born in London, Rains began as a child actor at age 11 and moved to the U.S. in 1914, where he was successful on the stage and later in radio. His first film success was as the title character in *The Invisible Man* (1933), adapted from the novel by H. G. WELLS. After his acclaimed portrayal of King John in *The Adventures of Robin Hood* (1938), Rains played a corrupt senator in Frank CAPRA's *Mr. Smith Goes to Washington* (1939) and a roguish Nazi collaborator in *CASABLANCA* (1942), earning two

ACADEMY AWARD nominations. He was nominated twice more for his performances in *Mr. Skeffington* (1944) and in Alfred HITCHCOCK's *Notorious* (1946). He also starred in a remake of *The Phantom of the Opera* (1943) and played supporting roles in *Lawrence of Arabia* (1962) and *The Greatest Story Ever Told* (1965).

Rajk, Lázló (1909–1949) Hungarian communist leader. Born near Budapest, he became a communist as a university student and fought from 1936 to 1939 with the International Brigade in the SPANISH CIVIL WAR. Returning to HUNGARY in 1941, he became active in the Communist Party, then an illegal organization. During WORLD WAR II, he resisted German occupation as a member of the underground. After the war he became Hungary's minister of the interior (1946–48) and foreign minister (1948–49). In 1949 he was charged with conspiring with TITO to overthrow the Hungarian government. While the evidence presented was clearly fabricated, he confessed and was hanged. In 1956 the Hungarian government admitted that the conviction had been in error and "rehabilitated" Rajk as a political figure.

Rajneesh, Bhagwan Shree (Chandra Mohan Jain) (1931–1990) Indian guru. He began his career in India, where he took the name Bhagwan (god) and preached a combination of free love and Eastern mysticism. He emigrated to the U.S. in 1981 and set up a commune near the tiny town of Antelope, Oregon, outraging local residents. In 1985 he pleaded guilty to violating immigration laws by arranging sham marriages between U.S. followers and foreign disciples. He was deported in 1985 and returned to India in 1986.

Rákosi, Mátyás (1892–1971) Hungarian communist leader and prime minister of HUNGARY (1949–53, 1955–56). Active in the communist opposition between the two world wars, Rákosi was sentenced to life imprisonment in 1935. He was released in 1940 to go to Moscow, where he led a committee of Hungarian communists. From 1945 he led the party and the government, presiding over the establishment of a Stalinist regime (see STALINISM). Replaced by the more liberal NAGY in 1953, by 1955 Rákosi had re-

gained control of the party. His repressive methods contributed to the unrest that led to the HUNGARIAN UPRISING OF 1956. In an attempt to appease the Hungarians the USSR persuaded him to resign.

Rakovsky, Khristian Georgyevich (1873–1938) Communist leader and diplomat, of Bulgarian origin. Because of his involvement with the socialist movement, Rakovsky was not able to enter Sofia University but studied abroad. In 1900 he was an officer in the Romanian army, but in 1907 he was expelled from Romania. After the communists came to power in Russia, Rakovsky was made a member of the All-Russian Central Executive Committee, and in 1919 of the Central Committee of the Communist Party. The chairman of the council of people's commissars of the Ukraine, he occupied several diplomatic posts, including Soviet ambassador to France (1926–27). He was, however, expelled from the Communist Party in 1927 as a result of his support of TROTSKY. He was readmitted in 1935 and was a departmental head of the People's Commissariat of Health. In 1937 he was dismissed, and in 1938, arrested. He was sentenced to 20 years' imprisonment, and it is believed that he died in a concentration camp.

Ram, Jaglivan (1908–1986) Indian politician. The acknowledged leader of INDIA's more than 100 million untouchables, he was born to an untouchable family in Bihar. In 1931 he joined the Congress Party, which under the leadership of Mohandas GANDHI and Jawaharlal NEHRU was the main force behind India's drive to independence. He was a member of nearly every Indian cabinet from that time. He served in the first government as minister of labor and went on to serve twice as minister of agriculture and also as railway minister. From 1970 to 1974 and from 1977 to 1979, he was minister of defense.

Rama IX (Bhumibol Adulyadej) (1927–) King Rama IX of the Chikri dynasty is THAILAND's longest-reigning monarch. Crowned May 5, 1950, he spent much of his young life in Switzerland, where he was educated at the École Miremont in Lausanne and

the École Nouvelle de la Suisse Romande. He succeeded his elder brother, Ananda Mahidol, on June 9, 1946, after Ananda was found dead in the palace from a gunshot wound. Whether the death was an accident, suicide or murder has never been determined. The king is highly respected not only because of his title but also because of his unending defense of and assistance to Thailand's rural poor. On June 9, 1996, King Rama IX celebrated his golden jubilee as Thai monarch. He is the first Thai king to achieve a reign of this length.

Rambert, Marie (Cyvia Rambam) (1888–1982) Ballet dancer, teacher, producer. Born in Poland, Rambert began dancing in Paris. After a season with Serge DIAGHILEV'S *BALLETS RUSSES*, she moved to London where she taught dance and encouraged works by new choreographers. In 1926 she produced Frederick ASHTON's first ballet *A Tragedy of Fashion*. She founded Ballet Rambert in the mid-1930s and spent 30 years producing works by new choreographers and guiding the careers of young dancers. She was knighted in 1962 for her contribution to the development of British ballet.

Ramgoolam, Sir Seewoosagur (1900–1985) Mauritian diplomat. Ramgoolam was a physician who became the first prime minister of MAURITIUS after that small Indian Ocean island gained independence from Britain in 1968. He led a succession of coalition governments until his administration was swept out of office in the general election of 1982. He held the largely ceremonial office of governor general until his death.

Ramos, Fidel (1928–) Philippine general and secretary of defense; perhaps the most loyal supporter of President AQUINO. Ramos graduated from the U.S. Military Academy at West Point in 1950; he earned a master's degree in civil engineering from the University of Illinois in 1951 and also possesses other military degrees. Ramos ascended through army ranks to become chief of the Philippine constabulary in 1972. He became vice chief of staff of the army in 1981 and chief of staff in 1986. He loyally supported

Aquino against attempted coups and was widely considered an honest and disciplined military man, though not without presidential ambitions. He was appointed secretary of defense in January 1988 after the resignation of Rafael Ileto. In 1990, after Aquino declared that she would not seek reelection, Ramos announced that he would run for the presidency. Ramos won the 1992 presidential election and remained in office until 1998, when he was succeeded by Joseph ESTRADA.

Ramos-Horta, José (1949–) East Timorese activist and winner of the Nobel Peace Prize (1996). Born to a Timorese mother and Portuguese father, Horta grew up in Dili, the capital of EAST TIMOR, which was then a Portuguese colony. He was educated in the Catholic mission located in the nearby village of Soibada.

In 1974 he became minister for external affairs and information in the transition government of the future Democratic Republic of East Timor that was assembled by Portugal before its withdrawal from the country in 1975. After the Indonesian invasion of East Timor in December 1975, Horta continued to champion the cause of East Timor's independence and publicized Indonesian abuses of human rights in his country. Horta later served as a mediator between the Indonesian government and the Revolutionary Front for an Independent East Timor (FRETELIN), the indigenous liberation movement within East Timor that he represented before the UN between 1976 and 1989.

In 1992 Horta presented the EUROPEAN UNION (EU) with a multistage plan for East Timorese independence and later urged the British and American governments to suspend military aid to Indonesia. In 1996 Horta and Carlos Felipe Ximenes BELO, a Roman Catholic bishop who championed the East Timor independence movement within the occupied territory, were awarded the Nobel Peace Prize. International pressure obliged the Indonesian government to hold a referendum within East Timor to allow its residents to determine their political future. In September 1999 the UN-supervised referendum resulted in a 78.5 percent vote in favor of independence.

Rampal, Jean-Pierre (1922–2000) French flutist. Born in Marseilles, Rampal first studied flute with his father, a professor at the Marseilles Conservatory of Music. He then studied at the Paris Conservatory and in 1945 joined the Paris Opera Orchestra where he was first flutist from 1958 to 1964. In the late 1940s Rampal also began to tour and to make recordings. His records won numerous Grand Prix du Disque awards. He first toured the U.S. in 1958 and returned regularly. He enlarged the flute repertoire by resurrecting forgotten music of the baroque era and also by adapting for flute compositions originally written for other instruments. In the 1990s, he continued to be enormously popular, giving over 150 concerts per year and filling concert halls the world over.

Ramsey, Sir Alfred (1920–1999) English soccer player and manager. Ramsey is best known as the mastermind of England's World Cup triumph in 1966. Although his greatest success came as a manager, Ramsey also enjoyed a successful playing career. He was a "polished" right back for Southampton and Tottenham Hotspur, and played 32 times for England. On his retirement, Ramsey joined Ipswich Town as manager and led the team from the obscurity of the second division to the first division championship in 1961–62. Following his success at Ipswich, Ramsey was appointed manager of England. Ramsey's innovative tactics and leadership qualities were well suited to international soccer. He introduced the 4-4-2 formation to English football, and his "wingless wonders" won the World Cup in 1966, defeating West Germany 4-2 in the final. He led England in its unsuccessful defense of the World Cup in 1970 and was dismissed as manager following England's failure to qualify for the 1974 World Cup finals. Ramsey was knighted for his services to soccer.

Ramsey, Arthur Michael (1904–1988) British religious leader. Ramsey held the post of archbishop of Canterbury (spiritual head of the Church of England and leader of the worldwide Anglican communion) from 1961 to 1974. A progressive social activist, Ramsey called on Great Britain to do away

with nuclear weapons, spoke out against the VIETNAM WAR and opposed curbs on minority immigration into Britain. He also supported abolition of the death penalty and of criminal penalties against homosexuals. In 1966, he met with Pope PAUL VI in Rome in what was the first official visit to a pope by a head of the Anglican Church in 400 years. Upon his retirement in 1974, he was made a life peer and took the title of Lord Ramsey of Canterbury.

Ramu (known as the “Wolf Boy”) (c. 1960s–1985) In 1976 a wild boy was discovered in the jungle in India, walking on all fours and in the company of three wolves. After examining him, Indian zoologists concluded that he had been raised by wolves. He was placed in a home for paupers run by Mother TERESA, winner of the 1979 NOBEL PRIZE for peace. He learned to bathe and dress himself but never learned to speak. The case gained worldwide attention.

Ranariddh, Prince Norodom (1944–) Leader of Cambodian royalist party, FUNCINPEC, and son of Cambodian king NORODOM SIHANOUK. Born in Phnom Penh, Ranariddh first entered politics when he became the representative of his father in Bangkok, Thailand, in 1983, where he sought to restore the royal family to the Cambodian throne after its ouster in a 1970 coup by General Lon Nol. Lon Nol's government was later ousted by the KHMER ROUGE in 1975. In 1991 following the withdrawal of Vietnamese forces from Cambodia and the promise of open and free elections by HUN SEN, the leader of the ruling Cambodian People's Party (CPP), Ranariddh returned to Cambodia to replace his father as the chairman of FUNCINPEC in order to coordinate the party's efforts at winning the elections. In 1993 Ranariddh helped guide FUNCINPEC to victory over the CPP in the Cambodian general elections, which led to the formation of a coalition government between FUNCINPEC and the CPP in which Ranariddh and Hun Sen jointly served as prime minister.

By 1997 relations between Ranariddh's FUNCINPEC and Hun Sen's CPP had deteriorated, and Ranariddh approached several former leaders of the

Khmer Rouge, the communist organization that had once ruled Cambodia, in order to obtain their participation in a new coalition government. Hun Sen responded by staging a coup in July 1997 that ousted Ranariddh and sent him into exile. At the end of 1997, Ranariddh returned to Cambodia and resumed his leadership position in the royalist party. In the national elections of July 1998, the CPP won a plurality of votes, but was again forced to join in a coalition government with FUNCINPEC. Although Hun Sen controlled the prime minister's office in this arrangement, Ranariddh's party held several ministerial positions, and Ranariddh himself became the head of the National Assembly.

Rand, Ayn (1905–1982) American novelist. Rand was born in Russia and became an American citizen in 1931. Her loathing of the Soviet revolution led her to develop a philosophy of almost rabid capitalism. Her best-selling novels have been greeted with derision on the one hand and various cult followings on the other. Her first major novel was *The Fountainhead* 1943; filmed 1949), which portrayed an iconoclastic architect fighting conventional attitudes. Her best-known novel, *Atlas Shrugged* (1957), presents the archetypal Rand hero, John Galt, an individualist fighting against “non-productive people” and struggling toward his own ends. *The Virtue of Selfishness: A New Concept of Egoism* (1964) awarded her the status of a leader of the popular intellectual movement “objectivism,” and she was in much demand as a lecturer. Other works include *We the Living* (1936) and *The Ayn Rand Lexicon: Objectivism from A to Z* (1984), a posthumous collection of earlier works. She also wrote plays and film scripts.

Randolph, A(sa) Philip (1889–1979) American labor leader and CIVIL RIGHTS activist. The son of a Methodist preacher, Randolph moved to New York to study at City College. There he was strongly impressed by the socialist ideas of Eugene V. DEBS. Randolph organized and published the black radical journal *The Messenger*; through this influential vehicle he promoted black causes, including the affiliation of black workers with labor unions. In

American labor and Civil Rights activist A. Philip Randolph (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

1925 he created and administered the Brotherhood of Sleeping Car Porters, which became affiliated with the AMERICAN FEDERATION OF LABOR (AFL) in 1936, and he was president of the National Negro Congress in the 1930s. In 1941 he threatened to lead a march on Washington, D.C., to protest the exclusion of blacks from industrial war work, which led to President Franklin D. ROOSEVELT's creation of the Commission on Fair Employment Practices. He was director of the 1963 MARCH ON WASHINGTON that led to increased jobs and civil rights for blacks.

Ranger A precursor to the APOLLO program, which was designed to land men on the moon, the Ranger series of unmanned spacecraft was initiated to relay from the moon's surface information needed for a manned landing. From August 1961 to March 1965, a series of Ranger spacecraft, managed by the JET PROPULSION LABORATORY in Pasadena, California, were launched. *Ranger 7*, one of the most successful, sent back more than 4,000 close-up images of the moon. Unfortunately, of the nine missions launched, only the last three were successful, and the program was replaced by the Lunar Orbiter series in August 1966.

Rank, Otto (Otto Rosenfeld) (1884–1939) Austrian psychologist. Rank was born in Vienna and earned a doctorate in philology from the University of Vienna in 1912. He began to study psychoanalysis under Sigmund FREUD in 1905 and went on to serve as Freud's personal secretary. From 1912 to 1924 Rank edited two different psychoanalytic journals and became one of the leading factors behind the growth in influence of psychoanalysis. Rank was the director of the International Psychoanalytic Institute of Vienna from 1919 to 1924. A Jew, he left Austria to escape the Nazis and spent the final years of his life in Paris and New York. His major writings include *Art and Artist* (1907), *The Myth of the Birth of the Hero* (1909) and *The Trauma of Birth* (1924), which Freud regarded as heretical to his own theories due to its emphasis on the birth experience itself as a factor in the creation of neurosis.

Rankin, Jeannette (1880–1973) U.S. congresswoman. Rankin initially worked as a seamstress, gaining knowledge of social conditions. After working for woman suffrage on the West Coast in 1910, she led a similar successful campaign in Montana in 1914. In 1916 Rankin became the first woman ever elected to the U.S. House of Representatives. She opposed U.S. entry into WORLD WAR I and WORLD WAR II. She declined to run for reelection in 1942, but continued a private career as an ardent feminist (see FEMINISM). In the 1960s she founded a co-operative homestead for women in Georgia and protested against the VIETNAM WAR.

Ransom, John Crowe (1888–1974) American poet and critic. A teacher at Vanderbilt for 23 years, Ransom was the editor and the eldest of the southern poets who contributed to *The Fugitive* from 1922 to 1925. Ransom was a former professor of the group's other leaders, Allen TATE and Robert Penn WARREN. Ransom originated the phrase NEW CRITICISM, a type of literary study closely associated with this group, and encouraged the polemic *I'll Take My Stand* (1930), a statement of agrarian ideals central to the thought of the new southern writers. Later he went to Kenyon College as professor of poetry.

In 1939 he was founder and editor of the *Kenyon Review*. Ransom is best remembered for the poems "Bells for John Whiteside's Daughter" and "Here Lies a Lady."

Rapacki Plan Polish foreign minister Rapacki proposed on February 14, 1958, a ban on the manufacture and deployment of nuclear weapons in Czechoslovakia, Poland and East and West Germany, to be guaranteed by joint NATO-WARSAW PACT inspection. A renewal of the suggestion at the UN on October 2, 1958, met with U.S. and British rejection, as the USSR would retain its conventional weapons superiority.

Rapallo Italian town on the Ligurian Sea, near Genoa. In the **Treaty of Rapallo** (November 12, 1920), Italy and Yugoslavia agreed to establish RIJEKA (Fiume) as a free state, although a protofascist expedition led by Italian poet, adventurer and aviator Gabriele D'ANNUNZIO had seized the city in 1919. In another treaty (between Germany and the USSR, April 16, 1922) Germany became the first government to recognize the Soviet government. This treaty renounced all claims stemming from the war, canceled prewar debts and formalized trade arrangements between the two nations. Among its secret provisions, the treaty allowed Germany to develop (in the USSR) weapons that it was forbidden to have by the Treaty of VERSAILLES.

rap music See HIP-HOP.

Rashid bin Said al Maktum, Sheik (1914–1990) Arab diplomat. In 1971, he cofounded the United Arab Emirates, a collection of seven sheikdoms in the PERSIAN GULF. He served as vice president of the UAE, while his brother-in-law Sheik Zayid bin Sultan Al Nuhayyan, ruler of Abu Dhabi, served as president. Previously, the sheikdoms had been ruled separately as the Trucial States under an agreement with Great Britain.

Rasputin, Grigory Yefimovich (1872–1916) Siberian peasant who exerted a pernicious influence at the court of Czar NICHOLAS II and on political affairs in RUSSIA in the years leading up to the RUSSIAN REVOLUTION.

Although without education, Rasputin allegedly possessed hypnotic powers, which he did not hesitate to exploit, and claimed to be able to work miracles, preaching that physical contact with him had a healing effect. As a youth Rasputin had been influenced by the Khlysty (Flagellants) sect. In 1903 Rasputin arrived in St. Petersburg as a *starets* (holy man) and as such gained access to the highest circles of society. He exercised virtually unlimited influence on Czarina ALEXANDRA by using hypnotism to stop the hemophilic czarovich's bleeding. She viewed him as a divine missionary, sent to save the dynasty. The church denounced him as an impostor, and in 1912 he was sent back to Siberia. In 1914 he returned, and by 1915, when the czarina was left in charge of domestic affairs, Rasputin's influence was vast, and many of the more capable ministers were dismissed. He continued his dissolute habits until his assassination by Prince Yusupov in 1916.

Rathbone, Basil (1892–1967) Anglo-American actor. Rathbone, who is perhaps best remembered in the U.S. for his portrayals of SHERLOCK HOLMES beginning with *The Hound of the Baskervilles* (1939), was born in South Africa and educated in England. He began his career as a Shakespearean stage actor; his first film in England was *The Fruitful Vine* (1923). Soon thereafter he went to HOLLYWOOD, where he made *Pity the Chorus Girl?* (1924) and other silent films while continuing to act on stage. With the advent of sound, Rathbone, with his cultivated accent, came into his own appearing opposite Norma Shearer in *The Last of Mrs. Cheyney* (1929) and as detective Philo Vance in *The Bishop Murder Case* (1930). Following his role in *David Copperfield* (1935) he settled in Hollywood playing a series of cerebral villains as well as making 14 Sherlock Holmes films. In the 1960s he took on a few unfortunate roles trading on his villainous image, the last of which was *Hillbillys in a Haunted House* (1967). Other important films include *Anna Karenina* (1935), *The Dawn Patrol* (1938) and John FORD's *The Last Hurrah* (1958).

Rathenau, Walter (1867–1922) German industrialist, statesman and social theorist. Born in Berlin, the son of Emil

Rathenau (1838–1915), he succeeded his father as president of a vast electrical trust. He organized GERMANY's war economy during WORLD WAR I and, after the war, served as minister of reconstruction (1921) and foreign minister (1922). In the latter office, he worked for reconciliation with the Allies, attempted to comply with reparation obligations and signed the Treaty of RAPALLO with the USSR. An advocate of a moderate decentralized social democracy and a Jew, he was despised by anti-Semitic nationalists. Several of these fanatics assassinated him in Berlin on June 24, 1922. His books include *In Days to Come* and *The New Society* (both 1921).

Rattigan, Sir Terence Mervyn (1911–1977) British playwright. Rattigan's early plays, beginning with *French Without Tears* (1936), were popular comedies. With *Winslow Boy* (1946), the story of a father defending his son against an accusation of theft, he established himself as an author of serious drama, a reputation he was to maintain in his subsequent works, such as *The Browning Version* (1948); *Ross* (1960), which was based on the life of T. E. LAWRENCE; and *Cause Celebre* (1977), which focused on an actual murder trial. In the preface to *Collected Works* (1953), Rattigan introduced "Aunt Edna," an archetypical, middle-brow theatergoer. Many critics—particularly those enamored of "the kitchen sink" dramatists—complained that Rattigan's work was middle brow as well. His popularity was undiminished, and his works continue to be revived.

Ratushinskaya, Irina (1954–) Russian poet and dissident; perhaps the last in a long line of distinguished poets who were persecuted under Soviet COMMUNISM during the 20th century. She studied physics at the University of Odessa, where she also began writing poetry and first encountered difficulties with the authorities. After graduation she taught physics and mathematics. In 1980 she and her husband, also a physicist, were denied emigration visas. Arrested for "anti-social" activities in 1982, she was sentenced to seven years of hard labor in the GULAG, to be followed by five years of internal exile. In prison she secretly wrote numerous poems that were circulated in Samizdat. In 1986 PEN organized an interna-

tional campaign for her release. The Soviet authorities released her on October 9, 1986 (the eve of the Reykjavik Summit), as a goodwill gesture. She and her husband immigrated to Britain, where she continued to write and also lectured about her experiences. Her books include *No, I'm Not Afraid* (1986), *Beyond the Limit* (1987), *Grey Is the Color of Hope* (1988) and *Pencil Letter* (1989).

Rau, Lady Dhanvanthi Rama (1893–1987) Indian feminist. A leading advocate of birth control, she was named president of the International Planned Parenthood Federation in 1963. She continued to serve as president emeritus after she resigned the post in 1971. She was the mother of author Santha Rama Rau.

Rauff, Walter Herman Julius (1907–1984) Nazi war criminal. An SS colonel, Rauff was accused of supervising the killing of thousands of eastern European JEWS in mobile gas chambers during WORLD WAR II. He was said to have personally designed and directed the "Black Raven" vans in which victims were locked and asphyxiated with exhaust fumes. Possibly 250,000 people died in the vans, which were used before HITLER's death camps were completed (see CONCENTRATION CAMPS, HOLOCAUST). Rauff escaped from a British POW camp in 1946 and settled in Chile in 1958. The Chilean government refused numerous requests to extradite him to stand trial.

Rauschenberg, Robert (1925–) American painter. Born in Port Arthur, Texas, he studied at the Kansas City Art Institute, the Académie Julian in Paris, Black Mountain College with Josef ALBERS and New York's Art Students League. He had an important role in various artistic and cultural movements of the mid-century U.S., including HAPPENINGS, POP ART, environmental art and the experimental theater. His most celebrated paintings of the 1950s are his COLLAGE "combines," works that mix a painterly abstraction with everyday objects such as clocks, tires and even stuffed animals. Among the best-known of these are *Gloria* (1956, Cleveland Museum of Art) and *Monogram* (1959, Moderna Museet, Stockholm). His work of the 1960s, such as *Kite* (1963), combines silkscreened images of the

popular culture with painted elements, often on large scale. Interested in many facets of the arts and in contemporary technological developments, Rauschenberg has served as a designer for the dancer/choreographer Merce CUNNINGHAM and in 1966 was a cofounder of Experiments in Art and Technology (EAT).

Ravel, Maurice (1875–1937) Important French composer who was second only to Claude DEBUSSY in his position as chief architect of modern French music. His *Boléro* (1928) and *Pavane pour une énfante defunte* (*Pavane for a Dead Princess*, 1899) are among the most popular of all modern compositions. He was born in Cibourne in the Basque region of France. At the Paris Conservatory, while less conspicuously radical than his immediate predecessor, Debussy, he nonetheless startled his teachers with his experiments in bold harmonic explorations; and he gained added notoriety through his association with the progressive musical group Apache (which included as members Igor STRAVINSKY and Manuel de FALLA). The range of his compositions was extraordinary. His ballet *Daphnis et Chloé* (1912), arguably his greatest work, was a highlight in the series of BALLETS RUSSES performances from the DIAGHILEV-FOKINE-NIJINSKY triumvirate. The piano works *Jeux d'Eau* (1902) and *Miroirs* (Mirrors, 1905) probably influenced the impressionist cast of Debussy's later piano music. The *Tzigane* (1924) and the *G major Piano Concerto* (1932) outrageously satirize, respectively, gypsy music and American JAZZ; while the weird *La Valse* (1920) virtually destroyed traditional waltz styles. Like Debussy, Ravel revolted against the Wagner hegemony; however, unlike Debussy, Ravel rarely employed the whole-tone scale and hardly ever abandoned tonality. Ravel was the most meticulous of craftsmen and retained a fastidious respect for classical form all his life. As a result, according to critic Virgil THOMSON, "his work presents fewer difficulties of comprehension than that of any other great figure in the modern movement." He was the master of twilight enchantment—the needlepoint sorcery of the *F major Quartet* and the *Ma Mère l'Oye* (1910)—and fantastic humor—the

ragtime dialogue between a black Wedgwood teapot and a Chinese cup in *L'Enfant et les Sortilèges* (*The Dream of a Naughty Child*, 1925). He died of a brain tumor in 1937, several years after a debilitating automobile accident.

Ravera, Camilla (1889–1988) Italian politician; postwar Italy's first woman senator-for-life and one of the founding members of the nation's COMMUNIST PARTY in 1921. A major figure in Italy's WOMEN'S LIBERATION MOVEMENT, Ravera spent five years in prison and eight years in internal exile during the fascist era.

Rawlings, Jerry (1947–) Leader of GHANA (June–September 1979 and 1981–2000). In May 1979 Rawlings, then a flight lieutenant in the Ghanaian air force, was arrested for having led an unsuccessful mutiny against his superior officers. However, his popularity with other military officers prompted a large contingent of troops to march on the prison in which Rawlings was held, liberating him. Rawlings orchestrated a coup d'état against the Ghanaian government. After seizing power, Rawlings and his fellow officers formed the Armed Forces Revolutionary Council (AFRC) in June 1979, which declared martial law and ruled Ghana until it could hold national elections toward the end of the month. In September 1979, Rawlings disbanded the AFRC and handed power over to the newly elected president of Ghana, Hilla Limann.

Rawlings later founded the People's National Defense Council (PNDC), a leftist opposition organization. On December 31, 1981, Rawlings staged a successful coup d'état that overthrew Limann and became Ghana's new president. In his efforts to improve the economic and social structure of Ghana, Rawlings sought aid first from the Soviet Union, and later from the INTERNATIONAL MONETARY FUND (IMF), the WORLD BANK, and private investment banks. Despite numerous allegations of human rights abuses by Rawlings, foreign financial institutions invested over \$5 billion in Ghana while many of the leftist militants in the PNDC accused Rawlings of deserting his revolutionary ideals.

In 1992 Rawlings handily won election to the presidency, amid allega-

tions of fraud and intimidation. His policies improved economic conditions in Ghana, as foreign investment continued to enter the country, although opponents of Rawlings's policies complained that the influx of foreign capital produced a condition of neoimperialism between Ghana and the foreign sources of its investment capital. Although Rawlings won reelection to the presidency in 1996, he was defeated in 2000 by the NPP presidential candidate, John Agyekum Kufor, and retired from politics.

Rawlings, Marjorie Kinnan (1896–1953) American author. A graduate of the University of Wisconsin (1918), Rawlings's early work was as a journalist. All her novels had a southern background, particularly in the backwoods of Florida, except for her final novel, *The Sojourner* (1953), which had a northern setting. In 1938 she wrote *The Yearling*, which won the PULITZER PRIZE in 1939 and has become an American classic. Her other works include *South Moon Under* (1933), *Golden Apples* (1935) and *Cross Creek* (1942).

Ray, Man (1890–1976) American painter and photographer. Ray is best known as the only American artist to make a substantial contribution to SURREALISM and to be welcomed into its European circles. Born in Philadelphia, he was raised in New York City and worked there for a time as an advertising illustrator, becoming familiar with graphic art processes. In 1914 he became involved with a circle of American painters including Joseph Stella. In 1915 came a decisive meeting between Ray and Marcel DUCHAMP, who introduced Ray to the aesthetics of DADA. Ray emigrated to Paris in 1921, where he won renown both as a painter and as the inventor of the "Rayogram"—a photographic technique in which objects or persons are positioned so as to cast evocative shadows on light-sensitive paper. For this mechanistic innovation, Ray was dubbed the "machine-poet" by his fellow surrealists. One of his most famous paintings is *L'Etoile de Mer* (1928). *Self-Portrait* (1963) is his autobiography. *Man Ray: Photographs* (1982) is a major collection of his work in that medium.

Rayburn, Samuel Taliaferro (1882–1961) American politician. Raised on a Texas farm, Rayburn taught school and became a lawyer in Bonham. Developing an interest in politics, he started his career as a state legislator (1907–12) and became speaker of the Texas house of representatives in 1911. He set a record for tenure when he was elected as a Democrat to the U.S. House of Representatives for 24 consecutive terms (1913–61). Appointed chairman of the Commission on Interest and Foreign Commerce in 1931, he helped design President Franklin ROOSEVELT's NEW DEAL program and coauthored six important laws to support it. Rayburn was Speaker of the House from 1940 to 1947, 1949 to 1953 and 1955 to 1961. He became one of the strongest Speakers in U.S. history. Highly regarded for his integrity and lack of pretension, he was extremely successful in dominating, indirectly, the legislative process and committee assignments through personal relationships with powerful committee chairmen. He was President Harry S. TRUMAN's chief supporter in Congress and one of his closest advisers. Except for civil rights measures, he backed much of Truman's domestic program and eventually supported his foreign policy as well. During the 1950s he worked with the EISENHOWER administration to defeat Republican isolationist measures. Although a supporter of Lyndon JOHNSON for president in 1960, he worked with the KENNEDY administration on much of its initial legislation.

U.S. Representative Sam Rayburn (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

RCA Corporation American communications corporation established in 1919. RCA was incorporated in Delaware and later moved to 30 Rockefeller Plaza in New York City. A month after incorporating, it acquired the Marconi Wireless Telegraph Company, a British-dominated company that owned most of the commercial radio communication facilities in the U.S. RCA entered the field of broadcasting in 1926 when it bought WEAf, now WNBC (New York), from AT&T. NBC was incorporated that year, with RCA owning 30% of the stock; Westinghouse Electric Corporation, 20%; and General Electric, 50%. RCA would later own NBC entirely. RCA grew into a giant multinational corporation whose operations extended far beyond broadcasting and included the production of SATELLITES and SEMICONDUCTORS. In 1986, RCA and its subsidiary NBC were acquired by General Electric (GE) for \$6.4 billion.

Read, Sir Herbert Edward (1893–1968) British poet and critic. Born in Leeds, Read served in France during WORLD WAR I, the formative event of his life. He was later a professor of fine art. His early poetry collections, such as *Songs of Chaos* (1915) and *Naked Warriors* (1919), showed a strong imagist influence (see IMAGISM). Later poetry, including that in *The End of the War* (1933) and *Collected Poems* (1966), is more esoteric and deemed inaccessible by some. A friend of T. S. ELIOT, Read was an influential figure in the British critical and literary establishment from the 1930s until his death. His critical works include *The True Voice in Feeling* (1953) and *Essays in Literary Criticism* (1969). He also wrote on the arts, notably in *Arts and Industry* (1934) and *Education through Art* (1943), and frequently championed new artistic movements. He recollected the war in such works as *In Retreat* (1925) and his life in the autobiography *The Contrary Experience* (1963). His son, Piers Paul Read (b. 1941), is a novelist.

Reader's Digest American periodical. *Reader's Digest* was conceived by De Witt Wallace, whose marriage to heiress Lila Bell Acheson brought him the backing to begin publishing the magazine in 1922. Its original intent

was to present edited versions of articles from other magazines to save readers' time, but as its popularity grew, Wallace adopted the odd practice of paying other magazines to accept stories that he would then edit for use in the *Digest*. It eventually included original material as well. Aimed at the American middle class, the magazine has been criticized for its unintellectual, platitudinous style and subject matter, but by the mid-1950s it had the highest circulation of any magazine in the world. The *Reader's Digest*, Incorporated empire came to include record clubs, condensed-book clubs and many other assets in addition to the magazine.

Reagan, Ronald Wilson (1911–2004) American actor, politician and 40th president of the U.S. (1981–89). His family moved to Dixon, Illinois, while Ronald was a boy. Following participation in football at Eureka College, he graduated from the Illinois school in 1932. His very successful career as a sportscaster at radio station WHO in Des Moines, Iowa, coupled with his handsome good looks, attracted the attention of HOLLYWOOD, where he had a successful career as a second-rank leading man. His most-remembered movie was *Knute Rockne—All American* (1940). He served in WORLD WAR II as an air force captain.

Ronald Reagan, 40th president of the United States (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

He began a successful administrative career in 1947 as president of the Screen Actors Guild, serving until 1952 and again in 1959. He kept his name before the public in occasional screen roles and on television programs and was a widely heard radio commentator. Changing from a liberal Democrat to a moderate Republican in 1962, he took an interest in politics, beginning with the unsuccessful campaign of Barry GOLDWATER for president in 1964 (the same year in which Reagan made his last screen appearance, in Don SIEGEL's *The Killers*). Two years later, after a meteoric rise in politics, Ronald Reagan was elected governor of CALIFORNIA. Soon to become the most populous state in the union, California provided an important opportunity for an aspiring politician. Reagan was reelected in 1970. His successes in meeting California's budget, reducing the bureaucracy, eliminating the state deficit and reducing social services, were the most noted aspects of his administrations.

Retiring as governor in 1974, he began to put his extraordinary administrative and public relations experience to work in a run for the presidency. He made a strong bid in 1976, but lost the Republican nomination to Gerald FORD. Nominated in 1980, Reagan won a landslide victory over Jimmy CARTER, opposing all the Carter liberal policies and accusing him of gross ineptitude.

Minutes after Reagan was inaugurated, on January 20, 1981, the 52 Americans who had been held hostage in Iran for 444 days were flown to freedom, following an agreement to return a portion of Iran's frozen assets. On March 30, the president was shot in the chest by John Hinckley, Jr., as he walked to his car after an address at the Washington Hilton. On August 5, in one of his boldest strokes, he fired striking air traffic controllers, who had defied his back-to-work order. His dispatch of a task force to lead the invasion of Grenada in 1983 greatly increased his general popularity.

On the domestic front, his administration was dominated by so-called "Reaganomics." This economic program called for substantial tax cuts and reduced spending for domestic programs. With the help of a bipartisan coalition in Congress, he succeeded in

programs to cut the budget and reform Social Security. His economic policies and their successes were credited by many economists with reducing inflation, and Reagan remained a firm believer in his economic theories. He also was ever-vigilant in his program to build up the armed forces, which he felt had been dangerously weakened during the Carter administration.

In 1984 Reagan and Vice President George BUSH were nominated by the Republicans and won a landslide victory over Walter MONDALE. At age 73 Reagan became the oldest person ever to hold the office of president. Surgery in 1985 and 1987 was followed by swift recovery, remarkable for a man of his age.

During most of his first term, Reagan had referred to the Soviet Union as an "evil empire." He was a firm advocate of U.S. support for arming Europe in defense of that empire. However, during his second term, he apparently concluded that his military program had brought the Russian leaders to a change of heart, and the administration began arms control discussions. Reagan's summit meeting with Soviet leader GORBACHEV in November 1985 failed to reach general agreement, but the Reagan-Gorbachev meeting in early 1988 resulted in a draft treaty to reduce nuclear arms in Europe. Later that year in Moscow, the two leaders signed the treaty, which was ratified by the appropriate legislatures in each country.

During the early part of his second term, the president received some of the highest popularity ratings in the history of the office—spurred on by low unemployment, a strong economy and low interest rates. He continued to be strong in support of the Central American countries, providing help to EL SALVADOR against the insurgents there and successfully promoting support of the CONTRA rebels in NICARAGUA. That support was undercut by the actions of some of his administrators in selling arms to IRAN, monies from which sale were diverted to aid for the contras. This contra scandal substantially lessened his national support and international stature, making the balance of his second term a period of uncertain accomplishment. In 1993 it was revealed that Reagan was suffering from Alzheimer's, leading to his retirement and seclusion in his California ranch. Reagan died in June 2004.

Recruit Scandal (Japan) Bribery scandal (1988–89). Recruit Co. (a multicompany conglomerate) made cash available to and sold unlisted, expensive stock in Recruit Cosmos (real estate affiliate) to high-ranking government officials. The stock later traded publicly at much higher rates, creating large profits for officials involved. Prime Minister TAKESHITA NOBORU was implicated and resigned in April 1989. In July 1989, Takeshita's Liberal Democratic Party was defeated for the first time in 34 years and lost its majority in the Diet (parliament).

Red Army Bolshevik army whose task was to protect the Soviet Union from its external enemies. The workers' and peasants' Red Army was formed by LENIN on January 28, 1918, from the workers' militia, the Red Guards. At first consisting of proletarian volunteers, conscription was introduced during the RUSSIAN CIVIL WAR; at this stage the army was under TROTSKY. The Red Army was demobilized at the end of the civil war and the war with Poland, although a core of half a million men was retained. Owing to the party's commitment to war as a means of bringing about revolution, expansion was rapid during the 1920s and 1930s, and in the latter decade ranks were reintroduced and officers' privileges reinstated. At first during WORLD WAR II the Red Army was fighting mainly a defensive war, but from 1943 the army embarked on offensive operations. Following the war its name was changed to Soviet Army, and it was reorganized along traditional Russian lines. In 1981 there were about 187 divisions, of which some 100 were at combat readiness, with a total force of about 1.8 million.

Red Army Faction Radical wing of the BAADER-MEINHOF terrorist group.

Red Brigades (Brigate rosse) Left-wing Italian urban terrorist organization, active from the early 1970s into the early 1980s. The Red Brigades waged a violent campaign against the political and business establishment of ITALY, using much the same methods as their German counterpart, the BAADER-MEINHOF GROUP—bombings, kidnappings and assassinations. Their most infamous act, the kidnapping and

murder of former Italian prime minister Aldo MORO in spring 1978, gave rise to public revulsion and tough new antiterrorist measures.

Red Cross See INTERNATIONAL COMMITTEE OF THE RED CROSS; LEAGUE OF RED CROSS SOCIETIES.

Redding, J. Saunders (1906–1988) U.S. author and historian; one of the founders of the academic discipline of Afro-American studies. In 1949 Redding became one of the first blacks to teach at an Ivy League institution when he was appointed a visiting professor of English at Brown University, his alma mater. In 1970 he became the first black professor on Cornell University's faculty of arts and sciences.

Redding, Otis (1941–1967) American singer. Born in Dawson, Georgia, the son of a Baptist minister, Redding became one of the preeminent male rhythm-and-blues singers of the 1960s. He had his first major success in 1963 with "These Arms of Mine," which he also wrote. In 1967, he was at the height of his career following his performance at the Monterey Pop Festival and his nomination as top male singer by *Melody Maker*. On December 10 of that year, he and four members of his band were killed when their chartered plane crashed into Lake Monona in southern Wisconsin. Early in 1968, Redding's "(Sittin' on) The Dock of the Bay," which he had recorded shortly before the accident, made it to number-one on both the pop and the rhythm-and-blues charts.

Redford, Robert (1937–) American film actor. Born Charles Robert Redford in Santa Monica, California, the handsome blond actor is one of America's authentic superstars. He attended the University of Colorado, quitting to travel and paint. Returning to the U.S. in 1957, he decided on a career as a theatrical scene designer and enrolled in Pratt Institute and the American Academy of Dramatic Arts. He began working as an actor in 1959 and scored his first success in Neil SIMON's *Barefoot in the Park* (1963; filmed 1967). Since then he has starred in such film hits as *Butch Cassidy and the Sundance Kid* (1969) and *The Sting* (1973), playing lovable rogues with

Paul NEWMAN as his partner in crime; *The Candidate* (1972), *All the President's Men* (1976) and *The Natural* (1984). Some of his best roles have been under the direction of Sydney Pollack. These include *Jeremiah Johnson* (1972), *The Way We Were* (1973), *The Electric Horseman* (1978) and *Out of Africa* (1985). Redford was also the director of *Ordinary People* (1980) and *The Milagro Beanfield War* (1987). A liberal activist, he has been particularly concerned with environmental issues, purchasing 6,000 acres near Park City, Utah, on which he founded the Sundance Resort and, later, the Sundance Film Festival, Sundance Institute, Sundance Catalog and Sundance television channel. Throughout the 1990s Redford continued to appear in such dramatic films as *Indecent Proposal* (1993), *Up Close and Personal* (1996) and *The Horse Whisperer* (1998), and he directed *The Legend of Bagdad* (2000).

Redgrave, Sir Michael Scudamore (1908–1985) British actor. One of the leading British actors of his generation, he first made his reputation in the mid-1930s in Shakespearean roles on the London stage. His first film performance, in Alfred HITCHCOCK's *The Lady Vanishes* (1938), made him an overnight movie star. He appeared in 34 other films, the last in 1971. On stage his portrayal of the title character in CHEKHOV's *Uncle Vanya* was considered definitive. Suffering from Parkinson's disease, he made his last appearance in a major theatrical production as a speechless, wheelchair-bound invalid in Simon GRAY's *Close of Play* (1979). Redgrave was the father of two well-known actresses, **Lynn Redgrave** and Vanessa REDGRAVE; his son Colin was also an actor.

Redgrave, Vanessa (1937–) British actress. The daughter of distinguished actor Sir Michael REDGRAVE and sister of actress Lynn Redgrave, Vanessa Redgrave was born in London. She studied at the Central School of Speech and Drama in that city and made her stage debut at the Frinton Summer Theatre in July 1957. Although her vocal left-wing politics and public support of the PALESTINE LIBERATION ORGANIZATION have occasionally received more attention than her acting, Redgrave has enjoyed a remarkable career both on the

stage and on film. She won the *Evening Standard* Award for Best Actress of the Year on London's West End twice, in 1961 for *The Lady from the Sea* and in 1966 for *The Prime of Miss Jean Brodie*. She was nominated for best actress ACADEMY AWARDS three times, for her performances in *Morgan!*, *The Loves of Isadora* and *Mary, Queen of Scots*. She won an Academy Award for best supporting actress for *Julia*. Redgrave received an Emmy Award for her performance as a lesbian in 1950s America in the Home Box Office production *If These Walls Could Talk* (2000).

Red Guards Term used to describe the radical students and other cadres who carried out MAO ZEDONG's CULTURAL REVOLUTION in CHINA in the late 1960s. The Red Guards disrupted life at all levels and threw the nation into chaos. Brandishing Mao's *Little Red Book* and imbued with a fanatical spirit, they denounced, harassed, arrested, tried and punished those whom they considered enemies of Mao and the revolution. Victims of the Red Guards included educators, intellectuals, artists and writers and Communist Party bureaucrats. Perhaps 400,000 people died at the hands of the Red Guards; many more were imprisoned or forced to work on collective farms as part of their political "reeducation." At the height of the Cultural Revolution, there were an estimated 11 million Red Guards. The guards were disbanded after Mao's death in 1976.

Red Scare Wave of fear of political radicalism that swept the U.S. in the wake of the RUSSIAN REVOLUTION (1917). It culminated in the so-called **Palmer Raids** that occurred during the tenure of Alexander Mitchell Palmer as U.S. attorney general (1919–21). Peaking in 1920, roundups conducted in 33 American cities resulted in the arrests of thousands of citizens and aliens alleged to be "Reds" (communists, socialists, anarchists and other radicals) who were charged with attempting to overthrow the government by force and violence. Several hundred aliens, including Emma Goldman, were subsequently deported.

Redstone, Sumner (1923–) CEO of Viacom, Inc. (1987–). While a student at Harvard University, he worked

in an intelligence task force designed to crack Japanese diplomatic and military ciphers before graduating with a B.A. in 1944. After graduating from Harvard Law School in 1947, he became a legal secretary for the U.S. court of appeals in San Francisco, while also teaching law at the University of San Francisco. He later became a partner in the Washington, D.C., law firm of Ford, Bergson, Adams, Borkland and Redstone. In 1954 he went to work for National Amusements, Inc., a motion picture distribution house and became president and chief executive officer of the company in 1967 and chairman of the board in 1986. A year later, he orchestrated National Amusements' purchase of a controlling interest in Viacom, a New York City-based entertainment and media corporation, of which Redstone became CEO and chairman of the board. In 1994 Redstone convinced the board of Viacom to purchase Paramount Pictures, renowned for producing such films as the *Star Trek* series and the NATIONAL BROADCASTING CORPORATION (NBC) situation-comedy *FRASIER*. Paramount also owned the national movie, video game, and music rental and sales store Blockbuster. Redstone later convinced Viacom's board to purchase other television and cable networks, such as MTV, Nickelodeon, Showtime and Comedy Central. In 1999, the year Viacom purchased Columbia Broadcasting Services (CBS), Redstone resigned his position as president of National Amusements, but retained his titles of CEO and chairman of the board of both National Amusements and Viacom, in which he controlled a majority of the voting stock.

Red Shoes, The Classic English film made in 1948 that focuses on the obsessions and ambitions of the ballet world. The film is famous for its romanticism, visual impact, special effects and imaginatively filmed ballet sequences, and had an effect on such major dance films as *An American in Paris* (1951). Based on a Hans Christian Andersen fairy tale, *The Red Shoes* was written and directed by Michael POWELL and Emeric PRESSBURGER, and starred dancers Moira Shearer, Robert HELPMANN and Leonide MASSINE, as well as actors Marius Goring and Anton Walbrook.

Reed, Sir Carol (1906–1976) British actor and film director. Reed was among the foremost British directors of his generation. He began his career as a film and theater actor in the 1930s. Reed's featurelength directorial debut came with *Night Train to Munich* (1940), a political thriller. During WORLD WAR II, Reed devoted himself to documentaries on the war effort. Following the war, he directed *Odd Man Out* (1947) and *The Fallen Idol* (1948). Next came his most critically acclaimed film, *The Third Man* (1949). Starring Orson WELLES and Joseph Cotten, and utilizing a brilliant screenplay by Graham GREENE, *The Third Man* masterfully explored postwar despair and intrigue in Vienna. Subsequent films directed by Reed include *The Agony and the Ecstasy* (1965), a treatment of the life of Michelangelo starring Charlton HESTON, and *Oliver!* (1968), a musical that won the ACADEMY AWARD for best picture, while Reed was honored with the award for best director.

Reed, John (1887–1920) American journalist who covered the war in eastern Europe, becoming a close friend of LENIN. He was an eyewitness of the 1917 OCTOBER REVOLUTION and wrote his account *Ten Days that Shook the World* (1919). In 1919 he organized the Communist Labor Party in the U.S. and was founder and first editor of the *Voice of Labor*. For a short period he was the Soviet consul in New York. He left the U.S. for Russia, where he died of typhus and was buried in the Kremlin wall. Other works include *The War in Eastern Europe* (1916) and *Red Russia* (1919).

Reed, Stanley (1884–1980) U.S. Supreme Court justice (1938–57). Reed was named to the Supreme Court by President Franklin D. ROOSEVELT and wrote more than 300 opinions on a broad range of issues, including social welfare, civil rights and the regulatory powers of the federal government. His decisions often defied prediction. However, he was noted for his support of NEW DEAL legislation and his restrained view of civil liberties. Reed regularly voted to uphold federal economic and social welfare laws and thus helped to legitimize the expansion of government regulatory powers that oc-

curred during the 1930s. Previous to his Court appointment, Reed served as counsel of the Federal Farm Board (1929–32) and as general counsel of the Reconstruction Finance Corporation (1932–35). He was U.S. solicitor general from 1935 until his appointment to the Supreme Court in 1938.

Reed, Walter (1851–1902) American army pathologist and bacteriologist. Reed obtained his medical degree from the University of Virginia (1869) before he was 18. He was commissioned in the Army Medical Corps in 1875 and began to specialize in bacteriology. In 1900 he headed a commission to investigate the causes and mode of transmission of an epidemic of yellow fever among American troops in Havana, Cuba. He and other doctors conducted a series of daring experiments using human volunteers. The results of the experiments proved the fever was caused and transmitted by a virus carried by a certain type of mosquito. Shortly before Reed's death, Harvard conferred on him an honorary degree of A.M., and the University of Michigan gave him the degree of LL.D. The Army Medical Center in Washington, D.C., is named in his honor.

regionalism A movement in American painting during the GREAT DEPRESSION of the 1930s that celebrated the sturdy, homespun values and people of the Midwest. It was a timely confluence of many artistic, social and political factors. In reaction to the flood of modern European art on the market, there was a growing desire to support an indigenously American form of art. Anxiety over the depression and growing distrust of urban centers because of the stock market crash (1929) stimulated a yearning for a return to a simpler life closer to the soil. It all began with an exhibition at the Kansas City Art Institute in 1933 by New York art dealer Maynard Walker (a native Kansan). "American Painting Since Whistler" comprised 35 paintings, featuring prominently work by John Stewart Curry, a Kansas commercial illustrator; Grant WOOD, an Iowa painter; and Thomas Hart BENTON, a Missouri mural painter. The December 24, 1934, issue of *Time* magazine picked up on the story, displaying Benton's self-portrait on the cover and a full-

color illustrated article inside, "The U.S. Scene." It was the first time a major American periodical had given so much attention to living artists. It proclaimed Curry, Wood and Benton as the leading painters of the American scene. Nine months later an article by Thomas Craven in *Harper's Monthly*, "Our Art Becomes American: We Draw Up Our Declaration of Independence," confirmed the movement now dubbed "regionalism." The ensuing decade tended to stereotype both the artists and their work. What had originally been a satiric view of midwestern subjects now seemed to soften and mellow. As Tom Benton admitted: "Grant Wood became the typical Iowa small townner, John Curry the typical Kansas farmer, and I just an Ozark hillbilly. We accepted our roles." The movement lost its momentum (if not its public favor) with the transfer of public attention from local to international issues during WORLD WAR II. Wood died of liver cancer in 1942 and Curry of a stroke in 1946. Benton himself barely survived a heart attack in 1952. Attacks on regionalism's supposed "antiartistic" aims and essentially fascist narrowness of ideology in such magazines as *The Magazine of Art* after 1946 further weakened its position in the art world.

Règle du jeu, La (*The Rules of the Game*) French film acknowledged as Jean RENOIR's masterpiece and regularly included in *Sight and Sound* magazine's annual poll of the Ten Best Movies of all time. It culminated a great sequence of masterpieces from Renoir's peak phase in the 1930s (including *Le Crime de M. Lange* and *La grande illusion*). The exteriors were shot in the late winter and spring of 1939 in the Château de la Ferté-Saint-Aubin, and the interiors were shot at the Billancourt Studios in Joinville. Although Renoir called his story (freely derived from de Musset and Beaumarchais) a "divertissement," it conveyed so bitter a view of French society that it was censored for its initial release in 1939. (The film was not restored to its original form until 1959.) The story of an outing at a country estate of a disparate group of aristocrats, citizens, and servants is essentially an ensemble piece that, in part, was improvised. It achieves great complexity by its balance of humor

and pathos, compassion and satire, artifice and reality. By turns, there are the tender love scenes between the tragic Octave (Renoir himself) and the ambivalent Christine (Nora Gregor); the delicious “vaudevilles” of the amateur theatricals at the estate; and the brutal savagery of the celebrated “rabbit hunt” sequence. This rondelet of love and cruelty was perfectly captured by the mobile camera and deep-space compositions of cinematographer Jean Bachelet. All is flux. Relationships shift, change and realign again. The continual revelation of layered meanings through repeated viewings is exhilarating. A favorite quotation of Renoir’s applies: “In nature nothing is created, nothing is lost, everything is transformed.”

Rehnquist, William H(ubbs) (1924–2005) Associate justice, U.S. Supreme Court (1971–86), chief justice (1986–2005). A graduate of Stanford, Harvard and Stanford Law School, early in his career he was a clerk to Supreme Court Justice Robert H. JACKSON. A conservative Republican, he was appointed to the highly visible position of chief legal counsel for the Justice Department under President Richard M. NIXON. He became an eloquent spokesperson for the Nixon administration’s positions, some of which were highly controversial. He was nominated to the Supreme Court by President Nixon in 1971; in 1986 President Ronald REAGAN nominated him to fill the vacancy in the chief justice’s seat after Warren BURGER’s resignation. There was significant opposition to his nomination, although it ultimately proved successful. On the Court, Justice Rehnquist was a consistent conservative, although often in dissent. In later years, a larger conservative block on the Court allowed the Rehnquist Court to issue more conservative rulings, significantly cutting back the rulings issued by the Court during the WARREN and Burger years. In 1998 and 1999 Rehnquist presided over the Senate impeachment of President Bill Clinton. He died in September 2005.

Reich, Wilhelm (1897–1957) Austrian psychiatrist. After graduate and postgraduate work at the University of Vienna, Reich trained in psychoanaly-

sis under FREUD. In 1927 he published *The Function of Orgasm*, in which he argued that the release of sexual tension is necessary for personal health. In the late 1920s, Reich became a politically active Marxist. He moved to Berlin in 1930 but was forced to flee Nazi Germany in 1933. He continued his work, now on character structure and political psychology, in Scandinavia before leaving Europe for the U.S. in 1939. In America, Reich conducted his research on “orgone,” or sexual energy. He and his colleagues at the Orgone Institute designed an “orgone accumulator,” a box that they claimed could cure many diseases, including cancer, by concentrating organismic energy from the atmosphere. The government declared Reich’s therapy a fraud, and he was sentenced to two years in prison, where he died of a heart attack.

Reichstag fire Fire that destroyed Germany’s parliament building on February 27, 1933, a month after Adolf HITLER became chancellor. Blaming the conflagration on communist terrorists, Hitler succeeded in passing legislation that gave him dictatorial powers and suspended civil rights. The police arrested a Dutch worker, Marinus van der Lubbe, along with a number of communist leaders including Georgi DIMITROV. In the subsequent trial, van der Lubbe was found guilty and exe-

The burning of the Reichstag, 1933 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

cuted, while the communists were judged to be not guilty. Opponents of the Nazis alleged that the fire had been set by them to ensure the passage of anticommunist laws. However, later evidence suggested that van der Lubbe alone was responsible for the fire.

Reilly, Sidney (Sigmund Rosenbloom) (1874–1925) Russian-born British secret agent. Reilly, “ace of spies,” was a legendary yet shadowy figure who is widely considered to have been the first modern intelligence agent. His activities spanned the first quarter of the 20th century. Of Jewish origin, he emigrated to Britain and offered his services to the foreign office. In the years leading up to WORLD WAR I he was reputedly involved in espionage activities in Germany, where he attempted to obtain secret plans for German battleships. He developed business interests in Russia, which gave him access to high officials. After the RUSSIAN REVOLUTION he worked to keep Russia in the war against Germany. Soon after the BOLSHEVIK (OCTOBER) REVOLUTION he organized a plan to overthrow LENIN and replace the Bolshevik government with a White Russian government headed by himself, but this was thwarted. He spent the next several years working with White Russian emigré organizations in Europe and the U.S. In 1925 he returned to Russia to expose the Trust, a reputed counterrevolutionary group, as an organization controlled by the CHEKA (secret police) designed to funnel funds from the West and lure anti-Bolshevik emigrés back to Russia, where they would be arrested. Reilly himself was arrested by Feliks DZERZHINSKY, head of the Cheka, apparently on the direct orders of STALIN. He was subsequently executed. However, learning of the secret Trust, the suspicious Stalin ordered its members arrested and executed; Dzershinsky himself was a victim of this early purge. Even though he lost his life, Reilly had thus succeeded in his final mission.

Reiner, Carl (1922–) American comedian, comedy writer and director of television and film. Reiner became a comedy star on Sid CAESAR’s Emmy award-winning program *Your Show of Shows* (1950–54, known as *Caesar’s Hour* 1954–57) during the “Golden

Age of Television Comedy.” Reiner served the show in various roles including sketch writer, straight man and even creating oddball characters with funny accents. On the show, Reiner also teamed up with Mel Brooks to create the classic comedy routine “The Two Thousand Year Old Man,” which was made into a successful album. Reiner created another television hit, *The Dick Van Dyke Show* (1961–66), which launched the careers of stars Dick Van Dyke and Mary Tyler Moore; he also costarred in this pioneering “sitcom for adults.” In the late 1960s and ’70s Reiner’s brilliance for comedy continued to flourish, as he shifted his talents to writing, directing or starring in several accomplished films, including *It’s a Mad, Mad, Mad, Mad World* (1963), *The Russians Are Coming, the Russians Are Coming* (1966), *The Comic* (1969) and *Oh God* (1977). Several other of his film projects have achieved cult status, such as *Where’s Poppa?* (1970) and his fruitful collaborations with comedian Steve Martin, such as *The Jerk* (1979), *Dead Men Don’t Wear Plaid* (1982) and *All of Me* (1984). Reiner’s son Rob (1945–) is also a major Hollywood talent, acting in the hit television show *ALL IN THE FAMILY* and directing such films as *This Is Spinal Tap* (1984), *Stand By Me* (1986), *The Princess Bride* (1987) and *When Harry Met Sally* (1989). Throughout the 1990s Reiner repeatedly appeared as a county judge on NBC’s television series *Law and Order* and *Mad About You*. He played a veteran con artist in the 2001 remake of *Ocean’s Eleven* and its sequel, *Ocean’s Twelve* (2004).

Reiner, Fritz (1888–1963) Hungarian-born orchestra conductor who brought the Chicago Symphony Orchestra to world prominence at mid-century. Reiner was born in Budapest where at age 10 he studied with Béla BARTÓK. Despite family pressure to become a lawyer, he pursued a conducting career, leading the Dresden Court Orchestra from 1914 to 1922 and succeeding Eugène Ysaÿe at the Cincinnati Symphony in the U.S. from 1922 to 1931. He became an American citizen in 1928 and held many posts during the next 25 years—head of the opera and orchestral departments at the Curtis Institute during the 1930s, music director of the Pittsburgh Symphony

Orchestra from 1938 to 1948, conductor of the Metropolitan Opera from 1949 to 1953 and (most significantly) music director of the Chicago Symphony Orchestra during its peak period from 1953 to 1962. Comparisons with Arturo TOSCANINI are inevitable: His baton technique was minimal but legendary in its precision; his mood was irascible and he frequently bullied his players; and he rejected “romantic,” effusive interpretations of music in favor of a no-nonsense, objective approach. In addition to his beloved Viennese classics, Reiner was especially renowned for his performances of Bartók, Paul HINDEMITH and Richard STRAUSS.

Reinhardt, Ad(olph) (1913–1967) American painter. Born in Buffalo, New York, he studied art history at Columbia University with Meyer SCHAPIRO and at New York University’s Institute of Fine Arts. A theorist and teacher, he taught at Brooklyn College from 1947 until his death. His early works are geometric in character and employ strong color contrasts. In the 1950s his work became quieter and tended toward symmetrical monotonies. In the 1960s he developed the “black paintings” for which he is best known. These canvases appear totally black at first glance, but further scrutiny reveals a subtle geometry in an extremely close tonal range.

Reinhardt, Max (Max Goldmann) (1873–1943) Austrian theatrical director and producer. Reinhardt was one of the most important and influential figures in the development of the modern theater in Europe. He began his theatrical career as an actor (1890–1900), becoming well known for his performances at Berlin’s Deutsches Theater. He managed his own theater (1902–05) and took over directorial duties at the Deutsches Theater in 1905. His many productions there set the standard for European experimental theater, and he initiated such practices as including the audience in the production. Reinhardt became known for his spectacularly rich productions, filled with large casts, elaborate costumes and masterful sets. He was just as adept in staging the works of great masters, such as Sophocles, Shakespeare and Goethe, as he was in pro-

ducing and directing works by contemporaries, such as Luigi PIRANDELLO and George Bernard SHAW. In 1919 Reinhardt opened the massive Grosses Schauspielhaus in Berlin, and the following year he initiated the Salzburg Festival, where he staged a yearly production of *Everyman*. Among his greatest successes were GORKY’s *The Lower Depths* (1903), *Oedipus Rex* (1910), *The Oresteia* (1919), *Danton’s Death* (1920), *A Midsummer Night’s Dream* (1934; film, 1935) and *Six Characters in Search of an Author* (1940). The coming of the Nazis caused Reinhardt to flee Germany in 1933. He settled in the U.S., continued his theatrical career on the New York stage and the Hollywood screen and became an American citizen in 1940.

Reisman, David (1909–2003) American sociologist. Reisman taught sociology at the University of Chicago from 1946 to 1958. His scholarly book *The Lonely Crowd: A Study of the Changing American Character* (1950), about the trend toward individual isolation and depersonalization, was a bestseller and became a classic of sociology. He taught at Harvard (1958–80) and specialized in the sociology of higher education.

Reitsch, Hanna (1912–1979) German flyer. One of the most famous women pilots of the 1930s, Reitsch won many awards for setting altitude and endurance records and during World War II flight-tested the robot-controlled v 1. She piloted what may have been the last German airplane out of besieged Berlin in April 1945 and, as a favorite of Adolf HITLER, is believed to have been one of the last people to see him alive.

relativity, theory of See Albert EINSTEIN.

Relay Two early experimental communications satellites built by RCA for NASA. Both were launched in three-stage Thor-Delta rockets from Cape Canaveral (see CAPE KENNEDY); *Relay 1* blasted off on December 13, 1962, and *Relay 2* was launched on January 21, 1964. Both were designed to transmit either one television channel, 300 one-way voice channels or 12 two-way telephone channels, receiving and retransmitting signals between the

U.S., Europe, Japan and South America. The 170-lb. aluminum satellites were tapered octagons, 33 inches high and 29 inches in diameter at their broad ends. Their 11 watts of power were produced by some 8,200 solar cells on each exterior. *Relay 1* had an orbit with an apogee of 4,612 miles and a perigee of 819 miles with an angle to the equator of 47.5 degrees and a period of 186 minutes. *Relay 2*'s orbit had an apogee of 4,606 miles and a perigee of 1,298 miles at an angle of 46 degrees to the equator and a period of 195 minutes. Both operated until their power was shut off, *Relay 1* in February 1965 and *Relay 2* seven months later.

R.E.M. American alternative rock group. Founded in Athens, Georgia, in 1981 by vocalist Michael Stipe, guitarist Peter Buck, bassist Mike Bass, and drummer Bill Berry, R.E.M. began playing in local bars in Georgia and other southeastern states. In May 1982, R.E.M. recorded its first record, *Chronic Town*, through the small independent label I.R.S. Records, followed seven months later by its first full-length record, *Murmur*. While the band experienced some financial success with *Life's Rich Pageant* (1986), which went gold by the end of 1986, R.E.M.'s breakthrough into the genre of popular music came in 1987 with *Document*, which was propelled into the Top 10

Albums sold that year largely due to its hit single "The One I Love." After signing with the music division of Warner Brothers in 1988, the group recorded its sixth full-length record, *Green* (1988). Three years later R.E.M. released *Out of Time*, the group's first record to reach number one in worldwide sales, with nearly 5 million copies in distribution. While some of R.E.M.'s fans expressed concern that the group's commercial success would lead them away from their alternative rock sound, the band's next album, *Automatic For the People* (1992) represented a return to the introspective songs of R.E.M.'s earlier days. The group maintained its popularity throughout the 1990s with *Monster* (1994) and a world tour that promoted the album. In 1996, the group re-signed with Warner Brothers, and released *New Adventures in Hi-Fi* which contained new songs they had recorded live during their *Monster* tour in 1994. Since 1994, R.E.M. has recorded three albums—*Up* (1998), *Reveal* (2001) and *Around the Sun* (2004).

Remagen Rhine River town in Germany's Rhineland-Palatinate, about 20 miles north of Koblenz. Remagen secured a place in 20th-century history as the location of the Ludendorff Bridge (built during World War I). This was the only Rhine River bridge still standing when the advancing Al-

lies reached the river early in 1945, near the end of WORLD WAR II. After fierce fighting the Allies captured the bridge on March 8, 1945. This victory enabled the Allies to cross the river in force and with heavy equipment, thus numbering the days of HITLER'S Reich.

Remarque, Erich Maria (1898–1970) German-American author. Most famous for his powerful antiwar novel *All Quiet on the Western Front* (1929), Remarque used the theme of the horrors and chaos of war and its aftermath in all subsequent works. The catalyst for his writing was his stint in the German army during WORLD WAR I. After the war he worked at various jobs including teacher and auto worker. He left Germany in the 1930s when the Nazis rose to power. In 1947 he became an American citizen. Other major novels include *The Road Back* (1931), *Arch of Triumph* (1946), *A Time to Love and a Time to Die* (1954) and *The Night in Lisbon* (1964).

Remembrance of Things Past Seven-volume novel sequence (1913–1927) by French writer Marcel PROUST. *Remembrance of Things Past* stands among the supreme achievements of 20th-century literature. The central theme of the sequence, which was initiated with *Swann's Way* in 1913, is the intricate individual consciousness of time's passing and its implications for human endeavors and for the ultimate event of death. *Remembrance of Things Past* was conceived by Proust when he was 38, and his relatively late arrival to artistic maturity is reflected in the poignancy with which all the characters of the sequence review lives filled with time squandered and opportunities lost. Memory alone—in all its vividness, beauty and anguish—has a restorative power for the human soul. Love and jealousy are seen as inextricably intertwined. On the social scale, *Remembrance of Things Past* depicts the transformation of French society from aristocratic reign to the economic dominance of the untitled bourgeoisie.

Remizov, Alexei Mikhailovich (1877–1957) Writer. Expelled from Moscow University, he spent the next few years at Penza, Ust-Sysolsk and

Rock band R.E.M., 1991
(PHOTOFEST)

Vologda. In 1904 he was released from police surveillance and settled in St. Petersburg. He organized the satirical Great and Free House of Apes, of which he was “chancellor,” and sent most Russian writers and publishers handwritten charters, stating their position in the house. By World War I Remizov was head of a new school of fiction. His *Mala* and *The Lament for the Ruin of Russia* (1917) convey conditions in Petrograd (St. Petersburg) from 1914 to 1921. His work, however, is extremely varied in style and content. His prose consists of contemporary stories, the best-known of which is *The Story of Ivan Semyonovich Stratilatov* (1909), legends, folk stories, dreams and plays. His verse is less successful. In 1921 Remizov emigrated and settled in Paris.

Remy, Colonel See Gilbert RENAULT.

Renault, Gilbert (1904–1984) Renault was one of FRANCE's most decorated heroes of the RESISTANCE against the Germans during WORLD WAR II. Best known by his wartime pseudonym, Colonel Remy, he was the principal organizer of the FREE FRENCH intelligence network, which provided the Allies with valuable information on German troop movements before D-DAY. Renault's autobiography, *Memoirs of a Secret Agent of Free France*, was highly acclaimed when it was published in the U.S. in 1948. He was also a film director and writer.

Renault, Mary (Mary Challans) (1905–1983) British novelist. Renault is best known for her popular historical novels, which bring 20th-century insights and knowledge to bear on ancient events, frequently in Greece or Asia Minor. Her novels include *The King Must Die* (1958) and *The Bull from the Sea* (1962), both based on Theseus, legendary king of Athens; *The Persian Boy* (1972), which evokes the reign of Alexander the Great; and *The Friendly Young Ladies* (1985).

Renoir, Jean (1894–1979) French director, widely acclaimed as France's greatest filmmaker. Renoir was born in Paris, the second son of Impressionist painter Auguste Renoir. A growing passion for the cinema led to his first directorial effort, *La Fille de l'Eau* (1924).

By the time he filmed his early talkies, *La Chienne* and *Boudu sauve des Eaux* (*Boudu Saved From Drowning*, 1932), he had gained a measure of artistic independence, which he stubbornly fought to maintain the rest of his long career.

His greatest creative period came in the late 1930s with *Le Crime de M. Lange* (*The Crime of M. Lange*, 1936), a drama of collectivism and working-class solidarity (eloquent of Renoir's leftist sympathies with the POPULAR FRONT); *La Grande Illusion* (*The Grand Illusion*, 1937), a drama of relationships in a World War I prison camp; *La Bête humaine* (*The Human Beast*, 1938), a melodrama of trains and murder adapted from Emile Zola; and his masterpiece, *LA RÉGLE DU JEU* (*The Rules of the Game*, 1939), a dark-humored indictment of a world poised on the brink of war. Renoir's war years were spent in HOLLYWOOD where he became an American citizen. His last works included a meditation on the artifices of theater and film, *Le Petit Théâtre de Jean Renoir* (1971), and an autobiography, *Ma Vie et mes films* (*My Life and My Films*, 1974). Before his death in 1979 he received a lifetime achievement ACADEMY AWARD. The range of his achievement makes him difficult to categorize. There is the sparkling humor of the “Arizona Jim” episodes of *M. Lange*, the deeply felt, sensitive, almost documentary observation of nature in *Partie de campagne* (*A Day in the Country*, 1937) and the grim, blunt depiction of the savagery of man in the famous “rabbit hunt” sequence in *The Rules of the Game*. His awesome camera technique was perfectly wedded to his humanistic aims. Andre Bazin hailed Renoir as the spiritual godfather of the so-called French NEW WAVE in the 1950s. His deep-focus frame, moving camera and long takes “permitted everything to be said without chopping the world up into little fragments, that would reveal the hidden meanings in people and things without disturbing the unity natural to them.” Ultimately there are no villains and heroes in Renoir's world, no easy labels of praise or blame.

Republican Party American political party founded in 1854; one of the two major political parties in the UNITED STATES. The philosophy of the Republican Party is generally more conservative than that of the DEMOCRATIC

PARTY. Republicans tend to support a free rein to business interests, opposing government regulation in the economy and federally funded social programs. They have traditionally been unsupportive of organized labor and of organizations seeking change in society.

The Republican National Committee serves as a coordinator of the national conventions and assists in campaigning and fund-raising, at which, since the 1970s, it has become more effective and organized than its Democratic counterpart.

With the exception of Woodrow WILSON's presidency (1913 to 1921), Republicans controlled the presidency from 1900 to 1932 and dominated both the House and the Senate for most of that time. After Franklin ROOSEVELT's NEW DEAL, the Republican Party went into decline. By 1960 it was in such disarray that some observers predicted its demise.

Following 1969 it began to gain strength. The Republican Party had traditionally been divided between moderates and conservatives, but beginning with Barry GOLDWATER's nomination in 1964, the conservative faction gained party dominance. The party's credibility was damaged during Richard NIXON's administration by the WATERGATE affair, but following the tax revolts of the late 1970s it gained support among those opposed to government spending. Ronald REAGAN's election in 1980 brought renewed vigor to the party, and his support of the Moral Majority brought fundamentalist religious groups, many of which were traditional southern Democrats, to the Republican side. Reagan's personal popularity overshadowed the IRAN-CONTRA SCANDAL, and Republicans prevailed at the 1988 elections when George H. W. BUSH succeeded him. However, despite its successes in retaining the presidency, the Republican Party remained the minority party in both houses of Congress. In the 1990s the Republican Party lost the presidency to Democrat William Jefferson CLINTON in 1992 and 1996, but gained control of both houses of Congress in 1995 and retained it until 2001. In 2001 Republican George W. BUSH was sworn in as president, but the party lost control of the Senate in 2001 due to a poor performance in the 2000 elections and the decision by Re-

publican senator Jim Jeffords of Vermont to become an independent, giving the Democrats a one-member majority in the Senate. However the 2002 elections returned control of the Senate to the Republicans.

Republics, Constituent The UNION OF SOVIET SOCIALIST REPUBLICS was formed by the union of the Russian Soviet Federated Socialist Republic, the Ukrainian Soviet Socialist Republic, the Belorussian Soviet Socialist Republic and the Transcaucasian Soviet Socialist Republic. The Treaty of Union was adopted by the first Soviet congress of the USSR on December 30, 1922. In May 1925 the Uzbek and Turkmen Autonomous Soviet Socialist Republics and in December 1929 the Tadzhik Autonomous Soviet Socialist Republic were declared constituent members of the USSR, becoming union republics.

At the eighth congress of the Soviets, on December 5, 1936, a new constitution of the USSR was adopted. The Transcaucasian Republic was split into the Armenian Soviet Socialist Republic, the Azerbaijan Soviet Socialist Republic and the Georgian Soviet Socialist Republic, each of which became a constituent republic of the union. At the same time the Kazakh Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic, previously autonomous republics within the Russian Soviet Federated Socialist Republic, were proclaimed constituent republics of the USSR.

In September 1939 Soviet troops occupied eastern Poland as far as the CURZON LINE, which in 1919 had been drawn on ethnographic grounds as the eastern frontier of Poland, and incorporated it into the Ukrainian and Belorussian Soviet Socialist Republics. In February 1951 some districts of the Drogobych Region of the Ukraine and the Lublin Voyevodship of Poland were exchanged.

On March 31, 1940, territory ceded by Finland was joined to that of the autonomous Soviet socialist republic of Karelia to form the Karelo-Finnish Soviet Socialist Republic, which was admitted into the union as the 12th union republic. On July 16, 1956, the Supreme Soviet of the USSR adopted a law altering the status of the Karelo-Finnish Republic from that of a union

(constituent) republic of the USSR to that of an autonomous (Karelian) republic within the Russian Soviet Federated Socialist Republic.

On August 2, 1940, the Moldavian Soviet Socialist Republic was constituted as the 13th union republic. It comprised the former Moldavian Autonomous Soviet Socialist Republic and Bessarabia (the latter ceded by Romania on June 28, 1940), except for the Bessarabia districts of Khotin, Akerman and Ismail, which, together with northern Bukovina, were incorporated in the Ukrainian Soviet Republic. The Soviet-Romanian frontier thus constituted was confirmed by the peace treaty with Romania, signed on February 10, 1947. On June 29, 1945, Ruthenia (Sub-Carpathian Russia) was by treaty with Czechoslovakia absorbed in the Ukrainian Soviet Socialist Republic.

On August 3, 1940, Estonia, Latvia and Lithuania were incorporated in the Soviet Union as the 14th, 15th and 16th union republics. The change in the status of the Karelo-Finnish Republic reduced the number of union republics to 15.

After the defeat of Germany it was agreed by the governments of Great Britain, the U.S. and the USSR (the Potsdam agreement) that part of East Prussia should be ceded to the USSR. The area, which includes the towns of Königsberg (renamed Kaliningrad), Tilsit (renamed Sovyetsk) and Insterburg (renamed Chernyakhovsk), was joined to the Russian Soviet Federated Socialist Republic by a decree of April 7, 1946.

By the peace treaty with Finland, signed on February 10, 1947, the province of Petsamo (Pechenga), ceded to Finland on October 14, 1920, and March 12, 1946, was returned to the Soviet Union. On September 19, 1955, the Soviet Union renounced its treaty rights to the naval base of Porkkala-Udd and on January 26, 1956, completed the withdrawal of forces from Finnish territory.

In 1945, after the defeat of Japan, the southern half of Sakhalin Island, and the Kuril Islands, were, by agreement with the Allies, incorporated into the USSR. Japan, however, asked for the return of the islands of Etorofu and Kunashiri as not belonging to the Kuril Islands proper. The Soviet government informed Japan on January

27, 1960, that the Habomai Islands and Shikotan would be handed back to Japan on the withdrawal of American troops from Japan. On December 25, 1991, the Union of Soviet Socialist Republics ceased to exist.

Resistance Movement among citizens of the countries occupied by Germany in WORLD WAR II in opposition to the Nazis. The model for Resistance organization and activity can be said to have been provided by French general Charles DE GAULLE and his followers. According to de Gaulle himself, there were three stages in the development of the Resistance: (1) the establishment of an information network to benefit the Allies; (2) the sabotage of the enemy war machine and rejection of compromise with occupying authority; (3) the organization and training of military forces (in the case of France, the FREE FRENCH) to attack German troops as the Allies advanced and the promotion of a climate hospitable to the restoration of the nation when the enemy was defeated. As the war progressed, individual Resistance groups ranged from small cells to large armies. Organized networks specialized in obtaining military or economic information, providing aid and escape routes for prisoners, maintaining caches of arms, producing propaganda, engaging in sabotage and mounting guerrilla attacks. At the end of the war Resistance groups cooperated closely with the liberating armies in mopping up the retreating German forces. After the war members of the Resistance were swift and often violent in punishing those who had collaborated with the Germans.

Resnais, Alain (1922–) French film director. Resnais was one of the leading directors of the NOUVELLE VAGUE that dominated the French cinema of the late 1950s and 1960s. He won great acclaim for his very first film, *Night and Fog* (1956), a documentary on the Nazi CONCENTRATION CAMPS. In his later imaginative films, Resnais experimented with flashback and memory to convey the emotional complexity of his characters. These films include *Hiroshima mon Amour* (1959), *Last Year at Marienbad* (1961, screenplay by Alain ROBBE-GRILLET), *Providence* (1977) and *La Vie est un roman* (1982). In 1993 Resnais released the

critically acclaimed film *Smoking/No Smoking*, an adaptation of the stage performance of *Intimate Exchanges*. Four years later Resnais premiered *Same Old Song*, a romantic musical film composed of popular music ballads. Both films earned Resnais several French César awards, France's version of the American Academy Awards, including Best Film for *Same Old Song* and *Smoking/No Smoking*, and Best Director for *Smoking/No Smoking*.

Resnik, Judith (1949–1986) U.S. astronaut, one of seven killed in the explosion of the SPACE SHUTTLE *CHALLENGER* on January 28, 1986. A research scientist, she held an electrical engineering degree and was also a classical pianist. She became the second American woman in space when she flew on a shuttle mission in 1984.

Respighi, Ottorino (1879–1936) Italian composer. Respighi is regarded as a master of orchestration who successfully blended evocative melodies and rich harmonies in his works. In 1900 he became first viola with the Imperial Opera Orchestra in St. Petersburg, Russia, and was greatly influenced by his composition teacher Rimsky-Korsakov. He toured as a concert violinist (1903–08), then taught at the Accademia di Santa Cecilia in Rome from 1913 onward. Respighi's most famous works were two symphonic poems that powerfully evoke the Italian scene: *La fontane di Roma* (1917; *The Fountains of Rome*) and *I pini di Roma* (1924; *The Pines of Rome*). One of his innovations was the insertion of a recording of a singing nightingale in the score of the latter piece.

Réunion Réunion is an island in the Indian Ocean, more than 400 miles east of Madagascar. A French colony until 1946, the 969-square-mile island then became an overseas department of FRANCE, but in practice was not integrated with metropolitan France. From 1959 onward the influential local communist party has campaigned for autonomy for the island. Communists dominate the Anti-Colonialist Front for the Self-Determination of Réunion (FRACPAR, or FRA), formed in 1978. A regional council was elected for the first time in February 1983.

Reuther, Walter (1907–1970) American labor union leader. Born in Wheeling, West Virginia, Reuther attended Wayne State University in Detroit. In 1936 he was elected president of the United Automobile Workers (UAW) Local 174 in that city. With his brother Victor, Reuther led the first of the large-scale sit-down strikes, at the Kelsey-Hayes plants in Detroit, and late in 1936 the strike spread to the General Motors plant in Flint, Michigan. In 1937 both GM and Chrysler Motors recognized the UAW as the workers' bargaining agent.

With the end of World War II, Reuther demanded a 30 percent pay raise for GM workers to compensate them for lost overtime and premium pay for war-related work. When the company refused, he led the first major strike of the postwar period, a 113-day walkout of 200,000 GM workers (November 21, 1945–March 13, 1946). This strike helped precipitate strikes in the steel, electrical, meatpacking and other industries, but in the end the workers won an increase of only 18.5 cents an hour. Reuther's aggressive prosecution of the strike won him support among UAW radicals, however, and in 1946 he was elected president of the union. In 1951 he was elected president of the Congress of Industrial Organizations (CIO), and was instrumental in effecting that union's merger with the AMERICAN FEDERATION OF LABOR (AFL) in 1955. In the following years, Reuther was frequently at odds with AFL-CIO chairman George MEANY. In 1968 the UAW withdrew from that organization, claiming that the parent group was moribund and undemocratic. In May 1969 the UAW merged with James HOFFA's International Brotherhood of Teamsters, and the group assumed the name Alliance for Labor Action. On May 9, 1970, Reuther and his wife, May, were killed when their chartered plane crashed in Michigan.

Reverdy, Pierre (1889–1960) One of the leading French lyric poets of the 20th century. His powerful and imagistic verse shows the influence of CUBISM, which first emerged as a theory of painting. In the 1910s Reverdy became a leader of a poetic school of cubism that also included fellow French poets Guillaume APOLLINAIRE, Blaise CEN-

DRARS, Jean COCTEAU and Max Jacob. Reverdy also emphasized the need for a "poesie brut," or brutal poetry, that would reject conventional structures and appearances to bring out the true underlying forms of experience. After a brief involvement with SURREALISM in the 1920s, Reverdy chose to follow a life of religious contemplation, retiring to the Abbey of Solesmes in 1926. *La Lucarne Ovale* (1916) and *Plupart du Temps* (1945) are representative volumes of his verse.

Revueltas, José (1914–1976) Mexican novelist, story writer, essayist, playwright. Revueltas, who is best known for his prose fiction, was one of the most influential Mexican writers to emerge in the middle decades of the 20th century. A lifelong political activist, he was strongly influenced by Marxism but also drew from the insights of Freudian psychoanalysis and surrealist aesthetics. His most highly regarded novel is *The Stone Knife* (1943), which utilizes cinematic narrative techniques in dealing with the lives of six rural workers attempting to flee from a life-threatening flood. Revueltas also published two noteworthy story collections, *God on Earth* (1944) and *Sleep on Earth* (1960).

Rexroth, Kenneth (1905–1982) American poet. Born in South Bend, Indiana, he settled in San Francisco and there, as a cofounder of the San Francisco Poetry Center, with Allen GINSBERG and Lawrence FERLINGHETTI, was associated with the early development of the BEAT GENERATION. An autodidact, he taught himself a number of languages and was devoted to Oriental poetry. His translations include *One Hundred Poems from the Japanese* (1956). His own poetry exhibits an almost Oriental delicacy of image combined with a highly developed Western social conscience. Rexroth's many verse collections include *In What Hour* (1940), *The Phoenix and the Tortoise* (1944), *In Defense of the Earth* (1956) and *New Poems* (1974). He was also the author of a verse play, a number of volumes of essays and *An Autobiographical Novel* (1966).

Reyes, Alfonso (1889–1959) Mexican poet, essayist, educator and diplomat; one of the leading Mexican men

of letters of the 20th century. Reyes was especially well known for his elegant essays that sought to reconcile and blend the cultures of pre-Columbian and modern-day Mexico. A classicist by temperament, Reyes remained somewhat apart from all literary movements but emerged as a major poet with *Pulse* (1921). In the 1920s and 1930s, Reyes served as the Mexican ambassador to Argentina and Brazil. He also held numerous university teaching positions in his native land. Major collections of his essays include *Criticism and the Roman Mind* (1963) and *Mexico in a Nutshell and Other Essays* (1964).

Reymont, Władysław (Stanisław Reymont) (1868–1924) Polish novelist and essayist. Reymont won the NOBEL PRIZE for literature in 1924 and remains one of the leading Polish novelists of the 20th century, although he is little read by modern-day Western readers. Largely self-educated, he held a wide array of odd jobs in his youth and drew heavily from those experiences in his novels, most of which are written in an intensely realistic style. His magnum opus is the four-volume sequence *The Peasants* (1904–1909), which portrays the struggle of a father and a son who strive to work the land while in conflict over their love for the same woman. Other novels by Reymont include *The Comedienne* (1896) and *The Promised Land* (1899).

Reynaud, Paul (1878–1966) French statesman. A lawyer, he was elected to the chamber of deputies in 1919, holding various cabinet posts from 1930 to 1940. He succeeded Edouard DALADIER as premier during WORLD WAR II (1940) and was unsuccessful in attempts to rally France's war efforts. Shortly thereafter he was obliged to surrender leadership to Marshal Henri PÉTAIN, who imprisoned him later that year. Deported to Germany in 1942, he was released in 1945. After the war Reynaud was France's finance minister (1948) and vice premier (1953).

Reynolds v. Sims (1964) U.S. Supreme Court decision that established that federal courts can intercede in the drawing of state legislature electoral district boundaries. Although nonwhites were enfranchised, they were largely ex-

cluded from elective office by clever drawing of election district boundaries to favor white candidates. Election districts typically differed greatly in population. For many years the federal courts would not allow challenges to electoral district boundaries or reapportionments because the issue was thought to be a political question. In the case *BAKER v. CARR*, the Supreme Court first rejected the hands-off stance, and in *Reynolds* the Supreme Court squarely held that state legislative reapportionment could be challenged in the federal courts. Following this decision, several successful challenges were brought, especially in the South.

Reza Shah Pahlavi (Reza Khan) (1878–1944) Shah of IRAN (1925–41); a career army officer and one of the organizers of a 1921 coup d'état, after which he became war minister and later (1923) prime minister. A strong leader who forged a powerful army, Reza Khan was successful in ousting Russian (1921) and British (1924) forces from their occupation of parts of Persia. Assuming broad powers, he deposed the last ruler of the Qajar dynasty in 1925 and proclaimed himself shah. He moved to modernize Persia, restructuring the government and the armed forces; promoting industrialization; establishing new schools, hospitals, networks of roads and the Trans-Iranian Railroad; and reducing the role of the clergy in government and law. Changing his name, he became the founder of the Pahlavi dynasty. And in 1935 he changed the name of his country—from Persia to the Nazi-endorsed Iran. During World War II his pro-German sympathies prompted the British and Soviet governments to reoccupy Iran; in 1941 he abdicated in favor of his son, MUHAMMAD REZA PAHLAVI. Three years later he died in exile in South Africa.

Rhapsody in Blue Landmark American composition for piano and orchestra that advanced the cause of "popular jazz." Bandleader Paul WHITEMAN and composer George GERSHWIN spent barely a month (from January to February, 1924) preparing an *American Rhapsody* for an announced concert of "Experimental Music" at New York's Aeolian Hall on February 12 of that year. The debut performance of the

now-retitled *Rhapsody in Blue* (title suggested by the composer's brother, Ira) featured an orchestration by Ferde GROFE, Gershwin at the piano and Whiteman's modest orchestra. Although the program also featured music by the popular Zé Confrey ("Kitten on the Keys") and Victor HERBERT, the Gershwin contribution stole the show and created a sensation, launching him as a "serious" composer. It was encored at CARNEGIE HALL on April 21, 1924. When the symphonic concert version was prepared in 1926—the one heard today—Grofe again did the orchestration. Although specialists quibble about the music's merits as "concert hall jazz" (just as they also dispute such claims about certain contemporary works by Darius MILHAUD and Aaron COPLAND), there is no questioning the vitality of its eclectic and enduring blend of American vernacular idioms with European classical styles. When the work was performed (by Oscar Levant) in a HOLLYWOOD biopic of Gershwin, *Rhapsody in Blue* (1945), it was inflated into an extravaganza of sound out of all recognition.

Rhee, Syngman (1875–1965) President of South Korea (1948–1960). Rhee was in exile in the U.S. from 1912 to 1945, acting as spokesman for Korean independence from Japan. He returned to Korea in 1945 with U.S. support and was elected South Korea's first president following the division of Korea. He was a strong leader in the KOREAN WAR, but his increasingly dictatorial style provoked unrest and riots, which led to his resignation in 1960. He retired in exile to Hawaii.

Rhineland The part of GERMANY west of the Rhine River, centered around Cologne. In general, the Rhineland is taken to include those parts of the German states of North Rhine–Westphalia, Rhineland-Palatinate, Hesse and Baden-Württemberg in the Rhine valley. After WORLD WAR I, the region was made a demilitarized zone by the Allies, who did not withdraw until 1930. Defying the terms of the Treaty of VERSAILLES of 1919 and the LOCARNO PACT of 1925, the HITLER government remilitarized the region from 1936 and built the SIEGFRIED LINE, an extensive chain of almost impenetrable fortifications.

Rhine River A principal waterway of Europe that rises in the Swiss Alps and flows for over 800 miles before emptying into the North Sea; contiguous to Austria, Switzerland, Germany, France and the Netherlands. Opened to international navigation in 1868, the victory of the Allies over Germany in WORLD WAR I enabled them to reassert the Rhine as the historic boundary between France and Germany—and to reward France with the left-bank provinces of ALSACE and LORRAINE. Before WORLD WAR II the Rhineland was the site of the German SIEGFRIED and French MAGINOT defensive lines, which played an important part in the early stages of the war. In March 1945 U.S. troops succeeded in crossing the Rhine at REMAGEN. The Rhine is famous in legend and rhyme, but it has lost much of its romantic lustre in modern times. It has suffered considerable pollution as factories along the river have dumped their waste products into the water.

Rhodes Greek island that was the medieval stronghold of the Knights of St. John of Jerusalem. Largest of the Aegean Sea's Dodecanese islands, it was taken by Italy from the Ottoman Turks in 1912 and formally ceded to GREECE in 1947.

Rhodesia (Southern Rhodesia) Now known as ZIMBABWE, this landlocked country of south-central Africa—bordered by Zambia on the north, Mozambique on the east, Botswana on the west and South Africa to the south—bore until 1980 the name of 19th-century capitalist adventurer Cecil Rhodes, who in 1890 led European and South African colonists here under the aegis of his British South Africa Company.

Rhys, Jean (Ella Gwendolwn Rees Williams) (1890–1979) British author. Rhys began her career as a chorus girl in London, an experience she would recount in the novel *Voyage in the Dark* (1934). In 1919 she moved to Paris and married her first husband. Her first book was *The Left Bank: Sketches and Studies of Present-Day Bohemian Paris* (1927), to which Ford Maddox FORD wrote the introduction. Her other early works include *Postures* (1928), *After Leaving Mr. Mackenzie*

(1930) and *Good Morning, Midnight* (1939). Rhys returned to England and did not write again until a radio dramatization of *Good Morning, Midnight* brought her back into the public eye. Later works include *Wide Sargasso Sea* (1966), which was set in Dominica where Rhys was born; two short story collections, *Tigers are Better Looking* (1968) and *Sleep it Off, Lady* (1976); and the unfinished autobiography *Smile Please* (1979).

Ribbentrop, Joachim von (1893–1946) German foreign minister (1938–45) under the Nazis. A cavalry officer during WORLD WAR I, he was later a wine merchant. He joined the Nazi Party in 1932, becoming chief foreign policy adviser to Adolf HITLER the following year. Ambassador to Great Britain from 1936 to 1938, he returned to Berlin to assume the post of foreign minister. An enthusiastic supporter of the Nazi regime, he helped to cement the Anglo-German naval agreement (1935), was influential in forming the Anglo-Berlin Axis (1936) and played a leading role in securing the NAZI-SOVIET PACT (1939). Indicted at the NUREMBERG TRIALS, he was found guilty of war crimes and hanged.

Rice, Elmer (Elmer Leopold Reizenstein) (1892–1967) American playwright. Rice was one of the most prolific American playwrights of the 20th century. At the peak of his fame, in the 1920s and 1930s, he was one of the leading voices in the American theater whose plays always reflected a strong concern for freedom and social justice. *The Adding Machine* (1923), which borrowed techniques from the European school of dramatic EXPRESSIONISM, concerns the plight of a futuristic protagonist, Mr. Zero, who is replaced at his job by a computer. *Street Scene* (1929), which won the PULITZER PRIZE for drama, deals with the pressures of life in a New York tenement. Rice helped to found the Dramatists' Guild in 1937 and also served during that period as a regional director for the Federal Theater Project.

Rich, Adrienne (1929–) American poet and feminist theorist. Born in Baltimore, she attended Radcliffe College. At first interested in an elegant precision of verse, as evidenced in her volume *A Change of World* (1951), she

American poet and feminist Adrienne Rich. c. 1977
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

emerged as a poet-activist whose works have mirrored the significant social conflicts of her time and her own growth in relation to them. Her poetry has dealt with movements for black rights, against the war in Vietnam and, most significantly, with the women's movement, for which she is widely considered an articulate spokesperson. Rich mingles the personal and the feminist in poems that define the quality of women's lives in *Diving into the Wreck* (1973), winner of the 1974 National Book Award; *A Wild Patience Has Taken Me This Far* (1981); *The Dream of a Common Language* (1978); *Time's Power* (1989); and other volumes of verse. She is also the author of such essays as *On Lies, Secrets and Silence* (1979) and the powerful and candid study of motherhood, *Of Women Born* (1976). Throughout the 1990s Rich continued to publish collections of her poetry, releasing *An Atlas of the Difficult World* (1991), *Collected Early Poems 1950–1970* (1993) and *Dark Fields of the Republic* (1995). In 1993 she briefly returned to nonfiction with *What Is Found There: Notebooks on Poetry and Politics*. Four years later Rich refused to accept the National Medal for the Arts from President William Jefferson CLINTON, protesting what she denounced as his "cynical politics." Other recent awards include the Academy of American Poets Wallace Stevens Award (1997), the Lannan Foundation Lifetime Achievement Award (1999) and the Bollingen Prize for Poetry (2003).

Rich, Bernard “Buddy” (1917–1987) American jazz musician, often hailed as “the world’s greatest drummer.” He rose from his vaudeville beginnings as Baby Traps to play for the bands of Artie SHAW and Tommy DORSEY before starting his own band after WORLD WAR II. He then toured with trumpeter Harry JAMES. In 1966 he again formed his own band, with which he worked sporadically for the rest of his life. He was known not only for his virtuosic drumming but for his fiery temper and caustic wit.

Richard, Joseph Henri Maurice “Rocket” (1921–2000) Canadian hockey player. Known for his flashing eyes and reckless style, the Rocket was one of the most explosive goal scorers of his—or any—era. A perennial all-star at right wing, he was a Montreal Canadien for 19 seasons, and provided much of the firepower for the Canadiens’ dynasty. In 1944 he scored 50 goals in 50 games, a feat that has been equaled numerically only in a post-expansion, diluted league. The team won five consecutive Stanley Cups (1956–60), and Richard finished his career with 82 playoff goals. He was named to the Hockey Hall of Fame in 1961.

Richard, Marthe (1889–1982) French patriot. During WORLD WAR I she was involved in dangerous espionage work behind German lines. For this she was awarded the Legion of Honor in 1933. During WORLD WAR II she ran an underground network that smuggled downed Allied fliers out of France. A member of the Paris Municipal Council in 1946, she succeeded in passing a law that closed France’s bordellos. The law is still known by her name.

Richards, Sir Gordon (1904–1986) Britain’s dominant jockey for three decades until his retirement in 1954. Richards was champion jockey 26 times and rode more than 4,800 winners, including 14 Classic races. In 1953, he rode his only Epsom Derby winner. He was also knighted that year, the only jockey to receive that honor.

Richards, I(vor) A(rmstrong) (1893–1979) British critic and poet. Richards was educated at Magdalene College, Cambridge, where he later became a fellow, and spent several years

at Harvard teaching and studying linguistics. Richards was enormously influential on a generation of poets and critics, among them William EMPSON, who was his student at Cambridge, and he is credited with creating a receptive attitude toward MODERNISM. His insistence on careful textual study laid the groundwork for the NEW CRITICISM. Richards’s critical works include *Principles of Literary Criticism* (1924), *Science and Poetry* (1926) and the seminal *Practical Criticism: A Study of Literary Judgment* (1929). His poetry was collected in *Internal Colloquies: Poems and Plays* (1972).

Richards, (Isaac) Viv(ian Alexander) (1952–) Antiguan cricketer. One of the greatest batsmen in cricket history, Richards is noted for his aggressive approach and masterly improvisation at the crease. Through 1990, he had represented the West Indies a record 121 times, his first selection coming in 1974. During his tenure with the team the West Indies dominated world cricket in both “tests” and “one-day” varieties. Richards scored 7,990 runs (1974–90) in test matches, including 24 centuries, one of which is the fastest of all time (56 balls v. England on April 15, 1986). He was appointed West Indies captain in 1980. Richards’s success in “one-day” cricket is unparalleled. He scored the most runs (8,540), the highest individual score (189 v. England on May 31, 1984) and the most catches by a fielder (99). Richards plays for his native Antigua in West Indies domestic cricket; he has also played for Somerset and Glamorgan in England.

Richardson, Dorothy Miller (1873–1957) British novelist. While working as a journalist, Richardson became acquainted with H. G. WELLS, who encouraged her to write fiction. *Pointed Roofs* (1919) was the first of a series of autobiographical novels that she called *Pilgrimage*; the last volume was *March Moonlight* (1967), published posthumously. Richardson utilized the technique of STREAM OF CONSCIOUSNESS in her idiosyncratic fiction, which is written from a feminist perspective. Virginia WOOLF was an early champion of Richardson’s work, and August Wilson brought about a revival of interest in it in the late 1960s.

Richardson, Sir Ralph David (1902–1983) Eminent British stage and film actor. His career spanned more than 60 years. He debuted as Lorenzo in *The Merchant of Venice* in 1921, then acted in modern and Shakespearean roles in provincial theaters before moving to London’s West End in 1926. He was highly regarded for his portrayal of Falstaff in parts I and II of Shakespeare’s *Henry IV* at London’s Old Vic Theatre in the 1940s. From 1944 to 1947 he was joint director of the Old Vic, and in 1947 he was knighted for his efforts to revitalize that theater. Later in his career he received acclaim for his appearances with Sir John GIELGUD in the 1970s in David STOREY’s *Home* and Harold PINTER’s *No Man’s Land*; he was active in the theater until the year of his death. He also made memorable screen appearances in *The Fallen Idol* (1948), *The Heiress* (1949), *Breaking the Sound Barrier* (1952) and *Doctor Zhivago* (1964). Richardson was greatly admired for his distinctive theatrical voice and his ability to combine comic eccentricity with pathos.

Richardson, Tony (Cecil Antonio Richardson) (1928–1991) British theatrical and film director. Richardson is one of the few directors to have scored equal successes in his theater and film work. He first came to prominence through his directorial work at the Royal Court Theatre in London in the 1950s, where he staged the premieres of two famous plays by British playwright John OSBORNE, *Look Back in Anger* (1956) and *The Entertainer* (1958), the latter starring Laurence OLIVIER. Richardson also directed an acclaimed production of *The Chairs* (1957) by French playwright Eugene IONESCO. His subsequent theatrical productions—many of which reached Broadway—included *The Seagull* (1964) by Anton CHEKHOV and Shakespeare’s *Hamlet* (1969) with Nicol Williamson in the lead role. Richardson created an enduring critical and popular success with his direction of the film *Tom Jones* (1963), based on the bawdy 18th-century novel by Henry Fielding, which starred Albert FINNEY and earned four ACADEMY AWARDS.

Richberg, Donald Randall (1881–1960) American public official. Richberg was a Chicago attorney who specialized in railroad and labor legislation.

In 1933 he helped draft the NATIONAL INDUSTRIAL RECOVERY ACT, for which he served as adviser and chief administrator. He was the author of numerous books including *Government and Business Tomorrow* (1943) and *Labor Union Monopoly* (1957).

Richier, Germaine (1904–1959) French sculptor. Educated in Montpellier and Paris, she was a student of the sculptor Emile Antoine Bourdelle from 1925 to 1929 and lived in Switzerland from 1939 to 1945. Influenced by her teacher, by the SURREALIST movement as well as by the horrors of WORLD WAR II, she developed a style that employed slender, distorted figures in openwork forms that express the terrors of war and death.

Richler, Mordecai (1931–2001) Canadian novelist, critic and screenwriter. Highly regarded by his peers, Richler remained largely unknown to the general public. He began his career as a journalist, first in Canada, then in Paris and London. His first two novels, *The Acrobats* (1954) and *Son of a Smaller Hero* (1955), expressed the feelings of isolation of Jews in Canada. Perhaps his best-known novel is *The Apprenticeship of Duddy Kravitz* (1959), a coming-of-age novel that is found on the reading lists of many Canadian schools. Richler's acerbic and controversial nonfiction includes *Hunting Tigers under Glass: Essays and Reports* (1969) and *Notes on an Endangered Species and Others* (1974). Other fiction includes *Cocksure* (1968) and *Joshua Then and Now: A Novel* (1980). *Perspectives on Mordecai Richler* appeared in 1986.

Richter, Burton (1931–) American physicist. After earning his Ph.D. from the Massachusetts Institute of Technology in 1956, Richter began his work in the physics of subatomic particles at the Stanford Linear Accelerator Center, where he designed the Stanford Positron Electron Accelerating Ring (SPEAR). In 1974, using SPEAR, Richter and his coworkers observed a new elementary particle, which they called "psi." A group of researchers under Samuel Ting at the Brookhaven Laboratory on Long Island simultaneously discovered the same particle, which they labeled "J." (It is now known as the "J/psi.") Richter and Ting shared the 1976 NOBEL PRIZE for physics.

Richter, Curt Paul (1894–1988) American psychobiologist credited with originating the idea of the "biological clock." The Johns Hopkins University Medical Institution, where he had been a faculty member, said that Richter had introduced the phrase in a 1927 paper on cyclical internal mechanisms. In other work, Richter demonstrated that human biology was strongly influenced by learned behavior.

Richter, Hans (1888–1976) German-American artist. Born in Berlin, he was involved with many of the important avant-garde movements of the early 20th century, including de STIJL, CUBISM, DADA and CONSTRUCTIVISM. In 1918 he and the Swedish painter Viking Eggeling began to create abstract paintings on scrolls, work that eventually led him to the making of abstract films such as *Rhythmus 21* (1921). The rise of Hitler caused him to flee Germany in 1932, when he settled in Switzerland. In 1945 he immigrated to the U.S., where he subsequently taught at City College in New York. Richter is best known for the film *Dreams That Money Can Buy* (1944–47), an experimental work made in collaboration with Marcel DUCHAMP, Max ERNST and Fernand LEGER that explores the fantasy lives of a number of psychiatric patients.

Richter, Karl (1926–1981) German conductor, harpsichordist and organist known for his interpretations of the music of Bach. Founder and director of the Munich Bach Chorus and Orchestra, he played a major role in the Bach and Handel revival in the 1950s and 1960s. Although he was not part of the early music/original instruments movements, he helped pave the way with his performances that followed the score without embellishment. He made over 100 recordings, primarily of masterworks of the Baroque period.

Richter, Sviatoslav (Stanislav Teofilovich Richter) (1914–1997) Soviet pianist, considered by many to be one of the greatest virtuosos of the latter half of the 20th century. Born near Kiev, Richter was raised in Odessa. He studied at the Moscow Conservatory (1937–44) under Heinrich Neuhaus. In 1940, while still a student, he gave the world premiere of Serge PROKOFIEV's Piano Sonata No. 6, to great acclaim. He was quickly recognized as a major virtuoso

pianist and as a leading interpreter of Prokofiev's piano music. His fame spread to the West, although he did not play outside the IRON CURTAIN until 1960, when he performed in Finland and North America. Richter's playing combined virtuosic technique with lyricism, although his performances were sometimes considered wayward. He received many high honors in the USSR and prizes in the West, and made numerous recordings.

Richter scale A gauge of the magnitude of an earthquake and of the energy released by it; developed in the 1930s by American seismologist Charles F. Richter. During a quake, ground motion is recorded by a seismograph; the readings are then calibrated onto the Richter scale. The numbers on the scale increase geometrically rather than arithmetically. For example, an increase from magnitude 4.0 to 5.0 means that the ground motion of the latter reading is 10 times greater. An earthquake of magnitude 2 is considered the smallest normally felt by human beings. Slight damage begins to occur from an earthquake of 3.5 magnitude, and anything over 5 is considered a serious quake. Contrary to popular assumption, the upper limit of the scale is not 10 but is theoretically infinite. However, the highest reading ever recorded is 8.9, in a quake off the coast of Japan in 1933.

Richthofen, Manfred, Baron von (1892–1918) German WORLD WAR I

Baron Manfred von Richthofen, the German World War I flying ace known as the "Red Baron." 1917
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

aviator. A master of the dogfight, he was credited with shooting down an amazing 80 Allied airplanes from 1916 to 1918. Known as the "Red Baron" for the crimson Fokker triplane he flew, the German ace was killed when his plane was shot down by Allied fire on April 21, 1918. Von Richthofen's sister Frieda was married to the English novelist D. H. LAWRENCE.

Rickenbacker, Edward Vernon "Eddie" (1890–1973) American aviator, business executive. At the age of 16, young Rickenbacker was a well-known auto racer, setting several speed records. Volunteering for the American Air Force, he became America's most celebrated aviation ace in WORLD WAR I by destroying 26 German aircraft. He received the Congressional Medal of Honor. Gaining experience as an executive of several commercial airline companies, he became president of Eastern Airlines (1938), which he built into one of the most important airlines in the country. In 1942 he was appointed special representative of the secretary of war to inspect air bases in the Pacific theater of war. His B-17 was shot down while over the Pacific, and Rickenbacker survived on a raft for 22 days; he wrote about this experience in his book *Seven Came Through* (1943).

American flying ace Capt. Edward Rickenbacker, 1919 (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Rickey, Branch (Wesley Branch Rickey) (1881–1965) American baseball executive. Rickey had a relatively undistinguished career as a catcher for the St. Louis Browns and the New York Yankees before becoming a coach for the Browns. He was named president of the St. Louis Cardinals organization in 1917, and in 1920 he began a number of farm teams for the Cardinals, a system that became standard in major-league baseball. As general manager for the Brooklyn Dodgers (1942–50), Rickey became famous for ending segregation in big league baseball by hiring Jackie ROBINSON in 1947. General manager for the Pittsburgh Pirates from 1950 to 1955, he was posthumously (1967) voted into the Baseball Hall of Fame.

Rickey, George (1907–2002) American sculptor. Born in South Bend, Indiana, he moved to Scotland at the age of six. He studied widely, notably at Oxford, the Académie Andre Lhote in Paris and New York University, and met many of the leading figures of the European modernist movements. Returning to the U.S. in 1930, he became a teacher and concentrated on painting, turning mainly to sculpture in 1950. Rickey was a leading figure in the "kinetic art" movement. His mature work, executed in metal, is CONSTRUCTIVIST in emphasis and employs geometrical forms and blades that move gently in response to air currents. He was especially noted for his large architectural works, such as his commission for the Lincoln Center for the Performing Arts in New York City.

Rickover, Hyman George (1900–1986) U.S. admiral; father of the nuclear navy. Born in Makow, Russia (now a part of Poland), Rickover immigrated to the U.S. in 1916 and graduated from the U.S. Naval Academy in 1922. During WORLD WAR II, he served as head of the electrical section of the U.S. Navy's Bureau of Ships. In 1946, he was assigned to the atomic submarine project at Oak Ridge, Tennessee, where he played a crucial role in convincing the navy that nuclear sea power was both feasible and militarily essential. He directed the planning and building of the world's first nuclear-powered ship, the NAUTILUS, which was launched in 1954. Promoted to rear admiral in 1953, vice admiral in 1958 and admiral in 1973, he retired in 1982.

Riddle, Nelson (Nelson Smock Riddle) (1921–1985) American bandleader, composer and arranger. Riddle became well known in the 1950s for his song orchestrations for Frank SINATRA. His distinctive arrangements, which borrowed elements from JAZZ and BIG BAND music, were known for their smooth and dusky sound. Among his original compositions was the theme for the 1960s television series *Route 66* and the 1975 Academy Award-winning score for *The Great Gatsby*. In 1983 he collaborated with Linda RONSTADT on the album *What's New?*, which sold more than 3.5 million copies.

Ride, Sally (1951–) U.S. astronaut; a much-publicized space traveler when, as the first American woman in space, she made her historic U.S. space shuttle flight aboard STS-7 (June 18–24, 1983). After a second flight aboard U.S. space shuttle mission 41-G (October 5–13, 1984), the publicity-shy Ride moved to the administrative end of NASA and was instrumental in issuing the so-called Ride Report in 1987, which recommended future directions and missions for the space program, including renewed development of lunar flights, an eventual lunar base and manned missions to Mars. Ride retired from NASA in August 1987 to become a research fellow at Stanford University. In 1989 Dr. Ride accepted positions on the faculty of the University of California at San Diego, as well as that university's California Space Institute, in an effort to encourage more female scientists and engineers to consider careers in space-related fields.

Ridgway, Matthew Bunker (1895–1993) U.S. Army general. Born in Fort Monroe, Virginia, Ridgway attended West Point, graduating in 1917. In June 1942, Ridgway succeeded General Omar BRADLEY as commander of the 82nd Infantry Division, elements of which engaged in the invasion of Sicily, the attack on Salerno and the invasion of NORMANDY. In August 1944, Ridgway assumed command of the XVIII Airborne Corps, whose troops played an important role in the BATTLE OF THE BULGE. During the KOREAN WAR, Ridgway was appointed commander of the Eighth Army in December 1950, and was credited with revitalizing that force; in the following April he replaced

General Douglas MACARTHUR as commander of the United Nations forces in Korea. In 1953, Ridgway was made chief of staff of the army; he retired in 1955.

Ridley, Sir Harold (1906–2001) British ophthalmic surgeon. During WORLD WAR II (1939–45), Ridley became famous for his ability to treat the eye injuries sustained by British pilots in the Royal Air Force (RAF). During his efforts to treat these injuries and ailments, Ridley began to theorize that injured eye lenses could recover more quickly if surgeons implanted a synthetic lens within the eye tissues to prevent the formation of scar tissue and the creation of cataracts. When the war ended, Ridley began a collaboration with John Pike and John Holt, both optometrists, to develop such an artificial lens. By 1949 they had designed a lens made out of transpex and developed a technique for implanting an intra-ocular lens (IOL), a foreign object that prevents the formation of cataracts on eyes. Though initially viewed with serious skepticism by optometrists in Britain and elsewhere, the procedure and the foreign agent became widely accepted by the 1970s. For his contribution to optometry, Ridley was elected to the Royal Society of England as a fellow in 1986. In 2000 Ridley was knighted by Queen Elizabeth II.

Riefenstahl, Leni (1902–2003) German movie director and actress. Noted primarily as a director of Nazi PROPAGANDA films, Riefenstahl began her career as an actress in such films as *The Holy Mountain* (1927) and *The White Frenzy* (1931). She formed her own production company in 1932 and directed her first film, *The Blue Light*, that same year. From 1933 to 1938 she directed and produced a number of propaganda films for Adolf HITLER, whom she greatly admired. Her masterpiece, *Triumph of the Will* (1934), is arguably the most powerful propaganda film ever made. *Olympia* (1938), a two-part documentary film of the 1936 Berlin OLYMPICS, is another of her films. Blacklisted by the Allies at the end of WORLD WAR II, she did not work again until 1952 when she directed *Tiefland*. Ironically, in the 1970s and 1980s she won new fame for her photographs of primitive peoples.

Riegel, Byron (1906–1975) American biologist and pathologist. Riegel was a pioneer in steroid chemistry. He led the research team that developed the first oral contraceptive. He was considered an authority on vitamin K and drugs related to anticancer and antimalarial agents.

Rietveld, Gerrit Thomas (1888–1964) Dutch furniture designer and architect. Born in Utrecht, he was the son of a cabinetmaker, who began designing furniture as a youth and also studied architecture. As a designer, his piece de resistance was his red-blue wooden armchair of 1918, a work that revolutionized furniture design with its angular forms and openwork patterns and that greatly influenced later BAUHAUS designs. From 1919 to 1931 he was a member of de STIJL and contributed a number of articles to its eponymous magazine. His most notable architectural achievement was the 1924 Schroder House in Utrecht, a three-dimensional expression of de Stijl aesthetics that is closely related to the work of Piet MONDRIAN. Rietveld was a founding member of the International Congress of Modern Architecture in 1928 and thereafter continued to work in architecture and furniture design, producing his celebrated zigzag chair in 1934. During the post-war de Stijl revival of the 1950s, he also executed a number of important architectural projects, notably the Otterlo sculpture pavilion (1954).

Rif War of 1919–26 (Abd el-Krim's Revolt) In 1919 the Spanish possessions in northern Morocco were being attacked in two sectors: in the east by the Rif (Riff), Muslim Berber tribes under chieftain ABD EL-KRIM, and in the west by Moroccans under the brigand Ahmed ibn-Muhammad Raisuli. The Spanish high commissioner of Morocco, Damaso Berenguer, achieved success against Raisuli, but General Fernandez Silvestre met disaster at the hands of Abd el-Krim. Silvestre and some 12,000 Spanish troops (out of a total of 20,000) were slain by the Rif at the Battle of Anual on July 21, 1921. This forced Spain's withdrawal from the eastern sector, where Abd el-Krim set up the "Republic of the Rif," with himself as president, and prepared to drive out the French and control all of Morocco.

With a well-equipped force of 20,000 Rif, he moved south and captured many French blockhouses on the way to Fez in 1925. The French and Spanish, putting aside their rivalry in Morocco, formed an alliance to counter Abd el-Krim. Spain's dictator Miguel PRIMO DE RIVERA personally led a large Spanish-French expeditionary force, which landed at Alhucemas Bay on Morocco's Mediterranean coast in September 1925, and began advancing on Abd el-Krim's headquarters, Targuist. From the south a 160,000-man French army led by Marshal Henri P. PETAIN moved rapidly northward, squeezing the fiercely fighting Rif troops into the area north of Taza (1925). Faced with defeat by superior forces, Abd el-Krim surrendered on May 26, 1926; he was exiled to the island of Reunion. At a Paris conference (June 16–July 10, 1926), France and Spain restored the borders of their Moroccan zones, which had been set by a 1912 treaty.

Riggs, Bobby (1918–1995) American tennis player and self-proclaimed male chauvinist. While Riggs will remain in the tennis record books for such feats as his 1939 sweep of the Wimbledon singles, doubles and mixed doubles championships, he will be remembered for the challenge he posed to women's tennis in the early 1970s. He claimed that women's tennis was a sham, and that no female player could beat him. His claim seemed to hold up as the first to respond to his challenge, Margaret Court (see Margaret Court SMITH), went down 6–2, 6–1 to the 55-year-old Riggs. Riggs's 1973 match at the Houston Astrodome with the best player in women's tennis, Billie Jean KING, became a publicity extravaganza, televised nationwide to an audience of 50 million. In a triumph for "women's lib," King defeated Riggs 6–4, 6–3, 6–3. In 1995 Riggs died of cancer.

Riis, Jacob (1849–1914) Danish-American journalist and social reformer. Born in Ribe, Denmark, he immigrated to the U.S. in 1870. Seven years later he became a police reporter for the *New York Tribune*, working there until 1888, when he joined the staff of the *Evening Sun*, where he was a reporter until 1899. His stories and photographs of the wretched lives faced by

immigrants on New York's Lower East Side were extremely important in raising the consciousness of the U.S. and in provoking legislation to improve conditions. He again wrote of these squalid living conditions in his book *How the Other Half Lives* (1890), which was followed by other volumes including *The Children of the Poor* (1892), *Children of the Tenements* (1903) and *Neighbors: Life Stories of the Other Half* (1914). Riis captured the attention of Theodore ROOSEVELT, with whom he founded a New York settlement house, and whom he profiled in *Theodore Roosevelt the Citizen* (1904). His autobiography, *The Making of an American*, was published in 1901.

Rijksmuseum Dutch national museum, located in Amsterdam. An institution of international repute, it originated as the Great Royal Museum founded by Louis Napoleon Bonaparte in 1808, was renamed and moved to the Trippenhuys in 1815 and opened in its present quarters designed by P. J. H. Cuypers in 1885. The museum is famous for its superb collection of 17th-century Dutch paintings by such masters as Frans Hals, Jan Vermeer and Rembrandt. It also has a fine selection of Dutch primitives and landscapes. The Rijksmuseum boasts an excellent collection of European sculpture and is renowned for its drawings and prints, including one of the world's greatest representations of Rembrandt's graphic work.

Rilke, Rainer Maria (1875–1926) Czech-born poet, novelist, story writer and essayist. Rilke is the most beloved and critically esteemed German-language poet of the 20th century. Two of his poetical works, the *Duino Elegies* (1922) and the *Sonnets to Orpheus* (1922)—both written while Rilke was living in a small stone tower in Muzot, Switzerland—are regarded as masterpieces both in terms of their lyrical beauty and their spiritual insight.

Rilke was born in Prague in 1875. After an unhappy stint in the military school to which he was sent by his parents, Rilke avoided formal education but steeped himself deeply in all areas of the humanities. His first poems and stories appeared in the 1890s. The novella *The Lay of the Love and Death of Cornet Christoph Rilke* (1899) is a major work of this period. In 1901 he mar-

ried Clara Westhoff. Together with their daughter Ruth, they moved to Paris in 1902, where both husband and wife studied with the sculptor Auguste Rodin. The marriage did not last, and Rilke sought out solitude for the remaining decades of his life. His *New Poems* (1907, 1908) influenced an entire generation of German poets. During WORLD WAR I Rilke briefly served as an office bureaucrat for the German army. In 1919 he moved to Switzerland, where he lived for the remainder of his life. His *Letters to a Young Poet* (1934) remains a popular inspirational work.

Rin-Tin-Tin (?–1932) Saved from a World War I trench by American captain Lee Duncan, Rin-Tin-Tin went on to become the preeminent animal star of the silent movie period. Duncan brought the male German shepherd to HOLLYWOOD, and in 1922 the dog appeared in his first feature, *The Man from Hell's River*. Throughout the 1920s, Rin-Tin-Tin was WARNER BROS.' biggest star, and his popularity continued until his death in 1932. Another Rin-Tin-Tin starred in a television series of that title in the 1950s.

Riopelle, Jean-Paul (1923–2002) Canadian painter. Born in Montreal, he was Canada's leading abstract painter. Associated with the modernist *automatiste* group in Montreal, he settled in Paris in 1947. There he created a totally nonrepresentational style, painting monumental canvases of mosaiclike strokes executed in vibrant jewellike color. He is known for his oil paintings and for works in such media as ink, pastel and watercolor.

Ripken, Cal, Jr. (1960–) American professional baseball player (1978–2001), and holder of the longest streak of consecutive games played in Major League Baseball (MLB) at 2,632. Born in Havre de Grace, Maryland, Ripken joined the Baltimore Orioles in 1978, joined the Orioles' roster in the 1981 season and won the American League (AL) Rookie of the Year Award for his performance that year. By 1983, Ripken led the AL in runs scored (121), hits (211), and doubles (47), appeared in the 1983 All-Star Game and won the AL Most Valuable Player (MVP) Award. Between 1983 and 2001, Ripken was

selected for every All-Star Game, winning the MVP award for that exhibition in 1991 and 2001. During his career, Ripken became best known for his consistent appearance in the Orioles lineup. On September 6, 1995, he broke the record of 2,130 consecutive starts set by Lou Gehrig in the 1939 season. On the baseball field, Ripken was also famous for his near flawless performance as a shortstop: such as during his 1990 season, when he made only three errors in 680 attempts. At the end of the 1991 season, Ripken won another MVP award with a record of a .323 batting average, 34 home runs and 114 runs batted in (RBIs). Although Ripken's defensive performance declined in the mid-1990s, causing him to be shifted from shortstop to third base, he continued to appear in the Orioles' lineup and in All-Star games. On September 20, 1998, Ripken ended his streak of consecutive appearances in the Orioles' lineup when he asked to be benched. Ripken retired at the end of the 2001 season. In addition to his consecutive appearance record, Ripken holds the career record for the number of home runs hit by a shortstop (431).

Ripley, Elmer Horton (1891–1982) American basketball star and coach. Ripley was a leading professional player (1908–30) in the early years of the sport. From 1922 to 1953 he coached some of the top college teams, including Yale, Columbia, Notre Dame and Army, bringing Yale the Ivy League championship in the 1932–33 season. He later coached the Harlem Globetrotters (1953–56), the Israeli Olympic team (1956) and the Canadian Olympic team (1960). He was inducted into the Basketball Hall of Fame in 1972.

Rite of Spring, The (Le Sacre du Printemps) One of the most famous and (in its day) notorious of all modern ballets. First produced by the BALLETTS RUSSES it was a collaboration among some of the greatest figures of the contemporary ballet stage, composer Igor STRAVINSKY, impresario Serge DIAGHILEV and choreographer/dancer Vaslav NIJINSKY. The premiere at the Théâtre des Champs-Élysées in Paris on May 29, 1913, created a veritable riot. Such an uproar arose from an outraged audience that Nijinsky fled to the wings and

conductor Pierre MONTEUX could not hear the orchestra. The ballet's "pictures of pagan Russia" began with a series of primitive fertility rites connected with the advent of spring and concluded with a sacrificial ritual in which a chosen virgin literally dances herself to death. It was shocking stuff, all right; but that initial notoriety was amplified by the choreography and music. The movements of the dancers were heavy, lumpy and earth-bound. The Stravinsky music was insistently percussive and dissonant, the rhythms erratic and unpredictable. "The end of the music was greeted by the arrival of gendarmes," Monteux wrote of the premiere. "Stravinsky had disappeared through a window backstage, to wander disconsolately along the streets of Paris." Quickly the music world recovered itself and the ballet was readily accepted in Diaghilev's 1920 version with choreography by Leonide MASSINE. Although there are frequent revivals worldwide, the ballet is best known through the concert suite by Stravinsky. Moviegoers remember it as a sequence in Walt DISNEY's *Fantasia* where the music, rearranged and altered, accompanied the ponderous lumberings of gigantic dinosaurs. It was only an animated cartoon, but Stravinsky purportedly wept. Today *The Rite of Spring* is a staple of the orchestral repertoire, and there are numerous recorded versions, including one conducted by Stravinsky himself.

Ritsos, Yannis (1909–1990) Greek poet. After the defeat of the Greeks by the Turks in the GRECO-TURKISH WAR OF 1921–22, Ritsos's wealthy family suffered financial ruin. His mother and brother died of tuberculosis, and his father and sister became insane. His personal tragedies were intensified by social problems in Greece. Ritsos embraced socialism and looked toward the Soviet Union. In 1936 one of his most famous poems, "Epitaphios," was included in a public book burning by the Metaxas dictatorship. In 1948 he was exiled to a camp in the Greek islands. His books were banned until 1954. After the GREEK COLONELS' coup d'état in 1967 he was again deported; even after his release from the camps, he was kept under house arrest and his works banned until 1972. Ritsos was a prolific writer, and his works have

been translated into dozens of languages. The poems, set to music by Mikis Theodorakis, became an anthem for progressive forces in Greece.

Rivera, Diego (1886–1957) Mexican painter. The foremost modern Mexican muralist was born at Guanajuato and studied with the popular painter José Guadalupe Posada and other Mexican artists. Traveling in Europe from 1907 to 1910 and 1911 to 1921, he was influenced by the work of such Old Masters as Giotto, El Greco and Goya as well as by his friendships with Cézanne and PICASSO. In Europe he also became politicized, deciding that art should be created for the masses and preferably be situated on the walls of public buildings. He returned to Mexico in 1921 to paint the murals about which he had philosophized, exploring the history and social struggles of his native land in bold figurative images. Murals from this period include those in the Ministry of Education in Mexico City and the Agricultural School in Chilpancingo. Visiting Moscow from 1927 to 1928, he was inspired to even greater revolutionary fervor, returning to paint such overtly ideological murals as those at the National Palace (1929–55) and the Palace of Cortes, Cuernavaca (1929–30). His works in the U.S. include frescoes in the San Francisco Stock Exchange (1931), murals of industrial America in the Detroit Institute of Arts and a mural in ROCKEFELLER CENTER, New York City, the latter destroyed by its sponsors because it included a portrait of LENIN. Drawing on archaeological and folk sources, boldly linear and richly colored, Rivera created an indigenous style that has enormously influenced his country's art and gained him an international reputation.

Rivers, Thomas Milton (1888–1962) American virologist. A graduate of Emory College (1909) and Johns Hopkins (1915), Rivers began research in 1918 on a form of pneumonia that accompanied measles. Working with the Rockefeller Institute for Medical Research (1937–55), he performed pioneer viral research on flu, chicken pox and polio and managed the research projects leading to the SALK antipolio vaccines.

RKO Radio Pictures, Inc. One of Hollywood's "Big Five" production/exhibition motion picture studios (along with METRO-GOLDWYN-MAYER, 20TH CENTURY-FOX, PARAMOUNT PICTURES and WARNER BROS.). It was the only major studio born directly out of the TALKING PICTURE revolution. RKO's roots were in the Film Booking Office (FBO) of America, a small production/distribution company whose chief star was Strongheart the Dog. In 1926 Joseph P. KENNEDY acquired FBO and joined forces a year later with David SARNOFF, the president of Radio Corporation of America (RCA). Sarnoff needed a showcase for his new optical sound system, trademarked "Photophone." Theaters controlled by the vaudeville circuit of Keith-Albee-Orpheum were added to the conglomerate in 1928. The giant \$300 million corporation was named the Radio-Keith-Orpheum Corporation and the famous radio tower adopted as its logograph. In 1931 David O. SELZNICK became production chief, but after a series of notable releases, including *What Price Hollywood?* (1932), *A Bill of Divorcement* (1932) and *King Kong* (1933), he was replaced by Merian C. Cooper in 1933. Less stable than its competitors, RKO remained in a perpetual state of chaos the rest of its corporate life. A succession of studio heads came and went, including B. B. Kahane, Samuel Briskin, Pandro S. Berman and tycoon Howard HUGHES. The Hughes years sowed the seeds of the studio's downfall with aborted projects, disastrous releases such as *The Conqueror* (1956) and general corporate disarray. Hughes sold the studio to General Telrad, Inc., in 1955, which in turn released the film library to television. In 1957 Desilu Productions bought the RKO lot for its television production. Despite its checkered history, RKO is remembered for a splendidly diverse output. The ASTAIRE/ROGERS musicals, from *Flying Down to Rio* (1933) to *The Story of Vernon and Irene Castle* (1939), were some of the brightest films of the 1930s. During the WORLD WAR II years a remarkable series of horror films emerged from the Val Lewton unit, including *The Cat People* (1943) and *The Body Snatcher* (1944). The immediate postwar years saw several notable films under the short-lived tutelage of production chief Dore SCHARY—*Crossfire* (1947), *They Live by Night* (1947) and

Out of the Past (1947). A number of important stars and filmmakers built their reputations at the studio—Orson WELLES, George CUKOR, Katharine HEPBURN, composer Max STEINER, Edward Dmytryk, Robert MITCHUM and many others. RKO remains in existence as a corporate entity of General Tire, RKO General Inc. It has abandoned the motion picture field in favor of broadcasting and cable television.

Robbe-Grillet, Alain (1922–) French novelist and literary critic. Robbe-Grillet is best known as the foremost theoretician and practitioner of the NOUVEAU ROMAN. His approach to the novel, as outlined in his critical work *For a New Novel: Essays on Fiction* (1963), is to adjoin standard dramatic plotting and psychological analysis of character in favor of flat, nonjudgmental depictions of the random events of everyday reality. Life, according to Robbe-Grillet, is neither overtly meaningful nor patently absurd but rather simply is. Novels by Robbe-Grillet include *The Erasers* (1953), *Jealousy* (1957), *In the Labyrinth* (1959) and *Recollections of the Gold Triangle* (1978). His novels influenced the directors of the French cinematic nouvelle vague of the 1960s, especially Alain RESNAIS. Robbe-Grillet wrote the screenplay for Resnais's *Last Year in Marienbad* (1961). In 1996 he wrote and directed the film *The Blue Villa*. He was elected to the Académie Française in 2004.

Robbins, Fredrick Chapman (1916–2003) American virologist and pediatrician. Having earned his M.D. at Harvard, Robbins practiced at Children's Hospital, Boston, for two years prior to joining the army. During WORLD WAR II he served in the Mediterranean Theater where he was chief of the viral and rickettsial section of the 15th Medical General Laboratory. Joining J. F. ENDERS and T. H. Weller (1948) in research at Children's Hospital, he helped produce polio cultures that led to new vaccines, diagnostic techniques and identification of other viruses. In 1954 he shared the NOBEL PRIZE in physiology and medicine with Enders and Weller for breeding the poliomyelitis virus in tissue culture.

Robbins, Harold (1916–1997) American novelist. Robbins is known for his

many best-selling novels, which are rife with sex and violence and the conflicts of the wealthy and glamorous. Robbins's first novel, *Never Love a Stranger* (1948), drew on his own experiences as an orphan on the streets of New York and created controversy with its graphic sexuality. Of his many works, perhaps most acclaimed was *A Stone for Danny Fisher* (1951). Other titles include *The Carpetbaggers* (1961), *The Betsy* (1971) and *Piranha* (1986). Several of his books have been adapted into films.

Robbins, Jerome (1918–1998) American dancer, choreographer and director. One of the foremost choreographers for the American musical theater and classical ballet, Robbins began his career as a dancer in Broadway musicals (1938–40). He joined the AMERICAN BALLET THEATRE in 1940 and choreographed his first ballet, *Fancy Free*, for that company (1944). His successful adaptation of this ballet to a musical comedy, *On the Town* (with Betty COMDEN and Adolph Green), led to his choreographing the shows *Billion Dollar Baby* (1946) and *High Button Shoes* (1947). During his long association with the NEW YORK CITY BALLET, he was associate artistic director (1949–59) and joint ballet master-in-chief (1983–89), and choreographed such works as *Afternoon of a Fawn* (1953) and *Dances at a Gathering* (1969) for the company. In 1957 he collaborated with Leonard BERNSTEIN to create the landmark musical *West Side Story*, and won two ACADEMY AWARDS for the film version (1962). He also directed and choreographed many other Broadway musicals, including *The King and I* (1951), *Peter Pan* (1954), *Funny Girl* (1964) and *Fiddler on the Roof* (1964), and toured Europe with his own company, Ballets: USA, in 1958 and 1961. On July 29, 1998, Robbins died following complications arising from a massive stroke.

Robbins, Lionel Charles (1898–1984) One of the most distinguished British economists of the 20th century. Although initially conservative, he later embraced the liberal theories of John Maynard KEYNES. Robbins served with Keynes on the British delegation to the BRETTON WOODS CONFERENCE that set post-World War II monetary policy. He wrote several books; *An Essay on the Nature and Significance of Economic Science* (1935) was considered the most

influential. In the early 1960s he headed a committee on higher education; the **Robbins Report** (1963) had a major effect on expanding the British college and university system. Robbins taught at the London School of Economics (1929–61).

Roberts, Elizabeth Madox (1881–1941) American novelist. Born in Perryville, Kentucky, she attended the University of Chicago. She began her literary career as a poet but is remembered primarily for her movingly accurate portraits of life in rural Kentucky told in a language that recalls poetry in its lyricism and rhythmic beauty. Her novels include *The Time of Man* (1923), *Jingling in the Wing* (1928), *The Great Meadow* (1930) and *Black Is My True-love's Hair* (1938). Roberts also wrote a number of volumes of short stories.

Roberts, Owen J. (1875–1955) Associate justice, U.S. Supreme Court (1930–45). An honors graduate of the University of Pennsylvania and its law school, Roberts became an assistant attorney general after a brief time in private law practice. He returned to private practice, building a successful corporate law practice. He interrupted his private career twice, once as a special attorney general in Philadelphia and later in Washington, D.C., investigating the corruption in the Harding administration. Roberts was appointed to the U.S. Supreme Court in 1930 by President Herbert HOOVER and continued to serve throughout Franklin D. ROOSEVELT's administrations. Although a conservative Republican, Roberts wrote a number of groundbreaking opinions, including the opinion in *Cantwell v. Connecticut* (1940) that set aside on First Amendment grounds a Connecticut conviction for preaching in public. In *Wickard v. Filburn* (1942), he expanded federal regulation of interstate commerce by upholding the regulation of grain grown within one state. He dissented in *KOREMATSU v. UNITED STATES*, which upheld the detention of JAPANESE AMERICANS during World War II. After his resignation from the Court in 1945, Roberts became dean of the University of Pennsylvania law school and remained active in public life until his death.

Roberts, Richard (1911–1980) American nuclear physicist and microbiologist. Roberts was the principal

contributor to the discovery of delayed neutrons, the basis for atomic reactors. His experiments with electronic vacuum tubes aided in the construction of the proximity fuse, a bomb-detonating device that was of important use in WORLD WAR II. As a microbiologist, he discovered the key chemical synthetic processes by which cell duplication occurred.

Robertson, Oscar (1938–) American basketball player. In high school, Robertson led his team to a 45-game winning streak. The first college player ever to be named player of the year for three consecutive years, he was drafted in 1960 by the Cincinnati Royal of the National Basketball Association. Before beginning his pro career, he was cocaptain of the U.S. gold medal Olympic team. He remained in Cincinnati for 10 years, where his playmaking as a guard made him an all-star for virtually the entire decade (1961–69), and led the league in assists seven times. Robertson finished his career in Milwaukee and retired with totals of 26,710 points, 9,887 rebounds and 2,931 assists. Robertson's impressive career statistics with the Royal and the Bucks led to his 1980 induction into the Basketball Hall of Fame. In 1996, the 50th anniversary of the establishment of the NBA, Robertson was designated one of the 50 greatest players in the history of that organization.

Robeson, Paul (1898–1976) American singer, actor and political activist.

American performer and political activist Paul Robeson (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Born in Princeton, New Jersey, the son of a minister who had been a slave, Robeson began his distinguished career as a scholar-athlete at Rutgers University, then attended Columbia University Law School, graduating in 1923. While practicing law he first became involved in the theater and soon left the legal world to devote himself to acting. Becoming associated with the PROVINCETOWN PLAYERS in 1924, he won acclaim for his performances in a number of plays by Eugene O'NEILL, highlighted by his creation of the title role in *Emperor Jones* (1925; film, 1933). Robeson also used his magnificent bass-baritone voice in concert performances, making his debut in 1925. Performing in Jerome KERN'S *SHOW BOAT* (1928; film, 1936), he created a sensation with his rendition of "Ol' Man River." He was also famous for his interpretations of spirituals and for his performances of songs in over 20 languages. As an actor, he was particularly noted for his performance of the title role in *Othello* (London, 1930; Broadway, 1943–45). Throughout his life Robeson championed leftist causes, calling for uncompromising civil rights and lauding the USSR as a friend to black people. These stands brought him into conflict with the prevailing anticommunism of the late 1940s and 1950s. A controversial figure, Robeson was blacklisted, denied a passport (1950) and brought before the HOUSE UN-AMERICAN ACTIVITIES COMMITTEE (1956). When his passport was renewed in 1958, he left the country, lived in the USSR and Europe, and returned to the U.S. in 1963. His final years were spent in seclusion.

Robinson, Bill ("Bojangles") (1878–1949) American dancer. Perhaps the best known tap dancer the U.S. ever produced, he began performing in night clubs and eventually reached the Broadway stage. Moving on to HOLLYWOOD, Robinson made a total of 14 films. Among the most successful were those in which he starred with Shirley TEMPLE, including *The Little Colonel* and *The Littlest Rebel* (both 1935) and *Rebecca of Sunnybrook Farm* (1938). Famed for his grace, showmanship, inventiveness and versatility, as well as for his sheer endurance, Robinson continued dancing well into his mid-60s, becoming the model for several new generations of American tap dancers.

Robinson, Brooks (1937–) American baseball player. One of the premier third basemen ever to play the game, Brooks Robinson was an All-Star in 15 of the 23 seasons he played for the Baltimore Orioles. A 16-time Gold Glove, he still holds virtually every fielding record for third basemen, including putouts, assists and fielding percentage. He finished his career with a .263 batting average, finishing over .300 only once, in 1964. That year he was named the American League's most valuable player, with 28 home runs and 118 runs batted in. Robinson retired in 1975 and went on to become an Orioles' broadcaster. He was inducted into the Baseball Hall of Fame in 1983.

Robinson, Edward G. (1893–1973) American film actor. Born Emanuel Goldenberg in Bucharest, Romania, he emigrated to the U.S. at the age of nine and grew up on New York City's Lower East Side. Attending the American Academy of Dramatic Arts, he began his acting career in 1913. Robinson made his Hollywood mark as the quintessential gangster. His first such role was in a Broadway play, *The Racket* (1927), but he soon made his way to the West Coast. In 1930 he established himself as king of the tough guys with his portrayal of Rico Bandello in *Little Caesar* (1930). Robinson's other movies included *A Slight Case of Murder* (1938), *Double Indemnity* (1944) and *Key Largo* (1948). He also played character roles in such films as the biographical *Dr. Ehrlich's Magic Bullet* (1940) and the psychological drama *The Woman in the Window* (1944). His last part was a supporting role in *Soylent Green* (1973).

Robinson, Edwin Arlington (1869–1935) American poet. Born in Head Tide, Maine, and educated at Harvard, he is a major figure in the poetry of the U.S. He was intimately acquainted with the residents of his hometown of Gardner, Maine, eventually transmuting it into the "Tilbury Town" of his early verse. The inhabitants of this small fictional hamlet were the subject of the brief and telling psychological portraits that are Robinson's best-remembered poems. These include "Miniver Cheevy," "Richard Cory" and "Luke Havergal." Virtually unknown at the beginning of his career, he published his first volume of verse, *The Torrent and the Night Before* (1896), at his own expense. A shy,

reclusive figure, he moved to New York City in 1899 and lived in some financial difficulty until President Theodore ROOSEVELT, an early admirer, secured him a position at the New York customs house (1905–09). With the publication of *The Man Against the Sky* (1916), he achieved significant critical acclaim and thereafter was able to support himself through writing. Deeply serious and often symbolic, his later volumes include such long narrative poems as *Avon's Harvest* (1921), the PULITZER PRIZE-winning *The Man Who Died Twice* (1924) and *Amaranth* (1934) as well as such lengthy Arthurian tales as *Lancelot* (1920) and *Tristram* (1928), also awarded a Pulitzer Prize.

Robinson, Frank (1935–) American baseball player. Frank Robinson began his career in left field with the Cincinnati Reds in 1956. That year he was named to the All-Star team and was rookie of the year. He remained with the Reds for the next 10 seasons, and was named most valuable player a second time before being traded to the Baltimore Orioles. Robinson responded by leading the Orioles to a pennant and a World Series title in 1966, as he took the batting title with a .317 average and 49 home runs. He was traded to the Los Angeles Dodgers in 1970 and to the California Angels the following year, and in 1975 became playing manager of the Cleveland Indians. He retired as a player in 1976 and went on to coach for a number of teams before returning to the Orioles as a coach in 1986. He was named manager of that club in 1988. He was elected to the Hall of Fame in 1982. Robinson left the Orioles in 1991, but returned to baseball in 2002 as manager of the Montreal Expos.

Robinson, Jackie (John Roosevelt Robinson) (1919–1972) American baseball player. In the spring of 1947, baseball changed forever when Branch RICKEY signed Jackie Robinson to a Brooklyn Dodgers contract. The first black to play in the Major Leagues, Robinson's competitive drive and personal pride helped carry him through a rookie year filled with taunts and difficulties. Named rookie of the year, he spent 10 more seasons in the Dodger infield. His hitting and base running helped bring the team six league championships and a World Series championship. Robinson's best year, 1949,

saw him hit .342 and steal 37 bases, making him the league leader in both categories as well as being named most valuable player. After his retirement in 1956, Robinson devoted himself to political and CIVIL RIGHTS work. He was named to the Baseball Hall of Fame in 1962.

Robinson, Joan (Joan Maurice) (1903–1983) British economist. A socialist, Robinson taught at Cambridge University from 1931 to 1971. She collaborated with John Maynard KEYNES, helping him formulate the theory of full employment. She questioned traditional economic assumptions and made significant contributions to theories of international trade and the economics of growth and development.

Robinson, Lennox (Esme Stuart Lennox Robinson) (1886–1958) Irish playwright. Robinson is known for his many varied patriotic dramas and comedies depicting Irish life. These include *The Clancy Name* (1911), *Patriots* (1912) and *Church Street* (1955). A friend of W. B. YEATS, Robinson was manager of the ABBEY THEATRE and in 1923 became its director, which he remained until his death. He was coeditor of *The Oxford Book of Irish Verse* (1958) and wrote *The Irish Theatre* (1939) and *Ireland's Abbey Theatre. A History* (1951).

Robinson, Rubye Doris Smith (1942–1967) American CIVIL RIGHTS activist. As a sophomore at Spelman College in 1960, she joined a sit-in campaign and helped found the Student Nonviolent Coordinating Committee (SNCC). In 1963 she became administrative assistant to SNCC executive secretary James Forman, and until 1967 served as SNCC's main administrative and logistical planner. By 1964 she had begun advocating black African nationalism and a greater say by women within the SNCC. In 1966 she became the SNCC's executive secretary, supporting the BLACK POWER movement launched in 1966 by James MEREDITH and Stokely CARMICHAEL.

Robinson, Sugar Ray (Walker Smith) (1920–1989) Five-time world champion middleweight boxer. Many boxing experts believe that, "pound for pound," he was the best boxer ever. During a career that lasted from 1940

to 1965, he posted a record of 175 wins (with 110 knockouts) and 19 losses (with only one knockout). He was noted for his boxing artistry and his knockout skills. He won the world welterweight championship in 1946 and the middleweight championship in a bout with Jake LaMotta in 1951. Although he lost the middleweight title several times, he regained the crown with fights against Randy Turpin (1951), Carl (Bobo) Olson (1955), Gene Fullmer (1957) and Carmen Basilio (1958). He was elected to the Boxing Hall of Fame in 1967. In his last years he suffered from Alzheimer's disease and diabetes.

Robinson, William (Billy Robinson) (1884–1916) Pioneer aviator and aircraft experimenter. Robinson developed one of the first radial air-cooled airplane engines. Receiving permission to fly mail from Des Moines to Chicago, he began the first authorized air mail flight in 1914. When he overshoot Chicago, possibly on purpose, he landed in Kentland, Indiana, breaking the nonstop flying distance record, with a flight of 390 miles in four hours and 44 minutes. He lost his life in an attempt to break another aviation record. He had previously reached altitudes of over 14,000 feet, but in attempting to surpass the record of 17,000 feet, he lost control and plummeted to his death.

robot Robots are machines that can be COMPUTER-programmed or guided by remote control to perform a variety of tasks. The word *robot* was coined in 1920 by Czech playwright and novelist Karel CAPEK. Prominent in 20th-century science fiction, robots are often portrayed as ominous mechanical beings that have superhuman strength and minds of their own. In reality, robots bear little resemblance to their fictional counterparts, and they do only what they are programmed to do (although the application of artificial intelligence may allow robots to mimic human behavior). Refined in the late 20th century, robots perform work in settings that would be deadly for humans, such as under the sea or in outer space. Robots have also been used to handle radioactive materials, both routinely and at the damaged THREE MILE ISLAND and CHERNOBYL reactors. Japanese AUTOMOBILE manufacturers were

among the first to employ robots to perform high-precision assembly line work. In 2002 Honda Motors unveiled a bipedal walking robot prototype called Asimo. Designed to assist elderly and disabled individuals in daily tasks, and to assume duties too hazardous to humans, the Asimo robot has yet to become available for commercial purchase. Other Japanese firms have produced robots designed to fulfill similar functions, such as Sony's Aibo and R100 Personal Robot in 1999, and Fujitsu's HOAP-1 in 2001.

Robson, Mark (1913–1978) Canadian-born film director. Robson first gained prominence in 1949 with *Champion* and *Home of the Brave*, and went on to direct many other films. Oddly, he specialized in two genres that had little in common: war adventure films aimed at male audiences and “soap opera” potboilers geared to predominantly female audiences. In the former category were *The Bridges at Toko-Ri* (1954) and *Von Ryan's Express* (1965), while films in the latter category included *Peyton Place* (1957) and *Valley of the Dolls* (1967). Such movies were box office hits, although they were generally dismissed by critics.

Rochet, Waldeck (1905–1983) French communist. As leader of the French Communist Party from 1964 to 1972, he steered the party toward a policy of greater independence from the USSR. He brought about an alliance with socialists and other leftists to support François MITTERRAND in the 1965 presidential election. In 1968 he led the French communists to condemn the SOVIET INVASION OF CZECHOSLOVAKIA.

rock (rock and roll) An original American musical form that saw much of its early development in the South before being modified by influences from other parts of the country and abroad (particularly England). Rock and roll had its origins in the late 1940s as a kind of heavily accented music, with debts to JAZZ, BLUES and popular music played primarily by black musicians. Known as “rhythm and blues” (its politest designation) because of its blues roots, it was also labeled “race” music, and many pop music radio stations throughout the country refused to play it. This con-

tempt was to follow rock and roll well into the 1960s as society sought, vainly and often hysterically, to “stop this trash.” Led by the increasingly popular recordings of such performers as Fats DOMINO, Chuck BERRY and “Little Richard” Penniman, rhythm and blues built up an increasingly avid audience among both white and black teenagers.

In 1954, about the time the term *rock and roll* began to appear, a new wave burst upon the public. Elvis PRESLEY made his first recordings in Memphis with Sun Records. A year later, Bill HALEY and the Comets’ “Rock Around the Clock” reached the top of the pop charts, and a new era in popular music had begun. These early years, in which the raucous new music vied for popularity with the traditional productions of Eddie Fisher and Doris Day, saw the spectacular rise of Presley with such hits as “Heartbreak Hotel” (1955), “Hound Dog” and “Don’t Be Cruel” (both 1956), an appearance on *The ED SULLIVAN SHOW* and a three-picture movie deal.

Rock had taken the country by storm, and much of this early activity was generated in the South. As it grew, it drew upon other existing forms, such as COUNTRY AND WESTERN MUSIC, to produce a hybrid form, “rockabilly,” a term derived from “rock” and “hill-billy” to indicate a combination of elements taken from both. Among the best known examples are “That’s All Right” (1954) by Presley and “Blue Suede Shoes” by Carl Perkins, another Sun Records singer. Other performers, such as Jerry Lee LEWIS and Charlie Rich, shared a similar background.

Rock and roll music played over British and western European radio stations became equally popular abroad, aided by the success of the film *Rock Around the Clock*, with Bill Haley and Alan Freed, who is generally credited with first applying the term *rock and roll* to the new music. As the 1950s drew to a close the first wave of rock, which had started in the South, was now firmly entrenched throughout the Western world. In the 1960s American-influenced British groups, particularly the BEATLES and the ROLLING STONES, were to return the favor with the “British invasion” that began in 1964. Thereafter, rock was truly an international affair.

Rockefeller, John Davison, Jr. (1874–1960) U.S. businessman and

philanthropist; the only son of oil magnate John D. Rockefeller, he took over management of his father’s interests in 1911. During their lives, father and son gave over \$3 billion to various scientific, cultural and educational institutions. Among his most notable philanthropies were the restoration of Williamsburg, Virginia, the establishment of Rockefeller University and the Rockefeller Foundation as well as the donation of the site for the United Nations headquarters in New York City. He helped plan ROCKEFELLER CENTER, completed in 1939.

Rockefeller, Nelson Aldrich (1908–1979) American politician, governor of the state of New York (1958–73) and vice president of the U.S. (1974–77). The grandson of John D. Rockefeller I, the Standard Oil magnate, Rockefeller was born into one of America’s wealthiest families. He entered government service in 1940 when he became coordinator of inter-American affairs in the State Department. He was named assistant secretary of state for Latin America in 1944. In the administration of Dwight D. EISENHOWER he was undersecretary of the Department of Health, Education and Welfare from 1953 to 1955, when he became a special assistant to the president for foreign affairs. Rockefeller entered elective politics in 1958, defeating incumbent W. Averell HARRIMAN for the governorship of New York. He served for four successive terms and became a national political

American politician Nelson D. Rockefeller (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

figure. As governor, he initiated massive welfare programs. He also started drug rehabilitation programs, reorganized New York's transportation system and constructed lavish public works projects. His handling of an uprising at Attica state prison (1971), in which 42 prisoners and guards were killed, was heavily criticized.

The leader of the liberal wing of the REPUBLICAN PARTY, Rockefeller sought the Republican nomination for president in 1960, 1964 and 1968, but each time was rejected by the party as too liberal. In 1974 Gerald FORD, who had succeeded Richard M. NIXON as president following the WATERGATE SCANDAL, chose Rockefeller as his vice president. As vice president, he headed a special commission (the Rockefeller Commission) that investigated allegations of illegal activities by the CIA. Because of opposition from the conservative wing of the Republican Party, Rockefeller withdrew from consideration as Ford's running mate in the 1976 presidential campaign. He retired to private life at the end of his vice presidential term. Rockefeller's four brothers were also prominent. **John D. Rockefeller III** (1906–78) was a philanthropist; **Laurence Rockefeller** (1910–2004) was a philanthropist and conservationist; **David Rockefeller** (1915–) was president and chairman of Chase Manhattan Bank; **Winthrop Rockefeller** (1912–73) served two terms as governor of Arkansas.

Rockefeller Center New York City complex of skyscraper office buildings, admired both as a popular tourist attraction and as an early example of a coherently planned, urban high-rise grouping. Beginning during the GREAT DEPRESSION in 1931, Rockefeller interests bought out all the structures on three entire city blocks in the heart of midtown Manhattan where few large buildings existed. A team of architects developed a coordinated design for a group of 13 large buildings, planning a midblock private street (Rockefeller Plaza), a central garden walk leading to an open sunken plaza and individual skyscraper buildings. The architects were Reinhard & Hofmeister; Corbett, Harrison & MacMurray; Hood & Foulhoux; and, after World War II, Carson & Lundin. The buildings are of varying height, with the 850-foot RCA

building at the center. All have similar external materials, detailing and slab-like forms with setbacks typical of the skyscraper design of the ART DECO era. The project included underground pedestrian shopping areas and truck delivery access, but not the originally intended opera house. There were two large movie theaters (only one, RADIO CITY MUSIC HALL, survives), the radio studios of NBC, many shops and restaurants and some 10 million square feet of office space. Many works of art, sculpture, bas-reliefs and murals are incorporated, including work by a number of leading artists of the 1930s.

Although the architecture of the individual buildings may now seem undistinguished, the coordinated planning of the project and the massing of the group have been greatly admired. Since 1960, Rockefeller Center has been extended, with additional buildings adjacent to it on the north and west (across Sixth Avenue); the newer buildings are of indifferent design quality, though well-related to the concept of the original project. This complex remains a major attraction for visitors to New York and is a continuing example of the value of coordinated architectural planning in contrast to the usual chaos of major urban real estate development. Rockefeller Center was sold to Japanese investors in 1989. When the real estate market began to decline in the early 1990s, the center's Japanese investors, principally Mitsubishi, advocated filing for bankruptcy protection. In 1995, Mitsubishi successfully negotiated the center's management by Rockefeller Center Properties, Inc. (RCPI), which functioned independently of the Rockefeller family. It also signaled an increasing Japanese disengagement from investment in the complex. In 1997 Rockefeller Center was purchased by an investment group led by Tishman Speyer Properties.

Rockne, Knute (1888–1931) Football coach. Rockne excelled in football as a student at Notre Dame University, winning a crucial game with Army in 1913 through the then unused forward pass—a turning point in football strategy. After graduation in 1914, he became a chemistry instructor and assistant football coach at Notre Dame, and head coach in 1918. As head coach

for 13 years he led his teams in winning 105 games with only 12 losses and five ties and made Notre Dame a leading football center of the U.S. He revolutionized football theory, stressed offense, developed the precision backfield, called the “Notre Dame shift,” perfected line play and other strategy. Among the famous stars he developed were the “Four Horsemen of Notre Dame,” the most famous of all backfields. He was noted for his ability to exemplify values and ideals and inculcate qualities of leadership among his “boys.” He died tragically in an airplane crash. One of his several books on football was *Coaching, the Way of the Winner*.

Rockwell, Norman Perceval (1894–1978) American painter famous for his magazine and book illustrations. Born in a shabby brownstone in New York, Rockwell dropped out of high school at 16 to study art full-time. He preferred the Art Students League to the more prestigious National Academy, which had discouraged his pretensions to be an illustrator. Renting a studio once owned by painter Frederic Remington, he quickly established a reputation for children's subjects in such popular magazines as *St. Nicholas*, *American Boy* and *Boy's Life*. In later years he worked for *LIFE*, *Look* and *American Artist*. His real ambition, however, was to paint covers for the *Saturday Evening Post*—“the greatest show window in America for an illustrator,” he said in his autobiography, *My Adventures As an Illustrator* (1960). From 1916 to 1963 he enjoyed an uninterrupted relationship with the *Post*, painting 322 covers. Here was the Rockwell vision America remembers, an apple-cheeked, ingenuous view of rural life, with barefoot boys and gap-toothed girls, soda-jerks and Boy Scouts, loving grandmas and quaint village characters. “I paint life as I would like it to be,” he wrote. “Maybe as I grew up and found that the world wasn't the perfectly pleasant place I had thought it to be, I unconsciously decided that, even if it wasn't an ideal world, it should be and so painted only the ideal aspects of it.”

The care and meticulous precision of his work is legendary. Even to those disposed to dismiss his anecdotal, realistic style, his technique and draughtsmanship are impressive. His zeal for

"authenticity" led him to use as models his friends and neighbors in the towns of Arlington, Vermont, and Stockbridge, Massachusetts. Perhaps the archetypal image among his *Post* covers is a self-portrait that appeared October 8, 1938: The artist sits with his back to us and scratches his head, puzzling what to make out of the blank canvas before him.

Rodchenko, Aleksandr Mikhailovich (1891–1956) Russian painter. Associated with MALEVICH, Rodchenko founded the Russian nonobjectivist movement, an abstract style closely related to his mentor's SUPREMATISM. His best-known painting is probably *Black on Black* (1918; Tretyakov Gallery, Moscow), an artistic answer to Malevich's celebrated *White on White* (1918; Museum of Modern Art, New York City). He is also known for the constructions he created in collaboration with the constructivist Vladimir TATLIN.

Rodeo Classic American ballet. First performed by the Ballet Russe de Monte-Carlo at the Metropolitan Opera in New York on October 16, 1942, it brought together the talents of choreographer Agnes DE MILLE, composer Aaron COPLAND and scenic designer Oliver Smith. Subtitled "The Courting at Burnt Ranch," it is set in the American Southwest and tells the story of the tomboyish Cow Girl in love with the Head Wrangler. She discards her rope and boots for a girlish frock, becomes the belle of the local ball and is eventually carried off by the Champion Roper.

Incidents of riding, roping and a square dance (complete with a "caller") alternate with sentimental episodes. Agnes de Mille appeared as the Cow Girl. "The beauty and genuineness of 'Rodeo' reside precisely in the apparent casualness of its American expression," wrote dance critic George Amberg. The same can be said for Copland's score, a catchy, rambunctious evocation of cowboy tunes and dance rhythms. The ballet is best known today for the orchestral suite Copland wrote in 1945.

Rodgers, Richard (1902–1979) Celebrated American composer of Broadway, ballet, the movies and television. Rodgers's shows revolutionized the American musical theater, breaking

away from the line of light American musical comedies to establish a more operatic musical drama. Rodgers enjoyed a comfortable boyhood in New York, where he had ample opportunity for musical studies and theatergoing. While at Columbia University, he met the two songwriters with whom his career would be most closely associated, Lorenz HART and Oscar HAMMERSTEIN II. After a few shows of only middling success (*Poor Little Ritz Girl*, 1920), Rodgers and Hart hit their stride with several *Garrick Gaieties* revues and many subsequent successes, from the late 1920s through the early 1940s. These included *A Connecticut Yankee* (1927), *Evergreen* (1930), *Jumbo* (1935), *On Your Toes* (1936), *Babes in Arms* (1937), *The Boys from Syracuse* (1938) and *Pal Joey* (1942). Among Rodgers and Hart's hit songs were "Dancing on the Ceiling," "Little Girl Blue," "My Funny Valentine," "Johnny One Note" and "Bewitched." The two also wrote the film music for *Love Me Tonight* (1933), which featured "Isn't It Romantic," and *Hallelujah, I'm a Bum* (1933).

Rodgers switched partners in 1943, collaborating with Oscar Hammerstein II on *Oklahoma!* It was the first of their many blockbusters, including *Carousel* (1945), with "You'll Never Walk Alone" and "If I Love You"; *South Pacific* (1949), with "Some Enchanted Evening" and "This Nearly Was Mine"; *The King and I* (1951), with "Getting to Know You," "Hello, Young Lovers" and "We Kiss in a Shadow"; and *The Sound of Music* (1959), with "Climb Every Mountain" and "My Favorite Things." After Hammerstein's death in 1960, Rodgers wrote both words and music to *No Strings* (1962). His other compositions include ballet music (the "Slaughter on 10th Avenue" number for *On Your Toes*) and the scores for television's "Victory at Sea" (1952–53) and "Winston Churchill: The Valiant Years" (1960). His autobiography, *Musical Stages*, was published in 1975.

Rodnina, Irina (1949–) Soviet skater. Rodnina won three Olympic gold medals in the pairs skating competition, partnered by Aleksei Ulanov at Sapporo in 1970, then by Aleksandr Zaitsev at Innsbruck in 1976 and at Lake Placid in 1980. She also won 10 world championships. She and her

partner had a dazzling style full of complicated leaps.

Rodrigo, Joaquin (1901–1999) Spanish composer. Although he was blind from childhood, Rodrigo became a gifted composer noted for the use of traditional Spanish rhythms in his works. He became a professor of music history at Madrid University in 1946. His works include the famous *Concierto de Aranjuez* for guitar and orchestra (1940), the *Concierto Andaluz* for four guitars and orchestra (1967) and the *Concierto como un divertimento* for voice and orchestra (1979–81).

Rodzyanko, Michael Vladimirovich (1859–1924) Russian president of the DUMA. Having supported the autocracy's suppression of the 1905 Revolution, he unsuccessfully opposed the idea that Czar NICHOLAS II should take command of the army. With Alexander Guchkov he led the Octobrists, a party of right-wing liberals who constituted the majority party in the third and fourth Dumas.

Roehm, Ernst (1887–1934) Leader of the Nazi Sturm Abteilung (SA, or storm troopers). Roehm served as a captain in the Germany army in WORLD WAR I. In September 1930, he became chief of staff of the Nazi paramilitary group known as the SA, or "Brownshirts," building the organization into an effective instrument of mass terror. However, tension between Roehm and Hitler rose steadily over the next three years, as Roehm called for the creation of a military state. To appease his more moderate supporters in the army and in the business community, Hitler agreed to destroy the Brownshirts as well as the radical political wing of the Nazi Party. On June 30, 1934, the "Night of the Long Knives," the SS under Heinrich HIMMLER and the special police under Hermann GÖRING murdered an estimated 500 to 1,000 of these elements, as well as others who were deemed enemies of the party. Roehm was shot by SS officers in Stadelheim Prison.

Roerich, Nicholas Konstantin (1874–1947) Russian artist. Traveling through his native country (1901–04) and central Asia (1923–28), he became known for his numerous exotic land-

scapes and figure studies. He was particularly acclaimed for the designs he executed for the MOSCOW ART THEATRE and the DIAGHILEV ballet, notably the stage sets for STRAVINSKY'S 1913 RITE OF SPRING. Also an amateur archaeologist, he traveled to the U.S., where New York City's Roerich Museum was established to house his paintings and collection of artifacts.

Roethke, Theodore (1908–1963) American poet. Roethke was born in Michigan, where his father was a horticulturist. Roethke's poetry is rich in nature imagery, evoking growth and also the inevitability of decomposition and decay. His first volume of poetry was *Open House* (1941). Other works include *The Lost Son* (1948), *I Am! Says the Lamb* (1961) and the posthumous volumes, *The Far Field* (1964) and *Selected Poems* (1969), an exuberantly sensual collection compiled by his wife, Beatrice. Roethke's work has been likened to that of Blake and was an influence on Sylvia PLATH.

Roe v. Wade (1973) U.S. Supreme Court decision legalizing ABORTION in most cases. The case proved extremely controversial because opponents of abortion contended that the Court had, in effect, condoned the murder of the unborn. Although abortion had at one time been a medical decision for doctors, by the 1970s many states had outlawed the practice. The Court held that women have a constitutional right to an abortion; according to the Court's ruling, this right springs from the right to privacy implicit in the Fifth and Fourteenth Amendments. The Court reaffirmed the view that abortion is a medical procedure to be decided upon by a physician and patient. The Court voted 7–2; the majority opinion was written by Justice Harry BLACKMUN. The Court did allow states to regulate abortion during the later stages of pregnancy, however. Abortion continued to be an extremely sensitive political issue through the 1970s and 1980s and into the 1990s, with activists polarized on both sides. (See also WEBSTER V. REPRODUCTIVE SERVICE.)

Rogers, Carl R(ansom) (1902–1987) American psychologist. An extremely influential figure in the field, he developed the client-centered ap-

proach to psychotherapy. Unlike the standard psychoanalytic approach, this allowed the patient a major say in determining the course of treatment. Rogers was also a founder of **humanistic psychology** and was instrumental in the encounter group movement that emerged in the 1960s. His book *On Becoming a Person* (1961) became a Bible for the human potential movement.

Rogers, Ginger (Virginia Katherine McMath) (1911–1995) Actress, comedienne and dancer. Rogers is best remembered for her dancing in 1930s musicals with Fred ASTAIRE. After a brief career as a band singer and some experience on Broadway, Rogers went to HOLLYWOOD. She appeared in such pictures as *Flying Down to Rio* (1933), *Top Hat* (1935) and *Bachelor Mother* (1939). She won an ACADEMY AWARD as best actress in 1940 for *Kitty Foyle*.

Rogers, Roy (Leonard Slye) (1911–1998) American singing cowboy and actor. Known as the "King of the Cowboys," Rogers began his career with the Pioneer Trio in grade-B Western movies. His breakthrough role came in 1938 in *Under Western Skies*, and he went on to star, with his horse Trigger, in more than 100 such films. In 1947 he married singer **Dale Evans**. Rogers and Trigger joined Evans and her horse Buttermilk to appear in such films as *Hollywood Canteen* (1944); *Son of Paleface* (1952) was Roy and Trigger's last movie. Roy and Dale starred in a hit 1950s television series whose theme song was "Happy Trails to You." The couple later became involved in charity and religious work.

Rogers, William Penn Adair (1879–1935) American humorist. Born in Oolagah, then Indian Territory, now Oklahoma, he grew up on his family's prosperous ranch, worked as a cowboy and began his career as a rodeo entertainer. He was a rider and trick roper in Wild West shows around the world before returning to the U.S. in 1880. Settling in New York City, he began to work in VAUDEVILLE, supplementing his skills at the lariat with down-home banter. From this beginning grew the homespun humor that made Rogers one of America's most beloved entertainers. After working at the ZIEGFELD FOLLIES (1915–17), he moved on to

HOLLYWOOD, where he made his first film in 1918. The following year he began a syndicated newspaper column that featured disarmingly simple and insightful analyses of current events. The "cowboy philosopher" continued to dispense his witty brand of rural wisdom in movies, radio shows and books until he and Wiley POST were killed in an airplane crash near Point Barrow, Alaska.

Rohde, Gilbert (1894–1944) Pioneering American industrial designer whose career in the 1930s was an important factor in introducing MODERNISM to the U.S. Rohde became familiar with cabinetmaking in his father's shop. He worked as a furniture illustrator for several New York stores before making a trip in 1927 to Paris, where he became familiar with the moderne styles of the 1920s. In 1929 he opened his own design office, working on interiors and producing modern furniture designs at a time when modernism was largely unknown in America. In 1930 he established a relationship with Herman Miller, Inc., that was central to both his career and that furniture company's growth. His designs were clearly modern, although they incorporated decorative elements that now seem to imply ART DECO directions, with much use of exotic wood veneers, glass, mirrors and chrome details. He developed the concepts of modular and sectional furniture and applied the modular idea to office furniture in his Executive Office Group (EOG). Rohde developed various exhibit designs for the NEW YORK WORLD'S FAIR OF 1939. He was briefly the director of the short-lived Design Laboratory School, a project sponsored by the WPA from 1935 until 1938. He was also head of the industrial design program at the New York University School of Architecture from 1939 until 1943.

Rohlf, Christian (1849–1938) German painter. Living at Weimar until 1900, he painted in an impressionist manner and taught for 30 years at the Weimar Art School. Moving to Hagan, he was an instructor at the Folkwang School, where he was influenced by a 1902 exhibition of Van Gogh's works as well as by his friendship with the German expressionist Emil NOLDE. His style

altered to a gentle version of EXPRESSIONISM, and he gradually abandoned oil painting in favor of tempera, watercolor and woodcuts. He is best known for his late paintings, delicately beautiful floral works that he produced while living in Switzerland from 1927 until his death.

Rohmer, Eric (1920–) French film director and critic. Rohmer is a much admired director of subtle, delicate films on questions of everyday morality and the nuances of sexual attraction. He began his career as a writer for *CAHIERS DU CINEMA*, of which he became the editor after the death of Andre Bazin in 1958. Rohmer was ousted as editor in 1963, as *Cahiers* struggled to balance aesthetics and politics. His feature debut as a director came with *The Sign of the Lion* (1959), an evocation of Paris in August. But his major films—under the group title *Six Moral Tales*—are *La Boulangere de Monceau* (1963), *La Carriere de Suzanne* (1963), *La Collectionneuse* (1966), *My Night At Maud's* (1968), *Claire's Knee* (1970) and *Love in the Afternoon* (1972). In each of these films Rohmer focuses on the telling discrepancies between words and deeds while refraining from making definitive moral judgments on his characters. Rohmer continued to produce films in the 1990s, such as *A Tale of Springtime* (1990) and *Autumn Tale* (1999), and the French Revolutionary drama *The Lady and the Duke* (1999), and into the next decade.

Rohmer, Sax (pen name of **Arthur Henry Sarsfield Ward**) (1883–1959) British author. Although also a playwright and songwriter under his own name, Rohmer is best known as the author of the popular series of adventure books featuring the clever criminal Fu Manchu. These include *The Insidious Dr. Fu Manchu* (1913), *The Mask of Fu Manchu* (1932) and *Emperor Fu Manchu* (1959). In addition to the more than 30 Fu Manchu books, Rohmer also wrote two other detective series featuring Gaston Max and Paul Harley.

Roh Tae Woo (1932–) Elected president of the Republic of KOREA in 1987 and head of the Democratic Justice Party, Roh was educated at the Korean Military Academy and the U.S. Special Warfare School. He fought in the KOREAN WAR and rose in the ranks of the Korean army, becoming com-

manding general of the 9th Special Forces Brigade in 1974, commander of the Capital Security Command in 1979 and commander of the Defense Security Command in 1980. He was made a four-star general in 1981 and retired from the army in July of the same year. In 1981 he entered the cabinet as minister of state for national security and foreign affairs. In 1982 he was appointed minister of sports and minister of home affairs. He has held a number of other positions outside the government, including the presidencies of the Seoul Olympic Organizing Committee, the Korean Amateur Sports Association and the Korean Olympic Committee. Roh departed from the presidency in 1993 and was succeeded by Kim Young Sam, the nation's first civilian president. Two years later Roh was arrested on charges of corruption and treason but was pardoned by Kim in 1997.

Rokossovsky, Konstantin Konstantinovich (1896–1968) Marshal of the Soviet Union. Of Polish origin, Rokossovsky joined the Red Army in 1919 and became a member of the Bolshevik Party. During WORLD WAR II he was an outstanding Soviet commander. He acted with great heroism at the battles of Moscow (1941–42), STALINGRAD (1942–43), Kursk (1943) and in Belorussia and at the battle for Berlin (1944–45). In 1944 he became a marshal and commanded the Soviet forces in Poland. In 1949 he was transferred to the Polish army. He became minister of defense and a member of the Politburo of the Polish Communist Party. In 1956 he was dismissed by Wladyslaw GOMULKA and was appointed a deputy minister of defense of the USSR.

Rolland, Romain (1866–1944) French novelist and playwright. Rolland is best remembered as a practitioner of the *roman fleuve*, exemplified by his major work, the 10-volume *Jean Christophe*, which was published between 1905 and 1912 and which follows the family of a musical genius based loosely on Beethoven. Rolland was also interested in music and the theater; his first literary works were play cycles, such as the interrelated *Saint Louis* (1897), *Aert* (1898) and *Le Triomphe de la Raison* (*The Triumph of Reason*, 1899). Largely because of *Jean Christophe*, Rolland was awarded the NOBEL PRIZE in literature in 1915, in

spite of some controversy due to his pacifistic position regarding WORLD WAR I, which he expressed in the essay collection *Au-dessus de la melée* (*Above the Battle*, 1915). Other works include *Michelangelo* (1915), *I Will Not Rest* (1935) and *The Journey Within* (1942).

Rolling Stones British ROCK and roll band, founded in 1963. The Rolling Stones, who are often billed on their concert tours as “The Greatest Rock and Roll Band in the World,” have many fans and critics who support that claim. Since their first singles hit, “It’s All Over Now” (1964), the Stones have enjoyed phenomenal popularity. The band lineup—which remained remarkably stable through the early 1990s—originally included Mick JAGGER, lead vocalist; Brian Jones, guitar; Keith Richards, guitar and vocals; Ian Stewart, piano; Charlie Watt, drums; and Bill Wyman, bass. In 1969, after the accidental death of Jones, Mick Taylor replaced him on guitar. Taylor was subsequently replaced by Ron Wood in 1974. Jagger and Richards, who have written all of the band’s original material since 1965, have both attained the status of international celebrity. Among the many Rolling Stones classic hits are “(I Can’t Get No) Satisfaction” (1965), “Ruby Tuesday” (1967), “Let’s Spend the Night Together” (1967), “Jumping Jack Flash” (1968), “Honky Tonk Women” (1969), “Brown Sugar” (1971), “It’s Only Rock and Roll” (1974) and “Start Me Up” (1981). During the 1980s a feud developed between Jagger and Richards over the kind of music the Stones should produce. Following the Jagger-Richards reunion, the band began recording the tracks to *Steel Wheels* (1989); the year of *Steel Wheels’* release, the Stones were inducted into the Rock and Roll Hall of Fame. After the subsequent *Steel Wheels* tour, the Stones recorded the live album *Flashback* (1991), composed of live tracks from their *Steel Wheels* concerts. When Bill Wyman left the group following the release of *Flashback* and Jagger and Richards again pursued solo projects in the early 1990s, it appeared the Stones might again disband. However Wyman was replaced by Darryl Jones, who helped the band record the critically-acclaimed *Voodoo Lounge* (1994), which won a 1994 Grammy Award for Best Rock Album. The subsequent *Voodoo Lounge* tour proved more successful than *Steel Wheels*. The band

The Rolling Stones (PHOTOFEST)

has since recorded two additional records—the live album *Stripped* (1995) and the studio-recorded *No Security* (1998).

Rölvaag, Ole Edvart (1876–1931) Norwegian-born educator and author. Rölvaag is best remembered for *Giants in the Earth* (1927), an epic of early life on the South Dakota prairies. He was educated at St. Olaf College in Northfield, Minnesota, where he later returned to serve as professor and head of the department of Norwegian language and literature. He resigned in August 1931 to write full-time but died only a few months later.

Romaine, Paul (Burton Bleamer) (1905–1986) American book dealer. He was a close friend of Ernest HEMINGWAY, whom he met in PARIS in the mid-1920s while both were part of the expatriate American scene there. Targeted for prosecution in 1963 as a seller of the bawdy 18th-century novel *Fanny Hill*, he became the central figure in one of the last major obscenity trials in the U.S. His conviction was later overturned by the Illinois supreme court.

Romains, Jules (pen name of Louis Farigoule) (1885–1972) French novelist, dramatist and poet. Romains worked on an epic scale and spent 15 years (1931–46) writing his master-

piece, *Men of Good Will*. One of the longest and most intricate of modern novels, it contained 3 million words and some 400 characters. It spanned 25 years of French history in minute detail. Romans also founded a philosophy called **unanism**, which defined man in the context of his familiar, religious and social groups. He was elected to the French Academy in 1946.

Romanenko, Yuri (1944–) Soviet cosmonaut; one-half of the Romanenko/Grechko *Soyuz 26* (December 10, 1977) mission to the Soviet space station Salyut. He was also part of the eight-day *SOYUZ 38* (September 18, 1980) mission to that station and a long-duration mission to *Mir* in 1987. During their 1977–78 stay aboard *Salyut 6*, Romanenko and Grechko gained international fame by staying in space for a then record-breaking 96 days. The mission has sometimes been referred to as “the flight of the classics,” since “Grechko” and “Romanenko” are Ukrainian for “Greek” and “Roman.” In 1987, Romanenko set yet another record, 326 days aboard the *Mir* space station; the previous record had been 237 days, set by Leonid Kizim, Vladimir Solovyov and Oleg Atkov aboard *Salyut 7* in 1984. During Romanenko’s marathon he went outside the station for several EVAs with fellow cosmonaut Alexander Laveikin, once to clear the docking area for a 27-ton astrophysical module, and a second time to erect a third solar panel for the space station.

Romania The nation of Romania covers an area of 91,675 square miles in southeastern Europe; its name and its Latin-derived language are a mark of its ancient status as a part of the Roman Empire. In 1877 Romanians declared

ROMANIA

- 1919 Gains Transylvania, Bessarabia and southern Dobrudja in post-World War I peace settlement, doubling size of country.
- 1940–45 During World War II Romania fights first on the German side, then on the side of the Allies.
- 1947 Democratic parties are purged; King Michael forced to abdicate; Communist People's Republic is declared.
- 1958 Withdrawal of Soviet troops negotiated.
- 1967 Nicolae Ceaușescu assumes presidency during which he outlaws birth control to increase population; borrows heavily from West then imposes harsh austerity measures on population to reduce foreign debt.
- 1988 Ceaușescu announces systemization policy under which 7,000 villages will be demolished and inhabitants resettled in agroindustrial centers.
- 1989 Anti-government demonstrations begin in city of Timișoara and spread to Bucharest despite authorities' armed efforts to suppress them; Defense Minister Vasile Milea commits suicide rather than obey Ceaușescu order to open fire on demonstrators; Ceaușescu and his wife, Elena, try to flee but are captured and executed after a military tribunal finds them guilty of genocide, corruption and destruction of the economy.
- 1990 Provisional government president Ion Iliescu brutally suppresses student-led antigovernment rioting when, answering Iliescu's nationally broadcast call, 10,000 miners from Jiu Valley region pour into Bucharest, armed with axe handles and iron bars, occupy the city, beat at random anyone suspected of antigovernment proclivities and wreck the offices of the opposition and only independent, mass-circulation newspaper.
- 1991 Thousands of ethnic Roma (Gypsies) flee to Germany. Voters approve a new democratic constitution in a referendum.
- 1992 The Democratic National Salvation Front (DNSF) candidates win a majority of seats in parliament and Nicolae Vacaroui becomes prime minister; Iliescu is reelected president.
- 1993 Clashes erupt in Transylvania between ethnic Romanians and ethnic Germans and Hungarians.
- 1996 In parliamentary elections, a coalition of opposition parties, including the Democratic Convention of Romania (DCR) and the Social Democratic Union (SDU) defeats the ruling DNSF Party of Social Democracy of Romania (PSDR; formerly the DNSF); the DCR's Victor Ciorbea becomes prime minister and Emil Constantinescu of the DCR is elected president.
- 1997 Romania improves relations with Hungary and settles a border dispute over land with Ukraine.
- 1998 Radu Vasile of the DCR forms a new government coalition; Vasile resigns and Mugur Isărescu, governor of the National Bank, is chosen prime minister.
- 2000 The PSDR's Iliescu is returned to the office of president; a minority government under Adrian Nastase of the PSDR is formed.
- 2001 A law returning property nationalized under the communist regime is passed by parliament.
- 2004 Romania is admitted to NATO. Traian Băsescu, centrist alliance leader, is elected president. His ally Carin Tariceanu becomes prime minister.
- 2005 Romania signs an EU accession treaty; its admission is set for 2008 provided the necessary reforms are implemented.

full independence from the Ottoman Turks, and in 1881 Karl of Hohen-zollern-Sigmaringen was crowned King Carol I. Neutral at the outset of WORLD WAR I, Romania fought with the Allies from 1916 and gained Transylvania (from Hungary), Bessarabia (from Russia) and southern Dobrudja (from Bulgaria) under terms of the postwar peace settlement (1920). The Iron Guard, Romania's homegrown fascist movement, dominated a corrupt political establishment in the 1930s. Neutral once again, at the beginning of WORLD WAR II, Romania was forced to restore almost all of its territorial gains to the Soviet Union, Bulgaria and Hungary. King CAROL II abdicated in 1940, and Romania swiftly became an AXIS ally. In August 1944 King Michael declared war on Germany; a postwar peace treaty in 1947 restored all of Transylvania to Romania. Also in 1947, King Michael (1940–47) was forced to abdicate by a radical left-wing government, and the People's Republic was formed. Internal power struggles led to political purges (1948–50) and the establishment of a communist government that nationalized industry and collectivized agriculture. Romania joined the WARSAW PACT, yet maintained its independence from the Soviet Union. Nicolae CEAUȘESCU, who became president in 1967, amassed a huge foreign debt during the 1970s, which led to privation and protests by 1987, when he tried to reduce the debt. His policy of systemization, which involved the destruction of thousands of rural villages and resettlement of the population in agroindustrial centers, brought massive demonstrations in 1989. Ceașescu attempted to flee but was captured, found guilty of genocide and corruption by a military tribunal and executed on December 25, 1989. A new government has promised reforms and moved toward free elections. In 2001 a law was passed returning property that was nationalized under the Communist regime. Although Romania has not resolved its economic problems inherited from the Ceașescu era, President Ion Iliescu sought close relations with the U.S. and the EUROPEAN UNION (EU). In 2004, Romania became a member of the NORTH ATLANTIC TREATY ORGANIZATION (NATO). That same year President Iliescu's commission on the Holocaust in Romania released a report detailing the involvement of the Ro-

manian wartime regime in atrocities against Jews and Roma. (See also Gheorghe GHEORGHIU-DEJ.) That same year President Iliescu's commission on the Holocaust in Romania released a report detailing the involvement of the Romanian wartime regime in atrocities against Jews and Roma.

Romanov, Panteleymon Sergeevich (1884–1938) Russian author. While his short sketches give a picture of life during the RUSSIAN CIVIL WAR and the period of the NEW ECONOMIC POLICY, many characters of his novels are recognizable descendants of the 19th-century "superfluous man." His most important novel, *The New Table of Commandments* (1928), however, deals with a Soviet marriage. In 1927 Romanov met with official disapproval and was forbidden to publish, although the ban was later lifted.

Romberg, Sigmund (1887–1951) Hungarian-born composer best known for his American operettas. Despite an engineering background in his native Hungary, Romberg found in America more opportunities for composing. From 1914 to 1917 in New York he wrote many knockabout songs for musical revues of the Shubert brothers. However, it was with *Maytime* (1917) and *Blossom Time* (1921) that he discovered his true metier, operetta. Romberg described the form, which had its genesis in the late 19th-century work of Franz Lehár and Gilbert and Sullivan, as "light comedy opera" that "leaned toward the operatic rather than the jazz type." He believed that audiences wanted "a better class of music" than they found in popular musicals. *The Student Prince* (1924), *The Desert Song* (1926) and *New Moon* (1928) had rich musical scores that demanded operatically trained voices. Romberg's rousing choral numbers ("Drinking Song," "The Riff Song" and "Stout-Hearted Men"), lyrical serenades ("Softly, As in a Morning Sunrise") and magnificent duets ("One Alone") brought a classical prestige to the Broadway stage. At least two love songs, "One Flower Grows Alone in Your Garden" (from *The Desert Song*) and "Overhead the Moon Is Beaming" (from *The Student Prince*) achieve a searing intensity quite distinct from anything currently on the American

stage. However, this kind of work was, in the words of a critic, "so many brave St. Georges against the dragonfly, Jazz." Even if operettas would soon be dismissed as old-fashioned, Romberg successfully adapted to a more contemporary kind of musical, *Up in Central Park* (1945), and had his own radio show in the 1940s, "An Evening with Romberg."

Rome, Treaty of Treaty signed on March 25, 1957, by Belgium, France, Italy, Luxembourg, the Netherlands and West Germany that established the EUROPEAN ECONOMIC COMMUNITY (EEC, also known as the Common Market) and the European Atomic Energy Community (EURATOM). The EEC aimed at forming a united European economy by eliminating internal tariffs, setting uniform external tariffs and establishing free movement of people, capital and goods within the member states. EURATOM aimed at integrating the nuclear power efforts of the member countries and creating a commonality of practices and markets in nuclear materials.

Romero, Oscar (1917–1980) Roman Catholic archbishop in EL SALVADOR. Following the seizure of power by a military junta in 1979, the highly respected Romero had often spoken out on behalf of human rights and the poor and against extremists of both the right and the left. Above all, he had advocated an end to political violence in the strife-torn nation. On March 24, 1980, Romero was killed by a single bullet while saying Mass in a small chapel in San Salvador. No gunman was identified, but the widespread assumption was that the archbishop had been killed because of his continuing criticism of El Salvador's government. Rioting followed the assassination, in which more than 30 people were killed and another 400 were injured.

Rommel, Erwin (1891–1944) German field marshal. Rommel joined the army in 1910, was commissioned an officer in 1912 and served with distinction during WORLD WAR I. He attracted Adolf HITLER's attention between the wars and was made a general in 1939. After commanding an armored division in the attack on France (1940), he was assigned to North Africa, becoming (1941) leader of Germany's crack Afrika

German field marshal Erwin Rommel (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Korps. A skilled and intuitive strategist, he scored a string of successes that earned him a promotion to field marshal and the name “the desert fox.” Pushing into Egypt, he was defeated in November, 1942 at the decisive battle of EL ALAMEIN. In 1943 Rommel was appointed a commander in northern France, where he was serving at the time of the Allied invasion at NORMANDY in June 1944. He was severely wounded in a strafing attack the following month. Known to be disillusioned with Hitler’s leadership, Rommel was implicated in the plot to overthrow the führer. He was forced to commit suicide by taking poison on October 14, 1944.

Romulo, Carlos Pena (1899–1985) Filipino diplomat. One of the signatories of the UNITED NATIONS charter, Romulo was the PHILIPPINES’ chief delegate to the UN from 1945 to 1954. As a UN delegate, he was one of the leading champions of the interests of newly independent third world countries. In 1949, he became the first Asian president of the General Assembly. He was a leader at the BANDUNG CONFERENCE of Asian and African nations in 1955. Twice the Philippines’ foreign minister, he served in that capacity from 1950 to 1952 and from 1968 to 1984.

Ronchamp Location of, and therefore the usual informal name for, one of LE

CORBUSIER’s most important works, generally regarded as a key masterpiece of modern architecture—the chapel of Notre-Dame-du-Haut near Belfort in the French Vosges. Built in 1950–55 to replace a structure destroyed during World War II, it marks the architect’s abandonment of the strictly geometric forms of his earlier INTERNATIONAL STYLE work in favor of a strongly sculptural, organic, even expressionistic direction. It is a concrete structure, with curving walls and a curved, overhanging, hollow concrete roof, suggesting the shape of an airplane wing or, some say, the form of a traditional nun’s hat. The internal space is small but dramatically lit by stained glass windows of Le Corbusier’s own design. There is an outdoor chancel for open-air services held for pilgrimage congregations. The site also includes a small hostel to accommodate visitors in simple and austere style.

Ronne, Finn (1899–1980) Norwegian-born polar explorer. Ronne accompanied Admiral Richard Evelyn BYRD on Byrd’s second Antarctic expedition in 1923. Altogether he took part in 14 major U.S. expeditions, including nine trips to ANTARCTICA. During his career he traveled some 3,600 miles by skis and dog sled, more than anyone else in history, to chart the SOUTH POLE.

Ronstadt, Linda Marie (1946–) American singer. Her first hit came in 1967 with the Stone Poneys, singing “Different Drum.” Her stylistic range is remarkable, as she has recorded successful albums in such genres as pop-rock, country and big band. Her first solo hit came in 1970 with “Long Long Time.” Her most successful year on the rock charts was 1974, with top-five singles “You’re No Good” and “When Will I Be Loved.” In the 1980s she turned to the works of George GERSHWIN and Irving BERLIN in BIG BAND arrangements by Nelson RIDDLE on the albums *What’s New* and *Lush Life*. In 1988, she celebrated her Mexican roots with the Spanish-language album *Canciones de Mi Padre*. Throughout the 1990s, Ronstadt continued to release albums, such as *Dedicated To The One I Love* (1996) and *We Ran* (1998).

Röntgen, Wilhelm Conrad (1845–1923) German physicist. After an early education in the Netherlands, then

study at the Federal Institute of Technology, Zurich, Röntgen received his doctorate in 1869. He held various university posts, including professor of physics at Würzburg (1888) and professor of physics at Munich (1900). Röntgen researched many branches of physics, including elasticity, the specific heat of gases, capillarity, piezoelectricity and polarized light. He is chiefly remembered for his discovery of X-RAYS, at Würzburg on November 8, 1895. The discovery immediately created tremendous interest. It did not solve the contemporary wave-particle controversy on the nature of radiation, but it stimulated further investigations that led, among other things, to the discovery of radioactivity. It also provided a valuable tool for research into crystal structures and atomic structure, and X-rays were soon applied to medical diagnosis. Unfortunately, it was very much later before their danger to health became understood; both Röntgen and his technician suffered from X-ray poisoning. Although Röntgen was subjected to some bitter attacks and there were attempts to belittle his achievements, his discovery of X-rays earned him several honors, including the first NOBEL PRIZE for physics (1901).

Rooney, Mickey (Joe Yule) (1922–) American actor. Rooney is best known for his role as Andy Hardy in the film series about the Hardy family (1937–47) and for the film musicals *Babes in Arms* (1939) and *Strike Up the Band* (1940) in which he starred with Judy GARLAND. He scored his first feature film triumph as Puck in the 1935 film of *A Midsummer Night’s Dream*. He made the difficult transition from child to adult roles, earning particular acclaim for his strong character roles in several television specials and for his comic skill in the revue-like musical *Sugar Babies* (all in the 1980s). He won a special ACADEMY AWARD for *Boys’ Town* in 1938. In 1990 Rooney briefly appeared in *The Will Rogers Follies*, a musical based on the life of the famous vaudeville comedian, as Clem Rogers, Will’s father. On April 5, 2004, Rooney received the John Payne Lifetime Achievement Award in recognition of his work with the armed forces in Europe during World War II.

Roosevelt, Eleanor (1884–1962) American humanitarian and first lady.

First Lady and humanitarian Eleanor Roosevelt
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Born in New York, she was a niece of Theodore ROOSEVELT and married her distant cousin Franklin D. ROOSEVELT in 1905. Although naturally shy, she became active in politics in 1921 when her husband was stricken with polio. As the wife of the governor of New York and, later, of the president, she transformed the role of first lady into a position of visibility and power and became one of the most active and admired women in the U.S. Involving herself in a number of causes, she supported CIVIL RIGHTS for minorities, women's rights, housing and employment reform, international understanding and other causes through speeches, a radio program and a daily newspaper column. During WORLD WAR II she was assistant director of the Office of Civilian Defense (1941–42) and traveled throughout the world to further the Allied cause.

After her husband's death in 1945, she continued her work as a delegate to the UNITED NATIONS (1945–52, 1961–62), as a drafter of the UN Declaration of Human Rights and as chair of the UN Commission on Human Rights (1947–51). Among her autobiographical books are *This Is My Story* (1937), *On My Own* (1958) and *The Autobiography of Eleanor Roosevelt* (1961).

Roosevelt, Franklin Delano (1882–1945) 32nd President of the U.S. (1933–45), he served during an era of crisis, dealing with the complex problems of the GREAT DEPRESSION and leading the nation during WORLD WAR II.

Born at Hyde Park, New York, of an old and distinguished American family, he was educated at Harvard and at Columbia Law School. A lifelong Democrat, he entered politics in 1910 as a New York state senator. In 1912 he fought vigorously against Tammany Hall–supported candidates and for the nomination of Woodrow WILSON, and was awarded the post of assistant secretary of the navy, serving from 1913 to 1920. Roosevelt was the vice presidential candidate on the unsuccessful 1920 ticket of James COX. The following year he was stricken with poliomyelitis. His career apparently over, Roosevelt refused to give up, pursuing a course of rigorous physical therapy and eventually walking with the assistance of leg braces. He supported New York governor Alfred E. SMITH for the presidency in 1924 and 1928. When Smith secured the nomination in 1928, he urged Roosevelt to run for the governor's office. Smith lost, but Roosevelt was victorious. During his four years in Albany, he initiated a number of social reforms that were to serve as a prelude to his legislative program in the White House and assembled the BRAIN TRUST advisers who would counsel him during his presidency. Roosevelt was nominated by the Democrats in 1932 and easily defeated President Herbert HOOVER. He was inaugurated in the midst of a national banking crisis, with some 13 million Americans unemployed.

In his address, he told his audience that “the only thing we have to fear is fear itself,” and he immediately began a campaign to deal with the Great Depression during the famous HUNDRED DAYS (March–June 1933), inaugurating programs that entailed the expenditure of vast public funds in the pursuit of economic recovery. Roosevelt's NEW DEAL measures included banking regulation, the abandonment of the gold standard, bank deposit insurance, the passage of the SOCIAL SECURITY ACT and the Wagner Labor Relations Act and the creation of a number of powerful federal agencies whose mandate was to provide relief to suffering Americans and to revivify the American economy, with emphasis on restructuring agricultural, business and labor practices. These agencies included the Federal Emergency Relief Administration, Civil Works Administration, PUBLIC WORKS ADMINISTRATION, WORKS PROGRESS ADMINISTRATION, NATIONAL RECOVERY ADMINISTRATION, AGRICULTURAL

ADJUSTMENT ADMINISTRATION, SECURITIES AND EXCHANGE COMMISSION, Home Owners Loans Corporation, CIVILIAN CONSERVATION CORPS and TENNESSEE VALLEY AUTHORITY. He also initiated the “fireside chats,” radio broadcasts in which he informed the public of his intentions and actions. Roosevelt's massive efforts toward curing the ills of the Depression resulted in his overwhelming victory in the 1936 election.

However, opposition to New Deal measures, particularly in the business community, hardened during his second term. When the Supreme Court invalidated a number of New Deal measures, Roosevelt attempted to restructure the Court (1937) but failed. Nonetheless, New Deal programs did much to ameliorate the desperate economic and social situation, and in 1937 Roosevelt secured the passage of new labor legislation that ensured a 40-hour week and minimum wages for many industries. Concentrating on domestic recovery, Roosevelt established a foreign policy that promoted a “good neighbor policy” toward Latin America. His most notable action was probably the recognition of the USSR in 1933. He attempted to maintain American neutrality, but by 1938 he was speaking out strongly against the aggression of Germany and Japan. When World War II broke out in Europe, Roosevelt speeded up a program for national

Franklin Delano Roosevelt, 32nd president of the United States (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

armament, seeking to make the U.S. an "arsenal of democracy." Winning an unprecedented third term in 1940, he gradually moved the country toward war. In 1941 LENDLEASE was initiated and the ATLANTIC CHARTER was signed. After the Japanese attack on PEARL HARBOR (December 7, 1941), the U.S. was plunged into the war. Along with Prime Minister Winston CHURCHILL, Roosevelt did much to shape Allied military strategy. With little debate over war policy, Roosevelt was elected to a fourth term in 1944, with Harry S TRUMAN as vice president. As the tide of battle turned in favor of the Allies, Roosevelt participated in a number of international conferences with Churchill, STALIN, CHIANG KAI-SHEK and others, meetings that did much to plan the postwar world. After the YALTA CONFERENCE (February 1945), an exhausted Roosevelt traveled to Warm Springs, Georgia, where he died suddenly on April 12.

Roosevelt, Theodore (1858–1919) Twenty-sixth president of the U.S. (1901–09). A dominant figure in American political life from the turn of the century to the beginning of WORLD WAR I, he was born in New York City of a wealthy and distinguished New York family. Frail in health, he pursued phys-

Theodore Roosevelt, 26th president of the United States (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

ical fitness with zeal while cultivating a sharp intellect. He attended Harvard University, graduating in 1880. An independent and progressive Republican, he entered politics as a member of the New York state assembly (1882). The deaths of his mother and his wife in 1884 caused him to retire to a Dakota Territory ranch for two years. Returning to New York City in 1886, he ran unsuccessfully for mayor and became an important figure in the state's Republican Party. At the same time he became known for his writings, including biographies and the historical *Winning of the West* (1889–96). He served as a progressive-minded member of the Civil Service Commission (1889–95) before becoming head of the New York City police board (1895–97) and assistant secretary of the navy (1897–98). At the outbreak of the Spanish-American War (1898), he organized a volunteer cavalry division known as the Rough Riders and won fame for his service in Cuba. Returning to the U.S. as a heroic colonel, he was nominated for governor and won a closely contested race. As governor (1899–1900) he was entirely too progressive to suit Republican boss Thomas Collier Platt, who, in an attempt to rid the state of Roosevelt, engineered a scheme to have him nominated for vice president on the Republican ticket for 1900. Elected, he was spared vice presidential obscurity with the assassination of President MCKINLEY in 1901.

A vivid character, a bluff and powerful speaker, a robust outdoorsman and a spokesman for the ordinary citizen, "T. R." soon became an immensely popular leader. A progressive activist, he took on the abusive power of the large corporations in his "trust-busting" efforts by initiating about 40 lawsuits against the largest of the nation's business monopolies. An ardent conservationist, he also supported land reclamation, irrigation and the expansion of forest reserves. In foreign policy Roosevelt was aggressive and vigorous, particularly in relation to Latin America. He intervened in a Panamanian civil war (1903) and was active in promoting the building of the PANAMA CANAL the following year. His popularity resulted in a landslide victory in the 1904 elections. Highlights of his second term were his mediation of the RUSSO-JAPANESE WAR in 1905, for which he won the 1906 NOBEL PRIZE

for peace, and the passage of the Pure Food and Drug Act of 1906. His hand-picked successor, William Howard TAFT, became president in 1909, and Roosevelt retired. However, disputes with the new president drew him back into politics. He was unsuccessful in seeking the 1912 Republican presidential nomination, and subsequently formed a progressive third party (popularly known as the Bull Moose Party). When Roosevelt split the Republican vote, Woodrow WILSON was elected. Roosevelt resumed his Republicanism and remained an important force in the party and the nation until his death.

Root, Elihu (1845–1937) American statesman. Born in Clinton, New York, Root practiced law in New York City and served as U.S. attorney for the southern district of New York from 1883 to 1885. A Republican, he was secretary of war from 1899 to 1904 under Presidents William MCKINLEY and Theodore ROOSEVELT, modernizing the army and, in 1901, founding the Army War College. As Roosevelt's secretary of state (1905–09), he was instrumental in securing improved relations with Latin America and an agreement (1908) with Japan and in negotiating arbitration treaties with various European countries. Root, who declined to run for office, was appointed senator from New York in 1909 and served until 1915. He participated in the Hague Tribunal and played a vital role in negotiating the North Atlantic Coast Fisheries Arbitration of 1910. In 1912 Root was awarded the NOBEL PRIZE for peace in recognition of his efforts to promote world peace. He strongly supported American participation in the LEAGUE OF NATIONS and was a drafter of the constitution for the World Court.

Roots The most-watched dramatic show in television history. An estimated 100 million viewers (nearly half the population of America) saw the first telecast of the eight episodes in January 1977. Alex HALEY's massive 850-page novel traced his own roots back to 1750 in Gambia, West Africa, with the birth of Kunta Kinte. Subsequent generations of the family were slaves in America from the Revolution through the Civil War. The story ended as Tom, the great-grandson of Kunta,

began a new life in Tennessee. This "miniseries" format "allowed television to achieve the thematic power and narrative sweep ordinarily reserved for film." While there were some isolated incidents of racial unrest following some of the episodes, a survey of the NAACP claimed, in general, that the series stimulated black history awareness and education in schools and colleges. The series garnered an unprecedented 37 Emmy nominations and received 9 Emmys. Alex Haley received a National Book Award and a special PULITZER PRIZE.

Roem, C. Rufus (1894–1988) U.S. economist; his early advocacy of pre-paid health care and group medical practice led to the founding of Blue Cross and Blue Shield. Roem's radical proposals began to be put into practice when he became head of the American Hospital Association in 1937. He was the father of composer Ned Roem.

Rorschach test One of the best known of all psychological tests, devised by German psychologist Hermann Rorschach. Consisting of a series of abstract inkblot shapes, as well as a separate series of chromatic patterns, it is designed to test the perceptual and analytic tendencies of the test subject. It is administered via the free response of the subject as to what he or she "sees" in the shapes and patterns displayed. Rorschach set forth the research findings on which his test is based in *Psychodiagnostics: A Diagnostics Test Based on Perception* (1942). It is frequently used to this day as a measure of the subconscious contents of the psyche.

Rose, Billy (William Samuel Rosenberg) (1899–1966) American producer and lyricist. A showman who produced revues, musicals, Aquacades and expositions, Rose began his career as a lyricist, writing songs for such revues as the *Charlot Revue* of 1926. In 1929 he collaborated with Edward Eliscu and Vincent Youmans on the score for the show *Great Day*, writing lyrics for such songs as "More Than You Know" and "Without a Song." After producing a series of revues on Broadway, he produced the hit shows *Jumbo* (1935) and *Carmen Jones* (1943). The comedienne Fanny BRICE was his first wife.

Rose, Pete (1942–) American baseball player and manager. Pete Rose's legacy may be that of the greatest player never named to the Baseball Hall of Fame. Rookie of the year in 1963, Rose led the Cincinnati Reds' "Big Red Machine" to four National League championships and two World Series victories from 1970 to 1976. His aggressive level of play gave him the nickname "Charlie Hustle," and he was as hated in opposing ballparks as he was beloved in his own. He hit close to or over 200 hits a season 12 times and reached the .300 mark in nine consecutive seasons. An outstanding outfielder, his fielding accuracy reached record heights in 1974, with a .992 percentage. During his last season with the Reds, 1978, he had hits in 44 consecutive games, a league record. The following year he joined the Philadelphia Phillies, and the team went on to win the World Series in 1983. After a brief stint in Montreal, he re-joined the Reds as player-manager in 1984. Upon retiring as a player in 1986, Rose stood at the top of the major league all-time hit list, ahead of long-time leader Ty COBB. However, years of rumor about his gambling problems caught up with Rose, and in 1989 baseball commissioner A. Bart GIAMATTI banned Rose from baseball for life for having bet on games, stating that Rose's actions were detrimental to the game of baseball. Rose was subsequently convicted of tax evasion and served a prison term. Although he was declared ineligible for the Baseball Hall of Fame in 1991, Rose's bat remained on display at Cooperstown. Rose formally admitted in January 2004 that he gambled on baseball in an interview with ABC News journalist Charles Gibson.

Rosenberg, Harold (1906–1978) American art critic. Born in New York City, during the 1940s and '50s he was one of the chief admirers and theorists of ABSTRACT EXPRESSIONISM and the coiner of the phrase "action painting." The art critic for *New York* magazine and a contributor to many other periodicals, he was known for his intellectually rigorous analyses of contemporary art. Among his books are *The Tradition of the New* (1959), *The Anxious Object* (1966) and *Art on the Edge* (1975).

Rosenberg, Isaac (1890–1918) English poet and painter. Born in Bristol,

he grew up in London and studied art at the city's Slade School from 1911 to 1914. Establishing some reputation as an artist, he exhibited at the White-chapel Gallery. Enlisting in the British army in 1915, he fought in WORLD WAR I. His finest poems are considered to be his elegiac verses that describe his wartime experiences. A promising career was cut short when he was killed in battle in France. His *Collected Poems* were published posthumously in 1922.

Rosenberg Trial (1951) Sensational U.S. treason trial in which Julius and Ethel Rosenberg were sentenced to death for passing atomic secrets to the Russians. In 1949 the Soviet Union detonated its first atomic bomb, only four years after the first U.S. bomb. U.S. intelligence implicated Julius and Ethel Rosenberg, along with Morton Sobel, as having passed atomic secrets to the Russians.

Although the U.S. and the Soviet Union were still officially postwar allies, the trio were tried for treason in 1951 at the time of the KOREAN WAR and at the height of the anti-left McCARTHY hysteria. The ensuing treason trial generated daily headlines and resulted in the Rosenbergs being sentenced to death and Sobel to 30 years in prison. The verdict was controversial; many liberals believed the pair innocent or deserving of a much lighter penalty. However, the third volume of Nikita KHRUSHCHEV's memoirs, published posthumously in 1990, confirmed that Julius Rosenberg had indeed been a Soviet spy and had passed U.S. atomic secrets to the grateful Soviets with the full knowledge of his wife.

Ross, Diana (1944–) American singer and actress. Ross began her singing career as the lead performer with a group called "The Supremes." The original Supremes were Jean Terrell, Diana Ross and Florence Ballard. By 1964 the group had received seven gold records in less than two years. It was the first group to have five consecutive records reach the top of the best seller charts. As her fame grew the group's name changed to "Diana Ross and the Supremes." She eventually decided to do solo work and continued her successful career. Ross starred in such motion pictures as *Lady Sings the*

Blues (1972), *Mahogany* (1974) and *The Wiz* (1984). She has been the recipient of a certificate from Vice President Hubert HUMPHREY for her efforts on behalf of President JOHNSON's Youth Opportunity Program, and citations from Mrs. Martin Luther King, Jr., and Reverend Ralph ABERNATHY for contributions to the SOUTHERN CHRISTIAN LEADERSHIP CONFERENCE. Ross won a Grammy award as top female singer in 1972 and was named female entertainer of the year and given the Image award for best actress by the NAACP.

Ross, Harold See *NEW YORKER*, *THE*.

Ross, Sinclair (1908–1996) Canadian novelist. Born near Prince Albert, Saskatchewan, he was a banker until his retirement in 1968. His reputation rests on his first novel, *As for Me and My House* (1941), a bleak picture of the loneliness of life on the Canadian prairie written in diary form that has become a classic of modern Canadian literature. He wrote three other novels, *The Well*, *Whir of Gold* and *Sawbones Memorial*, as well as the short story collections. *The Lamp at Noon and Other Stories* (1968) and *The Race and Other Stories*.

Rossellini, Roberto (1906–1977) Italian movie director. Rossellini was the first director to draw international attention to the neorealist style of filmmaking. He received international acclaim for his film *Roma, Città Aperta* (1945). Other important neorealist films were *Paisa* (1947) and *Germania, Anno Zero* (1947). His reputation was enhanced by such films as *Viaggio in Italia* (1952) in which he directed his wife, Ingrid BERGMAN. He has also directed for the theater and television.

Rossi, Aldo (1931–1997) Italian postmodern architect and architectural theorist and winner of the Pritzker Architecture Prize (1990). Born in Milan, Italy, Rossi began to study architecture in 1947 when he enrolled at the Milan Polytechnic, a prestigious Italian school devoted to the sciences. After graduating in 1959, he was hired by *Casabella-Continuità*, a Milanese architectural and art magazine. By 1961 he had become editor of *Casabella-Continuità* and began teaching a few classes at his alma mater. In 1966 he pub-

lished *L'Architettura della città* (The Architecture of the City), which examined the construction of the city as an organic unit and advocated the use of postmodern designs and concepts. This work established him as a prominent architectural theorist as well as one of the few individuals who articulated a cohesive conception of urban planning.

Rossi is well known for designing and overseeing the construction of a variety of works across the globe. In 1971, he entered his design for the cemetery of San Cataldo in an architectural contest. His sketch won first place and marked Rossi as a pioneering architect for his conceptualization of a cemetery resembling a city for the dead. Shortly after that he began work on Gallarate, a housing development situated at the edge of Milan. In 1979, he designed the Teatro del Mondo, a floating theater to be used during the Venice Biennale, a year-long prestigious international arts exhibition. For the city of Genoa he designed the Carlo Felice Theatre, which now is home to the National Opera of Italy. Rossi was also commissioned to design structures outside of Italy. In 1987 he completed work on the Toronto Lighthouse Theatre. In the U.S., he is well known for his creation of the Pocono Pines Houses in Pennsylvania, a monumental arch in Galveston, Texas, and the building housing the School of Architecture at the University of Miami. In Japan, he designed the Il Palazzo Hotel and Restaurant Complex in Fukuoka as well as an art gallery in Tokyo. In 1989 Rossi's proposed structure for the German Historical Museum in West Berlin was selected over 200 other entries. In 1990, he was awarded the Pritzker Architecture Prize, the most prestigious award for an architect, for his contributions to the theory and art of architecture. In 1997, shortly after receiving news that his proposed design for a skyscraper in Soho had been chosen, Rossi died in a car crash in New York.

Rostropovich, Mstislav (1927–) Russian cellist and conductor. Born in Baku, Azerbaijan, of a musical family, he and his family moved to Moscow in 1931, and he attended the Gnessin Institute and the Moscow Conservatory. There he studied composition under Dimitri SHOSTAKOVICH, who became a

close friend and a great influence on his career. He made his professional debut at the age of 13. Winning the World Festival cello competition in Budapest (1949) and the International Competition in Prague (1950), Rostropovich quickly became one of the USSR's most acclaimed soloists. His first appearance outside the USSR was in Florence in 1951, and he soon began an active touring schedule that made him a worldwide reputation for his superb musicianship. He made his first appearance as a conductor in 1961, and he has maintained an active career in conducting. Rostropovich has excelled as a soloist in the entire range of classical cello works, and as a conductor he has stressed such Russian composers as PROKOFIEV and Shostakovich in his repertoire. Essentially apolitical, he incurred the displeasure of Soviet authorities when he sheltered Aleksandr SOLZHENITSYN in his country home in 1970. Under increased musical strictures, he and his wife, the noted soprano Galina VISHNEVSKAYA, and children fled the USSR in 1974. In 1976 he was appointed music director of the National Symphony Orchestra, Washington, D.C., and in 1978 he and his wife were stripped of their Soviet citizenship. They remained as exiles, but with the thawing of the COLD WAR were able to return to the USSR on a musical tour in 1990. Since his participation in a 1991 concert to commemorate the 85th anniversary of Carnegie Hall, Rostropovich has recorded seven albums—*Concerto No. 2 for Cello and Orchestra* (1992), *Trio Sonatas* (1995), *Violin Concertos* (1995), *Lease Breakers* (1996), *Shostakovich: Violin Concerto, Op. 99; Cello Concerto, Op. 107* (1998), *Great Film Music* (1999), and *My First 79 Years* (1999).

Rozsak, Theodore (1907–1981) Polish-born sculptor best known for his work in welded steel, which often evoked an emotional response through its powerful, sometimes violent images. Rozsak was the center of a controversy in 1960 when the eagle he designed for the U.S. embassy in London was pronounced “gaudy” and too big for its sober, subdued surroundings.

Rota, Nino (1911–1979) Italian composer best known for his many motion picture scores. A child prodigy in his

home town of Milan, Rota composed an oratorio at the age of 11. Later he studied at the Santa Cecilia Academy in Rome and the Curtis Institute in Philadelphia. Although he wrote many orchestral and stage works in his lifetime, including four symphonies and eight operas, his movie scores secured his reputation. He was associated with some of the world's greatest filmmakers, including Luchino VISCONTI (*Il Gattopardo/The Leopard*, 1963), Franco ZEFFIRELLI (*Romeo and Juliet*, 1968) and Francis Ford COPPOLA (the first two *Godfather* films, 1972 and 1974). His long and brilliant association with Federico FELLINI, beginning with *Lo Sceicco bianco* (*The White Sheik*, 1952) and concluding with *Prova d'Orchestra* (*Orchestra Rehearsal*, 1979), produced his most memorable scores. His buoyant, tuneful melodies provide a counterpart to the many parades, circus acts and strutting characters of the Fellini world. Like the painted face of actress Giulietta Masina in pictures like *La Strada* (*The Road*, 1954) and *Le Notti di Cabiria* (*Nights of Cabiria*, 1956), Rota's music holds up the promise of a bright, brittle gaiety; but ultimately, in the words of a Fellini character, it delivers a "very sad song."

Rotblat, Joseph (1908–) Polish-born British physicist, founder of the PUGWASH CONFERENCES and winner of the Nobel Peace Prize (1995). Born in Warsaw, Rotblat began to devote his life to the study of physics in graduate school. In 1932, he received his M.A. in physics from the Free University of Poland, followed five years later by his Ph. D. in physics from the Free University. After receiving his doctorate, Rotblat traveled to Britain, where he became the assistant director of the Atom Physics Institute. Two years later, Rotblat began working with the British scientist James CHADWICK to determine the feasibility of constructing an atomic bomb. Rotblat and Chadwick traveled in 1943 to Los Alamos, New Mexico, to work on the top-secret Manhattan Project to produce and test an atomic bomb. In November 1944, when British and American intelligence estimates concluded that Nazi Germany lacked the capability to construct an atomic device, Rotblat left Los Alamos, the only scientist to do so prior to the bomb's use on Hiroshima and Nagasaki.

At the end of World War II, Rotblat was hired as the director of research in nuclear physics at the University of Liverpool, a post he held for the next four years. He also began a crusade against the military uses of atomic power. In 1946 he helped create the Atomic Scientists Association, which sought to dissuade atomic physicists from collaborating in military-oriented research. The following year, he developed the "Atom Train," a traveling exhibition that displayed the possible civilian uses and benefits of atomic energy and criticized its application to military needs. In 1955 he was one of 11 scientists to sign a manifesto drafted by Bertrand RUSSELL and Albert EINSTEIN that asked scientists throughout the world to propose methods of avoiding a nuclear holocaust. To this end, he and American philanthropist Cyrus Eaton founded the first Pugwash Conference in 1957. Named after the small Canadian town in which the first conference was held, it represented an assemblage of prominent scientists and influential individuals opposed to nuclear weaponry and devoted to proposing methods for improving the chances of world peace. Rotblat became the conference's general secretary, a position he has held ever since. In 1958 he helped found the Campaign for Nuclear Disarmament in Great Britain, an independent organization designed to educate the British people about the dangers that the stockpiling of nuclear weapons posed to world peace. For his efforts to promote global disarmament and international stability Rotblat shared the 1995 Nobel Peace Prize with the organization he helped found.

Roth, Philip (1933–) American novelist. Roth was raised in an Orthodox Jewish household, and his religious background is reflected in his fiction, which wryly presents the angst of contemporary American life, often controversially. Roth first achieved success with *Good-bye, Columbus* (1959). *Portnoy's Complaint* (1969), perhaps his most notorious book, revealed a man's discussions with his psychiatrist. Roth has also written a series of novels following the life of imaginary novelist Nathan Zuckerman, including *My Life as a Man* (1974), *The Anatomy Lesson* (1983) and *Deception* (1990). Although Roth married his longtime

companion, Claire Bloom, in 1994, the couple separated two years later and were ultimately divorced. Roth received numerous prestigious awards during the 1990s, including the 1993 PEN/Faulkner Award for Fiction for *Operation Shylock* (1993); the 1997 Pulitzer Prize for *American Pastoral* (1997); the 1998 National Medal of Arts; and the 2002 American Academy of Arts and Letters' Gold Medal in Fiction. In 2004 Roth published *The Plot Against America*—an alternate history in which Charles H. Lindbergh wins the presidency at the outset of World War II and leads the U.S. into a Nazi alliance. This book was widely reviewed and received critical acclaim.

Rothermere, Esmond Cecil Harmsworth, Viscount (1898–1978) British newspaper publisher. Harmsworth was born into one of Britain's wealthiest and most powerful publishing families. He was the son of Harold Harmsworth (1st Viscount Rothermere, 1868–1940) and the nephew of Alfred Charles William Harmsworth (Lord NORTHCLIFFE). At age 21 Cecil Harmsworth became the youngest person ever elected to the House of Commons. He served in Parliament for 10 years, then entered the publishing business. He later inherited the family business and was publisher of the *Daily Mail* and the *Evening News*. He retired in 1971.

Rothko, Mark (1903–1970) American painter. Born in Dvinska, Russia, he emigrated to the U.S. in 1913. He attended Yale University (1921–23) and the Art Students League (1925), where he studied with Max Weber. Subsequently he was heavily influenced by SURREALISM. In the early 1940s he created pale canvases filled with biomorphic forms. By the late 1940s his work had become completely abstract. Perhaps the most lyrical practitioner of ABSTRACT EXPRESSIONISM, he is best known for his large and luminous compositions in which irregular rectangles of color appear to float against a glowing ground. Rothko had a rather mystical approach to his work, viewing his paintings as tools for meditation and expressions of emotion, not as mere formal exercises. He committed suicide on February 25, 1970.

Rothschild, Nathaniel Mayer Victor, third baron (1910–1990) A member of the English branch of the famous European banking family, he was a zoologist and business executive. He headed the UNITED KINGDOM's Central Policy Review Staff, known as the Whitehall "think tank," in the early 1970s and later went on to serve as an executive with Royal Dutch Shell. After his former friend Anthony BLUNT was exposed in 1979 as having been the "fourth man" in the BURGESS-MACLEAN-PHILBY Soviet spy ring, Rothschild was also accused of having been a member of the group. He denied the charge, and Prime Minister Margaret THATCHER declared that there was no evidence to support the accusation.

Roth v. United States (1957) U.S. Supreme Court decision defining First Amendment protection for obscene material. Roth, convicted of selling and mailing obscene literature in violation of a federal statute, protested that the enforcement of the law violated his First Amendment free speech rights. The Supreme Court held that obscene materials are not protected by the First Amendment.

A divided Court also announced a test to determine if a work was obscene: Would an average person consider that its dominant theme appealed to the prurient interest? Fifteen years later the Court relaxed this test to the following: Would the average person, applying contemporary local standards, find that it appeals to the prurient interest; and, if it depicts in a patently offensive way sexual activity specifically defined by state law, that it lacks any serious redeeming value? Despite this definition, the line between freedom of speech and obscenity remained a point of contention, as demonstrated in the 1989 MAPPLETHORPE controversy and similar cases. (See also PORNOGRAPHY AND OBSCENITY.)

Roussel, Albert (1869–1937) French composer. Born in the north of France, he served in the navy before studying (1898–1907) with Vincent d'INDY at the Schola Cantorum, where he became a professor (1902–14). His first compositions, such as the symphonic *Le Poeme de la foret* (1904–06) and the opera-ballet *Padmavati* (1918), were executed in an impressionistic style. Influenced by

his study of 18th-century music and by STRAVINSKY, his later works stress a neo-classical approach and are also often touched with Oriental motifs, styles and rhythms. His mature works, notably the last three of his four symphonies and the ballet *Bacchus et Ariane* (1931), exhibit a delicate melodic sense mingled with elegant dissonances. His many other compositions include orchestral pieces, chamber music, choral works and songs.

Rowan, Carl T. (1925–2000) American journalist and governmental official. Rowan was born in Tennessee and in 1944 was among the first blacks to receive a navy commission. Following World War II, he attended Oberlin College and the University of Minnesota and in 1950 became a reporter of the *Minneapolis Tribune*. Rowan's books, based on his travels and on reporting assignments, include *South of Freedom* (1952), *The Pitiful and the Proud* (1956) and *Go South to Sorrow* (1957). In 1961, President KENNEDY named Rowan deputy assistant secretary of state for public affairs, and in 1963, ambassador to Finland. In 1964, President JOHNSON appointed him chief of the United States Information Agency (USIA), but Rowan resigned the following year after charges that USIA's VOICE OF AMERICA was biased in favor of the administration. Rowan returned to journalism, producing popular syndicated columns, providing television commentary, contributing to *READER'S DIGEST* and lecturing.

Rowe, James H. (1909–1984) Influential aide to President Franklin D. ROOSEVELT during the 1930s' NEW DEAL era. Rowe was one of the idealistic Harvard-educated lawyers who formed Roosevelt's BRAIN TRUST. He served on scores of federal boards and commissions. He later advised Adlai STEVENSON and Hubert HUMPHREY in their unsuccessful presidential bids and was credited with helping to place Lyndon B. JOHNSON on the ticket as John F. KENNEDY's vice presidential running mate in 1960.

Rowling, J. K. (1965–) British author, best known for creating, writing and developing the HARRY POTTER book series. Born in Chipping Sodbury, England, Rowling wanted to become a famous writer since she was six

years of age. She cultivated her skills during her primary and secondary education, and, after graduating from the University of Exeter in 1991, Rowling took a job as an English teacher in Portugal. It was during her stay in Portugal that she conceived the basic premise for the *Harry Potter* series—the central figure was a young orphan who is kept ignorant of his magical powers and lineage by spiteful relatives. In 1990, Rowling met and married a Portuguese journalist, Jorge Arantes, with whom she had a daughter in 1993; the marriage ended in divorce later that year. In 1995 Rowling left Portugal and returned to Great Britain, where she began work on what became the first book in the *Harry Potter* series—*Harry Potter and the Philosopher's Stone*, (or *Harry Potter and the Sorcerer's Stone*) published in the U.S. in 1998. The book proved immensely popular in the U.S., Great Britain and 29 non-English speaking markets. It was quickly followed by *Harry Potter and the Chamber of Secrets* (1999), *Harry Potter and the Prisoner of Azkaban* (1999), *Harry Potter and the Goblet of Fire* (2000), and *Harry Potter and the Order of the Phoenix* (2003), and *Harry Potter and the Half-Blood Prince* (2005). Rowling also helped adapt her first three novels to motion pictures. Rowling anticipates writing two additional books in the *Harry Potter* series.

Roy, Maurice Cardinal (1905–1985) Roman Catholic primate of Canada (1956–81). Roy was long regarded as a leader of the moderate progressive wing of his church's hierarchy. Named archbishop of his native Quebec in 1947, he was designated a cardinal by Pope PAUL VI in 1965. From 1967 to 1977 he headed two VATICAN agencies, the Council of the Laity and the Pontifical Commission on Justice and Peace.

Royal Ballet Britain's national ballet company. Founded by Ninette de VALOIS and Lilian Baylis in 1931 as the Vic-Wells Ballet, it became Sadler's Wells Ballet in 1940 and the Royal Ballet in 1956. De Valois served as its director until 1963 and was succeeded by Sir Frederic ASHTON (1963–70), Sir Kenneth MACMILLAN (1970–77), Norman Morrice (1977–86), Anthony DOWELL (1986–2001), Ross Stretton (2001–02) and Monica Mason (from 2002). Inter-

nationally acclaimed, the company has its own school and a home theater at Covent Garden Opera House and balances classical tradition with original choreography. *The Sleeping Beauty* (first mounted in 1946) has become its signature work. Other famous ballets presented by the company include Ashton's *Symphonic Variations* and *The Dream*, and Macmillan's *Romeo and Juliet* and *Manon*. Dancers associated with the company include Dame Margot FONTEYN, Rudolph NUREYEV, Annette Sibley and Anthony Dowell.

Royal Danish Ballet One of the oldest ballet companies in the world (established 1748), the Royal Danish Ballet was dominated during the 19th century by August Bournonville, who created a series of ballets that form the Danish classical repertory and established the excellence of Danish male dancing. The company declined after Bournonville's death but experienced a second flowering under the direction of Harald Lander (1932–51). Lander gave the company an international repertory and gained it international recognition. The directors that followed Lander have struggled to maintain the Bournonville ballets and style while developing a contemporary repertory. Outstanding 20th-century Royal Danish dancers include Margot Lander, Borge Ralov, Henning Kronstam, Erik BRUHN, Peter MARTINS and Peter Schaufuss.

Royal National Theatre A theater complex in London consisting of three theaters, performance and exhibition space, restaurants, and shops that was established in 1962 with Sir Laurence OLIVIER as director of its board. Subsequent directors are Peter HALL, Richard Eyre and David Aukin. The idea for the theater was a long time in being realized. In 1907 the Shakespeare Memorial National Theatre Committee was established. In 1944 a site on the South Bank of the Thames was found, and in 1976 the Lyttelton, Olivier and Cottesloe theaters began to open. "Royal" was added to the name in 1988. The repertory company presents both traditional and modern, experimental drama.

Royal Shakespeare Company A British theater company established in

1960 under the direction of Peter HALL. The company achieved success in 1963 with its production of the *The Wars of the Roses* cycle of Shakespeare's works, but it presents the works of other traditional and modern playwrights as well. The company, which has had many eminent theatrical personalities among its ranks, has performed in Stratford and London as well as touring internationally. In the 1980s the company went to Broadway with an adaptation of Dicken's *Nicholas Nickleby*, Hugo's *Les Misérables* and an unfortunate presentation of Stephen KING's *Carrie*.

Royce, Josiah (1855–1916) American philosopher. Born in Grass Valley, California, Royce studied at the University of California and received his doctorate from Johns Hopkins University in 1870. Royce taught at the University of California until 1882, when he joined the faculty of Harvard, where he taught for the rest of his life. Royce was the foremost American idealist of his day. He combined idealism and nationalism in a peculiarly American way, taking into consideration both history and science and stressing action as well as thought. He posited an absolute God, an all-knowing cosmic purpose, in an absolute self, an absolute mind and an absolute community, which deserves humanity's loyalty. Royce saw mankind as a part of the logos and thus able to know reality beyond itself. His ideas were very influential in the religious and ethical thought of his era. Among his books are *The World and the Individual* (1900–01), *The Philosophy of Loyalty* (1908) and *Modern Idealism* (1919).

Ruanda-Urundi A colonial territory in central Africa that was formerly known as Belgian East Africa but has now been divided into the independent states of RWANDA and BURUNDI; the capital was at Usumbura (now Bujumbura). The area became part of German East Africa in the early 20th century. In 1916, during WORLD WAR I, it was taken by BELGIUM. In 1924 the LEAGUE OF NATIONS assigned the territory to Belgium as a mandate. In 1946 Ruanda-Urundi was made a trust territory of the UNITED NATIONS. The two nations of Rwanda and Burundi were created when the territory was granted independence on July 1, 1962.

Rubin, Jerry (1938–1994) American political activist. Rubin became involved in the Vietnam ANTIWAR MOVEMENT in Berkeley, California, in 1964. He was very adept at organizing and gaining media attention for antiwar rallies. In 1968 Rubin's Yippie (Youth International) Party demonstrated during the Democratic National Convention in Chicago; Rubin and others were arrested. Media coverage of confrontations between the police and the demonstrators overshadowed the convention. (See also CHICAGO 7 TRIAL.)

Rubinstein, Arthur (1887–1982) Legendary Polish concert pianist; one of the most popular pianists of the 20th century, during his lifetime his fame was equaled only by that of Vladimir HOROWITZ, whose style and personality were very different. Born in Lodz (in Russian Poland), as a young man Rubinstein spent much time in Paris and Berlin and toured widely in Europe and North and South America. Although a prodigy, Rubinstein did not gain acceptance as a great pianist until the 1930s. He was one of the first pianists to take advantage of the new medium of electronic recording, and during his long career he recorded virtually his entire repertoire. His interpretations of the music of Chopin are regarded as definitive; his performances of Beethoven and Brahms, among other composers, were exceptional. Stylistically, Rubinstein's playing was remarkable for its effortless lyricism and lack of romantic affectation,

Concert pianist Arthur Rubinstein (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

yet also for its great warmth, subtlety and expressiveness; in many ways, he was the first truly modern pianist. He gave concerts until the age of 90.

Ruby, Jack (Jacob Rubinstein) (1911–1967) American nightclub operator, assassin of Lee Harvey OSWALD. Ruby was a shadowy figure in Dallas, Texas, a feature of local nightlife with reputed connections to organized crime. Allegedly a great admirer of President John F. KENNEDY, he shot the president's alleged killer on November 24, 1963, as Oswald was being escorted to an armored truck in the basement of the Dallas municipal building. Ruby has often been accused of implication in one of any number of assassination plots. However, he steadfastly denied this as well as any previous connection with Oswald. Convicted of murder, Ruby died in prison while awaiting retrial on appeal.

Rudel, Hans Ulrich (1916–1982) German bomber pilot during WORLD WAR II. Rudel was one of the most decorated German soldiers of the war. He flew 2,500 missions in a Stuka dive-bomber, mostly on the Russian front (see WORLD WAR II ON THE RUSSIAN FRONT). He was credited with destroying 519 tanks, 150 gun emplacements and 800 combat vehicles. He continued to espouse Nazi doctrines for many years after the war.

Rudolph, Wilma (1940–1994) American athlete. Born into a poor family in St. Bethlehem, Tennessee, Rudolph was stricken with a childhood illness that left one leg crippled. With physical therapy, she made a full recovery, and at age 16 she had secured a place on the 1956 U.S. Olympic track team, where she was a member of the bronze-medal-winning relay team. In the 1960 Olympics, Rudolph won three gold medals—in the 100 meters, the 200 meters and again in the relay—earning her the nickname “the Black Gazelle.” Rudolph set three records in 1961, for the 60- and 220-yard dashes and for the 400-meter relay. That year she was named the Associated Press female athlete of the year and was awarded the Sullivan Memorial Trophy by the AAU as outstanding amateur athlete of 1961. In later years,

Rudolph became a coach and teacher and was active in youth charities.

Ruffian (1972–1975) Thoroughbred racehorse. The greatest filly of her time, Ruffian seemed destined to become one of the greatest racehorses of all time. The winner of five straight races as a two-year-old, she was named the champion filly of 1974. In 1975, the big black filly reeled off five more wins, including New York's triple distaff crown. The bringing together of Ruffian and that year's leading colt, Foolish Pleasure, in a match race at Belmont generated enormous interest. While the two horses were head-to-head, Ruffian stumbled. Her right foreleg was broken, and her gallant attempt to keep running damaged the leg irreparably. Attempts were made to save her, but the filly thrashed about and caused herself further damage. Ruffian was put down and is buried in the infield at Belmont.

Ruffing, Charles “Red” (1904–1986) U.S. athlete. His baseball career spanned 22 seasons ending in 1947. Considered the best-hitting pitcher of his era, he spent 15 seasons with the New York Yankees. His lifetime regular season record was 273 victories and 225 defeats, with four consecutive 20-win seasons. His career batting average of .269 included eight seasons over .300. He was elected to the Baseball Hall of Fame in 1967.

Ruggles, Carl (1876–1971) American composer. Born in Marion, Massachusetts, he attended Harvard University. Like his friend Charles IVES, Ruggles was an American original who rejected traditional musical forms. A conductor of small orchestral and chamber groups and a teacher at the University of Florida at Miami (1937–46), he was careful and self-critical, creating a comparatively small oeuvre. Dense and vigorous, his complexly atonal compositions include works for the piano and voice as well as chamber music and orchestral pieces. Among his better-known works are the orchestral *Men and Mountains* (1924), the tone poem *Sun-Treader* (1932) and the piano piece *Evocations* (1934–43).

Ruhr German river that flows westward into the Rhine at Duisburg. The

name Ruhr often also refers to the valley itself, GERMANY's industrial heartland. The Ruhr valley includes such centers of industry as Bochum, Dortmund, Duisburg and Essen. Huge coal and steel empires were developed here by the Krupp and Thyssen families during the 19th century. From 1923 to 1925 the Ruhr was occupied by Belgian and French forces during a dispute over Germany's postwar reparations payments. Adolf HITLER used the French occupation as an excuse to rise against the WEIMAR REPUBLIC in his unsuccessful BEER HALL PUTSCH of 1923. The Ruhr was the primary center of Germany's war production during WORLD WAR II. As such, it was heavily bombed by the Allies; the cities of the region suffered great damage. After the war, the Ruhr remained under the control of the Allies until 1954, when it was turned over to WEST GERMANY.

Rule, Elton Hoert (1916–1990) American executive. Rule was president of ABC (American Broadcasting Company) from 1973 to 1983. His pioneering use of mini-series, made-for-TV movies and Monday Night Football helped the once-ailing company become the dominant U.S. television network in the 1970s.

Rumor, Mariano (1915–1990) Italian politician. A Christian Democrat, Rumor held the post of premier five times between 1968 and 1974. He served during turbulent times in ITALY and had to contend with economic crises, student protests, labor unrest and terrorism from extremists of both the left and the right. In 1976 he was investigated for possible involvement in the LOCKHEED SCANDAL. The U.S. aircraft maker had admitted bribing Italian officials to help ease negotiations over a large airplane contract. Rumor denied the charges and was narrowly exonerated by parliament.

Rumsfeld, Donald (1932–) U.S. secretary of defense (1975–77, and 2001–2006). Born in Chicago, Rumsfeld began his political career in 1962 when he was elected to the U.S. House of Representatives from Illinois. In 1969 he became the head of the Office of Economic Opportunity in the administration of Richard NIXON. After Nixon's reelection in 1972, Rumsfeld was appointed U.S.

ambassador to NATO and briefly served as a member of President Gerald Ford's "transition team" before becoming the country's youngest secretary of defense in 1975.

When the Ford administration ended in January 1977, Rumsfeld served in several high positions in private industry until being named secretary of defense by President BUSH in 2001.

As secretary of defense, Rumsfeld focused on reforming the U.S. armed forces to deal with post-cold war threats to the U.S. He was instrumental in persuading President Bush to withdraw from the 1972 Anti-Ballistic Missile Treaty and actively promoted a NATIONAL MISSILE DEFENSE system. After the terrorist attacks of SEPTEMBER 11, 2001, Rumsfeld was a staunch advocate of military action to topple the Taliban regime in AFGHANISTAN. He also successfully argued for the overthrow of Iraq's Saddam HUSSEIN, and masterminded "Operation Iraqi Freedom" that achieved that result in March 2003. Rumsfeld, Vice President Dick Cheney and Deputy Secretary of Defense Paul Wolfowitz (the three principal proponents of overthrowing the Hussein regime because it possessed weapons of mass destruction) came under sharp criticism in the aftermath of the war in Iraq when no weapons of mass destruction were found. Rumsfeld resigned after Republicans were soundly defeated in the 2006 elections.

Runcie, Robert (1921–2000) Archbishop of Canterbury (1979–90) and spiritual leader of the Anglican Church. Runcie was known for his outspoken liberal political views, which sometimes clashed with the policies of Tory prime minister Margaret THATCHER. In particular, Runcie called for a less strictly materialistic approach to economic issues and the plight of the poor. Runcie parted company with his predecessor, Archbishop Donald COGGAN, by insisting that the ordination of women as priests was a reform for which the Anglican Church was not yet ready. Prior to his election as archbishop, Runcie had been bishop of St. Albans and a professor of theology at Cambridge University.

Rundstedt, Karl Rudolf Gerd von (1875–1953) German military commander during WORLD WAR II. Rund-

stedt led the BLITZKRIEG in Poland (1939), the French campaign in 1940 and the Russian campaign in 1941. He was supreme commander in the west from 1942 to 1945. Rundstedt led the German counteroffensive, known as the Battle of the BULGE, in 1944. The British held him as a possible war criminal after Germany's defeat, but he was released in 1949 because of poor health. (See also Battle of FRANCE; WORLD WAR II ON THE EASTERN FRONT; WORLD WAR II ON THE WESTERN FRONT.)

Runyon, Damon (1884–1946) American author. Runyon began his career as a sports writer and brought the immediacy of reporting to his colorful fiction, which painted a racy picture of New York's underworld during the 1920s and '30s. His short stories, such as "Guys and Dolls" (1931), have been collected into such works as *The Damon Runyon Omnibus* (1944) and *The Best of Damon Runyon* (1966), and many of them have been adapted into plays and films.

Ruschi, Augusto (1916–1986) Brazilian naturalist. His work included cataloging 80% of known species of Brazilian hummingbirds. He became a hero in his country for defending a nature preserve against deforestation and encroaching coffee farms. His death from cirrhosis of the liver came less than six months after his widely publicized announcement that Amazonian Indian treatments had cured him of progressive liver failure, which he said had come from handling poisonous toads. At least one British medical specialist had attributed Ruschi's condition not to toads but to the cumulative effect of treatment with antimalarial agents.

Rushdie, Salman (1947–) British novelist. A Muslim, Rushdie was born in Bombay, India. His family emigrated to Pakistan in 1964, and he was educated at King's College, Cambridge. He remained in England, initially to pursue a career as an actor. Rushdie's first novel, *Grimus* (1975), did not impress readers or critics. He established his reputation with *Midnight's Children* (1981), which won the Booker Prize, among other awards. Rushdie's fiction is associated with MAGIC REALISM and is rich in Muslim imagery. Rushdie received a peculiar notoriety with the

publication of *The Satanic Verses* (1988). A critically acclaimed story of the struggle between good and evil, the book contains two chapters, "Mahound" and "Return to Jahiliya," that many Muslims deem to be a blasphemous and obscene mockery of the origins of Islam. On February 14, 1989, the Ayatollah KHOMEINI pronounced a death sentence on Rushdie, urging Muslims to execute not only him but the publishers of the book. A day later an aide to Khomeini offered a million-dollar reward for Rushdie's death, and he was forced into hiding. Many bookstores, fearful of attack, stopped selling the book, and his publishers were hesitant about releasing a paperback edition, causing much outcry about freedom of speech and censorship. The book was banned in several countries, among them Pakistan, India and Egypt, and violent protests in these countries caused several deaths. Rushdie attempted to appease his critics with the essay "In Good Faith" (1990) and issued an apology in which he reaffirmed his respect for Islam. While in hiding, Rushdie published *Haroun and the Sea of Stories* (1990). Rushdie continued to publish novels, including *The Moors Last Sight* (1995), *The Ground Beneath Her Feet* (1999) and *Fury* (2001). In September 1998 the Iranian government began to show signs of moderation when it announced that it would not enforce its earlier *fatwa* regarding Rushdie, and would no longer encourage other individuals or organizations to implement it.

Rushworth, Robert (1924–1993) U.S. military flier and test pilot who made more flights in the X-15 rocket plane than any other pilot. During one of his 34 flights, on June 27, 1963, Rushworth reached an altitude of 55 miles (285,000 feet), earning astronaut status by the air force definition. Over the course of his career he flew 50 different aircraft, logging more than 6,500 hours of flying time. Rushworth started out in 1943 as a U.S. Army enlisted man. He trained as an aviation cadet and became a pilot in 1944, after which he flew combat missions in China, Burma and India. He left the military in 1946 to get a degree in mechanical engineering, but by February 1951 he was back in the air force, earned an M.S. in aeronautical engineering in

1954 and became a test pilot. From 1957 to 1966 he flew experimental aircraft and rocket planes at Edwards Air Force Base, earning a Distinguished Flying Cross for a tricky landing of the X-15. In 1996 he went back to combat duty, this time in VIETNAM. On returning to the states in 1969, he served as commander of several test centers.

Rusk, Dean (David Dean Rusk) (1909—1994) U.S. secretary of state (1961–69). After teaching political science in the 1930s and serving in World War II, Rusk followed his mentor George C. MARSHALL into the State Department. He was named assistant secretary of state for Far Eastern affairs in 1950 and, under Dean ACHESON, played an important role in the formulation of policy during the KOREAN WAR. In 1952 Rusk left the State Department to become head of the Rockefeller Foundation. President John F. KENNEDY appointed him secretary of state in 1961, and he retained that post under President Lyndon B. JOHNSON. Rusk advocated worldwide economic cooperation and military opposition to communist expansion, becoming a prominent apologist (with Robert McNAMARA) for the escalation of the VIETNAM WAR. In 1970 he became a professor of international law at the University of Georgia.

Rusk, Howard Archibald (1901–1989) American physician, a pioneer in the science of medical rehabilitation. His interest in rehabilitation began while he was in charge of the Army Air Force Convalescent Training Program in WORLD WAR II. During the war he helped develop programs to rehabilitate soldiers using both physical and psychological means. Many of his techniques became part of standard medical practice around the world. Rusk received numerous awards, including three Albert Lasker Awards, the Distinguished Service Medal and the French Legion of Honor. The Howard A. Rusk Institute of Rehabilitative Medicine was named for him. He was also a president and chairman of the World Rehabilitation Fund, which he founded in 1955.

Ruska, Ernst (1906–1988) German electrical engineer credited with the development of the ELECTRON MICRO-

SCOPE in 1931. Ruska received belated recognition for that achievement when he shared the NOBEL PRIZE for physics in 1986.

Russell, Bertrand A(rthur William), (third earl Russell) (1872–1970) British philosopher, mathematician and social critic. Russell, who won the NOBEL PRIZE for literature in 1950, was one of the most influential and widely read philosophers of the 20th century. He was born into an aristocratic British family and educated at Cambridge University, but for most of his life Russell advocated political and social beliefs—such as pacifism and left-wing economic reforms—that went contrary to his class and background. Russell's first great work, completed in collaboration with Alfred North WHITEHEAD, was the three-volume *Principia Mathematica* (1910–13), which asserted that mathematics was essentially an extension of philosophical logic. In 1916, during WORLD WAR I, Russell was dismissed from the faculty of Cambridge University for his pacifist beliefs. In the final decades of his life, Russell was active in the antinuclear weapons movement. His major works included *Why I Am Not a Christian* (1927), *Marriage and*

Influential mathematician, philosopher and activist
Bertrand Russell (LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

Morals (1929) and *The History of Western Philosophy* (1945).

Russell, Bill (William Fenton Russell) (1934–) American basketball player. Russell is generally acknowledged to be the greatest basketball player of all time, and was so voted by the Professional Basketball Writers Association. After leading his college team at the University of San Francisco to two championships, he was drafted by the Boston Celtics and remained with them for his entire career (1956–1969). At center, Russell was named most valuable player five times, and the team won 11 championships. During the last three years of that span, Russell also coached the team to two championships and was the first black coach in league history. His totals as a player included 21,620 rebounds and 14,522 points. He went on to coach the Seattle Supersonics (1973–1979). He was named to the Basketball Hall of Fame in 1974. In 1980 Russell was named the greatest player in NBA history by the Professional Basketball Writer's Association of America.

Russia Former European-Asian empire, supplanted and expanded by the UNION OF SOVIET SOCIALIST REPUBLICS. After the dissolution of the USSR in December 1991, the newly independent Russian Federation inherited the Soviet seat in the United Nations General Assembly and Security Council. The name was also applied to the USSR's RUSSIAN SOVIET FEDERATED SOCIALIST REPUBLIC. At the turn of the century, under Czar NICHOLAS II, the Russian Empire stretched from the German and Austro-Hungarian borders in the west to the Pacific Ocean on the east, including the vast but sparsely populated north Asian territory of SIBERIA. Much of present-day Poland was under Russian control. In 1894 Russia had entered into an alliance with France and an arrangement with Great Britain; this alliance was formalized as the TRIPLE ALLIANCE in 1907. Meanwhile, the construction of the Trans-Siberian Railroad between 1891 and 1905 opened Siberia and the Far East to exploitation and settlement. Russian and Japanese competition over Manchuria and KOREA led to the RUSSO-JAPANESE WAR of 1904–05, in which Russia was soundly defeated. This defeat pointed up the glaring weaknesses

of the Russian military, political and economic system and helped to bring about the RUSSIAN REVOLUTION OF 1905. The czar was forced to grant a constitution and establish a parliament (the DUMA), but factional squabbling and the czarist government's stubborn reluctance to go beyond cosmetic changes doomed the system to failure.

In August, 1914, Russia was drawn into WORLD WAR I, ostensibly as a defender of Slavic peoples in the Balkans and elsewhere. However, the nation was as ill-prepared for this war—if not more so—than it had been for the war with Japan. Russia's advantage in manpower was offset by the nation's inability to properly arm, feed and train its soldiers. Moreover, much of the leadership was incompetent. The Russian army suffered catastrophic defeats at the hands of Germany and Austria-Hungary. Mass discontent in the ranks, fueled by the bitter conditions of warfare and by resentment against the aristocratic officer corps and the apparently callous czarist government, led to de-

sertion and to the spread of revolutionary propaganda. On the home front, food shortages developed. Revolution broke out in February 1917, and Nicholas abdicated on March 15 (see FEBRUARY REVOLUTION.) A provisional government was organized; in May it admitted socialists and in July made Alexander F. KERENSKY its head. Historians speculate that had this government made peace with Germany, it might have survived and guided Russia on a democratic path. However, it insisted on carrying on the unpopular war, while economic conditions continued to deteriorate. The disciplined, well-organized BOLSHEVIKS, under V. I. LENIN and Leon TROTSKY, staged a coup in late October (Old Style calendar; early November, New Style), and the Kerensky government collapsed (see OCTOBER REVOLUTION). The Bolsheviks consolidated their control of the government and reached a peace agreement with Germany in the treaty of BREST-LITOVSK. In 1918 the czar and his family were executed. Despite op-

position from various anti-Bolshevik forces (see WHITES), including Western troops, the Bolsheviks prevailed, eventually bringing Russia under their authority (see RUSSIAN CIVIL WAR) and establishing the COMMUNIST PARTY as the sole power in the new Union of Soviet Socialist Republics. Following Russia's independence from the USSR in December 1991, it was governed by President Boris YELTSIN (1991–99) and Vladimir PUTIN (2000–), who was reelected president in 2004. With the end of the cold war Russia and the United States announced a new agreement in 2002 to cut their nuclear arsenals. That same year Russia joined in a special partnership with NATO to help fight terrorism. Russia has had to deal with a recent surge in domestic terrorism, such as when Chechen rebels held 800 people hostage in a Moscow movie theater in 2002 and again in 2004 when they seized a school full of children in Beslan. Putin's government was embarrassed but survived a confidence

RUSSIA

1904–05	The Russo-Japanese War is caused by Russian expansion into Manchuria.
1905	A revolution, though suppressed, forces the czar to accept a parliament (Duma) with limited powers.
1914	Russo-Austrian rivalry in the Balkans is a major cause of the outbreak of World War I; Russia fights in alliance with France and Britain.
1917	As a result of the Russian Revolution, the czar abdicates and a provisional government is established; the Bolsheviks seize power under Vladimir Lenin.
1918	The Treaty of Brest-Litovsk ends the war with Germany; the former czar is murdered; the Russian Empire collapses; Finland, Poland, and the Baltic States secede.
1918–22	A civil war is waged between the Red Army, led by Leon Trotsky, and White Russian forces, with foreign support; the Red Army is ultimately victorious; control is regained over Ukraine, Caucasus, and Central Asia.
1922	The former Russian Empire is renamed the Union of Soviet Socialist Republics.
1991	The Soviet Union breaks apart as republics declare their independence; Boris Yeltsin, leader of the reform movement, is elected president of Russia June 12. Yeltsin bans Russian Communist Party; Commonwealth of Independent States (CIS) created as a means to maintain ties between states of the former Soviet Union.
1996	Yeltsin is reelected president.
1998	Russian troops enter Chechnya to put down independence move.
1999	A severe economic crisis strikes the Russian economy.
2000	Vladimir Putin is elected president.
2001	Closer cooperation between Russia and the West as Putin expresses support for U.S. and its military campaign against the Taliban and al-Qaeda.
2002	Russia and the U.S. agree to cut their nuclear arsenals from over 6,000 missiles each to about 2,000 each by 2012. NATO-Russia Council established in which Russia and NATO will have an equal role in decision making to fight terrorism and other security threats. Chechen rebels seize a Moscow theater, most of the rebels and about 120 hostages are killed when Russian troops storm the building.
2004	Putin wins a landslide election for a second term as president. More than 330 killed, many of them children, when government forces storm a school occupied by rebels in North Ossetia. Putin blames international terrorists with links to Chechen separatists.
2005	The government survives a no-confidence vote in the Duma called by communist and nationalist opposition over its benefits and pension reforms, which had sparked widespread protests.

vote in 2005 called by the opposition parties over pension reform.

Russian Civil War of 1918–21 In 1918, several months after the popularly elected Russian assembly was disbanded as a counterrevolutionary body (see OCTOBER REVOLUTION), civil war

broke out between the ruling BOLSHEVIKS (or communists) and the anti-Bolshevik WHITES. It was triggered by a clash between Czech troops (in transit through Siberia) and the Bolsheviks, whose punishment of the Czechs provoked the Czechs to raid Siberian villages. Taking advantage of the situation,

the Whites began battling the Bolsheviks' newly formed Red Army and successfully took almost all of Siberia. During the struggle, Czar NICHOLAS II and his entire family were murdered at Ekaterinburg (Sverdlovsk) in July 1918. A month later, British, French, Japanese and American troops, in sup-

port of the Whites, landed at Vladivostok on the Sea of Japan, while British and American forces disembarked at Archangel on the Arctic's White Sea and helped a new provisional government to establish itself there. Through these foreign efforts, Bolshevik rule was eliminated east of the Ural Mountains.

However, the Red Army under Leon TROTSKY waged fierce battles and ultimately defeated three White armies from the Caucasus, Baltic and Siberian areas. The Czechs withdrew, but the other foreign powers continued to furnish troops and supplies to fight the communists. Terrorism and assassinations increased on both sides, and communist distrust of non-Bolsheviks was hardened. After peace negotiations failed, a White army advanced toward Moscow, reaching Orel, about 200 miles to the south, and another White force came within 10 miles of Petrograd (Leningrad). But the Red Army turned them back and won a victory at Novorossisk on the Black Sea. After the western Siberian city of Omsk, headquarters of the anticommunist forces of Admiral Alexander V. KOLCHAK, fell to the Reds in November 1919, and the foreign forces withdrew from the war, the Whites were gradually crushed as they fought in hostile territory. The bloody civil war, which also saw the KRONSTADT REBELLION, ended with the communists firmly in control of the government and the country (including Siberia) by 1921. (See also DENIKIN; FINNISH WAR OF INDEPENDENCE; RUSSO-POLISH WAR OF 1919–20; WRANGEL.)

Russian Revolution (1917) The revolution of March and November (Old Style February and October) 1917 that overthrew the Russian monarchy and established the world's first communist state. It began with the FEBRUARY REVOLUTION, when riots over shortages of bread and coal in Petrograd (formerly St. Petersburg) led to the establishment of the Petrograd Soviet of workers' and soldiers' deputies, dominated by the MENSHEVIKS and Social Revolutionaries, and of a provisional government of DUMA deputies, which forced NICHOLAS II to abdicate. The failure of the provisional government, under Prince George LVOV and then KERENSKY, to end Russia's participation in WORLD WAR I and to deal with food shortages led to the de-

mand of the BOLSHEVIKS under LENIN for "all power to the Soviets." The Bolsheviks, who had gained a majority in the Soviet by September, staged the OCTOBER (or Bolshevik) REVOLUTION, seizing power and establishing the Soviet of people's commissars. The new government made peace with Germany in early 1918 but almost immediately faced opposition at home. In the subsequent CIVIL WAR (1918–21) the Red Army was ultimately victorious against the anticommunist WHITES but with the loss of some 100,000 lives. In addition, some 2 million Russians emigrated.

Russian Revolution of 1905 An insurrection in RUSSIA. It was an expression of the widespread discontent that foreshadowed the RUSSIAN REVOLUTION of 1917. It began on BLOODY SUNDAY, January 22, 1905, when a group of striking workers, led by Father GAPON, marched peacefully to the Winter Palace in St. Petersburg only to be met by gunfire. The massacre precipitated nationwide strikes, uprisings and mutinies (including the mutiny on the cruiser *Potemkin*). By October Russia was gripped by a general strike, which with the establishment of the St. Petersburg Soviet (workers' council) dominated by the MENSHEVIKS, including TROTSKY, forced Emperor NICHOLAS II to promise a constitutional government (see DUMA). The revolution was substantially crushed by the end of December.

Russian Social Democratic Labor Party Founded in 1898 as the Social Democratic Labor Party, the party consisted of orthodox Marxists, revisionists and trade unionists. Although the party split into BOLSHEVIKS and MENSHEVIKS at the second party congress in 1903, it was later formally reunited, but both factions continued to exist. In 1919 the Bolsheviks no longer used the name Russian Social Democratic Party, but the Mensheviks opted to retain it.

Russian Soviet Federated Socialist Republic (RSFSR) The largest of the 15 republics of the former UNION OF SOVIET SOCIALIST REPUBLICS (USSR). With such cities as Moscow (the capital of the RSFSR as well as of the USSR) and LENINGRAD, it was the political, social, economic and cultural nerve center of the Soviet Union. Stretching some

5,000 miles from eastern Europe and the Baltic Sea across northern Asia (SIBERIA) to the Pacific Ocean, it contained more than half the population of the Soviet Union and more than three-quarters of its land. The BOLSHEVIKS established the RSFSR in January 1918. In 1922 the RSFSR was formally united with the UKRAINE, Belorussia and Transcaucasia to form the Union of Soviet Socialist Republics. By virtue of its plentiful natural resources and its location in the heartland of the old Russian Empire, the RSFSR became highly industrialized during the 20th century. In the late 1980s, with various ethnic groups throughout the USSR demanding autonomy, the Russian republic became the center of a resurgent Russian nationalism. Communist maverick politician Boris YELTSIN was elected president of the republic and challenged the authority of the central Soviet government. When the USSR ceased to exist in December 1991, the Russian Federation became an independent state with Yeltsin as its president.

Russo-Finnish War of 1939–40 On the outbreak of WORLD WAR II, Soviet Russia demanded FINLAND lease a naval base on the Hanko Peninsula, demilitarize its Mannerheim Line fortifications and cede several islands. Finland refused and about 1 million Soviet troops invaded. From November 30, 1939, to March 12, 1940, 300,000 Finnish troops and international volunteers held off the Soviets, using the Finnish winter to advantage. At Suomussalmi the Finns nearly annihilated two Soviet divisions. They were unable to halt the incessant Soviet assaults, however. Aided by heavy artillery and air bombardments, the Soviets breached the Mannerheim Line in February 1940. The Finns sued for peace when the Soviets pushed on toward Vyborg on March 12, 1940, ceding the Karelian isthmus and Vyborg (Viipuri). In June 1941 the Finns joined the German invasion of the USSR.

Russo-Japanese War (1904–05) arising from the conflict of Russian and Japanese aspirations in Asia. RUSSIA refused to withdraw from MANCHURIA, despite having agreed to do so in 1902, and also wished to gain concessions in KOREA. Alexander Bezobrazov's timber company began work on the Korean

side of the Yalu River, and in 1904 the Russian fleet was attacked by the Japanese at PORT ARTHUR. In May 1905 the Japanese virtually destroyed Russia's Baltic fleet at Tsushima. Britain's proposal of American mediation was accepted. At the peace conference, presided over by Theodore ROOSEVELT, in Portsmouth, New Hampshire, Russia ceded Port Arthur, the southern line of the Chinese Eastern Railway and the southern half of Sakhalin Island to JAPAN.

Russo-Persian War of 1911 After the Persian Revolution of 1906–09, Russia sent troops to Kazvin in northern Persia to protect its interests there, in violation of the Anglo-Russian agreement of 1907. William Morgan Shuster, an American serving as Persian treasurer, clashed with Russia, which supported an attempted coup by the former shah and demanded Shuster's removal; the parliament refused. The Russians committed atrocities in Tabriz, took over Azerbaijan and advanced on Tehran. Persia's regent governing for the minor Ahmed Shah enacted a coup, closed down the assembly and accepted Russia's demand.

Russo-Polish War of 1919–20 As German troops withdrew from POLAND after WORLD WAR I, Russian Bolshevik troops advanced westward. Polish forces under General Józef PIŁSUDSKI pushed the Russian forces back into UKRAINE. The Allies approved an eastern Polish border within Russia, but Piłsudski, seeking to seize the Ukraine, allied with anti-Bolshevik Ukrainians under Simon PETLYURA, capturing Kiev on April 25–May 7, 1920. A Soviet counterattack drove the Poles out, and Soviet troops were threatening Warsaw by August. With aid from the French under General Maxime WEYGAND, Polish armies defeated Soviet troops under Mikhail Tukacheveski in September 1920 along the Niemen River. An armistice ended fighting on October 12, 1920, and by the Treaty of Riga (March 18, 1921) Poland's territorial claims eastward were accepted by the Russian government.

Rustin, Bayard (1910–1987) American civil rights leader. He was one of the foremost theorists and practitioners of the CIVIL RIGHTS MOVEMENT. A close advisor to the Reverend Martin Luther

KING, Jr., since the 1950s, Rustin was a principal organizer of the 1963 Washington, D.C., march and rally at which King delivered his “I have a dream” speech (see MARCH ON WASHINGTON, 1963). A socialist, pacifist and Quaker, he remained a lifelong believer in non-violent protest. He favored a coalition approach to achieving social change, involving alliances with labor, white liberals, Jews and other minorities, an approach often criticized by other black leaders. Rustin, who was openly gay, urged black leaders to adopt a more active role in the fight against AIDS (acquired immune deficiency syndrome).

Ruth, George Herman “Babe” (1895–1948) American baseball player. The greatest home run hitter of his time, Ruth discovered baseball while at St. Mary's Industrial School in Baltimore. After gaining experience with a local minor league team, he signed with the Baltimore Orioles and was later sold to the Boston Red Sox as a pitcher. He pitched 29–2/3 scoreless World Series innings for them, and had a 94–46 overall record, but by 1918 he had been shifted to the outfield so that he could hit every day. Sold to the New York Yankees in 1920 for \$125,000, Ruth began the 14 seasons of home run hitting that established him as the “Sultan of Swat.” He broke the home run record in three consecutive seasons (1919–21), hit 60 home runs in 154 games in 1927, led the American League in home runs for 12 seasons and hit 50 or more home runs in four seasons—all records. His career total of 714 home runs was the

New York Yankees baseball legend Babe Ruth
(LIBRARY OF CONGRESS, PRINTS AND PHOTOGRAPHS DIVISION)

record until it was surpassed by Hank AARON in 1974 and Barry Bonds in 2006. Less well known is the fact that Ruth set a lifetime record of 2,056 bases on balls. Somewhat notorious for his rowdy nightlife, Ruth was fined for misconduct several times, and after his retirement in 1935 he failed to attract the job of team manager that he desired. He became the second player to be elected to the Baseball Hall of Fame (1936).

Rutherford, Ernest (1871–1937) New Zealand-born British physicist. One of the century's most influential scientists, Rutherford revolutionized our understanding of atomic physics. Born near Nelson, New Zealand, he received his B.A. from Canterbury College, in Christchurch, in 1892, his M.A. the following year and a B.S. in 1894. Rutherford next entered Cambridge University as a research student for J. J. Thomson at the prestigious Cavendish Laboratory and assisted in the research that led to Thomson's discovery of the electron. From 1898 to 1907, Rutherford taught at McGill University in Montreal, where he performed landmark experiments in radioactivity, including those marking the discovery of alpha and beta particles. In 1907, Rutherford accepted a post at Manchester University in England. The following year he was awarded the NOBEL PRIZE for chemistry. In 1911 he presented a new model of the atom, still generally accepted, that called for a mass of positively charged particles in the center with negatively charged electrons orbiting about the periphery. Rutherford moved in 1919 to Cambridge University, where he headed the Cavendish Laboratory until his death. He headed the Royal Society from 1925 to 1930, and he was elevated to the peerage in 1931.

Rutledge, Wiley Blount (1894–1949) Associate justice, U.S. Supreme Court (1943–49). A graduate of the University of Wisconsin, Rutledge graduated from the University of Colorado Law School after his education had been interrupted by tuberculosis and financial difficulties. After a brief time in private practice he became a law professor. Rutledge was appointed by President Franklin D. ROOSEVELT to the U.S. Court of Appeals for the District of Columbia and was elevated to the U.S. Supreme Court in 1943. His

career on the Court was cut short when he died unexpectedly in 1949.

Rutskoi, Alexander (1947–) Soviet and Russian major-general and politician. During the Soviet military involvement in AFGHANISTAN (1979–89), Rutskoi served between 1985 and 1986 as a regimental commander in the occupation forces counterinsurgency operations against the various bands of MUJAHIDEEN, or Islamic militants that opposed the pre-Soviet government and its Soviet military protectors. In 1990 he also entered politics, becoming a People's Deputy (legislator) in the Russian Soviet Federated Socialist Republic (RSFSR), as well as a member of the

USSR's Supreme Soviet (the national parliament). He became a strong supporter of fellow Russian nationalist Boris YELTSIN and leader of the Communists for Democracy Movement. In early 1991 the Communist Party expelled Rutskoi prompting him to transform his marginal faction into a major social-democratic party.

After his election as vice president of the RSFSR, where he became a supporter of Yeltsin's efforts to increase the republic's autonomy within the tottering Soviet Union. During the August 1991 coup against Soviet president Mikhail GORBACHEV, Rutskoi joined Yeltsin in resisting the decrees of new president, Gennady YANAEV, which

forced the cabal to crumble within a few days. When the Soviet Union disintegrated on December 25, 1991, Rutskoi became the vice president of Russia.

After Yeltsin dissolved the Duma in September 1993, the Duma remained in session and announced Yeltsin's removal as president and Rutskoi's designation as acting president. In the next month troops loyal to Yeltsin shelled the parliament building, captured the rebel forces, and arrested Rutskoi. Although ordered to stand trial for treason, Rutskoi was pardoned by Yeltsin in February 1994.

Rwanda German colony (1885–1914), Belgian mandate and administered

RWANDA

1916	The region is occupied by Belgium during World War I.
1923	Belgium is granted a League of Nations mandate to administer Ruanda-Urundi; Belgium rules indirectly through Tutsi chiefs.
1959	Inter-ethnic warfare is fought between the Hutu and the Tutsi, forcing the mwami (king) Kigeri V into exile.
1961	A republic is proclaimed after the mwami is deposed.
1962	Rwanda becomes independent, with Grégoire Kayibanda, leader of Parmehutu, as president.
1973	As a fresh wave of Hutu-Tutsi conflict threatens to engulf the country, Kayibanda is toppled in a swift bloodless coup led by Major General Juvenal Habyarimana; the constitution of 1962 is partially suspended, and the national assembly is dissolved.
1975	Habyarimana launches the National Revolutionary Movement of Development (MRND) as the sole political party.
1983	Habyarimana is reelected to another term as president.
1988	Habyarimana is reelected president.
1990	Between 5,000 and 10,000 rebel Tutsi invade Rwanda from neighboring Uganda.
1994	Habyarimana and the Burundian president are killed aboard an airplane shot down over Kigali. Extremist Hutu militia and Rwanda military begin systematic massacre of the Tutsis. An estimated 600,000 to 1 million Rwandans are killed in the civil war. A cease-fire is declared in July.
1995	The UN establishes a tribunal to investigate the Hutu-Tutsis massacre.
1996	Rwandan troops invade and attack Hutu militia-dominated camps in Zaire in order to drive home the refugees.
1997	More than 300 Tutsis are killed in a refugee camp as ethnic conflict continues.
2000	President Pasteur Bizimungu, a Hutu, resigns in March and Major General Paul Kagame, a Tutsi, is sworn in as the fifth president of Rwanda.
2003	Voters back a new constitution designed to prevent another genocide.

territory (1914–62), and African independent nation (1962–). In the 19th century Germany gained control of the African territories known as Ruanda and Urundi, uniting them under the administrative entity called German East Africa. At the end of the war, the Treaty of Versailles deprived Germany of all of its African colonies, transferring them to the custody of the newly created League of Nations, with Belgium administering it as a mandate.

When Germany invaded Belgium in 1940 during the Second World War (1939–45), Belgian control of Rwanda was greatly weakened. This push toward independence coincided with a sharp increase in conflict between Hutu and Tutsi over the persistence of the *ubuhake* system, a traditional feudal relationship whereby the Hutu had served as indentured servants of the Tutsi. By 1959, this ethnic conflict within Rwanda resulted in an undeclared civil war between the two peoples, forcing the Tutsi king and some 200,000 of his kin to flee to UGANDA. Profiting from the Tutsi em-

igration, the Hutus declared Rwanda an independent republic in January 1961. In the September 1961 national elections, the Hutu-dominated Parmehutu Party handily won control of the new national assembly, which passed a measure prohibiting the return of the Tutsi monarch. Under increasing pressure from the UN, Belgium recognized the independence of this republic in July 1962 under the leadership of Grégoire Kayibanda, the leader of the Parmehutu Party, which upon independence was renamed the Democratic Republican Movement (MDR).

In 1973 Kayibanda was overthrown by his defense minister, General Juvénal Habyarimana, who disbanded the national assembly and the MDR to consolidate his power. In 1975 Habyarimana founded the National Revolutionary Movement of Development (NRMD), the successor to the MDR that dominated the constitutional convention summoned by Habyarimana to write a new constitution. In 1983 and 1988 Habyarimana ran unopposed as the

NRMD's candidate. In 1990, two years after his second election, renewed fighting began between the Hutu-dominated government and the Rwandan Patriotic Front (RPF), a collection of Tutsi forces operating from neighboring Uganda.

In April 1994 a plane carrying Habyarimana and Cyprien Ntaryamira, the president of neighboring Burundi, was shot down, killing both men. The NRMD and Rwandan military blamed the RPF for the action, and instigated a wave of mass murder against Rwanda's remaining Tutsi population, which in turn prompted reprisals by the RPF against Hutu in the areas it controlled. A 2,500-strong French force sent to restore order to Rwanda failed to stop the assaults of the RPF and NRMD. More than 600,000 people (mainly Tutsi) were killed in the violence in Rwanda by the end of 1994.

By July 1994 both sides agreed to implement a cease-fire and serve under the transitional government of the moderate Hutu Pasteur Bizimungu allowing Hutu and Tutsi refugees to begin to return to Rwanda. Later that year, the UN established the International Criminal Tribunal for Rwanda (ICTR), which later served as a model organization for the International Criminal Tribunal for Yugoslavia. However, many Hutus believed to have been responsible for instigating genocide against Tutsis remained in refugee camps in Zaire. In October 1996, several months after the UN had inaugurated the ICTR in Tanzania, the Rwandan government responded to reports of increasing paramilitary activity in these camps by backing an attack on them by nearby Tutsi forces. The following year, survivors of these Hutu camps conducted reprisals of their own on Tutsi regions. In 2000, following the resignation of Bizimungu, vice president and minister of defense Paul KAGAME, himself a Tutsi, became the new president of Rwanda and sought to bring peace to his devastated country. A new constitution that bans the incitement of ethnic hatred was put into effect in 2003.

Ryan, (Lynn) Nolan (1947–) American baseball player. Known as "The Myth" during his four years with the New York Mets, his early years were plagued by lack of control and blister problems. In the worst deal in Met his-

tory (if not in baseball history), Ryan (along with two other players) was traded to the California Angels for Jim Fregosi in 1971. In California, he began to achieve mastery over his astonishing fastball, and became the first righthander since Bob Feller to strike out 300 batters in a season. He signed with the Houston Astros in 1979, and later remained in his native Texas as he signed with the Rangers in 1988. Clocked at over 100 miles per hour, Ryan is baseball's all-time strikeout leader with over 5,000—1,000 more than the second-highest total, held by Steve Carlton. Ryan pitched his sixth no-hitter in 1990, at the age of 43. That year he also reached the milestone of 300 wins. An astute businessman, Ryan owns a bank, a town and several ranches throughout Texas, but continued to play—and best—players half his age. He pitched an astonishing seventh no-hitter in May 1991. By the time of Ryan's retirement in 1993, the pitcher had set a league record in all-time strikeouts (5,714), and finished with a career record of 324-292. Ryan was elected to the Baseball Hall of Fame in 1999.

Rykov, Alexei Ivanovich (1881–1938) Russian member of the militant wing of the Social Democratic Labor Party and of its Bolshevik faction. Rykov worked as an underground agent in RUSSIA but broke with LENIN in 1910 to become leader of the “party-minded BOLSHEVIKS,” a subfaction that was more tolerant toward the MENSHEVIKS. After the OCTOBER REVOLUTION in 1917 he advocated a coalition government of all socialists parties. Chairman of the supreme council of national economy in 1918–20 and 1923–24, in 1921–24 he was deputy chairman of the council of people's commissars, and later chairman. A member of the Politburo, he became a leading member of the RIGHT OPPOSITION. He was executed following the last show trial of the GREAT PURGE.

Ryskind, Morris (“Morrie”) (1895–1985) American comedy writer. Ryskind collaborated with playwright George S. KAUFMAN on a series of MARX BROTHERS stage and screen hits, including *Cocanuts*, *Animal Crackers* and *A Night at the Opera*. He share the 1932 PULITZER PRIZE for drama with Kaufman for the

musical *Of Thee I Sing*. A socialist in his youth, he later became a staunch anti-communist. In 1947, he testified before the HOUSE COMMITTEE ON UN-AMERICAN ACTIVITIES on communist infiltration of the Screenwriters Guild. He went on to become a member of the JOHN BIRCH SOCIETY and to write a politically conservative column for the *Los Angeles Times* from 1960 to 1971.

Ryun, James (“Jim”) Ronald (1947–) American track and field star. Ryun was born in Wichita, Kansas, and was the first athlete to break the four-minute mile while still in high school. Although he held many world records during the 1960s and in 1966 was named sportsman of the year by *Sports Illustrated*, he never won an Olympic medal. A fall during the 1968 Olympics ended his chance for a medal. After retiring as an active competitor, Ryun founded the Jim Ryun Distance Running Camps to help develop young runners, and was active in philanthropic causes. In 1996 Ryun was elected to the House of Representatives as a Republican from Kansas. (See also OLYMPIC GAMES.)

S

Saarinens, Eero (1910–1961) Finnish-born American architect whose varied and imaginative work in both furniture design and architecture was a significant part of the design scene in the 1950s. The son of famous Finnish architect Eliel SAARINEN, who relocated in the U.S. in 1923, Eero Saarinen grew up at Cranbrook Academy where his father was a principal teacher. He planned to become a sculptor and studied in Paris from 1930 to 1931, but returned to study architecture at Yale. He graduated in 1934 and worked briefly for Norman BEL GEDDES before returning to Cranbrook. Saarinen worked there with Charles EAMES and won two first prizes with him in the 1940 Organic Design in Home Furnishing competition, organized by the MUSEUM OF MODERN ART in New York. As an architect, Saarinen began in partnership with his father in 1936 and often worked with Robert F. Swanson as associate or partner (from 1944 to 1947). In 1939 Saarinen, Swanson, and Saarinen won a national competition for a never-built Smithsonian Gallery of Art for Washington, D.C. A number of distinguished schools, a 1942 church in Columbus, Indiana, and the music shed at Tanglewood, Massachusetts, were among the projects completed before the death of the elder Saarinen.

Thereafter, Eero carried on the practice in his name alone, with Joseph Lacy, John Dinkeloo and Kevin Roche as partners. The General Motors Technical Center (1948–56) at Warren, Michigan, is designed in a severe

INTERNATIONAL STYLE. In later work, Saarinen took pride in developing a unique design direction for each project, never adopting a personal style to be applied to every project. Nevertheless, all his buildings share a quality that might be described as sincerity, a directness and simplicity along with a certain poetic sensibility. Important works in a sculptural vocabulary include MIT's Kresge auditorium (a huge spherical triangle touching the ground at only three points) and a cylindrical, brick chapel (1953–55) in Cambridge, Massachusetts, as well as the Yale Hockey Rink (1953–59) in New Haven and the TWA passenger terminal (1956–62) at Kennedy Airport in New York. More restrained are the CBS tower (1965) in New York and the John Deere office building (1965) in Moline, Illinois, which were both completed after Saarinen's death. One of his last designs, the main building of northern Virginia's Dulles International Airport (completed 1963) combines the restrained and the sculptural directions in his work with a vast, curving, cable-suspended roof hanging between sloping concrete supports.

Saarinens, Eliel (1873–1950) Leading architect of the national Romantic movement in Finland who built a second career in a more modernist direction after relocating in the U.S. in 1923. Born in Rantasalmi, Finland, Saarinen was trained at the Helsinki Polytechnic. His early work was done in partnership with Herman Gesselius and Armas Lindgren, themselves lead-

ers in Finnish architecture of the early 20th century. Their offices and houses in Hvittrask are fine examples of the Romantic style at its best. Saarinen alone was responsible for the executed design of the Helsinki Railway Station (1910–14), a building that brought him international fame. His second-prize design in the 1922 competition for the Chicago Tribune Building received critical acclaim and led to his coming to the United States. He became associated with Cranbrook Academy in 1925, designed its buildings and taught architecture there, eventually becoming its president (1932–46). Frequently, he designed interiors, furniture, lighting fixtures and other decorative elements for his buildings, working in a vocabulary that combined MODERNISM, a craft orientation and a decorative style relating to the ART DECO work of the 1930s. He practiced alone and then in partnership with his son Eero SAARINEN, producing a number of distinguished buildings, such as a 1942 church in Columbus, Indiana, and the shed at Tanglewood, Massachusetts, which combined the rigors of INTERNATIONAL STYLE modernism with a delicacy and charm that stemmed from the Scandinavian Romantic movement of his early career.

Saarland Small German state between the French frontier and the German state of Rheinland-Pfalz; drained by the Saar River, its capital is Saarbrücken. The Saar became the 10th state of the Federal Republic of Germany (WEST GERMANY) in 1957. After

GERMANY's defeat in WORLD WAR I, the Treaty of VERSAILLES (1919) assigned the Saarland's coal mines to France for 15 years. The region was returned to Germany's Third Reich in 1935. After HITLER claimed France's Lorraine in 1940, he combined the two regions under the name Westmark. Heavy fighting between the Allies and Germans took place along the Saar River in December 1944. The Saarland fell within the French occupation zone after the war.

Saba, Umberto (1883–1957) Italian poet. Born in Trieste under the Austro-Hungarian Empire, Saba was trained as a clerk and primarily self-educated. His first verses appeared in 1911 and 1912. Saba was a close friend of Italo SVEVO, who shared his profound interest in Freud. Due to his Jewish heritage, during WORLD WAR II he was forced to close the small antiquarian bookshop that supported him to live in exile in France and Italy, where he was sheltered by Eugene MONTALE, among others. The definitive 1961 edition of his *Canzoniere* (*Songbook*) comprised three volumes, corresponding to the poems of his youth, maturity and old age. A lyric autobiography, it was continually revised over the years. *Storia e cronistoria del Canzoniere* (1948, *History and Chronicle of the Songbook*) is a systematic self-criticism of his own poetry.

Sabin, Albert Bruce (1906–1993) Polish-American microbiologist. Born in Bialystok, Russia (now Poland), Sabin immigrated to the U.S. with his family in 1921 and was naturalized in 1930. He attended New York University, receiving an M.D. in 1931. Becoming a medical researcher, he was on the staff of the Rockefeller Institute before becoming a member of the college of medicine at the University of Cincinnati in 1939. He was appointed research professor of pediatrics there in 1946. Sabin is known for his development of an oral live-virus vaccine against poliomyelitis. Mass field tested in 1959, the vaccine has now largely replaced the earlier killed-virus vaccine developed by Jonas SALK. It gives a stronger and longer-lasting immunity than the earlier vaccine and protects against both paralysis and infection. Sabin concentrated on cancer research in his later work.

Sabra and Shatila massacre (September 16, 1982) Following the PLO evacuation of BEIRUT, Lebanese Christian militiamen attacked the Sabra and Shatila refugee camps in West Beirut and killed hundreds of the inhabitants. ISRAEL came under international criticism for the attacks because the Christian militia were considered its allies, and Israeli complicity was suspected. Israel itself conducted an investigation into the atrocities, which led to the resignation of several Israeli military officers who had been stationed in the region. Israeli defense minister Ariel SHARON was also forced to resign.

Sacco and Vanzetti case Long, controversial U.S. criminal case in which two Italian-born American anarchists were convicted of murder and executed after lengthy, well-publicized legal appeals and international protests about the conduct of the trial. In May 1920 Nicola Sacco and Bartolomeo Vanzetti were arrested and charged with the armed robbery and murder of two employees of a shoe factory in South Braintree, Massachusetts. The evidence at trial was not substantial, and the trial judge made a number of prejudicial rulings at the trial, in which they were convicted and sentenced to the electric chair. Alarmed at the possible miscarriage of justice extensive appeals were taken, and the pair received support and publicity among liberals and immigrants in the U.S. At the time the U.S. was caught up in a hysterical anti-Red campaign led by Attorney General Palmer, who had presidential ambitions. Critics charged that the pair were convicted without evidence merely because they were avowed anarchists. The case also received considerable attention in the U.K. and in Europe. The legal appeals lasted six years, and in a highly unusual move the governor of Massachusetts appointed a commission headed by the president of Harvard University to review the judicial process. The commission sustained the trial verdict, though it criticized the conduct of the trial judge. Despite protests and street demonstrations Sacco and Vanzetti were executed in August 1927. The execution provoked more demonstrations both within the U.S. and abroad.

Sachs, Nelly (Leonie) (1891–1971) German-born Jewish poet. As a young

girl, Sachs began corresponding with the novelist Selma Lagerlöf, who was later instrumental in helping Sachs and her mother flee Nazi GERMANY in 1940. Although Sachs had written traditional, romantic poetry as a young woman, she is best known for work written after she escaped to Sweden. These collections include *In den Wohnungen des Todes* (In the habitations of death, 1946) *Und Niemand weiss weiter* (And no one knows how to go on, 1957) and *Flucht und Verwandlung* (Flight and transformation, 1959). Her poems recall the horrors of the HOLOCAUST and the suffering of the Jewish people, often with mystic imagery. Sachs also wrote the plays *Eli: Ein Mysterienspiel vom Leiden Israels* (*Eli: A Mystery Play of the Sufferings of Israel*, 1951) and *Zeichen im Sand* (*Marks in the Sand* 1962), among others. Sachs shared the 1966 NOBEL PRIZE in literature with S. Y. AGNON.

Sachsenhausen Village in eastern Germany's state of Brandenburg, about five miles north of Berlin. It was infamous as the site of a Nazi CONCENTRATION CAMP, established during the 1930s. In April 1945, as the Soviet army advanced toward BERLIN, the German authorities evacuated the camp and forced its 40,000 inmates—many near death—to march out of the path of the Soviet juggernaut.

Sackville-West, Vita (Victoria Mary) (1892–1962) British poet and novelist. Sackville-West portrayed her childhood home in Kent in *Knole and the Sackvilles* (1922) and in her best-known novel, *The Edwardians* (1930). Her poetry includes *The Land* (1926), which won the Hawthorndon Prize, and *Collected Poems* (1933). Sackville-West met Virginia WOOLF in 1922. The two became lovers, and the relationship was the inspiration for Woolf's *Orlando* (1928). Sackville-West's lifestyle and unconventional relationship with her husband, Nigel Nicolson, whom she married in 1913, have been much written about—notably by their son, Nigel Nicolson, in *Portrait of a Marriage* (1973).

Sadat, (Mohammed) Anwar el- (1918–1981) President of EGYPT (1970–81). The son of a poor government clerk and his half-Sudanese wife, Sadat was

one of 13 children. He received his earliest education from an Islamic cleric and earned a lifetime reputation for piety. He graduated (1938) from the Royal Military Academy, which had previously been reserved for the aristocracy. During WORLD WAR II he was imprisoned by the British for opposing their policy in Egypt. He later joined the FREE OFFICERS movement and took part in the coup against King FAROUK led by Gamal Abdel NASSER. He subsequently held a variety of posts leading to the vice presidency (1969) and succeeded to the presidency on Nasser's death (1970). During Nasser's rule, Sadat had been widely regarded as a weak figure and was dismissed by some critics as "Nasser's poodle." Many thought he would be merely an interim president, but he quickly consolidated his power. In 1972 he reversed Nasser's policy of close ties to the USSR and expelled the Soviet military advisers from Egypt. Like Nasser, he initially took a hard line against ISRAEL. He coordinated the Arab surprise attacks on Israel in October 1973, which resulted in a disastrous defeat for Egypt (see ARAB-ISRAELI WAR of 1973). With the intercession of U.S. secretary of state Henry KISSINGER'S SHUTTLE DIPLOMACY, he agreed to terms for a disengagement with Israel in January 1974. Efforts for a more comprehensive peace made only limited progress until 1977, when Sadat boldly followed up Israeli hints and made a sudden surprise visit to JERUSALEM to meet with Israeli premier Menachem BEGIN and address the Knesset. This action initiated the peace process that led to the CAMP DAVID ACCORDS of 1978, sponsored by U.S. president CARTER. For his role in establishing peace with Israel, Sadat shared the 1978 NOBEL PRIZE for peace with Begin. But while Sadat won enormous respect in the U.S. and other Western nations, many Arabs denounced him as a traitor to the Arab cause. The peace with Israel, the erratic pace of economic progress and the Westernization of some segments of Egyptian society were accompanied by increasing Islamic fundamentalist unrest. Sadat responded with a widespread crackdown on Muslim extremists in September 1981. On October 6, while he was reviewing a military parade in Cairo, a small band of commandos in the parade dismounted from their

truck and fired into the reviewing stand, killing Sadat and several other officials. Sadat was regarded as a complex man, a humble autocrat of unusual flexibility, whose unquestioned dignity and undeniable warmth made him a formidable politician and world statesman.

Sadler, Barry (1941–1989) American singer-songwriter. While serving as a U.S. Special Forces medic in VIETNAM during the VIETNAM WAR, he wrote and recorded "The Ballad of the Green Berets." This tribute to the special forces became the number-one song in the U.S. for five weeks in 1966. In 1988, while training anticommunist Nicaraguan CONTRA guerrillas in Guatemala, he was shot in the head and paralyzed. He subsequently died as a result of wounds.

Sagan, Carl (1934–1996) One of the best-known astronomers in America, Sagan did much in his many television appearances to put astronomy and the space program before the American people. He received his Ph.D. at the University of Chicago in 1960 and in 1968 became associate professor of astronomy and director for planetary studies at Cornell University. Although Sagan's primary interests were planetary surfaces and atmospheres, an area in which he did much respected scientific work, he also did pioneering studies in the possibilities of extraterrestrial life. A vocal and untiring advocate of both the romantic and popular sides of science, Sagan is the author of many popular books, including two outside the field of astronomy, *The Dragons of Eden* and *Broca's Brain*.

Sagan, Françoise (Francoise Quoirez) (1935–2004) French novelist, playwright and screenwriter. Sagan made a sensation with her first novel, *Bonjour tristesse* (*Hello, Sadness*, 1954; filmed 1958). Written when she was 18, the novel was critically acclaimed as well as a *succès de scandale* for its dispassionate tone and depiction of a young woman breaking up her father's affair. Her second novel, *Un certain sourire* (*A Certain Smile*, 1956; filmed 1958), enjoyed similar success, but her subsequent fiction was never as successful or admired. Later works included *Incidental*

Music; Stories (1983) *Avec mon meilleur souvenir* (1984) and *Un Chagrin de passage* (1994). Sagan also wrote plays and screenplays of her own novels as well as those of others.

Sagdeyev, Roald (1933–) Soviet scientist. As head of Russia's Institute for Space Research (IKI) Sagdeyev is credited with breathing new life into the Soviet space program in the early 1970s. Under his direction the program not only became more open but also realized such spectacular successes as the *Venera 9* and *10* projects to Venus and the Vega mission to Halley's Comet.

Sahrawi Arab Democratic Republic (SADR) Essentially a government-in-exile, the SADR lays claim to—but does not actually control—the western half of WESTERN SAHARA. In February 1976 Spain terminated its colonial rule of the region (then called Saguia el Hamra and Río de Oro), and granted the territory its independence. After Spain's complete withdrawal, Mauritania and Morocco both announced their annexation of the territory. Morocco's declaration had been foreshadowed for several months by the appearance of Moroccan military forces and political administrators in Western Sahara, which occurred with the tacit acceptance of the Spanish colonial authorities. Before the end of Spanish rule, Mauritania had served as the base of operations for POLISARIO (Popular Front for the Liberation of Saguia el Hamra and Río de Oro), a political-military organization dedicated to the independence of the Western Sahara. However, this alliance quickly fractured when it became evident that Mauritania—which had also dispatched forces to Western Sahara—did not intend to hand power over to Polisario but instead sought to annex those parts of the country it controlled. As a result Polisario transferred its base of operations to Algeria in 1976, established a government-in-exile, which claimed the legitimate right to rule the Saharawi Arab Democratic Republic and waged a guerrilla campaign against both Morocco and Mauritania. In 1979 Mauritanian forces withdrew from the regions they controlled and were replaced by Moroccan forces. In 1991 both Polisario and Morocco agreed to a

UN-sponsored truce. Although a UN peacekeeping force was permitted to enter the country with the consent of the warring parties, the referendum in the Western Sahara, which was supposed to occur six months following the implementation of the cease-fire in 1991, has yet to occur, and the fate of the SADR remains uncertain.

Sahel Region of Africa south of the Sahara, with the savannas to the south. The nations of MALI, NIGER, CHAD and SUDAN fall largely within the Sahel. The Sahel was the site of much human misery during the latter half of the 20th century. In the late 1960s, a prolonged drought devastated local agriculture and brought severe famine to the region.

Sahl, Mort (1927–) Born in Montreal but raised in Los Angeles, California, Sahl was one of the most influential stand-up comedians of the 1950s and '60s. After working at an Alaskan air force base and graduating from the University of Southern California in 1950, Sahl began to perform stand-up in San Francisco. In contrast to the "normal Vegas comic," Sahl developed a unique style that used a casual, free-form technique, which included stream of consciousness, ad-libs, political commentary and his trademark prop—a rolled up newspaper. Labeled a "Will Rogers with fangs," Sahl mercilessly remarked about presidents (Eisenhower, Nixon and Kennedy), politicians (McCarthy) and virtually anyone else in the public eye. In the 1970s Sahl focused his attention on writing for television and film, performing with less regularity. In 1988 he had a brief but successful one-man show on Broadway. Today Sahl is acknowledged as the leading influence on comedians Lenny BRUCE, Woody ALLEN and countless others.

Said, Edward (1935–2003) Palestinian-born scholar and political activist. Said was born in 1935 in Jerusalem, the capital of the British Mandate of Palestine administered under the auspices of the LEAGUE OF NATIONS. Following the 1947 partition of Palestine, Said's family left to live with relatives in Cairo, Egypt. After receiving a B.A. from Princeton University in 1957 and a Ph.D. from Harvard University in 1964, Said taught

Political commentator and professor Edward Said, 1980 (SOPHIE BASSOULS/CORBIS SYGMA)

comparative literature at Columbia University. He initially developed a reputation as a literary scholar with the publication of *Joseph Conrad and the Fiction of Autobiography* (1966), a work that identified fictional elements within Conrad's letters and autobiographical elements within Conrad's fiction. Said's increasing interest in what he regarded as the persistence of Western imperialist influences in the Arab world, led Said to found the new field of postcolonial studies, which united several academic disciplines. Said began to develop his new theoretical stance in *Orientalism* (1978), which examined the evolving image in the West of Arab civilization and Islam. Said's later works, such as *The Question of Palestine* (1979) and *Covering Islam* (1981), continued his efforts to examine Western stereotypes of the Arab and Islamic world and the Palestinian people's struggle for self-determination. In 1991 he resigned from the Palestinian National Council in protest against the emerging Palestinian-Israeli peace process that culminated in the 1993 Oslo Accords. Said insisted that the only just and effective path to peace in the Middle East would be an international campaign of sanctions and diplomatic pressure against Israel, modeled on the international campaign mounted against South Africa to force it to terminate the system of APARTHEID. Said favored the creation of a single secular state in Palestine in which Arabs and Jews would enjoy

equal rights of citizenship, again citing the precedent of the solution reached in South Africa between African National Congress leader Nelson MANDELA and National Party leader F. W. DE KLERK. In October 3, 2003, Said died after a 12-year struggle with leukemia.

Saigon (Ho Chi Minh City) Former capital city of the former South VIETNAM; on the right bank of the Saigon River, north of the Mekong River delta. Originally a settlement of the Khmer people, its history dates back many centuries. It was the capital of French INDOCHINA from 1887 to 1902. As a result of long French settlement in the 19th and 20th centuries, Saigon's architecture is more European than Asian. After the French withdrawal, Saigon became the capital of the new nation of South Vietnam in 1954. During the VIETNAM WAR it served as the command headquarters for U.S. forces in the country. It was infiltrated and attacked by the VIET CONG during the TET OFFENSIVE (1968). When the North Vietnamese broke through South Vietnamese lines in April 1975, panic struck Saigon as thousands of Vietnamese attempted to flee the city. The U.S. organized a hasty evacuation for U.S. personnel and as many endangered South Vietnamese (those who had worked closely with the U.S.) as it could accommodate. The city fell to the communists on April 30, 1975. The victorious North Vietnamese renamed Saigon after the venerated communist leader, HO CHI MINH.

St. Denis, Ruth (Ruth Dennis) (1879–1968) American dancer, choreographer and teacher. A founder of the American modern dance movement, St. Denis achieved fame as a choreographer/dancer with her work *Radha* in 1906. After successful solo dance tours of Europe (1906–09) and America (1909–10), she teamed with and married Ted SHAWN (1914). They founded Denishawn School and Dance Troupe (1915) where such great dancer/choreographers as Martha GRAHAM got their start. She also founded the dance department at Adelphi College (1938), appeared at the JACOB'S PILLOW DANCE FESTIVAL (1949–55) and gave lecture/dance performances throughout the country. Among her famous choreographic works, many of which are

based on Eastern religions and cultures, are *Cobras*, *Nautch* and *Incense*.

Saint-Exupéry, Antoine de (1900–1943) French aviator, novelist, travel writer and children's book author. Saint-Exupéry was educated at a Jesuit college in Le Mans and at the College of Saint Jean in Fribourg. He served in the French air force from 1921 to 1923 and flew in Morocco. Saint-Exupéry remained in North Africa as a pilot for the Air Mail Service, which experience formed the basis for his first book, *Courrier Sud* (1929). He next moved to Argentina, where he headed an air mail service there. His writing career was established with the international success of his novel *Night Flight* (1931), which dealt with the tragic death of a mail pilot. Saint-Exupéry attempted to set a time record for a flight from Paris to Saigon but crashed in the Arabian desert; the story of his survival is recounted in *Wind, Sand and Stars* (1939). *The Little Prince* (1943) is his classic children's story. He died in 1943 while serving as a reconnaissance pilot over North Africa for the American forces during WORLD WAR II.

St. Jacques, Raymond (James Arthur Johnson) (1930–1990) American actor. He helped lower racial barriers for other black actors with his performances in numerous films and television shows. His films include *Black Like Me* (1964), *The Pawnbroker* (1965), *The Green Berets* (1968) and *Cotton Comes to Harlem* (1970). He also appeared on the TV western series *Rawhide* in the 1960s and in the mini-series *Roots* (1977).

Saint Jean de Maurienne Agreement A secret agreement reached in April 1917 by representatives of the British, French, Italian and Russian governments regarding post-World War I territorial arrangements. It promised to give Italy a part of Turkey, but was never implemented. In 1918 the BOLSHEVIK government of Russia revealed the understanding, leading to Greek and Turkish distrust of Italy.

Saint Kitts and Nevis Located at the northern end of the Leeward Islands chain of the West Indies, the federation comprises St. Kitts (formerly known as St. Christopher [6.5 square

miles) and Nevis (36 square miles). The two islands are divided by a 2-mile-wide sea strait known as the Narrows. Both islands are volcanic in origin and are dominated by mountains that rise to 3,793 feet (at Mount Misery on St. Kitts) and 3,232 feet on Nevis. Over 75% of the population of 40,000 live on St. Kitts. The British joined Anguilla administratively to the other two islands in 1816. Universal suffrage was granted in 1951, and in 1967 the territory attained full internal self-government. Robert Bradshaw, leader of the ruling Labour Party, became premier. In 1967 Anguilla declared itself independent of St. Kitts. British troops intervened in 1969, and in 1971 the island reverted to being a

British dependent territory; it was formally separated from St. Kitts–Nevis in 1980.

Bradshaw died in May 1978 and was succeeded by Paul Southwell, who also died a year later. New premier Lee Moore called elections for February 1980, but the Labour Party lost and was replaced by a coalition of the People's Action Movement (PAM) and the Nevis Reformation Party (NRP), which sought greater autonomy for Nevis. Dr. Kennedy Simmonds of the PAM became premier and then prime minister on the attainment of full independence from Britain on September 19, 1983. The PAM-NRP coalition remained in power after winning general elections in 1984 and 1989, in spite of the PAM

SAINT KITTS AND NEVIS

1871–1956	The islands become part of the Leeward Islands Federation.
1951	Universal adult suffrage is granted.
1958–62	The islands become part of the Federation of the West Indies.
1967	St. Kitts, Nevis and Anguilla achieve internal self-government within the Commonwealth, with Robert Bradshaw, Labour Party leader, as prime minister.
1971	Anguilla returns to British dependency status after rebelling against domination by St. Kitts.
1980	The People's Action Movement (PAM) and the Nevis Reformation Party (NRP) centrist coalition government, led by Kennedy Simmonds, are formed after an inconclusive general election.
1983	The nation's first constitution proclaims the Federation of Saint Christopher and Nevis; Saint Christopher and Nevis becomes a member of the Commonwealth.
1984	In House of Assembly elections, the ruling coalition of the PAM and the NRP is returned to power with a decisive victory.
1988	The country is officially renamed the Federation of Saint Kitts and Nevis.
1989	The ruling PAM-NRP coalition returns to power after losing one seat in House of Assembly elections.
1998	A popular referendum proposing the secession of Nevis fails to gain the required two-thirds majority, leaving the federation intact.
2005	Due to unprofitability the government decides to shut down the islands' sugar industry.

achieving a clear majority of seats in the national assembly. A separatist movement in Nevis failed as a result of a 1998 referendum that fell far short of the two-thirds majority vote required for independence.

St. Laurent, Louis Stephen (1882–1973) Canadian political leader, prime minister of CANADA (1948–57). Born in Compton, Quebec, St. Laurent attended Laval University and was a well-known corporate lawyer before entering political life in 1941. He was minister of justice, attorney general and minister of external affairs (the latter post, 1946–48) during the administration of MacKenzie KING. In 1948 he succeeded King in the post of LIBERAL PARTY leader and became prime minister in November of that year. While St. Laurent was in office, Canada assumed a larger role on the world stage, Newfoundland became a province (1949), the Old Age Security Act was enacted (1951) and the ST. LAWRENCE SEAWAY was agreed upon and partially constructed. As the country swung to the Conservatives, the Liberals failed to

obtain a majority in the 1957 election, and St. Laurent was succeeded as prime minister by John G. Diefenbaker. He retired as party head in 1958 and returned to his law practice.

Saint Laurent, Yves (1936–) French fashion designer sometimes regarded as the “king of fashion” for his enormous success based on design that is practical, charming or pretty while still expressive of haute couture style. Saint Laurent was an art student in Paris when, at the age of 17, he won a fashion sketch contest staged by the International Wool Secretariat. At 19 he was employed by Christian Dior, becoming head designer for that house on Dior's death in 1958. With the support of an American financial backer, he opened his own firm in 1962, established his ready-to-wear line, Rive Gauche, in 1966 and added men's wear design in 1974. His work is known for its practical qualities, along with a certain glamour and occasional exotic touches based on oriental art and

gypsy and African motifs. His name and YSL initials have become a recognized brand name, licensed with vast commercial success to cosmetics, linens, perfumes (including the popular Opium and Y), sweaters and other products. Saint Laurent was honored with a retrospective exhibit of his work in 1983 at the Costume Institute of the Metropolitan Museum of Art in New York. In 1996 Saint Laurent made two critical professional decisions: to broadcast his haute couture fashion show on the Internet and to cease production of large fashion shows for his pret-à-porter line. On June 2, 1999, the Council of Fashion Designers of America honored Saint Laurent with its Lifetime Achievement Award. Five months later, Gucci purchased the Saint Laurent line for \$1 billion. He announced his retirement in 2002.

Saint-Laurent-sur-Mer Town on the bay of the Seine River, eight miles northwest of Bayeux. For two weeks in June 1944 it was the busiest harbor in Europe, courtesy of the Allied invaders of NORMANDY in WORLD WAR II. A large

artificial harbor, towed by the invasion fleet from England, was later greatly damaged by a severe gale—but not until it had successfully landed a great deal of ordnance, artillery and heavy-duty war matériel.

St. Lawrence Seaway International waterway along a part of the boundary between the U.S. and Canada; a link between the Great Lakes and the Atlantic Ocean, the seaway is comprised of a system of locks, dams and canals on the St. Lawrence River and channels that connect the river with the Great Lakes. Measuring 2,342 miles in length, it was opened in 1959. The seaway allows large ocean-going ships passage to such inland cities as the U.S.'s Buffalo, Chicago, Detroit and Milwaukee, and Canada's Montreal, Hamilton, Thunder Bay and Toronto. It accommodates vessels up to 730 feet long, with a cargo capacity of up to 28,000 tons. Of great commercial importance, the seaway handles annual traffic of approximately 50 million short tons (45 million metric tons). It also provides for hydroelectric facilities.

Saint Louis Symphony Founded in 1880, the symphony of St. Louis, Missouri, has the distinction of being the second-oldest in the United States. Among its distinguished conductors was Rudolph Ganz, one of America's most noted music educators, who was also a distinguished composer. In St. Louis, Ganz introduced concerts for children. *TIME* magazine, in its annual evaluation for 1988, described the St. Louis Symphony as second only to the CHICAGO SYMPHONY in musical quality. This distinction has come about mainly through the efforts of its current conductor, Leonard Slatkin, who is also known as a masterful advocate of contemporary American classical composers.

Saint Lucia Saint Lucia, the second largest island in the Windward group of the West Indies (see map on page 1086), is situated in the East Caribbean 24 miles south of Martinique and 20 miles north of Saint Vincent. Ownership of the island alternated between Britain and France many times before it was finally ceded to Britain in 1814.

SAINT LUCIA

1871–1960	St. Lucia joins the Windward Islands Federation.
1951	Universal adult suffrage is granted.
1967	St. Lucia acquires internal self-government as a West Indies associated state.
1979	St. Lucia becomes an independent member of the Commonwealth, with John Compton as prime minister. In general elections, the St. Lucia Labour Party (SLP) wins an upset victory; Allan Louisy is named prime minister.
1981	Prime Minister Louisy is forced to resign.
1982	John Compton takes office as prime minister.
1987	John Compton is reelected prime minister.
1997	Kenny D. Anthony is elected prime minister, ending 15 years of government leadership by Compton and the UWP.
2004	Prime Minister Anthony announces that he will run again in the next election.

Universal suffrage was introduced in 1951 and full internal autonomy in 1967. Elections in 1974 were won by the ruling United Workers' Party (UWP), led by John Compton; it campaigned for full independence, which was attained on February 22, 1979. The UWP was defeated in elections held shortly afterward by the St. Lucia Labour Party (SLP), led by Allan Louisy. In May 1981 Louisy was forced to resign, leading to the collapse of the SLP government in January 1982 amid strikes and demonstrations. Fresh elections were won overwhelmingly by the UWP, and Compton returned as prime minister. In elections held in 1987 the UWP was returned to power, but with a majority of only one seat over the SLP. Compton called a new election for later the same month, hoping to obtain a more decisive mandate, but the distribution of seats remained the same. In 1997 Anthony and his SLP coalition registered the largest victory in the nation's history by defeating Compton and the UWP. In 2004 Anthony announced that he would seek a third term in the next general election.

Saint Malo Conference A December 4, 1998, meeting between British prime minister Tony BLAIR and French president Jacques CHIRAC. Blair and Chirac met in the resort town of Saint Malo on the French side of the English Channel to evaluate proposed efforts by the EUROPEAN UNION (EU) to form a multinational military force capable of being dispatched as a peace-keeping force to troubled regions within Europe and the world. Since the formation of the European Community, Britain had steadfastly resisted all French efforts to create a European organization outside NATO. After conferring for several days, both Blair and Chirac issued a joint statement that advocated a common European Security and Defense Policy (ESDP), which would commit all EU member states to the same foreign policy toward regions like KOSOVO, in which Serbian president Slobodan MILOŠEVIĆ was seeking to expel all ethnic Albanians. The ESDP also gave its assent to earlier French efforts to form an EU-wide rapid reaction force (see WESTERN EUROPEAN UNION) for deployment within Europe and even suggested that such a

force could be dispatched abroad to protect the EU's interests throughout the world.

Saint Martin (Sint Maarten) One of the Leeward Islands, in the West Indies east of Puerto Rico, divided between the Dutch and the French. Dutch Sint Maarten is in the south of the island; it is associated with the NETHERLANDS ANTILLES. The French section is associated with GUADELOUPE. Marigot is the capital of the French Saint-Martin, while Dutch-speaking Philipsburg is the chief town of Sint Maarten. A popular tourist destination, the island is visited by many cruise ships.

St. Petersburg City in the northwest USSR, on the Gulf of Finland. Commonly called "the Venice of the North," St. Petersburg occupies both banks near the mouth of the Neva River as well as numerous small islands in the Neva. Built at the beginning of the 18th century under Czar Peter the Great as Russia's "window on the West," the city entered the 20th century as the capital of imperial RUSSIA. The unsuccessful RUSSIAN REVOLUTION OF 1905 against the rule of Czar NICHOLAS II broke out here. After Russia entered WORLD WAR I against Germany, the city's name was Russified; Petersburg became Petrograd (1914). The city figured prominently in the RUSSIAN REVOLUTION of 1917; V. I. LENIN arrived here from Finland to direct the BOLSHEVIKS, who deposed the KERENSKY government at the Winter Palace. With the Bolsheviks in control, the capital was transferred to Moscow (1918). After Lenin's death (1924) Petrograd was renamed Leningrad.

Within a few months after the German invasion of the USSR began (June 22, 1941), HITLER's forces had reached Leningrad and virtually surrounded it. Thus began the SIEGE OF LENINGRAD. At least one million people died in Leningrad during the siege, which lasted for 872 days. The city was subsequently largely restored. Among the city's many architectural and cultural treasures are the Winter Palace, the Hermitage Museum, and the Academy of Arts. Leningrad has always been noted for its literary heritage; in the 20th century it was home to poets Anna AKHMATOVA, Joseph BRODSKY and

Osip MANDELSTAM, as well as composer Dmitry SHOSTAKOVICH. After the breakup of the Soviet Union, the city was renamed St. Petersburg.

Saint-Pierre See MARTINIQUE.

Saint Pierre and Miquelon St. Pierre and Miquelon—93 miles square—are islands in the North Atlantic Ocean that are a relic of France's once-mighty New World empire. The terrain is mostly barren rock; the capital is St. Pierre. The first permanent settlement was established in 1604. The importance of France's last possessions in North America is that they allowed the French to exploit the rich fishing grounds of Newfoundland. Fishing for cod allowed the islands to prosper until the introduction of factory ships, and frozen fish facilities reduced the importance of the islands' harbors. Saint Pierre and Miquelon, off the coast of Canada's Newfoundland, became an overseas territory of France in 1946 and in 1976 was made a department, against the wishes of many of the islanders. General strikes and unrest over departmental status intensified during the late 1970s and early 1980s. In 1976 Canada declared a 200-mile economic interest zone around its shores, prompting the French to declare a similar zone around Saint Pierre, although the Canadians recognized only a 12-mile limit. In 1987 it was agreed to take the dispute to the International Court of Justice. However, in October negotiations over future fishing quotas broke down, and French vessels were banned from Canadian waters. In April 1988 several fishermen and island politicians were arrested by Canadian authorities for fishing in Canadian waters. The total population of the islands is 6,300. Although the islands' economy had been steadily declining because of disputes between Canada and St. Pierre over fishing rights, a 1992 arbitration panel designated an economic zone of more than 12,000 square kilometers as the exclusive domain of the island territory. The French government hoped that this economic ruling, along with a projected increase in tourism and indications of substantial oil reserves beneath the sea floor of this economic zone, would improve the quality of life in St. Pierre and Miquelon.

St. Valentine's Day Massacre Sensational gangland execution that occurred in a Chicago garage on St. Valentine's Day, 1929. Dressed in police uniforms, gunmen in the employ of Al CAPONE machine-gunned seven men connected with the gang of George "Bugs" Moran. It was one of the most vicious and violent crimes of a vicious and violent era. The massacre was thought to have been perpetrated in reprisal for a whiskey hijacking, and it effectively wiped out an important Capone rival.

Saint Vincent and the Grenadines

The Windward Islands nation of St. Vincent and the Grenadines lies in the east Caribbean, 93 miles west of Barbados; it has a total area of 150 square miles, most of it being the chief island (see map, page 1086), St. Vincent. Universal suffrage was introduced in 1951 and full internal self-government in 1969. Elections in 1972 resulted in the People's Political Party (PPP) and the St. Vincent Labour Party (SVLP) each winning six seats in the House of Assembly. The balance of power was held by an independent, James Mitchell, who joined the PPP to form a government with himself as premier. Mitchell's government collapsed in 1974 and was replaced after elections by a coalition of the PPP and SVLP, whose leader, Milton Cato, led the country to full independence from Britain on October 27, 1979. Discontent at the government's record and failure to improve the economy led to its defeat in 1984 by the New Democratic Party (NDP), founded by Mitchell. Mitchell became prime minister and strengthened the NDP's position by polling 71 percent of the vote and winning all 15 seats in the house of assembly in elections in May 1989. In 1994 and 1998 Mitchell and the NDP again won reelection at the polls, but their victories came from steadily declining majorities. Mitchell's resignation and replacement in 2000 by Arniham Eustace preceded a rash of antigovernment uprisings in response to the NDP's effort to increase retirement pensions for parliamentary delegates. In response, the government moved up national elections from 2003 to 2001, and in 2001 ULP leader Ralph Gonsalves was elected prime

SAINT VINCENT AND THE GRENADINES

1951	Universal adult suffrage is granted.
1958–62	The islands become part of the West Indies Federation.
1969	The islands achieve internal self-government.
1979	St. Vincent and the Grenadines becomes fully independent as a special member of the Commonwealth. In House of Assembly elections Prime Minister Milton Cato's St. Vincent Labour Party wins 11 of 13 seats.
1984	In general elections the New Democratic Party, led by James F. Mitchell, wins nine of 13 House of Assembly seats, while the St. Vincent Labour Party wins only four. Cato steps down, and James F. Mitchell takes office as prime minister.
1989	The New Democratic Party takes all elective seats in the House of Assembly. James Mitchell retains the prime ministership.
1994	The New Democratic Party, holds onto 12 seats in the house, and Mitchell is again selected as prime minister.
1998	The New Democratic Party, headed by James Mitchell, narrowly wins a fourth term.
2000	Mitchell resigns and is succeeded by his finance minister, Arniham Eustace.
2001	The St. Vincent Labour Party wins 12 seats in the House of Assembly and Ralph Gonsalves becomes prime minister.
2005	Prime Minister Gonsalves and his Unity Labor Party win a second term in office.

minister. In 2005 Gonsalves and his Unity Labor Party won a second term.

Saipan Volcanic island in the MARIANAS of the western Pacific; under U.S. control, a part of the UN-established Trust Territory of the Pacific Islands. A Spanish possession from 1565 to 1899 and German from 1899 to 1914, in 1920 the 47-square-mile island was mandated to JAPAN with the other Marianas by the LEAGUE OF NATIONS. Its air base was a prime U.S. target in WORLD WAR II. The strategic surprise of the American invasion in June 1944 caught the Japanese unprepared (and also lured the Japanese Combined Fleet out of Philippine waters). The lessons learned by Japan's doomed garrison were put to use in the later defense of IWO JIMA and OKINAWA—to the misfortune of the Americans. Total American casualties on Saipan were over 14,000, while 24,000 Japanese were killed or committed suicide—and only 1,780 were taken prisoner (more than half of them Korean). The U.S. used Saipan as a base for attacking the Japanese mainland.

Sakdal Uprising (1935) Sakdal, meaning “accuse” in Tagalog, a major Philippine language, signified the anger of the landless peasants in central Luzon. Many joined the Sakdal movement led by Benigno Ramos calling for lower taxes, land reform and independence. As a party, the Sakdals drew many votes in the 1934 Philippine elections. On May 2, 1935, armed Sakdals seized government buildings in 14 towns in Luzon. Government troops quickly suppressed the rebellion, Ramos escaped to Japan, and the party was declared illegal.

Sakhalin Long, narrow island off the Pacific coast of Russia; separated from the Soviet mainland by the Tatar Strait, Sakhalin's eastern shores are bordered by the Sea of Okhotsk. North of the Japanese main island of Hokkaido, it was colonized by both Russia and Japan in the 18th and 19th centuries. The population became mostly Russian after 1875. Sakhalin was a penal colony for common criminals as well as a place of exile for political opponents of the czarist government; the noted Russian

author Anton CHEKHOV visited Sakhalin and wrote about the conditions there. Sakhalin also served as a center of Russian commercial interests in the Far East. Following its defeat in the RUSSO-JAPANESE WAR, Russia ceded the southern part of Sakhalin to Japan. This territory was returned to the USSR after WORLD WAR II.

Sakharov, Andrei Dmitrievich (1921–1989) Soviet nuclear physicist, dissident and human rights activist. Possibly the most brilliant nuclear physicist of the 20th century, Sakharov played a key role in the Soviet development of the HYDROGEN BOMB in the late 1940s and the '50s. As such, he held a leading position in the Soviet scientific community. However, he eventually became alarmed by the threat of radioactive contamination from nuclear testing and the threat of nuclear war. Increasingly opposed to the Soviet government's policies, he spoke out against human rights abuses and other failures of the Soviet system. Following the international publication of an article titled “Thoughts on

Progress, Peaceful Co-Existence and Intellectual Freedom" (1968), he was shunned by the Soviet establishment. He received the 1975 NOBEL PRIZE for peace for his efforts on behalf of human rights. After he criticized the Soviet invasion of Afghanistan, he and his wife, Yelena Bonner, were exiled to the closed city of Gorky in 1980. There they were frequently harassed by the KGB and were forbidden to communicate with other dissidents and with Westerners. In 1987 they were released on the order of Soviet leader Mikhail GORBACHEV. In the new atmosphere of GLASNOST, Sakharov was hailed by many for his courage and his moral stance, although hard-liners reviled him. He continued to press for political, social and economic change. In April 1989 he was elected to the new Congress of People's Deputies, where he led a reform group. He died of a heart attack on December 14, just after taking part in an important debate in the congress.

Saki (Hector Hugh Munro) (1870–1916) British author of macabre and wryly amusing short stories. He was born in Akyab, Burma, the son of an inspector-general for the Burma police. After a boyhood in English boarding schools, later police service in Burma and travel through the Balkans as a London press correspondent, his satiric columns and short stories began appearing under the pen name "Saki" (the name of the cupbearer in *The Rubaiyat of Omar Khayyam*) in the *Westminster Gazette* and *Morning Post*. Volumes of the stories were *Reginald* (1904), *Reginald in Russia* (1910), *The Chronicles of Clovis* (1911), *Beasts and Super-Beasts* (1914) and two posthumous works, *The Toys of Peace* (1923) and *The Square Egg* (1924). These are stories that, in the words of a Saki character, "are true enough to be interesting and not true enough to be tiresome." They depict a familiar world of overstuffed drawing rooms, gossip garden parties, amateur theatricals, lonely railway carriages and exclusive club rooms—invasion by fierce society matrons, foppish young men, inveterate liars and murderous animals. No sentiment whatever can exist in these savage conditions. Only predators survive—those who, like the great ferret "Sredni Vashtar," lay "special stress on

the fierce, impatient side of things." There are the wolves of "The Interlopers," the were-beasts of "Gabriel-Ernest" and "Music on the Hill," the wicked "romancers" of "The Open Window" and "A Defensive Diamond," and the witches of "The Peace of Mowsle Barton." Were vicious struggles for survival ever portrayed more grimly—yet more comically—than in "The Strategist?" It is, ultimately, a fatalistic vision. "After all," says Reginald, one of Saki's bright young men, "life teems with things that have no earthly reason." Was there, then, a terrible symmetry (or inevitability) about the sniper's bullet that killed Munro on November 14, 1916, while serving in the trenches with the Royal Fusiliers?

Salam, Abdus (1926–1996) Pakistani physicist. Salam helped establish the International Center for Theoretical Physics in Trieste, to assist physicists from developing countries. His own work concerned the behavior and properties of elementary particles, for which he received the 1979 NOBEL PRIZE for physics, in conjunction with Sheldon Glashow and Steven WEINBERG. Through independent work, these three physicists each contributed to a theory that explained weak and electromagnetic interactions, including the phenomenon of neutral currents and their strengths. This "theory" was first confirmed in 1973 at the European Organization for Nuclear Research.

Salam al-Khalidi, Anbara (1897–1986) Lebanese author. A translator and pioneer campaigner for Arab women's rights, in 1927 she became the first Arab woman in greater SYRIA to unveil her face in public. This act necessitated her retirement into private life for a time. In 1929 she married Ahmad Samih al-Khalidi, who at that time was the foremost Arab education official in PALESTINE. The couple collaborated on historical and educational studies. Her books included the first translations into Arabic of Homer's *Odyssey* and Virgil's *Aeneid*.

Salan, Raoul (1899–1984) French soldier and rebel leader. A WORLD WAR II veteran, General Salan was one of FRANCE's most decorated soldiers. During the war, he serviced in the FREE FRENCH forces in FRENCH WEST AFRICA.

He was later with the French army in INDOCHINA (1945–53). However, Salan is remembered as the man who twice brought France to the brink of civil war during the ALGERIAN WAR OF 1954–62. He was senior French officer in Algiers (1956), and in 1958 became commander in chief of the French forces in ALGERIA. His defiance of civilian authority over the Algerian issue in 1958 helped General Charles DE GAULLE topple the Fourth Republic and come to power as the first president of the French Fifth Republic. However, Salan soon disagreed with de Gaulle over France's Algerian policy. In 1960, Salan formed the O.A.S. (Organisation de l'Armée Secrète, or Secret Army Organization) and waged a terrorist campaign to try to kill de Gaulle and prevent Algerian independence. Captured in 1962 and sentenced to life imprisonment, he received amnesty with other plotters in 1968 and was fully pardoned and reinstated in the army in 1982 by President François MITTERRAND.

Salazar, Antonio de Oliveira (1889–1970) Portuguese statesman and dictator (1932–68). Born in a village near Lisbon, he was educated at a seminary, studied law at Coimbra University and became a professor of economics there. He served briefly in the chamber of deputies in 1921 and as finance minister in 1926. Recalled to office in 1928 by General Antonio de Carmona, he assumed complete control of Portuguese finances and soon was able to deal with the nation's chronic economic crises. Becoming premier in 1932, he assumed dictatorial powers. The following year he promulgated a new constitution that governed under fascist-like corporate principles (see FASCISM). He suppressed all dissent and maintained a large army and a vigilant secret police. His foreign policy sought ties with Spain, Great Britain and the U.S. During WORLD WAR II he kept Portugal neutral while maintaining cordial relations with the Allies. He instituted a series of domestic reforms after the war. His latter years were largely spent in a vain attempt to suppress rebellion in Portugal's African colonies. He was succeeded as premier by Marcello CAETANO in 1968 while in a coma following a stroke. Government officials never told him that he had been replaced, fearing that the news might kill him, but kept

up a charade of meeting with him as if he were still in power. Salazar continued to live in the chief of state's official residence until his death.

Salinas de Gortari, Carlos (1944–) Mexican politician and president of Mexico (1988–94). Born in Mexico City, Salinas received his B.A. from the National Autonomous University of Mexico in 1969 and his Ph.D. in political economy and government in 1978 from Harvard University. While serving as director of financial planning, in the mid-1980s, Salinas renegotiated the Mexican national debt, particularly with American creditors, and sharply reduced government expenditures in an effort to solve Mexico's severe financial crisis caused by the decline in oil prices.

When he succeeded Miguel de la Madrid as president of Mexico in 1988, the pursuit of free trade became one of Salinas's primary aims. Along with an effort to sell off Mexico's numerous nationalized industries, Salinas negotiated with U.S. president George H. W. BUSH and Canadian prime minister Brian MULRONEY for the development of a free-trade zone throughout North America. By 1991 the three leaders had developed a rough outline for what became the NORTH AMERICAN FREE TRADE AGREEMENT (NAFTA), which was signed by the three leaders in December 1992 and ratified by their parliaments in 1993; the first stage of the proposed free-trade zone went into effect in January 1994.

In November 1994 Salinas was succeeded by PRI candidate Ernesto ZEDILLO PONCE DE LEÓN, who pledged to continue Salinas's policy of free trade and controlled devaluation of the peso to encourage foreign and domestic investment in Mexico's manufacturing industries. Instead of the dynamic economic upswing that Salinas envisioned with the creation of NAFTA and his currency devaluation schemes, the Mexican economy was soon beset by an uncontrollable decline of the peso, which deterred the investment of further foreign capital in the Mexican economy. In 1995 Salinas's elder brother, Raúl, was arrested on charges of tax evasion, fraud and involvement in the 1994 assassination of a prominent politician. Shortly thereafter Carlos Salinas and his family left Mexico to live in exile in Switzerland.

Salinger, Jerome David (1916–) American novelist and short story writer. Salinger, who in the 1950s and '60s was widely read by American youths and attained a virtual cult status, has earnestly sought seclusion from the public eye. Hence relatively little is known about his life. Salinger was raised in New York City and educated at various schools including a military academy, much like Holden Caulfield, the protagonist of *CATCHER IN THE RYE* (1951), his most famous novel. Salinger served in the American infantry during WORLD WAR II and was decorated for bravery. In the decade following the war, Salinger's stories appeared frequently in *The NEW YORKER* magazine. Many of them concerned members of the fictional Glass family, all of whom were brilliant and extraordinarily sensitive to the everyday horrors of modern life. Salinger's other major works are *Nine Stories* (1953), *Franny and Zooey* (1961) and, in tandem, *Raise High the Roof Beam, Carpenters and Seymour: An Introduction* (1963).

Salisbury See HARARE.

Salk, Jonas (Jonas Edward Salk) (1914–1995) American microbiologist. Born in New York City, Salk received his M.D. from New York University Medical School in 1939. He researched the influenza virus at the University of Michigan, becoming an assistant professor of epidemiology there in 1946. In 1947 he moved to the University of Pittsburgh, where he was appointed professor of bacteriology in 1949. There he began work on the vaccine for poliomyelitis that would be the first such vaccine proved effective against the disease and that would make him a national hero in the U.S. His formulation, a formaldehyde-killed vaccine, was extensively field tested in 1953 and 1954. It was used throughout the world until it was largely supplanted by Albert SABIN's live-virus vaccine in 1960. In 1963 he became director of the Salk Institute for Biological Studies at the University of California, San Diego. His later researches concentrated on the search for an AIDS vaccine.

SALT The SALT (Strategic Arms Limitation Talks) I Treaty, signed May 26,

1972, by the U.S. and the Soviet Union, was the first agreement by those nations to limit their offensive nuclear weapons. As such, it was a highlight of DÉTENTE. The pact prohibited either country from building any new ICBM or submarine-based missile launchers for a period of five years. The SALT II Treaty, signed on June 18, 1979, further limited the number and type of offensive nuclear weapons the two countries were allowed to keep in their arsenal.

Salt March Two-hundred-mile march (1930) by Mohandas K. GANDHI and his followers to the sea to make salt from seawater, in defiance of a British ban on the Indian manufacture of salt. As part of his nonviolent campaign to achieve Indian self-sufficiency, Gandhi challenged the monopoly and the salt tax. Setting out on March 12, he reached the sea and made salt on April 5. He was arrested on May 4. Anti-British rioting followed later that month in Bombay and elsewhere.

Salyut The name given to the first seven Soviet space stations. The name means "salute" and honors Soviet cosmonaut Yuri GAGARIN, the first human in space. The first Salyut was launched April 19, 1971. *Salyut 7*, launched April 19, 1982, was "retired" though still orbiting when the MIR space station was launched in 1986.

Salzburg Festival Annual summer music festival held since 1920 in the town of Mozart's birth; suspended during World War II. Mozart festivals given in Salzburg from 1877 to 1910 attracted worldwide attention, especially when soprano Lilli Lehmann performed (1905–10). Richard STRAUSS, Max REINHARDT, Hugo von HOFMANNSTHAL and Franz Schalk founded the expanded festival in 1920. From 1957 until his death in 1989, Herbert von KARAJAN served as artistic director. Many of the great musicians of the world have appeared at the festival, including conductor Arturo TOSCANINI, composer-conductor Richard Strauss, and singers Marilyn Horne and Frederica VON STADE. The scope of the festival has broadened to include works by composers other than Mozart, such as Benjamin BRITTEN and Samuel BARBER.

Samaroff, Olga (Olga Hickenlooper) (1882–1948) American concert pianist and teacher. Samaroff (a name she adopted because it sounded more European than her own maiden name) made her concert debut in 1905, appearing with the New York Philharmonic at CARNEGIE HALL. She appeared with all the major American orchestras and was once married to conductor Leopold STOKOWSKI. She taught piano at the Juilliard Graduate School of Music from 1925 until her death.

Sambre River The Sambre River rises in France's Aisne department and flows northeastward to join the Meuse River at Namur in Belgium. In the 20th century it was the site of an important British victory in November 1918, as WORLD WAR I was drawing to a close.

Samil Independence Movement (1919–1920) JAPAN annexed KOREA against its will in 1910, and after WORLD WAR I Koreans argued unsuccessfully at the Paris Conference for their right of self-determination. On March 1, 1919, cultural and religious leaders signed a "Proclamation of Independence" in SEOUL, the capital. The independence movement spread rapidly, and in the following year over 1,500 peaceful demonstrations involving about 2 million people were held throughout the country. Japanese police and military harshly suppressed the demonstrators, killing or wounding 23,000, arresting 47,000 and imprisoning 5,000. The Japanese carried out minor reforms, permitting limited self-governance. Today, March 1 commemorates the demonstrators' patriotism in both South and North Korea.

samizdat Term coined by Soviet dissenters for the system of preparing and circulating writings, usually in typescript form, so as to avoid official censorship. Though this phenomenon appeared on a large scale in the late 1950s during the period of DESTALINIZATION, the word itself dates from the mid-1960s. It is a parody of the official acronym Gosizdat (State Publishing House) and means "self-publishing" or "do-it-yourself publishing." In *samizdat*, materials were circulated on the chain-letter principle. Typescript copies of the original text were passed on to trusted colleagues who in turn made further

copies and handed them on to their friends to do likewise.

The authors and distributors of *samizdat* often operated under conditions of great difficulty and risked arrest and imprisonment in the event of discovery. Two articles of Soviet law specifically prescribed terms of imprisonment for citizens who sought to express their opinions in ways disapproved of by the authorities. Article 190–1 of the Russian Soviet Federated Socialist Republic Criminal Code, "dissemination of fabrications known to be false which defame the Soviet state and social system," and Article 70 of the same code, "anti-Soviet agitation and propaganda," carried maximum penalties of three and 12 years' imprisonment respectively.

Samizdat became a permanent feature of Soviet life in the post-Stalin period. It provided an alternative, unofficial and uncontrolled channel of communication. *Samizdat* provided a forum for opinions, as well as a source of information on political, national, religious and literary themes that could not find expression in the official press and publishing. It was not limited to the larger Russian cities but was also well developed in some of the non-Russian republics of the Soviet Union, particularly in Lithuania and Ukraine. A striking feature of *samizdat* was the wide range and volume of its material. The range of subjects varied from petitions, protests and statements to complete novels, e.g., PASTERNAK'S *DOCTOR ZHIVAGO*, and lengthy historical works, e.g., SOLZHENITSYN'S *THE GULAG ARCHIPELAGO*. Perhaps the most outstanding achievement of *samizdat* was the appearance between 1968 and 1980 of over 50 issues of the journal *A Chronicle of Current Events*, the mouthpiece of the human rights movement in the USSR. The *Chronicle* reported on human rights violations throughout the Soviet Union and was noted for its objectivity and accuracy.

The practice of circulating uncensored material privately has a long tradition in Russia. It can be traced as far back as the 1820s when the poet Pushkin, the playwright Alexander Sergeyevich Griboyedov and others are known to have privately distributed manuscripts of works disapproved of by the censors. The practice flourished in the second half of the 19th century as various revolutionary groups, and

later political parties and national movements, emerged. It continued after the Bolshevik seizure of power in October 1917, and the creation of a new system of censorship. By the mid-1930s, however, the practice was effectively stamped out everywhere except in the labor camps, and it did not begin to reappear until after STALIN'S death in 1953.

Samoa, American American Samoa is a group of five volcanic islands and two coral atolls in the South Pacific Ocean that cover a total of 77 square miles; the capital is Pago Pago. In 1872 the Americans, in their search for a strategic harbor for their navy, gained exclusive rights from the high chief of the Polynesian inhabitants to use the harbor of Pago Pago on Tutuila, the main island in the eastern group. Rivalries among Germany, Britain and the U.S. eventually led to a convention between them, whereby the U.S. acquired Eastern Samoa. The territory, which became known as American Samoa in 1911, was administered by the U.S. Navy from 1900 to 1951, after which the U.S. Department of the Interior took over. American Samoa remains an unincorporated territory of the U.S.; its people are U.S. nationals, but not citizens. The 1960 constitution, combining traditional practices with the needs of a modern state, gives American Samoans self-government, with certain powers reserved to the U.S. secretary of the interior. A nonvoting delegate is elected to the U.S. House of Representatives. In 1978 Peter Tali Coleman became the first popularly elected governor; he was succeeded in 1984 by A. P. Lutali. A revised constitution, drawn up in 1986, excludes commoners and women from voting but has yet to be ratified by the U.S. Congress.

Samoa (Independent State of Samoa; formerly Western Samoa) Located in the southwestern Pacific Ocean, approximately 1,600 miles northeast of New Zealand (see map on page 957), Samoa is composed of two main islands (Upolu and Savai'i) and a number of smaller islands, and has a total land area of 1,093 square miles. New Zealand annexed Western Samoa, as Samoa was known before independence, in 1914 and administered it

(1920–62) on behalf of the LEAGUE OF NATIONS and the UNITED NATIONS. A constitution was drafted and independence achieved in 1962. The island state became a full member of the British Commonwealth in 1970 and joined the UN in 1976. In 1997 the archipelago formally changed its name to Samoa. The following year the federal government increased media censorship. In 2002 Samoa and New Zealand began to reconcile their differences following a formal apology by New Zealand for its colonial-era treatment of Samoan citizens. In February 2004 Australia announced it was giving a \$7 million grant to fund Samoan training of its security forces.

Samsonov, Alexander Vasilyevich (1859–1914) Russian general. Samsonov commanded the army that invaded East Prussia in August 1914 and was defeated by Generals LUDENDORFF and von HINDENBURG at the battle of Tannenberg; two Russian corps were destroyed and three others were reduced to half their size in one of the most decisive Allied defeats of WORLD WAR I. Samsonov committed suicide.

Sandburg, Carl (1878–1967) American poet and biographer. A major American poet, he was born in Galesburg, Illinois, the son of Swedish immigrants. A laborer by the age of 13, he fought in the Spanish-American War

and returned to his hometown to attend a local college. Graduating in 1902, he traveled across the U.S., worked on various newspapers and published his first poetry in 1904. Secretary to Milwaukee's socialist mayor from 1910 to 1912, he settled in Chicago in 1913, writing for a number of newspapers until the late 1920s. Little attention was paid to his poems until 1914, when they began to appear in Chicago's *Poetry* magazine. His reputation was established with the publication of *Chicago Poems* (1916) and was augmented by his next volume, the PULITZER PRIZE-winning *Cornhuskers* (1918). Sandburg's other books of verse include *Smoke and Steel* (1920), *Good Morning, America* (1928), *The People, Yes* (1936), *Complete Poems* (1950, PULITZER PRIZE, rev. ed. 1970) and the posthumous *Breathing Tokens* (1978). Writing with profound concern for the American experience and the American worker in unrhymed Whitmanesque free verse, his simple and vigorous language transformed ordinary life into a poetry that has influenced the course of American verse. Deeply interested in the history of the U.S., Sandburg was the author of an epic six-volume biography of Abraham Lincoln (1926–39). He also wrote a novel, *Remembrance Rock* (1948); a collection of folk songs, *The American Songbag* (1927); children's tales that include *Rootabaga Stories* (1922); and the autobiographical *Always the Young Strangers* (1953).
